24 HOURS: Not less than 24 hours prior to arrival at Khor Fakkan vessels will send a cable or telex to the Company and a cable or telex to Lamnalco reconfirming or giving any changes in the 24 hour notice. The 24 hour notice must be as accurate as possible and thereafter should there be any change in the ETA by more than 2 hours notice of such change must be given promptly to the Company and Lamnalco.

Not less than 24 hours prior to the vessel's ETA at Khor Fakkan the vessel must maintain a radio watch on R/T frequency 2182 and at least 12 hours prior to arrival at Khor Fakkan must maintain a radio watch on VHF Channel 16.

Other frequencies available are:
HF: 2638, 2738, 3270, 3710, 4136.3.
VHF: Channels 1 to 28, 60 to 74 and 77 to 88.
Call sign for Lamnalco base is "Gulf Pilot Khor Fakkan".

B. Vessels bound for the *SHORE BERTH* must advise the Company as follows:

48 HOURS: Not less than 48 hours prior to arrival at Khor Fakkan or such other location at which permission is requested of the Harbour Master for the Mooring Master to be on board, vessels will send a cable or telex to the Company and a cable to "Lamnalco Khor Fakkan" or telex to Lamnalco (telex number 89034 Pilotkf), providing the following information:

(a) Estimated time of arrival at Khor Fakkan or such other location where it is requested the Mooring Master board.
(b) Estimated fore and aft draft upon arrival at the port area.
(c) Cargo to be loaded or unloaded.
(d) Request for permission for Mooring Master to board at other than Khor Fakkan (if applicable).

24 HOURS: Not less than 24 hours prior to arrival at Khor Fakkan vessels or such other approved location, vessels will send a cable or telex to the Company and a cable or telex to Lamnalco reconfirming or giving any changes in the 48 hour notice. The 24 hour notice must be as accurate as possible and thereafter should there be any change in the ETA by more than 2 hours, notice of such change must be given promptly to the Company and Lamnalco.

Not less than 24 hours prior to the vessel's ETA at Khor Fakkan the vessel must maintain a radio watch on R/T frequency 2182 and at least 12 hours prior to arrival at Khor Fakkan must maintain a radio watch on VHF Channel 16.

Other frequencies available are:
HF: 2638, 2738, 3270, 3710, 4136.3.
VHF: Channels 1 to 28, 60 to 74 and 77 to 88.
Call sign for Lamnalco base is "Gulf Pilot Khor Fakkan".

TUGS: *Tugs and Launches:* The Company will have available a tug (3,600 h.p.) for berthing or unberthing and standing by a vessel at the Storage Tanker as may be required by the Master of the vessel or the Mooring Master for which a charge will be made by the Company, whether or not used. Should the Master of a vessel require more than 1 tug for the above purposes such must be separately arranged by the Master sufficiently in advance of the vessel's arrival at the port area to avoid delay in the berthing or unberthing of the vessel and any delay occasioned thereby will be charged to the vessel.

A line handling boat under the direct control and supervision of the Mooring Master will assist in berthing or unberthing of vessels.

BERTHS: The tanker terminal in the port area consists of the VLCC "Tropical Lion" ("Storage Tanker") connected to a single buoy mooring system located at Lat. 24° 46′ N., Long. 52° 31′ E., 1.25 miles West of Arzannah Island.

The berth at Arzannah Island ("Shore Berth") consists of a 700 ft. long earth filled pier with facilities required to load and unload diesel oil and desalinated water. Fire protection facilities on the pier include a firewater line and firewater monitors.

BERTHING:

Berthing–Unberthing: Berthing will normally take place only during daylight hours, weather permitting. Unberthing will take place at anytime (day or night), weather permitting. Manoeuvring power must be available on the main engine during berthing and unberthing operations. Mooring Masters will not berth vessels if not properly equipped with satisfactory mooring lines, or if deck equipment is inoperable or if steering gear, telegraphs or whistles are not in efficient condition or if insufficiently or improperly ballasted in the opinion of the Mooring Master. The vessel's Master is required to advise the Mooring Master if any such defects exist or any peculiarities of the vessel. The vessel will be responsible for the handling of lines and the connection and disconnection of the loading arms with the vessel's crew.

Mooring: Mooring arrangements shall be to the satisfaction of the Mooring Master. Vessels must at all times remain properly secured alongside the Storage Tanker or the Shore Berth. Moorings must at all times be attended by the vessel's crew, avoiding slack lines or varying tensions on the lines. The use of constant tension winches for automatic self-tensioning to attend mooring lines is prohibited. The Harbour Master may suspend loading or unloading should there be any failure by the vessel's crew to attend mooring lines as above stated.

Ballast Drafts: Vessels destined for the Storage Tanker should arrive with propeller completely submerged and 8 ft. to 10 ft. trim by the stern. The Mooring Master may refuse to permit berthing of vessels not in compliance with this requirement until the vessel takes on sufficient ballast or changes ballast to meet the requirement.

BALLAST: There are no facilities available for the off-loading of dirty ballast. Only clean or segregated ballast will be permitted to be discharged overboard. The vessel must keep a constant watch on the side of the vessel from which ballast is being discharged while clean or segregated ballast is being discharged overboard. Discharge of ballast must be immediately suspended should there be any indication of discoloration or sheen and immediately reported to the Harbour Master. An investigation shall be carried out by the vessel and the findings immediately reported to the Harbour Master. Deballasting shall not recommence without the permission of the Harbour Master.

LOADING: *Crude Oil Cargo Loading:* Loading operations cannot commence until permission has been granted by the Harbour Master. All operations after such permission is granted in connection with the starting of loading, switching of tanks and topping off on the vessel will be the responsibility of the vessel. At all times while the vessel is alongside the Storage Tanker there shall be a responsible licensed deck officer of the vessel on deck in charge of all operations on deck.

Prior to loading a pre-transfer conference will be conducted by the Harbour Master and a responsible deck officer of the vessel who will be in charge of the loading of the vessel. The purpose of the pre-transfer conference is to formulate a transfer plan and ensure that the Storage Tanker and the vessel are ready for safe loading and handling of the cargo.

The Harbour Master may suspend cargo operations if any of the applicable laws and safety regulations set forth herein are not complied with, the pre-transfer plan is not complied with or if the Harbour Master believes or becomes aware of the existence of any other danger which in his opinion requires suspension of loading.

The vessel's crew will be responsible for handling the loading arms on board the vessel, furnishing and making adaptor connections, removing blind flanges and guiding the loading arms (Chiksans) to the appropriate manifold connections. As a convenience to the vessel the Harbour Master will furnish advice and guidance in connecting the loading arms to the ship's manifolds.

Crude Oil Cargo: The crude oil to be loaded contains hydrogen sulphide. Breathing the vapours vented from this cargo could be hazardous. Vessel's crew should review the instructions issued by the vessel's Owner regarding this subject. The Company assumes no liability, with respect to loading crude oil bearing hydrogen sulphide.

Pumping Rate: Max. pumping rate using 2 arms. 60,000 b.p.h. Average pumping rate 55,000 b.p.h.

Storage tanker capacity: 1,400,000 bbls. Cargo Arzannah stabilized crude, API 43.0. Specific Gravity 0.8109. Reducers: In limited supply.

General Cargo Loading–Unloading: Loading or unloading operations cannot commence until permission has been granted by the Harbour Master. All operations after such permission is granted in connection with the loading and unloading of the vessel will be the responsibility of the vessel. At all times while the vessel is alongside the Shore Berth there shall be a responsible licensed deck officer of the vessel on deck in charge of all operations on deck.

The Harbour Master may suspend cargo operations if any of the applicable laws and safety regulations are not complied with or if the Harbour Master believes or becomes aware of the existence of any other danger which in his opinion requires suspension of loading.

POLLUTION: The Petroleum Ports Law prohibits the discharge into the water of oily water, garbage, waste or other objectionable materials. The Petroleum Ports Law also requires immediate reporting to the Harbour Master of any leakage or spillage by the vessel. The Law is strictly enforced and violators may be subject to fine and imprisonment.

The vessel's Master is responsible that no oil is pumped or spilled overboard from his vessel in the vicinity of the Port Area. In the event of any spillage or loss of oil from the vessel as the result of any act or omission of the vessel, such as, but not limited to, the pumping of oily water overside from ballast or bilges, or oil spilt during loading. The vessel shall be responsible for all costs and expenses of clean up, and for any damages to property or injury to persons resulting from such spillage or oil loss.

The Company reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea, but only as a contractor acting on behalf of the vessel or its owner, and will charge the vessel for all costs and expenses incurred thereby.

SAFETY REGULATIONS:

Safety: The Petroleum Ports Law, recommendations contained in the I.C.S. International Safety Guide for Oil Tankers and Terminals covering the loading and discharging of tankers and the safety regulations set forth herein will be strictly enforced while the vessel is in the Port area.

Smoking: Smoking is strictly prohibited on the vessel or the Storage Tanker and Shore Berth except in places specified by the Master which shall not be outside of any of the accommodation areas. The Master is responsible for ensuring that all on board are informed of the selected areas for smoking and for posting suitable notices. Matches and lighters for personal use shall not be carried while outside designated smoking areas and personnel shall be so instructed.

Fire Fighting Equipment: The vessel's fire fighting equipment must be ready for instant use while the vessel is moored. Fire hoses of sufficient length to reach all parts of the vessel must be strung out and connected to hydrants. If the vessel's fire fighting equipment is rendered inoperative for any reason this must be reported to the Harbour Master immediately.

Fires: The only open flames allowed while the vessel is moored at the Storage Tanker or the Shore Berth are those in the vessel's boilers and galley equipment. All other open flames are prohibited. Sufficient fire extinguishers must always be provided near the galley.

Engine Room/Boiler Room Precautions:

a) Combustion equipment – burners, tubes, uptakes, exhaust manifolds, and spark arresters shall be maintained in good working order and kept clean.
b) Blowing tubes – funnel uptakes and boiler tubes will not be blown while a vessel is moored at the Storage Tanker.
c) Cleaning solvents – highly volatile cleaning solvents shall not be used in the engine room for any purpose whatsoever.

Doors, Ports: All doors and ports opening on to decks must be kept closed while the vessel is moored. Any doors open for access other than the pumproom doors must be closed immediately after use.

Cargo Tank Openings: All cargo tank hatch covers and ullage port covers are to be kept closed. If tanks must be hand sampled or ullaged the ullage openings must be kept closed except while sampling or ullaging cargo.

Sea Valves: All sea and overboard discharge valves are to be closed and sealed shut prior to the start of any cargo loading operation.

Inerting Tanker Cargo Tanks: All empty cargo tanks or tanks carrying cargo must be over pressured and fully inerted with gas having an oxygen content of less than 8% prior to the commencement of loading. The oxygen content of the tank blanket will be checked throughout the loading and loading will be stopped anytime the oxygen level rises above 8%.

Insurance (Towing) Wires: Towing wires of at least 50 m. long are to be secured to mooring fittings and run out at the bow and stern on the vessel's outboard side and held in place on short stoppers with the eye about 1.5 m. above the water so they are readily available to a tug in an emergency.

Bonding Cable: The bonding cable from the Storage Tanker or the Shore Berth must be attached to the vessel before the loading arms are connected and removed only after the loading arms are disconnected from the vessel.

Electrical Storms: All cargo or ballasting operations shall be suspended during electrical storms in the vicinity of the vessel.

Engine Status: The vessel's main engine, steering machinery and other essential manoeuvring equipment must be kept in readiness at all times to permit the vessel to unberth on short notice. No engine or propulsion machinery repairs may be carried out while the vessel is moored alongside the Storage Tanker. At all times while the vessel is alongside the Storage Tanker there shall be a responsible licensed engineer of the vessel on duty in charge of all operations in the engine room.

Radio–Radar: The vessel's main radio and radar equipment and radar set must not be energised while the vessel is handling cargo or ballast alongside the Storage Tanker or the Shore Berth. The use of intrinsically safe VHF radios for cargo handling and safety operations is permitted.

Scuppers and Drains: All main deck scuppers must be sealed shut and adequate drip pans provided where necessary on deck prior to the start of any cargo operations.

Tug and Small Craft: No tug or small craft are permitted to be alongside the vessel during cargo or ballasting operations without the express permission of the Harbour Master.

Portable Lamps Electrical Equipment: The use of portable lamps, naked lights or electrical equipment on extension cords is prohibited. Only approved intrinsically safe self-contained flash lights are permitted on deck.

Communications and Deck Watch: A deck watch under the direction of a responsible deck officer equipped with a VHF radio is to be on duty at the cargo manifold of the vessel at all times during the cargo and deballasting operations.

Fire and Emergency Signal: In case of fire or emergency on the Storage Tanker or the Shore Berth or the vessel, the vessel shall immediately suspend all cargo operations and blow a series of short, rapid blasts on the ship's whistle until aid arrives.

Rat Guards: Rat guards are required only if a vessel is coming from a plague infected area.

Safety Check List: A safety check list shall be completed and signed by the Master or Senior Deck Officer on duty on both the vessel and the Storage Tanker or the Shore Berth before deballasting and starting the transfer of cargo.

Responsibility for Safe Operations: While a vessel is berthed at the Storage Tanker the Master will ensure and be responsible for adherence to all safety regulations generally followed in the Marine Industry as well as those contained herein. It is the responsibility of the Master to maintain safe and efficient conditions aboard his vessel and to ensure that there is at all times on duty an adequate and proper crew under the supervision of licensed officers for the safe and effective operation of the vessel and compliance with these instructions and regulations.

FACILITIES: There are no facilities at Arzannah Island or the Storage Tanker for receiving or storing supplies for vessels, bunker or fresh water supply, launch service, etc., excepting vessels servicing the Company's operations in the port area.

TIME: GMT plus 4 hours.

GENERAL: *Regulations:* Shipping operations at Arzannah are governed by the Abu Dhabi Petroleum Ports Law No. 12 of 1973 (Petroleum Ports Law).

Agency: The Company does not provide any ship agency services and there are no ship agencies within the port area. Such services must be separately arranged for by the vessel.

AUTHORITY: Amerada Hess Oil Corporation of Abu Dhabi, P.O.Box 2046, Abu Dhabi, U.A.E. *Tel:* 829500. *Telex:* 22275 Amhess Em. *Cables:* Amerhess. *Contact:* R. F. Pool, General Manager.

AGENT: See "Mina Zayed".

DAS ISLAND, Abu Dhabi: 25.09 N. 52.52 E.

(See Plan Book)

Conduct and movement of vessels within the port are controlled by the Marine Superintendent, Das Island.

DESCRIPTION: Das Island lies some 100 miles N.W. of Abu Dhabi City, in the State of Abu Dhabi, largest of the United Arab Emirates. The Island is the base for the export of crude oil by Abu Dhabi Marine Operating Company (ADMA-OPCO), and liquefied gas and by-products by Abu Dhabi Gas Liquefaction Company Ltd. (ADGAS).

PORT LIMITS: The area of authority is encompassed by a line joining the following positions:

From (a) Lat. 25° 14.0′ N., Long. 52° 48′ E., due East
to (b) Lat. 25° 14.0′ N., Long. 52° 57′ E., then due South
to (c) Lat. 25° 07.7′ N., Long. 52° 57′ E., then S.E.
to (d) Lat. 25° 07.2′ N., Long. 52° 58.8′ E., then due South
to (e) Lat. 25° 04.5′ N., Long. 52° 58.8′ E., then due West
to (f) Lat. 25° 04.5′ N., Long. 52° 48′ E., then finally due North to position (a).

All marine orientated activities within this area, all waters, installations, facilities and structures which are, or may be, erected therein are governed by the Controlling Authority.

DOCUMENTS:

Bills of Health for Ports visited on voyage.
3 Crew Lists.
3 Manifests (1 original and 2 copies).
1 International Maritime Declaration of Health.

Documents and Specimen Forms: Before the ADMA-OPCO appointed Berthing Master commences any berthing operations certain initial documents must be tendered duly signed, timed and dated as applicable, by the Master. The Berthing Master will acknowledge receipt as necessary. These initial documents are:

019-MAR-1 Conditions of Use of the Port of Das Island.
019-MAR-2 Employment of Tugs.
019-MAR-3 Ballast Declaration.
019-MAR-4 Pre-Berthing Declaration.
Additionally vessels loading Condensate Blend Cargoes:
019-MAR-19 H_2S Content in Condensate Cargo.

A supply of these initial documents will be provided at the vessel's first visit to Das Island. On second and subsequent visits the Berthing Master will receive the documents, duly completed, on boarding thereby avoiding any delays to the vessel.

Also see "General".

FLARE COMPLEX: A series of 6 flares are located in an arc approximately 4,500 ft. (1,370 m.) North of Das Island. The unlit flares may be brought into service without warning. The Northern perimeter of the Flare Zone is marked by a green conical light buoy, Fl. G. 5 secs., in position: Lat. 25° 11.5′ N., Long. 52° 52.2′ E.

An additional flare is situated on a small jetty extending approximately 400 ft. (120 m.) from shore approximately 2,500 ft. (760 m.) from LNG/LPG Berth No. 4.

Numerous flares are situated onshore on the North and N.W. coasts of Das Island.

All of the flares previously referred to are situated within the Restricted Area No. 1.

PIPE-LINE MARKER BUOY: A yellow can buoy fitted with flash (U) 12 secs. amber light, is situated between Berth No. 2 and Berth No. 4. This buoy marks the Southern extremity of pipe-lines running between the two berths. Approximate position of buoy: Lat. 25° 09.1′ N., Long. 52° 53.2′ E.

DAS ISLAND RADIO MAST: See "VHF".

APPROACHES: *Entering and Navigation within the Port:* Navigation/movement within the port area is permitted subject to prior permission being granted by the Controlling Authority. Vessels visiting the port area must have on board a sufficient range of current hydrographic charts relevant to the area. These charts must be kept up-to-date with regard to Notices to Mariners and other notices promulgated for the area.

CAUTION:

The Umm Shaif Oil Field is approximately 20 miles East of Das Island.
The Zakum Oil Field is approximately 48 miles S.E. of Das Island.
The Bunduq Oil Field is approximately 15 miles West of Das Island.

The Fields, together with their associated submarine oil and gas pipe-lines to Das Island are marked upon hydrographic charts pertaining to the area.

It is essential that vessels/craft approaching Das Island do not enter the Oil Field areas or anchor in the vicinity of submarine pipe-lines.

NOTE: Masters of vessels/craft are advised that actual depths over submarine pipe-lines are generally less than those charted and vessels passing over these pipe-lines may have the under-keel clearance substantially reduced.

Use of anchors in the vicinity of these pipe-lines is strictly prohibited. (See Note: "Pipe-lines" on BA and USHO Charts.)

Approaches to Das Island: Vessels approaching Das Island must navigate with due caution on account of numerous oil platforms and associated submarine pipe-lines within the waters of Abu Dhabi and neighbouring states. (See Cautions on BA and USHO Charts.)

Vessels passing to the East of Das Island must not pass closer than 2 miles from the Island, and then only with prior permission of the Controlling Authority and giving due care and attention to vessel movements within the port.

SOUTHERN ROUTE:

Vessels approaching from the South must pass not closer than 3 miles South of oil installations etc., in the Umm Shaif Field, thence towards the pilot/anchorage areas S.E. of Das Island (See "Pilotage" and "Anchorage").

Special attention shall be paid to the traffic routing system which passes between the Umm Shaif and Zakum Oil Fields, and vessels/craft shall navigate in accordance with the requirements of the International Rules and Regulations for the prevention of collisions at sea.

NORTHERN ROUTE:

Vessels approaching from the North should normally pass down the West side of Das Island and keep at least 4 miles to the West and at least 5 miles to the South of the Island. However, vessels may pass to the East of Das Island with permission of the Controlling Authority but see note above.

DEEP DRAFT VESSELS:

Deep drafted vessels may approach the port via the Deep Water Buoyed Channel (See "Navigation Aids"). The channel is intended primarily for the use of deep drafted vessels sailing from Das Island, but vessels intending to enter the port via this channel should advise 'Das Marine' by radio, of their intentions. Masters are advised that this channel is not for the exclusive use of Das Island traffic and are cautioned to proceed accordingly.

PILOTAGE: Company-appointed Berthing Masters are the designated representatives of the Controlling Authority and, as such, are responsible to the Controlling Authority for the observance and implementation of Standing Instructions for Marine Operations.

The Berthing Master will normally board the vessel approximately 2 miles E.S.E. from Tanker Berth No. 2. The pilot station is at Lat. 25° 08′ N., Long. 52° 55.4′ E.

For vessels entering from the North the Berthing Master may board in a different location. If so, he will advise the Master accordingly via VHF radio.

The Berthing Master will undertake the pilotage, berthing and unberthing of the vessel save that the Master of the vessel shall remain solely responsible on behalf of the Owners for the safety and safe navigation of the vessel at all times.

Tankers and Gas Carriers: Tankers and gas carriers are not permitted to berth at or unberth from any of the berths in Das Island without a Company-appointed Berthing Master on board.

General Cargo Vessels: General cargo vessels are not normally required to employ a Berthing Master, but may obtain pilotage assistance by prior application to the Controlling Authority. Vessels are required to use the anchorage area designated for cargo operations (See "Anchorage"), but may anchor in the main anchorage while awaiting weather conditions to improve, availability of lighters or if the designated anchorage is congested.

Small Craft: Craft entering the boat harbour are not required to hire pilotage services, but may do so by prior application to the Controlling Authority.

Movements of all craft into, within or out of the boat harbour is at the discretion of the Controlling Authority. Allocation of berths is the sole responsibility of the Controlling Authority. No craft are allowed to enter, manoeuvre within or sail from the boat harbour during the hours of darkness without the prior permission of the Controlling Authority.

ANCHORAGES: Designated anchorages are established for use by vessels/craft visiting the Port of Das Island. The use of anchors outside these areas must only be undertaken after obtaining permission from the Controlling Authority.

Main Anchorage Area: This anchorage area lies to the S.E. of Das Island and is for tankers, gas carriers and other large vessels. The area is encompassed by lines joining the following positions:

(a) Lat. 25° 08.0′ N., Long. 52° 55.4′ E. to
(b) Lat. 25° 07.2′ N., Long. 52° 58.8′ E. to
(c) Lat. 25° 04.5′ N., Long. 52° 58.8′ E. to
(d) Lat. 25° 04.5′ N., Long. 52° 55.4′ E. and finally to (a).

Optional Anchorage Area: An optional anchorage for deep draft vessels is located approximately 1 mile to 1.5 miles N.W. from No. 12 Deep Water Channel Buoy.

General Cargo Vessels: The offloading anchorage for general cargo vessels is situated approximately 6 cables South of Tanker Berth No. 2 in an area encompassed by a line joining the following positions:

(a) Lat. 25° 07.5′ N., Long. 52° 53.00′ E. to
(b) Lat. 25° 08.0′ N., Long. 52° 53.00′ E. to
(c) Lat. 25° 08.0′ N., Long. 52° 53.41′ E. to
(d) Lat. 25° 07.5′ N., Long. 52° 53.63′ E. and finally to (a).

Small Craft and Barges: This anchorage lies to the S.W. of Tanker Berth No. 2, in an area encompassed by a line joining the following positions:

(a) Lat. 25° 08.0′ N., Long. 52° 53.00′ E. to
(b) Lat. 25° 08.4′ N., Long. 52° 53.00′ E. to
(c) Lat. 25° 08.4′ N., Long. 52° 53.23′ E. to
(d) Lat. 25° 08.0′ N., Long. 52° 53.41′ E. and finally to (a).

CAUTION:

(a) Pipe-lines connecting the tanker berths to the shore lie close to the Northern boundary of this anchorage.

(b) Within the small craft anchorage area are mooring buoys, installed by the Company for their own usage. The number of buoys installed and their position are liable to be changed without promulgation of any notices.

The use of these buoys by any craft is subject to permission being granted by the Controlling Authority. Unauthorised occupancy of these buoys could result in strong action being taken against the craft, and any consequential damage/loss of earnings/incidental expenses etc. incurred by the Company will be for the account of the offending craft.

Holding Ground (Sea Bed): The sea bed around Das Island is rock, covered by a few inches of loose sand. Holding is poor and vessels are urged to exercise due care and pay out extra chain.

Wind and Tide: Prevailing winds are from the N.W. Rise of tide can be up to 2 m. but the usual variation is 1 m.

Also see "VHF".

PROHIBITED ANCHORAGES: Prohibited anchorage areas have been established at Das Island. The use of anchors within these areas is strictly prohibited.

Prohibited Anchorage – South of Das Island: A prohibited anchorage area is established to the South of Das Island in an area encompassed by a line joining the following position:

(a) Lat. 25° 08.38′ N., Long. 52° 52.50′ E. to
(b) Lat. 25° 08.00′ N., Long. 52° 52.50′ E. to
(c) Lat. 25° 08.00′ N., Long. 52° 53.00′ E. to
(d) Lat. 25° 08.50′ N., Long. 52° 53.00′ E. then to shore in
(e) Lat. 25° 08.50′ N., Long. 52° 52.78′ E.

Prohibited Anchorage – Tanker Berth No. 3: A prohibited anchorage area exists within a circular area of radius 1,500 ft. (460 m.) centred on Tanker Berth No. 3 in Lat. 25° 08′ 53″ N., Long. 52° 54′ 07″ E. This is also a RESTRICTED AREA.

RESTRICTED AREAS: Restricted areas have been established at Das Island. Vessels/craft are only allowed to enter these areas for duly authorised operational purposes.

Restricted Area No. 1: Enclosed by a line joining the following positions:

(a) Lat. 25° 09.35′ N., Long. 52° 52.77′ E. on shore to
(b) Lat. 25° 09.30′ N., Long. 52° 53.05′ E. to
(c) Lat. 25° 09.16′ N., Long. 52° 53.10′ E. to
(d) Lat. 25° 09.20′ N., Long. 52° 53.30′ E. to
(e) Lat. 25° 09.55′ N., Long. 52° 53.20′ E. to
(f) Lat. 25° 09.55′ N., Long. 52° 53.00′ E. to
(g) Lat. 25° 10.54′ N., Long. 52° 53.00′ E. to
(h) Lat. 25° 10.54′ N., Long. 52° 52.20′ E. to
(i) Lat. 25° 09.80′ N., Long. 52° 52.20′ E. to
(j) Lat. 25° 09.80′ N., Long. 52° 51.85′ E. to
(k) Lat. 25° 09.00′ N., Long. 52° 51.85′ E. the East to shore.

Restricted Area No. 2: Enclosing Tanker Berth by a line joining the following positions:

(a) Lat. 25° 08.80′ N., Long. 52° 53.10′ E. on shore to
(b) Lat. 25° 08.86′ N., Long. 52° 53.30′ E. to
(c) Lat. 25° 08.30′ N., Long. 52° 53.50′ E. to
(d) Lat. 25° 08.25′ N., Long. 52° 53.30′ E. then finally to (a).

Restricted Area No. 3: A circular area of radius 1,500 ft. (460 m.) centred on Tanker Berth No. 3 in position: Lat. 25° 08′ 53″ N., Long. 52° 54′ 07″ E. This is also a prohibited anchorage area.

MAX. SIZE: See "Berthing".

HEALTH: Vessels arriving at Das must carry the usual Bills of Health for ports visited on the voyage. Masters of vessels are required to inform Abu Dhabi Marine Operating Company (ADMA-OPCO) if there is any sick person on board or if there has been sickness on board within the week prior to arrival. Pratique is granted by the Port Medical Officer normally through the Berthing Master.

Health Certificate with valid cholera inoculation (if coming from cholera-infected areas) is compulsory.

RADIO: *Arrival Messages:* All vessels bound for Das Island should give 72 hours' notice of ETA with updates at 48 hours and 24 hours prior to arrival. When this is impractical, an estimated date of arrival must be given and this updated and confirmed as soon as possible.

Also see "Berthing" – Tanker Berth No. 3.

VHF: Das Marine maintains a 24 hour listening watch on VHF Channels 12 and 16 and works Channels 12 and 74.

All communications other than Terminal VHF should be sent through "Bahrain Radio".

Das Island radio mast is installed in position: Lat. 25° 08′ 30.396″ N., Long. 52° 52′ 43.903″ E. Red lights visible all round the horizon are established at the top of the mast, 268 ft. (81.8 m.) above chart datum.

Vessels Anchoring: Vessels anchoring to await berthing instructions must advise "Das Marine" via VHF Radio of:

(a) Anchoring time (Local Time is GMT plus 4 hours)
(b) Anchoring position (bearing and distance from Tanker Berth No. 2).

All vessels at anchor must keep a listening watch on VHF Channels 12 and 16.

When a vessel leaves the anchorage it must advise "Das Marine" via VHF Radio of:

(a) Time departed anchorage.
(b) Reason for departing.

RADAR: Not available.

TUGS: *Tugs and Mooring Launches:* Three Fire Fighting, Pollution Control and Salvage Tugs are generally available at Das Island to assist in berthing/unberthing vessels at the bulk petroleum and LNG/LPG facilities.

Minimum of 2 tugs used for berthing.

NOTE: Only tug's towing equipment shall be used for these operations and only in an emergency situation and in order to avert a potential disaster may ship's equipment be considered for use.

Mooring launches are available for berthing/unberthing operations and for the transportation of personnel.

BERTHING: Tanker Berth No. 1:

Platform position: Lat. 25° 08′ 24″ N., Long. 52° 53′ 19″ E.

Berth not in use. Structure and lights temporarily remain.

Tanker Berth No. 2:

Platform position: Lat. 25° 08′ 39″ N., Long. 52° 53′ 14″ E.

General: This is a fixed platform berth situated approx. 2,400 ft. (750 m.) East of Das Island. Vessels berth alongside 4 flexible dolphins, and 6 mooring dolphins are provided to receive moorings.

Berthing limitations: Capable of accepting vessels of between 16,000 and 265,000 L/T S.D.W. subject to the following limitations as to berthing:

(a) Ballasted or partially loaded tankers up to a maximum of 165,000 L/T displacement.

(b) Fully loaded tankers up to 130,000 L/T S.D.W. provided the displacement does not exceed 165,000 L/T.

(c) Vessels with a max. draft not exceeding 56 ft. (17 m.).

Minimum depth of water alongside is 67 ft. (20.4 m.) at datum.

Moorings: A minimum of 8 mooring lines must be available at each end of the vessel.

General mooring pattern for vessels up to 130,000 L/T S.D.W.:

Forward: 3 headlines, 2 breastlines, 1 spring.
Aft: 3 sternlines, 2 breastlines, 1 spring.

General mooring pattern for vessels in excess of 130,000 L/T S.D.W.:

Forward: 3 headlines, 3 breastlines, 1 spring.
Aft: 3 sternlines, 2 breastlines, 2 springs.

Loading/Discharge Rates: Maximum cargo loading rate is 32,000 bbls./hr. per 16 in. hose (4,200 t.p.h.), 4×16 in. hoses are available. Maximum fuel oil loading rate is 5,000 bbls./hr. per 10 in. hose (750 t.p.h.), 2×10 in. hoses are available. For fuel oil discharge the maximum pressure is 100 p.s.i. at ship's manifold (7.03 kg/sq.cm.).

Control of Loading /Discharge & Safety: Loading/discharge must proceed to a pre-declared plan. Co-ordination of loading/discharge will be undertaken by the Duty Berthing Master, who will also conduct the necessary safety checks at frequent intervals.

Tanker Berth No. 3 (SPM):
Buoy position: Lat. 25° 08′ 53″ N., Long. 52° 54′ 07″ E.

Additional pre-arrival message: The following message will be transmitted to vessels which are nominated to berth at Tanker Berth No. 3.

Quote:

Present indications that vessel will berth at No. 3 SPM. Ship's derrick/crane should be rigged on port side.

Ship's manifold suitable for connection of up to 2×16 in. crude and 1×10 in. bunker hoses. Mooring and hose connection by ship's crew. Mooring and hose connection equipment shipped on board after Berthing Masters board. Request accommodation be provided for 2 Berthing Masters whilst on board. Please confirm soonest SWL of hose handling crane/derrick and that suitable forward panama/fairlead aperture is minimum 24 in. horizontally and 18 in. vertically.

Unquote.

General: Tanker Berth No. 3 is a Single Point Mooring (SPM) situated approx. 7,500 ft. (2,285 m.) East of Das Island. The buoy is moored in 94 ft. (28.65 m.) of water at datum, and is served by a 48 in. crude oil submarine pipe-line and a 22 in. fuel oil (bunker) submarine pipe-line.

Vessels will be required to be fitted with a hose handling crane/derrick capable of plumbing at least 2 ft. outboard of the ship's side over the entire length of the portside manifold (including the bunker connection). Minimum SWL of the crane/derrick to be in accordance with the following requirements.

Less than 100,000 L/T S.D.W. 8 tons.
100,000 – 300,000 L/T S.D.W. 10 tons.
Over 300,000 L/T S.D.W. 12 tons.

Berthing Limitations: Capable of accepting vessels up to 410,000 L/T S.D.W. subject to the following limitations: Maximum berthing draft of 72 ft. (22 m.). Maximum sailing draft of 79 ft. (24 m.).

(See "Approaches" "Cautions" – Note: Actual depths over submarine pipe-lines).

Mooring at SPM: The fixed mooring at Tanker Berth No. 3 is a 21 in. circumference nylon braidline rope, 160 ft. (50 m.) long, terminating in a 3 in. diameter stud link chafing chain.

The vessel must have a suitable bow fairlead (24 in.×18 in.) to permit direct connection of the 3 in. diameter stud link chafing chain to a Schmit or similar bracket. If no bracket is available the Company will supply a 15 in. circumference nylon snotter and a 300 ton shackle for connection to the chafing chain. The Company will also supply a special pear shaped link to aid connection to Schmit bracket or when utilizing the nylon snotter.

Loading Rates: The crude oil loading installation comprises 2×10 in. floating hose strings each terminating in 16 in. tail hoses. The fuel oil (bunker) loading installation consists of 1×16 in. floating hose string terminating in a 10 in. tail hose. Flanges are to BS 1560.

Various reducers/spool pieces are available, with prior knowledge of vessel connections if different from shore fittings. Adequate ship crew and tools must be provided for the safe and efficient connection of hoses. There is no shore assistance for connecting/disconnecting of hoses.

Maximum cargo loading rate is 46,000 bbls./hr. per 16 in. hose (6,000 t.p.h.), 2×16 in. hoses are available. Maximum fuel oil loading rate is 7,000 bbls./hr. per 10 in. hose (1,000 t.p.h.), 1×10 in. hose available.

Control of Loading and Safety: Loading must proceed to a pre-declared plan. Co-ordination of loading will be undertaken by the Duty Berthing Master, who will also conduct the necessary safety checks at frequent intervals.

LNG/LPG Berth No. 4:
Platform position: Lat. 25° 09′ 22″ N., Long. 52° 53′ 08″ E.

General: This is an ADGAS installation for the transfer of LNG/LPG and related products. Movement of vessels to and from the berth are governed by the Controlling Authority.

The berth is a fixed platform type and is situated approx. 4,300 ft. (1,300 m.) N.N.W. from Tanker Berth No. 2 Platform. Vessels berth alongside flexible dolphins and 7 mooring dolphins are provided to receive moorings.

Berthing Limitations: Capable of accepting vessels up to 100,000 L/T displacement subject to a maximum draft alongside of 46 ft. (14 m.). Minimum depth of water alongside is 49 ft. (14.95 m.) at datum.

Moorings: A minimum of 8 mooring lines must be available at each end of the vessel.

General Mooring pattern is:
Forward: 3 headlines, 3 breastlines, 2 springs.
Aft: 3 sternlines, 3 breastlines, 2 springs.

Loading Rates: Loading LNG/LPG and associated products is the responsibility of ADGAS. Maximum LNG loading rate is 10,500 cu.m.p.h. Maximum LPG loading rate is 4,000 cu.m.p.h. Maximum Pentane Plus loading rate is 10,000 bbls./hr. (1,200 t.p.h.). Maximum fuel oil loading rate is 4,500 bbls./hr. per 8 in. flexible hose (650 t.p.h.).

Vessels must have crane/derrick rigged on port side to assist with connection of Fuel Oil (bunker) hose.

Control of Loading: Co-ordination of loading is the responsibility of ADGAS. Fuel Oil (Bunker) loading will be co-ordinated by the Duty Berthing Master, who will also conduct the necessary safety checks at frequent intervals. Masters of vessels are requested to provide accommodation for the Berthing Master for the duration of the vessel's berth occupancy.

Small Boat Harbour : Das Island Small Boat Harbour is situated at the South of Das Island. There are a total of 14 berths available at this time, usage of which is governed by the Controlling Authority.

Eastern Extension: Consists of 2 berths (No. 1 and 2) which are reserved for use by ADMA – OPCO and direct hire deep sea tugs, also for the importation of petroleum products. Maximum draft permitted is 15.5 ft. (4.7 m.).

Inner Harbour: Consists of 12 berths (No. 3 through No. 14). The facilities are reserved for ADMA – OPCO small craft, Government craft and contracted craft for the loading/discharge of materials and supplies.

GENERAL CARGO OPERATIONS: No loading/unloading facilities exist in the port area for cargo vessels and such vessels must provide all equipment and machinery to facilitate transfer of cargo to/from barges, lighters etc., at the designated anchorage area.

Cargo Manifests: One original and two copies of General Cargo Manifests are required to be supplied by the vessel.

Discharging/Loading: Vessels should arrive with all derricks etc., rigged and ready for cargo handling. Barges and associated craft must satisfy the mandatory requirements of the Controlling Authority, the Consignee being responsible for the provision and control of barges and associated craft. Cargo transfer will normally be carried out continuously dependent on weather conditions.

Dangerous Cargo: The Controlling Authority must be informed of any dangerous cargo carried in any vessel arriving within the port area whether it is intended for discharge at Das Island or not. Masters of vessels are requested to confirm that any dangerous cargo being carried is stored in accordance with the "Recommendations for the Carriage of Dangerous Goods in ships by the United Kingdom Department of Trade and Industry" or other recognised authority.

CRUDE OIL LOADING: 2 grades of crude are available on each berth. Zakum Crude average API 40° (approx.), and Umm Shaif Crude of 37° (approx.).

Associated product available at this time is Condensate Blend of API 60° (approx.).

All tankers of 70,000 long tons s.d.w.t. must comply with the IMO 1978 protocol and must employ inert gas system.

Masters of vessels arriving to load Condensate Blend cargoes must sign a Declaration (019-MAR-19) to signify that they realise they are loading a highly volatile cargo which contains dangerous quantities of Hydrogen Sulphide (H_2S) in the gas evolved from the cargo.

DENSITY: 1025.

BALLAST: There are no facilities for receiving vessel's ballast ashore for treatment. All vessels must have clean ballast for over-board discharge.

Masters of vessels arriving at Das Island will make a pre-berthing declaration regarding ballast (019-MAR-3).

MEDICAL: A Company Medical Officer and small hospital are available, subject to the Company's discretion, to vessel's crews. Charges for attention, treatment and associated facilities are for the vessel's account.

Masters of vessels must take precautions against heat exhaustion and heat stroke.

Requests for medical attention must be made to the Agency, or through the Duty Berthing Master.

Personnel allowed ashore for medical attention must carry with them Passports/Seaman's card and Health Documents and, if necessary, be accompanied by an interpreter (English or Arabic). An Agency representative will accompany them to the Hospital, but they will not be permitted to visit other Das Island facilities.

FRESH WATER: Not available.

FUEL: Fuel oil bunkers are available at all tanker and liquid gas berths. Type: Interfuel/1500 secs./180 CSD/Redwood. Enquiries should be directed to:

1. BP Trading Limited, London. Telegraphic Address: Bepebunker London EC2. International Telex: 888811.

or, 2. Total Trading International (S.A.), Geneva. Telegraphic Address: Totalintra Geneva. International Telex: 28822.

or, 3. ADNOC, P.O.Box 898, Abu Dhabi, U.A.E. Cables: ADNOC, Abu Dhabi. Telex: EM 22215.

Local enquiries for bunkers should be made to the above companies through ADMA-OPCO.

NOTE: There are no facilities available for the supply of diesel oil through the tanker/liquid gas berths.

Small craft on charter to ADMA-OPCO are able to obtain limited supplies of diesel oil, the facility is only available through prior contractual agreement and must be loaded at the small boat harbour.

FIRE PRECAUTIONS: Three fire-fighting tugs available.

GANGWAYS: Shore gangways are provided at Berth Nos. 2 and 4, vessel to provide access steps from gangway at ship's rail. At Berth No. 3 vessel must provide accommodation ladder on both sides of the vessel for access.

CUSTOMS ALLOWANCES: No restrictions for tobacco or liquor onboard. Conveyance of alcoholic liquor from any vessel to the shore or from the shore to any vessel, or from one vessel to another, is prohibited.

CONSULS: HBM Hon. Vice-Consul, Marine Department, Abu Dhabi Marine Operating Company (ADMA-OPCO), Das Island, Abu Dhabi. Ext. Tel: Das 3404. Cables: Admarine Das Abu Dhabi.

REPAIRS: No repair facilities are available at Das Island. No repairs are permitted within port limits without prior permission of the Controlling Authority.

DRY DOCKS: None.

SURVEYORS: Not available.

TELEPHONES: No onboard facilities – fixed berths are linked to Island telephone system. On LNG/LPG Berth No. 4 a ship/shore telephone connection is available.

BANKS: National Bank of Abu Dhabi and Bank of Credit & Commerce. Das Island, Abu Dhabi, U.A.E.

STORING: Not available.

REGULATIONS: No cameras allowed on the Island – high security area.

REPATRIATION: There are no facilities for crews of visiting vessels to join or leave vessels at Das Island. Repatriation for medical reasons may be arranged at Master's request with the consent of the Das Island resident medical officer.

AIRPORT: ADMA operated private airport.

TIME: GMT plus 4 hours.

POLICE/AMBULANCE/FIRE: All emergencies: No. 2 Tanker Berth Tel: 3333. No. 4 LNG/LPG Berth, Tel: 2222.

SHORE LEAVE: No shore leave is permitted at Das Island. Any crew member who comes ashore unauthorised will be considered as having entered the UAE illegally and as such will be liable to a heavy fine and/or imprisonment.

GENERAL: All vessels entering the port of Das Island must comply with the International Agreement on Safety of Life at Sea (SOLAS) and its amendments and all tankers with the IMO 1978 Protocol.

The Masters of tankers/gas carriers must comply with the following:

Pre-Berthing Declaration and Inspection: All vessels arriving at the Port of Das Island must be suitably ballasted and/or trimmed for berthing with regard to weather and existing circumstances.

All vessel's personnel must be familiar with the Das Island Safety Requirements and other applicable Standing Instructions.

Safe and adequate access to the vessel must be provided for the Berthing Master. If the Berthing Master considers the means of access unsafe or unsuitable, the vessel will be delayed until such time as proper access is provided. Any loss will be to the vessel's account.

The requisite initial documents must be completed in full, signed and handed to the Berthing Master prior to commencement of berthing operations. (See "Documents", 019-MAR-1, 019-MAR-2, 019-MAR-3, 019-MAR-4).

Permission to berth will not be granted unless the Berthing Master is satisfied that the vessel can safely complete all parts of the operation, including but not limited to, berthing, ballasting, deballasting, cargo transfer and sailing. If for any reason it is deemed necessary to refuse permission to berth, the Controlling Authority will be informed and a detailed inspection of the vessel will be undertaken. Shortcomings, etc. will be noted and the Master informed of them. If the vessel is unable to rectify the identified faults, it will be removed from the Port Area. Owners/Charterers will be notified accordingly.

Fire Wires (Emergency Towing Wires): Emergency towing/fire wires of sufficient strength and construction are to be provided and secured forward and aft, on the offshore side of the vessel, with the towing eye maintained at 6 ft. (2 m.) above the water level.

Access to Vessel: While at the loading berths all vessels must provide an accommodation/pilot ladder suitably positioned and maintained at 6 ft. (2 m.) above the water level on the offshore side of the vessel.

M.E.N.A.S.: ADMA-OPCO Agency Section is a collection agency for Middle East Navigation Aids Service (M.E.N.A.S.) dues and, on the authority of the Master, dues payable to M.E.N.A.S. are collected and remitted on behalf of the vessel.

Courtesy Flag: The correct courtesy flag for vessels visiting Das Island is the flag of the United Arab Emirates. This flag may be obtained from the Agents.

Notice of Readiness: Prior to commencement of any transfer operation within the Port of Das Island, the Master shall tender, to the Company, a written Notice of Readiness to load/discharge, duly timed, dated and signed by the Master. Receipt of such notice does not necessarily imply acceptance.

Early Departure Procedure: E.D.P. is available to all tankers at Das Island. Tankers not accepting E.D.P. are generally unberthed after completion of transfer and must proceed to the Anchorage Area to complete documentation.

Note: Vessels loading fuel oil (bunkers) are required to accept E.D.P. to minimise delays to other vessels.

Consular Business: The Controlling Authority is authorised by H.B.M. Ambassador in Abu Dhabi to conduct Consular business in relation to shipping documentation, Endorsement of Ship's Articles and Endorsement of Certificates of Registry and Seamen's Books.

OIL POLLUTION: Any incident of pollution from a vessel within the Port of Das Island is a contravention of Part VI of the Abu Dhabi Petroleum Ports Law No. 12 of 1973.

In the event of the escape of oil or oily water from any source, operations must be suspended immediately, and every effort made to identify, stop, contain and clean up the pollution. The Controlling Authority must be informed via the Duty Berthing Master, in order that the Pollution Contingency Plan can be initiated.

Transfer operations will not be resumed until such time as the Berthing Master and the Controlling Authority are satisfied that the cause of pollution no longer exists and that the affected area is sufficiently cleaned and safe. Oil Pollution incidents that occur within the Port of Das Island will be fully documented and the necessary documents (019-MAR-41) signed by the Master before transfer is resumed.

Masters of vessels/craft are warned that any breach of the provisions of Part VI of the Abu Dhabi Petroleum Ports Law No. 12 of 1973 will render themselves liable to prosecution.

Pollution: The dumping of waste, dangerous, toxic or other hazardous material within the Port of Das Island is strictly prohibited.

AUTHORITY: Abu Dhabi Marine Operating Company (ADMA-OPCO), Das Island, Abu Dhabi, U.A.E. *Tel:* 826600 (Das Ext. 3404). *Telex:* 22284 Adma EM. *Cables:* Admarine Das, Abu Dhabi. *Contact:* Captain C. A. Robins or Captain W. A. Whelpton, Marine Superintendents, Das.

AGENT: *Dry Cargo:* See "Mina Zayed".

Tankers: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd. act as protecting Agent only.

DUBAI (Including Khor Dubai and Hamriya Port): 25.16 N. 55.18 E.

ALSO SEE "PORT RASHID".

COURTESY FLAG: UAE and Dubai.

PROHIBITED AREA: Work on the construction of the Dubai dry dock has commenced and all shipping is warned to keep clear of an area contained within a line drawn from Port Rashid Main Light (Lat. 25° 16.0′ N., Long. 55° 16.2′ E.) to a position (Lat. 25° 16.2′ N., Long. 55° 15.1′ E.) i.e. 272° – 1,850 m. from this light thence to the shore line on a Bearing of 180°. This has been declared a prohibited area.

Small craft, dredgers and hopper barges will be operating within this area. The main breakwater will consist initially of an island with the breakwater extending both seawards and shorewards from it.

White flashing beacons will be positioned at 400 m. intervals along the breakwater and in addition various construction lights will be exhibited.

Legal steps will be taken against any negligence whatsoever from Masters.

DOCUMENTS: Following should be airmailed to Agent prior ship's arrival: 6 copies Dangerous Cargo List, Stowage plan in duplicate, Hatch list in duplicate, 7 copies of cargo manifests, 1 copy of each Bill of Lading. On arrival, 3 crew Lists required.

APPROACHES: Open roadstead. Cargo discharged into barges.

ANCHORAGE: Marked by light buoy in position 310°, 1.06 miles from Nayif Tower. Recommended anchor to N.E. of light buoy in approx. position Lat. 25° 17′ 4″ N., Long. 55° 16′ 16″ E. Depth 36 ft. to 40 ft., holding ground considered poor, bottom sand and coral. The closer ships are able to anchor to the buoy, the faster turn-around on barges will be attained. *Warning:* Occasional strong N.W. winds, known as "Shamal" will make discharging impossible and *it is very important* that ships have engines on "stand-by" during such times. Ships allowed enter and leave anchorage at any time of day or night. Launch service through Agent's ship to shore from anchorage, and ship's own boats can also be used without Authorities' permission.

PILOTAGE: None.

RESTRICTIONS: All cargo discharged into barges at anchorage. Coasters with drafts of 11 ft. 6 in. or less can enter creek and discharge alongside. Such vessels usually require a tug boat to pilot them into the creek. Tugs available through Agent. Importation of artificial pearls is prohibited. Purchase of liquor forbidden except by permit.

HEALTH: Prior arrival, Masters are required to send a cable to the Port Health Dept. addressed "Quarantine-Municipality-Dubai" on the following lines:

(Vessel's name). . . ETA . . . Hour . . . Date . . .
Crew all healthy request free pratique
Master

Normally all vessels declared healthy by the Master are automatically allowed to berth immediately on arrival, and Health Dept. personnel will board vessels after berthing.

Arrival: Ships boarded immediately upon arrival weather permitting, and Masters then have to complete a short Arrival Report. No formalities of any kind with Port Authorities and ships allowed to arrive and sail at any time.

Departure: No port clearance is issued in Dubai. A letter will be issued by Agent which may be produced at next port of call instead of usual departure clearance.

RADIO: No port radio station. Cables from vessels outside Gulf may be routed through Muscat Radio, and from inside Gulf through Bahrain Radio. Vessels should advise Agent of ETA 72, 48 and 24 hours prior arrival. Some Agents also equipped with VHF calling Channel 16. Ship's radio station may be operated at anchorage.

Nearing Dubai and approximately 8-10 hours prior to arrival, vessel should switch on VHF Channel 16 and call Agent. On contact, change to one of Channels 14, 13, 12, 9 or 6 for further communication. Regular contact then maintained until departure from Dubai.

DISCHARGE TURN: Priority of discharge given to ships carrying mail and/or passengers for Dubai. Ships carrying less than 100 weight or measurement tons have priority and are supplied with one barge for discharge of cargo immediately on arrival, whether turn is in force or not. Should there be congestion, Agents require Stowage Plan showing clearly that all Dubai cargo is freely available and Master's signature on a request for discharge turn. Based on this, vessels will be registered for turn. Registration can only be performed during office hours.

After confirmed registration, at which will be given a deadline for turn, ships may proceed to other ports for discharge, but must return Dubai prior time and date given, otherwise turn is lost. Particular cargoes for H.H. The Ruler have priority, This should be evidenced by Manifests which will be produced to Customs Authorities in Dubai for approval. The cargoes must be accessible for immediate discharge, which should be verified by stowage plan.

BERTHING:

Khor Dubai: Khor Dubai Corniche Beacon 25° 16′ N., 55° 18′ E.

Approaches: Dredged to 5.5 m. The channel running parallel with Port Rashid lee breakwater.

Restrictions: Breakwaters will be lit shortly.

Draft at Berths: 4.5 m.

Tugs: May be arranged by Agent if required.

Fuel: Caltex supply fuel. Also Shell and BP.

Hamriya Port: Main Breakwater Light 25° 18′ N., 55° 20′ E.

Flag: UAE and Dubai Emirate.

Documents: The following should be airmailed to Agent prior to ship's arrival.

2 Dangerous Cargo Lists.
2 Stowage Plans.
2 Hatch Lists.
2 Freight Manifests.
7 Cargo Manifests.
1 Copy of Bill of Lading.
4 Crew Lists required (on arrival).

Approaches: Dredged to 6 m. between breakwaters. Breakwaters are lit.

Pilotage: Pilots can be obtained from Port Rashid by arrangement.

Restrictions: Vessels will not be allowed to remain alongside the quay when not working cargo if other vessels are waiting.

Draft at Berths: There are no berth numbers. However, there are 3 quays. One measuring 300 m. in length with a draft of 4.5 m., 1 – 160 m. and 1 – 900 m., the last 2 with draft of 6 m.

Tugs: May be arranged by Agent if required.

Radio: The Port Signal Station (call sign: "Khor Dubai") equipped with VHF and M/F SSB is situated near the entry to Dubai Creek. Vessels should contact the station by VHF Channel 16 or 12 or on RT 2182 kHz. Signal station is manned 24 hours.

Pratique: Not applicable.

Berthing: Berthing is reported to Khor Dubai Report Station.

Fresh Water: Presently available at one point only. The supply is made by Port & Customs Office and vessels may directly order their requirement or through Agents.

Fuel: Caltex supply fuel. Presently from one point only.

Cargo Handling: Port is not involved in the cargo discharge operation. There is no equipment available in the port such as cranes, forklifts etc. and if required, to be arranged by Agent.

Neither shed nor yard is available and therefore cargo is accepted on direct delivery basis only.

Stevedores: No stevedoring company in the port, labour is arranged by Agent.

Telephones: No connections at the quays. However, there are telephones in the adjacent Customs Office.

Lighterage: Available.

Shore Pass: After berthing, all passports and Seaman's books should be surrendered to the Customs Office situated in the port area with 3 copies of crew list against which shore passes issued. Before sailing of the vessel, a clearance should be obtained from the Port & Customs Office (Launch Section) and produced to the Customs Office for releasing the Seaman's Books/Passports.

Authority: Port and Customs, Dubai.

STEVEDORES: Loading/Discharging Rates: Stevedores, tally clerks, supervisors, etc., will be supplied from shore at the same time as ships are supplied with barges. These people working under vessels' supervision and responsibility.

First Shift: from 0800 hrs. to 1800 hrs. Second shift: from 1800 hrs. to 2400 hrs. Third Shift: from 0000 hrs. to 0800 hrs. Very difficult to get stevedores to work third shift unless ship will complete within a reasonable time into the third shift. First 2 shifts always worked.

Drinking water must be supplied by ship free of charge to all men from shore but food to supervisors, tally clerks, watchmen and foremen.

Expected outturn working three hooks:

Bagged cargo	400 – 500 tons
Cased cargo	150 – 200 tons
Timber on deck	300 – 350 tons
Timber in hatches	200 – 250 tons

Usually 5 ships can work at one time.

MEDICAL: Qualified doctors available ashore and also a hospital. Most medicines available at fairly low prices. Dentist also available. Walking cases should be brought ashore *in the morning* for treatment, but in emergency, a doctor will board the ship.

TANKERS: See "Port Rashid".

FRESH WATER: Can be supplied at Dubai anchorage in following quantities: 600 tons, 75 tons, or 25 tons at one time.

FUEL: See "Port Rashid".

FIRE FIGHTING: No facilities available at anchorage.

CUSTOMS ALLOWANCES: *Tobacco:* 1,000 cigarettes or 200 cigars or 1 kilo of tobacco. *Perfumes:* 1 litre of toilet water (Eau de Cologne) and not more than 150 grams of perfume. *Currency:* Unlimited.

CONSULS:

Egypt
Great Britain
India
Iran
Iraq
Italy
Kuwait
Netherlands
Norway
Pakistan
Qatar
Saudi Arabia
Sweden
Switzerland
USA

Additional Embassies/Consulates in Abu Dhabi.

REPAIRS: Fully equipped engineering workshops, radar and radio technicians capable of carrying out extensive repairs available. Underwater cleaning, repairs and other works connected with this also available. See also Dubai Dry Dock under "Port Rashid".

DRY DOCK: See "Port Rashid".

SURVEYORS: Lloyd's.

REPATRIATION: Visa is required for non-UAE citizens visiting Dubai for a period exceeding 7 days. Agent can assist provided complete passport details given well in advance. Excepted are British Subjects with right of abode in the UK who are permitted to remain in UAE without visas for a period of 1 month. For temporary visitors of other nationalities the Agent can arrange under its sponsorship transit visa valid for 7 days provided the person holds a ticket showing a confirmed flight out of UAE. However, person must leave UAE via airport through which he entered.

When advise arrival flight details also advise seaman's book number and nationality.

Seven days' transit visa:

From 1st February, 1985 a new form will be used by the Immigration Authorities in Dubai for persons entering Dubai on Transit Visa.

As the form has to be typed out in both English and Arabic it is essential that full details of arriving persons are in hand at least 48 hours prior to arrival.

The information required is as follows:

1. I, the undersigned wish to sponsor the undermentioned who wishes to enter the country for ....
2. Name of the sponsored .... Father's Name ....
3. Nationality .... Passport No. ....
Category: Normal/Diplomatic Service.
4. Place and Date of Issue .... Expiry Date ....
5. Place and Date of Birth .... Profession ....

AIRPORT: Regular international scheduled flights. Also domestic flights within Gulf area.

TIME: GMT plus 4 hours.

HOLIDAYS: 1st January; 10th February; 23rd June*; 6th August*; 25th August*; End of Ramadan 3 – 5 days holidays, End August. 1st November*; 21st November*; 2nd December; 25th December.
*Not fixed.

SHORE LEAVE: Officers and crew may come ashore during daylight hours for shopping and recreation. They shall then carry a valid passport, ID-card or Seaman Book, which will be placed at the Immigration Office when landing. The passport, ID-card or Seaman Book will be returned upon returning to ship. No alcoholic beverages allowed to be brought ashore.

LAUNDRY: Available but about 2 – 3 days required.

PROVISIONS: Fresh vegetables, frozen stuff, bonded stores, etc., available. Requirements should be given immediately on arrival. (The liquor and beer prices are high.).

GENERAL: Dunnage – not available. Heavy lifts – not available at anchorage. Shore cranes have lifting capacity up to 30 tons.

Weather: Summer months in the 40's Centigrade and humid. Winter months in the 20's Centigrade and dry.

Alcoholic Beverages: Allowed to be stored and consumed on board also in port, while sale of this and pornographic materials is strictly forbidden.

Accommodation: Construction of many hotels completed and rooms in all price ranges are now readily available in Dubai on both the Deira and Dubai side.

Business Office Hours: Normally 0800 to 1300 hrs. 1600 to 1800 hrs. Government offices: 0800 – 1200 hrs. Banks: 0800 – 1200 hrs.

Ship Spares in Transit: Agents in Dubai advise that spares arriving in Dubai even with valid invoice, certificates of origin and packing lists attached are now opened by the Dubai Airport Customs. All Owners and operators are thus warned not to include any items which are banned in boxes containing spare parts as if detected they will be confiscated.

Further to the above, Agents give below a list of prohibited articles:

(a) All pornographic literature, videos, films, pictures.
(b) Alcohol.
(c) Narcotic drugs.
(d) Wireless transmitters.
(e) Firearms and ammunition.
(f) Products of Israeli – blacklisted manufacturers.
(g) Exposed cinematographic (movie) films.
(h) Political and religious literature.

– need prior approval from the Ministry of Information. The Customs are particularly sensitive about video tapes and when found in luggage they are subject to check. The checking is taking time and passengers are kept waiting sometimes for hours. To avoid trouble and irritation strongly recommend that crew arriving Dubai should be advised by principals not to carry any video tapes.

AUTHORITY: Port and Customs Dept. Dubai Port Authority.

AGENT: Gulf Agency Co. (Dubai) Pvt. Ltd., P.O.B. 2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel: 457555 (12 lines, 24 hour service). After hours: 480424, 445221, 441544, 443650, 443070. Telex: 45448, 45809 ("Gacdb EM"). Radio: Marine VHF radio, stand-by on Channel 16 (156.8 MHz) Callsign "Confidence, Dubai".

Operators of ship-servicing and supply organisation: Crew-changes, mail, spares and/or delivery of provisions undertaken at sea without deviation to serviced vessel.

FATEH TERMINAL (offshore Dubai): 25.35 N. 54.25 E.

(See Plan Book)

Oil Loading Terminal of the Dubai Petroleum Company.

Note: All tankers loading Fateh Terminal cleared by Dubai Petroleum Company, taking care of all necessary documentation concerning cargo. DPC does not charge owners/operators for this service (at the present time). However, for all other agency services DPC refers owners/operators to regular shipping Agents in Dubai.

According present oil company regulations vessels not allowed receive any deliveries or any launch alongside while loading at Terminal. Deliveries of mail, spare parts and performance of crew changes will, therefore, take place at Terminal anchorage, Dubai anchorage, or at a rendezvous point.

Weather permitting, Fateh Terminal operates 24 hours a day, 7 days a week and provided berth not occupied, tankers will be berthed upon arrival, day or night.

LOCATION: Fateh Terminal consists of the crude oil production and export facilities of the Fateh, S.W. Fateh, Falah and Rashid Fields. The terminal limits are bounded by the following co-ordinates:

(i)	Lat. 25° 38′ 00″ N.	Long. 54° 05′ 16″ E.
(ii)	Lat. 25° 40′ 00″ N.	Long. 54° 30′ 00″ E.
(iii)	Lat. 25° 15′ 00″ N.	Long. 54° 30′ 00″ E.

Within this area the anchoring of vessels is prohibited and the Terminal Safety Regulations have effect.

NAVIGATIONAL AIDS: All platforms, structures, SBMs and floating storage vessels are fitted with a white light Fl. "U" ev. 30 secs. vis 5 miles and horn every 30 secs. sounding "U" in Morse.

Numerous working lights are also fitted on platforms, etc.

Six flares in position:

(1)	Lat. 25° 35′ 50″ N.	Long. 54° 25′ 50″ E.
(2)	Lat. 25° 35′ 56″ N.	Long. 54° 25′ 20″ E.
(3)	Lat. 25° 35′ 48″ N.	Long. 54° 25′ 18″ E.
(4)	Lat. 25° 29′ 44″ N.	Long. 54° 18′ 29″ E.
(5)	Lat. 25° 33′ 30″ N.	Long. 54° 11′ 30″ E.
(6)	Lat. 25° 21′ 00″ N.	Long. 54° 29′ 00″ E.

The flares give an orange light which may be visible from the Terminal, depending on atmospheric conditions, in addition the flare structures show a white light flashing "U" in Morse every 30 seconds visible for 5 miles.

Numerous small unlit buoys for the use of working craft may be encountered within the Terminal area.

APPROACHES: On approaching Terminal, Masters of incoming tankers should head for Anchorage Area (see "Anchorage") where, under normal conditions, their vessel will be boarded by a DPC Mooring Master.

ANCHORAGE: An area immediately East of Terminal Limits is designated as the Anchorage Area, centred on position as follows:

Lat. 25° 36′ N. Long. 54° 31′ E.

This co-ordinate represents the centre of a circle with a radius of approximately 1 mile which must be used by vessels requiring to wait at anchor. Anchoring within the Terminal limits is strictly prohibited. For reference purposes, the anchorage area bearing from Port Rashid (Dubai) Light is 298° true, distance 44.6 miles and from Jazirat Sirri Light 187.5° true, distance 17.5 miles.

If a tanker is not scheduled to berth on arrival (e.g. another vessel is in the berth, or the port is closed on account of adverse weather conditions, etc.) Masters will be advised by radio and requested to anchor.

FACILITIES: For the export of crude oil 2 single point mooring buoys have been installed in positions:

SBM No. 1	Lat. 25° 35′ 11.5″ N.	Long. 54° 25′ 47.7″ E.
	Bearing 261° true 4.8 miles from anchorage.	
SBM No. 2	Lat. 25° 35′ 12.6″ N.	Long. 54° 24′ 36.6″ E.
	Bearing 262° true, 5.85 miles from anchorage.	

READINESS: After arrival at the Anchorage Area and when the tanker is ready in every respect to load, the Master may tender his Notice of Readiness.

Notices of Readiness will be accepted provided one or other of the following events shall have transpired:

(a) The Master shall have received the Mooring Master on board or;
(b) The Master shall have dropped the anchor in the Anchorage Area.

Port closed: Notices of Readiness will not be accepted during periods when the port is closed. The port is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with the Fateh Terminal Superintendent or his Deputy.

Order of Berthing: Vessels will normally berth in order of arrival.

DOCUMENTATION: *Documentation and ship's Agency:* In the normal course of events, DPC acts as tanker Agent and prepares all crude oil loading documents. For these services no charge is made.

Early Departure Procedure: At the Master's discretion. In order to expedite turn-round of vessels in this port and avoid undue delays caused by weather or other circumstances, Masters of vessels on arrival are requested to sign blank cargo documents.

Normally, completed cargo documents required by the Master will be placed on board prior to sailing. If this is not possible without incurring undue delays, the relevant documents will be airmailed to the Master to await the vessel's arrival at her discharge port.

The official cargo, i.e. quantity loaded, will be transmitted by radio whilst unmooring. In the event of a dispute, the receipt of a Letter of Protest will be acknowledged by the Mooring Master. Any protests by the Master concerning the quality of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

Outward Clearance: A tanker will be considered clear to depart Fateh Terminal when the crude oil loading documents have been delivered to the Master, or in the case of early departure, clearance will be given through the Mooring Master.

Mail: Official ship's mail and crew's personal mail will be handled and shipowners debited accordingly.

PILOTAGE: Pilotage is compulsory within the Terminal limits. Vessels to be moored at Fateh Terminal will be boarded by a DPC Mooring Master in the Anchorage Area. The Mooring Master will advise the ship's Master on approaches to the SBM, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the vessel. The Master or one of his qualified deck officers must be on the bridge at all times while the tanker is being manoeuvred.

The services of a Mooring Master are provided without charge, upon the express understanding and condition that when any Mooring Master furnished by DPC goes aboard a vessel for the purpose of assisting such a vessel, he becomes for such purposes the servant of the owners of the vessel and DPC shall not be liable for any damage or injury resulting from the advice or assistance given or made by such Mooring Master while aboard or in the vicinity of the assisted vessel.

MAX. SIZE: *SBM No. 1.* Max. d.w.t. 200,000. Max. draft, no restriction. Depth of water 130 ft.

Early in 1985, substantial alterations will be made to the position of SBM No. 1.

It is intended to relocate the SBM to position UTM co-ordinates 246000 Eastings 2831000 Northings, in order to comply with the latest OCIMF safe manoeuvring distances. The buoy and moorings will be upgraded to receive tankers of up to 300,000 d.w.t. and in 140 ft. of water, there will be no draft restrictions.

SBM No. 2. Max. d.w.t. 300,000. Max. draft, no restriction. Depth of water 150 ft.

MOORING: *Preparation for Mooring:* Vessels are requested to have pilot ladder, hoist and/or accommodation ladder safely and securely rigged for immediate use and long enough to meet the Mooring Master's launch. Vessels will provide a lee for the Mooring Master on the port side both when boarding and leaving.

For vessels with a freeboard of 40 ft. or more, the accommodation ladder shall be rigged out, lowered down so the platform is not more than 10 ft. from the water level and a short pilot ladder rigged to cover the access to the platform.

Tankers are requested to have ready on the forecastle head the following:

(a) 2 towing ropes, polypropylene or other man-made fibre.
(b) 2 messenger ropes, minimum lengths of 300 ft.
(c) Selection of shackles, wirestrops and tools.

When the approach to the terminal commences, the berthing tug will be secured to assist in berthing. The method and position in which the tug will be secured will be dependent upon the weather and tidal conditions prevailing, but will normally be on the hook from the starboard bow using a ship's rope. At this time, the mooring launch will prepare the mooring and standby at the SBM.

Approach to the SBMs necessarily involves passing, in close proximity, various platforms and other structures. It is therefore imperative that all measures are taken to ensure that there is no loss of power or steering during these manoeuvres.

The mooring launch will be situated about 600 ft. from the SBM with a 10 in. circumference polypropylene pick-up rope secured to the main mooring, which consists of 2×18 in. circumference nylon ropes, connected to a standard O.C.I.M.F. chafing chain and a 40 ft.×3.5 in. circumference pick-up wire rope.

During the approach of the tanker towards the SBM, ships crew, with the advice of the Mooring Masters Assistant (MMA) will prepare the forecastle for the mooring operation. This will include passing a messenger rope through the centre bow fairlead (or other fairlead designated by the MMA) taking the end to the after port corner of the forecastle and, from this point, lowering the end to the waters edge. The mooring attachment will also be prepared, and will be, in order of preference:

(a) Bow stopper (AKD).
(b) Towing bracket or futtoch (Smit).
(c) Bitts.

Vessels which, in the Mooring Master's opinion, do not have a suitable method of attaching the mooring, will be refused permission to berth. Should bitts have to be utilised, or should the towing bracket be located at a substantial distance from the fairlead, wire snotters of 2 in. diameter and various lengths are available from the berthing tug.

Upon the close approach of the tankers bow, the mooring launch will manoeuvre alongside the port shoulder and attach the mooring pick-up rope to the ship's messenger line. The tanker will then heave up the messenger and pick-up rope, carefully picking up the slack as the tanker approaches the SBM. The mooring launch will now be stationed at the end of the floating hose string in order to tow the hoses clear of the ship's side should this become necessary.

The pick-up rope should be continually hove in as the tanker nears the SBM. The distance between the bow and the SBM will be continuously relayed to the Mooring Master on the bridge by the MMA from the forecastle and by the berthing tug. When the pick-up wire has been brought inboard through the fairlead, it may be necessary to adjust the direction of pull and assist the chain through the fairlead. Action required by the tanker's crew in this respect will be advised by the Mooring Masters Assistant.

When the chain is inboard, depending upon the method of attachment available, the connection will be made. It should be noted that should a Smits bracket or bitts be utilised, the first triangular plate on the chain must only be connected on tankers of less than 100,000 d.w.t. and on vessels of greater size, the chain must be hove in and the connection made on the second, larger, triangular plate.

After the connection to the mooring is made, it may be necessary to run the engines astern to ensure the tanker does not contact the SBM. The Mooring Master will then advise "Finished with Engines", but at no time during the tankers stay in port shall the engines be immobilised.

Shortly after the mooring operation is completed, the berthing tug will be secured from the stern of the tanker on a long ships rope, polypropylene if possible.

LOADING: *Lifting Hoses:*

SBM 1: Two 16 in. diameter hoses will be lifted by ship's gear on the port side. Each lift is 9 tons.

SBM 2: Two 16 in. diameter hoses will be lifted by ship's gear on the port side. Each lift will be 9 tons.

The hoses shall be hoisted and connected by ship's crew. The Mooring Master will advise the ship's officer in charge concerning lifting techniques.

Sundry Hose Connecting Equipment: Tankers shall be equipped with the necessary blocks, tackle, wrenches, gaskets, bolts, nuts, etc., to efficiently effect the hose connection.

Flange sizes: 16 in. – 12 in. reducers will come on board the tankers with the mooring gear thus enabling tankers with either 16 in. or 12 in. ASA 150 lb. flanges to connect directly to the Terminal hoses. Flange size 16 in. – 12 in., 16 in. – 10 in. reducers with ASA 150 lb. flanges are available if required to enable tankers with 12 in. – 10 in. manifold connections to connect to the Terminal hoses.

Communications During Loading: (See "Radio"). All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with the Production Platform constantly via portable UHF units. In case of temporary breakdown of the portable UHF circuit, contact may be continued on International Marine Channels 16, 14 or 9 if the vessel is so fitted.

Failure of Communications: Should communication with the Production Platform fail, loading will cease.

Emergency Shut down: An emergency cessation of loading may be effected by the ship's VHF Channel 16.

Cargo: Oil loaded at Fateh is Dubai Stabilised Crude with an average API of 31.0. Loading temperature varies between 90°F in the Winter to 100°F in the Summer months. The oil is relatively free of sediment and low in wax and asphaltenes.

Loading rate: At SBM No. 1 the maximum loading rate is 30,000 barrels per hour. At SBM No. 2 the maximum loading rate is 75,000 barrels per hour.

BALLAST: *Precautions Regarding Pollution:* It is the responsibility of the ship's Master to see that no crude oil (or bunkers', diesel or bilge) or dirty ballast is pumped or spilled overboard from his ship whilst in the area. Drip pans should be used, especially when disconnecting hoses in order to prevent spillage overboard.

Scuppers to be Plugged: Before loading commences, all overside scuppers shall be made oil-tight.

No facilities for Receiving Dirty Ballast: At Fateh Terminal there are no slop tanks or facilities for receiving dirty ballast. Tankers must arrive with clean ballast. In the event a tanker does have dirty ballast it will not be allowed to be pumped overboard. The dirty ballast will be collected into one tank, measured and left aboard.

Discharging Ballast at Night: During the discharge of ballast in darkness, the sea shall be adequately lighted in the area of discharge.

RADIO: *Communications with DPC:* Cable Address: Dupetco, Dubai. Telex: 45557 or 45423 DPC EM.

Initial Communication: Initial communication between ships and DPC should be via Bahrain Radio (call sign GOU) which operates on a 24 hour basis.

Communications within 60 miles of Terminal: Once ships are within about 60 miles of Fateh Terminal communication may be established by radio telephone on International Marine VHF Channel 16 (156.8 MHz). This frequency is monitored continuously. Once contact has been made on Channel 16, further conversation should be conducted on either Channel 14 (156.7 MHz) or Channel 9 (156.45 MHz).

Communications after DPC Mooring Master has Boarded: A DPC Mooring Master will board incoming tankers in the anchorage area and will bring with him portable UHF radio telephone units. From that time onwards all communications between ship and platform will be conducted by the Mooring Master via the portable UHF units, unless owing to failure of portables it is necessary to revert to mains VHF Channels.

Advice of Tanker Arrivals:

Initial Estimated Time of Arrival (ETA): When a tanker bound for Fateh Terminal is within 72 hours of arrival at Fateh Terminal, the Master should notify DPC by cable via Bahrain Radio giving the following information:

(a) Name of tanker.
(b) ETA in GMT (Dubai time is GMT plus 4 throughout the year).
(c) Quantity of cargo required.
(d) Maximum loading rate.
(e) If the ship's hose connections are different from 16 in. or 12 in. standard ASA 150 lb. type, the size should be stated.
(f) Deballasting time (if any).
(g) If vessel proceeding to any port(s) prior to Fateh, and if so, any anticipated delays.
(h) If AKD stopper or SMIT towing bracket is fitted, and if so, distance from centre bow fairlead.

Subsequent ETAs: Sections *(a)* and *(b)* of the above message should be repeated via Bahrain Radio when the tanker is within 24 hours and again when within 12 hours of arrival at the Fateh Terminal.

Unreasonably insufficient or inaccurate ETA messages may alter the order of berthing of ships to the disadvantage of those ships giving sufficient and accurate ETA messages.

Radio Telephone Communication when Approaching Fateh Terminal: When about 60 miles off the Terminal contact may be made by radio telephone on International Marine VHF Channel 16, and communications should continue via this method until a DPC Mooring Master boards.

MEDICAL: At Fateh Terminal medical and dental services are not available. In emergencies requiring hospitalisation, the patient will be taken by boat from the tanker to the Production Platform, hoisted to the upper deck of the platform and flown by helicopter to Dubai. The shipowner will be charged for all expenses incurred.

FUEL: Bunker supply not available at Fateh.

Fuel oil (IFO 180 cSt) can be arranged at Mina Jebel Ali. Gas oil can also be arranged.

DENSITY: 1030.

GENERAL: The following are not available at Fateh Terminal: fresh water, stores, boats for hire; repair facilities; facilities for changing ship's crew.

There is no shore leave.

Charts: Charts covering the approach to and the area of Fateh Marine Terminal are:

British Admiralty Nos. 2837, 2887, 2888, 2889.
U.S. Hydrographic Office No. 3647.

AUTHORITY: Dubai Petroleum Company, P.O.Box 2222, Dubai, U.A.E. *Tel:* Dubai 442990. *Telex:* 45423 or 45557 Dpc EM. *Cables:* Dupetco, Dubai. *Contact:* Captain A. V. Carrington, Marine Superintendent.

AGENT: Gulf Agency Co. (Dubai) Pvt. Ltd., P.O.B.2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel. 457555 (12 lines, 24 hours service). Telex 45448, 45809 ("Gacdb EM").

VHF Radio: standing by on Channel 16 (156.8 MHz) communicating on Channels 14, 12 or 6, call sign "Confidence Dubai".

SSB Radio: standing by on 6910 MHz lower side band, communicating on frequencies 3539, 6910 and 7010 MHz. Call sign "Confidence Dubai".

FUJAIRAH: 25.10 N. 56.21 E. (See Plan Book)

LOCATION: Lat. 25° 10.5′ N., 56° 21′ E., 3 km. North of Fujairah town and 20 km. South of Khor Fakkan.

PORT LIMITS: Within area bounded by a line drawn:–

Lat. 25° 09′ 35″ N., Long. 56° 21′ 00″ E. due North to Lat. 25° 10′ 05″ N., 56° 21′ 00″ E., thence due West for 65 m. to the West side of the old road and following the West side of the old road for Lat. 25° 11′ 30″ N., thence due East to Lat. 25° 11′ 30″ N., Long. 56° 22′ 30″ E., thence South to Lat. 25° 09′ 00″ N., Long. 56° 22′ 30″ E., thence due West to Lat. 25° 09′ 00″ N., Long. 56° 21′ 30″ E, thence due West to Lat. 25° 09′ 00″ N., Long. 56° 21′ 00″ E. and include all waters, land and installations contained within that area.

DOCUMENTS: The provisional requirements are:–

Immigration:	Crew List	3 copies
	Passenger List	3 copies
Customs:	Crew List	2 copies
	Passenger List	2 copies
	Cargo Manifests	2 copies
	Alcoholic Beverages/ Bonded Stores List	2 copies
Port Operations:	Cargo Manifests	2 copies
	Stow Plan/Hatch List	2 copies
	Dangerous Cargo List	2 copies
	Transhipment Cargo	2 copies
	Heavy Lift List	2 copies
	Ro/Ro Discharge List	2 copies
For Inspection:	Last Port Clearance, Ship's Log.	
Certificates:	Safety Equipment, Construction, Load Line, Radio, Oil Record Book.	

All documents relating to cargo should be forwarded prior to vessels' arrival.

PILOTAGE: Compulsory, except for 'Country Craft' and M.E.N.A.S. tender.

Notice of ETA and request for a Pilot must be made not less than 24 hours before ETA at Fairway Buoy via vessels' Agents. Pilot launch will keep listening watch on VHF Channel 16, 2 hours prior to ETA.

The Pilot boarding point is 1 mile S.E. of the Fairway Buoy. Pilot boarding arrangements must be according to IMCO rules. Vessels awaiting a Pilot must anchor East of Long. 56° 25′ E. approx. 3 miles offshore. There is good holding ground in 40 m. to 59 m. of water.

ANCHORAGE: Vessels wishing to anchor offshore must not anchor West of Long. 56° 25′ E. They should report their position to either the Harbour Master on VHF Channel 16 or through "Confidence Fujairah" on VHF Channel 16.

Also see "Pilotage".

Offshore Anchorage Fee: The Chairman of the Department of Industry and Economy of the Government of Fujairah has issued a regulation concerning vessels anchored in Fujairah waters. It states that effective 12th February, 1983, all vessels anchored off Fujairah coastline will be liable to pay an anchorage fee. The fee is Dirhams 400 per day. The fee will be collected by vessel's Agents and made payable to Department of Industry and Economy, Government of Fujairah and paid to the Harbour Master, Port of Fujairah, P.O.Box 787, Fujairah, who will issue receipts.

Vessels anchoring for less than 24 hours to lift bunkers/water/provisions etc. will not be liable to pay fee. Wet docking/hull cleaning will not be liable to pay fee when serviced by companies duly licensed in Fujairah.

RESTRICTIONS: *Draft Restrictions:*

1. Vessels with a draft of less than 9 m. can be moved at any state of the tide.
2. Vessels with a draft of between 9 m. and 10 m. can only be moved from 5 hours before to 4 hours after predicted HW.
3. Vessels with a draft between 10 m. and 10.5 m. can be moved 4 hours before to 3 hours after HW.

Any variances to the above restrictions will be agreed by the Harbour Master, Port of Fujairah.

MAX. SIZE: Provisionally ships up to 205 m. LOA and 11 m. draft can be accepted.

HEALTH: Normal quarantine regulations apply. Radio Pratique can be obtained, via the vessel's Agent, providing the Master can state that no serious illness has occurred on board during the preceding 30 days.

RADIO: *Notice of Arrival:* Vessels should advise their ETA, Fujairah, at least 72 hours prior to arrival, giving draft, LOA and details of cargo operations. Agents should re-confirm 24 hours prior to vessels' arrival.

Also see "Health".

VHF: Fujairah Port Authorities, call sign "Fujairah Port Control" equipped with Marine Band VHF Radio Telephone Transceiver maintains continuous watch on Channel 16.

Vessels should establish radio contact with Fujairah Port Control Station if they intend anchoring in Fujairah Waters or are proceeding to Fujairah Port.

Following Channels are used by the Fujairah Port Authorities:

Station	*Hours of Watch*	*Channel*	*Function*
Fujairah Port Control	24	16	Distress, Safety and Calling Frequency
Fujairah Port Operations	24	09	Pilot Services
Tugs	24	08	Berthing/Unberthing
Working Channels	24	10&11	

Vessels in the Fujairah area are reminded not to use the above Channels except for the purposes specified.

RADAR: When Port Control is operational it will be equipped with radar. The pilot launch is equipped. However, fog is almost unknown though visibility is restricted by dust mainly – July and August.

TUGS: The use of tugs will be compulsory except at discretion of the Harbour Master. 2 tugs of 16 tonnes bollard pull are in operation fitted with foam monitors.

BERTHING: There is one quay 380 m. long with a least depth of 12.5 m. for 200 m. and 11.5 m. for 180 m. This is a concrete capped steel piled quay with rubber fendering.

There is a transit shed with 12,000 sq.m. of floor space with LCL facility.

STEVEDORES: The port will work on a 24 hour 7 day week basis. Requirements for port labour must be submitted to Operations Department by 1200 hrs. prior to to day required.

MEDICAL: Hospital facilities are available.

FRESH WATER: Good potable water is available ex quay to vessels working general cargo.

FUEL: Not available.

REPAIRS: Routine maintenance of medium engineering type is available. Offshore hull cleaning and repairs available.

SURVEYORS: Classification Societies and Surveyors can be brought from Dubai at short notice.

HATCHES: Rigging ship's gear, opening and closing of hatches, are the responsibility of the vessel.

REPATRIATION: This is permissible via Dubai and Sharjah International Airports, about 1.5 hours by road. Valid seaman's book and passport required.

DRY DOCKS: None.

TIME: GMT plus 4 hours permanent.

SHORE LEAVE: Shore leave is permitted.

HOLIDAYS: 1st day Id Al Fitr, 1st day Id Al Adha.

TELEPHONES: This service will be available aboard ships at the quay by prior arrangement through Agents.

PORT EQUIPMENT: 2×Mobile tower cranes 6 tons at 18 m. 2 × container cranes capacity 40 tons, 4 × rubber-tyred gantries to container yard (2,800 TEU's).

Forklift trucks: 1×30 ton top lift 20 ft./40 ft. 2×12 ton side lift empties. 6×5 tons. 3×2.5 ton container ship stuff. Yard road-and -roll trailers up to 50 tonnes. 10 yard tractors elevating fifth wheel/gooseneck. 6 tow tractors 60 tonnes tow capacity.

SHIP SERVICING: Gulf Agency Co. operate ship servicing along Lat. 25° 10′ N.

Barwil Shipping Services, Fujairah. Tel: 24800. Telex: 89040.

BANKS: British Bank of the Middle East, P.O.Box 21, Fujairah, U.A.E. Tel: 22221.

GENERAL: Garbage disposal services will be provided and will be compulsory. De-rat Exemption Inspectors are available.

Ship Chandlers: Complete chandlering facilities will be available.

DEVELOPMENTS: An additional deep-water quay length 200 m. to be built.

AUTHORITY: Port of Fujairah, P.O.Box 787, Fujairah, U.A.E. *Tel:* Fujairah 24231. *Telex:* 89085 Fport Em. *Contact:* Captain F. Ravenscroft, General Manager. Captain R.A. Saunders, Harbour Master.

AGENT: Gulf Agency Co. (Fujairah) Ltd., P.O.Box 590, Fujairah, U.A.E. Cables: "Confidence", Fujairah. Telex: 89046 ("Gacfuj EM"). Tel: 23300, 23301. After hours 22597.

HAMRIYAH, Sharjah: 25.35 N. 55.24 E. (See Plan Book)

LOCATION: Hamriyah Oil Terminal is located in the Emirate of Sharjah, United Arab Emirates, and consists of a shore tank with related onshore facilities, an offshore loading berth composed primarily of one single point mooring buoy and a 30 in. submarine pipe-line which runs from the shore tank to the loading berth. The shore tank is located outside the village of Hamriyah on the coastline between Umm Al Qaiwain and Ajman in approximate position Lat. 25° 29.5′ N., Long. 55° 30.7′ E. The loading berth is located in 71 ft. of water and is situated in an open and unsheltered roadstead approximately 7.6 miles offshore on a bearing of approximately 308° (T) from the shore tank and in approximate position Lat. 25° 34′ 31.68″ N., Long. 55° 24′ 5.8″ E.

Hamriyah Oil Terminal is owned by Amoco Sharjah Oil Company and is operated 24 hours a day, 7 days a week, weather and other circumstances permitting. Vessels are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, weather and other circumstances permitting.

Company's Facilities: The Company's administrative offices are located in the town of Sharjah and the Company's terminal offices, storage tank and laboratory for testing stock are located onshore near the village of Hamriyah.

FLAG: Vessels are required to fly the flag of the United Arab Emirates on the foremast during daylight hours while in Sharjah waters. The Sharjah territorial waters extend 12 nautical miles seaward from the Sharjah coastline.

DOCUMENTS: The following documents are required when calling at Hamriyah Oil Terminal:

Health Declaration.
Crew List.

PILOTAGE: *Mooring Master:* Vessels to be moored at the loading berth will be boarded by a Mooring Master about 3 miles due North of the loading berth in appproximate position Lat. 25° 37.5′ N., Long. 55° 24.1′ E. The Mooring Master will be provided by the Company and vessels will not be allowed to approach or depart from the loading berth without the Company designated Mooring Master being on board. The Mooring Master will advise vessel personnel on the approaches to the loading berth; the operations of mooring and unmooring; the raising, connecting, disconnecting and lowering of the floating cargo hose and in all other operations within the loading berth area. All manoeuvring of vessels within the loading berth area shall be performed by vessel personnel as directed by the vessel's Officer in charge and in accordance with the procedure advised by the Mooring Master.

Vessels are required to have a clean and efficient pilot ladder fitted with spreaders and manropes, safely and securely rigged, ready for the Mooring Master to immediately embark and disembark on the port side of the vessel and of sufficient length to reach the Mooring Master's launch. At night, adequate lighting must be rigged overside for the Mooring Master to approach or depart from the port side of the vessel and to use the pilot ladder safely. A lifebuoy with safety line and self-igniting light together with a rope messenger for the Mooring Master's bag shall also be available at the pilot ladder head. Vessels shall afford a "Good Weather Lee" and shall reduce speed as directed by the Mooring Master in order to effect the safe embarking or disembarking of the Mooring Master.

Whenever, as in the case of large vessels in light condition, the height of the deck above the water exceeds 30 ft., the accommodation ladder shall also be used in conjunction with the pilot ladder and shall be lowered to about 12 ft. above the water with the pilot ladder rigged immediately adjacent to the bottom platform of the accommodation ladder. A mechanical hoist of an approved pattern shall be considered an acceptable alternative to a conventional pilot ladder for use in conjunction with the accommodation ladder, but a mechanical hoist whose operation relies upon a single wire shall not be considered of an approved pattern. The rigging of the pilot ladder for the embarkation and disembarkation of the Mooring Master shall be supervised by a responsible vessel Officer and shall be effected so that the ladder is well clear of any overboard discharge and so that each step of the ladder rests securely against the vessel's side. If, in the opinion of the Mooring Master, the pilot ladder is not safe, the Mooring Master may refuse to board the vessel and any delay caused by such refusal shall be for the vessel's account.

Vessels shall provide food for the Mooring Master while on board the vessel and shall accommodate the Mooring Master in the Pilot's Cabin. Should vessels not be equipped with a Pilot Cabin, the Mooring Master shall be accommodated in a cabin equivalent to that required for an officer on the vessel. The Mooring Master shall have access to the bridge and/or central area of the vessel and such areas shall not be locked or otherwise arranged to prevent immediate entry at any time by the Mooring Master.

ANCHORAGES: The customary anchorage area for vessels awaiting the loading berth at Hamriyah Oil Terminal is a circle 0.5 miles in diameter and with its centre located 3 miles due North of the loading berth in approximate position Lat. 25° 37.5′ N., Long. 55° 24.1′ E. Anchorage within 3 miles of the loading berth or of the 30 in. submarine pipe-line which runs from the shore tank to the loading berth is prohibited unless otherwise designated by the Company or the Mooring Master.

HEALTH: The rules governing the quarantine of vessels are the same as those found in other parts of the world.

MAX. SIZE: Max. draft 55 ft. Max. size 80,000 d.w.t.

Also see "Berthing".

RADIO/VHF: *Initial Radio Communications:* The radio station at Bahrain will handle the initial radio communications between vessels and the Company. The station call sign is "A9M" and the station operates on a 24 hour basis.

Advice of Arrival: It is important that vessels establish radio contact with the Company and with Lamnalco (Sharjah) Ltd. when 3 days distant from Hamriyah Oil Terminal and maintain such contact until just prior to arrival at Hamriyah Oil Terminal. Vessels should send an ETA telex to the Company (Telex: 68685 Amcosh EM) and Lamnalco (Sharjah) Ltd. (Telex: 68433 Lamshj EM) not less than 72 hours prior to arrival at Hamriyah Oil Terminal, providing the following information:

1. The ETA;
2. The estimated draft, fore and aft, upon arrival;
3. The quantity of crude oil to be loaded and the grade of such;
4. The estimated sailing draft;
5. The last port of call;
6. Whether the vessel has a clean Bill of Health, and;
7. The distance from the bow to the centre of the vessel's manifold.

This first ETA message should also include a definite statement of the details of any equipment required from shore for connecting the floating cargo hose to the vessel's manifold. Further ETA telexes should be sent to the Company and Lamnalco (Sharjah) Ltd. when the vessel is 48 hours and 24 hours distant from Hamriyah Oil Terminal confirming or giving notice of any change in the 72 hour ETA and at any other time after the 24 hour ETA telex when a change by more than 2 hours occurs in the ETA. The 24 hour ETA telex should include a positive statement regarding the vessel's readiness to load on arrival and the number of hours that will be required by the vessel to discharge clean ballast. Local time is GMT plus 4 hours and Daylight Saving Time (Summer time) is not applicable.

Ship-To-Shore Communications: The Company and Lamnalco (Sharjah) Ltd. are equipped with VHF radiotelephone using international frequencies and maintain a radio watch on the international VHF Marine Channel 16 and on Channel 74. Not less than 12 hours prior to the vessel's ETA at Hamriyah Oil Terminal, the vessel is required to maintain a radio watch on R/T frequency 2182 and on VHF Channel 16. Masters are recommended to use this facility as soon as the vessel is within range since such communications are the best means of avoiding delay in the mooring of the vessel. While a vessel is at the loading berth, the Mooring Master will be in direct charge of the portable VHF ship-to-shore radiotelephone and all ship-to-shore communications will be by portable VHF radiotelephone. The Mooring Master will advise the Master and Officers regarding the emergency whistle signals set up for use in the event the VHF radiotelephone units become inoperative. The use of the vessel's radio station and/or battery charging equipment is prohibited during cargo loading operations.

Radio Watches: While at the anchorage awaiting the loading berth, vessels should maintain a listening watch on R/T frequency 2182 and on VHF Channel 16 with the Company and Lamnalco (Sharjah) Ltd.

TUGS: *Mooring Launch:* The Company will provide a mooring launch which is owned by Lamnalco (Sharjah) Ltd. to assist in the mooring and unmooring of the vessel. The mooring launch will be harboured in the town of Sharjah at the boat pier used by Lamnalco (Sharjah) Ltd. and will operate under the direct control of the Mooring Master.

READINESS: *Loading Readiness and Arrival Time:* Upon arrival of the vessel at the customary anchorage for the loading berth, the Master or his Agent shall give the Company notice by letter, telegraph, wireless, or telephone that the vessel is ready to load. Laytime shall commence upon the expiration of 6 hours following the acceptance of such notice by the Company provided that the vessel has been nominated to load cargo and the terminal holds such cargo nomination and further provided that the Mooring Master has deemed the vessel to be in all respects ready to moor and load. The Notice of Readiness will be accepted only between the hours of 0600 and 1800 but will not be accepted at any time when Hamriyah Oil Terminal is closed or on a public holiday or a Friday (the Moslem Sabbath). If, however, the vessel is moved to the loading berth without delay after having arrived at any time and the vessel is in all respects ready to moor and load in the opinion of the Mooring Master, the Notice of Readiness will be accepted at the time the Mooring Master boards the vessel. Laytime shall continue until the floating cargo hose has been disconnected from the vessel's manifold.

BERTHING: Tenders to load crude oil will normally be accepted and the loading berth will be assigned to a vessel in the order of its arrival, provided the vessel has a nomination for crude oil valid at the time and is in all respects equipped and ready to moor. In the event that mooring is delayed on account of weather, the vessel will keep its position in line. Should the vessel be required to leave the area on account of weather, the vessel should keep in radio contact with Hamriyah Oil Terminal in order to make the vessel available as soon as the weather moderates. The Company reserves the right to load vessels "out of turn" following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. For example, should weather make it necessary for a specific vessel waiting at the loading berth or at the anchorage to vacate the area, the Company may load another vessel which arrived at the anchorage after the specific vessel but before the return of the specific vessel which was waiting in line ahead of the the other vessel.

When the vessel proceeds to within a reasonable distance from the loading berth and upon advice from the Mooring Master, the mooring lines of the vessel will be carried by the launch to the floating buoy lines, secured thereto, and brought on board the vessel. On the vessel's end of the mooring lines there is a steel chafing chain which can be observed when the floating buoy lines come out of the water. This chafing chain will be secured to the vessel's bitts by way of Company-supplied mooring strops in such a manner that the floating buoy lines shall remain outside the vessel thereby allowing the chafing effect at the fairleads to be taken by the chafing chain. All mooring details and the sequence of movements shall be directed by the vessel's Officer in charge following consultation with the Mooring Master. When the mooring operations have been completed, fire wires of at least 150 ft. in length will be secured to the vessel's bitts and run out at the bow and stern of the vessel's starboard side and held in place on short stoppers with the eyes approximately 6 ft. above the surface of the water so that they can be readily available to a tug in case of an emergency.

Loading Berth: Vessels are loaded by means of a 30 in. submarine pipeline which runs from the shore tank to the loading berth and by means of a floating cargo hose which runs from the loading berth to the moored vessel. The maximum draft allowed for vessels at the loading berth is 55 ft.

Mooring Facilities: The Single Point Mooring Buoy moors vessels from the bow and consists primarily of a cylindrical buoy which is secured to the seabed by 6 catenary anchor legs each of which are tethered to the seabed by a heavy duty anchor system. The cylindrical buoy is 5.3 m. in height, fitted with a skirt 16 m. in diameter, and equipped with a radar reflector and a racon beacon coded "Zulu", frequency 48 seconds. The cylindrical buoy will be able to accept vessels up to 80,000 d.w.t. and is also equipped with a navigational light, white flashing code "U", which has a range of 5.7 miles with transmission factor of 0.85 and is visible through 360°. The Mooring Master may allow vessels in excess of 80,000 d.w.t. to moor at the cylindrical buoy provided the vessel has first obtained the written permission of the Company to moor at the facility.

Vessel's Alertness: The loading berth is on an open and unsheltered roadstead; therefore, from the time the Mooring Master boards the vessel until the vessel has loaded her cargo and the Mooring Master has disembarked, full power must be available at all times on all deck winches and windlass and other gear of the vessel and the vessel's engines, steering machinery and other efficient manoeuvring equipment must likewise be maintained in constant readiness with full power for immediate use so as to allow the vessel to depart from the loading berth at any time following a request by the Mooring Master or the Company to do so.

The vessel's personnel should be at their stations and alert at all times during mooring, unmooring, hose handling and cargo loading operations. Where vessels are equipped with an electric clutch control to the propeller shaft, such vessels must disconnect the electrical clutch control and the manual clutch control so that there will be no possibility of the engine engaging the propeller shaft while the vessel is moored. Constant observation in the engine room, control room and deck control room shall be provided at all times while vessels are at or in the vicinity of the loading berth.

Also see "Loading".

LOADING: *Vessel's Gear:* Prior to the arrival of any vessel at the Mooring Master Boarding Area, the port derrick of the vessel should be up and ready to lift the mooring and hose connection gear on board the vessel from the mooring launch, and the vessel must be equipped on the forecastle head with at least 4 good quality mooring lines, each not less than 120 fathoms in length and of buoyant material if possible, together with an adequate supply of lashing ropes and shackles. The mooring lines should be laid out free for running adjacent to bitts and warping winches. The warping winches or windlass should be in good working order and must be adequate to handle mooring lines under heavy strain and efficient stoppers must be readily available to "hang off" the mooring lines and transfer same from the winch to the bitts.

On the port side opposite the vessel's manifold, there must be equipment capable of lifting the floating cargo hose safely and efficiently, a 7.5 ton lift, from the sea surface over the port rail to the vessel's manifold. Vessels must also have an adequate supply of nuts, bolts, gaskets and wrenches to connect the floating cargo hose. If, in the opinion of the Mooring Master, the vessel is not equipped with adequate mooring or loading facilities or lines or gear, the Mooring Master must so inform the vessel's Master and in such event the vessel will not be brought into the loading berth until the facilities or lines or gear are deemed satisfactory by the Mooring Master.

Connecting Hose: After the vessel has been securely moored, the floating cargo hose will be hoisted to the vessel's port side rail amidship by vessel's equipment. The floating cargo hose is a 20 in. (reducing to 16 in.) diameter floating hose, 920 ft. in length, fitted with a 150 ASA flat face flange for connection to the vessel's manifold. The vessel should have adapters and fittings on board so as to enable such floating cargo hose to be connected to the vessel's manifold. The raising, connecting, disconnecting and lowering of the floating cargo hose will be performed by the vessel's crew as directed by the vessel's Officer in charge who must be present at all times during such operation and in accordance with the procedure advised by the Mooring Master, who will remain on board the entire time the vessel is at the loading berth. Particular care should be taken during all such hose operations to avoid damage to the floating cargo hose and its fittings.

Rate of Loading: The crude oil flow is by pump and the maximum crude oil loading rate for vessels using one 16 in. deck hose and 150 p.s.i. at vessel's rail is approximately 23,000 barrels per hour. In order to save vessel time and make the loading berth available for other vessels, it is requested that ballast be pumped as fast as possible and that vessels receive oil as fast as it can be delivered, with both operations having due regard for safety. It is requested that any impediment (such as "Y's", strainers or mud boxes) to the flow of crude oil into the vessel, be removed before the arrival of the vessel at the loading berth.

Responsibility: Prior to the commencement of any cargo loading operation, the Mooring Master and the Officer in charge of the loading operations for the vessel shall engage in a pre-loading conference to formulate a loading plan and to ensure that the vessel is in all respects ready to load. No cargo loading shall take place without the permission of the Mooring Master whose permission shall not be given until the pre-loading conference has been completed. The vessel's Master shall remain responsible for the safety of the vessel and all operations on board the vessel at all times. The Mooring Master will advise the Officer in charge of the loading operations for the vessel with respect to the loading pressures and hazards but the Mooring Master will not direct any aspect of the loading except as may be necessary to protect the loading berth and related facilities and equipment. The manipulation of the vessel's valves is the direct responsibility of vessel's personnel. The Mooring Master shall have the right to suspend cargo loading operations or to require the vessel to unmoor and depart from the loading berth at any time when the mooring plan, pre-loading plan or the safety requirements and regulations set forth herein are not being followed by the vessel, or at anytime the Mooring Master believes or becomes aware of the existence of any other reason which in his opinion shall require the suspension of the mooring or the loading of the vessel.

Oil Valve Control: The incoming oil stream is controlled onshore and the vessel's valves must not be closed against the incoming oil stream. Such a procedure creates an excessive pressure which may damage the hose or other terminal facilities and could result in a pollution incident. Vessels will be held legally responsible for any damage resulting from the vessel's failure to observe this precaution. Frequent checks of the cargo loading must be made by vessel personnel during the loading operation so that a reduction in the loading rate, before topping of the final tank or tanks, may be arranged through the Mooring Master by the Officer in charge of the loading operations for the vessel. A normal standby warning should be given about 15 minutes before the shutdown of the loading operations. Upon the request from a vessel to shut down the loading operations, a minimum of 5 minutes will be normally required to stop the flow of crude oil. Vessel's personnel shall be responsible for the call to stop the loading of the vessel. When cargo has ceased to flow, the valves on the shore will be closed and the vessel's manifold valves may then be closed.

Emergency Signal: Should normal ship-to-shore communications fail, the emergency whistle signal will be a continuous blast on the vessel's whistle. Steam or air should never be shut off from the whistle during loading. Whenever the emergency whistle signal is used, all loading operations will be shut down until communications can be established with the vessel giving the signal. For this reason, it is requested that vessels in the area refrain from using their whistles for other than essential purposes and that the use of the "continuous blast" whistle signal be reserved for emergency purposes only. All crew members who stand a deck watch during the transfer of crude oil are expected to know the emergency shutdown signal.

Code Flag: During all cargo loading operations, the International Code Flag "B" shall be displayed from a topmast signal halyard during daylight hours and a red light shall be displayed during the hours of darkness. The red light should be of a character as to be visible at a distance of at least 1 mile and show an unbroken light around the horizon.

Shore Stops: Request for the terminal to stop the flow of crude oil at a predetermined tonnage must be made in writing to the Company and will be deemed to include the statement and understanding that the Company will not be responsible for (1) any errors, costs or claims arising from such request and (2) any crude oil loaded in excess of that requested will not be pumped back ashore. Some delays in stopping the flow of crude oil are always incurred when such a shore stop request is made.

BALLAST: There are no facilities for the offloading of dirty ballast but clean oil-free ballast may be discharged overboard from the vessel. It is the Master's responsibility to see that no oil (crude, bunker, diesel, bunker C, or oily bilge water) is pumped or spilled overboard from the vessel. All deck scuppers must be plugged tight and adequate drip pans with sand must be provided where necessary on deck for use at all times, especially when disconnecting hoses, in order to prevent any such loss of oil overboard. The waters in and adjacent to the loading berth must not be polluted and only clean oil-free ballast may be discharged inside of a line running 50 miles from and parallel to the coastline of the United Arab Emirates.

The discharge of oil mixtures from vessels while en-route to Hamriyah Oil Terminal is prohibited except when the following conditions are all satisfied:

1. The instantaneous rate of discharge of oil content of the oily mixture does not exceed 60 litres per mile.
2. The total quality of oil discharged on the ballast voyage does not exceed 1/15,000 of the total cargo carrying capacity of the vessel, and
3. The vessel is more than 50 miles from the nearest point on the coastline of the United Arab Emirates.

Masters are warned that when disposing of dirty ballast or bilge water, (50 miles or more from the coastline of the United Arab Emirates), all pipe-lines, sea suctions, strainers and pumps which are later to be used to discharge clean ballast, must be flushed clean, so that there will be no chance of even a small amount of pollution when the clean ballast is pumped overboard.

Vessels must have sufficient ballast for safe manoeuvring and, where practicable, should arrive at the loading berth with the propeller completely submerged and trimmed 8 ft. to 10 ft. by the stern. The Mooring Master may refuse to permit the mooring of any vessel not in compliance with these requirements until the vessel takes on sufficient ballast and/or alters her trim to meet these requirements.

As soon as practicable after arrival, vessel tanks will be inspected for evidence of oil in ballast and during the discharge of ballast a similar inspection will take place. If evidence of oil appears at either of these inspections, the vessel must return to a point not less than 50 miles from the coastline of the United Arab Emirates and discharge such dirty ballast.

Any vessel required to return to a position at least 50 miles offshore, for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered and at the same time loses any priority held for loading. Vessels must tender a new Notice of Readiness upon their return and the vessel will be entered for loading upon the Company's acceptance of the new Notice of Readiness.

Vessels must keep a constant watch on the side of the vessel from which clean ballast is being discharged for any indication of water discolouration or oil sheen. Discharge of ballast must be immediately suspended should there be any indication of discolouration or sheen and the Mooring Master shall be immediately informed of such. An investigation of any such discolouration or sheen shall be carried out by the vessel and the findings reported to the Mooring Master. Discharging shall not resume without permission of the Mooring Master.

If, during any inspection or during the process of loading, it is revealed that a vessel's tank is not oil-tight, the vessel will be rejected by the Mooring Master and refused further loading until satisfactory evidence of effective repairs is submitted and the vessel is duly certified by Lloyd's Register of Shipping, American Bureau of Shipping or another similarly recognised classification society.

In addition to the lights usually displayed, vessels are required to illuminate the vessel and the waters around the vessel with all available and suitable searchlights and floodlights during the discharge of clean ballast and the loading of crude oil during the hours of darkness. Such illumination must be to the satisfaction of the Mooring Master and must be undertaken so as to assist in the loading operations and in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Vessels unable to illuminate the sea satisfactorily may not discharge ballast or engage in the loading of crude oil during the hours of darkness and any such delay shall be for the account of the vessel.

MEDICAL: Vessels requiring emergency medical assistance should contact Hamriyah Oil Terminal by VHF radio and supply the necessary pertinent information which will be passed on to the vessel's Agent. Neither medical or hospital facilities are available at Hamriyah Terminal, but private doctors and hospital facilities are available in the town of Sharjah.

CONSULS: There are no consulates in the village of Hamriyah; however, consular or diplomatic representatives for many nations maintain offices in the cities of Abu Dhabi and Dubai.

REPAIRS: The Masters of vessels loading at the loading berth are advised that the loading berth is considered an "open and unsheltered roadstead" and under no circumstances may engines be shut down for repairs while the vessel is at the loading berth. There are no facilities for making vessel repairs at Hamriyah Oil Terminal and no repairs will be allowed at the loading berth. However, arrangements can be made through the vessel's agent to utilise the repair facilities at other ports.

SURVEYORS: No cargo inspectors or marine surveyors are based at the village of Hamriyah but inspectors and surveyors who reside at other ports can be arranged through the vessel's Agent.

SHORE LEAVE/REPATRIATION: Vessel personnel (other than medical emergency cases) are not allowed to embark or disembark from the vessel at the loading berth. There are no facilities for crew change at the loading berth.

WEATHER: *Climate:* The climate along the coastline of Sharjah is characterised by cool Winters and very hot Summers. The annual mean rainfall is 4.2 in. and the relative humidity varies considerably according to the time of day with the highest relative humidity generally in the early morning and the lowest relative humidity generally in the early afternoon. The air temperature is generally moderate in the Winter, but is high in the Summer and can be extremely high in the interior on Summer afternoons.

Weather Data Summary:

Annual mean rainfall	4.2 in.
Lowest mean daily minimum air temperature	55°F.
Highest mean daily maximum air temperature	102°F.
Lowest average monthly sea surface temperature	72°F.
Highest average monthly sea surface temperature	90°F.

Winds: The winds in the Southern part of the Gulf are usually light and generally blow from the Western quadrant most of the year but are occasionally interrupted by winds from varying directions. The visibility along the Sharjah coastline is generally good but from June to September the Shamal blows over the Gulf area and frequently produces rough seas and stirs up dust clouds which can affect visibility at sea. The cold fronts which move down the Gulf from November to April frequently cause a North or N.W. wind of 20 knots or more along the Sharjah coastline with accompanying swells.

Tides: The tide for Sharjah can be predicted with reasonable accuracy through use of the tide tables for Shatt Al Arab with the appropriate correction factor for Sharjah applied.

Currents: The current along the Sharjah coastline has a predominantly counter-clockwise circulation throughout the year and is not generally strong. The strongest current is usually during the month of January (0.46 to 0.8 knots) and during the month of April (0.6 to 1.7 knots).

Seas: High waves generally do not occur along the Sharjah coastline since the winds are usually light in the vicinity of the coastline. On those occasions when the wind does become strong, the wave heights generally remain somewhat limited since the distance over which the wind can blow to generate waves is somewhat short from most directions due to the bend in the Gulf which tends to reduce the fetch of North winds at Sharjah (e.g., waves over 8 ft. occur 0.2 per cent of the time).

SAFETY: The vessel's personnel are responsible for the safety of the vessel and themselves and shall take all necessary precautions, whether or not so advised by the Company or the Mooring Master, having in mind the hazards of the loading operation, the cargo being handled, the weather condition and any other circumstances requiring special care or caution. The vessel's personnel shall also adhere to all safety precautions generally followed in the marine industry as well as all requirements and regulations imposed by the Company. Any safety precautions, requirements and regulations imposed by the Company and disregarded by the vessel's Master, Officers or crew will be considered a just cause for rejection of the vessel and all expenses related thereto shall be for the vessel's account. While the vessel is moored or within the vicinity of the loading berth, the vessel's personnel and the vessel's operations must comply or be in accordance with the following safety requirements:

(a) All ports opening onto the decks of the vessel are to be kept closed during cargo loading operations and all doors opened for access other than the pumproom doors must be closed immediately after use.

(b) Smoking is strictly prohibited on board the vessel and on the loading berth except in those areas designated by the Master as smoking areas. No areas outside of the accommodation areas shall be so designated. The Master is responsible for ensuring that all vessel personnel are informed of the designated smoking areas and shall post suitable notices regarding same. The Mooring Master may request the Master to further limit the vessel's "No Smoking" areas as conditions warrant. Matches and lighters for personal use shall not be carried while outside the designated smoking areas and personnel shall be so instructed. The Master shall instruct the Officers and crew of the vessel not to throw lighted cigars or cigarettes overside or out of port holes. There may be occasions when smoking will be entirely prohibited.

(c) The use of portable lamps, naked lights or electrical equipment on extension cords is prohibited and only approved intrinsically safe self-contained flashlights are permitted on deck.

(d) Ventilators must be so trimmed as to exclude flammable gases entering the area and if this cannot be done the ventilators must be completely closed.

(e) The vessel's engines, steering gear and other essential manoeuvring equipment and deck machinery must remain ready with full power for immediate use to permit the vessel to clear the area upon instruction from the Company or the Mooring Master to do so.

(f) Window type air conditioners must be disconnected from their power source and not used unless a certificate can be produced from a recognised authority to show that the unit is safe to operate in flammable gas areas.

(g) The vessel's main radio and radar equipment must not be energised while the vessel is handling cargo or ballast. The use of intrinsically safe VHF radios for cargo handling and safety operations are permitted.

(h) A continuous and efficient fire watch must be maintained on deck and in the engine room at all times. The vessel's fire fighting equipment shall be ready for instant use at all times throughout the vessel. Fire hoses of sufficient length to reach all parts of the vessel must be laid out and connected to hydrants and there must be full pressure on the deck line.

(i) Recommendations contained in the I.C.S. International Safety Guide for oil tankers and terminals covering the loading and discharge of tankers shall be strictly followed at all times.

(j) The only open flames allowed while the vessel is at the loading berth are those in the vessel's boilers and galley equipment. Sufficient fire extinguishers must always be provided near the galley and boilers.

(k) Burners, tubes, uptakes, exhaust manifolds and spark arrestors shall be maintained in good working order and kept clean. Funnel uptakes and boiler tubes shall not be blown while the vessel is at the loading berth. Highly volatile cleaning solvents shall not be used in the engine room for any purpose whatsoever while the vessel is at the loading berth.

(l) In the event of fire breaking out on any part of the vessel, however minor the fire may be, the fire alarm must be given immediately. The fire alarm will consist of a succession of long blasts on the vessel's whistle together with a rapid and continuous ringing of the vessel's bell.

(m) Not less than 1 deck Officer and 3 seamen shall be on duty, alert, available and in charge of the operations on deck at all times while the vessel is at the loading berth.

(n) Not less than 1 engineer shall be on duty, alert, available and in charge of the engine room at all times while the vessel is at the loading berth.

(o) A member of the vessel's crew, not one involved in any way with the loading operation, must be stationed on the bow of the vessel while the vessel is at the loading berth and a constant watch must be maintained on the moorings.

(p) During the discharge of clean ballast and the loading of crude oil, the vessel and the waters around the vessel must be illuminated during the hours of darkness with all available and suitable searchlights and floodlights.

(q) Before the floating cargo hose is brought on board the vessel, all deck scuppers must be plugged tight and adequate drip pans with sand must be provided where necessary on deck for use at all times. The deck scuppers must remain plugged until the floating cargo hose has been disconnected. All other materials necessary to clean up any oil spillage on deck must be on hand for immediate use.

(r) All unused bunker connections, cargo connections and vessel manifolds must be fitted with blank flanges including the stern discharge line if fitted.

(s) All cargo tank hatch covers and ullage port covers are to be kept closed except where tanks are to be hand sampled or hand ullaged in which case the ullage openings may be opened to sample or ullage the cargo.

(t) All cargo and ballasting operations shall be suspended during electrical storms in the vicinity of the vessel.

(u) Prior to the commencement of any loading operations, all empty vessel cargo tanks and tanks carrying cargo must be under positive pressure and fully inerted with gas having an oxygen content of less than 8 per cent.

(v) THE COMPANY DOES NOT HAVE A TUG OR VESSEL IN THE AREA EQUIPPED WITH FIRE FIGHTING APPARATUS.

GENERAL: *Government Officials:* Sharjah Officials such as the Customs Officer, Quarantine Officer, Immigration Officer, Captain of the Port and Police, are stationed in the town of Sharjah. Should Customs Guards be stationed on board the vessel while at the loading berth, it is expected that the vessel will provide food for these guards and other Sharjah Officials. Vessels calling at the loading berth must provide an accommodation ladder rigged on the port side for such Sharjah Officials.

Visitors: Visitors are not allowed to embark or disembark from the vessel at the loading berth.

Supplies: Commissary supplies, steward's stores, laundry services, fresh water, marine lubricants and bunkers are not available through the Company and may not be loaded at the loading berth. Any questions concerning the availability of such items from other sources and the loading of such items elsewhere should be handled through the vessel's Agent.

Contraband: The Company prohibits unauthorised craft from coming alongside vessels while at the loading berth without the permission of the Mooring Master. To avoid the possibility of undesirable items getting aboard vessels, it is recommended that Masters discourage any such craft from coming alongside while vessels are at or in the vicinity of the loading berth.

Garbage: The dumping of garbage and refuse overside is prohibited.

Agency: The Company does not perform any vessel Agency functions. Vessels calling at Hamriyah must arrange for their own Agents.

DEVELOPMENTS: Dredging underway of an approach channel (6 km. in length and 15 m. depth and harbour basin depth 14 m.) to new LPG plant presently under construction. Dredging to be completed mid-1986.

SHIPMASTER'S REPORT: July 1983.

Location: Hamriyah Oil Terminal is owned by Amoco Sharjah Oil Company. The terminal is located in the Emirate of Sharjah, United Arab Emirates. A 30 in. pipe-line runs from the shore tank to a S.P.M. located in position Lat. 25° 34′ 31.68″ N., Long.55° 24′ 05.8″ E. and is operated by Lamnalco.

Documents: Health Declaration and Crew Lists. Customs, Immigration and Quarantine officers have an office in Sharjah but usually do not come on board.

Pilotage: A pilot ladder to be prepared on vessel's Port side and lowered to about 12 ft. above the waterline. If the height of the deck exceeds 30 ft. a pilot ladder in conjunction with the accommodation ladder must be rigged.

Anchorages: The customary anchorage for vessels awaiting the loading berth of Hamriyah Oil Terminal is 3 miles due North of the S.P.M. Anchorage within 3 miles is strictly prohibited unless instructed by the Mooring Master.

Max. Size: Vessels up to 250,000 tons have been accepted.

Health: Rules are the same as found all over the world.

Radio/VHF: Amoco Sharjah and Lamnalco should be contacted by radio 3 days prior arrival via Bahrain Radio and maintain contact until prior arrival.

Telex addresses: 68685 Amcosh EM and 68433 Lamshj EM.

Following information is required by both parties:

1. ETA.
2. Arrival Draft.
3. Quantity to be loaded.
4. Estimated sailing draft.
5. Last port of call.
6. Whether vessel has clean bill of health.
7. Distance bow to manifold.

Both companies keep watch on international VHF Marine Channel 16.

Berthing: This cylindrical buoy is equipped with a navigational white flashing light code "U", range 5.7 miles, a radar reflector and a racon beacon coded "Zulu".

On forecastle, vessel should have 4 good quality mooring lines, minimum length of 120 fathoms and preferably of the floating type. Vessel's lines to be used to pick up the mooring lines of the buoy. The end of the buoy's mooring line consists of a steel chafing chain and will be secured onto vessel's bitts by mooring strops supplied by Lamnalco.

Port derrick should be up and ready for lifting moorings and cargo hose connecting gear and capable of lifting 7.5 tons safely.

Mooring Master and Cargo Oil Surveyor stay on board while vessel is on the berth and both to be accommodated in an officer's cabin and meals served in officer's messroom.

Notice of Readiness: Will only be accepted between 0600 and 1800 hrs. but will not be accepted at times when the Hamriyah Oil Terminal is closed on a public holiday or Friday (Moslem Sabbath). However, if the vessel is moved to the berth without delay after having arrived at any time and vessel is ready for mooring and loading the Mooring Master will accept the N.O.R. at the boarding time. Laytime shall commence upon expiration of 6 hours after accepting the N.O.R. and shall continue until hose has been disconnected from vessel's manifold.

Loading: The floating hose is 20 in. diameter with a 16 in. hose for connecting to the vessel's manifold. Loading rate approximately 23,000 bbls.p.h. Only one type of oil available, being crude oil condensate approximately API 50/60F and loading temperature approximately 95°F.

Ballast: There are no dirty ballast reception facilities and all vessels must arrive with sufficient clean ballast for manoeuvring with the propeller submerged and a trim of 8 – 10 ft. by the stern. Non-permanent clean ballast to be discharged prior to commencing of loading.

Medical: Neither medical nor hospital facilities are available at Hamriyah Oil Terminal. Requests for emergency medical assistance should be passed to Hamriyah Oil Terminal by VHF and the information will be passed to vessel's Agent. Private doctors and hospital are available in the town of Sharjah.

Supplies: Stores, fresh water, laundry services, bunkers and lubricant not available via Amoco and may not be loaded at the berth. Availability of items should be handled through vessel's Agent and loading carried out elsewhere.

Consuls: No consulates in Sharjah; however, many nations have consular or diplomatic representatives in Abu Dhabi and Dubai.

Repatriation/Shore Leave: Not permitted while at loading berth.

Currents: Predominantly counter-clockwise circulation throughout the year along the Sharjah coastline and is generally not strong. Strongest in January (0.4–0.8 knots) and in April (0.6–1.7 knots).

Weather: Winds are usually light from Western quadrant, except during June to September when the Shamal blows and from November to April during passing of cold fronts with winds up to 20 knots producing rough seas.

AUTHORITY: *Operator:* Amoco Sharjah Oil Company, P.O.Box 1191, Sharjah, United Arab Emirates. *Tel:* 355100. *Telex:* 68685 Amcosh EM.
Contact: Operations Manager.

AGENT: See "Sharjah".

HULAYLAH TERMINAL, Ras Al Khaimah:
25.58 N. 55.56 E.

LOCATION: The geographical location of the Hulaylah Terminal SPM is: Lat. 25° 58′ 26″ N., Long. 55° 56′ 11″ E.

Hulaylah Terminal is the export crude oil facility operated by Gulf Offshore Ras Al Khaimah Petroleum Limited located approximately 6 miles offshore from Mina Saqr, Ras Al Khaimah, United Arab Emirates.

Crude oil from the Saleh offshore field is transferred to export tankers at the offshore SPM from the storage tanker "Afran Zodiac" of 227,778 d.w.t. in a side-by-side ship-to-ship transfer operation.

The storage tanker "Afran Zodiac" is permanently moored to the SPM which is located in a minimum water depth of 100 ft.

The storage tanker receives crude oil through a forward loading line from the SPM which in turn is connected to a submarine pipe-line which runs to the Saleh Field Production Platform.

Saleh field production facilities are located at the following positions:

	Latitude	*Longitude*
Saleh 1 and Production Platform	26° 11′ 31″ N.	55° 42′ 27″ E.
Saleh 1 Flare	26° 11′ 44″ N.	55° 42′ 35″ E.
Saleh 2 Platform	26° 11′ 43″ N.	55° 42′ 16″ E.
Saleh 3 Platform	26° 10′ 11″ N.	55° 41′ 47″ E.
Saleh 4 Platform	26° 10′ 27″ N.	55° 45′ 37″ E.

DOCUMENTS: None required.

PILOTAGE: The Mooring Master Boarding Area for the Hulaylah Terminal is 3 miles Westward of the storage tanker "Afran Zodiac", or boarding will be at the anchorage as appropriate.

The GORAKP Mooring Master will remain on board throughout the export vessel's stay on the berth to co-ordinate the petroleum transfer operation; therefore, suitable and adequate accommodation shall be provided for him on board the export vessel.

Arrival at Pilot Station/Anchorage: Means of access to the vessel by the GORAKP Mooring Master shall be provided in accordance with the requirements of SOLAS, and early advice will be given by GORAKP as to the side of the vessel that access should be provided.

At night the access area shall be adequately illuminated to provide for the approach and boarding of the GORAKP Mooring Master, Government Officials and for GORAKP Representatives.

The Conditions of Entry into and Use of Hulaylah Terminal and Agreement for the Hiring of Tugs will be presented to the Master of the export tanker and shall be signed by him on behalf of himself, the vessel and its Owners prior to departure from the pilot station/anchorage and commencement of berthing operations.

The Notice of Readiness will be accepted only between the hours of 0600 and 1800 provided the GORAKP Mooring Master is satisfied that he export vessel is apparently in all respects ready to moor and load. Notice of Readiness will not be accepted during a period when the port s closed on account of adverse weather, or when an export vessel arrives prior to the date upon which it is nominated to load.

The foregoing paragraph notwithstanding, in no event shall a Notice of Readiness, whether previously accepted or not, be valid or binding on he Terminal unless and until such time as the export vessel, her tanks and equipment, are, in fact, in every respect whatsoever in the proper condition and operation to receive the cargo.

ANCHORAGES: Should it be necessary to anchor, then vessel should proceed to the recommended Tanker Anchorage Area which is within a circle 0.5 miles in diameter and with its centre located in position Lat. 25° 58′ N., Long. 55° 53′ E.

RESTRICTIONS: Berthing possible during daylight hours only.

MAX. SIZE: Max. deadweight of 150,000 tons permitted alongside the Afran Zodiac”. Partially loaded tankers acceptable. Water depth 100 ft.

HEALTH: No health clearance requirements currently in force.

RADIO: Following receipt of a nomination of an export vessel to load at he Hulaylah Terminal, GORAKP will cable to that vessel via Bahrain Radio (A9M) details of nomination, loading API and temperature, and berthing prospects.

On receipt of this cable, and in any case not later than 72 hours prior o arrival time at Hulaylah Terminal, the export vessel is required to able to GORAKP via Bahrain Radio the following information:

- (a) Name of vessel.
- (b) ETA in GMT (U.A.E. time is GMT plus 4 hours throughout the year).
- (c) Name of Master.
- (d) Estimated arrival draft, fore and aft, and displacement.
- (e) Time for discharging clean ballast, if any.
- (f) If vessel proceeding to any port(s) prior to Hulaylah, and if so, any delays anticipated.

Sections (a) and (b) of above message should be repeated via Bahrain Radio 48 hours, 24 hours and again 12 hours prior to the export vessel's arrival at the Hulaylah Terminal and at any other time when ETA changes more than 1 hour.

When approaching the Terminal, an export vessel should contact the torage vessel “Afran Zodiac” on VHF Channel 16 (156.8), establishing a working channel and confirming ETA.

VHF: *Export Tanker – Storage Tanker Communication:* When the export anker is at the anchorage, communication between the storage tanker and the export tanker will be established on VHF Channel 16 or on a mutually agreed VHF channel.

When alongside the storage tanker, communication between the two vessels will be maintained by VHF equipment. In those cases where the VHF equipment on board the export tanker is not compatible with the Zodiac” equipment, the GORAKP Mooring Master will arrange for the availability of compatible VHF sets for use during the transfer operation. These sets shall be returned to the GORAKP Mooring Master prior to his departure from the export tanker.

Approach to the Anchorage/Mooring Master Boarding Area: When within VHF communication range, Masters of export tankers should ascertain berthing prospects from the Terminal.

RADAR: There is a radar on the “Afran Zodiac” but is not normally in use.

TUGS: Suitable tugs and line boats are chartered for each lifting and are for export tanker's account.

BERTHING: *Mooring/Unmooring Arrangements:* The export tanker will be moored alongside the starboard side of the “Afran Zodiac” according to a mooring plan to be agreed between the Master of the “Afran Zodiac”, the GORAKP Mooring Master and the Master of the export tanker. Fendering between the two vessels consists of 4 large fenders each 10 ft. in diameter by 20 ft. length at water line level, and 8 secondary fenders positioned close to the freeboard deck. For mooring/unmooring operations the services of tugs will be necessary and a mooring line boat will be in attendance. Export vessels should provide either synthetic mooring lines or mooring wires with properly sized synthetic tails in order to ensure sufficient elasticity in the mooring arrangement to take account of any differential rolling periods of the two ships. Masters of export tankers are to be advised that the actual requirement of the mooring system may be subject to variation from time to time depending on the environmental conditions.

LOADING: *Transfer Operations:* The GORAKP Mooring Master will remain in the export tanker throughout the petroleum transfer operation and will co-ordinate all activities on board the export tanker with the storage tanker.

The maximum loading rate available for the transfer operation will be 20,000 bbls.p.h., but in no circumstances will the export tanker be requested to load at a rate faster than that required by her Master.

At all times during the transfer operation, a responsible deck officer shall be in charge of operations, either on deck or in the control room. On vessels with a central control room from which all operations are controlled, a deck watch in contact with the control room is required to continuously patrol the cargo deck, and monitor the manifold area of the export vessel.

When the responsible export tanker officer has declared the export tanker ready to load with all necessary valves open, the Mooring Master will instruct the storage tanker to commence the transfer at a slow rate. As soon as flow is confirmed and the integrity of the transfer hose connection is established, the export vessel may request an increase to the previously agreed loading rate.

At any time during the transfer operation, the rate can be reduced as requested by the Master or responsible officer of the export tanker.

The GORAKP Mooring Master shall be given advance notice by the Master or responsible officer on the export tanker when a reduction of loading rate is required preparatory to completion of transfer.

After completion of loading, both vessels will be ullaged. A Bill of Lading, Cargo Manifest, Ullage Report, Certificate of Quantity, Certificate of Quality, Certificate of Origin, and Port Time Log will be completed. All such documents will have been signed by the Master of the export tanker prior to that vessel's departure. If required or requested by the Master of the export tanker, the Agent for the export tanker may sign the cargo documents on behalf of the export tanker's Master. The official quantity and quality of the crude oil delivered to the export tanker shall be determined by GORAKP and shall be final and binding on the export tanker and her Owners and Charterers.

Hose Handling: The storage vessel will present a single 12 in. flexible hose line, and before berthing the export tanker's port side manifold is to be prepared to accept a 12 in., 150 lb. ASA flange. Hose connection/disconnection will be carried out by the export tanker's crew who are required to be at all times under the control of a responsible deck officer and undertake hose handling operations in co-operation with procedures advised by the GORAKP Mooring Master.

The export tanker will be required to have ready a derrick with a minimum SWL of 5 tons at the port manifold area for the handling of the flexible hose line from the storage vessel.

Cargo Information: Oil loaded at the Hulaylah Terminal is Saleh crude with an average API gravity of approximately 44° – 46°. The loading temperature will vary from 73°F in the winter to 85°F in the summer months. Some H_2S may be present in the crude oil.

Hydrogen Sulphide: Vessels nominated to load at the Hulaylah Terminal SPM should be advised that Saleh crude may contain H_2S. Continued exposure over long periods to even small concentrations of hydrogen sulphide can cause headache and nausea. Masters should ensure that personnel involved in the loading operation take the appropriate precautions as recommended by their Owners.

Deballasting Operations: Export vessels are required to arrive with sufficient ballast or cargo and be adequately trimmed for safe manoeuvring.

Hulaylah Terminal has no ballast reception or slop disposal facilities, and therefore, export vessels are required to arrive with sufficient clean ballast suitable for pumping directly to the sea. Export vessels arriving with ballast unsuitable for pumping to the sea may be rejected for loading, or will be required to keep that portion of their ballast unsuitable for discharge to the sea segregated on board. GORAKP will not accept any claims for vessels unable to meet such requirements.

It is strictly against the law to pollute the waters of the United Arab Emirates, and any Master, his vessel and Owners, may be subject to prosecution by the United Arab Emirates Authorities if such pollution does occur.

Simultaneous Deballasting and Loading of Cargo Tanks: This practice is not encouraged and in most circumstances will not be permitted. It is recognised, however, that under certain weather/sea conditions this practice may be necessary. In such circumstances, simultaneous deballasting and loading may be permitted by the GORAKP Mooring Master if, in his opinion, cargo quality and the environment are sufficiently protected.

If such operations are found necessary, it shall be done at the sole risk of the export vessel, its Master and Owners, and the most stringent care and attention shall be taken by the export tanker throughout, which, and whose Owners, shall remain fully responsible for, and indemnify and hold GORAKP, its parent companies, subsidiaries, and affiliates, harmless from, any and all claims, demands, damages, liabilities, costs, fines, and expenses, of every kind whatsoever, arising out of, on account of, or in any way connected with the simultaneous deballasting and loading of the export tanker.

Inert Gas Systems: All crude tankers of 20,000 d.w.t. or greater programmed to load should arrive with cargo tanks inerted to 8% oxygen or less by volume and pressurised as required by the SOLAS Convention. Normally cargo tanks under pressure will not be inspected by the Terminal Representative provided a declaration is signed by the Master prior to commencement of loading confirming that all compartments of the vessel have been prepared in all respects as required for the cargo to be loaded.

- (a) Tank Inspection, Gauging, Sampling, Water Dips and Temperatures: Should it be necessary for tanks to be inspected, then it should only be done on a tank-by-tank basis. The system shall be maintained at about 200 mm. water gauge except for the individual tank to be opened which, if possible, is to be isolated from the system and the sighting port opened with care. On completion of inspection the tank shall be secured and re-pressurised. The next tank is not to be isolated and opened until the preceding tank is secured and open to the IG system.

  All gauging, sampling, water dips and temperatures will be taken either through special fittings provided; or if it is necessary to open up tanks for this purpose, then this will be done one tank at a time as described above.
- (b) Failure of IGS: If at any time the IGS is not maintaining the prescribed conditions, the GORAKP Mooring Master shall order a suspension of transfer operations. The cost of any delays will be for the export vessel's account.

MEDICAL: Doctors and dentists available.

DENSITY: 1030.

FRESH WATER: Not available.

FUEL: It is not permitted to load bunkers while alongside the storage tanker. Bunkers can be arranged at anchorage by vessels' local Agents.

CONSULS: At Dubai.

REPAIRS: Repair facilities are not readily available.

Repairs will not be permitted when the export vessel is alongside the storage tanker.

SURVEYORS: At Dubai.

CUSTOMS ALLOWANCES: Most crew transit through Dubai where import allowances are:

1. 1,000 cigarettes or 200 cigars or 1 kilo of tobacco.
2. One litre toilet water and 150 gms. perfume.
3. No alcohol of more than 2% permitted without an import licence.
4. There are no restrictions outbound.

REPATRIATION: Launch and helicopter service available.

AIRPORT: Ras Al Khaimah has an international airport but Dubai airport has greater frequency of flights.

SHORE LEAVE: Permitted.

GENERAL: *Operating Procedures:* Procedures for cargo and ballast operations shall be agreed in writing between the GORAKP Mooring Master and the export tanker's Master and Chief Officer.

Flags: The national flags of the United Arab Emirates and Ras Al Khaimah shall be permanently displayed by vessels at the Hulaylah Terminal.

Alcohol: Masters are advised that drinking or sale of alcoholic beverages is strictly forbidden to U.A.E. National Citizens and are warned of the serious consequences of offering such drinks to the Terminal staff who may board the vessel.

Storing: It is not permitted to load stores while alongside the storage tanker.

Agency: GORAKP does not perform any vessel Agency functions. Vessels calling at the Hulaylah Terminal are required to arrange their own Agency representation from an Agency operating in Ras Al Khaimah.

WEATHER: The winds in the Southern part of the Gulf are usually light and generally blow from the Western quadrant most of the year but are occasionally interrupted by winds from varying directions. The visibility along the Ras Al Khaimah coastline is generally good, but from June to September the Shamal blows over the Gulf area and frequently produces rough seas and stirs up dust clouds which can affect visibility at sea. The cold fronts which move down the Gulf from November to April frequently cause a North or N.W. wind of 20 knots or more along the Ras Al Khaimah coastline with accompanying swells.

High waves generally do not occur along the Ras Al Khaimah coastline since the winds are usually light in this area. On those occasions when the wind does become strong, the wave heights generally remain limited since the distance over which the wind can blow to generate waves is relatively short from most directions. This is due to the bend in the Gulf which tends to reduce the fetch of North winds (e.g. waves over 8 ft. occur 0.2% of the time).

Currents are omnidirectional and variable in strength. During the month of January 1984, currents in excess of 1 knot were recorded.

SAFETY: *Safety Requirements:* Masters will be given the GORAKP Safety Requirement Letter by the GORAKP Mooring Master prior to commencement of berthing operations, and a signed acknowledgement will be required.

Safety Check List: On completion of berthing and prior to the commencement of deballasting or cargo loading, the Storage Ship/Export Ship Safety Check List will be completed following a joint inspection by the GORAKP Mooring Master and a responsible export tanker's officer. The GORAKP Safety Check List is based on the recommendations of the "International Safety Guide for Oil Tankers and Terminals" (ISGOTT).

AUTHORITY: Gulf Offshore Ras Al Khaimah Petroleum Limited, P.O.Box 540, Ras Al Khaimah, United Arab Emirates. *Telex:* 99255 Gulfk Em. *Contact:* Mr. F. E. Wisner, General Manager. Tel: 22755.

JEBEL DHANNA – RUWAIS: 24.11 N., 52.37 E.

(See Plan Book)

(A) GENERAL
(B) JEBEL DHANNA – SEA BERTHS TERMINAL
(C) RUWAIS – REFINERY TERMINAL
(D) RUWAIS – NGL TERMINAL
(E) RUWAIS FERTILISER INDUSTRIES (FERTIL)

(A) GENERAL

AUTHORITY: The port is operated by the Abu Dhabi Petroleum Ports Operating Company (ADPPOC) on behalf of:

(a) The Abu Dhabi National Oil Company (ADNOC) (the governing authority for oil ports).
(b) Abu Dhabi Company for onshore oil operations (ADCO).
(c) The Ruwais Refinery.
(d) Abu Dhabi Gas Industries Limited (GASCO).

Abu Dhabi Petroleum Ports Operating Company, P.O.Box 61, Abu Dhabi, United Arab Emirates. *Tel:* 336700. *Telex:* 22209 Adppoc EM. *Cables:* Adppoc. *Contact:* Captain J.A.S. Hawkins, Harbour Master, Jebel Dhanna-Ruwais.

PORT LIMITS: All waters Southward of Lat. 24° 26′ 48″ N., to the coast up to Spring High Water Mark, between meridians of Long. 52° 33′ 36″ E. and Long. 52° 46′ 36″ E., (that is, with reference to Chart 3780 B.A. & USHO, the whole waters of that Chart) and shall include all jetties, wharves, structures, sea-berths, reefs, rocks, sand-bars and islands, excluding Sir Bani Yas Island, within the said area.

PILOTAGE: Pilotage is compulsory for all ships navigating within port limits other than exempted ships (See "General"). Ships may, however, drop anchor or sail from Gasha Anchorage without a Pilot. This rule is not applicable to U.A.E. Naval, coast guard vessels or country craft who may, having ascertained channel clearance from Port Control, proceed without the service of a Pilot.

Pilot Station: Pilots will board and disembark at the main Gasha P Station as delineated on B.A. Chart No. 3780.

Use of North Channel: Masters of Exempted ships of suitable dr should use the North Channel and East Yabr Relief Channel wh entering or leaving the port.

Pilotage Exemption Certificate: Port Pilotage Exemption Certificate m be granted to Masters of regular trading vessels of less than 3000 n.r upon the Harbour Master's satisfaction of their competency. Su certificates shall be renewed annually.

Berthing and Unberthing at Oil and Gas Berths: Notwithstandin anything contained in these Rules berthing or unberthing at oil and ga berths at Jebel Dhanna or Ruwais shall be under the control of a Pil

N.B.: Berthing and unberthing of a small ship at the ADNOC Berth position Lat. 24° 11′ 55″ N., Long. 52° 38′ 59″ E., may b undertaken without a Pilot provided that the Master has Pilotag Exemption Certificate.

Pilot Ladder: A clean and efficient pilot ladder fitted with spreaders an manropes shall be made available for the Pilot to embark or disemba and at night the ladder shall be illuminated with an efficient and sa light.

Accommodation Ladder and Pilot Ladder: Whenever as in the case large vessels, the height of the deck above the water exceeds 30 ft., th accommodation ladder shall also be used in conjunction with the pil ladder, and shall be lowered to about 22 ft. (7.0 m.) above the water wi the pilot ladder immediately adjacent to the bottom platform of th accommodation ladder.

Mechanical Hoist: A mechanical hoist of an approved pattern shall b considered an acceptable alternative to a conventional pilot ladder to b used in conjunction with the accommodation ladder.

NOTE: Mechanical hoists whose operation relies upon a single wi are not of approved pattern under these rules.

Supervision of Pilot Ladders: The rigging of the pilot ladders for th embarkation and disembarkation of Pilots shall be supervised by responsible ship's officer, and shall be so effected that the ladder is we clear of any overboard discharge and so that each step of the ladd rests securely against the side of the ship.

Safe embarkation and disembarkation: A Master of any ship navigatin in the port, shall afford such suitable "weather lee" and speed reductio as may be directed by the assigned Authority Pilot in order to provide safe embarkation or disembarkation operation.

Pilot to Advise Course and Speed: Vessels navigating within Port Limi shall proceed on such a course and at such speed as the Pilot advises

Provided that when passing through the inner anchorage areas ever vessel whether under Pilotage charge, or navigated by her Master wi an Exemption Certificate, shall proceed with caution and at a moderat speed duly considering other vessels and cargo operations in the area

Small High Speed Vessels: High speed vessels as of "Crew Boat" typ shall proceed at a moderate speed to reduce the wave making wash the vicinity of vessels, working cargo, dredging or construction work diving operations, etc., until past and clear of these vessels operations.

Anchors Ready for Use: Every ship prior to any movement within th port shall have both Bower Anchors (if two fitted) prepared for immediat emergency use. Masters shall, however, consult with the assigned Pil (if any) before lowering an anchor to the sea surface.

Any Damage to Ship to be Notified: Before entry the Master shall infor the Port Authority of any damage to the vessel or any projection from th hull above or below water which may affect the vessel's draft, ship handling qualities or berthing capability.

TIDAL STREAMS: In the outer approaches to Jebel Dhanna-Ruwais tidal streams would appear to attain a maximum of 1 knot while 1.7 knot may be encountered in the channel N.E. of Jezirat Sir Bani Yas.

Tidal currents in the area of the berths seldom exceed 0.4 knots.

The tides are generally diurnal, winds from N.E. and N.W. may caus an increase up to 0.6 m. in the height of the tide.

The highest average, spring high tide is 2.0 m. above chart datum.

The highest average, neap high tide is 1.0 m. above chart datum.

AIDS TO NAVIGATION: Approaches to Jebel Dhanna-Ruwais (Se Admiralty Chart Nos. 3778, 3779 and 3780).

The outer channel for deep drafted vessels between Jezirat Zarakhu (Zarqu) and Gasha Anchorage is marked by 6 buoys and 2 light floats a follows:

Name/No.	*Description*	*Characteristic*	*Position*
Outer Fairway	Safe Water Mark	Iso 10 secs.	24° 45′ 48″ N. 52° 53′ 12″ E.
O1	Conical Green	Fl.G. 5 secs.	24° 46′ 20″ N. 52° 49′ 30″ E.

North Yabr Buoy	in	Lat. 24° 20′ 54″ N. Long. 52° 43′ 18″ E.
Yabr Channel Buoy	in	Lat. 24° 18′ 20″ N. Long. 52° 45′ 09″ E.
South Yabr Channel Buoy	in	Lat. 24° 15′ 46″ N. Long. 53° 43′ 24″ E.

Ruwais Approach: The channel to N.E. of Ruwais middle marked by:

(i) Buoy No. 22	in	Lat. 24° 13′ 38″ N. Long. 52° 42′ 12″ E.
(ii) Buoy No. 24	in	Lat. 24° 12′ 24″ N. Long. 52° 44′ 42″ E.
(iii) Buoy North Middle	in	Lat. 24° 12′ 42″ N. Long. 52° 43′ 41″ E.
(iv) Buoy East Middle	in	Lat. 24° 12′ 08″ N. Long. 52° 44′ 26″ E.

Bulk Cargo Terminal (BCT): Turning basin marked by buoys:

(i) BCT 1	in	Lat. 24° 09′ 29″ N. Long. 52° 43′ 54″ E.
(ii) BCT 2	in	Lat. 24° 09′ 24″ N. Long. 52° 44′ 12″ E.
(iii) BCT 4	in	Lat. 24° 09′ 07″ N. Long. 52° 44′ 16″ E.
(iv) BCT 6	in	Lat. 24° 08′ 57″ N. Long. 54° 44′ 14″ E.

ANCHORAGES: The main anchorage positions are defined on Admiralty Chart No. 3780, and are identified by the letters of the alphabet.

Explosives Anchorage: Anchorage bounded by the following points:
(i) Lat. 24° 13′ 30″ N., Long. 52° 44′ 55″ E.
(ii) Lat. 24° 12′ 46″ N., Long. 52° 45′ 48″ E.
(iii) Lat. 24° 13′ 18″ N., Long. 52° 46′ 18″ E.
(iv) Lat. 24° 14′ 00″ N., Long. 52° 45′ 27″ E.

Explosives Buoy: Mooring buoy in position Lat. 24° 09′ 36″ N., Long. 52° 46′ 18″ E., for the purpose of temporary mooring of barges or pontoons carrying explosives.

PROHIBITED AREAS: Prohibited Areas exist for a distance of 2 cables (1,200 ft. – 365 m.) around any berth at which any ship is engaged in loading or discharging any petroleum cargo of whatever description including crude oils and refined products whether in bulk or containers, LNG or LPG and no vessels or craft may enter such restricted areas without instructions from the Port Authority or Oil Company.

RESTRICTED AREAS:

Sea Berths: A restricted area exists around ADCO's seaberths within an area bounded by a line from:
(a) Jebel Dhanna Jetty Light in Lat. 24° 11′ 20″ N., Long. 52° 37′ 51″ E., thence 359° to
(b) Light Beacon "T.13" in Lat. 24° 13′ 06″ N., Long. 52° 37′ 49″ E., thence 060° at
(c) in Lat. 24° 14′ 00″ N., Long. 52° 39′ 30″ E., thence to 139° to
(d) Buoy No. 17 in Lat. 24° 11′ 41″ N., Long. 52° 41′ 42″ E., thence 255.5° to the coast at
(e) in Lat. 24° 10′ 48″ N., Long. 52° 37′ 57″ E.

Navigation and anchorage within this area is strictly prohibited to all unauthorised vessels and those not under the control of a Pilot.

Refinery/GASCO/BCT: A restricted area exists around the Refinery, GASCO Jetties and BCT Jetty at Ruwais within an area bounded by a line from:
(a) in Lat. 24° 08′ 36″ N., Long. 52° 42′ 12″ E., thence 000° to
(b) in Lat. 24° 10′ 24″ N., Long. 52° 42′ 12″ E., thence 035.75° to
(c) in Lat. 24° 10′ 48″ N., Long. 52° 42′ 30″ E., thence 103.5° to
(d) in Lat. 24° 10′ 18″ N., Long. 52° 44′ 42″ E., thence 119.5° to
(e) in Lat. 24° 09′ 57″ N., Long. 52° 45′ 24″ E., thence 195° to
(f) Construction harbour jetty head in Lat. 24° 08′ 12″ N., Long. 52° 44′ 54″ E.

Navigation and anchorage is prohibited to all unauthorised vessels not under control of a Pilot. Within this area no vessel or craft may secure or make fast to the Petroleum Jetty without instruction from the Pilot, Port Authority or the Oil Company.

RESTRICTIONS:

Times of Entry or Leaving: Subject to limitations upon draft, under keel clearance and extreme adverse weather conditions, vessels may enter or leave at any time during the day or night.

Minimum Under Keel Clearance: To ensure safe channel passage, a minimum under keel clearance is required for all ships entering or leaving the port when deep loaded, as follows:
(a) 3 ft. (0.91 m.) for ships of less than 100,000 Summer d.w.t.
(b) 4 ft. (1.22 m.) for ships between 100,000 and 250,000 Summer d.w.t.
(c) 5 ft. (1.52 m.) for ships of over 250,000 Summer d.w.t.

And such under keel clearance may be increased at any time at the Port Authority's discretion having due regard to weather conditions.

NOTE: While observing the safety requirements of under keel clearance, tidal delays may be experienced as follows:
(a) Ships drawing 44 ft. (13.4 m.) may sail at any time.
(b) Ships drawing 45 ft. (13.7 m.) will rarely have to wait for the tide.
(c) Ships drawing 46 ft. (14.0 m.) will usually have to wait for the tide.
(d) Ships drawing 47 ft. (14.3 m.) will always have to wait for the tide.
(e) Ships drawing 48 ft. (14.6 m.) will occasionally be neaped.
(f) Ships drawing 49 ft. (14.9 m.) will be neaped 294± days per year.

The best months are June, July and August.

Meteorological conditions may reduce the height of the tide by up to 1 ft. (0.305 m.)

Movements Within the Port Limits: No vessel may enter, leave or move within the confines of the port unless permission for moving is first obtained from the Port Control Office.

Outward Priority: When one ship is ready to leave and another to enter simultaneously, a deep loaded outward bound ship which requires to transit the "Deep Water Channel" on account of draft in excess of 30 ft. (9.14 m.) shall have priority subject to the provisions of Rules mentioned above.

ARRIVAL/DEPARTURE NOTICES: *Notice of Arrival:* The Owner, Master or Agent of any ship which intends to call at the port shall inform Port Control 72 hours prior to arrival, the intended date and time of arrival of such ship, the nature and quantity of the cargo to be loaded or discharged and the estimated deepest draft upon arrival, and shall confirm or amend such information at 48 and 24 hours before arrival.

Vessels should also advise:

1. The date and final port and country of her last loading at an Arabian Gulf or Omani port.
2. A list of ports and countries at which the vessel has called between 1. above and her arrival at Jebel Dhanna.
3. Should the tanker not have loaded in the Gulf or an Omani port since building, then a list of ports and countries at which the vessel has called from the date of building to her arrival at Jebel Dhanna.

In order to expedite Pilot attendance, Masters should endeavour to confirm their final ETA to "Port Control" Jebel Dhanna/Ruwais on VHF radio, Channel 9, 6 hours prior to arrival at anchorage.

Notice by Agent: The Agent shall also supply the Port Health Officer, Customs and Immigration, the requisite ship information 48 hours prior to arrival.

Notice of Departure: The Master or Agent of any ship within the port shall inform Port Control giving at least 12 hours' notice of departure and shall further confirm the time of departure 2 hours before being ready to sail.

BERTHING FACILITIES: The Port of Jebel Dhanna-Ruwais consists of two main oil terminals, one petroleum gas terminal, one bulk cargo terminal and a small cargo harbour (see Admiralty Chart No. 3780).

The Crude Oil Terminal at Jebel Dhanna is operated by the Abu Dhabi Company for Onshore Oil Operations (ADCO) and consists of 4 C.B.M. Berths capable of accepting tankers up to 330,000 d.w.t. and 1,215 ft., (370.3 m.) in length. Minimum depths at the berths are:
No. 1 Berth: 51 ft. (15.54 m.) max. length of ship 950 ft. (289.6 m.).
No. 2 Berth: 52 ft. (15.85 m.) max. length of ship 1,100 ft. (335.3 m.).
No. 3 Berth: 55 ft. (16.76 m.) max. length of ship 1,200 ft. (365.76 m.).
No. 4 Berth: 55 ft. (16.76 m.) max. length of ship 1,215 ft. (370.3 m.).
Also see "Section B".

The Refinery Terminal at Ruwais about 2.5 miles S.E. of the Jebel Dhanna Terminal Berths is owned and operated by the Abu Dhabi National Oil Company Ruwais Refinery and consists of a 3 km. jetty with 2 deep water berths and 4 coastal tanker berths for the exportation of refined petroleum products and importation of crude oil.

Also see "Section C".

The Abu Dhabi Gas Industries Ltd. (GASCO) Terminal consisting of a trestle jetty and one berth lies about half a mile East of the Refinery Jetty and can accept LPG carriers in the range 30,000 cu.m. to 125,000 cu.m. There is a minimum depth alongside of 15.0 m.

Also see "Section D".

The Ruwais Fertiliser Industries (FERTIL) Jetty is designed for berthing combinations of vessels up to 2 fully laden 200 m. long, 25,000 d.w.t. bulk cargo vessels along its Eastern side. Provision is made at the Northern end of the jetty for the loading of liquid ammonia.

Also see "Section E".

Future development of the petrochemical industrial complex at Ruwais includes the construction of a bulk sulphur export jetty with 6 berthing face piles capable of handling cargo vessels up to 25,000 tons d.w.t. with a depth of 36 ft. alongside to be completed in 1984/85.

RUWAIS CARGO HANDLING SERVICE CONSTRUCTION JETTY:
General Information: ADPPOC, as the Port Operator, is providing a new cargo handling service for the prime purpose of serving the construction and commissioning of the ADNOC and GASCO Refineries and Petroleum Export Terminals.

This undertaking is provided on an independent basis as an additional port facility and may be utilised by any importer who wishes to route cargo through the port to destinations in the Western region of Abu Dhabi.

A harbour, known as the Construction Jetty, consisting of 4 small cargo ship berths and 1 Ro-Ro Berth, is situated to the East of the Ruwais Petroleum complex. Vessels and barges with a draft of less than 4.2 m. may enter and lie safely alongside to discharge cargo. Larger cargo ships with a draft in excess of 4.2 m. will anchor in the cargo ship anchorages located N.N.W. 2 miles (approximately) from the Construction Jetty and discharge onto barges.

There are full Customs and Clearance facilities available.

Extent of Service: Cargo will be worked in the cargo anchorages, weather permitting, during daylight hours only. The target minimum rate for discharge of general cargo will be 700 freight tons per day. In special circumstances these limitations may be modified to suit the dispatch and turn-round of the discharging freighter.

Weight Limitations: Normal discharge to barges will be to the maximum of ship's own lifting equipment. The heavy lift barge (reinforced deck) can receive a single weight to a maximum of 700 tons. The shore cranes can plumb to a distance of 3.2 m. from the quayside to lift 80 tons.

To discharge heavy lifts by a floating crane, the maximum possible notice is required. Similar notice is required for heavy lift cranage for parcels in excess of 80 tons over quayside and heavy lifts in excess of 55 tons which require special trailer transport.

Procedure:

1. Consignee or his Agent must sign a Cargo Handling Indemnity form before discharge and vessel's Master must sign Port's Conditions of Use receipt before entering port and berthing.

2. All Customs cargo documentation and clearance of vessels is the responsibility of the Shipping Agent/Consignee. Tally receipts will be supplied by the ADPPOC Cargo Representative on site.

3. The ship will normally be charged for port dues only as per 1981 Regulations and Tariff, except that, for working overstowed cargo, a charge per gang hour will be levied to the ship.

4. The consignee will normally pay the full handling charge per freight ton. The charge covers ship stevedoring, barge and towage, and either barge discharge to landed on quay, direct to trailer, or delivered to Custom's Pound.

5. Agents and/or consignees should advise their requirements, vessel ETAs and supply cargo manifests and stowage plans to: The Harbour Master, Jebel Dhanna-Ruwais Port, ADPPOC, Ruwais, P.O.Box 61, Abu Dhabi. Tel: Ruwais 75718 daytime or Port Control Ruwais 75700 ext. 2262 (24 hours). Telex: 52207 Apocru EM.

To ensure complete co-ordination and service and/or in event of communications breakdown at the port, vessels ETAs and general cargo information and requirements should also be sent to: ADPPOC, "ARCH" Division, P.O.Box 61, Abu Dhabi. Tel: 336700 Abu Dhabi. Telex: 22209 Adppoc EM.

PORT EQUIPMENT/CRAFT: The following craft and equipment are available in the port and subject to utilisation may be chartered or hired on application to the Harbour Master who will advise the current rates.

Vessels:

2×3,200 h.p. twin screw shiphandling tugs with a bollard pull of 40 tons.

Equipped for fire fighting and oil dispersant spraying, fitted with 2 centrifugal pumps producing 680 cu.m. water/foam per hour to a height of 120 m. through a horizontal distance of 85 m.

Each tug carries 45 metric tons of foam and 11 metric tons oil concentrate dispersant.

2×15 m. twin screw mooring launches, 480 h.p. with 2 live-on-board crew.

4×15 m. single screw mooring launches, 360 h.p. each, no accommodation.

1×12 m. twin screw 18 knot pilot launch.

1×16 m. twin screw pilot-cum-ambulance vessel 20 knots with 3 live-on-board accommodation.

1×32 m. self-propelled maintenance barge with 30 ton hydraulic 'Pettibone' crane.

1×19 m. single screw diving tender vessel.

1×12 m. single screw general purpose workboat.

2×46 m.×15 m. flat top barges.

1 barge with reinforced deck for heavy lifts and tank divided for oil pollution slops, 1,200 tons.

Shore Equipment:

1×150 ton Manitowoc mobile crane with 30 m. boom.

1×80 ton Grove Rough Terrain mobile crane with hydraulic extending booms, maximum normal extension 35 m.

1×10 ton fork lift.

2×5 ton fork lifts.

2×3 ton fork lifts for crane hold work.

Miscellaneous:

Fully equipped marine workshops for repairs, overhauls to tugs, launches, vehicles, mooring buoys, etc.

One double lock 2 man decompression diving chamber in air conditioned module.

HEALTH: *Quarantine and Medical Clearance:* The standard International Declaration of Health is required upon arrival. Free Pratique is obtained by radio.

There are no facilities for derat at Ruwais.

If Free Pratique has not been granted prior to the vessel's arrival, the Master may contact Port Control for advice/instruction as per Port Health instructions.

Every vessel within the port shall display the appropriate quarantine signals as prescribed in the International Code of Signals.

MEDICAL: If any person suffers a serious injury or sickness within th port limits and immediate medical attention becomes necessary th Master of the vessel concerned or the person in charge of the locatio shall notify the emergency to the Port Control on VHF Channel 16.

N.B. The Port "Casevac" system for such emergencies will be put int immediate effect by the Port Control.

Masters of all vessels are hereby advised that a brief but concis description of the injury or sickness must be stated at the time o reporting. In the event a crew member has to be landed fo hospitalisation the following items should accompany the casualty:

(a) Passport and/or Seaman's Discharge Book
(b) Vaccination Certificates
(c) Address of next of kin
(d) Brief report (if necessary pinned to an unconscious perso comprising:
  1. Time and cause of accident/sickness
  2. Time and description of medication administered, if any
  3. Further details of First Aid given, and/or symptoms noticed
(e) Masters of vessels which are not berthed alongside the Ruwai jetties should prepare invalid cases for landing in a fast launch o picking up by helicopter e.g. Niel Robertson stretcher; and affor a weather lee (if possible) in adverse weather conditions.

Medical/Police Assistance: The Master of any vessel within the Port fo which Medical or Police assistance is required shall make request fo such assistance through the Agent.

FRESH WATER: Fresh water is obtainable at the refinery berths an should be arranged through the ship's Agent.

FUEL: Bunkers are obtained at the refinery berths and should b arranged through the ship's Agent.

The following bunker fuels are available:

A. Marine Diesel Oil

Test and Spec. Limits	*Method*	*AST*
1. Viscosity Kin. at 33°C, CS, Max.	1.4	D445
2. Carbon Residue Conradson Wt. Pct. Max.	1.5	D189
3. Flash Point °C, Min.	66	D93
4. Water Cont. Pct. Vol. Max.	0.25	D95
5. Sediment Pct. Wt. Max.	0.02	D473
6. Ash Pct. Wt. Max.	0.02	D482
7. Sulphur Pct. Wt. Max.	1.80	D129
8. Pour Point °C Max.	12	D97

B. Marine Fuel Oil

1. Kin. Viscosity at 50°C. Max.	180	D445
2. Flash Point, °C. Min.	60	D93
3. Water Cont. Vol. Pct. Max.	1.0	D95
4. Sediment Pct. Wt. Max.	0.25	D478
5. Ash Pct. Wt. Max.	0.20	D482
6. Sulphur Point °C. Max.	4.0	D129
7. Pour Point °C. Max.	24	D97
8. Sp. Gravity at 60/60° F. Max.	0.990	D129

CUSTOMS: Customs Officials will board upon arrival and seal the bond

Alcoholic Liquor: No alcoholic liquor of any description may be carrie to or from any vessel or oil terminal within the port. This rule shall no apply in the case of a vessel taking in or landing such liquors as cargo o ship's stores under the supervision of Customs Officials.

Masters are reminded and warned that public consumption o alcoholic drinks is strictly prohibited in the U.A.E. and its territoria waters. Crew members must not be allowed to offer alcohol to an Moslem for any reason whatsoever.

The penalties imposed by the civil authorities for non-compliance o the above are heavy and include possible imprisonment.

CLIMATE: The cool winter season extends over November to Februar with mean daily maximum temperatures of 25° C. to 30° C. and nigh temperatures of 10° C. to 15° C. The lowest recorded temperature bein 4° C. Ground frost can occur inland.

The hot summer season extends over May to September wit maximum day temperatures between 40° C. to 45° C.: the highes recorded being 48° night temperatures are about 20° C. to 25° C.

Relative humidity is high throughout the year averaging betwee 50 and 60 per cent by day and 75 to 80 per cent by night. Heavy de may be experienced throughout the year.

Rainfall is usually associated with thunderstorms which are prevalen from November to May giving a total annual rainfall of 10 mm. to 50 mm Rain is rare during the remaining months while in some years there i none at all.

Throughout the year the prevailing winds are from the West to Nort North-East sector. They are strongest during November to April whe they occasionally reach gale force. Gusts of up to 50 knots have bee recorded (April) and a 24-hours mean wind speed of 32 knots from th North-West is on record (January) the Shamal or strong North-Wes wind may blow for periods up to three days and raise a rough sea wit waves up to 4.5 m. off Gasha buoy and up to 2 m. at the berths in Jebe Dhanna. 'Land and Sea' breezes are experienced throughout the year.

Visibility is 10 nautical miles for 70% of the time and less tha 2 nautical miles up to 5% of occasions due to dust haze or radiation fog Fog can occur during any month of the year but is most frequent i Winter: normally it develops during the night and early morning and clears by 1000 hrs. Usually the fog banks drift to seaward towards S Bani Yas Island.

Sea temperatures at 3 m. depth range from 20° C. (Winter) to 32° C (Summer). During the Summer the 15 m. depth temperature is only a degree or so lower than that at the surface.

GENERAL:
Stores: Emergency stores may be obtained by giving 48 hours' notice t the Ship's Agent. These stores are not permitted to be loaded at an oil o gas berth and must be taken on board in the anchorage.

Agency: Agency work is carried out by registered Shipping Agents wh are appointed by the vessel's owners, Charterers or Master.

In no instance will ADPPOC or any of the Oil Companies undertak the agency of a ship.

M.E.N.A.S. Light Dues: Masters are advised that the "M.E.N.A.S." Light Dues for the Arabian Gulf navigation aids, when applicable, are collected by the vessel's Agents for payment direct to "M.E.N.A.S.", Bahrain.

Flag: Every vessel within the port shall fly her own national flag and the flag of the United Arab Emirates from sunrise to sunset.

Inward Clearance: No person other than the Pilot, Police, Customs, Immigration and Port Health Officers shall be allowed on board any vessel before Inward Clearance has been granted by such officials.

Port Clearance: The Owner, Master or Agent of every vessel wishing to leave the Port shall obtain a Port Clearance.

Port Clearance may be withheld from any ship by the Port Authority for non-payment of dues or for any legal cause or restraint which has been duly ordered by the Court in Abu Dhabi.

Exempted Ship: To mean ships exempted from pilotage whose Master has been granted a Pilotage Exemption Certificate by the Harbour Master.

Excepted Ship: To mean vessels excepted from paying Port Dues. Excepted ships shall include the following vessels:–

(a) Vessels of the U.A.E. Defence Forces.

(b) Vessels belonging to U.A.E. Customs, Medical and Police Services.

(c) Dredgers, Survey Vessels and special ancillary non-cargo craft, on contract to the Port Authority, ADNOC.

(d) Light tenders belonging to or on contract to M.E.N.A.S.

(e) Vessels and Ships excepted from such charges by order of H.E. the Ruler.

Port Control: The offices, (currently situated at Jebel Dhanna in position Lat. 24° 11′ N., Long. 52° 37.5′ E.) are responsible for all Vessel Traffic movements within the Port Limits and the implementation of the Harbour Master's instructions pertaining to the management of the Port.

N.B. – Vessels should communicate with the Harbour Master or Port Control via VHF radio. Initial contact should be made on Channel 16 call sign "JEBEL DHANNA-RUWAIS PORT CONTROL".

Heavy Lift: Any piece of cargo inclusive of transportation cradle whose deadweight is in excess of 35 long tons (35.56 tonnes).

Country Craft: Mechanically propelled vessels less than 100 n.r.t. engaged in the coastal trade which may also rely upon sails for motive power.

Rat Guards: Rat guards must be fitted to all mooring ropes and wires immediately a vessel is secured alongside a berth on a jetty or wharf.

Mooring Launches: All ships berthing or unberthing at a main sea berth, oil jetty or cargo wharf will be provided with a suitable Port Authority mooring launch (if required) to assist with the running of moorings and the lifting of submarine loading pipe-lines in the case of ADCO's sea berths.

Main Engine Readiness: Every vessel berthed at an Oil Terminal or cargo wharf shall maintain her engines in a state of constant readiness to move at all times. No repairs which may immobilise the vessel shall be permitted to be carried out while vessels are in the berths.

A Master of any Ship securely anchored in an assigned anchorage area, may request permission from the Port Control to carry out routine engine repairs or overhaul. The granting of such permission will be subject to the respective Terminal approval that the berthing time factor is sufficient.

Sufficient Crew Onboard: Every vessel within the Port shall retain on board at all times a sufficient number of crew as may be necessary to perform any duties concerned with the safety and movement of the vessel.

Fire Wires: All Ships berthed at the GASCO and Refinery Terminals shall provide 2 Tug Fire Wires, 1 forward and 1 aft, throughout the period of occupying such berth. The wires shall be robust, with one end fitted with a spliced eye, which shall be maintained at a height of 2 ft. above the sea surface on the outboard side of the ship, (i.e. opposite side from jetty). The inboard end of the wire shall be made fast securely on deck.

Craft Alongside: No Craft shall attempt to make fast to or go alongside a ship manoeuvring in the port before such ship has anchored unless specially permitted by the Master and if there is a Pilot on board, the Pilot.

Dirty Ballast: Whenever a ship enters port with ballast which it is necessary to discharge before or during loading, such ballast, in the case of Water Ballast, shall be clean and not liable to cause pollution of the sea and a certificate to that effect shall be handed to the Port Authority's representative before deballasting commences.

Pollution: Ashes, oils, chemicals, bilge water and other refuse shall not be discharged to the sea or thrown overboard within Port Limits.

The discharge to the sea of any substance whether liquid or solid, other than clean Water Ballast shall be deemed to cause pollution to the harbour.

The Master of any vessel, the Person in charge of a Terminal or construction operation contravening this rule so as to cause pollution shall be charged with an offence against these Rules and upon conviction be liable to a fine and shall also pay any expenses which may be incurred in the removal of such pollution.

Diving/Swimming: No person shall swim or dive from or near any vessel, jetty, quay or pier for the purposes of trading, recreation or sport.

Diving: No person shall engage in diving with the assistance of breathing apparatus within the Restricted Areas mentioned in Section 4 of these Rules without the written permission or instruction from the Port Authority.

Commercial Diving: Notwithstanding anything contained above, any person or company wishing to operate a Diver for commercial reasons within the Port, shall inform the Harbour Master giving full information of the Diving Operations, and shall conform with such precautions as he may direct in Permission to Dive.

Use of Ship's Radio: The use of the ship's radio within Port Limits is prohibited for the transmission of private messages.

When a ship is secured to an oil or gas loading berth the use of the ship's main radio equipment is totally prohibited. Intrinsically safe VHF radio equipment may be used for necessary port communications.

Ship's Dangerous Stores: Ship's stores of an inflammable or explosive nature, including pyrotechnic distress signals carried in accordance with the Convention for the Safety of Life at Sea shall be kept in a safe place securely closed and sealed while the vessel is moored in a berth. This Rule shall also apply to the vessel's paint locker.

Explosives: No person may bring explosives or dangerous goods into the Port without the written permission of the Port Authority. Vessels importing "explosives" or dangerous goods of an inflammable or corrosive nature will normally be assigned the "Explosives" anchorage on arrival. A Port Authority Representative will inspect the cargo and consult with the Master and Agent before discharge.

The unauthorised handling and detonating of any explosive or pyrotechnic device within the Port Limits is strictly prohibited. Where explosives are required for construction purposes the Contractor concerned must apply to the Harbour Master for written permission. Blasting for commercial purposes shall be under the strict control of the Port Authority.

Pollution Emergency: In the event that pollution of the Port waters occurs, regardless of cause the Person in charge or responsible for the operation, works or location where the pollution was initiated should immediately report the incident to the Port Control.

Where the pollution is serious, particularly oily pollution, the incident must be treated as a full emergency situation, and the call for assistance to the Port Control should be prefixed by the words "MAYDAY, MAYDAY" in order to gain immediate attention.

The Master of the vessel concerned or the Person in charge, shall also take such steps as may stop further pollution and contain or clean up any spillage of oil, etc., on the vessel's deck or jetty surfaces to remove the fire hazard potential.

N.B. – All port Users and Operators are advised that failure to report a pollution incident is an offence against these Rules and Persons found contravening this requirement will be prosecuted in the Abu Dhabi Courts and liable to heavy fines.

Ship's Lifeboats: The lowering of ship's lifeboats within the Port, except in the course of a regulation Lifeboat Drill duly authorised by the Port Authority, is strictly prohibited and during such drill the lifeboats shall not land on any part of the shore.

The use of any boat carried on any vessel solely for the purpose of recreation, pleasure or fishing shall be allowed only at the discretion of the Port Authority subject to the current Security Regulations in force at any time.

Inert Gas System: As the Government of Abu Dhabi have now ratified the Solas Convention, with effect from 1st January, 1984, no tanker will be accepted for loading in this port unless an Inert Gas System has been fitted.

Cargo Discharge Certificates: Abu Dhabi National Oil Company require documentation for cargoes of Refined Products loaded at Ruwais as follows:

1. Discharge Certificate showing:
   (a) Port of discharge.
   (b) Discharge quantity in tonnes.
   (c) Date(s) of discharge.
   (d) Name and nationality of vessel.
   (e) Name of Master.
2. Copy of Bill of Lading.

Both documents must be signed by receiver and countersigned by Port Authorities and returned to:

A.D.N.O.C. Marketing Rpd Sl,
Post Box 898,
Abu Dhabi,
U.A.E.

In the event that cargoes of Refined Products are loaded at Umm al Nar the same procedure should be followed.

(B) JEBEL DHANNA – SEA BERTHS TERMINAL:

24.11 N., 52.38 E.

OPERATOR: Abu Dhabi Company for Onshore Oil Operations (ADCO).

APPROACHES: *(Inward Passage).*

Outer Route between Jazirat az Zarqa and Ghasha Tower Beacon marked by 2 light floats and 4 buoys. The 2 light floats are both port hand marks, and the buoys starboard hand, as indicated by shape, colour and light characteristics.

Inner Channel, from Ghasha Tower to berths at Jebel Dhanna marked by 21 light buoys. Least depth in this channel is 46 ft. and min. width of 800 ft. between Nos. 7 and 10 buoys.

(Outward Passage)

After clearing berth an outward bound vessel should steer to pass midway between Nos. 13 and 20 buoys, leaving Alaq Island to starboard. From Nos. 13 and 20 buoys the same track is followed as for inward passage.

Navigation in shallow waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Masters of ships should be guided by the following:

Due consideration should be given to the effect of squat at speed on vessel's draft in shallow water, bearing in mind vessel's trim.

If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.

Ensure accuracy of vessel's draft reading, including the midship draft, having in mind the tendency of vessels to sag and the adverse effect of a small list.

Reduce to minimum safe speed to pass over and near shoal areas.

Reduce to a minimum safe speed when negotiating turns in order to reduce heel under helm.

Note that list can mean an appreciable increase in draft.

When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid channel.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Manifests.
1 International Maritime Declaration of Health.

READINESS TO LOAD: If an accepted Tankship arrives at the Port of Jebel Dhanna and tenders Notice of Readiness to Load.

(i) Within its Set Range then running hours shall commence, berth or no berth, either six hours after such Notice of Readiness or at the time of connection of cargo loading hoses, whichever is the earlier.

(ii) Prior to the commencement of its Set Range then running hours shall commence at 1400 hrs. on the first day of its Set Range, berth or no berth, notwithstanding the fact that loading may have commenced for any reason prior to 1400 hrs. on the first day of its Set Range; or

(iii) After expiry of the Set Range, then running hours shall commence at the time of connection of cargo hoses.

Running hours shall finish at the time of disconnection of cargo loading hoses.

The Company will make every effort to load the tanker on arrival provided a berth is available and weather permitting.

ANCHORAGES: If berth not available, or if ships cannot sail immediately after loading, they can anchor in an area South of Buoys Nos. 13 and 20 and North of Berths. This area marked by No. 15 buoy to West, No. 22 buoy to East and by berths to South. Alaq Island lies in the middle of this area and is marked by 2 buoys No. 17 and N. Alaq and by S. Alaq Beacon.

MAX. SIZE: (Also see "Berthing"). Vessels up to 330,000 d.w.t. and max. LOA 1,215 ft. can berth at Jebel Dhanna.

Also see Section "A" – "Restrictions".

EQUIPMENT: Port and Starboard anchors to be fitted with anchor buoys and sufficient line to facilitate recovery of anchor in the event of loss.

4 good mooring lines of not less that 120 fathoms each and of a suitable size for the vessel. 2 additional 120 fathoms lines securely tailed to the first lines for occasions where 120 fathoms may not reach the stern buoys initially.

For vessels of 50,000 d.w.t. and larger, power mooring winches with 200 fathoms wire mooring rope are recommended.

Suitable new rope stoppers to be available forward and aft.

2 good stoppers for use on 40 mm. diameter wires. Preferably patent carpenter's stoppers.

2 good boat ropes 4.5 in. circumference of at least 200 ft. long.

A clean, safe pilot ladder of adequate length battened so as to prevent turning. A suitable line to be ready for hauling gear on board, such as hose clamps, reducers and elbows. A lifebuoy should be placed handy to this ladder.

Tankers of 40,000 d.w.t. and over should have rigged, when in ballast, an accommodation ladder lowered to about 12 ft. above water. This can be adjusted to suit the conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. of the water. This will enable the Pilot and others when the vessel is moored to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder.

Deck machinery must be available at all times.

Whistle or siren must be available at all times.

Adequate deck lighting should be provided for night-time operations, with special emphasis on the following areas:

1. Overside at boarding position for Pilot.
2. Overside abreast of manifold, for hose lifting.
3. Working area around manifold.
4. Poop working area, for handling mooring ropes and wires.

Note: "Aldis" type signalling lamp to be available when mooring.

BERTHING: Berthing is by mooring to 2 anchors and stern buoys. Arrangements in advance by contacting Jebel Dhanna Pilots on Channel 16.

Berths are approached on W.S.W. course passing S.E. of Alaq Island. Leading lights have been established which will lead ships on the line of the 2 anchors when in berth. A small marker buoy has been established to assist the Mooring Master in placing starboard anchor in correct position. Vessels berth heading N.W. Holding ground good. Bottom consists of clayey silt.

Sea Line Loading Berths. 4 sea-line berths Nos. 1, 2, 3 and 4. Nos. 1 and 2 supplied by single 36-in. lines, and Nos. 3 and 4 supplied by 42-in. lines, each terminating in a header which passes under vessel in berth.

Berth	*Draft Acceptable* (ft.)	*Approx. d.w.t.* acceptable*	*Max. loading rate* (t.p.h.)	*Strings of flexible hoses*	*Length of sea line* (ft.)
No. 1	45	83,000	6,000	2×12 in., 2×16 in.	16,269
No. 2	46	85,000	6,000	2×12 in., 2×16 in.	16,427
No. 3	49	90,000	8,500	4×16 in.	19,000
No. 4	49	90,000	9,500	2×16 in.	17,200

*Deadweights shown for vessels loading full cargoes. Part Cargoes may be greater. Nos. 2, 3 and 4 Berths can accommodate VLCCs but No. 2 berth is restricted to vessels having a max. LOA of 1,100 ft.

Least depth of water available in berth, and swinging circle, after deducting 6 ft. for height above sea bed of sea line cradle is as follows: No. 1 Berth, 51 ft.; No. 2 Berth, 52 ft.; Nos. 3 & 4 Berths, 55 ft.

Swinging circle defined as one and a half ship's lengths from dropping position of ship's inshore anchor.

The approximate draft limits quoted above are based on an underkeel clearance in the berths of 6 ft. Rising tides permit deeper loading in berths.

Seawards ends of pipe-lines, terminate in 12 in. or 16 in. flexible hoses, there being 4 such strings of hoses at each berth. 2 taken up on one side of vessel.

Additional information obtainable from Jebel Dhanna Pilots on Channel 16 prior to vessel's arrival.

EARLY DEPARTURE PROCEDURE: Early Departure Procedure i available.

LOADING: *Flash Point:* The flash point of Murban Crude is below 3

Crude Oil Temperatures: While every effort will be made to keep loading temperatures of export crude below 150° F., there may be t when this temperature is exceeded.

Whenever possible Masters will be advised when this tempera increase is likely to occur, but in Jebel Dhanna the temperature as varies according to loading rate, production rate, changes in produ pattern from the field, tank levels, etc., and the temperature differ between shore and ship varies according to loading rate, quanti cargo taken, berth occupied and when last used, etc., thus the s temperature obtained on a previous voyage may be substan different to that obtained on the current voyage and the prev vessel's temperature can be taken as an approximate guide only.

ADCO will not accept any responsibility for the failure by the Mast any tanker loading at Jebel Dhanna to take appropriate action to rec hot oil, prevent any damage to his vessel and/or injury to his crew

H_2S Content: Murban crude contains concentrations of (Sulphuretted Hydrogen). Hydrogen sulphide has a disagreeable o characteristic of rotten eggs which quickly deadens the sense of s so that a dangerous concentration may be present which canno detected by odour. It is, therefore, important that when the presen the gas is detected the area or compartment concerned should be with all possible despatch until adequate ventilation can be carried The combustible gas indicator may not detect this type of gas. foregoing must be dealt with in the light of experience where l quantities of crudes of this type have been carried without accident we do not wish to exaggerate the dangers. However, the under-n precautions have been evolved as necessary to provide again possible accident and should be strictly observed.

During loading gas should only be allowed to escape via the ag venting arrangements.

When ullaging or sampling, personnel should stand facing at angles to the wind direction and so avoid inhaling gas. If H_2 inadvertently inhaled the man should leave the area and not return his sense of smell has been restored which means that at least people should attend the operation.

No one should enter any pump room or any compartment where could collect unless another person is standing by.

Life lines, breathing apparatus and resuscitator should be re available.

As a precautionary measure, the gas ejector for pump room shoul put into operation at any time entry is made into this space whilst possibility of H_2S gas entering pump room from cargo or empty ta exist.

Loading Operations: The advice from the vessel which states sh ready to receive cargo is considered as final, and as indicating every operation necessary aboard the vessel has been completed soon as possible after such a signal has been received, and wit further advice, loading will commence. Damage to hoses can occ ship's valves are not open at the start of loading. The Mooring Ma will not transmit any loading instructions to the shore until the office charge of the deck has satisfied him that the hoses are conne correctly and that all valves have been set for receiving cargo.

While in berth, ships should be ready to move under their own po in the event of their breaking adrift, catching fire, fire in adjacent be or other emergency. No repairs are to be carried out while in berth w would immobilise the ship or impair her fire-fighting efficiency.

The Mooring Master will instruct the Master of the Ship as to signals needed for local requirements.

The Mooring Master will bring a portable radio to the ship.

The radio may not be used for private conversation. Use of the sh radio while at the loading berth is strictly prohibited.

When loading, the cargo being received shall be frequently measu thereby preventing loss of oil through a leaking hose. This particul applies at night, as seepage of oil is practically invisible on the w during darkness.

Caution: The oil loading rates to ships are controlled on shore and extremely dangerous situation can arise if a ship's valves are clo against the flow of oil.

Particular care must be exercised by ship's personnel to ensure the Terminal is given timely advice should any reduction be require the loading rate and adequate "Stand-by" notice must be given be the Final "Stop". At all times the Terminal must be advised when increase in the loading pressure can be expected due to switch tanks, topping up, etc. To prevent excessive pressure from surge ship/shore connections, ship's valves should be closed slowly.

The Terminal facilities at Jebel Dhanna have been designed so tankers can be loaded by turbine driven loading pumps at max. rates to 6,000 t.p.h. in berths 1 and 2, 8,500 t.p.h. in berth 3, and 9,500 t.p. berth 4. Availability of max. loading rates is dependent on the numbe berths occupied and operational circumstances.

If vessel is unable to accept the max. loading rate available, t ADCO will be grateful if you will give a brief explanation of the reason the limitation and we suggest some of the reasons which may gov your restrictions:

(a) Inadequate venting system.
(b) Condition of ship's lines and valves.
(c) Inexperience of crew.

and there may be other reasons.

We are anxious to obtain this information in order to assist formulating plans for future development.

The quantity of cargo received on board is the responsibility of ship and no overage may be sent back ashore.

When loading is completed, hoses will be disconnected and lowe to the sea bed, under the supervision of the Mooring Master.

Ships will then proceed to an anchorage allocated by the F Authority or direct to sea.

HOSES: Derricks or cranes must be capable of lifting a string of hoses from the sea-bed to a height of 30 ft. above the deck. For lifting 16 in. diameter hoses, the lifting gear should have a SWL of not less than 10 tons and for 12 in. diameter hoses a SWL of not less than 5 tons.

Gear should be rigged on both sides of the vessel in order to lift hoses on either side or both sides simultaneously as required.

It may be convenient to handle blank flanges, reducers, etc., with the derrick or crane. Reducers or adaptors should be bolted to the ship's flanges, so as to take 12 in. or 16 in. hose as may be necessary.

Note: Where a vessel has 2 or more loading connections, those used should not be less than 7 ft. apart.

Hose Hang off bitts are required at about 10 ft. from the ship's rail at the loading manifold to secure the submarine hoses on both sides.

BALLAST: No facilities for disposal of slops or dirty ballast.

When a vessel enters port waters in ballast, the ballast water for overside discharge must be clean and a declaration signed by the Master and delivered to the representative of the Terminal to this effect. Ashes, oil, oily water or other refuse must not be discharged overboard in port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in port waters.

It is essential that vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with the Mooring Master's requests as to ballast quantity and disposition.

Jebel Dhanna is an open roadstead and subject to sudden changes in weather. On occasions it is of great advantage to commence loading whilst discharging ballast or prior to completely deballasting to avoid having the vessel in a flying light condition.

There must be no cleaning of boiler tubes whilst ship is in port.

DENSITY: 1031.

FRESH WATER: Not available.

FIRE PRECAUTIONS: As laid down in the Abu Dhabi (Petroleum Ports) Law No. 12 for 1973 and ISGOTT Safety Guide.

GANGWAY/DECK WATCHMEN: Not necessary.

CUSTOMS ALLOWANCES: Tobacco: No restrictions in quantity on board but must not be conveyed ashore or from one vessel to another without appropriate written permit from Customs Authorities and Port Officer. Wine and/or Spirit: Conveyance of alcoholic liquor from any vessel to the shore or from the shore to any vessel, or from one vessel to another, prohibited without appropriate written permits from Port Officer.

Shipmaster's Report: 1978

All alcoholic liquor must be under bond and sealed.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS/DRY DOCKS: No facilities.

REPATRIATION: With sufficient notice Agents will assist in any repatriation. Landing permit is required for all sign on/sign off personnel for which Agent requires full name/nationality/seaman book/passport number and also 4 to 5 working days to process same. However, facilities are limited and if possible crew changes should be made at other ports.

Shipmaster's Report: 1978

Immigration Authorities require at least 4 days' notice and preferably 7 days' notice via Agent.

AIRPORT: One mile distant, air strip owned by ADCO for private use. Nearest International Airport is Abu Dhabi the capital of the State.

TIME: Local time GMT plus 4 hours. No alterations made to clocks during year.

MEDICAL: A hospital run by the Abu Dhabi National Oil Company (ADNOC) is situated adjacent to the Ruwais Industrial Complex. Ambulance facilities are available.

POLICE/AMBULANCE/FIRE: The Abu Dhabi Defence Force, Oilfield Security Section maintains a police post at Jebel Dhanna and Ruwais and is responsible to act in case of accident or other emergency, whether ashore or in territorial waters.

TELEPHONES: Jebel Dhanna is connected to the international telephone system.

SERVICES: None.

SHORE LEAVE: Crews not allowed ashore.

SHIPMASTER'S REPORT: December 1979.

Anchorage: Ghasha Anchorage apparently has good holding ground, bottom is sand with a little clay.

VHF: Call on Channel 16 or 9 (continuous watch). All operations carried out on Channel 9.

Medical: Any injury requiring treatment ashore necessitates having the following documents ready before the injured seaman can be transported to Abu Dhabi hospital.

1. Extract of Ship's log.
2. Master's report of the incident.
3. Two eye witness reports (if possible).
4. Pilot's report.
5. Letter from Master accepting responsibility for the injured man.

He must also take his Seaman's Book/Passport with him and all the above documents must be signed and ship's stamped by Master.

Gangway: Accommodation ladder usually port side but best to wait until vessel is nearly moored in order to determine best lee side.

Customs Allowances: Customs can be very strict. All alcohol must be locked up before arrival and they will then give an issue.

(C) RUWAIS – REFINERY TERMINAL:

OPERATOR: Abu Dhabi National Oil Co., (ADNOC).

GENERAL: The ADNOC Ruwais Refinery Terminal is situated about 2.5 miles SE of the Jebel Dhanna Sea Berths and consists of a trestle jetty 3 km. in length with two deep water berths and four coastal tanker berths. Vessels will berth port or starboard side at the discretion of the Pilot having regard for the tide and weather conditions.

BERTHING:

Berth "B"

"B" Berth is designed to accommodate tankers in the range 7,000 to 30,000 d.w.t. Length of ship 118.5 m. to 200 m. The minimum depth alongside the berth is 12.7 m.

The berth consists of the Loading Platform, four mooring dolphins and four breasting dolphins connected by walkways.

On the Loading Platform a bank of six cargo chicksan arms serve to load or discharge ships, namely:

2×12 in. dia.	Each arm is provided for Fuel Oil loading and ballast unloading.
2×12 in. dia.	Each arm is provided for Gasoline (Premium and Regular), Kerosene, Jet Fuel and Diesel Oil.
1×10 in. dia.	For Bunker 'C' and Marine Diesel Oil loading.
1×12 in. dia.	For Naphtha loading.

One 3 in. hose for drinking water is provided.

Products available for loading are Naphtha, Fuel Oil, Gasoline, Kerosene/Jet Fuel, Diesel Oil, Marine Diesel and Bunker 'C'.

Flow rates are as follows:

Naphtha	1,400 cu.m./h.
Reg. Gasoline	1,400 cu.m./h.
Prem. Gasoline	1,400 cu.m./h.
Kerosene	2,500 cu.m./h.
Diesel Oil	3,000 cu.m./h.
Fuel Oil	3,200 cu.m./h.
Crude Oil	6,000 cu.m./h.
Bunker 'C'	1,000 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Drinking Water	100/300 cu.m./h.
Ballast	1,500 cu.m./h.

The loading arms are provided with:

(i) Hydraulic quick coupling.
(ii) Automatic drain system (emergency condition).
(iii) Electro hydraulic operation.
(iv) Range control system.
(v) Remote Control.
(vi) Connecting flange mating device.
(vii) Vacuum Breaker.

Berth "C"

"C" Berth is designed to accommodate vessels with range 20,000 to 100,000 d.w.t. Length of ship 180 m. to 285 m. The minimum depth alongside the berth is 16.8 m.

The berth consists of the Loading Platform, six mooring dolphins and four breasting dolphins connected by walkways.

On the Loading Platform a bank of seven cargo chicksan arms serve to load or discharge the ship, namely:

3×12 in. dia.	Each arm is provided for Crude Oil, ballast unloading and Fuel Oil loading.
2×12 in. dia.	Each is provided for Gasoline, Kerosene, Diesel Oil loading.
1×10 in. dia.	For Bunker 'C' and Marine Diesel Oil loading.
1×12 in. dia.	For Naphtha loading.

One 3 in. hose for drinking water is provided.

Products available for loading are Naphtha, Gasoline, Kerosene/Jet Fuel, Diesel Oil, Fuel Oil, Marine Diesel and Bunker 'C'.

Flow rates are as follows:

Naphtha	1,400 cu.m./h.
Reg. Gasoline	1,400 cu.m./h.
Prem. Gasoline	1,400 cu.m./h.
Kerosene	2,500 cu.m./h.
Diesel Oil	3,000 cu.m./h.
Fuel Oil	3,200 cu.m./h.
Crude Oil	6,000 cu.m./h.
Bunker 'C'	1,000 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Drinking Water	100/300 cu.m./h.
Ballast	1,500 cu.m./h.

The loading arms are provided with:

(i) Hydraulic quick coupling.
(ii) Automatic drain system (emergency condition).
(iii) Electro hydraulic operation.
(iv) Range control system.
(v) Remote control.
(vi) Connecting flange mating device.
(vii) Vacuum Breaker.

Coastal Berth 1

Coastal Berth 1 is the Inner Berth on the North side of the Cabotage Jetty. The Berth consists of the loading platform, four mooring dolphins and four breasting dolphins. Length of ship 70 m. to 118.5 m. The loading platform has a bank of five chicksan loading arms with 8 in. diameter connections. The minimum depth alongside the berth is 9.1 m. Vessel size 2,000 to 7,000 d.w.t.

Products available are: Fuel Oil, Diesel, Kerosene/Jet Fuel, Gasoline, Bunker 'C' and Marine Diesel Oil. Ballast will be pumped ashore.

Flow rates are as follows:

Reg. Gasoline	1,000 cu.m./h.
Prem. Gasoline	1,000 cu.m./h.
Kerosene	900 cu.m./h.
Diesel Oil	900 cu.m./h.
Fuel Oil	800 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Bunker 'C'	900 cu.m./h.
Ballast	400 cu.m./h.
Drinking Water	100/300 cu.m./h.

One 3 in. flanged connection for fresh water.

The loading arms are provided with:

(i) Electro hydraulic operation.
(ii) Manual quick coupling and hydraulic emergency release.
(iii) Range control system.
(iv) Vacuum breaker.
(v) Remote control system.
(vi) Connecting flange mating device.

Coastal Berth 2

Coastal Berth 2 is the Inner Berth on the South side of the Cabotage Jetty and consists of the loading platform; four mooring dolphins and four breasting dolphins. Length of ship 70 m. to 118.5 m., size 2,000 to 7,000 d.w.t. The minimum depth alongside the berth is 8.7 m. The loading platform has a bank of two 8 in. diameter loading arms.

vis. 1×8 in. to discharge ballast.
1×8 in. to load Bunker 'C', Marine Diesel or Fuel Oil. TEL unloading facilities are available.

Flow rates are as follows:

Reg. Gasoline	1,000 cu.m./h.
Prem. Gasoline	1,000 cu.m./h.
Kerosene	900 cu.m./h.
Diesel Oil	900 cu.m./h.
Fuel Oil	800 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Bunker 'C'	900 cu.m./h.
Ballast	400 cu.m./h.
Drinking Water	100/300 cu.m./h.

One 3 in. flanged connection for fresh water.

The loading arms are provided with:

(i) Electro hydraulic operation.
(ii) Manual quick coupling and hydraulic emergency release.
(iii) Range control system.
(iv) Vacuum breaker.
(v) Remote control system.
(vi) Connecting flange mating device.

Coastal Berths 3 & 4

The Outer Berth North and South side of the Cabotage Jetty each consist of four breasting dolphins and three mooring dolphins with a fourth common mooring dolphin with berths 1 & 2. Length of ship 70 m. to 118.5 m., size 2,000 to 7,000 d.w.t.

The minimum depth alongside the berth is 9.4 m. (No. 3) and 9.2 m. (No. 4). The berths are equipped with four 8 in. loading arms and a 3 in. water connection.

Products available are: Diesel Oil, Kerosene/Jet Fuel, Gasoline, Marine Diesel Oil, Bunker 'C'.

Ballast water will be pumped ashore.

Flow rates are as follows:

Reg. Gasoline	1,000 cu.m./h.
Prem. Gasoline	1,000 cu.m./h.
Kerosene	900 cu.m./h.
Diesel Oil	900 cu.m./h.
Fuel Oil	800 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Bunker 'C'	900 cu.m./h.
Ballast	400 cu.m./h.
Drinking Water	100/300 cu.m./h.

The loading arms are provided with:

(i) Electro hydraulic operation.
(ii) Manual quick coupling and hydraulic emergency release.
(iii) Vacuum breaker.
(iv) Remote control system.
(v) Range control system.
(vi) Connecting flange mating device.

BERTHING AIDS:

Berths 'B' and 'C' are equipped with a radar operated safety berthing system indicating by means of coloured lights the forward and aft berthing velocity of the ship.

Two groups of coloured lights one forward and one aft indicate the safe/acceptable/dangerous lateral approach of the ship from a distance of 50 m. off the berth.

BALLASTING/DEBALLASTING: Ruwais Refinery has dirty ballast water treatment equipment and all dirty ballast shall be discharged ashore for treatment. (No dirty ballast may be discharged into the sea and pollution of the waters of the port is an offence against the Port Regulation and the laws of Abu Dhabi).

Accepting dirty ballast into the refinery storage is subject to approval by refinery, a sample of the dirty ballast may be required for analysis, a letter from Master requesting permission to discharge is to be made (letter is provided for Master's signature).

During loading/unloading all deck scuppers must be plugged. All precautions shall be taken to prevent oil or oily waters escaping into the sea during connection and disconnection of loading arms.

Normally the terminal Control Room will give a 10 minutes warning before deballasting may commence. Deballasting shall commence at slow speed to check systems and back pressure.

Simultaneous deballasting with loading of cargo is permitted only in the case of cargo of Bunker 'C'.

While encouraging quick turn around and the use of minimum balla upon arrival, sufficient ballast must be retained on board for the sa manoeuvring of the vessel at the Pilot's discretion.

LOADING AND UNLOADING:

(i) The Master should give the terminal a 'STAND BY' warnin 10 minutes before ready to commence loading or discharging.
(ii) Upon 'COMMENCE LOADING' from the Master only one pum will be used to ensure a slow flow rate until it is established that a systems are operating correctly and pressures are constant. Fu loading rate may then be ordered.
(iii) The vessel's cargo tanks shall be inspected prior to and durin loading and should it be found that the tanks are not tight a loading shall cease, the vessel be rejected and further loadin refused. The vessel will not be accepted later until satisfacto evidence of repair is produced duly certified by ABS, Lloyd's o other officially accredited classification society or surveyor.
(iv) During the hours of darkness vessels loading products o discharging crude oil or ballast shall rig overside lights t illuminate the surface of the sea around the ship to the Termina Operators satisfaction to ensure that any oily products on th surface may be detected quickly and early action taken a appropriate.

DERATISATION: There are no facilities for Deratisation at Ruwais.

RADIO: The Refinery Terminal maintains VHF watch on Channel 1 and 19 for ship/shore communications and once berthed, the vessel wi be connected to the terminal by land line telephone.

The Pilot will bring on board UHF Hand Set for manoeuvring purpose only.

Arrival Telegram Ship/Shore: After the Pilot boards the Ship/Shore Arrival Telegram will be passed by VHF Radio Channel 18/19 as follows

(1) Name of Vessel.
(2) Nationality and Port of Registry.
(3) a – Gross Registered Tonnage.
 b – Net Registered Tonnage.
 c – Summer Deadweight.
(4) Size of manifold.
(5) Are reducers to 12 in., 10 in. and 8 in. available on board?
(6) Are adequate nuts and bolts and gaskets available on board?
(7) Number of hours required to de-ballast and quantity.
(8) Vessel's maximum loading rate.
(9) Quantity and type of cargo.
 a –
 b –
 c –
(10) Last Port.
(11) Next Port.
(12) Master's Name.
(13) Date and time of arrival.
(14) Date and time of Pilot on Board.
(15) ETA at Berth.
(16) Arrival Draft.
(17) Estimated Departure Draft.
(18) Bunkers requirements (quantity and type).
(19) Drinking Water requirement quantity.
(20) Is the ballast lead free?

FUEL: Bunkers are obtainable at Refinery berths and should be arranged through the ship's Agent.

FRESH WATER: Fresh water is obtainable at Refinery berths and should be arranged through the ship's Agent.

STORES/PROVISIONS: Stores and provisions are not permitted to be loaded at Refinery berths and must be taken on board in the anchorage

(D) RUWAIS – NGL TERMINAL: 24° 09′ 49″ N., 52° 43′ 16″ E

OPERATOR: Abu Dhabi Gas Industries (GASCO).

GENERAL INFORMATION: The Terminal Regulations are issued for the information and guidance of Masters of vessels loading at the GASCO Jetty at Ruwais. After receipt of the first ETA advice from a gas carrier GASCO will cable the Master of the vessel instructions to carry out following tests and checks 24 hours prior to arrival:

1. Check condition (oxygen content) of atmosphere in void spaces around cargo tanks.
2. Check all reliquefaction units fully operational.
3. Check settings of cargo tank safety relief valves.
4. Test ESDS of cargo valves/pumps/boosters from all activating stations.
5. Check gas detecting unit with suitable spangas and have unit working continuously.
6. Test waterspray system deck area, flush all lines and check nozzles for proper operation and coverage.
7. Check ventilation of control room and compressor room and have ducts set for LPG.
8. Check over-pressurising and motor-trip system of motor room.
9. Check navigation equipment and steering gear fully operational.

The results of above tests should be cabled to GASCO not less than 18 hours prior to arrival.

On arrival at the terminal, the Terminal Representative will discuss with the Master the safety requirements. Attention is drawn to the International Safety Guide for Oil Tankers and Terminals (ISGOTT) and the Safety Inspection Guildelines and Terminal Safety Checklist for gas carriers as published by the International Chamber of Shipping and Oil Companies International Marine Forum (OCIMF). For efficient loading it is essential that the ship should be fitted with adequate equipment. Improvisations made after the ship has arrived alongside the jetty are not sound practice and result in delays and possible damage to the loading arms and other equipment.

Abu Dhabi Gas Industries Ltd. (GASCO) have equipped their terminal with loading machinery and mooring arrangements which will ensure tankers and gas carriers receiving their cargoes at a reasonable rate, thereby extending to the ship the benefit of a rapid turnaround.

Mooring, loading and unmooring are carried out by night as well as by day. Co-operation between the Ship's Officers and Terminal Representatives is essential to secure the full benefit of the facilities provided.

TUGS: Twin screw tugs (35 tons bollard pull) are used for both berthing and unberthing of vessels. The number of tugs to be used is to the discretion of the Pilot but will normally be two for berthing and one for unberthing. The tugs will use their own ropes and/or wires. The tugs are fitted with foam/water monitors, including one at approximately 19 m. above sea level, to assist in fire-fighting. Also fitted are spray booms to apply dispersants in case of oil spills.

BERTHING: *The Jetty:* The centreline of the GASCO-NGL Jetty Loading Platform is situated in 15 m. of water in position Lat. 24° 09′ 49″ N., Long. 52° 43′ 16″ E. with the berthing line in direction 305°/125°. Vessels are normally berthed heading 305°. A piping trestle and road, approximately 2,650 m. long, leads to the shore where the processing plant and storage tanks are located.

The jetty head comprises a loading platform (10 m. above chart datum), an utilities building, 4 breasting dolphins and 6 mooring dolphins. The dolphins are inter-connected by walkways. The distance between the 2 outermost dolphins is 340 m., between the 2 innermost breasting dolphins 42 m. and between the two outermost breasting dolphins 97 m.

On the loading platform there are 2×12 in. loading arms for loading Pentanes plus and discharge of dirty ballast/slops, 4×12 in. loading arms for loading/vapour return of Propane and Butane and 1×8 in. loading arm for bunkering. (For distance and disposition of loading arms see schematic layout). The LPG loading arms are fitted with an Emergency Release System (ERS). All loading arms except the bunker arms are fitted with an Emergency Shutdown System (ESD). Both ERS and ESD can be actuated automatically or manually. For detailed information about these systems you are referred to the separate letter on ESD/ERS handed over to you by the Terminal Representative. The Master is to ensure that the personnel responsible for cargo operations are fully familiar with these systems.

On the Western end of the loading platform is a gangway tower with a 1.5 ton crane forming a integral part of this tower. On the Eastern end of the platform there is a tower mounted firewater and foam monitor. This monitor can be controlled manually or remotely from the jetty head or from the foot of the jetty aided by a television monitor.

An additional manually controlled firewater monitor is situated on each of the 2 inner breasting dolphins. In addition to this, water spray deluge systems are covering the loading arms area, the gangway, the surge drum area and the utilities building. Gas detection equipment is strategically placed near the loading arms and will give alarm in case of inadvertent gas escape. The loading arms area and tanker manifold area are monitored by closed circuit television from the control room situated in the utilities building on the jetty and from the main control room.

On the Eastern side of the loading platform is a boat landing stage where the mooring boats can tie-up.

Draft: The minimum water depth alongside the jetty is 15 m. (49.2 ft.) below chart datum (C.D.). However, the Deep Water Channel imposes draft limitations on vessels departing from and entering the Port of Jebel Dhanna – Ruwais:

Also see Section "A" – "Restrictions".

Moorings: When at berth, vessels must be moored to the entire satisfaction of the Pilot. Vessels will normally berth port side alongside on a heading of 305°. The breasting dolphins are each equipped with 1,250 KN double quick release hooks and a power operated capstan. The mooring dolphins are each equipped with 1,250 KN triple quick release hooks and power operated capstan.

Vessels must be ready at all times to put out extra moorings as requested by Terminal Personnel or dictated by weather changes. It is the Master's responsibility to ensure that vessel's mooring lines are checked frequently to prevent excessive movement of the vessel in berth, which could activate the ESD/ERS systems and/or cause severe damage to the loading arms and other terminal equipment.

Experience has shown that wholly synthetic moorings have too much elasticity and allow the vessel to range or drift away from the berth during periods of adverse weather.

Therefore the moorings should preferably be all steel wires without use of nylon tails.

As it is recognised that some vessels are not fitted out with complete steel wire moorings, such vessels may use synthetic moorings for head or stern ropes, but breasting and spring moorings are to be steel wires. However, mooring lines leading to the same mooring dolphin should either be all steel wire or all synthetic fibre.

NOTE: (October 1982). With immediate effect all vessels calling at the GASCO NGL Jetty are to be fitted with wires, for spring lines. Vessels unable to comply will be subjected to an inspection of mooring ropes by the Pilot on arrival and will be berthed only if Pilot is satisfied with the mooring lines available. Pilot inspection of mooring lines will be carried out only during daylight hours.

The breasting dolphin's fender design criteria are based on providing for berthing energies acting in the horizontal plane for maximum displacement of 95,000 tonnes (70,000 tonnes until late 1985 when fender repairs completed) with an approach angle to the berthing line of 7° at a contact velocity of 15 cm. per second.

The "Seibu Unit Type" rubber dock fenders are 4.20 m. wide and 5.0 m. high, the face of which protrude approximately 2.9 m. from the face of the loading deck. They provide for 100% contact of fenders on the vessel's perpendicular mid-body at light and loaded drafts, for the full range of vessel sizes.

Tension Winches: Vessels equipped with automatic tension winches should not use the automatic device and set the manual brake on these winches.

BALLAST: The jetty is equipped with dirty ballast/slops reception facilities. Tankers discharging dirty ballast/slops ashore will use the Pentane plus loading arms from where a 24 in. pipe-line runs to tanks in the Refinery adjacent to the LPG plant. The maximum ballast reception rate is 5,000 cu.m./hr. Prior to arrival the Master is to advise GASCO how much dirty ballast/slops he expects to discharge to the shore facilities.

When the vessel arrives with clean ballast for overside discharge, the ballast water must be clean and a declaration to this effect needs to be signed by the Master and delivered to the Terminal Representative. There is a danger of violating pollution regulation if ballast taken on in polluted water is discharged in port. If it is necessary to take on ballast in polluted areas, this should be discharged during passage and replaced by cleaner ballast.

Ashes, oil, oily water, garbage or other refuse must not be discharged overboard in port waters. Scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in Port waters.

It is essential that the vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with the Pilot's requests as to ballast quantity and disposition.

There must be no cleaning of boiler tubes whilst the ship is in port.

POLLUTION: Abu Dhabi Gas Industries Ltd. (GASCO) follows a clean seas policy and in this respect the Harbour Master is authorised by the Port Authority to inspect the vessel's "Oil Record Book" referred to in the International Convention for the Prevention of Pollution from Ships, 1973. Any vessel, the Master of which does not allow inspection of the "Oil Record Book," will be refused the use of the Company facilities at Ruwais.

If it is found that the information entered in the "Oil Record Book" is not in accordance with the requirements of the Convention the matter will be reported to the appropriate authority.

It is an offence to discharge dirty ballast, pump bilges or discharge refuse within the Port limits.

The Harbour Master, or his nominee, is authorised to take samples, in accordance with an approved procedure, of ballast water to be discharged, or being discharged at Ruwais. Should test carried out on these samples indicate an average oil in water content of more than 15 p.p.m. then this may be used in evidence in any proceedings against you brought by the Port Authority in accordance with the Law.

In the event of your vessel discharging dirty ballast or spilling oil, cost for cleaning the pollution, third party claims and other expenses and fines shall be borne by the vessel.

COOLDOWN OF GAS CARRIERS: Vessels, when presenting themselves to load at GASCO terminal should in all cases be ready to load in all aspects. For a gas carrier this means that the cargo tank atmosphere should be compatible with the product to be loaded and the cargo tank temperature close to the temperature of the product to be loaded (Propane −45°C, Butane −8°C).

Notwithstanding the above and providing notice is given well in advance, GASCO may, in exceptional cases, accept gas carriers not fully cooled-down. Each occasion will be considered separately giving due regard to the shipping programme and any other circumstances or restrictions.

GASCO will not accept any responsibility for the failure by the Master of any gas carrier loading at Ruwais to take appropriate action to receive cold liquefied gas, prevent any damage to his vessel and jetty installation and/or injury to his crew or Terminal personnel.

VENTING: During the loading of Pentanes plus, vessels should only allow vapours to escape via the agreed venting arrangement. If there is little wind movement, vapour may persist on deck. When there is a wind, it may, in crossing a deck house or structure, create a low pressure on the lee side thereby causing vapour to be carried towards the house or structure.

Either of these wind conditions may result in high local vapour concentration and, if so, it may be necessary to stop loading while the conditions persist.

Gas carriers are not allowed to have any vapours escape to atmosphere. During loading the pressure in the cargo tanks should be controlled by the use of their reliquefaction plant or by the use of the vapour return line to the shore. The control room should be notified prior to returning vapour ashore via the vapour return line and before stopping the return of vapour ashore.

Your attention is drawn to the information, as provided to you by the Terminal, on the properties and dangers of the cargo to be loaded on board your vessel, together with the actions required in case of an accident.

LOADING: *Loading Arms:* The LPG and Pentane plus loading arms presentation flanges are 12 in. ANSI – 150 – flat face spiral groove.

For centre to centre distances and disposition of the loading arms, see schematic layout. The LPG arms operating envelope parameters are as follows:

Vertical plane	: From 7.7 m. to 24.0 m. above chart datum.
Horizontal plane	: From 4.1 m. to 8.7 m. off the jetty face over the full vertical plane.
Safety Provision	: Horizontal plane drift of 4.6 m. on either side of the centre line. Lateral plane drift of 4.6 m. outside the normal operating box envelope.

All four LPG loading arms can be connected to ships' manifold with a centre to centre spacing range of 1.6 m. to 3.5 m. for the full envelope including the outer drift envelope box.

The Pentane – plus loading arms operating envelopes are as follows:

Vertical plane	: From 2.3 m. to 20.75 m. above chart datum.
Horizontal plane	: From 6.4 m. to 9.3 m. off the jetty face over the full vertical plane.
Safety Provision	: Horizontal plane drift of 4.6 m. on either side of the centre line. Lateral plane drift of 4.6 m. outside the normal operating box envelope.

The Pentane plus loading arms can be connected to ships' manifolds with a centre to centre spacing range of 0.6 m. to 2.1 m. for the full envelope including the outer drift envelope box.

Notwithstanding the above, the loading arms are fitted with ESD systems and additionally the LPG arms with ERS which is actuated before the loading arms reach the outer limits of their envelopes.

The LPG loading arms are linked to the shore system which provided the following flexibility:

Loading arms are numbered from the gangway tower to East.
No. 1 – Propane or Vapour return
No. 2 – Propane – Butane or Vapour Return
No. 3 – Propane – Butane or Vapour Return
No. 4 – Butane or Vapour Return

After berthing you are required to remove the blind flanges from the manifold connections to be used for loading and to indicate which product is to be loaded through them and which connections are to be used for the Vapour Return lines, if required. The connection/disconnection of the 12 in. ANSI 150 loading arms and 8 inch ANSI 150 bunker arm will be carried out by Terminal personnel. If your manifold sizes do not correspond with the loading/bunker arms, you are requested to provide and fit the appropriate reduction pieces accordingly. Masters of gas carriers are to ensure that the reduction pieces and gaskets used are suitable for loading of cryogenic cargoes.

Communications: To maintain necessary communications permanently during cargo operations and also in emergencies, you will be provided with a handie-talkie and a telephone.

We require that the handie-talkie is at all times attended to by the officer responsible for cargo operations. The handie-talkie enables the officer to communicate directly with the main control room and the jetty control room.

Furthermore, a telephone will be placed on your vessel. It is advisable that this telephone is located in such a way that it is guarded most of the time. Additionally a console for activating the ESD and ERS will be put on board.

A ship's crew member, able to converse in English, must be present near the ship's manifold at all times. The loading arm and ship's manifold area are covered by closed circuit televisions from the jetty control room and main control room.

Emergency Procedures: In case of an **emergency on board** your vessel, we require you to take the following action:

Raise the appropriate alarm and take the required action
Inform the Terminal via handie-talkie, telephone and jetty attendant or by activating the ESD or ERS system (see cautions on ESD/ERS information letter).
Cease all cargo operations immediately and shut-down cargo system completely.
Prepare to vacate the berth.

In case of an **emergency ashore,** we require you to take the following action:

Cease cargo operations immediately and shut-down cargo systems completely.
Be stand-by on handie-talkie and telephone and keep contact with jetty attendant.
Be stand-by to give any assistance.
Prepare to vacate the berth.

NOTE: The shore installation has been equipped with a range of safety devices and emergency shutdown systems, these could be activated automatically or manually from the jetty or on board the vessel as the situation will call. All shutdowns are preceded or accompanied by an alarm.

Loading Operations: The maximum loading rates for each product are as follows:

Product	*Tons/hr.*	*cu.m./hr.*
Propane	1,760	3,000
Butane	1,800	3,000
Pentanes plus	2,910	4,270

Propane and Butane can be loaded simultaneously. Loading rates can be adjusted either by stopping/starting one or more pumps or by opening/closing of the recirculation valves on the loading platform.

After berthing the terminal representative will discuss with you the loading operations and emergency procedures. You are reminded that the responsibility as to the quantity of cargo to be loaded, rests with you as Master of the vessel and no overage may be sent back ashore.

Whilst alongside the jetty, ships should be ready to move under their own power in the event of their breaking adrift, catching fire or emergencies. No repairs are to be carried out whilst alongside which would immobilise the ship or impair her fire-fighting efficiency.

CAUTION: The loading rates are controlled on shore and due to the long pipe-lines from the shore product tanks to the jetty head, and the high loading rates, an extremely dangerous situation can arise if ship's valves are closed against the flow of liquids, which could lead to pressure surges liable to cause the blowing out of pipe-line gaskets and/or severe damage to the loading arms.

Loading rates, loading rate reductions and stopping of cargo procedures will be discussed with you prior to commencement of loading.

While alongside the jetty, no craft are allowed alongside the vessel. The lowering of lifeboats whilst alongside the jetty is strictly prohibited except in emergencies.

Immediately after completion of loading the loading arms will be disconnected and the vessel must be ready to proceed to sea or anchorage as directed.

STORES: The taking-on and/or landing of stores and ship's spares over the jetty is not allowed.

SHORE LEAVE: Crew members are not permitted shore leave.

SIGNALS: Vessels, whilst alongside the GASCO NGL-jetty, shall, in addition to those described in the port regulations, display the following signals: by day: a red flag, by night: a red light visible from all directions.

SHIP OPERATOR'S REPORT: February 1982

The following criteria for gas carriers programmed to load propane butane at Ruwais Terminal.

1. Tanks' atmosphere compatible with product to be loaded.
2. Tanks' temperature close to temperature of product to be loaded (propane – 42°C, butane – 6°C).
3. Distance between ship's side and 12 in. manifold connections between 4.1 m. and 8.7 m.
4. Height of manifold above chart datum between 7.7 m. and 24.0 m.
5. Maximum height of railing i.w.c. manifold above chart datum 21.8 m.
6. Centre to centre distances between manifold connections between 1.1 m. and 3.5 m. if manifold connections centre to centre distances are between 1.1 m. and 1.6 m. only one grade can be loaded at the same time.
7. Vessel not to have carried ammonia on previous two voyages.
8. Vessel to inform GASCO Ruwais not less than 48 hours prior to arrival of disposition of manifold connections from bow to stern indicating which connections to be used for propane, butane, vapour and liquid and also the centre distances between them.

also

9. Master should confirm ETA at 72, 48 and 24 hours prior to arrival to Gasha Tower by telex/cable.
10. Master to call Jebel Dhanna Pilot and Agent Jebel Dhanna on VHF radio Channel 9 or 16 four hours prior to arrival. Gasha buoy is in position Lat. 24° 25′ 46″ N., Long. 52° 34′ 26″ E.
11. Please advise Agents vessel's call sign or telex no., d.w.t in long tons, g.r.t., n.r.t., arrival draft, loading rate, etc.

SHIPMASTER'S REPORT: December 1981 (Vessel loading propane/butane, g.r.t. 45,000, d.w.t. 56,000, draft 13.1 m., capacity 79,970 cu.m.).

Ruwais lies in the same general port area that encompasses Jebel Dhanna and at the moment consists of a petroleum products jetty and another to the S.E. which handles Pentanes and LPG.

Further again to the S.E. there is more port development for an ammonia/fertiliser berth and dry-cargo berths.

Ruwais is administered by ADDPOC, Abu Dhabi Petroleum Ports Operating Company, while the LPG berth comes under the immediate control of GASCO, Abu Dhabi Gas Industries Ltd.

The LPG loading platform is situated in position: Lat. 24° 09.8′ N. Long. 52° 43.3′ E., the trend of the platform and mooring dolphins being about 305° True, more or less in line with the current flow.

Approach: The vessel should have BA Charts L(D1) 3778, 3779, 3780 and the recommended track on these should be followed for arrival and departure since it provides adequate water for a vessel of this size and draft. The route is well marked with large buoys and light floats which show up well visually and on the radar. An approach in poor visibility should thus be possible and made with confidence.

See Pilot Books and "Guide to Port Entry".

A waiting anchorage is provided off Ghasha buoy.

Pilotage: Pilots board off 'Ghasha' buoy from launches of about 12 m. length; at the moment two launches are in commission with another undergoing trials. Two have black hulls and light blue upperworks, the other being orange hulled and white upperworks.

Pilot ladder required about 1 m. above the water.

The length of pilotage to the first line ashore is about 3.5 hours.

Communications: Through Bahrain Radio. There is considerable evidence pointing to huge delays in cables between this radio station and the eventual recipient.

Before arrival the Agents sent a comprehensive questionnaire requesting safety checks and ship information. This is a standard cable and originates from GASCO.

VHF contact originally made on Channel 16 with the Pilots and Port Control, but their usual working frequency is Channel 9.

On boarding the Pilot issues a copy of the Port Regulations which should be studied prior to berthing.

Berth: This consists of the loading platform and mooring dolphins at the end of a 3 km. trestle. Minimum reported depth alongside is 15 m. and this was borne out by echo sounder on arrival and departure.

The jetty head consists of the loading platform, 42 m. long with two breasting dolphins at each end. Beyond these are the mooring dolphins, three forward and aft, the total length of the mooring system being 340 m., thus providing adequate moorings for most vessels.

The loading platform carries seven Chicksans, two for Pentane, one for bunkers (yet to be commissioned) and four for LPG. There is a control building on the berth together with closed circuit TV, gas detecting equipment and fire fighting monitors.

The loading arms are all 12 in. 150 ASA although shore personnel boarded and fitted special pieces between our manifold/reducers and the Chicksan. All Chicksans are fitted with automatic quick release and this will operate if the vessel surges more than 4 m. (two for'd and two metres aft) from her moored position. An automatic shutdown system is also fitted and the vessel is provided with a control box for these together with comprehensive instructions. A time of 10 secs. is quoted from operation to complete shutdown and emergency release.

There is provision for two vapour return lines and two loading lines within the four Chicksan configuration and these are interchangeable to a degree.

Ship/shore communication is provided by the terminal who place on board a Stornophone for that purpose.

Mooring: Wires only are recommended but there were no objections to our all polypropylene supply. The normal 3.2.2 was recommended and there is a large mooring boat to assist. Dolphins are fitted with quick release hooks.

Springs must be on mooring winches and the use of self tensioning winches is not allowed.

There are powerful tugs (3,300 h.p.) available for berthing.

Cooldown: There exist rather loose requirements for cooling down but it was no problem to explain to the Superintendent that this vessel could load into 'warm' tanks. If a vessel were to arrive under inerted tanks the situation may be rather different and it appears that the vessel would then leave the berth to cooldown.

Gangway: Ship's gangway should be turned in for berthing, a shore gangway is provided.

N.O.R.: Agent advised me to tender Notice of Readiness at the time of passing the Ghasha buoy.

E.D.P.: There is no Early Departure Procedure, the Master must sign Bills of Lading before sailing. Allow three to four hours after completion of loading to complete all paperwork.

Load Rates: Invariably quoted in cu.m.p.h. Maximum for each product being quoted as Propane 3,000 cu.m.p.h., Butane 3,000 cu.m.p.h. The plant were able to supply at a very low initial rate at the commencement of loading.

Note: The Propane loaded at this call was very warm, −38°/−39.5°C. The Loading Superintendents did not find this amiss and the reported temperature in the shore tanks is about −40°C. There was a slight drop in temperature at the manifold after sunset.

Butane loading temperature was about 0°/−1°C.

Cargo Survey: Watson Gray attended on behalf of Charterers to gauge ship's tanks and their figures agreed closely with our own. However, there was a huge discrepancy (618 tonnes) between our figures and those from ullaging and flow meter readings ashore (Propane). Ship was in excess of the shore tonnage. Ship was under shore figures for Butane by about 35 tonnes.

Protest noted over cargo temperature and quantities. Vessel was given outward clearance only on issuing Agents with a letter of Authority to Sign Bills of Lading.

Density: Water density 1031.

General:

Stores: not available.

Shore Leave: Definitely not allowed under any circumstances other than extreme medical urgency.

Relief/Repatriation: Not possible.

Lloyd's Surveyor: A minimum of seven days' notice required.

Repairs: There are no repair facilities available. Whilst alongside main engines must be kept in immediate readiness.

Lifeboats: Permission *must* be sought from Port Authorities to carry out lifeboat drills.

Bonded Stores: No restrictions on tobacco. All alcohol should be collected and sealed. The Customs may allow a token issue (six cases of beer for the ship) but this is not to be relied upon. All cameras have to be collected and placed under seal.

Medical: Unless in cases of extreme urgency, totally unavailable.

Mail: Reported as being seven days to and from U.K.

Courtesy Flag: U.A.E.

Tapes: A very good selection of pre-recorded tapes is available at about 60p each. The Pilot will bring a selection on a sale or return basis.

Fishing: Reported to be good.

Rat Guards: Must be fitted to all moorings.

Fresh Water: Not available.

Walport Films: Exchanges readily available with usual notice.

Entering Inwards: After the vessel's cargo nomination has been accepted she is allowed an "acceptance period" of three days in which to arrive at the port. Apparently this runs from 24 hours, BEFORE the day of acceptance to 48 hours afterwards. Thus we arrived 7 hours 30 mins after the expiration of our acceptance period and a vessel arriving 20 hours later received priority. This should be brought to the notice of Owners or Charterers, before arrival.

Papers:

One Crew Declaration
One Bonded Stores List
Two Crew Lists
Health Declaration

Bonded stores' seal checked on sailing.

Customs checked both bars.

Note: Abu Dhabi operates a boycott against Israel, South Africa and Egypt. Suez Canal Transit is excepted.

The Master has to sign an undertaking to the effect that the cargo will not be discharged at a port under boycott and is given a form to be posted to Abu Dhabi from the discharge port as proof.

(E) RUWAIS FERTILISER INDUSTRIES (FERTIL)

The bulk cargo terminal at Ruwais comprises a 512 m. long jetty with in line berths to suit the export of bulk urea. Three mooring dolphins at the seaward end of the jetty serve a liquid ammonia berth. The bulk cargo terminal is bordered by intake and outfall channels provided for the cooling water system of the Ruwais Industrial Complex.

Provision has been made along the jetty for bag and bulk conveyors to load vessels with urea from a fertiliser plant 1 km. inshore.

The loading of ammonia is carried out from a loading arm at the North end of the jetty where vessels can berth using 3×100 ton capacity mooring dolphins.

LOCATION: The jetty alignment and conveyor main setting out line is 10° West of North. The seaward limit of the jetty works are defined by the Northernmost mooring dolphin.

The terminal is located in 12 m. of water, due East of the NGL Jetty, and West of the Construction Wharf and is approached from a deep water channel serving other Ruwais jetties.

A turning basin is located N.E. of the jetty and is of 500 m. diameter and has a minimum dredged depth of 12 m. below chart datum.

Vessels will normally be berthed against fender piles alongside the jetty on a heading of 350°.

BERTHING: *Jetty:* The jetty is designed for berthing combinations of vessels up to 2 fully laden 200 m. long (25,000 d.w.t.) bulk cargo vessels along its Eastern side. Provision is made at the Northern end of the jetty for the loading of liquid ammonia.

The jetty deck is of concrete construction and is supported by vertical 1 m. diameter tubular steel pipes.

Two turnround areas for jetty traffic are provided, one mid-way along the jetty, the other at the Northern end.

The jetty is designed to support up to 3 ship loaders with a backing conveyor system and up to 3×300 mm. diameter liquid ammonia lines.

The 3 mooring dolphins at the Northern end of the jetty serve the Ammonia Berth and each has a bollard capacity of 100 tonnes and is connected to the jetty by a system of concrete walkways.

The jetty and dolphins have a deck level 7.4 m. above Jebel Dhanna Chart Datum.

The minimum dredged depth at the berth is 12 m. below Chart Datum.

Fenders: The fender system has a design capacity of 55 tonne metres per fender pile and the recommended berthing angle is 5°. The fender system absorbs energy by deflection of single 1,300 mm. diameter tubular steel cantilever piles and twin Bridgestone Cell units which have a frontal frame 4.2 m. high by 1.7 m. wide.

The fender face is set 4 m. seaward of the jetty deck edge.

The fender spacing is generally 15 m. along the main length of jetty and this extends to 31 m. for the Northern fenders located East of the mooring dolphins.

The fenders are suitable for vessels between 5,000 d.w.t. and 25,000 d.w.t.

Mooring: Ship lines will be taken to 100 ton "Bean Type" mooring bollards located along the cope edge of the jetty. The general bollard spacing is 15 m. whilst at the shore end this extends to 30 m.

100 ton "Bean Type" bollards are positioned on the 3 mooring dolphins located at the seaward end of the jetty. Ships' lines may be taken to the dolphins by boat or via the concrete walkways provided from the jetty deck.

Landing Stage: A landing stage for small harbour craft is located adjacent to the jetty near Pile Bent 55, some 600 m. South of the outermost dolphin.

Access Ladders: Access ladders to water level are provided on the fender piles at a spacing of 60 m. All mooring dolphins are provided with access ladders.

Services: Provision has been made for future electrical and mechanical services in the jetty by ducts cast into the concrete deck or provision for hanger supports beneath the deck.

Loader Rails: A flat bottom loader rail having a gauge of 11 m. is secured to the concrete deck by Molyneaux clips. Buffer stops are provided at both the inshore and offshore limit of the rail. Provision has been made for the future extension shorewards of the loader rail.

Approach From Shore: The approach to the jetty is via a dual carriageway off the Corniche Road. The access road leading to the jetty is 600 m. long and 8 m. wide and bounded on one side by the export conveyor housing.

Breakwaters: Rubble mound breakwaters protect the cooling water intake channel located West of the jetty.

Rubble mound reclamation bunds built just landward of the reef define the land area.

A rock armoured cooling water outfall channel is located within the reclamation and located mid-way between the jetty and construction wharf.

LOADING: *Urea Loading Operation Procedure:* Firstly, the Jetty Supervisor, after the arrival of the vessel, and after getting Clearance Certificate, will discuss the necessary loading sequence for keeping the vessel trim with ship's Cargo Officer.

When the sequence of operation has been agreed, the Jetty Supervisor will inform operational group in Bagging Control Room and shiploaders of the sequence required.

On receipt of this information, Bagging Control Operators will pre-set the bag counters or scales and line up other conveyors and machines depending upon the method of shipping required (i.e. bagged or bulk product) to the quantity agreed with the ship Cargo Master. Meanwhile, the Shiploader Operator will have positioned his machine ready for loading into the appropriate cargo hold defined by the sequence of operation.

Jetty Supervisor/Shiploader Operator will then give signal as "Shiploader in Loading Position" and Bagging Control Room Operator will start sending bag or bulk urea to jetty.

The pre-set bag counters or belt weighers will trip the conveyor system (excluding the jetty conveyors) when the pre-set capacity has been realised. The signal to start again will be given by the "Shiploader Running" signal. On receipt of this signal in the Bagging Control Room, the shiploader will have traversed to its new loading position and will be ready for the next batch of product.

Photocells are provided at the end of telescopic conveyor to indicate actual quantity of the bags loaded in ship hold. A cumulative reading (in numbers) is recorded in ship-loader operator's cabin.

For bulk urea loading, urea going to jetty conveyor is measured by weighing scales inside the Bagging Building. The weighing scale has load cells and belt speed detector for measuring the flow rate. The feed rate is indicated and also totalised cumulatively at Bagging Control Room, and also at the local control panel of weighing scale.

Normal operational shut-down shall be sequential and initiated from Bagging Control Room.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., Jebel Dhanna, United Arab Emirates. Tel: 71026. Cables: "Confidence", Abu Dhabi. Tel: 41031 (Jebel Dhanna). Telex: Abu Dhabi 22248 ("Gacauh EM").

KHOR FAKKAN, Sharjah: 25.22 N. 56.22 E.

(See Plan Book)

PORT LIMITS: See Plan of Khor Fakkan on B.A. Chart No. 3518.

DOCUMENTS: The following documents must be in the possession of the ship's Master on arrival, or must be forwarded to ship's Agent prior to arrival:

Immigration: board on arrival
  Crew Lists (2 copies)
  Passenger Lists (2 copies)
  Passports/seamen's identity cards
Customs:
  Crew Lists (2 copies)
  Passenger Lists (2 copies)
  Cargo Manifests (2 copies)
  List of Alcoholic Beverages (2 copies)
Port Operator:
  Certificate of Registry (1 copy) on request
  Classification Certificates (1 copy) on request

The following documents should be handed to the Port Operator by the ship's Agent at least 24 hours prior to the vessel's arrival.
  Cargo Plan (1 copy)
  Discharge List (1 copy)
  Transhipment List (1 copy)
  Dangerous Cargo Manifest (1 copy)
  Refrigerated Container Manifest (1copy)

PILOTAGE: Pilotage is compulsory for all ships proceeding beyond the fairway buoy. Port Khor Fakkan will operate a 24 hour, 7 day a week pilotage service. Vessels approaching the Port should await Pilot to seaward of the fairway buoy. The extremity of the breakwater (Lat. 25° 21′ 28″ N., Long. 56° 22′ 43″ E.) is marked by a white occulting light visible 10 miles.

"Gulf Pilot Khor Fakkan" on VHF Channel 16. Also on 2182, 2638, 2738, 3270, 3710 and 4136.3 kHz.

ANCHORAGE: A limited number of vessels may anchor in Khor Fakkan Bay to the North of the fairway with the prior approval of the Port Operator. Otherwise, anchoring not permitted within 12 miles of Khor Fakkan as the area is a prime tourist area.

MAX. SIZE: Max. draft entering and leaving is 39 ft., range max. 3.0 m., height of wharf at HW 1.8 m.

No restrictions on LOA.

HEALTH: Normal quarantine regulations apply. Radio Pratique will be granted on receipt of radio message from Master via his Agent, stating that no serious illness has occurred during the preceding 30 days.

All crew members must be in possession of valid cholera certificate. The Health Officer will board when the vessel is alongside.

RADIO: Bahrain Radio A9M.

Notice of Arrival: Vessels should advise their Agent ETA Port Khor Fakkan, giving draft, LOA and intended cargo operations to be performed at least 72 hours prior to arrival and confirm 48 hours and 24 hours prior to arrival.

Agents should arrange berthing and labour with the Port Operator. Vessel should contact Port Khor Fakkan signal station on VHF Channel 16 when within range.

VHF: Khor Fakkan Harbour Office can be contacted on Channel 16. All movement in and out of the harbour shall be notified to the control and permission to proceed obtained for each movement.

TUGS: 1 tug, 800 h.p.

BERTHING: Length of berth 430 m. Depth alongside 12.0 m. at LW. Mooring gangs and berthing launches are provided.

Port Equipment: 2×40 ton Mitsubishi gantry cranes; 4×40 ton electric transtainers; yard tractors and trailers. Additional equipment such as forklifts, mobile cranes, pallets and barges available on request from the Port Authority.

Storage Facilities: The terminal comprises an area of 100,000 sq. m. and is capable of handling 150,000 t.e.u.s per year.

Container Freight Station: A container freight station is available at Port Khalid, Sharjah close to the main highway linking Sharjah with its West coast neighbours.

Priority: Given to Container and Ro-Ro vessels.

STEVEDORES: *Working Hours:* The port will work on a 24 hour, 7 day a week basis ashore and afloat. Additional charges will apply outside normal working hours which are defined as follows:

Saturday to Thursday except Public Holidays (0600 – 2200 hrs.).

Normal working hours are subject to change during Ramadan when working hours will be at the discretion of the Port Operator. Requirements for port labour must be submitted by ship's Agent to the Port Operator by 1600 hrs. previous day.

MEDICAL: Upon application to ship's Agent, medical examination of crew members can be arranged. Personnel will either be sent to private doctor or to Public Health Department as circumstances dictate. Serious cases will be referred to Government Hospital Doctor.

FRESH WATER: Fresh water is obtainable. Agents must notify the tonnage required 48 hours prior to ship's arrival.

FUEL: Limited gas oil facilities only at present.

REPAIRS: Marine engineering workshops capable of handling most repairs are available.

SURVEYORS: Services are available upon request.

REPATRIATION: Proximity of the new Sharjah International Airport will permit efficient crew changes and repatriation. Offshore crew changes facilities can be arranged.

Transit visas are not required for crew changes. Ship's passengers require a valid visa for transit or temporary stay.

AIRPORT: Sharjah and Dubai.

TIME: GMT plus 4 hours. Permanent.

SHORE LEAVE: Shore leave is permitted.

STORING: At anchorage – by off-shore crew change boats. Alongside – by truck alongside ship. Fork lift trucks and local labour available if required.

BANKS: British Bank of the Middle East, P.O.Box 10030, Khor Fakkan, U.A.E. *Telex*: 89011 Bbmefj EM (stating for Kfn.)

Grindlays Bank Ltd., P.O. Box 10149, Khor Fakkan, U.A.E. *Telex*: 89025 Grnly EM.

GENERAL: *Pollution:* The provisions of the Khor Fakkan Maritime Law shall apply with respect to the operation of vessels in Khor Fakkan coastal waters.

Garbage disposal services are provided by the Port Operator and are compulsory.

Ships' Chandlers: Complete chandlering facilities are available, handling provisions, laundry and bonded stores.

Water for Labour: A supply of potable water is to be made available to port labour working on board a vessel.

DEVELOPMENTS: A new Ro/Ro platform 60 m.×40 m. is positioned off the South end of the berth. It will enable two large Ro-Ro vessels to operate twin stem ramps at the same time, whilst the quay gantry cranes operate cargo from both upper decks. The pontoon will have a 12 m. wide shore connecting bridge S.W.L. 180 tonnes.

AUTHORITY: Khor Fakkan Port Authority. P.O.Box 10326, Khor Fakkan, Sharjah, U.A.E.. *Tel*: Khor Fakkan 85324/85027. *Telex*: 89023 Seagul EM. *Cables*: Mina Khor Fakkan. *Contact*: J. T. Peattie, Harbour Master.

AGENT: Gulf Agency Co. (Sharjah) Ltd., P.O.B. 10304, Khor Fakkan, U.A.E. Tel: 85095. Telex: 89048 ("Gac KFN EM"). Cables: "Confidence", Sharjah (stating for Khor Fakkan).

MINA JEBEL ALI, Dubai: 25.08 N., 54.55 E.

(See Plan Book)

FLAG: U.A.E. and Dubai Emirate.

LOCATION: The port of Jebel Ali is a major port situated some 35 km. S.W. of the city of Dubai.

The Port Control Tower is situated in position Lat. 24° 59.4′ N., Long. 55° 02.9′ E.

The Jebel Ali approach channel commences 17 km. off shore, the entrance to the channel being marked by a fairway buoy. The buoy is situated in Lat. 25° 06′ 54″ N., Long. 54° 56′ 33″ E.

The approach channel with a depth of 15 m. is buoyed and runs in a direction 315°T – 135°T towards the port. After 12.5 km. the channel takes a 25° bend and becomes the entrance channel which leads into the port on an alignment of 340°T – 160°T.

The approach channel has a width of 280 m. reducing to 235 m. In the bend the channel widens to 300 m. and in the entrance channel to 340 m.

The Outer Basin is 2.3 km. long and 600 m. wide with depth of 14 m. and the Inner Basin is 3.7 km. long and 425 m. wide with a depth of 11.5 m. The main axis of both basins is 340° – 160°.

All channel, basin and docks' bottoms are sandstone.

Tankers and LPG ships will use the dual purpose berth situated in the Outer Basin and will generally be berthed starboard side alongside.

A second tanker berth is situated at Berth No. 2 in the 14 m. basin for the import of fuel oil.

In all other berths ships can secure port or starboard side to.

DOCUMENTS: The following documentation should be forwarded to the ship's Agent, for delivery to the appropriate Terminal Manager, at least 48 hours prior to vessel's arrival.

(a) Discharging Vessels
  3 copies Cargo Stowage Plans
  7 copies Cargo Manifests
  3 copies Hazardous and Dangerous Cargo Declaration
  3 copies Hatch List
  3 copies Arrival/Cargo Advice
  1 copy Each Bill of Lading/Packing List.
(b) Loading Vessels:
  3 copies Cargo Stowage Plans
  3 copies Cargo Loading List
  3 copies Hazardous and Dangerous Cargo Declaration
  On completion of loading 3 copies of the Vessel Manifest endorsed by Customs must be provided

Immigration: Three Crew Lists are required on arrival.

Immigration Offices are established in the port. The service is available 24 hours a day. However, Masters should advise their Agent that the ship may leave outside normal office hours and that the Agent should check that Immigration Officials will be available to clear the vessel outward. This also applies to public holidays.

Masters are advised that "Immigration Clearance" must be on board and sighted by the Pilot before he can take the vessel to sea.

MINIMUM REQUIREMENTS:

In the interest of avoiding delays, all vessels programmed for Jebel Ali should comply with the following minima and be fitted with:

(i) Fully operational Radar.
(ii) Fully operational VHF Radio with Channels 11, 14, 16, 67, 69.
(iii) Sufficient crew to handle tugs' lines and moorings efficiently.
(iv) Efficient propulsion and deck machinery.
(v) Efficient and adequate moorings to secure vessel safely.
(vi) Efficient signalling equipment.
(vii) Fully operational Tachometer, Rudder and Helm indicators.
(viii) Efficient mooring stations communications systems.
(ix) An efficient anchor windlass and anchors.

If any of the above requirements cannot be complied with, the Harbour Master should be advised prior to arrival via "Jebel Ali Port Control".

APPROACHES: Ships should make for "Mina Jebel Ali" light float in position 25° 10′ 30″ N., 54° 52′ 15″ E. (Gp. Fl.3 every 15 secs. 15 miles). This float lies on the axis of the channel leading into Jebel Ali Port i.e. from this float vessel should steer 135° to approach Pilot Boarding Area.

Vessel should await Pilot in the area North of the seaward end of the buoyed channel, marked by a fairway buoy. This buoy is a safe water mark painted red and white vertical stripes. Light character is Fl. 10 sec. The centre of this waiting area, with a radius of 1 mile, is Lat. 25° 09′ N. and Long. 54° 54′ E.

PILOTAGE: Pilots are available on a 24-hour/day basis. Ships requiring a Pilot should call "Jebel Ali Port control" on VHF Channel 16 at least 2 hours before arrival at Pilot Boarding Area.

All ships other than excepted ships, navigating whether by entry, leaving or moving within Mina Jebel Ali shall be under the charge of a pilot.

The following ships will be excepted ships:

(i) Ships of War
(ii) Pleasure Craft
(iii) Ships of less than 150 n.r.t.
(iv) Tugs, dredgers, barges or similar vessels whose ordinary course of navigation does not exceed beyond the Arabian Gulf.
(v) Tenders of M.E.N.A.S.
(vi) Country Craft

Pilots board from launch "Murshid" or tugs "Namer" or "Asad", equipped with VHF, watch kept on Channel 16. Jebel Ali Port Control listens on Channel 16 and the working frequency is Channel 14. Additional Channels 11, 17, 67 and 69 are also available.

Vessels requiring a Pilot should give at least 2 hours notice of arrival in the Pilot Boarding Area.

Outbound ships should request Pilot at least one hour prior to departure. Masters should obtain "Masters Report" from the Inward Pilot and return it completed to the Outward Pilot.

Pilot Boarding Areas: The Pilot boarding area is located North of the channel entrance. The centre of this area is in position Lat. 25° 09′ N., Long. 54° 54′ E. with a radius of 1 mile.

Pilots will normally meet and embark incoming vessels at the above mentioned Pilot boarding area.

Masters are reminded to provide a safe lee.

Pilot Ladder Requirements: The following points are stressed:

(i) The rigging of pilot ladders and the embarkation and disembarkation of Pilots thereby shall be supervised by a responsible officer of the ship.
(ii) Every pilot ladder shall be secured in a position clear of any possible discharges from the ship, and so that each step rests firmly against the ship's side.
(iii) Every pilot ladder shall be secured in a positon where the Pilot can gain convenient access to the ship after climbing not less than 5 feet and not more than 30 feet.
(iv) Whenever the distance from the water to the point of access to the ship exceeds 30 feet, access from the pilot ladder to the ship shall be by means of an accommodation ladder or equally safe and convenient means.
(v) A light shall be provided at night so that the pilot ladder overside and also the position where the Pilot boards the ship shall be adequately lit.
(vi) Lifebuoy and heaving line should be available at the ladder.
(vii) When a pilot hoist is provided as the method of access, it must be of an "approved" type, complying with the recommendations of the "European Maritime Pilots Association".

ANCHORAGE: The holding ground is poor, ships are recommended to use more chain than usual.

The anchorage is an area enclosed by the following four positions:

1.	Lat. 25° 11′ 20″ N.	Long. 54° 49′ 45″ E.
2.	Lat. 25° 08′ 12″ N.	Long. 54° 53′ 12″ E.
3.	Lat. 25° 05′ 18″ N.	Long. 54° 49′ 45″ E.
4.	Lat. 25° 08′ 20″ N.	Long. 54° 46′ 12″ E.

Ships will anchor here in a depth of approximately 16 m. – 20 m. (9 – 11 fathoms).

Pipe-line: All ships are warned that an untrenched pipe-line lies East of the channel. This line comes ashore in position 25° 01′ N., 55° 04′ 30″ E. From this position it lies in a direction of 345° for approximately 10 miles, thence assumes a direction of 313° towards the "Fatah Field" i.e. it is from 2 to 5 miles East of the buoyed entrance channel. Ships should **not** anchor near this pipe-line, nor should they approach the area with anchors walked back or trailing.

MAX. SIZE: No limit on LOA except Tanker Berth. Max. LOA Tanker Berth 260 m.

Max. draft – 14 m. to Tanker Berth, 13.5 m. Outer Basin, 11.0 m. at other berths.

TUGS: Two tugs with bollard pull of approximately 30 tons are available in the port at all times, watch maintained on VHF Channel 16 and/or 17. Extra tugs can be made available if needed.

Mooring boats: Two mooring boats, the "Dina" and the "Wafa" are available at all times. These boats are also equipped with towing hooks and VHF.

BERTHING:

Berths Nos. 1 – 17: depth 14.0 m.
Berths Nos. 18 – 66: depth 11.5 m.
Tanker/LPG: depth 15 m.

Moorings: Bollards on Quays Nos. 1 – 2 and 3 are of 100 ton strength, spaced 27 m. apart, on Quays Nos. 4A – 4B, 5, 6, 7, 8, 9 are 70 ton strength 30 m. apart and on Quay No. 10 is 70 ton 20 m. apart. Tanker jetty equipped with mooring hooks 100 ton and electric capstans. Several berths fitted with 250 ton breasting bollards to cater for laid up VLCCs. These berths also have electric points and telephone points. Enquiries for further information and conditions to the harbour master.

It is essential that whilst alongside quays, moorings are tended carefully and regularly and conform with recommended mooring patterns appropriate for ship sizes. The average rise and fall is 1.14 m.

Storage: Transit sheds provide covered storage. There is a large amount of paved open storage. The 70 ft. wide general cargo aprons provide for easy direct delivery.

Refrigerated Cold Store: Fully operational and available for the storage of frozen and chilled products. Located at berth No. 31.

Located only 30 m. from the quayside and with a 42,000 cubic metre capacity (7,000 tons), the store has 8 separate rooms varying in size and in which the temperature can be separately controlled in the range of minus 29° C. to plus 13° C.

The refrigeration machinery is the most modern currently available in the world and is installed to the highest standards, including emergency standby generators. Cargo handling equipment includes 6 electric fork lift trucks and 12 atlet trucks and lifters. 5,000 pallet converters will be available for rapid transit of cargo from vessels direct to the cold store.

Equipment: The Port Authority provides a comprehensive stevedoring service from break bulk quay and warehouse area to a fully mechanised Ro-Ro – Container Terminal.

The general cargo areas are located on quays No. 6 and 10 with 21 m. of concrete apron, 5 transit warehouses of 80,000 sq. ft. and open storage areas and truck delivery and receiving docks. There are 2 berths for open storage cargo. A 20 ton fixed jib derrick is available for barge or shallow draft ship loading, and an adequate supply of supporting cargo handling equipment to complement a general cargo operation.

The container terminal situated at berths No. 15 to 17 is fully paved. The back up area serving these 3 berths can accommodate up to 6,000 TEUs.

The container terminal is equipped with three 3rd generation Mitsubishi container cranes with 100 ft. track gauge, 110 ft. outreach past the fender system and a 49 ft. backreach. Telescopic spreaders to accommodate 20 ft., 35 ft., and 40 ft. containers plus the appropriate fittings to handle over height and flat rack container units. The cranes have a S.W.L. of 30.5 tons under the spreader.

To service the vessel during a grounding operation, the back-up area has 5 Raygo Wagner container handling top loaders with a rated S.W.L. of 31 tons under their telescopic spreader which also can accommodate 20 ft., 35 ft. and 40 ft. as well as having the fittings to handle flat racks and over height units.

As well as the above container handling equipment, the terminal has to supplement any vessel operation: Flat bed trailers, low bed trailers, tractor units, mafi goose-necks and an assortment of forktrucks to handle general cargo from Ro-Ro vessel as well as handling cargo in the proposed L.T.L. warehouse.

The Port has experienced personnel to handle the various types of vessels which will come to this port. The complete operation from Pilots, Stevedoring, Documentation, Warehousing and Port Security, will be handled by the Port Authority.

The Port Authority also offers a trucking service on an optional basis.

Flat-top crane barge with 17 ton S.W.L. available within the limits of the port.

Ro-Ro Terminal: The Ro-Ro Terminal is situated at Berths 32-34, with two ramps specially designed for stern discharging vessels, and a water depth 11.5 m.

An 8,000 sq.m. warehouse provides covered storage while 105,000 sq.m. of paved open storage is available. Equipment includes 3 Douglas Tugmasters.

CONTAINER FACILITIES: Also see "Berthing".

The Terminal comprises of Berths Nos. 15, 16 ,17, totalling 900 m. with water depth of 14 m. The specifications of the container cranes are as follows:

Mitsubishi 41 ton electric container cranes. Distance from face of rubber fender to centre line of container at maximum outreach – 34 m. (112 ft.).

Top of container at maximum lift is above top of rail – 26 m. (85 ft. 4 in.).

Top of rail is 2 m. above highest tide and 4 m. above lowest tide.

Top of container at lowest position is below top of rail – 16.5 m., (54 ft. 6 in.).

Container crane travel – 900 m.
Container track gauge – 30.48 m. (100 ft.).
Container crane reach behind back rail – 15 m. (49 ft.)

Maximum weight of 20 ft., 35 ft. and 40 ft. container handled by spreader is 67,250 pounds.

Maximum heavy lift with spreader removed is 90,405 pounds.

100 ton bollards are spaced at 30 m.

Refrigerated container plugs: 60×380 volt Kheops, 60×380 Crouse Hinds, 40×220 volt Mipco.

Container freight station 100,000 sq. ft.
Depth of water alongside 14 m. (46 ft.).
Container cleaning available.
Track scale capacity 50 tons.

STEVEDORES: By Port Authority of Jebel Ali.

Normal Working Hours:

0700 – 1200 hrs, 1300 – 1600 hrs. Twenty-four hour working can be arranged.

DENSITY: 1032.

RADIO: *ETA requirements:*

Vessels arriving at the Port of Jebel Ali are required to provide the Harbour Authority with the following estimated times of arrival:

(i) At least 48 hours prior to arrival or on leaving the last port, whichever is later, via Bahrain Radio or via Jebel Ali SSB radio, listening on 2182 kHz.
(ii) Confirm the vessel's estimated time of arrival at least 24 hours before arrival at the designated pilotage area and thereafter notify any significant change in excess of 1 hour.
(iii) On coming within VHF range of "Jebel Ali Port Control" establish VHF contact for the purpose of updating the estimated time of arrival and at least 2 hours' notice of arrival in the Pilot Boarding Area. VHF watch is kept on Channel 16.

Communications: The Port radio station maintains continuous listening watch on VHF Channel 16. Working Channel is Channel 14. On Coming within VHF range of "Jebel Ali Port Control", vessels should establish VHF contact for the purpose of updating the estimated time of arrival, and at least two hours' notice of arrival in the Boarding Area should be given.

Continuous watch is maintained on radio frequency 2182 kHz.

The station also keeps listening watch on frequency 12429.2 kHz. or 16587.1 kHz. at 12.00 GMT for approximately 10 minutes daily. Vessels are urged to contact the Port on these frequencies as early as possible before arrival.

Vessels are warned that VHF Channels are monitored and taperecorded and any misuse of VHF Channels will be reported to the proper Authorities.

Notice of Arrival: Agents should arrange berthing and stevedoring with the Terminal Manager at least 48 hours prior to the vessel's arrival (Cargo Handling Manager Tel. 32242, Container Terminal Manager Tel. 56578).

Pre-Arrival Information: Prior to arrival, all vessels regardless of tonnage calling at the Port of Jebel Ali should provide "Jebel Ali Port Control" with the following information:

(i) Name of vessel
(ii) Port of Registry
(iii) Name of Master
(iv) Gross Tonnage
(v) LOA
(vi) Draft
(vii) Cargo to discharge or load
(viii) Pilot boarding arrangements
(ix) Number of crew, indicating the number of deck crew available for manoeuvring
(x) Health information
(xi) Last port of call.

VHF: See "Radio" and "Pilotage".

RADAR: VTS harbour radar in Port control tower in position 29° 59.4′ N., 55° 02.9′ E.

The control tower is equipped with a Sperry Radar Vessel Traffic System C.A.S. II. This equipment consists of a dual radar system combined with a data processor and computer. Traffic movements are monitored, and recorded within the Port limits and approaches. The Tower is continually manned by qualified Radar/Radio Operators.

MEDICAL: There are medical facilities provided in Dubai Hospitals – arrangements can be made through the Agent. In any emergency, medical services are available in Jebel Ali village, telephone No. 56489.

FRESH WATER: Supplied by Dubai Water Services (Tel: 39236/56749). Order through Agents. Water laid on at Berth No. 1 and Quays 3, 4A, 4B, 5, 6, 10 and tanker/L.P.G. Berth.

FUEL: Can be made available through prior arrangement with the Agent. Bunkers ex-barge are available within the Port. All bunkers supplied by E.B.B. Co., arrangements through Agents.

Lubricating Oils: Available in drums, transported by road.

TANKERS: This berth provides facilities for product tankers as well as L.P.G. and condensate carriers. 4 loading arms are available to handle Product tankers through 8 in. connections with reducers available. On the L.P.G. half of the jetty, there are 3 loading arms with 16 in. connections. Two vapour return lines are also fitted, 1 for propane and 1 for butane with 14 in. connections. Various reducers and straight pieces are also available. The depth of water in the berth is 15 m. but the controlling depth in the approach channel is 14.5 m.

No. 2 tanker berth is available for fuel oil import.

Vessels are warned that no dirty ballast discharge will be allowed within the limits of Mina Jebel Ali. There are no shore ballast reception facilities.

Also see "General".

REPAIRS: Berths are available for afloat repairs to be done by local contractors.

Lay-up Berths for long and short periods can be arranged for vessels up to 400,000 d.w.t. with draft up to 11.5 m. Special bollards are installed on Quays 4A and 4B to handle large vessels.

Marine engineering firms with specialised workshops in Dubai, undertake engineering repairs. Agents will make necessary arrangements.

Repairs to radar, radios, echo sounders and other electronic navigational and communication aids are available by major manufacturers' Agents, (i.e. Marconi, Decca, Kelvin-Hughes, Telefunken, etc.), being represented in Dubai and sets serviced by trained engineers. Agents will advise.

A Port Authority diver can be arranged through vessel's Agent.

SURVEYORS: Lloyd's, B.V., A.B.S., N.V. and N.K. as well as other private qualified cargo, hull and engine surveyors and consultants, i.e. Murray Fenton-Cullen Incorporated (telephone Dubai 441662) and Cleghorn, Wilton & Associates (telephone Dubai 435402).

Gas free certificates and hot work permits can be obtained through independent qualified surveyors.

Surveys: The following surveys and certification can be carried out in Jebel Ali: Loadline, Safety Equipment, Safety Construction, Radio.

TELEPHONES: Ship board telephones available on some berths by arrangement. Telephones on a temporary basis are available in the Port and Cargo Administration Supervision Offices.

Important Telephone Numbers at Jebel Ali:

Port Control	33226
Harbour Master & Port Control	35251
Police	56111
Port Health	56578
Customs	56374
Immigration	56844
Fire Service	56222

The foregoing are Embassies and Consulates situated in Dubai. Mos countries maintain diplomatic missions/embassies, etc., in Abu Dhabi-some 120 km. from Mina Jebel Ali.

SHORE LEAVE: The following is the standard procedure for shore leave as dictated by the Port Immigration Department.

1. The Master, Chief Officer or Purser is to hand over all seamen's books to the Port Immigration.

2. Crew members wishing to go ashore are to report to the Por Immigration Office (Agent to arrange) and collect a "Marine Landing Permit" which should be carried at all times. On returning to the ship, the permit should be handed back to the Port Police. The process is to be repeated on every subsequent shore leave.

WEATHER: *Weather and Currents:* Cross currentsof up to 1.75 knots may be experienced in the Approach Channel. These currents are windand tide induced.

Fresh winds are frequently experience at Mina Jebel Ali. However, during evening, night and morning hours, light southeasterly winds prevail veering to northwesterly by noon and freshening to Force 4-5.

On occasions, especially during November-March, fog may be prevalent during early A.M.

GENERAL: *Dirty Ballast and Refuse:* All vessels are warned that no dirty ballast, bilges, etc., should be pumped out in or in the vicinity of the Port of Jebel Ali. Offenders will be prosecuted and the U.A.E. and Dubai Police maintain maritime and helicopter patrols to ensure no dirty ballast is discharged and no refuse is thrown overboard.

These rules apply while vessels are alongside and the Harbour Master may instruct offending vessels to leave or bar them from returning to Mina Jebel Ali.

Rubbish skips supplied by the Port Authority at a charge and are compulsory.

Ballast Requirements: For the purpose of safe manoeuvring, the Harbour Master requires all vessels to maintain an acceptable ballasted condition.

Vessels should carry sufficient ballast so that the propellor can have maximum immersion whilst maintaining an acceptable stern trim.

Masters are reminded that no dirty ballast will be allowed to be discharged in Mina Jebel Ali.

Fumigation: Fumigation can be carried out by specialist firms.

Ships' Chandlers, Ship Supplies: All types of provisions – fresh and dry, and all types of fresh and frozen meat are available ex-Dubai. Arrangements through Agent and/or through direct VHF contacts with ship chandlers and provision merchants. Paints, ropes, etc., available as well as charts. Laundry services are also available.

Visitors Port Passes: Any Person entering the Port is required to have either a permanent or visitors temporary/day pass. Passes can be obtained from the Pass Office situated at the Container Terminal Entrance. The Pass Office operates daily from 0700 hours to 1900 hours.

Permanent passes cost Dhs. 25 each and are valid for 12 calendar months from date of issue. Applicants are required to produce a Sponsor's letter and complete an application for Pass Form. Documents such as Passports and Photographs are not required.

Temporary or Day passes which are free of charge are only issued to irregular visitors who have a confirmed appointment to visit the Port.

No more than one of these passes a month will be issued to any individual. Day Passes can be obtained from the Pass Office or any Terminal Checkpoint.

Shops: A small supermarket is open in the port. Hours of work are: 0800 – 1300 hrs. Saturday to Thursday inclusive.

Bank: The National Bank of Dubai maintains a branch in the port. Hours of work are: 0800 – 1200 hrs. Saturday to Thursday inclusive for counter staff.

Seamen's Recreational Facilities in Dubai:

International Seamen's Club (Tel: 435551)
Norwegian Seamen's Mission (Tel: 470561/3)

Transport: Arrangements for taxis can only be made through the Agent.

MINA SAQR, Ras Al Khaimah: 25.59 N. 56.03 E. (See Plan Book)

PORT LIMITS: "Mina Saqr" and its limits include all waters, installations and the creek of Hanna bounded within 3 mile radius to seaward from the main breakwater light in position Lat. 25° 58′ 48.35″ N., Long. 56° 02′ 43.7″ E.

LOCATION: The Port of Mina Saqr is situated 15 miles by sea and 22 km. by road North of Ras Al Khaimah. On chart BA. 2888 it is 1 km. North of Hanna Creek in Lat. 25° 58′ N., Long. 56° 03.5′ E. Jubail Al Harim (6,843 ft.) overlooks the port, and is 10 miles East. The port is bounded by main and lee breakwater.

DOCUMENTS: Following documents to be forwarded to the Agents at least 7 days prior to the vessel's arrival:

3 copies Dangerous Cargo List.
2 copies Stowage Plans.
2 copies Hatch List.
6 copies Cargo Manifests.
1 copy each of Bills of Lading.

On vessels arrival, 4 copies of Crew Lists, 4 copies of Vaccination Lists, Crew Health Certificates, Ship's Certificates, etc. to be kept ready for inspection by the Officers.

PILOTAGE: Pilotage is compulsory. Pilot may board from launch or by tug at approach buoy (B and W pillar buoy Int. Qk. Fl.) in position Lat. 26° 00′ N., Long. 56° 02′ E. and in all cases a pilot ladder should be provided and a lee given. Pilot boards from 0600 hrs. to 2359 hrs., though generally vessels not wishing to work cargo immediately will not enter the port outside daylight hours. Vessels may leave up to 2359 hrs., or later by arrangement with the Harbour Master in special cases.

Master to contact "Ras Al Khaimah Port Control" on VHF Channel 16 at least 2 hours prior to arrival. ETA cables to be sent to the "Harbour Master MINASAQR Ras Al Khaimah" and also to Agents. Vessels to keep listening watch on VHF Channel 16 and await instructions from port.

ANCHORAGE: The area bounded by the port limits and to seaward of the main breakwater has been reputed as an area with good holding ground. Depths are from 11 m. to 14 m.

RESTRICTIONS: Vessels may enter or leave the port between 0600 hrs. and 2359 hrs. or later by arrangement with Harbour Master in special cases. No restrictions on entering during tides.

MAX. SIZE: No restrictions on breadth of a vessel but length not to exceed 800 ft. for easy berthing. Permissible draft in all the berths is 38 ft. Range of tide is maximum 1.6 m.

HEALTH: Normal quarantine regulations apply and Pratique is granted subject to Port Health Authorities' approval. The Health Officer boards the ship only when vessel alongside. Suspected disease or fever on board vessel to be reported to Harbour Master by cable prior arrival and await instructions.

RADIO: All cables to be routed through Bahrain Radio. Vessels should cable their Agent, at least 72 hours prior to arrival, the ETA, LOA, expected draft on arrival, cargo and hatchwise stowage.

VHF: Port equipped with VHF Radio standby Channel 16 with other working Channels, port working Channel 67. Port Signal Station is manned 24 hours a day and should be contacted at least 2 hours prior to vessel's arrival. Vessels should report the ETA, LOA, draft, details of cargo to be discharged, stowage, etc.

RADAR: Port not equipped with radar.

TUGS: Tugs join the vessel at anchorage, the practice being to secure alongside, using ship's lines. Derricks should be swung in and gangways hoisted. Tugs are fitted with VHF.

BERTHING: The harbour and entrance channel is 40 ft. MLWST. A draft limit is imposed of 38 ft. The harbour provides 165 acres of sheltered water and is enclosed by main and lee breakwaters. Deep water quays totalling 1,690 m. in length will provide berthing facilities for 8 ships. Included in this are 2 Ro/Ro ramps. Plans are now being developed for the installation of a container crane and supporting equipment.

The small boat harbour and fishing harbour provide a further 725 m. of quay, and offer a dredged depth of 15 ft.

All the 8 berths, including 2 Ro/Ro berths are now in operation.

Distance between quay and water level maximum 3.8 m. at LW and 2.2 m. at HW.

Discharging to be carried out using ship's gear. All berths are general cargo berths. Berth Nos. 3 and 5 have ramps for Ro/Ro vessels.

CRANES: No shore cranes available at berths therefore vessels calling should be self-sustaining. Mobile cranes of various capacities available locally for hire if required. No floating cranes available at present.

BULK CARGO FACILITIES: No special berth allocated for discharge of bulk cargo. Bulk cargoes handled at present are iron ore, gypsum, bauxite, clinker and aggregates, and vessels with these cargoes are allotted any of the general cargo berths subject to availability. No conveyor system or special equipment exist at present and as such cargo is discharged using vessel's derricks.

SPECIALISED CARGO HANDLING FACILITIES: 2 berths, Nos. 3 and 5 with ramps to accommodate Ro/Ro vessels. There is also one berth for bulk cement loading (Berth No.7). Length 200 m. Max. draft alongside 11.5 m.

BRIDGES: Nil.

STEVEDORES: Advance ETA cable to be sent by Master to the vessels' Agents to order required gangs to work on board vessels. Labour gangs are supplied by local contractors, (who can be contacted via the Signal Station) and the gangs work on board the vessel directly under the supervision of the vessel's Officers with the stevedoring companies accepting no responsibility whatsoever for any damage either to the vessel or its cargo.

Working Hours: 0700 – 1400 hrs. and 1500 – 2100 hrs.

MEDICAL: Advisable for Agents to receive at least 24 hours' advance notice of required medical attention but can also attend to this at short notice. Hospital facilities are available. Officers/Crew should have valid Cholera and Yellow Fever Certificates.

TANKERS: No tanker berth in port or offshore. Tankers will discharge at Berth Nos. 1, 2 and 3 through bunker line – this will be fuel and diesel oils only. Fuel line 12 in., diesel line 8 in. and 6 in. hose.

DENSITY: 1025 – 1027.

FRESH WATER: Fresh water available in Berth Nos. 1 to 6 with 2 points to service tanks fore and aft as required on a 24 hour basis. Cost of water will be Dh. 7/– per ton.

FUEL: Fuel oil, marine diesel oil, and gas oil can be supplied through RAK Refuelling (Shell) or E.G.P.C. Telephone and telex numbers are available through the Port Signal Station. All sizes of reducers are available and pumping rates are fuel oil 200 t.p.h. and gas oil 250 t.p.h. – 300 t.p.h., subject to vessel's receiving capacity. Presently there are 6 bunker points in Berth Nos. 1, 2 and 3.

Marine lubricants of all brands can also be supplied provided nomination through the suppliers is received sufficiently in advance.

FIRE PRECAUTIONS: The port has its own auxiliary fire brigade and, when required, the services of the Ras Al Khaimah Fire Brigade are available.

CONSULS: None at this port but most of the consulates can be contacted at Abu Dhabi or Dubai.

REPAIRS: Few facilities are available at present but planned for the future. Fully equipped engineering workshops capable of carrying out fairly extensive repairs operate a 24 hour maintenance or repair service and are available from Dubai.

DRY DOCK: No drydock in Mina Saqr. The nearest drydocks are at Ajman and Dubai.

SURVEYORS: Lloyd's, ABS, NV, Salvage Association and representatives of various classification bureaux and private surveyors reside in Dubai. Various cargo inspectors available in Dubai.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

HATCHES: Opening/closing of the hatches to be carried out by the crew with the assistance of the stevedores, if necessary.

CUSTOMS ALLOWANCES: Normally, bonded stores are not sealed by the Customs Authorities. However, only limited stock should be left with the Officers/crew for their consumption on board vessel and the rest should be kept locked under the custody of the Master. Sale of bonded stores is strictly prohibited and persons indulging in this will be punished according to local custom.

REPATRIATION: Efficient crew changes and repatriation can be carried out on receipt of advance information.

AIRPORT: Ras Al Khaimah International Airport, situated about 45 km. South of Mina Saqr, operate daily flights to various destinations.

TIME: Local time is GMT plus 4 hours.

HOLIDAYS: Normal Muslim holidays during which time port working hours will be restricted. Fridays are the weekly holidays.

POLICE/AMBULANCE/FIRE: All police, fire and ambulance emergencies should be notified on 999. General telephone numbers are: 29351 for Police, 26668 for Ambulance and 21212 for Fire.

TELEPHONES: No telephones available for placing on board vessels. However, a telephone is available in the Port Signal Station 24 hours a day.

For international calls, Agent's offices situated outside port area should be used. Ras Al Khaimah has excellent communication to most countries as it has its own earth satellite station.

SERVICES: Ship chandlers, laundry, exchange of films, etc. available in Ras Al Khaimah. Radio/radar repairs, tank cleaning equipment, scamping (underwater cleaning) facilities, etc. can be arranged from Sharjah/Dubai.

BANKS: British Bank of the Middle East, P.O. Box 9, Ras Al Khaimah. Tel: RAK 28214.

National Bank of Ras Al Khaimah (P.S.C.), P.O.Box 5300, Ras Al Khaimah. Tel: 21127.

STORING: See "Prelims" page viii.

1. By truck or barge.
2. No restrictions.
3. Yes.
4. Yes.
5. None.
6. Yes.

SHORE LEAVE: Can be granted and for this purpose the Agents should hand over a crew list to the Immigration Department who will issue shore passes in exchange for seaman's book or passport. Prior to vessel's departure, Master to ensure that all shore passes are handed over to the Agents who will surrender them to the Immigration Department, seaman's books/passports will then be returned. Agents should advise Immigration Department by letter if any crew changes to be effected.

REGULATIONS: None.

DELAYS: No berthing delays.

DEVELOPMENTS: An additional bulk cement faculty at Berth No. 9 will be constructed in 1984, to handle white cement.

AUTHORITY: Ras Al Khaimah Port Services, P.O.Box 5130, Ras Al Khaimah, U.A.E. *Tel:* RAK 66444/66250. *Telex:* 99280 EM. *Cables:* Minasaqr. *Contact:* Captain K. J. Radley, Port Manager.

AGENT: International Shipping Agencies (Ras Al Khaimah) Pvt. Ltd., P.O.Box 5162, Ras Al Khaimah, U.A.E. Cables: "Isaship", Ras Al Khaimah. Telex: 99226 ("Isarak EM"). Tel: 21266, 21966. After office hours 21929.

MINA ZAYED, Abu Dhabi: 24.32 N. 54.23 E.
(See Plan Book)

COURTESY FLAG: Vessels calling at ports in the State of Abu Dhabi should fly the flag of the United Arab Emirates as a courtesy flag.
DOCUMENTS: 10 copies of Cargo Manifest are required, with full cargo particulars, such as Bill of Lading number, marks/numbers, description, weight and measurement and IMO class if any. It is essential that all this information against consignee/notify parties name, full contact address is given on the manifest for each consignment. The manifests should reach the Agent prior to arrival of vessel in order to be submitted to the Port/Customs Authorities 48 hours before the ship's arrival.

Also stowage particulars should be submitted with the manifest in order that the Agent may advise the Port Authorities of the equipment and labour required for efficient handling of the vessel.

Customs Require:
1 Copy Crew List.
1 Copy Stores List.
Immigration Require:
2 Copies Crew List.
2 Copies Passenger List, if any.
Quarantine Require:
Crew List
International Health Certificate.
Vaccination List.
Other Requirements:
Last port clearance, ship's log must be kept in order, 1 passport size photograph of each crew member for gate pass.

PILOTAGE: Pilotage is compulsory for all vessels entering/leaving Mina Zayed. Pilots will board incoming vessels within a radius of 1 nautical mile seaward of the Fairway Buoy (Lat. 24° 36′ N., Long. 54° 18.4′ E.). Ships should wait for Pilots in the area stated above and not enter the channel unless instructions to the contrary are given. Pilotage 24 hours. Ship's Agent pays for the services of Pilots, mooring gangs and tugs, which are provided by the port.
ANCHORAGE: Recommended anchorage for ships over draft of 9.45 m. is approximately 1 mile N.E. of Abu Dhabi Racon and for ships up to 9.45 m. draft approximately 0.9 miles S.W. of Alpha Buoy in position Lat. 24° 35.5″ N., Long. 54° 18.93″ E.

Also see "Shipmaster's Report".

RESTRICTIONS: The old (152 m. wide and 9.45 m. deep) channel has been abandoned and the new channel is 250 m. wide, marked by red and green buoys in accordance with "IALA" Maritime Buoyage System "A" now in use. The channel has a depth of 13 m., the tides are diurnal. Tides ranges are maximum 2.04 m. (6.7 ft.) and minimum 0.09 m. (0.3 ft.). during Spring High and Low Waters respectively.

Also see "Shipmaster's Report".

MAX. SIZE: Max. LOA 750 ft. However, the Port Authorities may consider allowing entry to larger vessels if they are equipped with any of the following:
1. Bow thruster } Confirmation from Harbour Master will be
2. Twin screws } necessary prior to vessel's arrival.

Draft permitted without tide 9.75 m. (32 ft.). Draft permitted using high tide 10.36 m. (34 ft.) subject to vessel's speed, etc. Prior permission to be obtained from Harbour Master.

Note: Permissible draft may further increase after clearing the patches of the area of 6 km. between fairway buoy and delta buoy.
RADIO: Vessels are to give their ETAs by cable through Muscat or Bahrain Radio, addressed to "Port Authorities – Port Zayed, Harbour Office". Telex 22890 Portco Em, at least 72 hours prior arrival.
VHF: Port Zayed Port Control work 24 hours a day, information to be given on VHF Channels 9, 11 and 67, as required by Port Control after establishing contact on Channel 16.
TUGS: 4 harbour tugs available, 2×2,400 h.p. and 2×1,280 h.p. Tug requirements are at discretion of the Pilot.
BERTHING: Nos. 1, 2 and 3 for container vessels, depth 10.5 m. A.C.D.
No. 4 for general cargo vessels, depth 10.5 m. A.C.D.
Nos. 5 and 6 for general cargo vessels, depth 9.75 m. A.C.D.
No. 6 - W for small bitumen vessels, depth 9.75 m. A.C.D.
Nos. 7, 8 and 9 for general cargo vessels, depth 9.75 m. A.C.D.
Nos. 10 - 13, depths 3 m. to 5.8 m.
No. 14 open quay normally used for Ro-Ro car carriers, depth 11.5 m.
Nos. 15 - 18 for general cargo vessels, depth 11.5 m. A.C.D.
No. 19 for bulk grain vessels, depth 11.5 m. A.C.D.
(Nos. 4, 5, 6, 7, 8 and 15 - 18 with sheds.)
Nos. 20 – 24, depth 10.5 m. A.C.D.
Nos. 25 – 29, depth, 13.0 m. A.C.D. (To be constructed).
CRANES: Cranes for discharging available. Mobile cranes from 5 - 150 tons available. Berths 4 - 6 have 6 electric cranes (5×5 ton, 1×10 ton). Forklifts available on request.
CONTAINER HANDLING FACILITIES: The terminal has been constructed on two wharves 450 m. long. It includes large storing facilities and is equipped with the most modern machinery (2×40 tonnes gantry cranes with outreach of 30 m., 2×40 ton yard cranes, 4×40 tons, 2×15 tons, 2×8 ton fork lift trucks, 2×40 ton stradle carriers.
STEVEDORES: Arranged through Agent, labourers work under direct supervision of vessel and her officers. Normal working hours for stevedore labour are from 0700 hrs. to 2230 hrs. No floating cranes for heavy lifts but mobile crane of 150 tons capacity available for hire for shore work. Floating crane can be arranged with sufficient notice. Reasonable tariff for handling container, ro/ro, car-carrier also priority for berthing container, ro/ro, car-carrier vessels. Skilled manpower available for all kinds of cargo operations.

Container Terminal operates 24 hours.

MEDICAL: Fully equipped Government hospital. Qualified personnel, and most medicines available.
TANKERS: See "Das Island", "Umm Al Nar" and "Jebel Dhanna – Ruwais".
FRESH WATER: Available at all berths in moderate quantities.
FUEL: Diesel oil and gas oil is available by barges.
FIRE PRECAUTIONS: The harbour tugs are fitted with fire-fightin equipment and in addition Port Zayed Fire Brigade are availab 24 hours a day.
LAUNDRY: Reasonably good laundries available.
PROVISIONS: Can be arranged through ship's notice to Agent.
AIRPORT: Regular scheduled international flights, also domestic flight within Gulf area.
TIME: GMT plus 4 hours.
HOLIDAYS: Friday is weekly holiday. Otherwise usual Muslim holidays observed. Cargo work generally not affected by holidays.
SHORE LEAVE: Permitted. A permit can be obtained from Immigration Department. Absolutely necessary that every crew member be i possession of valid seaman's book.
GENERAL: *Vessels discharging cargo at anchorage:* Anchorage ETA required: The Port Authority should like to draw the attention of a shipping agencies in Abu Dhabi, to supply the Traffic Department wit the date of arrival of ships which are going to discharge their cargo a anchor.

To enable the Traffic Department to take the necessary action and t render the required facilities, it is necessary that manifests, documents relating to cargo and the date of arrival should be forwarded 48 hours before the actual arrival of ships.

CLEARANCE: Port clearance must be obtained prior to departure.
DEVELOPMENTS:

1. The new U/Nar refinery channel 11 m. (B.C.D.) is almost completed and major section of this from South of Sadiyat to the Refinery Basin has been buoyed.

2. The Musaffa channel from Ras Al Akhdar to Musaffa Bridge with 6 m. (B.C.D.) has been buoyed to permit safe night navigation for craft going to/from the Industrial Area of Musaffa.

3. Development of Dhow Harbour (2,000 nm. quay) with 6 m. (B.C.D.) has been completed and its approaches and entrance buoyed to permi night navigation.

4. Construction of 2 new container berths to cater to the needs o future container vessels up to 13 m. draft is envisaged to be taken i hand shortly.

SHIPMASTER'S REPORT: February 1984

A navigational change has taken place in the Port of Abu Dhabi. There is danger while approaching Abu Dhabi port, due to the fact that they have recently changed the position of Abu Dhabi light vessel. The change took place in January 1984, so the last edition of British Amiralty charts are not corrected.

We loaded in Europe for Abu Dhabi, Karachi and Bombay. During our stay in Europe we were provided with last edition British Admiralty charts for discharging ports including B.A. chart No.3752 titled "Jazirat Sir Abu Nu'Ayr to Abu Zabi". We arrived in Abu Dhabi on February 9th, 1984. The above chart had the following small corrections for 1982 -897-1315-1896-2555-2681 and for 1983 -1214-(5-5)-1684-1686-3049. The position of the Abu Dhabi Racon equipped light vessel on the chart was Lat. 24° 43.5′ N. and Long. 54° 16.2′ E. From that charted position they have shifted the light vessel 4 miles in S.W.'ly direction, thus the new valid position is as follws: Lat. 24° 40.0′ N. and Long. 54° 12.2 E.

Our Agent did not advise us of change, though Port Control does advise incoming vessels.

The land is very low and no position can be established by radar, the Racon equipped Abu Dhabi light vessel is the only reliable target. Therefore incoming vessels are exposed to the risk of grounding because of shallow waters and vessels with draft of 30 ft. and over can be berthed only by HW.

AUTHORITY: Government of Abu Dhabi, Abu Dhabi Sea Port Authority, P.O.Box 422, Mina Zayed, *Tel:* 823360. *Telex:* 22890 Portco Em. *Contact:* Sager Bin Seif El-Meheirbi, Under Secretary.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.B. 377, Abu Dhabi, U.A.E. Cables: "Confidence", Abu Dhabi. Tel. 334300 (10 lines). After office hours Tel. 828388, 326998, 326083. Radio: Marine VHF radio, stand-by on Channel 16 (156.8 MHz) and Marine HF, standing by on 3539 kHz. Call sign "Confidence, Abu Dhabi", Telex: 22248 ("Gacauh EM").

MUBAREK TERMINAL, Sharjah: 25.49 N. 55.11 E.
(See Plan Book)

LOCATION: The Mubarek Oil Terminal is situated off the island of Abu Musa, and is under the jurisdiction of the Emirate of Sharjah and operated by the Crescent Petroleum Company.
DOCUMENTS: One Crew List and valid Health Certificate.
EARLY DEPARTURE PROCEDURE: In force. Vessel's Agent signs all documents on behalf of the Master including Bills of Lading.
PILOTAGE: Vessels to be moored, anchored or manoeuvred at Mubarek Oil Terminal will be boarded by Company Mooring Master in the close vicinity of the suggested anchorage area. Vessels must not enter the restricted limits of the terminal unless a Company Mooring Master is on board.

Ships are requested to have a pilot ladder safely and securely rigged and ready for immediate use and long enough to reach the Company Mooring Master's launch. A combination of pilot ladder and ship's accommodation ladder so arranged that personnel can first use pilot ladder until part way up the vessel's side and then transfer to the accommodation ladder is recommended, especially on very large ships. There should be adequate lighting at night. Vessels will provide a lee for the Company Mooring Master's launch when boarding and leaving.

The Company Mooring Master may require the vessel to anchor at any time he deems it necessary for the safety of the vessel or moorings or both or for infringement of the terminal regulations.

The Company Terminal Superintendent shall be the sole authority as to when the terminal is open or closed for normal working due to weather conditions.

NAVIGATION AIDS: A floating barge named *Baraka 1* (82,000 d.w.t.) 546 ft. long, used for storage of crude oil and for accommodation and headquarters of terminal personnel lies permanently moored in position Lat. 25° 49′ 43″ N., Long. 55° 11′ 49″ E. approximately 065°×6,000 ft. from the terminal's single buoy mooring. *Baraka 1* is equipped with normal navigational warning lights and aids as required by convention and in addition, a Racon beacon in position 25° 49.7′ N., 55° 11.8′ E.

A fixed oil production platform, incorporating crude oil treating facilities, rises approximately 50 ft. above water at Lat. 25° 50′ 43″ N., Long. 55° 11′ 49″ E., approximately 000°×6,079 ft. from the aforementioned *Baraka 1*. Said structures are equipped with 1 clear light flashing "U" code on each corner and a fog horn operating 2 seconds on and 18 seconds off. A permanently fixed flare structure (tripod) rises 150 ft. (flare tip) above water at Lat. 25° 50′ 56″ N., Long. 55° 12′ 00″ E., approximately 037°, 1,716 ft. from the oil production platform.

READINESS: Notice of Readiness will not be accepted at time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered the time the Company Mooring Master boards the vessel, or the time the vessel is within the approved anchorage area, whichever occurs first. Notice of Readiness is to be in English.

ANCHORAGE: An anchorage area diameter 6,000 ft. has been established with the centre in position Lat. 25° 46′ 45″ N., Long. 55° 13′ 13″ E.

When arriving by day display flag "Q"; by night display Red Light over White Light for Quarantine Service.

RESTRICTED AREA: A restricted area of approx. 38 sq. miles has been established with a boundary formed by an imaginary line from:

(*a*) 25° 54′ 26″ N. 55° 13′ 49″ E. in a W.S.W. direction to
(*b*) 25° 15′ 14″ N. 55° 07′ 19″ E. thence in a S.S.E. direction to
(*c*) 25° 46′ 33″ N. 55° 09′ 37″ E. thence in a E.N.E. direction to
(*d*) 25° 49′ 44″ N. 55° 16′ 08″ E. thence in a N.N.W. direction to the position above.

RESTRICTIONS: Max. distance bow to manifold 580 ft.

MAX. SIZE: 350,000 d.w.t.

HEALTH: When arriving fly "Q" flag by day, and red over white light at night.

RADIO: Initial communication by radio between ship and Crescent Petroleum Company should be via Bahrain Radio, call sign "A9M", which operates on a 24 hour basis or directly by telex to 68015 CRESPT EM.

Company Mooring Master will have sole control of radio installations during the period a vessel is manoeuvring or moored, and no radio transmissions will be permitted on board ship except by the express permission of the Mooring Master in each case, only the Mooring Master may transmit on Channels 71 and 17 during the period he is on board. He will have a VHF radio telephone with him.

Mubarek Oil Terminal Radio Station call sign "Crescent – 2" particulars are as follows:

Operated by Crescent Petroleum Company, Sharjah, position: Lat. 25° 49′ 43″ N., Long. 55° 11′ 49″ E.

Frequencies: Channels 71 and 17 on VHF.

Hours of operation: 24 hours per day.

Mubarek Oil Terminal Control Centre keeps continuous watch on VHF radio telephone Channel 71. Vessel approaching the terminal not having Channel 71 will be contacted on Channel 16 when the terminal will request her to switch to an alternate channel.

Channel 17 is reserved for communications between ships in moorings and Mubarek Oil Terminal Movements Control Centre. This is a safety measure since oil flow to ships is controlled through Channel 17, which therefore must be clear at all times in case of need to stop oil flow for any cause.

Channel 16 is for calling and safety use only.

In emergency failure of Radio and/or Radio Telephone communication daylight lamp signalling may be used with the Oil Movements Control Centre located on *"Baraka 1"*.

It is most important that ships establish communications with the terminal not less than 72 hours prior to arrival at the terminal giving ETA. Further ETA signals should be sent when the vessel is 24 hours, 12 hours and 4 hours distant, or any time a change of 1 hour in original ETA occurs. These messages should state specifically whether ETA is given in GMT or Local Time. The 72 hour signal should include the following:

ETA.
Last Port of Call.
If any Sickness on Board.
If vessel has Clean Bill of Health.
Cargo quantity and Grades expected to be lifted in long tons.

The 12 hour signal should include definite indication as to whether the vessel is ready to load or not and should also include information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distant from the terminal.

Unreasonable insufficiency or inaccuracy in ETA messages may alter the order of berthing of ships to the advantage of those ships giving sufficient and accurate ETA messages. Acceptance of Notice of Readiness will also be affected by such insufficiency or inaccuracy.

On receipt of first signal from a vessel, terminal will transmit a message to her giving preliminary requirements of terminal. Masters are urged to comply with this in all details in order to facilitate vessel turnaround and government formalities.

TUGS: The Company maintains launches to assist in mooring and unmooring vessels. These are under the direct supervision and control of the Company Mooring Master.

BERTHING: Vessels to load crude oil cargo will be normally accepted and berthed in chronological order of arrival provided such vessels have current nomination for cargo valid at the time of tender, carry clean ballast if any, and have cargo tanks in a fit condition to receive cargo. Also, they must be in all respects properly equipped and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

Vessels required to leave the terminal area on account of bad weather should keep in contact with the terminal via the Company radio station at Mubarek Oil Terminal, call sign Crescent-2, in order that they may be available when the weather is fit for resumption of operations. The Company reserves the right to load vessels out of turn following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. Further the Company reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading even though the terminal may be open to other vessels.

The Company Terminal Superintendent's decision on this will be final.

S.P.M.: The single point buoy mooring berth (SBM), 11 m. in diameter and located in 163 ft. of water, is designed to handle tankships in the 350,000 d.w.t. class. ASA 150 pound flanged connections and one 20 in. floating hose, reduced to 12 in. Tanker Rail Hose for connection to export tanker's loading manifold, the length of hose being 965 ft.

Average loading rate is 16,000 b.p.h. The SBM is also provided with one permanently attached 21 in. circumference synthetic fibre floating mooring line.

EQUIPMENT: Vessels must have suitable winches or capstans in good operating condition on the forecastle deck. Constant tension type winches may not be used except when they can be solidly locked and the constant tension feature not used.

All vessels should have ready messenger lines on forecastle head for bringing the mooring line aboard from single point mooring (SBM).

Mooring winches on forecastle head for handling one 12 in. circumference synthetic fibre floating pick-up line from SBM.

Adequate chafing gear to prevent damage to mooring line.

Adequate mooring bitts to secure mooring line.

Hose lifting winch, derrick and gear rigged for 7.5 tons.

HOSES: After the vessel is securely moored the cargo hose will be hoisted on the port side. The hose is lifted by ship's gear and crew, and all connecting of the hose will be done by them. The lifting derrick, equipment tackle, etc., should be topped off and ready on arrival. Terminal loading hose is fitted with ANSI 150 pound flat face 12 in. "camlock" coupling and ships should have adapters and fittings to enable this hose to be connected to the ship's manifold. The Company Mooring Master advises the ship's personnel in hose lifting and connecting procedure; however, a deck officer must be present and must direct the ship's crew in all handling. The Company Mooring Master may reject a ship for unsatisfactory hose handling.

Do not close valves against crude flow.

Emergency flow stop signal if all communications fail will be a continuous sounding of the ship's whistle from either export tanker or *Baraka 1*.

CARGO SPECIFICATIONS:

Approx. Mubarek crude specifications:

Gravity	39° A.P.I. (approx.)
Sulphur	0.6%
B.S.&W.	Two tenths of one per cent or less by volume.
Metals	Not in excess of trace (100 PPM).
Viscosity	52 SSU at 120° F.
Flash Point	Below ambient temperature.
Pourpoint	30° F.
H_2S	Present

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Various consulates are located in Abu Dhabi and Dubai.

REPAIRS: No repairs, painting, etc., are to be made while berthing unberthing or in the berth.

CUSTOMS: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs seal from time of arrival of ship until time of leaving territorial waters.

TIME: Local time is GMT plus 4 hours throughout the year.

SERVICES: No supplies of any kind and no medical services (except in case of emergency and subject to a doctor being available), or other services are available at Mubarek Oil Terminal.

SHORE LEAVE: Not permitted.

GENERAL: *Light Dues:* The Middle East Navigation Aids Service (MENAS) charges light dues according to the size of the vessel and the number of visits to the Gulf during the year.

Positively no provision is made for dirty ballast: Any ship arriving with dirty ballast will be rejected and all costs accruing therefrom will be to the ship's account. Notice of Readiness shall not be accepted until vessel returns with clean ballast and tanks fit to receive cargo. She will on second arrival tender a new notice of readiness to load.

Fire towing wires required fore and aft.

No swimming permitted whilst vessel in berth.

No fishing permitted at the berth or within the restricted navigation area.

SHIPMASTER'S REPORT: December 1979.

Pilotage: Pilot flies out from Sharjah by helicopter and he carries out all entry procedures. He will also take mail ashore for delivery to vessel's Agents. Mail must be placed in one envelope, addressed to Agents and marked ship's mail.

Tankers: Loading rate commences at 1,000 t.p.h. and when everything satisfactory increased to max. 2,000 t.p.h. Normal parcel is 350,000 bbls. ±0.0%. If vessel requires a plus % then give a Note of Protest to the Pilot.

AUTHORITY: Crescent Petroleum Company, P.O.Box 211, Sharjah, U.A.E. *Tel:* Sharjah 22801. *Telex:* 68015 Crespt EM. *Cables:* "Crespt Sharjah". *Contact:* Port Captain.

AGENT: Gulf Agency Co. (Sharjah) Ltd., P.O.B. 435, Sharjah, U.A.E. Cables "Confidence", Sharjah. Telex 68019 ("Gacshj EM"). Telephone: 544446. After office hours 355676, 354249.

MUBARRAS ISLAND, Abu Dhabi: 24.26. N. 53.32 E (HALAT AL MUBARRAS) (See Plan Book)

FLAG: All vessels calling at Mubarras are required to fly the national flag of U.A.E. which are available from ship's Agent.

LOCATION: Mubarras Island is located approximately Lat. 24° 28′ N., Long. 53° 22′ E., some 55 miles West of Port of Abu Dhabi.

The island constitutes export terminal of crude oil produced by Abu Dhabi Oil Company Limited (Japan). Crude oil produced from the Company's Mubarras oilfield is transported to Central Facilities Platform (CFP) situated approximately 19 miles E.N.E. of Mubarras Island by 4 in. to 14 in. flowlines, thence relayed by a 18 in. transmission line to the Island. The Company has tank storage for 1,548,000 barrels of crude oil on the island.

Additional storage tanks for crude oil under construction, expected to be ready mid-1983. Capacity 660,000 bbls.

Tanker loading is accomplished by means of a single-buoy-mooring (SBM) system installed about 8 miles offshore East of the Island.

Average API Gravity of crude oil to be located is 36.5° and flash point is below 35° Fahrenheit.

PORT LIMITS: The port area of Mubarras and its approaches cover the area bounded by straight lines connecting the following points:

(a) Lat. 24° 30.0′ N., Long. 53° 36.0′ E.
(b) Lat. 24° 24.0′ N., Long. 53° 36.0′ E.
(c) Lat. 24° 24.0′ N., Long. 53° 27.0′ E.
(d) Lat. 24° 26.7′ N., Long. 53° 21.7′ E.
(e) Lat. 24° 30.0′ N., Long. 53° 21.7′ E.

Masters of all vessels entering the Port must follow instruction from the Company's Port Master as to approaches, anchoring, berthing and unberthing.

APPROACHES: *Approaches to Mubarras:* Japanese Charts No. 3173 and No. 3174 cover the approaches to Mubarras. For tankers arriving at Mubarras without necessary charts full information shall be given by telegram if a request is sent to "Confidence" Abu Dhabi via "GNV" Bahrain radio a few days before arrival.

Alternatively, if the vessel has VHF, the buoy positions shall be given to her upon request to "Mubarras Terminal" as she approaches but prior notice of requiring this service should be given in the vessel's arrival message.

Charts: The following charts are recommended for use in Abu Dhabi waters:

Japanese Chart Nos. 3173 and 3174
British Admiralty Chart Nos. 3733, 3734, 2889 and 3716.

Approaches to Mubarras – Navigational Aids:

Buoy Nos.	*Latitude North*	*Longitude East*	*Colour*	*Light Character*
Mubarras Approach	24° 57.00′	53° 18.39′	Red	Fl. R. ev. 5 sec.

Anchorage Position	Lat. 24° 26.80′ N.	Long.53° 34.00′ E.
S.B.M. Position	Lat. 24° 25.98′ N.	Long.53° 31.54′ E.

Navigation in Shallow Waters: There are some shoals with depth of 14.9 m. (49 ft.) in the area between Buoy No. 14 and No. 15. Masters of outgoing vessels should pay due consideration to the effect of squat a speed on vessel's draft in the shallow water, bearing in mind vessel's trim.

Conspicuous Marks: Quick flash White navigation lights (visibility range 5 miles) are fixed on following platforms and the flare stacks adjacent to each platform are visible from distance:

MR-6 Platform	Lat. 24° 35′ 44″ N.	Long. 53° 43′ 53″ E.
CFP	Lat. 24° 30′ 09″ N.	Long. 53° 42′ 09″ E.
AA Platform	Lat. 24° 26′ 15″ N.	Long. 53° 39′ 53″ E.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
2 Manifests.
1 International Maritime Declaration of Health.

PILOTAGE: Pilot is provided by the Oil Company at the request of the vessel's Master based on express understanding and condition that he is aboard the vessel for the purpose of assisting the Master and becomes, for such purpose, the servant of the owners of the vessel.

It is recommended that the Master of the vessel calling at Mubarras for the first time requests Pilot to go aboard the vessel for both inward and outward passage of the channel. The Pilot will normally board the vessel in the vicinity of No. 5 Buoy and will advise the Master on approaches to the berth and he will remain on board to act as Mooring Master and direct loading operations.

Mooring Master: The Mooring Master provided by the Company will undertake pilotage, mooring and unmooring of the tankers.

The Mooring Master shall board vessels to be moored at SBM in the anchorage area or in the vicinity of No. 17 Buoy. The Mooring Master will advise the Master of vessel on approaches to the SBM, mooring, unmooring, connecting and disconnecting hoses and all other operations within the port area. All manoeuvring of vessels within the port area shall be done only in accordance with the advice of the Mooring Master, subject to the understanding that in all cases and circumstances the Master of the vessel shall remain solely responsible for the safety and proper manoeuvring of the tanker. Master or one of his qualified deck officers must be on the bridge at all times while the vessel is being manoeuvred.

ANCHORAGE: The tanker anchorage is within 0.5 miles radius of Lat. 24° 26.8′ N., Long. 53° 34′ E. Depth of water varies from 15.5 to 18 m. (50 ft.to 59 ft.) The sea bed all around the anchorage is coral with approximately 6 ft. of loose sand. Holding is poor and a vessel is advised to pay out at least six shackles of chain.

Vessels will be advised by radio of a suitable anchorage if both anchorage and the berth are not immediately available. Vessels should under no circumstances anchor or wait at the South area of Lat. 24° 57′ N. without obtaining prior approval of the Port Master.

Anchorage for Dry-cargo Ships: Anchorage for dry-cargo ships is directed by Port Master by VHF radio.

Prohibited Area for Navigation and Anchorage: The area within 1.15 miles radius from CFP is prohibited for navigation and anchorage. No vessels shall anchor within the range of 1.5 miles from submarine pipe-lines.

MAX. SIZE: See "Approaches" – depth over shoal areas; also see "Tides".

HEALTH: Vessels arriving at Mubarras Terminal must carry the usual Bills of Health for ports visited on the voyage. Masters of vessels are requested to inform the Company if there is any person ill on board or if there has been sickness within the week prior to arrival.

Pratique is usually granted by Port Medical Officer through the Mooring Master or Agency Clerk.

RADIO: *Notice of Arrival:* Vessels should advise their ETA Mubarras at least 72 hours and again 24 hours before arrival through normal radio service. As an alternative to the route through Bahrain Radio Station (GNV) vessels may send their first message through Singapore or Bombay.

Confirmation of ETA should be made a few hours before arrival at "Approach Buoy" by calling "Mubarras Terminal" on Channel 16 VHF. After anchoring, vessels should advise their time of anchoring through VHF and thereafter maintain a continuous listening watch on Channel 16 until the Company's Mooring Master boards.

Tankers bound for Mubarras should advise their ETA and other information 72, 48 and 24 hours before arrival.

Vessels may find it helpful to route their first message through Singapore, Bombay or Bahrain Radio Station. All cables should be addressed to the Company through ship's Agent.

The first message should be sent according to the following form, but any items which are the same with a recent previous voyage to this port may be omitted.

(1) ETA Mubarras.
(2) Last Port.
(3) Next Port.
(4) Deballasting time.
(5) Quantity of cargo required.
(6) Maximum loading rate.
(7) Diameter of cargo manifold.
(8) Distance from manifold to ship's side.
(9) Derrick capacity.
(10) Diameter of fairlead.
(11) Name of Master.
(12) Number of crew.
(13) Whether Pilot is required or not.

Radio Station in Mubarras Terminal Office.

Short-range communication to Mubarras Terminal Office can be made by calling "Mubarras Terminal" on VHF radio telephone. Vessels should inform the office with their ETA preferably when they pass the Strait of Hormuz. After anchoring, vessels should advise anchoring time and maintain a listening watch on Channel 16 until Mooring Master boards.

Call Sign: "Mubarras Terminal".

Frequency:	*Reception*	*Transmission*
F3	Channel 16	Channel 10, 12, 14

Operating Periods: Round the clock.

BALLAST: All vessels arriving at this port are required to have on board sufficient clean ballast to give a safe draft for manoeuvring purposes. Vessels arriving with insufficient ballast may be required to increase the quantity, should the Mooring Master consider that it would not be safe to berth the vessel for loading. As a general rule, vessels shall not start discharging ballast until mooring is completed.

Upon completion of deballasting the Mooring Master will inspect the tanks. If the tanks are not satisfactory, he may require further pumping until such time as they meet the required standard.

It is strictly prohibited to discharge oil, oily water or other refuse that may result in pollution of the sea. International oil pollution regulations must be strictly observed by all vessels. *The terminal does not have facilities to receive oily ballast.*

TUGS: Following vessels are always available for use for marine operations at this port.

Name of Vessel	*G.R.T.*	*B.H.P.*	*Spd. (kt)*
No. 1 Union (Tug/workboat)	499	1,120×2	12
No. 2 Union (Passenger boat)	50	480×2	14
No. 3 Union (Mooring boat)	25	195×2	11

BERTH: *Position of Buoy:* Lat. 24° 25.98′ N., Long. 53° 31.54′ E. *Depth of Water,* 15.5 m. (50.85 ft.).

The berth is a single-buoy-mooring system consisting of a buoy 44.32 ft. (13.5 m.) in diameter, moored to 6 pendant legs of 3 in. high strength chain shackled to anchor piles at a radius of 855 ft. (260 m.), and having a rotating deck carrying the pipe-line and mooring connections.

One 32 in. crude oil line has been laid approximately 52,500 ft. (16 km.) from the shore to a position close under the buoy. From the underwater manifold the crude oil goes to the buoy through a 20 in. underwater hose. The connection between turntable piping of SBM and tanker manifold consists of 1 hose string composed of 24 in. and 20 in. (Length 770 ft.) floating hoses and 2 hose strings composed of 16 in. (Length 120 ft.) tail hoses.

LOADING: The maximum loading rate of crude oil is 40,000 bbls./hr. or 6,400 kl./hr.

Notice of Readiness: The Master of each vessel should present a Notice of Readiness to load to the Company's Mooring Master who will sign it on behalf of the Company.

The Notice of Readiness should be tendered at the time of the vessel's arrival at the tanker anchorage area, which is, in principle, understood to be either the time of dropping the anchor in the anchorage, or, if the vessel does not anchor, the time that the Mooring Master boards to commence berthing.

The vessel, however, is prohibited from berthing unless she reaches No. 5 Buoy at least 5 hours before the sunset, and Notice of Readiness will not be accepted until the next sunrise even if the vessel has already anchored in the tanker anchorage area.

Notice of Readiness will not be accepted during periods when the port is closed. The port is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with Port Master.

When the vessel is ready in all respects for loading the ship's officer must inform the Mooring Master who will transmit the necessary messages to the control room on shore. Mooring Master is authorised to control all the loading operations.

All cargo documents and shore figures are usually prepared on board and the Mooring Master will sign the documents on behalf of the company.

MOORING: The Company reserves the right to refuse to accept for berthing or loading any vessels considered unsuitable by reason of inadequate or unsatisfactory mooring equipment, insufficient derrick capacity, unusual manifold connection, inability to comply with the Safety Regulations, or any circumstances which would create unusual risk to the Company's berth, facilities, personnel and equipment whatsoever.

Preparation: Before Mooring Master boards, vessels should have ready the following:

(a) Jacob's ladder on lee side.
(b) Hawser 1 each at fore and aft deck, polypropylene if possible.
(c) 1 steel crowbar.
(d) Port derrick with double wire rigged for minimum lift 5 tons.

After vessel is anchored, the Company's mooring and hose connection crew will board and pick up mooring and hose connection materials from tug/workboat. Vessel is requested to provide windlass and winch operators.

Mooring at Berth: Unless pilotage is required the Mooring Master will board the arriving vessels in the anchorage area. Vessels are requested to have pilot ladder safely and securely rigged ready for immediate useand long enough to meet the Mooring Master's launch. Vessels should have their crew standing by ready to receive mooring and hose connection materials and should maintain a lee until this is completed. Mooring Master will instruct the crew in the setting up of the forward mooring.

2 bollard ropes are made fast round the port bitts with their attached shackles about 5 ft. inboard from the fairleads as far forward as possible. The size of the fairlead opening should be at least 300 mm. (12 in.) to prevent chain from jamming in the fairleads.

Attached to the mooring connections on the buoy are two 18 in. nylon ropes (144 mm. dia., breaking strain 250 tons). These ropes are 50 m. long, and have at their free end a length of stud link chain which includes enlarged end link for receiving the shackles used on the deck of the tanker. From the outer end of this chain there are connected 2 mooring lines consisting of pick-up wires, pick-up ropes and a towing rope (port side only). The nylon rope is supported by "doughnut" floats and the chain is hung by large plastic buoys 5 ft. in diameter and coloured red and yellow.

Hose Connection: After completion of mooring the boat which has been holding the hoses clear during berthing will bring the floating hose to the ship's side and connect the derrick runner to the balance buoy. These are lifted aboard one by one and connected by distance piece which was already connected to vessel's manifold by hose connection crew during mooring operation.

Unmooring: After the hose disconnection is completed, mooring ropes are slacked off and then dropped into the water. Tug/work-boat will come alongside either before or after the vessel backs off the berth, whichever is convenient, and will receive mooring and hose connection materials.

TIDES: The maximum tidal range in this area is 6 ft., the average tidal range at the Spring tide 3 ft. and the Chart Datum is 0.7 ft. below ISLW. Tidal stream is variable according to the place and the lay of the land. But the flowing tide usually runs South-Eastwards and ebbing tide North-Westwards. Speed of a current is around 2 knots at the highest.

"Tide and Current Table" is published annually by the Company, applicable to Mubarras and the surrounding area, and will be obtained on application to the Company.

WEATHER: Local weather at Mubarras is almost similar to that of Jebel Dhanna and Abu Dhabi City, being extremely hot and humid in Summer. Temperature sometimes soars as high as 50° Centigrade with almost 100 per cent humidity in July and August.

MEDICAL: The Company operates a small clinic at Mubarras. Master may obtain medical attention for ship's personnel from the ship's Agent who may in the case of serious illness or injury recommend treatment at the Abu Dhabi government hospital. The ship owner will be charged for all expenses incurred.

FRESH WATER: Not available at Mubarras except in case of extreme emergency.

FUEL: Not available.

CONSULS: No consular business is available at Mubarras. However, various countries have representations in Abu Dhabi.

REPAIRS: There are no repair facilities at Mubarras. However, radar and electronics repairs are available in Abu Dhabi and technicians can be sent to Mubarras for repairs through notifying the ship's Agent.

SURVEYORS: Lloyd's, ABS, Veritas surveyors are available in Abu Dhabi and they can be brought in if ample notice is given to ship's Agent.

CUSTOMS: Under normal circumstances Customs Officers do not board tankers at this port but upon arrival the Master is required to submit to the Customs through the ship's Agent a manifest of any cargo to be landed at Mubarras.

After loading is completed the Mooring Master will sign on behalf of Customs an outward manifest and issue the port clearance. These will be handed to the Master by the Agent.

REPATRIATION: Not possible.

TIME: Local standard time at Abu Dhabi is GMT plus 4 hours throughout year.

FIRE-FIGHTING: Tug/workboat "No. 1 Union" stationed at Mubarras Island is equipped for fire fighting. She is capable of pumping 1,700 gallons of water per minute from 3 nozzles and is usually on emergency stand-by during tanker loading operations.

GENERAL: *Engine:* The main engines and all gear must be in an operable condition and in a state of immediate readiness whilst the vessel is on the berth.

Stores: Provisions and deck stores not available.

Divers: The services of the Company diver may be available to vessels where it is essential that a diver's services are required to enable a vessel to sail. All requests for such services should be routed through the ship's Agent to the Port Master.

Currency: All currencies approved except Israeli.

Mail: Mail can be received and sent through ship's Agent.

Dry Cargo Discharge: A "T" shaped jetty at Mubarras Island can accommodate a vessel with maximum 12 ft. draft. Discharge of dry cargo must be arranged well in advance through ship's Agent in Abu Dhabi who will supply labour and barges from Abu Dhabi. No gear whatsoever is available at Mubarras.

SAFETY:

No Smoking: Smoking on board the ship is strictly prohibited except in the smoking room situated in the aft accommodation and which has been jointly agreed between the Mooring Master and the Master.

The responsibility for the strict observance of the safety of these rooms rests with the ship, and the Company reserves the right to prohibit smoking in these rooms also should situation require at any time.

Accommodation: All accommodation doors, port holes and ventilators must be closed during loading operations, and doors and openings to machinery spaces in vicinity of ship's tanks are also to be closed.

Galley and Boiler Fires: As a general rule, the use of galley and boiler is not permitted. However, those appropriately equipped are considered safe for use, and their use will be mutually agreed between the Master and the Mooring Master.

Radio Equipment: Radio. radar or other electronic equipment must not be energized while the ship is on the berth.

Air-conditioning Units: For safety, it is preferable that these units recirculate the air within the accommodation but their use when drawing air from outside the accommodation may be permitted provided that the Master and the Mooring Master agree that no danger exists. Should any gas be detected within the accommodation or should there be any danger of gas within the accommodation these units must be stopped and the intakes closed. Window-type air-conditioners are forbidden at all times.

Ship's Fire-fighting Equipment: This equipment must be in constant readiness at all times with sufficient people on board for its efficient operation.

Fire Watches: While the vessel is within the port area a continuous and efficient fire watch shall be maintained on deck and in the engine room by the ship's crew. Fire-fighting equipment shall be in instant readiness throughout the vessel and additional extinguishers must be available at the loading manifold while hoses are being connected and disconnected. Water should be available on deck service lines at all times and fire hoses connected at all fire stations for immediate use.

Swimming: No swimming in the sea berth area is permitted while vessels are on berth.

AUTHORITY: Abu Dhabi Oil Co. Ltd. (Japan), P.O.Box 630, Abu Dhabi, United Arab Emirates. *Tel:* Abu Dhabi 361100. *Telex:* 22260 Adoco EM. *Cables:* "Oiljapan Abu Dhabi". *Contact:* Mr. S. Ageto, Manager – Marine & Transport.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd. are appointed by Abu Dhabi Oil Co. Ltd. (Japan) as exclusive shipping Agents for all vessels calling at Halat Al Mubarras Terminal. The address particulars are as follows:

National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.B. 377, Abu Dhabi, United Arab Emirates, Cables: "Confidence", Abu Dhabi. Telex: 22248 ("Gacauh EM"). Tel.: 334300 (10 lines). After office hours 325143, 366665, 341728, 326083.

ETA messages shall be sent to National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., cable address: "Confidence", Abu Dhabi, via Bahrain Radio.

Vessels can otherwise communicate with NSGAC, Abu Dhabi, over Marine Radio HF, frequencies: standing by on 3539 kHz. and transmitting on 2170, 2301, 2368, 2738, and 3539 kHz., call sign "Confidence", Abu Dhabi.

Vessels equipped with SSB radios can also communicate with NSGAC, Abu Dhabi, on the frequencies, standing by on 6910 MHz lower side band and transmitting on 3539 and 6910 MHz, call sign "Confidence", Abu Dhabi.

Under favourable weather and transmitting conditions communication can also be performed over the VHF radio on the following frequencies: standing by on Channel 16 (156.8 MHz) and transmitting on Channel 9, 10, 12, 13 and 14, call sign "Confidence", Abu Dhabi.

PORT RASHID, Dubai: 25.16 N. 55.16 E.

(See Plan Book)

FLAG: U.A.E.

DOCUMENTS: The following should be airmailed to Agent prior to ship's arrival.

6 Dangerous Cargo Lists.
2 Stowage Plans.
2 Hatch Lists.
7 Cargo Manifests.
2 Freighted Manifests.
1 each Bill of Lading.
4 Crew Lists required (on arrival).

APPROACHES: Black and white Pillar Buoy, flashing every 10 secs. in position Lat. 25° 21′ N. Long. 55° 14′ E. Marked "Dubai Approach".

Main light in position Lat. 25° 13.5′ N. Long. 55° 17.3′ E. (Situated on top of the Dubai Trade Centre) Group Flash (W) 2 every 30 secs. 157 m. above MHWST. Visible 30 miles. Also Racon Beacon with signal "TC".

Main leading lights on main breakwater front Position Lat. 25° 16.3′ N. Long. 55° 16.0′ E. QK FL every 0.5 secs. Rear Lat. 25° 15.5′ N. Long. 55° 16.0′ E. Occ. Every 2 secs. Breakwater Entrance. LEE light FL (R) every 2.5 secs. Main light G.P. FL (G) 2 every 30 secs.

PILOTAGE: Compulsory. Pilot will board 24 hours a day, from a launch and a regulation Pilot ladder must be provided, with manropes, and a lee given. Large vessels calling should provide an accommodation ladder with its lower platform within about 12 ft. of the waterline and a pilot ladder rigged on ship's side adjacent to the accommodation ladder platform.

The Master must sign the indemnity form provided by the Pilot before entering the harbour.

ANCHORAGE: Vessels should contact Dubai Port Control VHF, Channel 16 shifting to a working Channel as instructed. Failing instructions they should anchor approximately 2 miles from the port entrance. Holding ground – Generally poor.

RESTRICTIONS: Minimum depth in channel 13 m. Max. rise and fall 2.0 m.

Vessels not working cargo immediately on arrival will not enter the port. Vessels may leave at any time.

MAX. SIZE: Depth alongside at Port Rashid container terminal is 13 m. and the tide is not expected to go as low as zero height on average more than 55 days in any one year. Therefore, Port Rashid Authority are prepared to berth vessels up to 42 ft. draft, at minimum speed at all times, provided vessels can discharge in such a manner as not to trim so as to cause an increase in maximum draft.

Maximum draft at general cargo berths is 37.7 ft. Depths of water at general cargo berths varies from 30.5 ft. – 37.7 ft.

Vessels in excess of 850 ft. length overall will be berthed at the Harbour Master's discretion.

Port Rashid Authority consider that keel clearance is at the Master's discretion, and are prepared to berth vessels with minimum keel clearance of six inches.

TUGS: Three tugs of 2,400 h.p. are available with fire-fighting, pollution and salvage facilities, the practice being to secure alongside with 2 tug ropes therefore, gangway and derricks should be secured in-board.

Tugs are fitted with VHF. Contact should be made via Dubai Port Control or the Harbour Master.

RADIO: The Port Signal Station (call sign 'Dubai Port Control') is fully equipped with VHF radio and watch is maintained 24 hours per day on Channel 16, switching to Channel 12 for port operations.

The Signal Station is situated at the seaward end of No. 1 berth at a height of 57 ft. above sea level.

Vessels should contact the signal station by VHF Channel 16 and request berthing instructions.

Vessels should advise their Agents the arrival time, LOA, draft and position of bunkering points should bunkers be required. Amended ETA should be advised by VHF. Vessels Agents will in turn pass on the above information to the Port Authority.

HEALTH: Normal quarantine regulations apply and Pratique can be given by the Pilot on cargo vessels, always subject to the Health Authorities approval. Health Authorities only board when the vessel is alongside, except in the case of a suspected ship.

BERTHING: Vessels should advise the port of their ETA, length overall and draft as early as possible. The port should also be advised of any explosives or hazardous cargo on board to determine if it should be offloaded before berthing or otherwise.

Berth Information: A restricted number of vessels may anchor within the harbour breakwaters under instructions from the Harbour Master if so required and may discharge/load ex-lighters.

Berth Nos.	*Length*	*Depth of Water (MLWS)*
1-4	4×573 ft. (2,294 ft.)	No. 1 33 ft.
		No. 2 32 ft.
3-4		30 ft. 6 in.
5	600 ft.	30 ft. 6 in.
6-10	5×601 ft. (3,008 ft.)	No. 6-8 30 ft. 6 in.
		No. 9-10 35 ft.
11-15	5×599 ft. (2,996 ft.)	30 ft. 6 in.
16	700 ft.	37.7 ft.
17-24	8×800 ft. (4,864 ft.)	37.7 ft.
25	490 ft.	37.7 ft.
26-27	2×515 ft. (1,031 ft.)	37.7 ft.
28-30	3×597 ft. (1,792 ft.)	37.7 ft.
31-32	2×717 ft. (1,434 ft.)	No. 31 37.7 ft.
		No. 32 42 ft.
33-35	3×993 ft. (2,981 ft.)	42 ft.
S.O.T.		37.7 ft.
Depth over pipeline		37.7 ft.

General Cargo: 30 deep water berths with 17 storage sheds (each 120 m. × 60 m.) adjacent are available plus a coastal berth for small craft and vessels with less than 6.10 m. (20 ft.) draft. All berths are backed by extensive hard surface yard storage area.

Container Terminal: Comprising of berths 31-35 with quay length of 1,350 m. served by 2×Tango 80 gantry and 2×Mitsubishi gantry cranes of 35 ton capacity and 1×Mitsubishi gantry of 50 tons capacity. Storage area of 45 hectares with 6×CFS sheds on terminal of 400×200 ft. each.

Depth alongside: 13 m.

Working hours: 0700 to 1830 and 1830 to 0700 daily.

16 straddle carriers radio linked to controller 24 terminal/Ro-Ro tractors.

3×25 ton forklifts (2 Ro-Ro masted)

120×roll trailers

Bunkers and water available alongside.

Computer controlled stacking areas and container tracking available to Agents/Owners.

FRESH WATER: Available at all berths. Rate 20 t.p.h. per hose.

FUEL: Shell Bunker Fuels are available at berths Nos. 1 to 4, 6 to 9 and 17 to 38 in addition to Tanker Berth and include fuel oil, thin fuel oils, diesel and gasoil, pumping rate 300 t.p.h.: 48 hours' notice should be given to local Agents or Shell Markets (M.E.) Ltd., P.O.Box 307, Dubai. Tel: 450451; Telex: 5478 DB; Cables: Shell Dubai. Marine Lubricants and chemicals are available for delivery to the ship.

Delivery of fuel oil and gas oil at the Petroleum Jetty via 12 in. loading line at up to 500 long t.p.h.

TANKERS: Berth operated by Shell Markets (M.E.) Ltd. Capable of taking vessels up to 260 m. long. Max. draft 11.3 m., vessels of 11.3 m. but not over 11.6 m. draft may be berthed by arrangement with the Harbour Master at HW.

Slop barge with capacity 2,500 tons available.

CARGO HANDLING: *General Cargo Working hours:* Saturday – Thursday, 1st shift: 0700 – 1400 hrs. Special shift: 1400 – 1600 hrs.; 2nd shift: 1830 – 0030 hrs. Special shift: 0030 – 0530 hrs.

Container Terminal: Shift arrangement. 0700-1830, 1830-0700 seven days a week, 365 days a year.

Working hours are at the discretion of the Port Operations Manager.

Cargo is handled on Fridays and most Public Holidays. The Port Operations Manager may require full night work or special shifts in the interest of the Port.

Refrigerated cargoes should be stowed consignment by consignment, to facilitate discharge and Direct Delivery to consignees.

Each general cargo berth is provided with fork-lift trucks and tractor units and trailers.

Pallets are provided free of charge to assist cargo handling.

Cargo is discharged direct to sheds or to storage areas where mobile cranes varying from 5 to 25 tons lift and F.L.T.'s of 3-7 tons capacity operate.

STEVEDORES: Ship's gangs are available for distribution to vessels through Agents, vessels should advise their requirements before arrival. The gangs board and operate under the supervision of ship's officers. No quay cranes are provided, so ship's derricks/cranes must be used, together with cargo handling equipment. A close liaison should be maintained with the Cargo Superintendent or shed supervisor at all times.

Lighterage: When berths are fully occupied, vessels may discharge/load ex-lighters at anchorage.

MEDICAL: A comprehensive range of medical and dental services are available at Dubai.

AIRPORT: International airport, 3.2 km.

SURVEYORS: Lloyd's Agents, Lloyd's Register of Shipping. American Bureau of Shipping. Germanischer Lloyd.

DRYDOCK: *Dubai Drydock:*. A complete ship repair facility East of Port Rashid. Vessels up to 1,000,000 d.w.t. can be docked. Approach areas dredged to 11.5 m. enclosed by breakwater.

Dock No. 1 370 m.×66 m. (350,000 tonnes)
No. 2 525 m.×100 m. (1,000,000 tonnes)
No. 3 415 m.×80 m. (500,000 tonnes)

Dockside Cranes:

2× 120 tonnes Safe working load at 65.5 m. radius.
1× 25 tonnes Safe working load at 80.0 m. radius.
2× 15 tonnes Safe working load at 70.0 m. radius.

Tank Cleaning: Facilities available.

REPAIRS: Galadari Engineering; P.O.Box 355, Dubai; Tel: 660803, Telex: Gabros DB 5443; Al Nasr Engineering Co. P.O.Box 1106, Dubai; Tel: 223624; Telex: 5638 DB; Cables: Alnasr – Dubai, and the services of the large Dry Dock Complex capable of accepting vessels up to 1,000,000 d.w.t. offer round the clock service which ranges from major boiler repairs to repair of main diesel engines and auxiliaries, underwater welding, shot blasting hull cleaning and diving services. Gulf Lux Marine Services Ltd., offer a wide range of in-water service including scraping, blasting and recoating. Technical Engineering and Marine Services (TEAMS) have 1 slipway which can accommodate vessels up to 1,000 tons. They are also able to handle all kinds of engine and hull repairs.

Container repair yard located near container terminal.

JOINING/REPATRIATION: Arriving crew holding valid seaman's book can be cleared from the airport and placed on board on the strength of a guarantee letter from the Agent to the Immigration Office.

Repatriating crew can be brought ashore with a similar guarantee tendering the air ticket to the Port Immigration Office. They must be picked up from the ship 24 hours prior to departure.

Persons with South African entry stamps on their travel documents will not be allowed to enter the United Arab Emirates.

TELEPHONES: Situated in sheds, no connection made to vessels.

SHORE LEAVE: Agents collect all passports on vessel's arrival, together with 3 copies of crew list. Temporary shore leave passes are issued by the Immigration Office against passports and Crew Lists.

EMERGENCY CO-ORDINATION CENTRE: Coastguard located adjacent port. Tel: 450520.

SHIP SUPPLY SERVICE: Crew changes, delivery of ship's mail, stores, spares, etc., can be effected by service boats off Dubai or Fujairah. This service is carried out by Gulf Agency Co. (Dubai) Pvt. Ltd. See "Agent".

STORING: Complete shipchandling facilities available at short notice (via Agent).

DEVELOPMENTS: Expansion of the Container Terminal Yard to incorporate areas of land presently outside the Terminal.

Implementation of roving Computer V.D.U.'s for staff and equipment drivers, to speed up the transmission of data from the Yard area to the Computer, both the above due late 1984/early 1985.

AUTHORITY: Port Rashid Authority, P.O.Box 2149, Dubai, U.A.E. *Tel:* 451545 (PABX all depts.) *Telex:* 47530 ("PRA EM"). *Cables:* "PortRashid". *Contact:* D.H. Taylor, General Manager.

AGENT: Gulf Agency Co. (Dubai) Pvt. Ltd. P.O.B. 2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel: 457555 (12 lines – 24 hours service). After office hours 480424, 445221, 459147, 441544, 443650, 443070. Telex: 45448, 45809 ("Gacdb EM") Radio: Marine VHF radio, stand-by on Channel 16 (156.8 MHz) Call sign "Confidence, Dubai".

Operators of ship-servicing and supply organisation: Crew changes, mail, spares and/or delivery of provisions undertaken at sea without deviation to serviced vessel.

Owners and Masters should contact G.A.C. Dubai by cable or telex regarding servicing requirements. Rendezvous positions are selected by Shipmaster as follows: Off Dubai, at any Longitude along meridian 55 East, or off Fujairah at any Latitude along parallel 25.10 North.

RAS AL-KHAIMAH: 25.45 N. 56.01 E.

There is a jetty, length 100 m., suitable for berthing smaller vessels, which is protected by a breakwater, and dredged to a depth of 3 m.

This is a small port for very small vessels only. *All* cargo vessels with cargo for Ras Al Khaimah should assume discharge/loading will be carried out in Mina Saqr. For all other information, see entry for Mina Saqr.

AUTHORITY: See "Mina Saqr".

AGENT: See "Mina Saqr".

SHARJAH, Mina Khalid: 25.22 N. 55.24 E.

(See Plan Book)

DOCUMENTS: The following documents must be in the possession of the ship's Master on arrival or must be forwarded to ship's Agent prior to ship's arrival:

Immigration: The U.A.E. Immigration Department has opened a new office in Port Khalid, Sharjah operating 24 hours, 7 days per week. Master to submit Crew List, photographs of each crew member (photos not returned) and Passports/C.D.C. to Immigration Office on arrival. Passport/C.D.C. will be returned to vessel before sailing. Joining/leaving crew must report to the Immigration Office before proceeding to vessel/airport.

Customs:

2 Crew Lists.
2 Passenger Lists.
2 List of Alcoholic beverages.
2 Cargo manifests.

Port Operations:

2 Cargo Manifests.
2 Dangerous Goods List.
2 Stowage Plans.
Certificate of Registration.
Classification Certificates.

The originals of all the ship's Certificates shall be produced to any Port Official on demand. Where a ship is more than 15 years old, a valid Certificate of Condition issued by a recognised Surveyor shall be on board.

Where Certificates are found to be invalid, the ship may be removed from the Port Area, at ship's expense and re-entry permitted only after validity has been established.

Failure to produce any Certificate to a Port Official when demanded renders the Master liable to a fine of up to DH. 5000, and the removal of the ship from the Port Area.

PILOTAGE: Pilotage is compulsory for all ships entering and leaving the deep water harbour. On entry, Pilots will board to seaward of the fairway buoy; a pilot ladder should be provided. Port Khalid will operate a 24-hour, 7-day week pilotage service. Notice is required before 2200 hrs. for pilotage requirements between 2400 hrs. and 0600 hrs.

ANCHORAGE: The fairway buoy in position Lat. 25° 22.9′ N. Long. 55° 20.85′ E. is a red and white pillar isophase every 6 secs. Vessels approaching should await Pilot to seaward of fairway buoy, anchoring if necessary.

Protected Anchorage:

A limited number of vessels may anchor at moorings within the deep water harbour with prior approval of the Port Operator.

MAX. SIZE: Approach channel dredged to 12.0 m. MLLW.

RADIO: *Notice of Arrival:*

Vessels should advise their Agent ETA Port Khalid, giving draft, LOA, and intended cargo operations to be performed, at least 72 hours prior to arrival.

Agents should arrange berthing and labour with the Port Operator. Vessels should contact Port signal station on VHF Channel 16 (call sign "Sharjah Port Control") when within range. Working Channels 6, 9, 12, 13, 74 and 67.

TUGS: Tug services are available for all ships entering the deep water harbour. At the discretion of the Port Operator ships may be obliged to use the services of a tug or tugs.

Tugs are fitted with VHF.

The harbour tugs are fitted with fire fighting hoses and monitors and foam tanks.

BERTHING: Arrangements made with Harbour Master by ship's Agent for necessary berthing as required.

Berth No.	*Depth at MLLW*	*Usage*
1	11.0 m.	Containers
2	11.0 m.	Containers
3	9.0 m.	General Cargo
4	9.0 m.	General Cargo
5	9.0 m.	General Cargo/Ro-Ro
6	10.0 m.	General Cargo/Ro-Ro
7	10.0 m.	Ro-Ro
8	8.5 m.	Reefer
9	8.5 m.	General Cargo
10	8.5 m.	General Cargo
11	9.14 m.	General Cargo

Total length No. 1 and 2 berths 1,192 ft. (363 m.). Total length No. 3, 4, 5, and 6 berths 2362 ft. (720 m.).

Deep water berth No. 6 – 274 m. (900 ft.) No. 7 berth 220 m. (722 ft.). Total length berths 8 and 9 – 360 m. (1,181 ft.). Berth 10 – 210 m. (689 ft.). Berth 11 – 195 m. (640 ft.).

Equipment Available: The Sharjah Container Terminal (SCT) which comprises berths 1 & 2 in the deep water harbour is equipped with 2 × Tango 80 cranes and 1 Liebherr T115 crane (35 tonnes); a second Liebherr T115 (35 tonnes) to be erected late 1982; top lift container handlers and transtainers; LCL facilities available; 44 reefer points for containers. These berths are also equipped with specialized equipment to handle containers in the storage area. Each berth is provided with fork lift trucks, trailers and yard hustlers to facilitate the movement of cargo. Pallets are available to assist cargo handling. 2 heavy lift mobile cranes of 40 and 90-ton capacity are available on request from the Port Operator. Other equipment, including cranes, trailers, etc., will be made available upon request to the Port Operator with 24 hours' notice.

Lighterage; Lighterage services are available.

Storage Facilities: Storage facilities consists of 11 sheds (2 of which are located in the Container Terminal area) having an area under roof of 28,000 sq.m. (300,000 sq.ft.). In addition, hard surfaced yards and Sharjah Container Terminal Stacking/Packing area provide extensive storage capacity.

Cold Store: A 4,800 ton capacity cold store (frozen and chilled) is located at Berth 8 with mechanical handling from ship's hold to store.

STEVEDORES: The port will operate on a 24-hour, 7-day week basis ashore and afloat. Additional charges will apply outside normal working hours which are defined as follows:

Saturday to Thursday except public holidays.

First shift	0600 to 1400 hrs.
Second shift	1400 to 2200 hrs.
Third shift	2200 to 0600 hrs.

Overtime Rate Applicable:
General Cargo/Container Vessels: 3rd shift, Fridays and holidays.
Reefer Cargo Vessels: Fridays and holidays.
Car Carriers: Nil.

Normal working hours are subject to change during Ramadan, when working hours will be at the discretion of the Port Operator. Requirements for port labour must be submitted by ship's Agent to the Port Operator by 1600 hrs. for work during the first shift on the following day and by 1100 hrs. on the same day for work during the second and third shifts.

HEALTH: Normal quarantine regulations apply.

Radio Pratique will be granted on receipt of radio message from Master, via his Agent, stating that no serious illness has occured during the preceding thirty days. All crew members must be in possession of valid cholera certificates. The Health Officer will only board when the vessel is alongside.

MEDICAL: Upon application to ship's Agent, medical examination of crew members can be arranged. Personnel will either be sent to private Doctor or to Public Health Department, as circumstances dictate. Serious cases will be referred to Government Hospital Doctor.

TANKERS: Tanker jetty situated in harbour on main breakwater. Draft alongside 31 ft. Limited bunkering facilities.

DENSITY: 1025/1028.

FUEL: Deliveries of fuel oil, gas oil or blends may be arranged through vessel's Agents. Marine lubricants will be delivered to ship's side. Both services require 48 hours' notice divers available.

FRESH WATER: Fresh water is obtainable at all berths.

REPAIRS: Good facilities for repairs. Divers available.

DRY DOCKS: None.

SURVEYORS: Services are available upon request.

REPATRIATION: Proximity of the new Sharjah International Airport will permit efficient crew changes and repatriation. Off-shore crew changes facilities can be arranged.

Transit visas are not required for crew changes. Ship's passengers require a valid visa for transit or temporary stay.

AIRPORT: Dubai and Sharjah.

HOLIDAYS: The following are days that will be observed as public holidays. Premium tariff rates will apply on these days.

1st January	New Year's Day
8th February	Prophet's birthday (Mawlid al Nabi)
21st June	Ascension of Prophet (Lailat al Miraj)
*23rd August	Id al Fitr
*24th August	
*25th August	
*26th August	
*29th August	Waqfa
*30th October	Id al Adha
*31st October	
*1st November	
*19th November	Moslem New Year
2nd December	National Day
25th December	Christmas

*Dates approximate – may vary by 1 or 2 days from year to year.

TIME: GMT plus 4 hours. Permanent.

SHORE LEAVE: Shore leave is permitted for crew members (0800 hrs. – 2000 hrs.) provided identification card or seaman's papers are deposited with Immigration office situated in the port and collected upon return. Also see "Documents."

GENERAL: *Pollution:* The provisions of the Sharjah Maritime Law shall apply with respect to the operation of vessels in Sharjah Coastal Waters. Garbage disposal services are provided by the Port Operator and are compulsory.

Ship's Chandlers: Complete ship chandlering facilities are available, handling provisions, laundry and bonded stores.

DEVELOPMENTS: Container Terminal (Berth No. 1) will be extended by 200 m. towards breakwater with a draft alongside of 11.5 m. The third container berth will be equipped with 1×40 ton Liebheer T130 gantry crane. Four more berths for general cargo will be constructed towards breakwater from Berth No. 11. Approximate length will be 1,000 m.

AUTHORITY: Sharjah Port Authority, P.O.Box 510, Sharjah, U.A.E. *Tel:* 356000 (Ext. 51). *Telex:* Seagul EM 68138. *Cables:* Seagul. *Contact:* Captain M. Saleh, Harbour Master.

AGENT: Gulf Agency Co. (Sharjah) Ltd., P.O.B. 435, Sharjah, U.A.E. Cables: "Confidence" Sharjah. Tel.: 544446. After office hours 355676, 354249. Telex 68019 ("Gacshj EM"). Radio: Marine VHF radio, stand-by on Channel 16 (156.8 MHz). Call sign: "Confidence" Sharjah.

Air-freighted spare parts and ships' mail to Sharjah should be addressed to GAC Sharjah, but sent to Sharjah International Airport or Dubai Airport marked "Ship's Stores In Transit for M/S . . ." Certificates of Origin should follow the airwaybill or in cases of emergency be sent to GAC Sharjah, soonest after shipment. Cable "Confidence" Sharjah, of flight details and airwaybill number.

UMM AL NAR, Abu Dhabi: 24.27 N. 54.29 E.

(See Plan Book)

LOCATION: The Umm Al Nar Petroleum Port is situated at the South Eastern tip of Abu Dhabi Island and consists of 2 island type berths connected to the shore through a causeway. Vessels will use Mina Zayed and Khawer Al-Bhagl navigation channels to the Port. The total length of both channels is 16 nautical miles. Vessels will berth port or starboard side to, at the discretion of the Pilot.

APPROACHES: *Water Depths:*

The channel depths are as follows:
(a) 13.0 m. for Mina Zayed navigation channel.
(b) 11.0 m. for Khawer Al Bhagi navigation channel when the present dredging operations are completed. Keeping in mind that all levels are relative to C.D.

MAX. SIZE: The 2 jetties have been equipped with marine facilities to accommodate vessels having the following characteristics:

Max. size of vessel	20,000 d.w.t.
Min. Size of vessel	5,000 d.w.t.
Length overall	170 m.
Beam (max.)	26.50 m.
Draft (max.)	9.25 m.

HEALTH: Masters will be required to produce the standard International Bill of Health.

RADIO: *Arrival Telegram Ship/Shore:* On ship's arrival at the pilot station, a telegram shall be passed to the refinery through the ship's Agent with the following information:
ETA at berth.
Arrival draft.
Estimated departure draft.
Quantity and type of Cargo/Cargoes.
Vessel's maximum loading/discharging rate.
Quantity of dirty ballast and discharging rate.
Quantity of clean ballast to be discharged overboard and time required.
Size of manifold.
Are reducers to 6 in., 8 in. and 10 in. available on board?
Any vessel's requirements.
Master's name.

BERTHING: Umm Al Nar Refinery Jetty consists of 2 berths, each of which accommodates vessels in the range of 5,000 d.w.t. to 20,000 d.w.t. and is provided with the following facilities:
(a) Loading platform.
(b) 4 mooring dolphins.
(c) 5 breasting dolphins (with 2.16 m. berthing line).
(d) 4 × 60 ton quick release hooks with capstan.
(e) 2 × 30 ton bollards.
(f) Hydraulically operated gangway.
(g) 2 fire-fighting monitor towers.

Each platform is provided with 6 loading arms having the following flexibility:

*No.**	*Size of Flanges inches*	*Cargo Flexibility*	*Max. Rate cu.m./hr.*
1	6	Lub. oil	400
2	8	A.T.K.	1,000
3	6	Straight Run Residue	500
4	8	Mogas	1,000
5	10	Gas oil/Naphtha	1,500
6	10	Straight Run Residue/Ballast	1,000
7	3	Fresh water	13

*The loading arm numbers are from the gangway side.

Berthing Aids: Umm Al Nar Refinery Jetties are equipped with navigational aids to allow safe navigation during day and night, namely:
(a) 2 white coloured leading lights to affix navigation for channel's centre line, placed ashore at 5.0 m. and 11.0 m. above the ground level.
(b) 6 navigation lights with radar reflectors to define basin limits.
(c) Each jetty is provided with 4 red coloured lanterns, 2 at each end at 5.0 m. above deck level. This is in addition to the operational flood lights.
(d) Each mooring dolphin is provided with flood lighting.

Moorings: When at berth, vessels must be moored to the entire satisfaction of the Pilot. The breasting dolphins are each equipped with 60 ton quick release hooks and a power operated capstan. the mooring dolphins are each equipped with 60 ton quick release hook and a power operated capstan.

Vessels must be ready at all times to put out extra moorings as requested by terminal personnel, or as dictated by weather changes. It is the Master's responsibility to ensure that vessel's mooring lines are checked frequently to prevent excessive movement of the vessel in berth, which could activate the ESD/ERS systems and/or cause severe damage to the loading arms and other terminal equipment.

LOADING/UNLOADING: Also see "Berthing."

(i) The Master must give the Terminal a "Stand By" warning 10 minutes before being ready to commence loading or discharging.

(ii) Upon "Commence Loading" from the Master or his deputy only 1 pump will be used to ensure a slow flow rate until it is established that all systems are operating correctly and pressures are constant. Full loading rate may then be ordered.

(iii) The vessel's cargo tanks shall be inspected prior to and during loading and should it be found that tanks are not tight all loading shall cease, the vessel be rejected and further loading refused. The vessel will not be accepted later until satisfactory evidence of repair is produced duly certified by ABS, Lloyd's or other officially accredited classification society or surveyor.

(iv) During the hours of darkness vessels loading/discharging products, lub. oil or ballast shall rig overside lights to illuminate the surface of the sea around the ship to the Terminal Operators satisfaction to ensure that any oily products on the surface may be detected quickly and early action taken as appropriate.

Deballasting: The jetties are equipped with dirty ballast/slops receiving facilties. Vessel discharging dirty ballasts/slops ashore will use the deballasting arm. The maximum ballast reception rate is 1,000 cu.m./hr. Prior to arrival the Master is to advise Umm Al Nar Refinery (through the arrival telegram) how much dirty ballast/slops on board to be discharged to the shore facilities. (A "Declaration Letter" is provided for Master's signature) accepting clean ballast for overside discharge is subject to a declaration signed by the Master and delivered to the terminal representative.

Communications: To maintain the necessary continuous communications between refinery, vessels and shore control rooms during cargo operations and also in emergencies, the vessel will be provided with a walkie-talkie set. It is required that this set must remain at all times with the officer responsible for the cargo operation.

FRESH WATER: Fresh water is obtainable at Refinery berths and should be arranged through the Ship's Agent.

FUEL: No Bunker facilities in Umm Al Nar Refinery Terminal.

GENERAL: *Customs:* Custom's officers will board the ship on arrival and prior to sailing for necessary port clearance.

Stores and Provisions: Stores and provisions are not permitted to be loaded at Refinery berths and must be taken on board in the anchorage.

AUTHORITY: ADNOC Petroleum Ports Authority, Abu Dhabi National Oil Company, Abu Dhabi, U.A.E. *Telex:* 22215 Adnoc Em (Abu Dhabi); 22588 Radnoc Em. *Contact:* Mohamed Abdulla, Refinery Manager.

UMM AL QAIWAIN: 25.35 N. 55.35 E.

(See Plan Book)

LOCATION: Approx. 20 miles North of Sharjah.

PILOTAGE: Service not available at the present time.

RESTRICTIONS: Depth of channel is presently 10 m., width 100 m., tidal range +0.2 m. – +1.7 m.

MAX. SIZE:

Details of shipping able to berth at individual wharves:

Ship	*Size*	*Draft(m.)*	*Length (m.)*
Town Wharf:			
Passenger ship	500 gross tons	4.0	50
Freighter	700 d.w.t.	3.6	52
Freighter*	1,000 d.w.t.	4.1	60
Tanker	700 d.w.t.	3.8	54
Tanker*	1,000 d.w.t.	4.2	61
Deep Water Wharves No. 3 and No. 4:			
Passenger ship	30,000 gross tons	9.5	210
Freighters	17,000 d.w.t.	9.8	173
Container	16,900 d.w.t.	9.8	200
Tanker	20,000 d.w.t.	9.5	164
Ore Carrier	25,000 d.w.t.	9.8	176

*Dependent on state of tide.

BERTHING: *Town Wharf:* This wharf is 800 m. long providing berthing facilities for ships with a max. draft of 4 m. A guide to the size of ships able to berth at this wharf is given under "Max. Size". Bollards are located at 12 m. intervals and timber fenders and rubbing strips have been incorporated. The capping beam level is +2.66 m. above Admiralty Chart Datum and the minimum dredged level adjacent to the wharf is −4.0 m. Steps have been incorporated at the Western end of the wharf to enable loading of small local boats. The allowable surcharge loading adjacent to the wharf is 2.0 tonnes/sq.m.

The channel in front of the wharf is 100 m. wide and is dredged to a minimum depth of 4 m. The channel extends from the Eastern end of the wharf along its full length and for a distance of approximately 3 km. along the Western shore of the creek. At the Western end of the wharf the channel has been widened to form a turning circle. The channel has been marked with standard buoys and beacons in accordance with International Regulations.

The area behind the wharf is a minimum of 50 m. wide, the boundaries being the wharf and the existing road. This area has been reclaimed using dredged fill and surfaced with local materials. Other reclaimed areas exist along the Western bank of the channel and opposite the existing fish market. Both these areas have been reclaimed to a surface level of +3.0 m.

Deep Water Wharf:

This wharf is divided into four sections:

Wharf No. 1	130 m. long	Dredged depth – 5.5 m.
Wharf No. 2	115 m. long	Dredged depth – 7.5 m.
Wharf No. 3	200 m. long	Dredged depth – 9.5 m.
Wharf No. 4	400 m. long	Dredged depth – 10.0 m.

Wharves No. 1 and No. 2 are similar to the Town Wharf previously described but with increased dredged depths. Wharves No. 3 and No. 4 provide berthing facilities for ships with a max. draft of 9.5 m. and 10.0 m. respectively and a max. length of 200 m.

A guide to the size of ships able to berth at these wharves is given under "Max. Size". Bollards are located at 22.4 m. intervals and rubber "V" type fenders have been incorporated on Wharf No. 4. The capping beam level is +2.66 m. and the allowable surcharge adjacent to the wharf is 2.0 tonnes/sq.m.

A 30 m. wide concrete hard standing is provided behind all 4 wharves and the entire wharf area is lit by 400 watt H.P.S. High Mast Lighting. Potable water facilities have been installed together with provision for future fuel bunkering and connection to the local telephone exchange.

The entrance channel to Umm Al Qaiwain Port is a minimum of 100 m. wide increasing to 160 m. wide at the Northern end of Wharf No. 4 and connects with a 500 m. diameter turning circle at the Southern end of Wharf No. 3. The channel and turning circle are both dredged to a minimum depth of 10.0 m. and are marked with standard buoys and beacons in accordance with International Regulations.

Navigational information for entering the Port of Umm Al Qaiwain can be found on Admiralty Chart No. 3714.

AUTHORITY: Umm Al Qaiwain Municipality, P.O.Box 12, Umm Al Qaiwain, U.A.E. *Tel:* 9716-666144/5.

AGENT: See "Dubai".

ZIRKU ISLAND, Jazttzarakku Island, Abu Dhabi: 24.52 N. 53.04 E.

(See Plan Book)

LOCATION: Zirku Island is located at 24° 52′ N., 53° 04′ E. approximately 75 nautical miles W.N.W. of Abu Dhabi.

It is 5 km. long and 2.5 km. wide.

A zone of very rugged hills with ridges is located in the N.N.W. with an elevated point of 163 m. and a low flat sandy and dusty zone in the S.S.E. where the airport lies.

Section (A) – Service Harbour
Section (B) – Oil Terminal

SECTION (A) – SERVICE HARBOUR

PORT LIMITS:

(a) Lat. 25° 03.0′ N., Long. 52° 53.3′ E.
(b) Lat. 25° 00.0′ N., Long. 52° 53.3′ E.
(c) Lat. 24° 48.9′ N., Long. 53° 04.8′ E.
(d) Lat. 24° 48.9′ N., Long. 53° 11.0′ E.
(e) Lat. 24° 56.8′ N., Long. 53° 11.0′ E.
(f) Lat. 25° 03.0′ N., Long. 53° 04.4′ E.

Refer to British Admiralty Chart 3778.

NAVIGATION: *Manoeuvring and Navigation:* All vessels should manoeuvre and navigate within the port in accordance with the International Regulations for the prevention of collision at sea.

Lights and Shapes: All vessels should exhibit such lights and/or daytime marks as defined by International Regulations to prevent collision at sea.

Special attention should be paid by vessels, barges or tugs moored or anchored in the vicinity of the jetties which should show at night the lights defined in these regulations.

High Tide Manoeuvres: Deep draft vessels and barges will be berthed at high tide only.

Shallow Water: While proceeding to the jetties, Masters should pay sharp attention to navigation due to the presence of shallow water existing in the vicinity.

Caution: Masters should consider the possibility of having less water than predicted by tide tables after a long period of bad weather.

Harbour Facilities: No tugs or mooring launches are presently available, accordingly, vessels calling at Zirku harbour should have very good manoeuvrability.

Navigation Aids:

1. Flashing lighthouse (Zirku, Zarakuh or Zarqa) located at the top of the hill.
   Height 157, visible at 22 nautical miles.
   Lat. 24° 53.0′ N. Long. 53° 04.2′ E.
   One flash every 10 seconds.
   Visible 025° – 360° (335°)
   Obscured within 2 miles 223° – 264°
2. Flashing lighthouse at the end of the sea water intake.
   Lat. 24° 53.0′ N. Long. 53° 05.3′ E.
   Height=9 m.
   V.Q. (3) 5 secs.
3. Flashing lighthouse at the end of the main jetty.
   Lat. 24° 52.3′ N. Long. 53° 05.5′ E.
   Flash=Fixed and flashing (1) 10 secs.
   Height=11 m.
   Colour=Green.
   Obscured approximately 70° – 150° (80°).

4. *Aero Lights* (occasional).
Located on the airport control tower (green).
Lat. 24° 51.6′ N. Long. 53° 04.6′ E.
Located on the hill (red).
Lat. 24° 52.5′ N. Long. 53° 04.1′ E.
Height=67 m.

5. *Two Flares:*
Lat. 24° 52.5′ N. Long. 53° 04.3′ E.
Height=145 m.
Fixed red lights.

6. *Pylon on the hill top.*
Height=200 m.
Fixed red lights.

7. *Anchorage Buoy.*
Lat. 24° 51.3′ N. Long. 53° 06.9′ E.
Yellow cylindrical.
Flashing yellow (1) 5 secs.

ANCHORAGE:
Waiting Anchorage: Small vessels and barges waiting for a berth alongside the main jetty can anchor beyond 0.5 mile in the S.S.E. of the end of existing jetty in approximately 7 m. of water depth.

Three fixed mooring buoys without lights have been installed at around 0.7 mile in the South and S.E. of the main jetty.

Private mooring lines are located temporarily in the vicinity of temporary jetty "B".

Sharp lookout must be kept when navigating in these areas.

An anchoring buoy (yellow Fl. (1) 5 secs.) has been installed in position:
Lat. 24° 51.3′ N. Long. 53° 07.0′ E.
marking the N.E. corner of the waiting anchorage area (see Admiralty Chart 3778).

Prohibited Anchorage Areas: To avoid the underwater oil pipe-lines being damaged, prohibited anchorage areas are defined as follows:
0.5 nautical miles on each side of the M.O.L. (Main Oil Line) input line.
0.5 nautical miles on each side of the loading lines.

M.O.L. input line from Zakum field comes ashore on the middle of the East Coast.

Loading lines to the oil terminal SPMs leave the Island from the N.N.W. point of the island.

Anchorage Berths and Moorings: All vessels or barges entering the port should occupy such anchorage berth or mooring as may be directed by the Port Supervisor and shall move to any other anchorage, berth or mooring as and when required by this authority.

No vessel or barge shall shift or change the anchorage, berth or mooring allotted without Port Supervisor authorization except if instructed to do so.

No claim will be accepted by Company for berthing or mooring due to arrival priority.

RESTRICTIONS: No berthing will be allowed during night-time.

RADIO: International VHF Channels 6, 62, 64, 68 and 69 have been allotted to "Zirku Island Traffic". Permanent watch maintained by "Zirku Island" on Channel 62, semi-duplex for vessels to Zirku Island & vice versa.

When contact established, change to Channel 64.

Channel 68 is to be used for ship to ship calling and conversation.

ARRIVAL ADVICE: *Notice of Arrival:* Vessels and barges calling at Zirku harbour should advise their ETA at least 48 hours before their arrival by telex to Zirku Marine.

In case of change of the scheduled ETA by more than 6 hours Zirku Marine should be informed by the same way.

Confirmation of ETA should be sent a few hours before arrival at Zirku as soon as a radio link can be set up on VHF Channel 62 or 68 with "Zirku Island" radio room.

Berthing prospects will be given to incoming ships by "Zirku Marine" at this time. If the vessel is instructed to anchor, she must keep a permanent watch on VHF Channel 16, 62 or 68.

During berthing operations contact will be set up with "Zirku Marine" on VHF Channel 68 or 69.

Arrival Message: The first message should be sent according to the following form but any items which are the same as a recent previous voyage to this port may be omitted.
Name of vessel (tug or barge):
ETA Zirku.
Type of vessel.
Length.
Width.
Max. draft on arrival.
Cargo loaded (briefly).
Contractor charterer.
Name of Master.
Coming from and ETD.

BERTHING: Zirku Island Harbour is a private port, hence only vessels and barges chartered by the Company Zadco (Zakum Development Company), acting on behalf of ADNOC (Abu Dhabi National Oil Company) and its contractors are allowed to moor alongside the jetties.

Jetties: The main jetty located on the East coast of the Island is allotted to the general supplying of the Island and the transit of equipment for the Company.

Temporary jetty "A" (on the South of the Island) is now completely silted up.

Temporary jetty "B" (on the West of the Island) is now deteriorating and no longer in use.

Vessels: Contractors shall charter tugs, barges, landing crafts, supply boats, etc. . . . whose dimensions, weight and draft are suitable to the existing jetty.

Emergency use: Other craft may use this harbour only in emergency and must immediately report their arrival to the Port Supervisor.

All craft using the harbour are subject to the control of the port operating company representative. (Zirku Marine Superintendent or his deputy) and the Port Petroleum Administration (Port Officer)

Berth Occupancy: The Port Supervisor will define the allocation of berth in accordance with the Company's requirements of priority upon Manager's recommendations.

Contractors should start discharging as soon as vessel or barge is berthed and should unload until all the cargo has been discharged.

Contractors should not store their cargo on the jetty. They must remove it as unloading proceeds.

Vessels and barges should leave as soon as the handling of cargo is completed in order to free the quays. The Port Supervisor can order vessels and barges to leave the quay at any time (even though not completely unloaded), so they must be able to move, therefore barge shall keep a tug alongside during the whole time of unloading.

BERTHING FACILITIES: *Main Jetty:* The main jetty located on the East coast of the island is approximately 1,200 m. long and orientated N.W./S.E.

The quay at the end of the main jetty has a water depth of 2 m. and is 12.5 m. long (41 ft.) at the inward end; 2.3 m. × 40.5 m. long (132 ft.) in the centre and 3 m. × 57 m. long (187 ft.) at the seaward end (water depth is calculated under chart datum C.D.)

The quay is fitted with 8 × 30 ton bollards, 12 pairs of rubber fenders from a level of 1.50 below C.D. to top of quay level and 3 steel ladders running from a level of 1.50 m. below C.D. to the top of quay level.

The quay available for berthing is 110 m. long (360 ft.) orientated N.W./S.E. as is the main jetty breakwater.

At the inward end a 20 m. long quay orientated S.W./N.E. is available for small launches though badly equipped with mooring points.

Temporary Jetty "A": The Port Supervisor Office and Police ward room are located on the top part of the jetty. The jetty working area has been asphalted.

CRANES: *Fixed Crane:* There is no fixed crane on the jetty since the big derrick installed for the construction has been removed.

Contractors have to supply the Island with their own mobile equipment to discharge vessels and barges, if not previously arranged with Company.

As soon as the unloading is completed users should remove their mobile equipment to keep the jetty area clear.

Location of Cranes: The main quay can bear anywhere a 30 ton crane (up to 45 tons for exceptional cases). For heavy loads two locations are defined as follows:

100 tons crane: one rectangle of which axle is situated at 15 m. from the inward end of the quay.

300 tons crane: the centre of the crane must be situated at 15 m. from the edges of the jetty seaward end.

TANKERS: Fuel unloading.
Main Quay: Connection pipe and booster pump are extended to the outward end of the quay.

Due to shallow water existing alongside, ships unable to moor at this berth should be fitted with sufficient length of hoses to be connected to the Island pipe end from the seaward berth.

MEDICAL: A medical officer is resident on the Island for emergency cases only. The Company maintains a small hospital.

SAFETY: *Reporting of emergency:* Should any vessel be in danger through fire, explosion, collision or whatsoever cause, the Master should immediately report the fact to the Port Supervisor and Port Officer (Petroleum Port Administration) by VHF radio Channel 62.

When alongside the main jetty they can report through the shore telephone system located on the jetty. Grey for Island Network, Red for Safety.

Phone Numbers:
Day and Night: Safety 6333
Radio Room 6666/6403
Clinic 6222.
Day: Marine Superintendent 6400.
Port Officer (PPA) 6471

Fire fighting equipment: There are 2 monitors and 3 hydrants supplied by a 12 in. pipe able to reach any point of the main jetty on emergency call.

Ship's fire fighting equipment: This equipment must be in constant readiness at all times with sufficient skilful personnel on board for its efficient operation.

Particular safety requirements for vessels unloading inflammable products:
All cargo/bunker tank lids must be closed.

A fire fighting hose must be ready for use and supplied with water near the piping and connection on the deck.

In the same way extinguishers must be disposed on the deck.

Cargo/bunker hoses must be properly rigged without leakage.

Cargo tanks being discharged and open to atmosphere must be fitted with an agreed venting system.

Foam and/or dry powder monitors, if fitted, shall be ready for use.

Portable fire extinguishers, shall be conveniently placed for use near the ship's hoses' connection.

A checking will be performed by the Safety Supervisor jointly with the Port Supervisor and the vessel's Master, and a form will be signed by the same, after which offloading of said hazardous cargo will be authorized.

EMERGENCY: *Emergency moving of vessels:* In case of accident vessels shall be able to move quickly, so no repairs to engines are allowed when alongside for self propelled vessels. Barges shall keep a tug alongside during the whole time of unloading.

WEATHER: *Winds:* Four kinds of winds on the Island: The most frequent (54% of the time) are named Shamals they blow from W.N.W. to N. principally in Winter. From N.N.E. to E.N.E. come 20% of the time the Noshi. Local effects of Monsoon, the Kaus blows from E. to S. 17% of the time.

Finally, during the Winter only, and 9% of the time blows from W.S.W. to W. the Suhaili.

Tides: Around Zirku Island the tide is of mixed type with small diurnal predominance, however this semi diurnal effect is not of great significance and for all practical purposes it can be taken that there is only one high water and one low water per day.

The mean spring tide range is approximately 1.2 m. The maximal range would be of about 1.4 m. The mean usual range would be 0.9 m.

Zirku Island tide prediction supplied by operating company, copy can be obtained from Marine Zirku.

There is a tide recorder on the main jetty. Tidal information also available from Zirku Marine on VHF, Channel 8.

Tidal Currents: At Zirku Island tidal currents are semi diurnal roughly flow runs from West to East and Ebb runs from East to West. Eddies are created at vicinity of any obstacle, (breakwater, jetties etc.) especially close to the South sandy end of the island. Currents can reach a speed of 2 knots. It is expected that these data are profoundly changed by winds, especially Shamal.

SHORE LEAVE: No person may go on shore without authorisation from the Zirku Police Authority and only if handed a shore leave or permanent authorisation card.

GENERAL: *Marks:* Name or number and draft marks should be readable from the jetties.

Unsuitable Vessels: The Port Officer reserves the right to refuse berthing and unloading of any vessels considered unsuitable by reason of inadequate or unsatisfactory mooring equipment, insufficient derrick capacity, insufficient fender protection, overloading, inability to comply with the safety regulations or any circumstances which would create unusual risk to the Company's jetties, quays, facilities, personnel and equipment whatsoever.

Prevention of Sea Pollution: It is strictly prohibited to discharge or throw overboard oil, oily water, chemicals, ashes, bilge water or other refuse within the port limits that may result in pollution of the sea.

International oil pollution conventions must be strictly observed by all vessels or crafts.

The Master of any vessel contravening this rule so as to cause pollution shall be charged with an offence against these rules and upon conviction be liable to a fine and shall be incurred in the removal of such pollution.

The harbour users, Contractors and all vessel Masters, before leaving and/or sailing should make sure that jetty area is clean and all their refuse has been removed.

National Courtesy Flag: All vessels calling at Zirku are required to fly their national flag and the national flag of Abu Dhabi.

Swimming & Diving: No person shall swim or dive from or near any vessel or alongside quay or berth.

No person shall engage in diving with the assistance of breathing apparatus within the above mentioned areas without the permission or instruction from the Port Authority.

SECTION (B) – OIL TERMINAL

PORT LIMITS: The port area of Zirku Petroleum Port covers the area bounded by straight lines connecting the following points:

A:	Lat. 25° 03′ N. Long. 52° 53.3′ E.	B:	Lat. 25° 00′ N. Long. 52° 53.3′ E.
C:	Lat. 24° 48.9′ N. Long. 53° 04.8′ E.	D:	Lat. 24° 48.9′ N. Long. 53° 11′ E.
E:	Lat. 24° 56.8′ N. Long. 53° 11′ E.	F:	Lat. 25° 03′ N. Long. 53° 04.4′ E.

Masters of all vessels entering the port must follow instructions given by the Company's Marine Superintendent as to approach, anchoring, berthing and unberthing.

DOCUMENTS: On arrival the tanker should prepare the following documents to be handed over to the different authorities coming on board:

Tanker Enquiry Form (ZADCO Form).
Navigation Aids Dues Certificate (M.E.N.A.S. Form).
Notice of Readiness.
Crew List.
Certificate of Registry.
Load Line Certificate.
Safety Certificate (Equipment).
Derat Certificate.
Radio Certificate.
International Oil Pollution Prevention Certificate.
Suez Canal Tonnage Certificate.
Panama Canal Tonnage Certificate.

PILOTAGE:

1. *General:* On arrival and on departure the pilotage is compulsory within the Port Limits. The Company reserves the right to render the Pilotage compulsory through the departure route for any reason. Nevertheless, upon Masters request Zirku Pilots could assist any Tanker on Zirku Departure Route to and from Buoy No. 6 (Lat. 25° 13′ N., Long. 52° 59′ E.) Within Port Limits and on Zirku Departure Route the speed *shall not exceed 8 knots.*

2. *Direct Berthing:* Instructions for berthing having been received by voice communication the Tanker should proceed to the agreed Pilot boarding point.

3. *Waiting:* In case of a berth not being available, the approaching Tanker will be instructed to proceed to an anchorage area and anchor at the agreed location. The Tanker will wait at this allotted location until further instructions.

4. *On Departure:* A Pilot will assist loaded Tanker as stipulated in No. 1 above.

5. *Pilot Access:* The Pilot access should be in good condition, safe, clean and ready. Pilot ladders constructed of light material such as aluminium will not be accepted. Where the freeboard exceeds 10 m. the vessel should have a combination of accommodation ladder and pilot ladder rigged. The bottom of the accommodation ladder shall be at least 7 m. above the water line.

6. *Pilot Embarkation:* To embark the Pilot safely the incoming tanker should reduce speed (no more than 5 knots), make a good lee to minimise adverse weather conditions and take the way off. On the tanker's deck the boarding of the Mooring/Loading Master should be attended by at least one officer and one A.B.

7. *Pilot Boat:*

Name : Jarada
Engine : 2×955 h.p.
Speed : 20 knots
Marked : Zirku Pilot
Fibre Glass Hull

NAVIGATION AIDS:
Separation Scheme: A traffic separation scheme between Zakum Field and Umm Shaif Field crosses the port area.

This scheme includes:
(a) A separation zone, 0.75 nautical miles wide.
(b) A traffic lane for Westbound traffic, 1.25 nautical miles wide.
(c) A traffic lane for Eastbound traffic, 1.25 nautical miles wide.

The main traffic directions are: 050° – 230°
072° – 252°

This scheme is marked by the following two light buoys.

1. Zakum Middle
Lat. 25° 59.15′ N. Long. 53° 08.50′ E.
R.W.V.S. Pillar L.Fl. 10 sec.
2. Zakum West
Lat. 24° 56.60′ N. Long. 52° 59.85′ E.
R.W.V.S. ISO 6 sec.

Reference Charts: British Admiralty 3733, 3952, 2889, 3778.

Zirku Island:
Zirku, Zarakuh or Zarqa beacon:
Lat. 24° 53.0′ N. Long. 53° 04.2′ E.
Fl. 10 sec. 22 miles Height 157 m.
Main Jetty:
Lat. 24° 52.2′ N. Long. 53° 05.4′ E.
Fixed Green 7 miles and Flash 10 sec. Height 11 m. 9 M.
Sea Water Intake:
Lat. 24° 53′ N. Long. 53° 05.3′ E.
3 Fl. W. 5 sec. Height 9 m.
Radio Tower:
Lat. 24° 53′ N. Long. 53° 04.1′ E.
Fixed Red light – Height 198 m.
Flares:
Lat. 24° 52.5′ N. Long. 53° 04.3′ E.
Fixed Red light – Height 145 m.

Repeater Platform:
Lat. 25° 01.7′ N. Long. 52° 55.7′ E.
2 White flashing lights Morse "U" 15 sec. at level +18 m.
2 Red lights at level +34 m.
2 Red lights at level +51 m.
Horn Morse "U" every 30 sec.

Navigation Warning within Port Limits:

All vessels transiting through the Zarakkuh Port Limits are to follow the following procedures:

1. Vessels transiting along the Separation Zone may do so as normal.

2. Vessels intending to cross the Separation Zone Northwards must inform Zarakkuh Radio on Channels 16 or 62 of their intention and follow the instructions given.

3. Vessels Southbound, intending to cross the Northern Port Limits, must inform Zarakkuh Radio of their intention on Channels 16 or 62 and follow the instructions given.

4. No vessel is to pass between Buoy No. 1 (Lat. 25° 02′ N., Long. 53° 00.8′ E.) and the oil loading terminal or enter the no unauthorised entry limts around the oil loading terminal or the Repeater Tower (Lat. 25° 01′ 42″ N., Long. 52° 55′ 40″ E.).

ANCHORAGES: *Small Vessels Anchorage:* Located close to Zirku Main Jetty is designated for small vessels to service harbour.

1 Buoy orange Fl. yellow in N.E. corner.

Limits:	Lat. 24° 51.3′ N. Long. 53° 07.0′ E.	Lat. 24° 50.0′ N. Long. 53° 07.0′ E.
and		
	Lat. 24° 51.3′ N. Long. 53° 05.4′ E.	Lat. 24° 50.0′ N. Long. 53° 05.4′ E.

Tankers East Anchorage:

Limits:	Lat. 24° 56.8′ N. Long. 53° 11′ E.	Lat. 24° 54.8′ N. Long. 53° 11′ E.
and		
	Lat. 24° 56.8′ N. Long. 53° 07.8 E.	Lat. 24° 54.8′ N. Long. 53° 07.8 E.

where 2 buoys are installed at Eastern corners. Colour orange – Flash yellow.

This area is designated for incoming tankers waiting to berth.

Tankers North Anchorage:

Limits:	Lat. 25° 03′ N. Long. 53° 02.2′ E.	Lat. 25° 00′ N. Long. 53° 02.2′ E.
and		
	Lat. 25° 03′ N. Long. 53° 04.4′ E.	Lat. 25° 00′ N. Long. 53° 04.4′ E.

where 2 buoys are installed at Eastern corners. Colour orange – Flash yellow.

This area is designated for incoming and outgoing deep draft tankers.

Prohibited Anchorage Area: Anchorage within Port Limits, outside waiting anchorage areas is prohibited. Exceptional authorisation may be given by the Marine Superintendent.

Sea-bed: The sea-bed in the Terminal area is rock, covered by a few inches of loose sand. Some patches of coral can be found. Holding is poor and vessels are advised to pay out more cable than usual.

MAX. SIZE: The SPMs are suitable for berthing tankers from 30,000 d.w.t. up to 350,000 d.w.t. loaded at 80% of their capacity.

The max. draft allowed for departure is 21 m.

RADIO: Messages can be sent to the Company by the following means:

Telex or Telegram through Bahrain Radio addressed to ZADCO Marine. Telex No.: 22948 ZDCAUH EM. Cable: ZIR Marine.

Voice communication to "Zirku Marine" by SSB. Operation Mode A3J Upper Side Band within a range of approximately 250 km.

Permanent watch on carrier frequency: 2036.4 kHz.

Talking on standard Marine Duplex HF Channel: 405, 605, 828

Also see "VHF".

Notice of Arrival: Arrival Message shall be sent to ZADCO Marine 96 hours before arrival at the Port Limits.

Confirmation shall be given 48 hours and 24 hours from ETA.

Voice contact shall be made with "Zirku Marine" by SSB or VHF 6 hours prior to arrival.

Arrival Message: Arrival Message should contain the following:

Vessel's name and Master's Name/Abu Dhabi Agent's Name/Port of Registry/n.r.t.
ETA Port Limits
Arrival drafts/Departure draft F & A
Quantity of ballast
Estimated deballasting time
Possibility of simultaneous operation/permanent ballast
Cargo required
Maximum loading rate & IGS operative.
Part cargo and slops/to comingle
Derrick capacity/No. and size of manifolds/mooring brackets
Last Port of call and next Port/EDP accepted
Direction of approach

VHF: Voice communication to "Zirku Marine" by VHF Channels: 16, 62 and 64.

Permanent simultaneous watch maintained on these Channels.

Arrival: VHF contact should be made with Zirku Marine requesting instructions.

Once contact has been established through Channel 16 further conversation should be conducted on either Channel 64 or 62 upon operator's instructions.

Pilot/Loading Master on board: Although he will bring on board his own VHF communication units with private frequencies, the tanker VHF should remain operational at all times.

At Anchorage: Permanent watch should be kept on Channel 16 and on other Channels (62 or 64) as requested by the Zirku Marine operator.

Traffic Separation: North-bound vessels intending to cross the Separation Scheme, and South-bound vessels intending to cross the North port limit, should report their intention on Channels 16 or 62 and follow instructions.

SBMs: The terminal of Zirku Petroleum Port is located about 8 nautical miles N.N.W. of Zirku Island and consists of two single Point Mooring buoys whose exact coordinates are as follows:

SBM "Alpha"	Lat. 25° 00′ 32″ N.	Long. 52° 59′ 02″ E.
SBM "Bravo"	Lat. 25° 01′ 36″ N.	Long. 52° 59′ 30″ E.

A small mooring buoy for small craft is in position: 1.5 miles East of Alpha.

SBM Description: Both buoys are identical.

Buoy Body: The buoy is a circular steel structure with a diameter of approximately 12.5 m. It has a rotating assembly. The colour is orange.

Hoses: The buoy is equipped with 2×20 in. floating hoses with a 16 in. tail end hose connection. The outer hose string is 296 m. and the inner one 285 m. Each string is equipped with winker lights.

Hawser: The mooring systems consist of a single 18 in. circumference grommet hawser of double braided nylon, with an overall length of 53.4 m., ended by a short length of 76 mm. diameter chafe chain.

Light: The buoy is fitted with a navigation light emitting a Morse "U" flashing signal every 15 seconds visual on 360° up to a 5 nautical miles range.

Fog Horn: The fog horn fitted on the buoy emits a Morse "U" blast every 30 seconds and is activated when necessary by a remote control system.

Radar Reflector: A radar reflector is installed on the buoy structure.

Water Depth: The minimum water depth in the vicinity of the SBM Buoys is 27 m. above chart datum.

MOORING: All vessels arriving at this port are required to have adequate draft and trim for safe manoeuvring purposes. The propeller should be completely immersed. The recommended trim for manoeuvring in ballast is 3.0 m. List will not be tolerated.

Tanker Material Equipment: The tanker must have the port side derrick rigged for lifting the shore equipment on board, the minimum derrick capacity shall be 10 tons.

A good messenger line of approximately 4 in. circumference nylon line to be ready on the forecastle.

The forecastle should be fitted with Smit or Chain Stopper type brackets, strong mooring bitts and Panama Leads.

Terminal Material Equipment: One basket will be lifted on board with hose connection equipment and tanker mooring equipment if necessary.

Procedure: Full power must be available on tankers' main engine.

Once the optimum approach route has been selected the tug will pull away the hose strings and the tanker will proceed toward the buoy at a suitable speed.

When approximately 300 m. from the buoy the mooring launch will be instructed to bend on the messenger line from the Panama Lead to the mooring hawser pick up line.

The tanker will be brought to a dead stop at 60 m. from the buoy.

The chafe chain will then be winched aboard and secured.

Once the tanker is secured, the tug will pass its towline to the tanker's stern and then maintain tension on the towline throughout, to avoid any buoy kissing.

Emergency Fire Wire: All ships shall have a fire wire hanging from the bow and the stern to enable tugs to immediately connect in case of emergency – Circumference of wire to be at least 6 in.

Weather Limits: Mooring operation can be carried out in up to 25 knots wind speed and significant waves up to 5 ft.

TUGS: A tug of 2×1,500 h.p. and a mooring launch of 2×275 h.p. wi assist the berthing.

HOSE CONNECTION:

Terminal Connection Team: After mooring is completed, the hose connection team will board, to assist the crew.

Tanker Connection Team: An officer should attend the hoses with a least 3 deck hands and 1 boatswain. In addition one skilful winchma will be required.

Tanker Material Required: Miscellaneous tools, shackles, wires ropes plus fire hose and extinguisher should be ready close to the manifold. The area around the manifold should remain free of a equipment to enable safe hose handling.

Terminal Material Supplied: 16 in. to 16 in. Spool pieces. Chain hoists tirfors, gaskets, wrenches, flange bolt sets, butterfly valve handles, se of miscellaneous chains, ropes, slings, etc.

Flange size: The tail end hose flange size is a 16 in. camlock coupling Before berthing the tanker manifold should be ready for direc connection, blind flange removed, and 16 in. to 16 in. Spool Piece fitted

The two tanker manifold connections should be chosen in such a way that access to both flanges is possible.

Procedure: Having completed the mooring operation, the mooring launch will proceed to the end of the floating hoses to tow them to a position beneath the tanker's derrick hook.

The inner (or shorter) of the hoses will be lifted above deck level and the end swung inboard.

The hose will be lifted by such length to match the distance between the rail and the tanker manifold, then held with snubbing chains and the hose end lowered and connected to the manifold flanges.

The same operation will be performed on the outer (or longer) one.

LOADING: *Rate:* The maximum loading rate will be 12,500 cu.m.p.h using both hoses.

Care will be taken not to exceed the rated working pressure to be supported by the hoses which is 15.5 bars (225 p.s.i.).

Procedure: Once the hoses have been connected and checked, the butterfly valves opened and the tanker pipe network set up, the Loading Master can give the go-ahead upon request from the Chief Officer and pumping will commence at slow speed at the beginning (by gravity), approximately 7,000 bbls./p.h., then the rate increased up to the rate requested by the Chief Officer.

An inspection of the floating hose strings and the buoy, including waters around the terminal, should also be made during the first few minutes of cargo transfer to ensure there is no leakage.

Once reached, the flow rate will be maintained until further instruction is given by the Chief Officer to the Mooring/Loading Master.

Valve Closure: No valves which will stop or seriously impair or reduce the flow rate of oil from the shore pumps are to be operated without prior agreement with the shore control room (ZCC) through the Loading Master.

10 minutes' notice should be given to the Loading Master for reducing the loading rate or stopping.

The practice of throttling back on the ship's cargo valves is to be avoided. If a lower rate is required, the shore is to be advised and the pumping rate will be reduced to the required level.

The Master will be held liable for any damage arising from the sudden cessation of flow caused by default of the ship.

It cannot be over-emphasised that to do so can be extremely dangerous and cause extensive damage to equipment in addition to possible oil pollution.

Failure of Communication: In case of failure of communications between the Loading Master and Zirku Control Room (ZCC), the loading will be automatically stopped.

Accommodation: Cabins: Two single cabins on board the tanker must be allotted to the Mooring/Loading Master and his Assistant.

Terminal Team: A rest room must be allotted to the hose connection team (3/4 people) should they be required to stay on board by the Mooring/Loading Master. This will only be the case in adverse weather conditions.

Working Location: The working location of the Mooring/Loading Master is the cargo control room.

A portable unit of around 25 kgs. will be installed in this room and operate from either a 110/115 v. or 220/240 v., 50/60 kHz. supply, such a socket must be available in the cargo control room.

Terminal Personnel: As long as the tanker is secured to the Buoy a permanent watch will be performed by the Mooring/Loading Master and/or his assistant in the cargo control room with the portable unit.

Contact will be permanently kept with the Zirku Control Room (ZCC) private VHF Channel.

Tanker Personnel: A tanker officer speaking English should be permanently on duty with the Mooring/Loading Master. The Chief Officer must be available at any time during the deballasting and loading operations (room and telephone number).

In addition to the tanker officer at least two crew members will be in contact with control room through adequate W.T. and must be on duty permanently on the deck keeping watch on the tanker and terminal equipment.

Accommodation ladder will be continuously adjusted by the crewmen with regard to the sea state and tanker draft to provide safe access to the deck at any time of the operations.

Ullages: Ullage measurements shoud be taken by remote gauge while loading.

Opening the ullage tank lids should be avoided.

When necessity involves opening the lids the Mooring/Loading Master's approval must first be obtained.

The Mooring/Loading Master will check and approve the ullage report according to ullage measurements.

Characteristics:

API: around 34
S.G. around 0.85
Temperature 20° C. to 35° C.

More accurate characteristics will be transmitted to the tanker on arrival.

BALLAST: *Quantity:* Tankers arriving at Zirku Petroleum Port for berthing should keep onboard at least 30% of their d.w.t. as ballast until further instructions received from the Mooring/Loading Master.

Tankers capable of deballasting and loading simultaneously should have on board a total of not less than the 30% d.w.t. requested for berthing so that in normal circumstances they will not be flying light whilst moored at the buoy.

Vessels arriving with insufficient ballast may be required to increase the quantity, should the Mooring/Loading Master consider it necessary.

Quality: Vessels arriving with ballast on board to be discharged into the sea must ensure that the ballast, lines and pumps are clean and free from oil before commencing discharge. If necessary the initial quantity and the drainings should be pumped into the slop-tank. A permanent deck watch shall be kept during this operation with overside lights displayed at night on both sides of the vessel at the discharge points.

Deballasting Facilities: There are no deballasting facilities at Zirku Terminal for receiving dirty ballast.

UNMOORING/DEPARTURE: As soon as the loading operation is completed, the vessel will vacate the berth.

The tanker's cargo manifold valves and butterfly valves at the hose end will be closed. The hoses once disconnected will be swung outboard and lowered to the water with the derrick and released.

The tanker will leave the terminal by slipping the mooring. Once the mooring is slipped, the tanker will put the engines astern, drop back until clear of the floating hose, and then steam clear of the terminal.

The mooring launch will be positioned to tow the floating hoses clear, where necessary. The tug will help the tanker to clear the terminal if so required by the Mooring/Loading Master. The mooring connection team will disembark at this stage and the terminal equipment be lowered into the tug. It will be necessary to make a lee to perform these operations safely.

Waiting Area: In the case of no "Early Departure Procedure" arrangements having been made, the tanker will be anchored in one of the anchorage areas waiting for cargo, documents which will be sent by the pilot boat as soon as possible.

In case of the tanker being delayed from sailing for any reason (engine repairs, waiting order, etc) the Mooring/Loading Master will disembark once securely anchored.

When the tanker is ready to sail through the North Departure Route, 2 hours' notice will be given to the Mooring/Loading Master.

Departure Route: Any loaded tanker leaving Zirku Petroleum Port will proceed through the following departure route at a speed not exceeding 8 knots.

Buoy No. 1	Lat. 25° 02′ N. Long. 53° 00.8′ E.
East Mark	BYB VQ(3)5s.
Buoy No. 2	Lat. 25° 04.4′ N. Long. 53° 02.4′ E.
Safe Water	RW Oc 15s.
Buoy No. 3	Lat. 25° 06.4′ N. Long.53° 03.0′ E.
Safe Water	RW LFl 10s.
	Crossing Pipe 30 in.
Buoy No. 4	Lat. 25° 09.8′ N. Long. 53° 02.6′ E.
Safe Water	RW Oc 8s.
	Crossing 3 pipes 18 in. & 30 in.
Buoy No. 5	Lat. 25° 11.2′ N. Long 53° 00.2′ E.
Safe Water	RW MO(A) 10 s.
Buoy No. 6	Lat. 25° 13.0′ N. Long 52° 58.9′ E.
West Mark	YBY VQ(9) 10s.

To Das Channel Buoy No. 10. Leave to starboard.

MEDICAL: Although a medical officer is resident on Zirku Island, consultations will be possible only on an emergency basis.

SERVICES: Following services are NOT available at Zirku Petroleum Port:

Bunkers.
Fresh Water.
Food.
Engine Repairs.
Deratisation.
Shore leave for the crew.
Crew changes.

DENSITY: The salinities are high as a result of the high rate of evaporation.

At the terminal, the water density depending on the sea temperature ranges from 1030 to 1035.

WEATHER: *Seasons:* Two principal seasons can be distinguished in the Gulf. The cool "Winter" season extends from mid November to mid March and the hot "Summer" season from mid May to mid September. The two intermediate periods are transitional and the weather experienced may have either Summer or Winter characteristics.

Winds: The most frequent (54% of the time) is named 'Shamaal' and blows from W.N.W. to N. principally in Winter. The 'Noshi' blows from N.N.E. to E.N.E. for 20% of the time.

Local effects of Monsoon, called the 'Kaus' blows from E. to S. 17% of the time.

Finally, during Winter only, the 'Suhaili', blows for 9% of the time from W.S.W. to W.

The strength of these winds is approximately proportional to their probability of occurrence but at their strongest they can give rise to sandstorms and rough seas for several consecutive days.

Temperature: The extreme monthly mean values of air temperature are 20°C in February and 34°C in August with a lowest minimum of 9°C and a highest maximum of 44°C during the same months.

Tides: Around Zirku Island the tide is variable with small diurnal predominance. However this semi diurnal effect is not of great significance and for all practical purposes it can be said that there is only one high water and one low water per day.

The maximum range is about 1.5 m.

The mean usual range is 1.0 m.

Currents: At the terminal tidal currents are semi diurnal.

The current speed reaches 1 knot regularly at each tide.

Roughly the flood runs S.W. and the ebb N.E. but the turn of tide is very slow when the current directions are variable.

Predictions may be found to be considerably influenced by strong winds, especially the 'Shamaal'.

GENERAL: *Navigation Aids Dues:* The light dues for the Gulf navigational aids will be levied for the account of M.E.N.A.S.

These dues will be paid once per voyage at the first port of call in the Gulf.

Masters are requested to keep the receipt as a voucher if requested by any other Port authority within the Gulf.

Agency: Ship-owners must have their own representative Agency in Abu Dhabi.

Zadco will be acting as a sub-Agency to liaise with the main Agency in Abu Dhabi for all queries regarding mail, telexes, medical assistance, letters of Protest etc. . . .

OPERATORS: Zakum Development Company, P.O.Box 6808, Abu Dhabi, U.A.E. *Tel:* 367400, Ext. 6400. *Telex:* 22948 Zdcauh Em. *Cables:* Zirmarine. *Contact:* J. F. Poncet/G. Lederer, Zirhu Marine Superintendents.

AGENT: (Protecting only): National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.Box 377, Abu Dhabi, U.A.E. Cables: "Confidence" Abu Dhabi. Telex: 22248 ("Gacauh Em"). Tel: 334300.

NOTES

Please also advise Shipping Guides Ltd.

United Kingdom

HEALTH – ALL PORTS:

PORT HEALTH (The Public Health (Ships) Regulations)

1. Simpler procedures for health clearance of ships arriving in the United Kingdom came into operation with effect from 1st April 1978.

2. Under these new rules the Master of a ship arriving from a foreign port must report to the port health authority†

(1) The occurrence on board during the voyage* of
- (a) death, other than by accident,
- (b) Illness where the person or persons concerned
  - (i) has or had a temperature of 38°C or greater which was accompanied by a rash, glandular swelling or jaundice, or persisting for more than 48 hours;
  - (ii) has or had diarrhoea severe enough to interfere with work or normal activities, or

(2) the presence on board of
- (a) a person suffering from an infectious disease or who has symptoms which may indicate the presence of infectious disease
- (b) any animal or captive bird of any species including rodents and poultry, or mortality or illness among such animals or birds.

(3) any other circumstances which are likely to cause the spread of infectious disease.

If there is nothing to report under any of these headings the Master has no need to obtain health clearance unless an authorised officer otherwise directs. A proportion of ships will be boarded and checked. If any of the conditions in (1)a (1)b and (2)a or (3) have occurred permission (Free Pratique) from an authorised officer will be necessary before disembarkation or commencing operation.

3. If the Master has something to report under 2 above he must:

(1) send a radio message not more than 12 hours and where practicable not less than 4 hours before arrival, giving the relevant information, to the port health authority† or, if the ship is not equipped with a radio transmitter, notify the port health authority†, wherever practicable before arrival and otherwise immediately on arrival;

(2) show or give the appropriate day or night signal when the ship enters the jurisdiction of the port health authority† (the codes are set out below);

(3) Until "Free Pratique" for health purposes has been given see to it that no person, other than Pilot, Customs officers, Immigration officer or authorised officer boards or leaves the ship without the permission of the medical officer;

(4) complete a Maritime Declaration of Health and arrange for it to be handed to the authorised officer.

In relation to the presence or illness of animals on board etc., the requirements at (2), (3) and (4) do not apply but where plague has occurred or is suspected amongst rats or mice or there has been abnormal mortality among them, a Maritime Declaration of Health should be completed.

The requirement at 3(4) above does not apply to a ship which has come directly from a port in the expected area of the Council of Europe i.e., Belgium, France, Greece, the Irish Republic, Italy, Netherlands, Spain and the United Kingdom.

4. Where it is necessary to obtain "Free Pratique" for health purposes the Master should have already to hand the authorised officer, a list of passengers and crew leaving the ship together with the addresses they are going to in the United Kingdom.

5. An authorised officer may, in circumstances other than those set out above, direct that the Master shall complete a Maritime Declaration of Health and that the Master shall apply restrictions on boarding or leaving the ship.

6. The Master of a ship that has met another ship, which has proceeded from a foreign port, or has met an off-shore installation, is required to comply with the rules in paragraphs 2-3 (but if the ship has proceeded from an excepted port a Maritime Declaration of Health need not be completed).

7. If the port health authority† is satisfied that the Master of a ship was aware, or should have been aware, of conditions and failed to report them then action may be taken under the Public Health legislation which may result, on summary conviction, to a maximum fine of £100 plus £50 per day.

† Or the local authority responsible for port health control.

* If more than 4 weeks have elapsed since the voyage began it will suffice to give particulars for the last 4 weeks.

INTERNATIONAL CODE OF SIGNALS PRATIQUE MESSAGES

ZS	My vessel is "healthy" and I request Free Pratique	Q
	*I require health clearance	QQ
ZT	My Maritime Declaration of Health has negative answers to the six health questions.	
ZU	My Maritime Declaration of Health has a positive answer to question(s)……… (indicated by appropriate number(s)).	
ZV	I believe I have been in an infected area during the last thirty days.	
ZW	I require Port Medical Officer.	
	ZW1 Port Medical Officer will be available at (time indicated).	
ZX	You should make the appropriate Pratique signal.	
ZY	You have Pratique.	
ZZ	You should proceed to anchorage for health clearance (at place indicated).	
	ZZ1 Where is the anchorage for health clearance?	
	I have a doctor on board.	AL
	Have you a doctor?	AM

*By night, a red light over a white light may be shown, where it can best be seen, by vessels requiring health clearance. These lights should *only* be about 2 m. (6 ft.) apart, should b exhibited within the precincts of a port, and should be visib all round the horizon *as nearly as possible*.

Health clearance may be given in three ways:
- a) Wholly in plain language.
- b) Partly in the above signal code, remainder in pla language.
- c) Wholly in the above signal code.

Issued by the Health Departments of the United Kingdo

GENERAL:

Regulations for tankers entering or leaving ports in the Unite Kingdom:

Application of the Regulations: The British Government have issued th following regulations, which came into force on 15th October, 198 applicable to tankers of 1,600 g.r.t. and over of any nationality which:

Have a cargo of chemicals, gas or oil in bulk, or;

Have not been declared gas free after having carried such a carg

Reports: Before entering the limits of any harbour a report must be mad to the Harbour Master of that harbour giving the following information

- (a) Name and call sign.
- (b) Country of register.
- (c) Length, draft and beam.
- (d) Destination. (This may not be the same as the harbour throug which the tanker is passing).
- (e) ETA at pilot station or harbour limits.
- (f) Brief description of cargo and quantity in tonnes.
- (g) Is vessel fitted with inert gas system?
- (h) If inert gas system is fitted, is it operational?
- (i) Have cargo tanks been rendered non-inflammable?
- (j) Has a certificate been issued that the vessel complies with th IMO Codes for the Construction and Equipment of Ship carrying:
  - (i) Dangerous chemicals in bulk, or;
  - (ii) Liquefied gases in bulk?
- (k) Any defect in the hull, machinery, or equipment which may:
  - (i) affect the safe manoeuvrability of the tanker or;
  - (ii) affect the safety of other vessels in the vicinity of th harbour, or;
  - (iii) constitute a hazard to the marine environment, or;
  - (iv) constitute a hazard to persons or property in the vicinity o the harbour.

Any changes to the above which occur before entering the harbou limits or while within those limits must be notified to the Harbour Maste

Check List: A check list is required by the Pilot and the Harbour Maste giving the following information:

Details and classification of the vessel.

State of machinery, anchor, fire-fighting, navigational and radi equipment.

State of safety certificates and other documents.

Details of officers' certificates of competence.

Check List Forms giving full details can be obtained from: Departme of Trade, Eileen House, 80-94 Newington Causeway, London SE1 6DD Tel: 01-407 8671.

Or from Department of Trade Marine Offices at the following ports:

Aberdeen	Glasgow	Middlesborough
Avonmouth	Hull	Plymouth
Belfast	Ipswich	Southampton
Cardiff	Leith	South Shields
Dover	Liverpool	Swansea
Falmouth	London	Tilbury

ABERDEEN: 57.09 N. 02.03 W. (See Plan Book)

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Light Certificate.
1 Port Dues Certificate.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load-line Certificate.
Safety Equipment Certificate.
Lloyd's Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition, Manifests and Bills of Lading are usually sent to Agent direc from loading port.

PILOTAGE: Aberdeen has a compulsory pilotage district and there ar 10 licensed Pilots. Boatage service, although not compulsory, i available. There are 10 licensed boatmen.

There is a Navigation Control Service equipped with harbou surveillance radar which is operated by Navigation Control Officers wh operate on a 24 hour basis.

RESTRICTIONS: Navigation Channel: Max. designed width 33.5 m max. designed depth at HWOST 10.25 m. Traffic signals regulate th movement of vessels in the Navigation Channel.

Entrance to Victoria Dock, depth at MLWS 6.6 m., clear width a entrance 43 m.

MAX. SIZE: The port can normally accommodate a vessel of up to 160 m. in length, 24.4 m. beam and drawing 9.3 m. of water, and at the various berths in tidal waters can handle expeditiously bulk containers and general cargoes. A vessel of length 166 m. has been handled.
HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an Officer of H.M. Customs depending on where the ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All Ports" before first UK port.
RADIO: There is a VHF radio communications system which operates on Channels 6, 11, 12 and 16.
BERTHING: Tidal:

	Length	*Depth* MHWS
Tidal Harbour	732 m.	9.3 – 10.3 m.
Albert Basin	1,806 m.	8.7 – 13.6 m.
River Dee (Navigable)	913 m.	8.0 – 10.3 m.
River Dee Dock	417 m.	9.3 – 9.9 m.
Upper Dock	463 m.	9.0 – 10.3 m.
Victoria Dock	1,532 m.	10.3 – 13.6 m.

Deep-Water Berths:

No. 1 Atlantic Wharf: This is 146 m. long with 9.3 m. at MLWS. Two-storey transit shed. Excellent road and rail connection.

No. 2 Pacific Wharf: This is 160 m. long with 9.9 m. at MLWS. Open quay. 2×6 ton and 1×50 ton electric Portal cranes capable of handling heavy lifts and containers.

No. 3 Waterloo Quay: This is 180 m. long with 9.9 m. at MLWS. 1×20 ton crane at Waterloo Quay West. Ro-Ro service operated by P&O to Shetland.
FRESH WATER: This service is provided by the Grampian Region Water Services and is available at all quays.
REPAIRS: Ship repairing facilities and shipping supplies are offered by a number of private firms and individuals with premises beside the harbour.
DRY DOCKS: (Pontoon Docks).

	Overall Length (m.)	*Breadth at Entrance* (m.)	*Depth on Blocks* (m.)	*Lifting Capacity*
No. 1	55	8.8	4.9	700 tonnes
No. 4	55	11.6	5.5	1,000 tonnes

There are also 2 privately owned slipways and 1 drydock.
MEDICAL: Doctors and hospitals facilities available. Agents should be advised in advance of any medical attention required.
CUSTOMS ALLOWANCES: At the discretion of Local Customs Inspector. Normal allowances are equivalent to 8 oz. of tobacco per man and equivalent to 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port for more than 3 or 4 days may receive extra allowances.
CONSULS:

Belgium	G. D. G. Mackinnon, 23 Market Street
Denmark	R. P. H. Pirie, 62 Marischal Street
Finland	D. G. R. Stroud, 62 Marischal Street
France	G. D. G. Mackinnon, 23 Market Street

Spain	D. G. R. Stroud, 62 Marischal Street
Sweden	R. P. H. Pirie, 62 Marischal Street

AIRPORT: International airport nearby at Dyce. There are frequent daily jet services to London operated by British Airways, and in addition British Airways also operate services to Edinburgh, Glasgow, Prestwick, Wick, Orkney and Shetland. There are also services to Manchester and Birmingham.

Air U.K. operate direct services from Aberdeen to Amsterdam, Belfast, Bergen, Esbjerg, Copenhagen, London (Stansted), Paris, Stavanger, Edinburgh, Jersey, Leeds/Bradford, Humberside, Newcastle, Norwich, Isle of Man and Teesside.
TIME: BST is GMT plus 1 hour. GMT during Winter months.
HOLIDAYS: 1st and 2nd January; Spring Holiday (variable date); Summer Holiday (variable date); September Holiday (variable date); Christmas Day (25th December).
POLICE/AMBULANCE/FIRE: Dial 999 from any telephone and ask for service required.
TELEPHONES: There are berths at which GPO telephone service can be made available to vessels. All operational posts are linked by telephone network.
DEVELOPMENTS: Forest products terminal consisting of 2 deep water berths at Regent Quay to be built. The special sheds will be completed early 1986. One berth will be available November 1985 and the other in February 1986. Depth alongside 9.0 m.
AUTHORITY: Aberdeen Harbour Board, 16 Regent Quay, Aberdeen AB9 1SS, United Kingdom. *Tel:* (0224) 592571. *Telex:* 73324. *Contact:* J. R. Turner, General Manager.
AGENT: Denholm Port Services (Aberdeen) Ltd., Willowbank House, Willowbank Road, Aberdeen AB1 2YG. Tel: (0224) 580204 (24 hours), 581603. After hours 580204, 647170. Telex: 739403. Cables: Denport Aberdeen.

AMLWCH: 53.27 N. 04.20 W. (See Plan Book)

PILOTAGE: Compulsory. Pilot boards in the vicinity of the S.B.M.
ANCHORAGE: Good anchorage available 3 – 5 miles East of Point Lynas in 15 – 18 fathoms.
APPROACHES: Clear and unimpeded from East or West.
RESTRICTIONS: Berthing may be delayed because of strong tidal streams, particularly during period of Spring tides.
MAX. SIZE: No restriction on length, breadth or deadweight. Max. draft 92 ft. (28.04 m.).
HEALTH: See "Health – All Ports" before first UK port.
RADIO: Advise ETA 72 hours prior to arrival, and confirm again 24 hours before arrival.
VHF: Port operates on Channels 16, 10, 12, 19 and 46.
TUGS: Tugs not used for mooring, however 1 tug employed towing astern once mooring completed. Tugs wire used. 2 mooring launches each 1,150 h.p. One is in attendance throughout discharge. Launches equipped with VHF Channels 16, 6, 9, 10, 12, 13, 14, 25 and 26.
BERTHING: *SBM Location:* Lat. 53° 26.7′ N., Long. 4° 19.8′ W. Standard mooring connections using terminal equipment twin 20 in. nylon grommet moorings with 3 in. chafing chains. Vessels under 150,000 tonnes Summer deadweight will normally moor with only one mooring.

Water Depth: Approaches 32.80 m. Berth 31.15 m. (LLW). UKC: For 'B' Class 3.11 m.

Hose System: 1×24 in.×354 m. surface string, terminating with 1×20 in. rail hose with 150 ASA flange. For ships over 100,000 tonnes Summer deadweight, max. rate 10,000 cu.m./hr. or 1×24 in.×284 m. surface string terminating with 1×16 in. tail hose with 150 ASA flanges for ships under 100,000 tonnes Summer deadweight. Max. rate 7,500 cu.m./hr.

Line System: 2×40 in.×1.8 miles (sub-marine); 2×40 in.×3 miles (shore booster pumps to tankfarm).

Max. discharge rate: 15,000 cu.m./hr.

Position of Cargo Hose Connections: Amidships starboard-side.
DENSITY: 1025.
MEDICAL: Only in an emergency.
FRESH WATER: Not available.
FUEL: Not available.
BALLAST FACILITIES: None.
LIGHTERAGE FACILITIES: None.
REPAIRS: Repairs possible only in an emergency.
REPATRIATION: Not possible.
EMERGENCY CO-ORDINATION CENTRE: H.M. Coastguard, Holyhead. Telex: 61124. District Office: Tel: (0407) 2262. Lookout Station: Tel: (0407) 2051. Oil Pollution Control Room: Tel: (0407) 3755/7.

Also D.T.I. Liverpool Marine Division. Telex: 628474. Tel: (051) 236 6901.
BANKS: None.
SURVEYORS: None locally.
STORING: Not usually permitted.
SERVICES: Small quantities of fresh provisions only in an emergency. No tank cleaning or dirty ballast facilities available.
GENERAL: Responsible Crew member on watch on fo'c'stle head throughout period on the mooring.

Whilst on the berth, no immobilisation of main engines or steering gear is permitted as ship's main engines must be continuously available on short notice to avoid contact with the SBM. Engines used astern to keep clear of the buoy at each slack water period.

Five shore personnel, namely 2 berthing supervisors and a support group of 3 men will remain on board while the ship is moored at the SBM.

The most stringent precautions must be taken to ensure no spillage of oil occurs.
SHORE LEAVE: Not possible.
OPERATORS: Anglesey Marine Terminal, Harbour Building, Amlwch Port, Anglesey LL68 9DB, United Kingdom. Tel: (0407) 831065. *Telex:* 61603, stating for Amlwch Marine Terminal. *Contact:* Captain D. W. Bate, Harbour Master.

ARBROATH: 56.33 N. 02.35 W.

PILOTAGE: By arrangement with Perth Harbour Master.
APPROACHES: Arbroath, situated between Dundee and Montrose, has been recently downgraded from a commercial port to a fishing harbour.

There is a bar 400 m. S.E. of the Piers, depth 0.914 m. LWS, which is dangerous in heavy Easterly weather.
MAX. SIZE: Largest vessel, 65 m. length, 4 m. draft.
BERTHING: Outer harbour has an area of 1.5 ha., depth of 4.57 m. at HWST. Length of quayage 451 m.

Between the outer harbour and entrance jetty is a Wet Dock with a patent slipway (122 m. long).
FRESH WATER: Available.
FUEL: Diesel available.
AIRPORT: Dundee, 29 km.
REPAIRS: Can be carried out at repair yard.
DRY DOCKS: None. Patent Slipway 122 m. long. Length of cradle 32.6 m. Lifting power 250 tons.
POLICE/AMBULANCE/FIRE: Dial 999.

Arbroath Harbour is a station for a R.N.L.I. Lifeboat "Shoreline" and an inshore inflatable boat.
AUTHORITY: Tayside Regional Council, Harbour Master's Office, Arbroath Harbour, Tayside. *Tel:* Arbroath 72166. *Contact:* David Oram, Harbour Supervisor.

ARDROSSAN: 55.38 N. 04.49 W. (See Plan Book)

DOCUMENTS: Normal documents required:
Customs Documents.
Health Documents.
Crew List.
Passenger List.
Ship's Papers, etc.

PILOTAGE: Pilotage compulsory for vessels over 750 g.r.t. operated by Clyde Pilotage Authority. Pilot boards off Little Cumbrae Island. Pilot boat on VHF Channel 16 and 14.

24 hours notice required and amendment if ETA changes.

ANCHORAGE: In 12 to 15 fathoms 1 mile S.W. of breakwater.

RESTRICTIONS: 3 red lights vertically day and night above Port Control Tower (see "Plan Book") indicates "Port Closed".

MAX. SIZE: Eglinton Dock approx. 420 ft. by 57 ft. by 16 ft./18 ft. (depending on tide). North Montgomerie Pier Tanker Berth – max. length 575 ft., max. draft, up to 70 ft. beam, 23 ft./26 ft.; over 70 ft. beam, 22 ft./25 ft.

HEALTH: All vessels requiring attention of Medical Officer shall show flag signal ZW by day, or between sunset and sunrise, either morse signal ZW by lamp, or a red light over a white light, not more than 6 ft. apart. Other vessels shall show flag signal "Q" by day, or between sunset and sunrise either morse signal Q by lamp or a red over a white light, not more than 6 ft. apart.

Certificate of Pratique will be issued by Customs Boarding Officer on receiving a satisfactory and fully completed Maritime Declaration of Health. No further formalities required at subsequent ports of call in the U.K.

Also see "Health – All Ports" before first U.K. port.

RADIO: VHF Channels 12, 14, and 16. Radio telephone via Portpatrick.

TUGS: On application to Clyde Tug Owners.

BERTHING: No special requirements except with draft over 16 ft. when vessel may be delayed waiting for tide.

STEVEDORES: Orders to be given by 1130 hrs. previous day.

MEDICAL: No advance notice required unless medical attention is necessary immediately on vessel's arrival. No hospital facilities in Ardrossan, nearest hospital being at Irvine, 6 miles and Kilmarnock 16 miles.

TANKERS: Hoses 8 in. Berths (1) Up to 3,000 d.w.t. (2) Up to approximately 20,000 d.w.t. Max. draft 22 ft./26 ft. depending on beam and tide.

DENSITY: 1025.

FRESH WATER: Available continually at all berths.

FUEL: Marine oils available by road tanker.

FIRE PRECAUTIONS: Patrolman required for hazardous cargoes.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Opened and closed by crew.

CERTIFICATES: Following Certificates are requested: Load Line, Safety Radio, Safety Equipment, Safety Construction, Derat, and Current Trinity House Light Bills.

CUSTOMS ALLOWANCES: Standard U.K. allowances.

IDENTIFICATION CARDS: Not required.

CONSULS: Norwegian Vice Consulate, Danish Vice Consulate: R. L. Alpine & Co. Ltd., Winton Buildings, Ardrossan. Tel. Ardrossan 3065.

REPAIRS: Limited repair facilities.

REPATRIATION: Customs Boarding Officer acts for Immigration Dept. and arrangements for repatriation can be arranged in conjunction with ship's Agent.

AIRPORTS: Prestwick 18 miles. Glasgow 25 miles.

TIME: BST, that is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: 1st and 2nd January; Easter Monday; Third Monday in July; First Monday in October; and Christmas Day. Cargo work may be available on certain holidays by special arrangement.

POLICE/AMBULANCE/FIRE: Police tel. Saltcoats 63966; Ambulance, Fire: Ask telephone operator.

SHORE LEAVE: No restriction.

DEVELOPMENTS: Roll-on/roll-off berth for specialised traffic.

AUTHORITY: Ardrossan Harbour Company Limited, Harbour Office, Ardrossan, Ayrshire, United Kingdom. *Tel:* (0294) 63972-4. *Telex:* 777954. *Contact:* G. Barclay, Managing Director. W. D. Gillespie, Harbour Master and Assistant Manager.

AGENT: Denholm Ship Agency Ltd., Chapelhill Mount, Dalry Road, Ardrossan, Ayrshire KA22 7JT. Tel: (0294) 6211. After Hours: (0292) 41865, (0475) 33241. Telex: 778852.

Outer	1,372	7.3	146	No restriction	7.3

Storage and Warehousing Facilities: Open storage space totalling 2.7 hectares.

Cranage and Mechanical Handling: 1 mobile crane 1.5 tonnes, 1 mobile crane 3 tonnes; 2 mobile cranes 35 tonnes, 1 mobile crane 40 tonnes, 1 portal crane over 35 tonnes. 8 mechanical shovels from 0.5 to 4.6 cu.m. capacity. 2 conveyors loading speed 300 – 650 tonnes/p.h. There is also a fixed coaling appliance capable of loading 600 tonnes/p.h. 2 forklifts 2.7 tonnes, 1 forklift 8.2 tonnes.

STEVEDORES: 24 hours notice of ETA should be given to stevedores. *Port Working Hours:* Monday-Thursday 0800 – 1700 hrs., Friday 0800 - 1600 hrs. overtime 0600 – 0800 hrs., 1700 – 2100 hrs.

Saturday 0600 – 1200 hrs. Sunday 0800 – 1700 hrs. Any other hours by arrangement.

MEDICAL: Hospital facilities nearby in town.

DENSITY: Varies according to weather.

FRESH WATER: Available at all berths.

FUEL: All grades available, 24 hours notice.

GANGWAY/DECK WATCHMEN: Deck watchman required; may be supplied by arrangement with stevedores.

OPENING/CLOSING HATCHES: Performed by ship's crew.

CUSTOMS ALLOWANCES: 0.25 lb. of tobacco or equivalent cigarettes, and one-sixth of a gallon wine/spirits per man.

IDENTIFICATION CARDS: Seamen's identity cards should be carried.

REPAIRS: Most engine and deck repairs available.

DRY DOCKS: Two at Troon, Ferguson-Ailsa Ltd.

No. 1 Dock: 85.3 m. long, 11 m. wide, 3.5 m. depth over sill.
No. 2 Dock: 140.4 m. long, 17 m. wide, 4.7 m. depth over sill.

AIRPORT: Nearest at Prestwick, 7 miles away, mostly International flights.

Air UK flights from Edinburgh to Aberdeen, Amsterdam, Esbjerg, Humberside, Leeds/Bradford, London (Stansted), Norwich and Paris.

TIME: GMT plus 1 hour, reverting to GMT in Winter months.

HOLIDAYS: Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Dial 999, and ask for service required.

TELEPHONES: No connection on board vessel.

SERVICES: Special arrangements can be made for tank washing and compass adjusting through Glasgow.

SHORE LEAVE: No restrictions on shore leave.

AUTHORITY: Associated British Ports – Ayr & Troon, Port Office, Ayr KA8 8AH, United Kingdom. *Tel:* (0292) 281687. *Telex:* 778853 Kenny G. *Cables:* Dainnex Ayr. *Contact:* T. L. Kenny, Port Manager.

AGENT: Denholm Ship Agency Ltd., 31 Miller Road, Ayr KA7 2BS. Tel: (0292) 289619. After Hours: (0292) 41865, 43095. Telex: 779363 Cables: Denholm Glasgow.

BANGOR: 54.39 N. 05.40 W.

PORT LIMITS: A line drawn from Wilson's Point to Luke's Point.

DOCUMENTS: Standard U.K. documentation.

PILOTAGE: Not compulsory but advisable if unfamiliar with the area. Pilot may be obtained from the pilot station at Carrickfergus after call on VHF Channel 16.

ANCHORAGES: 2 cables off North Breakwater or in Ballyholme Bay with offshore winds.

RESTRICTIONS: Due to limited amount of berthing facilities, permission should be sought from the Harbour Master before entering the Harbour.

MAX. SIZE: Vessels up to 70 m. LOA and 4 m. draft can be accepted at HWOST. No restriction on beam.

TUGS: Can be ordered from Belfast if required.

BERTHING: Main berth is at South side of Central Pier. This is of steel piles and concrete and is fendered with rubber tyres. North side is similar but unfendered. At South Pier vessels up to 40 m. and 2.8 m. draft can be accommodated. This berth is of stone and is also unfendered. Vessels will take the bottom at all berths.

A new North Pier runs in a N.W.'ly direction.

The seaward side is built of S.H.E.D. units and the sheltered Western side of concrete with corrugated steel piling faced with Neoprene rubbing strips.

The centre section of this West side provides safe berthing over a length of 95 m. with a depth of 4.2 m. LW.

BRIDGES: None.
STEVEDORES: None locally.
MEDICAL: Full hospital facilities available.
HEALTH: Standard regulations apply. Vessels should inform Port Health Officer Belfast of any sickness on board.
VHF: A listening watch is kept on VHF Channel 16 from about 1 hour before HW till HW when vessels are expected. Working frequency is Channel 11.
FRESH WATER: Available on Central Pier.
FUEL: Available by tank wagon.
TANKERS: No facilities.
CONSULS: Nearest at Belfast.
REPAIRS: Minor repairs only.
SURVEYORS: Available from Belfast.
GANGWAY/DECK WATCHMEN: Not usually available.
HATCHES: Opening/closing done by ship's crew.
CUSTOMS ALLOWANCES: U.K. Regulations apply.
CARGO GEAR: Ship's gear at 5 ton diesel crawler crane used.
REPATRIATION: Can be arranged by Agent.
AIRPORT: Aldergrove Airport.
TIME: GMT plus 1 hour from late March – late October. GMT for rest of year.
POLICE/AMBULANCE/FIRE: Dial 999.
TELEPHONES: Cannot be placed on board. Several in vicinity of berth.
SHORE LEAVE: No restrictions.
DELAYS: Local importers are shown preference. Vessels could be delayed if a local vessel is due.
DEVELOPMENTS: The North Breakwater is at present being extended in a North-Westerly direction in order to afford shelter to vessels in the Harbour.
AUTHORITY: North Down Borough Council, Town Hall, Castle Grounds, Bangor, Co. Down, Northern Ireland. *Tel:* 454371. *Contact:* Captain W. O. Burns, Harbour Master.

BARROW-IN-FURNESS: 54.07 N. 03.14 W. (See Plan Book)

PORT LIMITS: The seaward boundaries of the port are a line joining Westfield Point (Lat. 54° 05′ 33″ N., Long. 03° 11′ 10″ W.) with Scar End Point on Walney Island (Lat. 54° 03′ 31″ N., Long. 3° 12′ 17″ W.).
DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Health Declaration.
Ship's Certificates and Cargo Documents.
PILOTAGE: Pilot boards at Lune buoy, using Pilot cutter, usually 2 or 3 hours before high water.

The Heysham Lake Pilot vessel listens on 2182 kHz (MF) and is also equipped with VHF listening continuously on Channel 16. The working frequencies are 2241 kHz and 2246 kHz and Channels 6, 12 and 14 respectively. Ships which are suitably equipped should pass their ETA through any United Kingdom Post Office Coast Station to their Agent 24 hours before arrival.
ANCHORAGE: At Lightning Knoll Buoy, depth of 10 m. at LW. In adverse weather conditions vessels proceed to Ramsey Bay, 16 km. away, for shelter. Piel Harbour to North of Piel buoy.
RESTRICTIONS: No docking after HW. Tidal range 6.4 m. – 9.76 m. Deduct 0.5 m. from height of high water to allow for invert at dock entrance. Access to the port, which is protected from the prevailing Westerly winds by Walney Island, is gained from the Irish Sea through the harbour along the well-defined Walney Channel. The depth of water on the Ramsden Dock entrance sill can range from 10.06 m. at high water springs to 6.4 m. at high water neaps.
MAX. SIZE: Length 183 m. Beam 23 m. Draft according to tide.
HEALTH: Vessels arriving from abroad are given Pratique by Customs Boarding Officers. In case of suspected disease or fever on board notify Agent prior arrival. Agent will advise Port Health Authorities.

Also see "Health – All Ports" before first U.K. port.
RADIO: Local stations: Anglesey Radio, and/or Port Patrick Radio.
VHF: Port VHF service. Call sign 'Ramsden Radio'. Channel 16 (156.8 MHz) Calling and Safety. Channel 12 (156.6 MHz) Port Operations.
TUGS: Liverpool tugs available on request. Notice required.
BERTHING:

Docks	*Water area in Hectares*	*Width of entrance*
Ramsden	24.8	30.48 m.
Buccleuch	12.6	30.48 m.
Devonshire	12.0	24.4 m.

Walney Channel Deep-water Berth: 259.10 m.×30.48 m.×10.06 m. depth.

Ramsden includes: Ramsden Dock Basin with 3 berths with a total quayage of 378 m., taking vessels of up to 9.15 m. draft, and Anchor Line Basin with three berths 256 m., 152.4 m., and 274.3 m., long respectively, taking vessels of up to 7.3 m. draft. Anchor Line berth equipped for Ro/Ro traffic.
DENSITY: 1025.
FRESH WATER: Available from quayside hydrants.
FUEL: No stocks at Barrow. Can be supplied by road or coastal tanker.
GANGWAY/DECK WATCHMEN: Compulsory.
OPENING/CLOSING HATCHES: Handled by ship's crew.
IDENTIFICATION CARDS: Seaman's Book or Passport required by non-British crew.
CONSULS: Netherlands, Norway, Portugal, Spain. Tel. Barrow 22323.

No. 2 Dock	(9,490 ft.)	9.8	178	23	9.1	23,000
No. 3 Dock Basin		Semi-tidal	178	23	9.1	23,000

Vessels up to 22.9 m. (75 ft.) beam can be accepted on favourable tides. Max. 23,000 d.w.t. with draft of 9.1 m. (31 ft.).

Storage and Warehousing Facilities: No. 2 Dock provides 2 quayside transit sheds totalling 7,413 sq.m. Additional covered storage within the port area comprises 4 sheds totalling 7,686 sq.m. (82,650 sq. ft.). Ample open storage space is also available.

Cranage and Mechanical Handling: 11 × 6 ton cranes at South Side No. 2 Dock. 5 × 10/11.5 ton grabbing cranes at 31 Berth, North Side No. 2 Dock.

Forklift Trucks: 35 of varying capacities up to 25 tonnes.

Pallet Trucks: 40 × 2 ton capacity.

Specialised Facilities:

i) One of the largest tank storage facilities in Britain with tank capacity of more than 260,000 tonnes suitable for oil, chemicals, and natural gas.

ii) 2 fixed Ro-Ro berths, located in No. 2 Dock and No. 3 Dock Basin. These are backed by 4 hectares (10 acres) of land for marshalling and storage of vehicles.

iii) The port is licensed to handle explosives both in dock and at specially approved anchorages.

iv) A bulk loading conveyor installed at No. 2 Dock is capable of handling coal and coke at a speed of 450 tonnes per hour and is served by road and rail, with stocking areas.
BRIDGES: Bridge swung to vessel's requirements.
STEVEDORES: An early ETA essential. Enables planning to be effected in conjunction with other work in port.

Port Working Hours: Mondays – Fridays 0700 – 1630 hrs. 3 shift working by arrangement 0600 – 1400 hrs., 1400 – 2200 hrs. and 2200 – 0600 hrs.

Daily and weekend overtime by arrangement.
MEDICAL: Hospital facilities available. Advance notice desirable.
TANKERS: 6 tanker berths, maximum draft 28 ft.
DENSITY: Density 1020.
FRESH WATER: 15/20 t.p.h. per hose.
FUEL: By barge or road transport.
GANGWAY/DECK WATCHMEN: The services of watchmen provided at discretion of Shipowner or Agent.
OPENING/CLOSING HATCHES: Work normally undertaken by ship's crew but the port will, if requested, provide a crane to assist in this work on completion of a "Hatch beam form". Riggers may be employed on this work at request of shipowner.
CUSTOMS ALLOWANCES: 1.5 oz. tobacco per day per man. 0.185 litre wine or spirits per day per man.
IDENTIFICATION CARDS: Not needed by Port Authority.
CONSULS: None. Many located at Cardiff 8 miles East of Barry.
REPAIRS: All types of repair undertaken by private ship repairers.
DRY DOCKS: One dry dock operated by Barry Dry Dock Co., length 286.5 m. and width 23.9 m.
REPATRIATION: All facilities available.
AIRPORT: Cardiff (Wales) Airport, 4 miles, served by regular airlines.

TIME: GMT, except late March – late October when British Summertime (GMT plus 1 hour) is in operation.

HOLIDAYS: Bank Holidays. Arrangements made to work if essential.

POLICE/AMBULANCE/FIRE: Call operator by dialling 999.

TELEPHONES: At main berths.

SHIP SUPPLY SERVICE: A Ship Supply Service could be provided by Cory Ship Towage with their tugs at Cardiff if required. Address: Cory Ship Towage Ltd., S.E. Wales Office, Alexandra Dock, Newport, Gwent. NP9 2NP. Tel: Newport 56835/6.

AUTHORITY: Associated British Ports, Dock Office, Barry Docks, Barry, South Glamorgan CF6 6US, United Kingdom. *Tel:* (0446) 732311. *Telex:* 498421 Abpby G. *Contact:* Mr. A. M. Whyte, Dock Superintendent.

AGENT: Lambert Brothers Ship Agencies Ltd., The Exchange, Cardiff CF1 6RX. Telex: 497701. Cables: Lambert Cardiff. Telephone: 0222 480751.

BELFAST: 54.36 N. 05.56 W. (See Plan Book)

DOCUMENTS:

1 Passenger and Crew List for Immigration.
1 Crew Declaration C142 (for H.M. Customs).
1 List of Ship's Stores (for H.M. Customs).
1 Maritime Declaration of Health.
1 Cargo Manifest.

PILOTAGE: Pilot station is situated on end of East Pier at Carrickfergus. It is manned continuously. Vessels requiring a Pilot should give as much advance notice as possible of ETA, but in any case not less than 1 hour. Pilots may be ordered through:

(i) Pilot Station Carrickfergus, tel. Carrickfergus 62329. VHF Channels 16, 9 and 12.
(ii) Port Operations Station, tel. Belfast 234422 Ext. 330, or Belfast 238506.
(iii) Belfast Harbour Office, tel. Belfast 234422 Ext. 225, 0900 – 1700 hrs. Monday-Friday.

There are two motor launches servicing Pilots. "Pilot Boat I" is 33 ft. long and "Mabel Helen" is 46 ft. 8 in. long. Both vessels are painted black with word Pilot in white letters on each side.

Pilot launches may be contacted on VHF Channel 16 and working frequency Channel 6, 8 and 12.

Usual international signals should be made for a Pilot. Pilots board from 1.5 to 2 miles S.E. of Carrickfergus. In poor visibility the pilot launch makes a sound signal of 4 short blasts. Vessels may be led into calm water before boarding.

ANCHORAGES: Safe anchorages, according to draft and size of vessel are available through Belfast Lough East of a line from Carrickfergus to Grey Point.

RESTRICTIONS:

Intended depths in the entrance channels: Victoria Channel, sea to Refinery berths – 30 ft. below datum. Refinery to Thomson Wharf – 26 ft. below datum.

Musgrave Channel, 24 ft. below datum.

Herdman Channel, 21 ft. below datum.

MAX. SIZE: Vessels' size is restricted only by depth of water available. See "Restrictions", "Berthing", and "Tankers".

RADIO: The best station for messages, cables, etc., is Port Patrick call signal GPK.

VHF: Belfast Port Operation and Information service is situated in the main harbour office building. A continuous watch is maintained on VHF on Channel 16. Working Channel is 12. Call sign is Belfast Harbour Radio.

TUGS: Tugs are owned by Cory Ship Towage Ltd., Tel. No. Belfast 743278. They are fitted with VHF Channels 16, 14, 12, 8 and 6. Tugs normally meet inward bound vessels in vicinity of No. 20 beacon. Use of tugs' lines is optional. Charge for use of each tug line is £15.

BERTHING: The following berths are equipped for handling containers or drive-on, drive-off traffic:

Berth	*Max. draft (ft.)*
Donegall Quay 2	18
(1×23 tonne derrick crane)	
Donegall Quay 4	18
(2×7.5 tonne portal crane) also Ro/Ro	
Donegall Quay 5	18
(No cranes)	
Donegall Quay 6	18
(No cranes)	
Ballast Quay	18
(1×25 tonne derrick crane) also Ro/Ro and 600 ton heavy Ro/Ro pad	
York Dock A	24
(No cranes)	
York Dock 1	24
(1×35 tonne derrick crane)	
Herdman Channel West	18
(2×30 tonne transporter cranes)	
Gotto Wharf	21
(2×30 tonne transporter cranes)	
Stormont Wharf 2	28
(200 tonne cantilever crane)	
Pollock Dock 7	18 – 34
(1×35 tonne derrick crane)	

Numerous general cargo berths and cranage from 3 – 10 tonnes.

Unitank Storage Co. Ltd. have constructed a bulk liquid terminal for the storage of petroleum, chemical products, etc. Special tankers ship liquid gas to the storage installation of Calor Kosangas (Northern Ireland) Ltd. at Musgrave Channel.

STEVEDORES: Two schooling times per day for stevedoring gangs. 0800 and 1300 hrs. Gangs for all week-end work are schooled at 1300 hrs. on Fridays.

HEALTH: Use International Code quarantine signals. Master of a ship approaching a port in Northern Ireland from a foreign port other than an excepted port must ascertain state of health of all persons on board, and must fill in and sign Declaration of Health. It should be completed and ready to deliver to the Customs Officer, or authorised officer of the Port Health Authority, whichever first boards the ship.

If any suspected diseases on board, Free Pratique will not be granted by Her Majesty's Customs until the ship has been visited by the Port Medical Officer. Therefore in these cases notify "Portelth Belfast" by radio in advance.

Also see "Health – All Ports" before first U.K. port.

MEDICAL: All kinds of medical treatment are available. Agent should be given as much notice as possible for arrangements to be made.

TANKERS: Tankers have to observe (i) Belfast Harbour Commissioners By-Laws for loading, discharging, etc., of petroleum spirit. (ii) Chamber of Shipping Tanker Safety Code. (iii) The Merchant Shipping (Tankers) (EEC requirements) Regulations 1981.

6,000 tons of tank washings can be processed at B.P. Refinery.

Tanker Berths: Oil Berth No. 4 – 35 ft. Oil Berth No. 1 – 28 ft. Oil Berth No. 2 – 28 ft. Oil Berth No. 3 – 28 ft.

DENSITY: Average density of water in Inner Harbour is about 1012, and Outer Harbour is about 1024.

FRESH WATER: Available at almost all berths. Delivery is by hose at a rate of approx. 30 t.p.h. Arrangements can be made through Dept. of Environment (Water Services Division). Tel. 746581.

FUEL: All grades of fuel oil are available. 48 hours' advance notice of requirements should be given.

FIRE PRECAUTIONS: Special precautions for vessels carrying petroleum, explosives, calcium carbide and dangerous goods are set out in the appropriate by-laws. A copy of general port fire notice, delivered to all ships on arrival.

Also see "Tankers".

GANGWAY/DECK WATCHMEN: Normally, a member of ship's company acts as watchman. Shore watchmen may be obtained through Agent.

OPENING/CLOSING HATCHES: Conventional beams and hatches and slab hatches are opened and closed by stevedores. McGregor or patent steel hatches are worked by ship's personnel. Ship's personnel required to work all types of hatches at grain silos.

CERTIFICATES:

Register. Radio Certificate. Load Line Certificate. Safety Equipment Certificate. Safety Construction Certificate. Light Bills. Passenger Certificate if applicable. Chain Register. Derat Certificate.

CUSTOMS ALLOWANCES: Tobacco: 8 oz. tobacco are permitted per man and issues are made at 8 day intervals. Wine and/or Spirits: Wine, beer and spirit issues are made, in moderation, at 4 day intervals.

IDENTIFICATION CARDS: Seamen's identity cards required.

CONSULS:

Belgium	Hillsborough 682671
Denmark	Belfast 230581
Dominican Republic	Belfast 230321
France	Belfast 660325
Germany	Ballymena 41412
Italy	Belfast 778353
Netherlands	Belfast 243126
Norway	Belfast 242242
Spain	Belfast 227571
Sweden	Belfast 230581
Switzerland	Carrickfergus 61195
U.S.A.	Belfast 228239

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: Belfast Dry Dock, length of floor 1,100 ft. breadth of floor 167 ft., breadth of entrance 165 ft., level of sill 26 ft. 6 in. below datum.

Harland and Wolff Building Dock, length of floor 1,825 ft., breadth of floor and entrance 305 ft., level of sill 16 ft. 10 in. below datum.

Two other dry docks available.

REPATRIATIONS: Crew may be changed and repatriations arranged. Immigration must be informed.

AIRPORT: Aldergrove Airport is approximately 17 miles from Belfast. There are daily flights to all parts of United Kingdom.

Air UK flights to Aberdeen and Leeds/Bradford.

TIME: British Standard Time is kept, that is GMT plus 1 hour. Reverting to GMT in Winter months.

HOLIDAYS: Stevedore holidays are 1st January, 17th March, Easter Monday and Easter Tuesday, 12th and 13th July and 25th and 26th December.

POLICE/AMBULANCE/FIRE: All can be contacted by telephoning 999 and ask for services required. Additionally: Fire Brigade Belfast 222222 Ambulance Belfast 241212; Harbour Police Belfast 232235; *or* through Belfast Harbour Radio on VHF Channels 16 and 12.

TELEPHONE: Telephone can be placed on board at certain berths.

SERVICES: All principal makes of radio, radar and gyro equipment can be serviced. Compass adjusting and D/F calibration can be carried out.

SHORE LEAVE: Normally no restrictions on shore leave.

DEVELOPMENTS: Future plans include the development of a container terminal at York Dock No. 1 (max. draft 7.3 m.) with one transporter crane of 30 tons and two 15 ton portal cranes to be erected at Stormont Wharf. Both projects due for completion mid-1985.

AUTHORITY: Belfast Harbour Commissioners, Corporation Square, Belfast BT1 3AL. *Tel:* (0232) 234422. *Telex:* 74204. *Contact:* Captain Hugh O'Byrne, Harbour Master. Mr. C. Nimmons, General Manager. Mr. G. Irwin, Chief Commercial Manager. Mr. J. F. McNamee, Chief Engineer.

AGENT: Michael F. Ewings (Shipping) Ltd., 72 High Street, Belfast BT1 1BE. Tel: (0232) 242242. After Hours: (0232) 613670, (0232) 778161. (0232) 624527. Telex: 74682. Cables: Ewingshipping.

BLYTH: 55.08 N. 01.30 W. (See Plan Book)

DOCUMENTS:
Certificate of Registry.
Load Line Certificate.
Wireless Telegraphy and/or Safety Radio Certificate.
Safety Equipment.
Ship Construction.
Light Dues Payments.
Bills of Lading, Manifest and Stowage Plan usually sent in advance of vessel.
List of Members of Crew (of ship arriving in U.K.) who are aliens or were engaged outside U.K. (Home Office Form I.B.6A). Passenger form to be completed when reporting vessel's arrival from foreign ports.

PILOTAGE: Call by R/T when within 50 miles of port, and VHF Channels 16, 6, 8 and 10), when approx. 1 hour off port. Pilot boats black hull with words "Pilot" on hull or superstructure. Letters in white. Fly International Pilot Flag at masthead and at night show International Light Signals for pilot boat on station.

Vessel requiring Pilot sounds 2 short and 3 long blasts or exhibits International Code Flag "G". By night flashes International Code Signal "G" or "PT". Pilot boats operate and will board within radius of 2 miles of East Pier Lighthouse, or further, weather permitting. Pilots board at Pier End area during adverse weather.

ANCHORAGES: No anchorages within harbour – in good weather vessels can anchor off port East of Fairway Buoy.

RESTRICTIONS: No night restrictions. Entry according to draft. Channel dredged to 7.7 m. LAT and approaches 8.6 m. LAT. Upper River and South Harbour 6.8 m. LAT. Rise of tide 4.3 m. springs, 2.1 m. neaps.

MAX. SIZE: Bulk carriers up to 22,500 d.w.t. discharge at Alcan (U.K.) Limited Terminal. Max. draft 9.8 m. LOA 200 m.

For other berths max. length 190.5 m., draft 8.5 m.

HEALTH: International quarantine signals to be used. Pratique will be granted by Customs or Port Health Officer if Maritime Health Declaration is clean. If suspected diseases on board radio "Portelth Blyth" in advance advising details.

Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio.

VHF: Details of movements within port given over VHF from Port Control Office (Tel: (06706)-2678). Calling Channel 16, working Channel 12.

TUGS: Normally join vessel at harbour entrance. Extra charge for use of tugs lines.

BERTHING: Alcan Bulk Alumina Terminal, depth alongside 10.4 m. LAT. Alcan is offering the use of its tip unloading terminal at Blyth Harbour to other firms requiring bulk cargo unloading facilities.

North Quay, South Harbour, depth alongside 8.5 m. LAT.

Coal-loading berths and waiting berths, 5.2 m. to 8.6 m. LAT. West Quay, dredged depth 7.0 m. LAT (Sto-Ro/Ro-Ro Terminal "Blyth Progress"). South Side Berths, dredged depth 8.6 m. LAT. Wimbourne Quay (Sto-Ro Terminal – "Link Blyth" – Pontoon) dredged depth 6.8 m. LAT.

STEVEDORES: Blyth Harbour Commission, Traffic Department, South Harbour, Blyth. Tel. Blyth 353611/2. ETA requested day before arrival.

MEDICAL: Notice not necessary but advisable. Hospital facilities available. Inoculation, vaccinations and/or certificates not specifically required.

DENSITY: Sea water. Fresh water effect negligible.

FRESH WATER: Obtainable from shore hydrants. Rate of delivery approximately 10 t.p.h.

FUEL: BHC operate a bunkering Agency on behalf of Shell UK Ltd. 24 hours notice usually required. Grade – gas oil.

GANGWAY/DECK WATCHMEN: Not usually employed as these duties are carried out by the crews.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco: 50/250 grammes. Wine/Spirit: Wine up to 0.75 litres. Spirits up to 0.375 litres.

IDENTIFICATION CARDS: Seaman's Book or Passport desirable.

CONSULS: Denmark, Norway, Netherlands.

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: 3 dry docks available.

	Length (m.)	*Breadth* (m.)
No. 1	94.8	14.0
No. 2	103.3	13.7
No. 3	142.6	18.3

REPATRIATION: Can be arranged by H.M. Immigration Office, Blyth.

AIRPORT: 24 km. Served by regular airlines.

TIME: BST is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: Christmas Day; New Year's Day; Good Friday; Easter Monday; May Day (first Monday in May); Spring Bank Holiday (last Monday in May) and Late Summer Holiday. Cargo work can be arranged on these days by request.

POLICE/AMBULANCE/FIRE: Tel: 999.

TELEPHONES: Can be fixed aboard by arrangement.

AUTHORITY: Blyth Harbour Commission, Blyth, Northumberland NE24 2AW, United Kingdom. *Tel:* (0670) 352066. *Telex:* 537567. *Contact:* R. G. Elwen, Secretary.

BOSTON: 52.58 N. 00.02 W.

DOCUMENTS: Usual U.K. requirements.

PILOTAGE: Compulsory for all vessels greater than 50 g.r.t. Pilot boards from launch in the approaches to River Witham. Pilot Office Tel: 0205-62114.

ANCHORAGES: Vessels awaiting tide anchor to South of High Horn Buoy in depths of 7.3 m.

Anchorages available in Boston Deeps, depths 5.5 m. to 9.1 m.

RESTRICTIONS: Entrance to dock normally restricted to 2.5 hours before and 1.5 hours after HW.

Lock Dimensions: Length 91.4 m., width 13.7 m., depth on sill 5.4 m. MHWN; 7.5 m. MHWS.

Sill clearance of 1.5 m. normally required.

MAX. SIZE: Dock: Length 95 m. Riverside quays: Length 75 m.

HEALTH: Normal U.K. procedure. Port Health Officer, Tel: 0205-62114.

VHF: Port radio station maintains VHF watch (Channels 16 and 12) during office hours and from 3 hours before till 2 hours after HW.

TUGS: 1 tug available, 7 tons bollard pull.

BERTHING: *Boston Dock:*
North Quay: Length 253 m.
South Quay: Length 256 m. Transit shed 2,787 sq.m.
West Quay: Length 137 m. Transit shed 2,160 sq.m.
Two Ro/Ro ramps for small vessels available at East end of Boston Dock.

Riverside Quay: Length 750 m. Transit shed 1,765 sq.m. Berths dry out at LW.

CRANES: At Boston Dock:
4×6 tonnes electric portal cranes.
2×3 tonnes electric portal cranes.
1×50 tonnes crawler crane for bulk cargoes.
1×25 tonnes Scotch Derrick for containers.
11 mobile cranes.
At Riverside Quay: 1×75 tonnes electric portal crane.
Forklifts available at both Boston Dock and Riverside Quay.

BULK CARGO FACILITIES: Two silos for grain, each capable of storing 5,000 tonnes.
(i) King's Lynn Silos at Riverside Quay, with 2 loading towers.
(ii) Witham Wharf, opposite Riverside Quay. Privately owned.
Also see "Developments".

SPECIALISED CARGO-HANDLING FACILITIES: Containers are discharged at South Quay, using a 25 tonne Scotch Derrick. Both 20 ft. and 40 ft. containers are handled.

Container handling yard (1.2 ha.) with 30 tonne top lift truck situated near dock.

BRIDGES: A power cable with 150 ft. vertical clearance exists to East of lock.

STEVEDORES: Several local companies can supply stevedores.

MEDICAL: Doctors, dentists and hospital available locally.

FRESH WATER: Available.

FUEL: Available from road tankers. Contact Agents to make arrangements.

CONSULS: Denmark, Vice-Consul; Netherlands, Vice-Consul; and Norway, Vice-Consul.

REPAIRS: Can be undertaken by local companies. Divers available.

CUSTOMS ALLOWANCES: Usual U.K. regulations. H.M. Customs, Tel: 0205-63070.

TIME: GMT; Summertime kept from late March – late October (GMT plus 1 hour).

POLICE/AMBULANCE/FIRE: Dial 999 for emergency service.

DEVELOPMENTS: Construction of a 40,000 tonne grain silo adjacent to Dock and connected to North Quay is underway. 1×500 t.p.h. mobile shiploader on order.

AUTHORITY: Port of Boston Authority, Dock Office, Boston PE21 6BN. *Tel:* 0205-65571. *Telex:* 378114. *Contact:* Captain G. Hulland, Harbour Master. *Tel:* 0205-62328.

BRAEFOOT BAY: 56.02 N. 03.19 W. (See Plan Book)

Braefoot Bay Marine Terminal is a facility shared between Essochem Olefins Inc. and Shell U.K. Exploration and Production as the shipping point for the products of the Mossmorran gas fractionation complex situated approximately 7 km. inshore from the Terminal. The Terminal is located on the Fife Shore of the River Forth between the communities of Dalgety Bay and Aberdour and separated from the main shipping fairway by the Island of Inchcolm.

The Eastern jetty is operated by Essochem Olefins and exports ethylene in ships between 2,400 cu.m. and 12,000 cu.m. capacity.

The Western jetty is operated by Shell U.K. Exploration and Production for the export of propane, butane, and natural gasoline in ships of up to approximately 60,000 cu.m.

Each jetty carries out loading operations independently, while the coordination and administration of marine activities is the responsibility of the Terminal Supervisor who is the local senior representative for Braefoot Bay Marine Terminal appointed by Shell U.K. Exploration and Production and acting on behalf of itself and Essochem Olefins Inc. with direct responsibility for the Management of all ship related activities at Braefoot Bay.

DOCUMENTS: See "Leith".

PILOTAGE: Pilotage is compulsory for all vessels calling at or sailing from Braefoot Bay Marine Terminal.

Pilots are licensed by the Forth Pilotage Authority and must be ordered for both inward and outward passages.

Vessels bound for the Forth must confirm their ETA 2 hours before arrival at pilot station.

Pilots may be contacted by calling "Forth Pilots" on VHF Channel 16 and working on VHF Channel 14.

ANCHORAGE: Vessels requiring anchorage in the Forth Estuary (other than in emergency) should apply to the Forth Navigation Service (Harbour Master) for direction to a designated anchorage.

APPROACHES: "General Directions for Navigation in the River and Firth of Forth" are published by the Forth Ports Authority and administered by the Forth Navigation Service. Vessels entering or navigating the Forth must notify Forth Navigation Service 24 hours before entering and 1 hour before leaving a berth, of their proposed intentions and obtain subsequent clearance to carry out such intentions. Forth Navigation Service can be contacted on VHF Channels 16 and 12.

RESTRICTIONS:

(a) All movements are subject to the directions of the Forth Navigation Service.

Pilotage is compulsory for all ships arriving at, or departing from Braefoot Bay Marine Terminal.

(b) Vessels will not be accepted for berthing at Braefoot Bay, and departures will not be authorised unless visibility is at least 0.5 nautical miles at Braefoot Bay jetties, that is to say that by day, the Haystack Rock shall be visible; by night No. 3 or No. 4 buoys shall be visible from the jetties.

(c) (i) Tankers of or greater than 145 m. length (approx. 12,000 cu.m. capacity) shall berth port side to the jetties on slack water or flood tide only. It is a requirement of Shell Expro and the Forth Ports Authority that such tankers shall only approach the Terminal through the Western channel of Mortimers Deep.

(ii) Tankers bound for the Eastern (Ethylene) jetty of less than 145 m. overall length may (at the discretion of the Terminal Supervisor) be allowed to berth starboard side to the jetty on slack water or ebb tide only. It is agreed with the Forth Ports Authority that tankers of less than 145 m. berthing in this manner may approach the Terminal through the Eastern channel of Mortimers Deep.

(iii) It is a requirement of the Forth Ports Authority that all tankers departing from the Terminal shall do so through the Eastern channel from Mortimers Deep. Vessels which have berthed as in (ii) above will therefore be required to "swing" on departure and may only do so provided that they are assisted by at least 2 tugs unless the vessels can satisfy the Ports Authority and the Terminal Supervisor that in the particular circumstances 1 tug would be sufficient.

Also see "Regulations".

MAX. SIZE: Western jetty: Depth 15.0 m. Eastern jetty: Depth 10.0 m.

Eastern exit channel bar depth (Hawkcraig Point leading line) – least depth by sounding 9.5 m., swept depth 8.5 m. below chart datum.

HEALTH: See "Health – All Ports" before first U.K. Port.

RADIO: *Pre-arrival information:*

Masters must send ETAs at least 72 hours in advance of arrival and thereafter advise of any variation of more than 12 hours.

Confirmation ETA should be sent at least 24 hours in advance of arrival and thereafter advise of any variation of more than 4 hours. (When voyage duration is less than 72 hours, Masters should send ETA as soon as possible.)

A standard pre-arrival message will be sent to each gas carrier requesting the following information/confirmation. A similar message (excluding items (a) to (g)) will be sent to Natural Gasoline Tankers.

Quote:

(a) Remotely operated valves: through a complete open/closed cycle, ensure proper functioning and ascertain valve type (ball, gate, etc.) and actual valve closing times.

Remote valves must close within 30 seconds of operation but so that the final 20% of closure takes at least 6 seconds.

(b) Gas detection system operational and set (high or low sensors) and calibrated for the cargo to be loaded.

(c) Cargo transfer emergency stops tested from all locations to ensure correct operations of valves, alarms and interlocks.

(d) Ensure operation of the tank high level and pressure alarms and interlocks.

(e) Where adjustable setting safety valves are installed, confirm they are set for the cargo to be received.

(f) Confirm fire fighting equipment including water spray system fully operational and tested.

(g) Manifold Configuration and presentation (forward to aft) eg. LVVL. It is most important that the specific duty (ethylene, propane, etc., liquid or vapour return) of each presentation flange is known to the terminal at least 24 hours prior to the ship's arrival. Delays consequential on non compliance with this requirement will be for ship's account.

(h) Advice that only clean sea water ballast can be discharged at this terminal.

(i) *For first time callers – manifold configuration:*

- (i) Size rating and standard of connecting flanges, e.g. 12 in. Ansi 150/8 in. Ansi 300/6 in. Ansi 300
- (ii) Distance of manifold centre line from bow
- (iii) Height above uppermost continuous deck
- (iv) Distance of manifold from ship's side
- (v) Maximum loaded draft
- (vi) Minimum draft while at berth
- (vii) Distance from face to support (max. acceptable is 1,200 mm.)
- (viii) Height of manifold above keel
- (ix) Distance between manifold flange centres.

(j) Details of ANY DEFECTS IN VESSEL OR EQUIPMENT affecting cargo operations or manoeuverability or confirmation that there are no known defects.

Unquote.

Note: The foregoing information is required in addition to the pre-arrival information requirements of the Forth Ports Authority – SI.1077 Merchant Shipping (Tankers) (EEC Requirement) 1981 refers.

Telex: A telex machine is sited in the Braefoot Bay control room fo incoming messages only, the number is 728245 Moship G, and i operable 24 hours per day. This telex number may be used to receiv urgent information concerning ship movements and cargoes. Message should normally be transmitted through the ship's agent.

VHF: "Braefoot Terminal" maintains a listening watch on VHF from a least 2 hours before vessel's ETA on Channel 16 and may work o Channels 15, 44, 48, 69 or 73. (Channel 69 is normally reserved for jett mooring towing operations.)

RADAR: Port and Estuary Radar Service operated by Forth Navigatio Service. (See "Leith".)

MOORING:

(a) Vessels unable to make fast alongside the Braefoot Bay Termina jetties with an all wires, or wires with synthetic rope tails mooring syste may be required to provide additional restraint by doubling or using bot ends of certain mooring lines.

A minimum of 2 spring lines of the same material (preferably wire shall be used at each end of the vessel.

(b) Mooring lines used in any particular direction of servic (head/stern lines, breast lines, springs) shall be of similar breakin strength and material. Under no circumstances will a mixture of wire an synthetic ropes in the same direction of service and to the same dolphi be acceptable except where a synthetic rope has been used as "first line ashore" for positioning purposes, then this may be excluded in the consideration of the final mooring plan.

(c) If conditions as in (a) cannot be complied with, the loading arms will not be connected until alternative arrangements have been agree with the Terminal Supervisor.

(d) Once moored, ships' winches must be secured with the brakes hardened up. Winches must not be left on Automatic Tension.

(e) Masters of vessels are responsible for ensuring that:

- (i) their vessels are safely secured in accordance with the preceding paragraphs.
- (ii) a strict watch is kept on their vessel's moorings and that they are tended as required to prevent slack or overtaut lines an undue movement of the vessel.
- (iii) their vessel's mooring ropes or wires are secured only to the proper fixtures provided for that purpose.

BERTHING: *Pre-Operations Meeting and Inspection:*

Before any operations commence a meeting will take place betwee the Terminal Supervision and the Ship's Master (or his authorise deputy). They will:

(a) Complete/carry out the ship/shore Safety Check Lists and Safet Inspection in accordance with the O.C.I.M.F. Standards if required.

(b) Discuss any deficiencies shown up by (a) above and agree an additional precautions required. The terminal reserves the right to refuse to load or discharge a vessel if the required standards are not met.

(c) Complete a loading/discharge plan that includes:

Connecting/disconnecting procedures
Quantities and grades of cargo to be loaded/discharged
Loading/discharge rates (see "Loading" – Pressure Surges)
Deballasting procedure (see "Ballast")
Vapour return procedure
Cool down procedure (if required)
Maximum permitted pressure at ship's rail
Location of Emergency Stop Buttons/use of Umbilical Cord
Ensure that ship has on board data sheets for product bein handled
Emergency Procedures (see "Safety").

(d) Check the previous cargo record (last 3 cargoes) and agree tha ships' tanks are ready to receive product.

The Companies reserve the right to:

- (i) Sample and analyse the condition of ships' tanks or quality o cargo and ballast tanks before commencing to load o discharge.
- (ii) Instruct a third party independent surveyor for the samplin and measurement of cargo and/or tanks, the costs for whic will be for the account of the Jetty Operating Company.
- (iii) Place approved portable equipment on board as required fo sampling, testing or communication purposes during loadin discharging operations.
- (iv) Refuse to load product and/or accept return vapour when ships tanks are not within specification for product to be loaded.

Reasonable Notice of these requirements will be given.

BERTHING FACILITIES: Western Jetty:

Jetty Operating Company: Shell U.K. Exploration & Production.

Manifold Limitations: B.F.O. 8 in. and LPG/Gasoline 12 in. 150 AS flanged presentations arms.

	Max.	*Min.*
Manifold height above water line	19.65 m.	5.15 m.
Manifold set back from ship side	9.6 m.	3.00 m.

For multiple 12 in. arm connections the minimum centre to centr adjacent connection distance is 1.3 m.

L.P.G. 8 in. 300 ASA flanged presentation arms.

	Max.	*Min.*
Manifold height from water line	11.15 m.	1.95 m.
Manifold set back from ship side	8.6 m.	2.00 m.

For connection of 2×8 in. arms the minimum centre to centre adjace connection distance is 0.75 m.

N.B. For connection to any arm: Distance between ship's outboar presentation flange and first ship's manifold piping support must no exceed 1,200 mm. to prevent cantilever overstressing of ship's pipin

Product/Vapour Return: LPG: Vapour return arm will be connecte before loading operations commence to enable vessels to return vapou to storage tanks or to flare.

Vapour return may go to flare subject to the quality being acceptab to Shell Expro but always provided the oxygen content of such vapou return to flare does not exceed 4.0% vol. max. as may be establishe under the pre-operations meeting/inspection. (See "Berthing" (d)).

Shell Expro at its sole discretion may accept vapour return to storage always subject to the quality being acceptable to Shell Expro and normally provided the previous 3 cargoes were LPG and also that such vapour does not contain more than:

(i) 0.3% vol. oxygen
(ii) 0.5% vol. non condensible gas
(iii) 0.5% vol. propylene
(iv) 0.1% vol. butadiene
(v) 10 ppm ammonia
(vi) 10 ppm VCM
(vii) 5 ppm water vapour

However, Shell Expro at its sole discretion may accept vapour from any vessel to shore storage provided that the quality of such vapour is acceptable to Shell Expro. When appropriate ships returning vapour to shore storage will be automatically credited for such returns.

LPG Loading/Vapour return rates available to ships via each pair of loading arms are:

via 12 in. loading arms, up to 3,000 cu.m./hr. per product
8 in. loading arms, up to 1,100 cu.m./hr.

Simultaneous loading of propane and butane is available on 12 in. arms only.

NOTE: Propane/Butane is delivered to ships in fully refrigerated state, i.e. approx. −42°C/−5°C as appropriate. There are no cargo heating facilities at this terminal.

Natural Gasoline: Natural gasoline loading is via No. 4 12 in. loading arm with rate of up to 2,000 cu.m./hr. available.

Bunker Fuel Oil (when available): Bunker fuel oil is loaded/discharged through No. 7 8 in. flanged loading arm only at a rate of up to 350 cu.m./hr.

Marine Diesel (when available): Marine diesel is handled through a 3 in. flexible hose only, at a rate of up to 30 cu.m./hr.

Eastern Jetty:

Jetty Operating Company: Essochem Olefins Incorporated.

Manifold Limitations: Ethylene 6 in. 300 ASA flanged presentation arms.

	Max.	*Min.*
Manifold height above water line	11.2 m.	2.75 m.
Manifold set back from ship side	4.6 m.	0.85 m.

For connection of 2 arms the minimum centre to centre adjacent connection distance is 0.75 m. The maximum distance is 1.5 m.

Ethylene: Vapour return arm will be connected before loading operations commence to enable vessels to return vapour to storage tanks or flare. Vapour return may go to flare always provided the oxygen content of such vapour to flare does not exceed 4.0% vol. max. as may be established under the pre-operations meeting/inspection. (See "Berthing" (d)).

Essochem Olefins Inc. at its sole discretion may accept vapour return to storage always subject to the quality being acceptable to Essochem Olefins Inc. and provided that the last cargo was ethylene or that vessel has been purged with ethylene vapour to the satisfaction of Essochem Olefins Inc.

A loading rate of up to 250 tonnes/p.h. is available to vessels.

LOADING:

Marine Loading Arms: All products (with the exception of marine diesel) are delivered to ships via marine loading 'hard arm' units which are individually fitted with Emergency Release Systems (ERS).

The emergency release systems consist of two ball valves located above the presentation flange. Only after closure of the ball valves, the hydraulic clamp between the ball valve opens, leaving one ball valve closing off the ship's manifold and the other closing off the loading arm. The loading arm then returns to the parking position.

On hearing 'ERS' alarm (a flashing red beacon with oscillating tone) all staff should vacate the vicinity of the manifold/loading arms. The emergency release system may be manually initiated from onshore or AUTOMATICALLY in the case of over extension of the loading arms, e.g. if ship drifting outside the loading arm envelope.

Pressure Surge Precautions: Non-routine closing of the loading systems, automatic intervention or 'fail-safe' closure of shipboard Emergency Shut Down (ESD) valves can generate dangerous surge pressures. A careful check of ship's ESD system will be made prior to loading. The Master (or his deputy) may be asked to operate the system to enable timing of the valves and may be requested to have valves adjusted according to the provisions of the IMO Codes for Ships Carrying Liquified Gases in Bulk. The Terminal Operating Companies reserve the right to restrict loading rates if valve closing times are not compatible with rates otherwise agreed. Excess loading times caused by such a restriction will be charged to the ship if port time/lay time is exceeded.

The shore system is designed to withstand the high surge pressures which can be generated and safe emergency shut down will be accomplished by using the shore ESD pendant control provided to vessels.

In the event of an emergency the pendant 'ESD' must be activated which will immediately result in:

1. Shore pumps close
2. On shore delivery valves close.

ONLY THEN MAY THE VESSEL MANUALLY ACTIVATE ITS OWN ESD

SHIPS MUST NEVER CLOSE VALVES AGAINST THE SHORE LOADING PUMPS

Masters are referred to ICS Safety Guide (Liquified Gas) paras, 1.8.2 and 4.5.2 and the International Safety Guide for Oil Tankers and Terminals para 7.3

Operational Procedures: The Loading/Discharge Plan and operation must comply with the following procedures:

(a) The Company will be responsible for connecting/disconnecting loading arms/hoses to the agreed ship's presentation flanges as indicated by the responsible ship's officer.

(b) The Loading Arms are normally purged and remain under Nitrogen between loading operations. Vessels must, therefore, be prepared to receive a small volume of Nitrogen vapour at the commencement of loading operations. (0.5 cu.m. at the Eastern jetty, 10 cu.m. at the Western jetty.)

(c) The responsible terminal representative and ship's officer will agree that systems are correctly lined up before transfer operations begin.

The terminal staff will pressurise the loading arm with Nitrogen against the ship's manifold valve and the loading arm connection will be tested for leaks. When manifold has been proven 'tight' the loading arm will be depressurised and transfer commenced at the agreed starting rate.

Loading must be commenced slowly to avoid rapid pressure build up. When liquid flow is established the terminal will increase rate as requested by the ship up to the agreed maximum bulk rate.

(d) During transfer operations ship will confirm with the shore at suitable intervals that they are in agreement with the quantity of product actually transferred and the quantity/time estimated to complete the operation.

(e) EXCEPT IN EMERGENCY VENTING OF LPG OR ETHYLENE VAPOURS TO ATMOSPHERE IS PROHIBITED AT BRAEFOOT BAY.

All such displaced vapour must be reliquified on board by ship's systems or returned to shore via the vapour line.

During loading of liquified gas carriers the jetty operator must be advised of and log the ship's tank pressure every half hour.

The LPG/ethylene return vapour line will in any case be connected and available for pressure relief.

Displaced Natural Gasoline vapour shall only be vented to atmosphere via the ship's elevated or collective fixed vent system, as agreed in the ship/shore check list.

(f) During transfer operations

- (i) An Operator/Technician will remain on the jetty at all times.
- (ii) A responsible English speaking ship's officer equipped with an approved portable UHF radio tuned to the agreed ship/shore communication channel shall be on duty at all times.
- (iii) A responsible member of the ship's crew capable of understanding and relaying the jetty Operator/Technician's communications to the Responsible Ship's Officer shall be stationed on deck so that he can:
  - (a) observe the manifold connections
  - (b) observe the gangway
  - (c) exchange visual/vocal signals with the jetty Operator/Technician.
- (iv) The ship must inform the terminal and the terminal must advise the ship of any deviation from the agreed Loading/Discharge Plan.

(g) At least 15 minutes' notice must be given of transfer rate changes (including "topping off") being required except in emergency when the requirements of "Pressure Surge Precautions" (see above) must be observed.

(h) If for any reason there is an unusual evolution or accumulation of gas, loading shall be stopped or the loading rate into a particular tank reduced at the discretion of either the Terminal Supervision or responsible Ship's Officer.

(i) The vessel must by day fly Flag 'B' of the International Code, and by night exhibit an all round red light.

(j) Prior to, and on completion of loading/discharging an Operating Company representative will witness ship's dips/ullages and obtain from the Master the quantity loaded according to ship's figures.

(k) Operations shall be stopped during electrical storms in the vicinity of the ship and all cargo valves shall be closed. During periods of high winds (gusting to 40 knots or over), and/or on the instruction of either the Harbour Master or Terminal Supervision, operations shall be stopped and the loading arms disconnected. For ships with a presentation flange of 4 in. this will be 27 knot gusts and for 6 in. and above 40 knot gusts as maximum limits but which may be reduced according to prevailing circumstances.

At suitable intervals with regard to the estimated duration of cargo transfer the responsible Terminal Representative and Ship's Officer will carry out a repetitive check and confirm that:

The Safety Check List remains valid
Operational procedures are satisfactory
Jetty Regulations are not being contravened.

TUGS: Only tugs licensed by the Forth Ports Authority to do so, may operate at Braefoot Bay Marine Terminal.

Availability of tugs is assured by Forth Estuary Towage Ltd., provided at least 24 hours' notice of requirements is given in accordance with the agreed ordering and call out procedures set out in the published Tariff. Tug orders may be placed through ships' Agents, the terminal or direct to Forth Estuary Towage Ltd., Leith. 24 hours' notice of towage requirements is necessary for programming tug commitments and obtaining priority for service. In the event of ship delays within the 24 hours' notice period, cancellation or ETA adjustment for service previously ordered will not be subject to charge, provided that adjustment notice is received during normal working hours and that the tugs have not left their normal berths to attend on the vessel's original order.

The tugs available are as follows:

2×12 tonne bollard pull Voith Schneider.
2×19 tonne bollard pull Voith Schneider.
1×27 tonne bollard pull Voith Schneider.

As a guide to ordering in advance and to avoid delays it is strongly recommended that the following table is regarded as minimum requirements for tug assistance:

Size of Ship	*Tugs (tonnes-bollard pull)*
40-60,000 cu.m. berthing	1×27 tbp+2×19 tbp
40-60,000 cu.m. sailing	1×27 tbp+1×19 tbp
20-40,000 cu.m. berthing/sailing	2×19 tbp
6-20,000 cu.m. berthing/sailing	2×12 tbp

Masters of smaller vessels who do not anticipate requiring tug assistance for berthing/unberthing may order an escort/standby tug.

Tugs attending vessels will normally rendezvous with arriving ships in the area Inchkeith Island to Burntisland Roads and also escort departing ships to that area.

Out of hours and in emergency tugs may be contacted through the Forth Navigation Service Duty Officer on VHF Channel 16.

Boatmen: Only Boatmen approved by the Companies and licensed by the Forth Ports Authority to do so, may operate at Braefoot Bay Marine Terminal.

Availability of mooring boats is assured by C. & R. Briggs Ltd., providing at least 24 hours' notice is given, through ships' Agents, the terminal or direct to C. & R. Briggs, Burntisland. Telex: 727377 Crbcom G.

Pre-ordered mooring boats will be in attendance at the terminal 30 minutes in advance of the arranged berthing/departure time and can be contacted on VHF radio. In the event of the ship delay within the 24 hours' notice period, cancellation or adjustment for services previously ordered will be without charge provided that adjustment notice is received between 0900 hrs. and 1630 hrs. and that the mooring boats have not left their base to attend on the vessel's original order.

BALLAST: *Avoidance of Pollution:*

(a) No oil or mixture containing oil shall be discharged or allowed to escape from a vessel while at the terminal, the approaches or in the River and Firth of Forth.

No garbage, or other materials, either liquid or solid shall be discharged overboard from a vessel, but shall be retained in suitable receptacles on board or arrangements made for disposal ashore.

(b) Discharge overboard of the clean ballast contained in the cargo tanks of clean petroleum product tankers is permitted, but only after inspection has been carried out by the Terminal Supervisor, who shall also obtain the approval of the Harbour Master prior to commencement of such ballast discharge. Discharge of clean segregated ballast water overboard is permitted subject to approval and/or inspection by the Terminal Supervisor.

The Forth Ports Authority Harbour Master will be informed if inspection either before or during discharge shows ballast water is contaminated and such discharge shall immediately cease.

Except as herein specified, all ballast water other than that contained in segregated ballast tanks shall be retained on board.

DIRTY BALLAST CANNOT BE DISCHARGED AT THIS TERMINAL

(c) By arrangement with the Terminal Supervisor oily residues and bilge slops may be discharged ashore via flexible hose provided that such discharge is not concurrent with product transfer via hard arms and that delays so incurred are for ship's own account if port time/laytime is exceeded.

The onshore oily slops reception tank has a limited handling capacity and in no case will slops quantities in excess of 100 tonnes be accepted from any one vessel. Slops transfer to this facility for ships at the Eastern jetty is via a 20 cu.m. holding tank and transfer rates limited to 5 tonnes per hour.

(d) Prior to Oil (including Natural Gasoline) or slops transfer the Anti-Pollution Check List must be completed and no leakage or spillage shall be swept or allowed to leak overboard. Swabs or sawdust used for mopping up spillages must be brought ashore for destruction.

Any leakage or spillage must be reported immediately to the Terminal Supervisor and operations suspended until the leakage or spillage has been cleaned up to the satisfaction of the Terminal Supervisor and the Harbour Master. The Terminal Supervisor may mobilise resources to assist in the containment and cleaning of pollution caused by a ship, without the authority of the Master but in such action he shall be considered to be acting on behalf of the Master and with his approval.

It is statutory requirement that any pollution be immediately reported to the Harbour Master.

MEDICAL: Doctors and Hospitals in Kirkcaldy and Inverkeithing.

DENSITY: 1015 – 1025 (depending on rainfall).

FRESH WATER: Potable fresh water is normally available from hydrants at each jetty. Ships requiring water are responsible for supplying and connecting their own hoses to the jetty hydrant as indicated available by the jetty operator. A nominal charge may be made for water in which case a ship's officer may witness shore meter readings as the Master will be required to authorise water bill for payment of charges by the ship's Agent.

FUEL: B.F.O. and Marine Gas Oil (if and when available) can only be supplied to ships loading at the Western (LPG) jetty. Requests for bunkers must be notified as early as possible and confirmed in the ETA notices through ship's Agent.

CONSULS: See "Leith".

REPAIRS/DRYDOCKS: See "Grangemouth".

AIRPORT: Edinburgh Airport 30 miles.

POLICE/AMBULANCE/FIRE: Control have a direct line.

TELEPHONES: A public pay telephone is located at the jetty trestleway root.

Smoking is expressly prohibited in the telephone kiosk, infringements by individuals of this regulation will necessitate withdrawal of the facility.

STORING: *General cargo, bunkering and stores handling:*

(a) No general cargo including petroleum in drums or other containers, or liquified gas in cylinders shall be handled during:

(i) Loading or transfer of LPG, Ethylene or Natural Gasoline
(ii) Gas freeing, purging or tank cleaning

Note: Bunker services are not available to ships calling at the Eastern jetty.

(b) The handling of ship's stores and bunkers (if available) may be permitted during operations but only with the permission of both the Terminal Supervisor and the Master of the Vessel and provided that:

(i) the cargo operations remain adequately supervised.
(ii) any cargo operation which may allow vapours to escape on deck should be stopped whilst stores are being handled e.g. pumping of strippings to an after tank or sampling/ullaging gasoline tanks or disconnection of loading arms, etc.
(iii) Drums of oil paint, steel plates and any other heavy metal parts which may cause a spark, should be landed on rubber or other suitable matting and not directly onto vessel's steel deck. These items may not be dragged or rolled along the deck.

(c) Gas cylinders must not be rolled along the deck of a vessel or jetty.

(d) The jetty cranes are for hose-handling and other jetty purpose They may only be operated by Terminal Staff and may only assist i loading items of ship stores provided that Terminal Staff are available operate a crane without detriment to their other duties.

(e) Under no circumstances will stores delivery vehicles be allowe on the jetty head or approach beyond the designated points for settin down of ship stores. One vehicle only at a time is permitted to visit vessel. Other vehicles scheduled to deliver stores must queue outsid the main gate until given permission to enter. Waiting vehicles will par in such a manner that no obstruction for emergency vehicle entr through the main gate will result.

The size and weight of ship stores delivered by road vehicle are to b such as they can always be physically *manhandled* and carted betwee the set down point and ship by delivery staff or ship's crew. Large deliveries of stores and heavy items of equipment may be loaded from barge by an arrangement with Agents or chandlers and subject to safet regulations.

These services are readily available in the area, though of course delays due to storing or bunkering are for vessel's own account where laytime/port time is exceeded.

Note: Vessels at anchor may be stored by barge/boatmen of their own choice but vessels alongside must be stored by licensed boatme (C & R Briggs Ltd.) See "Tugs".

SAFETY: *Emergency Signals:*

(a) Fire and onshore emergency alarm.
1. At the Western jetty: Intermittent Siren.
2. At the Eastern jetty: Intermittent Siren.
In the event of siren failure alarm will be sounded by air horns.

(b) Onshore emergency (other than fire).
1. At the Western jetty: Air Horns.
2. At the Eastern jetty: Air Horns.

(c) Shipboard emergency (or reported from ship): At least 6 blasts each of not less than 10 seconds duration.

NOTE: Onshore, alarm may be raised by activating one of the "Brea Glass" fire alarms situated at numerous points throughout the terminal - this will also automatically activate the jetty spray systems.

Actions in Event of Emergency:

Ashore: Sound alarm signal.
Terminal staff will communicate with you via:
1. The UHF portable radio (supplied on arrival).
2. The jetty operator.
3. The jetty loudspeaker system.
4. The Marine VHF Channel 16.

In any emergency terminal staff will shut down loading operations may activate fixed water spray system and implement the Termina Emergency Plan as appropriate to the incident:

Aboard: Sound alarm signal.
Inform terminal by communications systems as listed above.
You must be prepared to:
1. Cease all cargo operations.
2. Close all cargo valves.
3. Disconnect ship to shore pipe-lines (shore hard loadin arms may be emergency disconnected by terminal staff).
4. Move your ship (engines to immediate readiness) subject t the overriding control of the Harbour Master.

Emergency Towing Wires: Emergency towing wires of adequate strength and condition must be positioned on both the offshore bow and quarter of the ship with the towing eyes maintained just above water level.

They must be properly made fast on the ship's bollards while having sufficient slack flaked out on deck for effective towing, the slack being secured from running free by rope yarns or other easily broken means.

Emergency Precautions: In order to meet emergencies ships must:

(a) Retain sufficient suitable crew members on board at all times to man emergency services and to move the ship if so directed by Termina or Port Authority personnel.

(b) Have adequate emergency equipment and fire fightin appliances, including main emergency fire pumps, ready for immediate use with pressure maintained on the fire main while alongside. The appliances will include at least:

(i) Two fire hoses, fitted with jet/fog nozzles, uncoiled and connected to the fire main on the main deck.
(ii) Portable fire extinguishers, of the dry chemical type conveniently placed near the ship's fire manifold.
(iii) An International Ship/Shore Connection available at an agreed position on the ship's fire main for ready connection to the shore main.
(iv) Where a vessel is equipped with a fixed dry powder system hoses should be run out and control boxes open for access.
(v) The ship's offshore lifeboat shall be rigged ready for lowerin and use as an emergency escape.
A pilot ladder or accommodation ladder shall be rigged o positioned on the outboard side of the vessel ready fo immediate lowering as a means of escape in the event of a emergency.

In the event of an emergency the Master must proceed as agreed i the "Pre-operations Meeting and Inspection".

State of Readiness and Engine Immobilisation:

(a) The ship must be able to move under its own power at shor notice.

(b) Repairs or other work which may immobilise the vessel shall no be commenced without the prior approval in writing of the Termina Supervisor who shall also obtain the approval of the Harbour Master.

Such approvals will not be granted except where unavoidable repair/breakdown occurs and may be conditional on the Master hirin sufficient standby tugs to move the vessel if so required.

(c) Should immobilisation as in (b) above occur and prior approva having been impossible, the respective jetty Operating Companie reserve the right to order tug or tugs as above on the Master's behal

Vehicle and Personnel Access and Security:

(a) Only authorised persons or those with entry permits issued by the Terminal Management will be allowed through the terminal security gates.

Ship's personnel must have a temporary pass signed by the Master or his deputy for clearance with the security guard at the entrance gate.

Masters will be provided with a supply of suitable pass forms by the Terminal Supervision. The Master or ship's Agent are required to furnish a list of chandlers, services, new crew and authorised visitors expected during the ship's stay at the terminal.

Persons who have not been authorised or notified as above will be refused entry to the terminal until the Security Guard has been given clearance from the Terminal Supervision.

(b) As pedestrians (other than plant employees and authorised personnel) are not normally allowed passage through the terminal, a limited fixed schedule transport service may be provided between the shore end of the jetty trestleways and a local destination after consultation and agreement between the Terminal Supervision and the Ship's Master. Extra journeys by the approved transport service must be ordered by direct arrangement with the contractor and the Terminal Supervision advised accordingly.

(c) Visiting vehicles are not normally allowed beyond the gatehouse parking area and must not proceed onto the jetty trestleways without the express permission of the Terminal Supervisor. No vehicle may proceed past any "NO ENTRY" sign indicating that Class A petroleum is being handled or that petroleum vapour may be present.

Vehicles and their contents which are permitted to enter the Marine Terminal do so at the owners' risk and drivers must obey all traffic signs, plant traffic regulations, or directions given by Terminal Staff. Such vehicles shall not be parked in position obstructing fire hydrants, roadside alarms or other traffic. If parked, keys will be left in ignition, the ignition switched off and the doors unlocked. If required, any unattended vehicle may be moved by Terminal Staff.

(d) In the interests of Safety and Security any vehicle or person entering or leaving the terminal is liable to be searched for contraband material or unauthorised persons. Acceptance of this requirement is a condition of entry. Persons who appear to be intoxicated will not be allowed access to or from ships at the terminal unless escorted by a responsible Ship's Officer.

Personnel Access to/from Ships:

(a) When available, access between jetty and vessel will be provided by the Company by means of a gangway tower structure. The operation of such gangway will be the responsibility of the jetty Operating Company, but Masters shall ensure that personnel can safely transfer between the ship's main deck and the gangway. When, for any reason, the gangway tower is not available, Masters of vessels shall provide a means of safe access between jetty and ship, which shall when necessary include an upper platform and bulwark ladder to provide safe access to the ship's deck. The means of access shall be provided with stanchions, guard ropes, securing lines and safety netting, shall be adequately illuminated and shall be maintained in a clean and well tended condition.

A lifebuoy with at least 25 m. of lifeline attached shall be positioned on the vessel near the gangway.

(b) No person other than HM Customs and Excise, Port Health Authorities, Pilots or other HM Customs Authorised personnel is allowed to board or disembark from a vessel berthing at the Marine Terminal from a foreign port until Clearance and the Master's permission has been obtained.

(c) Boarding and disembarking shall be by gangway only except in emergency.

Scuppers and Drip Trays: During transfer of bunker fuels, gas oil or natural gasoline, deck scuppers and drain holes must be suitably plugged and accumulated water drained off as required. Scuppers should otherwise remain open during LPG or ethylene loading operations.

Drip trays must be placed under connections and likewise drained of accumulated water.

Prior to transfer of any oil product the ANTI-POLLUTION CHECKLIST MUST BE COMPLETED.

Repair Work: Repair work involving either hot or cold work or the use of naked lights is prohibited unless the permission of the Terminal Supervisor has been requested and granted in writing and the conditions and precautions required by the Terminal Supervisor are rigidly observed.

Repair work includes but is not restricted to boiler tube clearing, chipping and scraping, hull painting, testing or servicing of electrical equipment (including radar and radio installations).

If permission is granted a list of shore workmen employed on the vessel must be given to the Terminal Supervisor before work commences.

(The Harbour Master's permission is also required in the case of hot work and certain repair work including test transmissions of radio or radar equipment.)

Tank Cleaning/Gas Freeing: Tank cleaning, inerting, purging or gas freeing may not be carried out at this terminal except under specific circumstances when approval in writing is granted in advance or under a repair work permit as in "Repair Work" above.

Movements of Tugs and Other Craft: During berthing, unberthing and cargo handling operations no vessel or small craft shall be allowed alongside the vessel unless authorised by the Terminal Supervisor and agreed by the Master.

When tugs or authorised craft are alongside or assisting a vessel, all cargo system openings must be closed unless tanks are gas free.

Portable R/T Sets, Hand Lamps and Electrical Equipment: Portable R/T sets, lamps and hand lamps, electric or otherwise shall not be used unless of an approved type (e.g. B.A.S.E.E.F.A.).

The use of portable electric lamps and equipment on wandering electric cables is prohibited in any cargo or adjacent ballast space, pumproom, cofferdam, bunker compartment, hold or anywhere over the cargo tanks.

Portable domestic radios, photographic flash equipment, electronic calculators, tape recorders or any other battery powered equipment of non-approved type shall not be used on the main deck nor in any other place where petroleum gases may be encountered.

Ship's Radio and Radar Equipment: Except for VHF telephone equipment, ship's main radio station transmission equipment, including emergency transmitters, shall not be used while the ship is within 400 m. of the terminal. While berthed at the terminal, the transmitting aerials shall be disconnected and earthed.

Ship's radar installation having a peak pulse in excess of 60 kW shall not be operated while the vessel is within 300 m. of the terminal and no radar installation shall be operated during cargo or ballast transfer operations while alongside the terminal berths, except as may be permitted under "Repair Work", see "Safety".

GENERAL:

Forth Ports Authority/Dockyard Port of Rosyth: The Forth Ports Authority is the controlling body for the waters of the Firth of Forth in conjunction with the Ministry of Defence through the Queen's Harbour Master Rosyth.

The Rules as to Navigating in the dockyard Port of Rosyth are published under the Dockyard Port of Rosyth Order 1975 and are summarised as a note to the "River of Firth of Forth Byelaws". As general information, the Rules impose a speed limit of 12 knots on vessels exceeding 120 m. in length and 15 knots on vessels less than 120 m. in length.

The Rules also detail the signals for prohibition of movement in the "Protected Channel" (being approximately the Main Fairway in a Westerly direction from Buoy No. 13, passing South of Inchcolm Island) to Rosyth Dockyard and the signals (3 red lights in a vertical line or black cylinder by day) denoting one of Her Majesty's vessels underway, and from which, other vessels shall keep clear (within the Dockyard Port).

Copies of the "River and Firth of Forth Byelaws" and "Directions for Navigation" may be obtained from the Forth Ports Authority, Shipping Agents or on request to the Terminal Supervision.

Tides: The predicted tides in the Forth Estuary may be significantly affected by weather conditions, e.g. strong winds from N.N.E. through E. to E.S.E., or heavy rainfall.

The range for Spring Tides is 5.0 m., the range for Neap Tides is 2.5 m. The Highest Astronomical Tide is 6.3 m. The Lowest Astronomical Tide is 0.0 m.

The breasting line of the jetties at Braefoot Bay is 075°/255° and the direction of tidal flow is approximately 260° on the Flood and 066° on the Ebb with maximum rates of 2.6 knots (Springs) and 1.3 knots (Neaps).

Shipping Agents: Masters are requested to confirm their Agents' name in any direct communication to the Terminal.

Communications:

UHF Radio: The terminal will supply an approved UHF hand set radio to the vessel Master or his deputy for use during the loading operation. A receipt will be required for the hand set radio. The radio will be used for contact with the Terminal Staff during normal loading operation and for notification of an emergency condition.

The hand set radio must be returned to the Terminal representative at the time the departure documents are delivered on board.

Acknowledgement of the return of the hand set radio will be noted on the vessel's copy of the "Master's Receipt for Shipping Documents".

Klaxon: Each jetty is equipped with air horns for audible alarm of fire, and an oscillating tone siren for imminent E.R.S. activation. One short blast may be sounded if required to gain attention of ship's deck personnel if there is an urgent need for communication.

REGULATIONS: *Rules for the Movement of Tankers using Braefoot LPG Terminal:*

1. Every tanker destined for the terminal shall regulate its approach so as not to arrive before the agreed berthing time.

2. When a tanker is turning from the channel for deep draft vessels into Mortimer's Deep to approach the terminal from S.W., no other vessel shall enter that section of the channel between No. 15 light-buoy and a line joining Hound Point and Hopeward Point; or when turning into Mortimer's Deep to approach the terminal from the East, no other vessel shall enter that section of the channel between Nos. 7 and 11 light-buoys.

3. When any tanker is leaving the terminal it shall do so, except in an emergency, in an Easterly direction.

4. When a tanker having left the terminal is entering the channel for deep draft vessels from Mortimer's Deep in an Easterly direction, no other vessel shall enter that section of the channel between Nos. 7 and 11 lightbuoys. In addition if such a tanker is loaded with liquified gas and is more than 145 m. in length, no other vessel, whether navigating within or without the channel for deep draft vessels, shall approach within 1 mile of the tanker while it is within that section of the channel between No. 13 light buoy and Fairway light buoy at 3° W.

5. When tankers are navigating within or without the channel for deep draft vessels between Fairway light buoy and a line joining Hound Point and Hopeward Point it may be necessary to hold or slow down other vessels. Inward bound vessels may be directed to a holding area North of No. 3 light buoy until an outward bound tanker is sufficiently far downstream.

6. No vessel shall enter Mortimer's Deep when the terminal is occupied or when a tanker is manoeuvring in the area, except that a second tanker may enter and berth when the first tanker is securely berthed.

7. Radio transmissions and the operation of radar are prohibited in the vicinity of the terminal, except that a vessel's normal equipment may be tested provided that a source of ignition is not present and that the Chief Harbour Master's permission has been obtained.

SHIPMASTER'S REPORT: November 1984.

Vessel called at Braefoot Bay Marine Terminal for the purpose of loading LPG (Butane).

The terminal is operated by Shell Expro and Essochem Olefins, and is located 3 miles East of the Forth Railway Bridge on the North side of the Firth.

Port Limits: Within the area of the Firth of Forth Navigation Authority.

Documents:

Register and Light dues.
All Safety Certificates.
Derat Certificate.
Health Declaration.
Cargo Documents.
Last Port Clearance or Coastwise Documents.
2 copies C.13 Customs General Declaration.
3 copies C.14 Customs Stores Declaration.
2 copies C.142 Customs Crew Declaration.
6 copies Crew Lists.
2 copies Ship's Store Lists.

Pilotage: Compulsory in the Firth of Forth. Pilot boards at Fairway Buoy in position 56° 03.5′ N., 03° 00′ W. VHF Channel 16. 24 hours' advance notice.

Anchorage: Allocated by Forth Navigation Service, usually Aberlady Bay.

Restrictions: Vessels enter Mortimer's Deep from the West, leave to the East, in what is called clockwise navigation.

Therefore berthing is done on the start of the flood, turning off No. 17 buoy, ensuring, especially in a Westerly wind, that the tide has really started to flood.

Sail an hour before high water to cross the bar at about the top of the flood.

The Esso jetty may, however, allow berthing/entry from the East for smaller vessels.

Berthing and unberthing during daylight hours only, but it is the intention to start unberthing at night shortly.

Max. Size: Shell jetty 60,000 cu.m. Esso jetty 12,000 cu.m.

Health: See 'Health – All Ports' before first UK port.

Radio: Wick GKR.

VHF: Forth Navigation Service Channel 71 (working on Channel 20) controls traffic and reporting in points.

Braefoot Terminal: Channels 69 and 73.

Tugs: Channel 69.

Public Channels: Forth Radio Channels 16 and 24.

Radar: Forth Navigation Service locates vessels at Port Limits, and checks identity by VHF.

Ships Radars are to be switched off within 300 m. of the terminal and must not be switched on whilst alongside, even for pre-sailing checks.

Tugs: Join the vessel off Inchkeith and make fast (tugs lines) before Oxcar. 5 tugs are available, 1×27 tonne, 2×19 tonne and 2×12 tonnes bollard pull. Larger vessels use 3 tugs for berthing (1×27 tonne, 2×19 tonnes) and 2 tugs for sailing (1×27 tonne, 1×19 tonne).

In an emergency tugs take 1.5 hours to reach the vessel.

Berth: Rate of loading Butane, 1,900 cu.m./p.h.

Shore gangway used.

Medical: Good facilities nearby at Leith.

Density: 1025.

Fresh Water: Available ex-mains for nominal fee.

Fuel: M.D.O. available, max. loading rate 40 cu.m./p.h. Fuel oil will soon be made available. Both only at the Shell jetty.

Fire Precautions: Normal for LPG – 3 allocated onboard smoking areas.

Consuls: Numerous in Edinburgh. If vessel bound for USA then Consulate requires 48 hours to visa 2 Crew Lists, thus these should be left behind with the Agent who will arrange for express delivery to the discharge port.

Gangway/Deck Watchmen: Not necessary, available or permitted.

Customs Allowances: Normal UK Regulations apply.

Repatriation/Airport: Edinburgh Airport nearby has shuttle flights at one to two hour intervals to London Heathrow.

Time: GMT plus 1 hour (BST) in Summer months.

Police/Ambulance/Fire: Telephone 999.

Emergency Co-ordination Centre: VHF Channel 16, Forth Navigation Service and/or Forth Coastguard.

Telephones: None onboard, Public Pay phone at jetty root.

Storing: Stores have to be manhandled/hand trucked along 200 m. of jetty before lifting onboard with jetty crane. Alternatively they can be delivered by barge, but not concurrent with cargo and liable to weather delays.

Only Diesel engined stores lorries are permitted in the terminal and Ship Chandlers and Laundries should be made well aware of this.

Shore Leave: Permitted, but personnel are not allowed to walk through the installation and so rely very much on the Marine Officer on duty for a lift, as only a very limited bus service (5 per day) is laid on which takes crew to Burntisland Station.

Identification Cards: Shore passes are issued.

If visitors for the ship's complement are expected, it is wise to leave a list with Security at the terminal gate, to expedite their boarding.

Regulations: 72 hours in advance of arrival send to Agents, asking them to relay same, questionnaire replies to Harbour Master Forth Ports and also to Braefoot Terminal. (See "Radio" – pre-arrival information and "General" before first UK port.)

General: Laundry facilities are available, good quality.

AUTHORITY: Shell U.K. Exploration and Production, P.O.Box 16, Mossmorran, Cowdenbeath, Fife. *Tel:* (0383) 892000. *Telex:* 728244 Moshell G. Shipping Department 728245 Moship G. *Contact:* Captain R. D. Izatt, Terminal Supervisor.

AGENT: John Denholm and Co. Ltd., Unit 20, Belleknowes Industrial Estate, Inverkeithing, Fife. Tel: (0383) 416285. After hours (050682) 3555, (031) 337 1920, (0324) 553769. Telex: 728212.

BRIDLINGTON: 54.05 N. 00.12 W.

DOCUMENTS:

Crew List.
Passengers List.
Ship's Register.
Customs Documents.
Manifests.
Bills of Lading.
Ship's papers.

PILOTAGE: Vessels approach within 0.25 mile, flying "G" Flag. Loc fishermen act as Pilots and board approx. 1 hour prior to berthing tim

ANCHORAGES: For small vessels of not more than 12 ft. draft, 1 mi S.E. of harbour. Deeper-drafted vessels 3 miles East of Harbour. Goo holding grounds except in heavy weather from East to South.

RESTRICTIONS: In accordance with state of tide and draft restriction

HEALTH: Pratique required from all vessels other than from a Briti port. "Q" Flag to be flown.

Also see "Health – All Ports" before first U.K. port.

RADIO: Humber Radio Station is the best for a vessel to route ETA, et

VHF: Call sign "Bridlington Harbour". Call on Channel 16. Working and 14.

TUGS: None available.

BERTHING: No cargo vessels. Fishing harbour handles fishing vesse and yachts.

MEDICAL: Agents require advance notice of required medical attentio Hospital facilities available. Relevant medical information, i.e. fever, etc required.

DENSITY: Sea water.

FRESH WATER: Unlimited quantity available. Delivery from shore pipe line at the rate of 3 t.p.h.

FUEL: All grades available. Delivery by road tankers.

IDENTIFICATION CARDS: Not required.

CONSULS: No local Consuls. Nearest port of availability, Hull, Yorks

REPAIRS: Limited engine and deck repairs.

REPATRIATION: No facilities exist for crew change.

AIRPORT: Yeadon, 45 miles, served by regular airlines.

HOLIDAYS: Normal Bank Holidays. Fish landings can be worked these days.

POLICE/AMBULANCE/FIRE: Police Bridlington 72222; Ambulanc 0482 – 881198; Fire 73585.

TELEPHONES: No arrangements exist for placing telephones aboar

SHORE LEAVE: Crew members allowed ashore.

AUTHORITY: Bridlington Piers and Harbour Commissioners, Harbo Office, Harbour Road, Bridlington, East Yorkshire, United Kingdom. *Te* 70148/9. *Contact:* G. W. Wallis, Harbour Master.

BRISTOL (Avonmouth): 51.30 N. 02.42 W.

(See Plan Boo

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office form I.B.6.
1 Stores List.
1 Certificate of Deck Cargo tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate (British ships only).

In addition, Manifests and Bills of Lading are usually sent to Agent dire from loading port.

PILOTAGE: Compulsory. Telegraphic address, "Brispilot Avonmout Notice required, at least 12 hours prior to arrival at Breaksea Lighthous Buoy (may soon be increased to 16 hours). Pilots can also be embarke off Ilfracombe (24 hours advance notice required). Breaksea boardin and landing station is one mile North of Lighthouse Buoy. Pilots boa from 58 ft. motor pilot boat, black hull, "Bristol Pilot" in white lette amidships, operating from Barry Harbour.

VHF Channel calling 16, working 6.

Details of rates and other particulars including tonnage and coastwis exemptions from pilotage available from Haven Master, R. E. Doc Avonmouth Dock pilotage. Pilotage for locks to berth available but n compulsory.

ANCHORAGES: Barry Road affords good anchorage in modera weather for vessels awaiting a Pilot.

RESTRICTIONS: Royal Portbury and Royal Edward Locks are manne from 4.5 hours before to 3.5 hours after HW, Portishead Locks fro 2.5 hours before to 1.5 hours after HW.

MAX. SIZE: *Royal Portbury:* Max. length 950 ft., max. beam 130 ft., dra 40 ft.

Royal Edward: Max. length 690 ft., max. beam 95 ft., draft 34 ft.

Avonmouth Dock through Junction Cut from Royal Edward: Max. leng 560 ft., max. beam 75 ft., draft 26 ft. 6 in.

Portishead Dock: Max. length 415 ft., max. beam 60 ft., draft 24 ft.

Note: The above quoted drafts are for tides that reach below Mea High Water i.e. on many tides a greater draft could be accommodate on a few tides vessels of the quoted draft would be neaped.

RADIO: Lands End (HF, VHF), Ilfracombe (HF), Celtic (VHF), Seve (VHF).

RADAR/VHF: Port radar coverage of King Road in low visibi conditions. VHF coverage (Avonmouth Radio) from Breaksea to doc entrances.

HEALTH: Foreign arrivals are required to complete Maritime Declaration of Health and to report to Port Health Authority by radio, sickness, prior to arrival if possible, otherwise report on arrival at dock entrance.

Health clearance by Port Medical Officer must be obtained.

Foreign arrivals which have had no sickness aboard do not need to submit Maritime Declaration of Health or to obtain Health Clearance.

Onus of reporting sickness is the personal responsibility of the Master.

All vessels are required to report the presence of animals or birds aboard vessel and any disease amongst such animals or birds.

Vessels arriving from ports within the excepted area and coastal arrivals need not present Declaration, but when there is sickness on board Port Health Authority must be informed.

Also see "Health – All Ports" before first U.K. port.

TUGS: Ships for Royal Portbury Docks are normally met by tugs West of Portishead Point.

Other vessels docking on flood tide normally meet tugs at old oil jetty to Northward of the entrance lock. Vessels docking on ebb tide, tugs join between Firefly and Cockburn Buoys. Ship's line always used.

BERTHING: There are 12,320 ft. of operational quay at the Royal Edward Dock, Avonmouth, including dry and liquid bulk berths with a self contained oil basin containing 8 berths, 4 of which are equipped with common user pipe-line systems. The majority of berths, are equipped with shore cranes or, in the case of granary berths for example, suction elevators.

In general, conventional and combi vessels are handled at Avonmouth with Royal Portbury catering for unit load traffic and Ro/Ro.

Royal Portbury Dock: Currently, the Port of Bristol's new Royal Portbury Dock is equipped with a Lo-Lo/Ro-Ro berth and common user forest products terminal, both situated on the 2,000 ft. long Gordano Quay. Two 45 tonne gantry cranes and a 40 tonne mobile crane are available at this Quay which is backed by an area of paving covering 21 acres for container handling and a further 29 acres, including 250,000 sq.ft. of covered storage area, for forest products. United Molasses Company, a division of Tate & Lyle Ltd., operates a new import storage and distribution depot with a tankage capacity of 53,000 tonnes. This development is situated behind Berth 4, St. Georges Quay. This follows the opening in 1982 of a 47,000 cu.m. cold storage located on the Portbury Estate by Frigoscandia, the largest cold storage and refrigerated transport company in Europe. Both Nissan U.K. and the Abbey Hill Group have constructed vehicle handling terminals for import and export traffic with throughput in excess of 100,000 units per year.

CRANES: Various types up to 12.5 tonnes at Avonmouth together with one 150 tonne floating crane. At Royal Portbury, 2×45 tonne gantry container and 1×40 tonne mobile crane. In addition 6 shore grain elevators with a total capacity of 1,300 tonnes per hour and 1 gantry drag link, loading only at a rate between 160 tonnes and 300 tonnes per hour depending on source granary.

BRIDGES: Avonmouth Docks. Junction between Avonmouth Dock and Royal Edward available at all times if necessary by arrangement with Dock Master.

STEVEDORES: At least 24 hours notice required in order that necessary labour may be allocated.

MEDICAL: Absolutely necessary for Agent to have as much notice as possible of any medical attention required. All facilities available.

DENSITY: Avonmouth Docks: Average density 1012 to 1015; in the river fluctuates according to tides. Portishead Docks: The density is 1015.

FRESH WATER: Avonmouth and Portishead Docks: available at all berths, 24 hours a day from hoses connected to standpipe. Delivery rate 25 – 30 t.p.h.

FUEL: Most grades available – 24 hours notice required.

FIRE PRECAUTIONS: According to local laws, available on request.

GANGWAY/DECK WATCHMEN: Not absolutely necessary – Available if required.

OPENING/CLOSING HATCHES: If crew open hatches on the first day then they must continue to do so whilst vessel is discharging/loading, otherwise dockers attend to this.

CERTIFICATES:

Load Line Certificate.
Safety Equipment Certificate.
Lloyd's Construction Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

CUSTOMS ALLOWANCES: Customs allowance for crew members of British and foreign ships in British waters at present are:

Tobacco: (incl. cigars and cigarettes) – 30 grammes (1 oz.)

Spirits: (incl. liqueurs, perfume and toilet water) – 0.185 litre (0.75 of a bottle) of which not more than half may be perfume

Wine: 1.5 litres (2 bottles)

IDENTIFICATION CARDS: Not necessary unless being repatriated.

CONSULS:

Belgian Consul
Chilean Consul
Danish Consul
French Consular Agent
Finnish Vice Consul
German Consul
Greek Consul
Icelandic Consul
Italian Consular Agent
Netherlands Vice Consul
Norwegian Vice Consul
Portuguese Vice Consul
Spanish Vice Consul
Swedish Vice Consul

REPAIRS: All types of repairs are carried out. Contact Bristol Ship Repairers Ltd., Graving Dock Works, Royal Edward Dock, Avonmouth, Bristol BS11 9AZ. Tel: Avonmouth (0272) 823422/5. Telex: 498477 Drydok G.

DRY DOCK:

	Total length	*Length over blocks*	*Width of Entrance*	*Depth of water on sill*
Avonmouth Docks	875 ft.	850 ft.	100 ft.	32 ft.

REPATRIATION: Repatriation can be effected to all parts of world.

AIRPORT: Local airport approximately 12 miles away. London can be reached in 1.5 hours by train.

TIME: BST is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: New Year's Day; Easter (varies); May Day; Spring Bank Holiday (last Monday in May): Summer Bank Holiday (varies, usually last Monday in August); Christmas Day (25th December); Boxing Day (26th December). Work can be arranged on these holidays, except 25th/26th December.

POLICE/AMBULANCE/FIRE: *Royal Portbury and Avonmouth Docks:* Dock services can be contacted by dialling 222/333 on port's exchange or 822591 on British Telecom exchange.

Otherwise dial 999 on British Telecom. Exchange for national emergency services.

MEDICAL: Contact Brixham and Torbay Shipping Agents.

DENSITY: 1025.

FRESH WATER/FUEL: Available from Brixham Bunkering and Devon Marine Jetty on Breakwater.

REPAIRS: Electronic, gyro, engine welding, plumbing by local firms.

SURVEYORS: West Marine Surveyors & Consultants Limited, Consulting Marine Surveyors, Engineers & Naval Architects, The Old Custom House, Brixham, South Devon. Tel: Brixham (Std 08045) 2604. After normal office hours Tel: (0803) 842925. Cables: Surveyor, Brixham. Telex: 42962 – Survey G.

REPATRIATION: See "Services".
AIRPORT: Exeter 35 miles away, Plymouth 34 miles away (daily flights to/from London).

Air UK flights from Exeter to Amsterdam, Brussels, Guernsey, Jersey and Southampton.
POLICE/AMBULANCE/FIRE: Brixham 2231 or 3065 or 999.
SERVICES: No tank cleaning.

Torbay and Brixham Shipping Agents Ltd. and Devon Star (off limits) Tel: (08045) 2214 and 4939. Telex: 42737. Cables: Dencade. VHF: Channel 9 and 16. Offer repatriation services, compass adjusting, radio and radar repairs, divers, chemist, charts, provisions, fresh water (by arrangement), fuel, bonded stores, doctor and medical services, crew changes (available underway and off port limits).
SHORE LEAVE: Allowed.
AUTHORITY: Borough of Torbay, Tor Hill House, Castle Circus, Torquay, TQ2 5QN, United Kingdom. *Tel:* (0803) 26244. *Telex:* 42929. *Contact:* D. G. Bent, Harbour's Administrator.

BUCKIE: 57.41 N. 02.57 W.

PILOTAGE: Pilots keep VHF watch (Channel 16) 1 hour prior to arrival of vessel.
ANCHORAGES: 0.5 miles West of West Mucks beacon.
RESTRICTIONS: Vessels with max. draft berth/sail at HW only.
MAX. SIZE: LOA 82 m., beam 12 m., draft 4.3 m.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Deck, engine, radio and radar repairs undertaken.
AIRPORT: Dyce (Aberdeen), 55 miles away.
AUTHORITY: Harbour Master – Buckie, Harbour Office, 28B Commercial Road, Buckie AB5 1UN. *Tel:* 0542 – 31700. *Telex:* 739148 (Ref-328) *Cables:* "Harbourmaster". *Contact:* Captain T. Garden, Harbour Master.

Grampian Regional Council, Woodhill House, Ashgrove Road West, Aberdeen AB9 2L4.

BUDE: 50.50 N. 04.33 W. (See Plan Book)

DOCUMENTS/HEALTH/CONSULS: Port not equipped to accept vessels from abroad.
PILOTAGE: Not normally available (special arrangements may be made).
ANCHORAGES: Outer Harbour dries out at half tide.

Inner Harbour (Canal) 8ft. draft maximum.
MAX. SIZE: Inner Harbour (Entry via Lock) length 90 ft. Beam 25 ft. Draft 8 ft.
RADIO: MF Ilfracombe Radio. VHF Severn & Celtic Radio.
VHF: Bude Harbour Office listens on VHF Channel 16 when a vessel is expected.
FRESH WATER: Available via 0.5 in. hose pipe.
TELEPHONE NUMBERS: Harbour Master Bude 3111 (Office), Bude 3531 (Home), Coastguard Harland 235*, Police Bude 2131.

*Nearest Coastguard.
GENERAL: Port little used by commercial shipping.
SPECIAL REGULATIONS: Entry to the Harbour is made by leaving Chapel Rock (linked to the Main Land by a Breakwater) to starboard. Head towards the Lock in the Channel marked by 2 pairs of Leading Beacons.

The outer pair of Beacons, bearing 075° 30′ (T) consist of a front mark – white Spar with Yellow Diamond Topmark, rear mark – white flag staff, both on cliff top on North side of Harbour.

The inner pair of Beacons, bearing 131° 30′ (T) consist of a front beacon – white Pile Beacon with Yellow Triangle Topmark, rear beacon – white spar with Yellow Triangle Topmark, placed 0.5 cable West of Lock Entrance.

The approach to Bude, either from the North or South, should be made from a S.W. direct direction in line with the first pair of Leading Marks.

Immediately on passing Barrel Rock (0.5 cable North of Chapel Rock and marked by a Beacon Barrel) turn to starboard and pick up the inner pair of Leading Marks from which the Lock is clearly visible.

Entry to the Harbour at night not recommended.

Heavy ground swell and breaking seas may prohibit entry and exit.

The Harbour dries out at each Tide and entry of vessels is normally restricted to 2 hours either side of High Water.

For Locking, 18 ft. minimum of water above Chart Datum is required to Lock. A heavy swell may also prohibit the operation of the Lock.

Prior notification of arrival should be made to the Harbour Master if possible.
AUTHORITY: North Cornwall District Council, The Castle, Bude, Cornwall EX23 8PB, United Kingdom. *Tel:* Bude 3111. *Contact:* W. Cloke, Harbour Master.

BURNTISLAND: 56.03 N. 03.14 W.

DOCUMENTS: See "Leith".
PILOTAGE: Compulsory. See "Leith".
RESTRICTIONS: Dock gates normally opened from 3 hours before H until HW.
MAX. SIZE: Width of dock gate 18.2 m. Max. width through ga 16.8 m. Max. depth 8.6 m. MHWS.
RADIO: See "Leith".
RADAR/VHF: Through Forth Navigation Service from Leith.
TUGS: Available from Leith.
BERTHING: 443 m. of quayage at East Dock. Depth 8.6 m. MHWS.
CRANES: 2×10 tonnes grabbing cranes.
BULK CARGO FACILITIES: Bauxite vessels discharge into 2×8,0 tonne barges at anchor. The barges are unloaded by shore cranes in th East Dock.
STEVEDORES: Local company supplies labour.
REPAIRS: Fabrication yard situated in West Dock. 2×300 ft.×85 bays, depth 19 ft.
AUTHORITY: Forth Ports Authority, Dock Office, Burntislan *Tel:* Burntisland 872236. *Contact:* Captain R. Taylor, Port Manag Captain I. C. Bayliss, Harbour Master.

CALEDONIAN CANAL: 57.27 N. 04.18 W.

PORT LIMITS: Craft are considered to be within the Canal when th have entered the sea lock structures.
DOCUMENTS: Masters of craft on through passage must report to th Sea Lock Office at Corpach with the ship's measurement certificates enable toll declaration to be made. Masters of craft on partial passag starting and returning to the East coast should report to th Clachnaharry Canal Office.
PILOTAGE: Approach pilotage compulsory at Inverness end. Conta Inverness Pilots by Link Call through Inverness 32845 or 35264 (Ship of NRT under 100 tons are exempted). Pilotage within the Canal an West approaches optional. For Pilotage into Corpach from the Wes contact Mr. H. McKinnon at Corpach by Link Call to Corpach 304 and f Canal Pilotage, by Link Call to Caledonian Canal Office, Invernes 33140.
RESTRICTIONS: Entrances to sea locks restricted for 2 hours eithe side of LW springs. There is generally no restriction at LW neaps. Th Canal is operated on normal manning from 0800 hrs. until 1700 hrs (Sundays excepted).
MAX. SIZE: 48.77 m. (160 ft.) length overall × 10.67 m. (35 ft.) beam 2.74 m. (9 ft.) draft fresh water or, alternatively, 45.72 m. (150 ft.) 10.67 m. (35 ft.) × 4.11 m. (13 ft. 6 in.) draft fresh water.

Corpach sea lock will admit craft to the Corpach Basin only of siz 61.87 m. (203 ft.) length overall × 10.67 m. (35 ft.) beam × 4.11 m (13 ft. 6 in.) draft fresh water.

All dimensions are overall and *NOT* moulded.
HEALTH: Vessels from foreign ports will be boarded by th Customs/Immigration/Health at the sea locks and they should fly th appropriate international flags on approach.

Also see "Health – All Ports" before first U.K. port.
RADIO: Western approaches via Oban Radio. Eastern approaches vi Wick or Stonehaven Radio.
VHF: None.
RADAR: None.
TUGS: A Canal tug is available if required. Service should not b required on normal passage.
BERTHING: At Corpach Old and New Wharves (limited Custom approval). At Inverness Glenmhor and Glen Albyn Wharves belo Muirton and Upper Muirton Wharf at the top of Muirton. Water dept available for craft having 4.110 m. (13 ft. 6 in.). Normally ships gear o road mobile cranes used. Corpach New Wharf equipped with 2 × 7 to Derrick Cranes owned and operated by Scottish Pulp and Paper Mills
BRIDGES: Road and rail swing bridges are operated to permit th passage of craft. Headroom restricted to 36.576 m. (120 ft.) by overhea electric cables near Inverness.

Kessock Bridge at Inverness: Headroom restricted to 28.96 m. (95 ft over HW springs.
STEVEDORES: Traffic to Scottish Pulp and Paper Mills at Corpac unloaded by Pulp Mill gangs. Elsewhere arranged through Shippin Agent.
MEDICAL: Normal General Practitioners service available at mai centres along the Canal. Full Hospital facilities at Inverness.
FRESH WATER: Fire hose supply available at Glen Albyn Whar Inverness. Small domestic supplies available at the main lock flights.
FUEL: Available by road tanker from principal oil companies b telephoning Shell, Inverness 238850 or Fort William 2404; Ess Inverness 237222 or Fort William 2903.
REPAIRS & DRY DOCK: Limited repairing facilities at the Thornbus Slipway and Engineering Company Limited, Inverness.
AIRPORT: Highlands and Islands domestic flights from Invernes (Dalcross).
POLICE/FIRE/AMBULANCE: Emergency calls to these services o 999.
GENERAL: The Caledonian Canal is part of the Customs Port o Inverness.
AUTHORITY: British Waterways Board. Caledonian Canal Offic Clachnaharry, Inverness.
Contact: At Corpach: Mr. N. Rix. At Inverness: G. Anderson, 046 233140.

CAMPBELTOWN: 55.25 N. 05.36 W. (See Plan Book)

DOCUMENTS: 2 Crew Lists; 2 Passenger Lists; 1 Store List; 1 Personal Effect List; Ship's Register; 1 Manifest or Bill of Lading.

PILOTAGE: Although *not* in Clyde Port Authority area, where large vessels are concerned, it is advisable to have the services of a qualified Clyde River Pilot or where applicable a Certificated Naval Pilot. As neither are based in Campbeltown, it is essential that at least 24 hours notice be given to Agent, when required.

ANCHORAGE: For large vessels in 6 to 10 fathoms in the area between the Orange leading lights and the Methe Bank Buoy, for smaller vessels a wider area can be used but South side of loch best holding.

HEALTH: Normal UK Port requirements. In event of disease or fever prior notice should be given to Agent.

Also see "Health – All Ports" before first U.K. port.

RADIO: All messages through normal coastal stations or by radio telephones via Portpatrick Radio when nearer port. Cables should be addressed to Agents.

RADAR/VHF: No port radar service. Direct contact with Harbour Authority on VHF Channels 12, 13 and 14. P.O.L. Depot, Campbeltown can be called on 30 – 40 mile radius on Channels 6, 12, 18. Same channels for tugs, lying off port, when arranged previously.

TUGS: Must be ordered at least 24 hours beforehand as they come from Glasgow area further North on River Clyde. Precise requirements concerning arrival/departure times requested owing to heavy costs entailed for waiting time.

BULK CARGO FACILITIES: Berth for vessel up to 230 ft. in length with maximum permissible draft 12 ft. (Salt water). Discharge by shore crane, Maximum lifting 5 tons.

SPECIALISED CARGO HANDLING FACILITIES: One berth for Roll-on/Roll-off ferry inside harbour, max. draft of vessel 12 ft. General cargo discharged.

STEVEDORES: Agents arrange all cargo discharges, including mechanical handling. Portable cranes only available. Ship's gear used when available to minimise costs.

MEDICAL: One casualty hospital available. Serious casualties transferred to Glasgow either by air or road, according to condition. Five local doctors.

TANKERS: All intended arrivals should be notified to Officer-in-Charge, P.O.L. Depot, Campbeltown (Tel. No. 0586/2226) at earliest.

P.O.L. Jetty, minimum depth, 40 ft. One discharging berth available.

FRESH WATER: Available at all times, delivery by hose.

FUEL: Marine gas oil supplied on commercial quay. Naval requirements by arrangement with P.O.L. depot.

REPAIRS: Minimal repairs only. Notify Agent as early as possible.

SURVEYORS: Arrange through shipping Agents.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Ship's option.

CARGO GEAR: See "Stevedores". Ship's gear preferred where possible.

REPATRIATION: Air service available once daily in forenoon, except Sunday.

AIRPORT: Machrihanish – 3 miles distant.

TIME: GMT. GMT plus 1 hour in Summer.

HOLIDAYS: New Years Day (1st January) Christmas Day, Boxing Day, 3 Statutory Local Holidays, Annual Holidays 1st fortnight in August.

Work can be carried out by arrangement with Stevedores.

POLICE/AMBULANCE/FIRE: Dial 999.

EMERGENCY CO-ORDINATION CENTRE: Coastguard, New Quay, Campbeltown, Tel: 2770.

TELEPHONES: By arrangement.

SERVICES: Laundry/Dry Cleaner, Minimal Radar/Radio, VHF Repairs. No tank-cleaning equipment available or compass adjusting.

IDENTIFICATION CARDS: Not required. P.O.L. Depot request production of Seamen's Cards.

BANKS: Bank of Scotland, 9 Longrow, Campbeltown Tel: 2274.

Royal Bank of Scotland, 11 Castlehill, Campbeltown Tel: 3617.

Clydesdale Bank, 19 Longrow, Campbeltown Tel: 2130.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.

GENERAL: Basin of the Clyde Lat. 55° 25′ 0″ N., Long. 5° 35′ 30″ W.

Tides: Spring rise 8.9 ft; Neap rise 7.5 ft.; depth at sea entrance, 12 ft. low water spring tide; there is a rise of 8 ft. in spring tide in harbour.

AUTHORITY: Strathclyde Regional Council, Area Engineer's Office, Old Quay Buildings, Campbeltown. *Tel:* Campbeltown (0586) 20365 or 52552. *Contact:* Mr. A. Stewart, Harbour Master, Campbeltown.

P.O.L. Depot, Campbeltown. Officer-in-Charge, Kilkerran Road, Campbeltown.

AGENT: Denholm Ship Agency Ltd., Nanthida, Low Askomil, Campbeltown, Argyll PA28 6EP. Tel: 0586 52710. After hours (0586) 52710, (0475) 33241. Telex: 777767. Cables: Denholm Greenock.

CARDIFF: 51.29 N. 03.10 W. (See Plan Book)

PORT LIMITS: A vessel is considered as "arrived" when it is in the lock.

DOCUMENTS:

1 Crew List.

1 Health Form.

1 Port Immigration, i.e. Crew List, and where applicable, a passenger list.

Pratique issued by Customs.

1 List of Consumable Stores (tobacco, snuff, alcohol, etc.).

3 Bills of Lading (1 original and 2 copies).

PILOTAGE: Channel pilotage and dock pilotage not compulsory except for vessels carrying passengers. Pilots embark from pilot cutters operating from Barry Harbour.

Pilot cutters are marked on each side "Pilots" and operate radio continuous watch on VHF. Signal for pilot cutter – numeral "7" on whistle or siren. Telegraphic address: Barry Sewpil (telex). Minimum of 24 hours notice required of ETA. VHF Channels 16, 9, 14 and 11.

ANCHORAGE: Barry Roads: Good anchorages in moderate weather in depths from 5 to 6 fathoms (9.1 m. to 11 m.) about 0.5 miles S.W. of the entrance to Barry Docks. Clay bottom.

RESTRICTIONS: Entry to docks restricted to a period of 4 hours before and 3 hours after high tide, according to size and draft of vessel.

Entrance lock 850 ft. length, 90 ft. wide.

MAX. SIZE:

Queen Alexandra Dock: LOA 650 ft., beam 88 ft. 3 in., max. draft 34 ft.

Roath Dock: LOA 650 ft., beam 85 ft. 6 in., max. draft 34 ft.

Vessels near maximum dimensions may be accepted on certain tides after consultation with the Dock Master.

HEALTH: Maritime Declaration of Health to be made to Port Authority or Customs Officer, whoever boards ship first. In event of contagious fever on board, Port Health Authority must be advised by radio before arrival. No Pratique necessary if vessel is entering port from another port in U.K.

Also see "Health – All Ports" before first U.K. port.

RADIO: Ilfracombe Radio and Portishead Radio.

VHF: A port operation VHF service maintained at dock entrance during tidal hours. Call sign "Cardiff Radio" calling on Channel 16 and operating on Channel 14 or Channel 11. There is also "Severn Radio".

TUGS: Tugs normally join vessel 0.5 mile to seaward of Outer Wrach Channel Buoy, and arrangements for attendance of tugs should be made through ship's Agent.

BERTHING: Arranged through Dockmaster, and berths within docks are flat quays. Rise and fall usually varies up to 1 ft.

Dock	*Quay Length (Total)* (m.)	*Normal Depth of Water* (m.)	*Max. Size of Vessel* *Length* (m.)	*Beam* (m.)	*Draft* (m.)	*Approx. d.w.t.*
Queen Alexandra	2,234	11.3	198.12	26.9	10.37	33,000
Roath Dock and	2,181	11.0	198.12	26.06	10.37	33,000
Roath Basin	1,174	11.0	158.00	21.30	8.50	18,000

Storage and Warehousing Facilities: Quayside: 5 transit sheds – 32,810 sq.m. (351,050 sq.ft.).

Back sheds: 13,870 sq.m. (149,280 sq.ft.).

Open storage: 8.7 hectares (21.5 acres) with a further 17.4 hectares (43 acres) managed by independent terminal operators.

Cranage and Mechanical Handling: Crane capacity: 2×15 tonnes; 8×7.5 tonnes; 5×5 tonnes; 9×3 tonnes.

2 additional 10 tonne grabbing cranes are provided by a terminal operator within the docks. The port provides a fleet of fork lift trucks for quayside cargo handling ranging from 4,000 lb. to 88,000 lb. capacity.

SPECIALISED CARGO HANDLING FACILITIES:

(i) Cold Storage: King's Wharf Cold Store, managed by the International Cold Storage Co. Ltd. has a capacity of approximately 12,000 tonnes and can operate with temperatures down to −23°C.

(ii) Cool Storage: Cool store with a capacity of approximately 60,000 cartons at any one time. The store is equipped with cooling machinery to maintain temperatures at 50°F – 55°F. (10°C – 13°C.).

(iii) Timber Terminals: Bulk carriers received at deep water berths, discharge of 2,000 cu.m. of timber in a single gang shift, large hardstanding storage areas plus covered accommodation for woodpulp and specialised timber products.

(iv) Combi Vessels: A modern front loading truck of 40 tonne capacity, capable of stowing containers three-high, available for handling.

(v) Bulk Cargoes: 1 grain loading appliance.

(vi) 2 Scrap Berths.

BRIDGES: Bridges throughout the port can be operated on tide times.

STEVEDORES: Arrangements for employment of stevedores undertaken by A.B.P. through ship's Agent.

Port Working Hours:

	Day Work	*Shift Work*
Monday – Friday	0700 – 1630	0600 – 1400 1400 – 2200
Saturday	0700 – 1130	0600 – 1000 1000 – 1400
Sunday	0600 – 1400	0600 – 1400 1400 – 2200

Vessels may also choose to work 0700 – 1630 (2 hours extra to finish if need be), Monday – Friday.

MEDICAL: All facilities available. Agents should be advised in advance if medical services required.

TANKERS: 4 tanker berths available, one in Queen Alexandra Dock, one in Roath Dock, one on South lay-by outside dock and one at Penarth on River Ely (Esso) length 500 ft. Special instructions are issued to Master on arrival at port. Average discharge approximately 448 cu.m.p.h.

DENSITY: 1018.

FRESH WATER: Available 24 hours daily from quayside, delivery 20 t.p.h. maximum.

FUEL: Fuel of all grades available.

FIRE PRECAUTIONS: For tankers, strict fire precautions required in accordance with latest safety procedures.

Emergency Action – Fire: In the event of an outbreak of fire (no matter how small) immediately dial 999 on the ship-to-shore telephone. When the operator answers, say "Fire", and wait until you are connected to the Fire Station Control. Then repeat: "Fire at Berth, (name of berth)". In event of the ship-to-shore telephone being inaccessible or out of order, use short blasts on ship's siren to alert Police and Port Authority. VHF can be used on tide times.

GANGWAY/DECK WATCHMEN: Performed by ship's crew and necessary for tankers.

OPENING/CLOSING HATCHES: Carried out by ship's crew.
CUSTOMS ALLOWANCES: Tobacco, 1 oz. per day per man, max. 8 days. Wine/Spirits, 0.25 pint spirits per man per day every 4 days.
IDENTIFICATION CARDS: Not needed.
REPAIRS: All types of repairs possible.
DRY DOCKS:

	Length	*Width at Entrance*
1. Channel Dry Dock	193 m. (633 ft.)	22.8 m. (75 ft.)
2. Commercial Dry Dock	183 m. (600 ft.)	18.3 m. (60 ft.)
3. Bute Dry Dock	182 m. (597 ft.)	21.7 m. (71 ft.)
4. Mount Stuart No. 3	165 m. (541 ft.)	20.1 m. (66 ft.)
5. Mount Stuart No. 2	131 m. (430 ft.)	16.0 m. (53 ft.)

Dry Dock Nos. 1, 3, 4 and 5 owned and operated by Bristol Channel Ship Repairs Ltd. (Nos. 1, 4 and 5 not in use at present). No. 2 operated by Commercial Dry Dock Enterprises Ltd.
REPATRIATION: Facilities exist to exchange crews and repatriate to any part of world.
AIRPORT: Airport 11 miles from Cardiff, serving other airports to all parts of world.
TIME: GMT. GMT plus 1 hour in Summer.
HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Whit Monday (Spring Holiday); May Day (1st Monday in May); August (Summer Holiday) one day; Christmas Day; Boxing Day.

AGENT: See "Douglas."

CLYDE PORT (Including Glasgow, Greenock, Finnart and Hunterston): 55.51 N. 04.16 W. (See Plan Book)

PORT LIMITS: For limits of jurisdiction see "Plan Book" – "Firth of Clyde and Sea Lochs".

DOCUMENTS: Following required on arrival:

3 Crew Lists on IMO Standard Form.
3 General Declarations. Customs Form C13.
3 Ships Stores Declarations. Customs Form C14.
2 Cargo Manifests. Customs Form C16.
1 Personal Effects Declaration. Customs Form C142.
1 Declaration of Health.
Bills of Lading.
Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
Derat or Derat Exemption Certificate.

PILOTAGE: Compulsory pilotage.

Pilotage shall be compulsory in the portion of the Pilotage District within the area bounded on the West by that part of the line of Longitude 5° 06′ West commencing on the North shore of Loch Striven and then proceeding in a Southerly direction to the North shore of the Island of Bute and by the same line of longitude, from the South shore of the Island of Bute South to the latitude of Gull Point; thence by a line extending due East (T) to Gull Point; thence towards the S.E. by a line proceeding in a 143° (T) direction for 7 nautical miles; and thence on or towards the N.E. by a line proceeding in a 053° (T) direction to the North boundary of the Harbour of Saltcoats.

Within this area pilotage is compulsory for vessels exceeding 1,600 g.r.t. Pilots board off Little Cumbrae Island.

To the East and North of a straight line drawn from Kempock Point, Gourock, due West to the Cowal Shore, pilotage is compulsory for vessels exceeding 100 g.r.t. Pilots board West of Kempock Point.

Gourock Pilot Station, tel: Gourock 34631.

VHF Channels 14 and 16. Call "Clyde Pilots".

Vessel to advise Agent 72, 48 and 24 hours before arrival with subsequent advice of any changes to ETA, stating where Pilot required to board, ETA and draft.

Normal ladder, etc., for Pilot boarding.

Limits of Pilotage District:

(i) To the East of the Isle of Arran a line drawn due East and West across the river or Firth of Clyde from the coast of Ayrshire to Corrygills Point on the East Coast of the Isle of Arran; and

(ii) in Kilbrannan Sound a line drawn due East and West across the river or Firth of Clyde from the N.W. coast of the Isle of Arran to the coast of Kintyre being an extension of a line drawn due East and West from the Southernmost point of the island of Little Cumbrae to the N.W. of the Isle of Arran.

ANCHORAGES: Anchorages are available for vessels of all drafts in the Tail of the Bank area (off Greenock) and lower Firth of Clyde.

Anchorages are allocated by Clyde Port Estuary Radio. The anchorage positions are shown on Admiralty Charts Nos. 1907 and 1994.

RESTRICTIONS: Vessels entering the river channel are restricted to a maximum fresh water draft of 32 ft. Entry time for deeply laden vessels is dependent on the rise of tide.

Damaged vessels and vessels that are not in class must have a current Seaworthy Certificate and prior permission from the Harbour Master before entering the area of jurisdiction of the port.

MAX. SIZE: As agreed by Clyde Port Authority for berths in Glasgow and Greenock and subject to consideration of particular circumstances prevailing in each case.

HEALTH: Masters should report by radio to "Portelth Glasgow" any infectious illness which has occurred, or which has been suspected, during the voyage.

Also see "Health – All Ports" before first U.K. port.

RADIO: Traffic should be routed through any British coast station.

Clyde Pilot Vessel: Calling 2182 MHz. Working 2241 MHz. Hours: Listens each hour + 15 minutes.

VHF: Clyde Port Estuary Radio: Channels 16, 14, 12 and 11.

Gourock Pilots Radio: Channels 16 and 14.

RADAR: There is no port radar.

BERTHING: *General Cargo:* Discharged and loaded at Shieldhall Riverside Quay and King George V Dock, Glasgow.

Container Vessels: Handled at Greenock Container Terminal where 2 ships can work simultaneously. Berth is equipped with 1×40 ton and 2×35 ton transporter cranes with an outreach of 105 ft. beyond the line of the cope. The quay is 1,200 ft. long with a depth of 42 ft. at LWOST.

Ro-Ro Units: Can be handled at King George V Dock, Glasgow and at James Watt Dock and Garvel Basin, Greenock.

BULK HANDLING FACILITIES: Iron ore and coal are handled at Hunterston Terminal where discharging vessels up to 350,000 d.w. tonnes. and loading vessels up to 70,000 d.w.tonnes can be accommodated. Depth alongside up to 29 m. Max. draft 27.4 m. 2 unloaders, rates up to 3,000 tonnes per hour for ore and 1,000 tonnes per hour for coal.

Scrap iron and minerals are handled at Rothesay Dock (Clydebank) where vessels up to 535 ft. in length with a draft of 31 ft. in fresh water can be accommodated. With prior arrangement vessel in excess of 535 ft. may be accepted.

Sugar and molasses are handled at James Watt Dock, Greenock. Vessels using the dock are restricted to a salt water draft of 27 ft. 9 in. and a beam of 70 ft. The max. length accepted for sugar vessels is 550 ft. and for molasses vessels 500 ft.

Grain is discharged at Meadowside Quay (Glasgow) to the 176,000 tonne granary which is situated behind the dockside goods sheds. There are 6 grain elevators each with a capacity of 200 t.p.h. Max. draft for vessels using Meadowside Quay is 32 ft. in fresh water.

CRANES: Cranes presently in use by Clyde Port Authority at Glasgow and Clydebank are: 13×5 tons, 5×6 tons, 3×10 tons, 1×25 tons, 1×30 tons, 1×35 tons, 1×165 tons.

BRIDGES: Erskine Bridge which spans the navigable river channel has a 180 ft. working clearance above MHWS.

STEVEDORES: Arranged by ship's Agent in accordance with Master's advice of ETA.

TUGS: As required by Master and under advice of the Pilot. Tug's lines are always used.

MEDICAL: Full medical and hospital facilities available.

TANKERS: *Finnart (BP Oil Ltd.):* Privately operated crude oil terminal. Vessels up to 500,000 d.w.tonnes with a draft of 90 ft. in salt water can be accommodated.

Bowling (Esso Petroleum Co. Ltd.): Privately operated oil product terminal. Under suitable conditions of tide and weather vessels up to 550 ft. in length can be swung in the river off the installation.

DENSITY: Glasgow – Fresh; Greenock – Brackish; Hunterston – Salt.

FRESH WATER: Available by hose at all berths operated by the Clyde Port Authority.

FUEL: Most major oil companies are represented in Glasgow. All grades of bunker oil can be supplied by barge or road tanker and by pipeline at Bowling Terminal.

FIRE PRECAUTIONS: Masters of vessels at the Authority's berths are given, on arrival, a copy of the Port Fire Protection Regulations.

Oil tanker berths are privately owned and the operators issue their own Fire Regulations.

CONSULS:

Belgium
Brazil
Canada
Cyprus
Denmark
Domincan Republic
Ecuador
Finland
Gambia
Greece
Iceland
India
Italy
Netherlands
Norway
Panama
Peru
Philippines
Poland
Portugal
Spain
South Africa
Sweden
Thailand
Uruguay
West Germany

REPAIRS: All types of repairs can be effected in the area.

DRY DOCKS: Largest drydock is 1,000 ft. long with 145 ft. clear width at entrance.

In addition there are 10 other smaller drydocks in the Glasgow and Greenock area.

SURVEYORS: The following are represented in the area: Lloyd's Register of Shipping, Norske Veritas Register of Shipping, Bureau Veritas Register of Shipping, American Bureau of Shipping, The Salvage Association.

In addition, a number of independent marine and cargo surveyors are available.

GANGWAY/DECK WATCHMEN: Shore watchmen are available from private contractors but need only be engaged at the discretion of the Master.

HATCHES: Opening and closing of mechanical hatches may be carried out by ship's crew. Wooden hatches are handled by dock labour.

CUSTOMS ALLOWANCES: Standard United Kingdom allowances.

CARGO GEAR: Under normal circumstances, cargo is handled by shore equipment.

REPATRIATION: Repatriation can be arranged to all countries.

AIRPORT: Glasgow Airport (12 miles from city centre) and Prestwick Airport (30 miles from city centre) are both served by a number of major airlines.

Air UK have flights from Glasgow to Amsterdam.

TIME: GMT, but British Summer Time (1 hour ahead of GMT) in force during the Summer.

HOLIDAYS: Details of official dock holidays on which cargo work cannot be arranged can be obtained from the Marketing Department of the Port Authority, on request.

SERVICES: Facilities are available for repairs and service to radio equipment and navigation aids. A compass adjuster is based at Glasgow.

There are no facilities for cleaning oil tankers, but small quantities of oil/sludge may be removed by road vehicles.

SHORE LEAVE: Shore leave is at Master's discretion.

IDENTIFICATION CARDS: Not required to be carried.

REGULATIONS: Tankers having on board or having carried cargo with a flashpoint below 73°F are prohibited from proceeding East of Bowling.

Special regulations apply to the handling and transit of explosives.

There are special requirements in force regarding the production of a gas free certificate for OBO and ore/oil vessels calling at Hunterston Ore/Coal Terminal.

It is a requirement of the Clyde Port Authority that every vessel in excess of 1,600 g.r.t., constructed or adapted for the carriage of oil, chemicals or gas in bulk, complies with the reporting procedures as specified in Statutory Instrument 1981 No. 1077, entitled, The Merchant Shipping (Tankers) (EEC Requirements) Regulations 1981.

BANKS: All National and many European and International banks have branches in Glasgow.

SHIP SUPPLY SERVICE: *Surface Craft:* Clyde Marine Motoring Co. Ltd., Princes Pier, Greenock, Renfrewshire.

Clyde Shipping Tugs Ltd., Clydesdale Bank Building, Greenock, Renfrewshire.

Cory Ship Towage (Clyde) Ltd., Customs House Quay, Greenock, Renfrewshire.

Marine Craft Services (Clyde) Ltd., 87 Main Street, Fairlie, Ayrshire.

R. Ritchie, Esq., 1 Royal Street, Gourock, Renfrewshire.

Talisman Offshore Services, 46 Cambusdoon Place, Kilwinning, Ayrshire.

Helicopters: Air Charter (Scotland) Ltd., Glasgow Airport, Paisley.

Burnthills Aviation Ltd., Glasgow Airport, Paisley.

McAlpine Helicopters Ltd., Glasgow Airport, Paisley.

POLICE/AMBULANCE/FIRE: Can be called on the public telephone system by dialling 999 or by contacting Clyde Port Estuary Radio on VHF Channel 16.
EMERGENCY CO-ORDINATION CENTRE: H.M. Coast Guard (Marine Rescue and Co-Ordination Centre), Navy Buildings, Eldon Street, Greenock. Tel: (0475) 29988. Telex: 777006.
TELEPHONES: British Telecom can supply telephones at most berths. Agent will arrange and advise costs.
AUTHORITY: Clyde Port Authority, 16 Robertson Street, Glasgow G2 8DS. *Tel:* (041) 221-8733. *Telex:* 778446. *Contact:* J. Mather, Managing Director. Captain D. B. McMurray, Harbour Master.
AGENT: *Glasgow and Finnart Tanker Terminal:* Denholm Ship Agency Ltd., Inter City House, 80 Oswald Street, Glasgow, G1 4PX. (Head Office of Agency Division). Tel: (041) 221 4971. After hours: (041) 771 3408, (036089) 2647. Telex: 77396. Cables: Denholm, Glasgow.
Greenock and Hunterston: Denholm Ship Agency Ltd, Customhouse Quay, Greenock PA15 1EG. Tel: (0475) 22276. After hours: (0475) 33241. Telex: 777767. Cables: Denholm, Greenock.

COLCHESTER: 51.54 N. 00.55 E. (See Plan Book)

PORT LIMITS: Brightlingsea Anchorage.
DOCUMENTS: As normal British port.
PILOTAGE: Part of Trinity House London District. Sunk Pilot Cutter cruises near the Sunk Light Vessel. Give as much notice as possible by radio telephone or VHF Channel 16. River Pilots are ordered by local Agents and board vessels at Brightlingsea Anchorage.
ANCHORAGES: Off Brightlingsea, in 3 to 4 fathoms.
RESTRICTIONS: Vessels with deck cargoes of timber, and vessels which are large for the port not worked at night.
MAX. SIZE: Max. length at Colchester, 200 ft. Max. length at Rowhedge and Wivenhoe, 250 ft. Max. draft at Colchester, 12 ft. 06 in. Spring tides, 18 ft. 06 in. neap tides. Max. draft at Rowhedge and Wivenhoe, 14 ft. 06 in. Spring tides, 10 ft. Neap tides.
HEALTH: Normal procedure. Any abnormal conditions advise Harbour Master. Pratique automatic if from U.K. port.
Also see "Health – All Ports" before first U.K. port.
RADIO: North Foreland Radio, Humber Radio or Niton Radio. 2182 kHz.
VHF: "Colchester Harbour Radio", VHF Channel 14. Office hours watch plus tide time watch when ships expected. Vessels should call when approaching port anchorage, giving deepest draft, and keep listening watch on Channel 14 when manoeuvring.
RADAR: None.
TUGS: Small motor tug available through Harbour Master.
BERTHING: 1,000 ft. of private quays. 3,200 ft. of public (corporation) quays. All berths use shore equipment and handle all cargoes. Port dries at LW. (Berths at Wivenhoe 450 ft., at Rowhedge 500 ft. additional to above.)
CRANES: A number of 4 ton – 6 ton mobile cranes.
BULK CARGO FACILITIES: Bulk cargoes handled at most berths, 3 grain silos.
STEVEDORES: Arranged by Local Agents. Average rate for all cargoes 50 metric t.p.h.
MEDICAL: Advance notice if possible. Hospital available.
TANKERS: One oil depot for discharging only, light fuels handled. No slop facilities.
DENSITY: Density varies with tide, average 1015.
FRESH WATER: Fresh water points on quays, rate approximately 9 tonnes/p.h., cost approximately £2 per tonne.
FUEL: All fuel deliveries by road tanker.
FIRE PRECAUTIONS: None.
CONSULS: None.
REPAIRS: Repairs can be carried out. One shipyard (J. W. Cook) at Wivenhoe.
SURVEYORS: Lloyd's Agent (W. Fieldgate & Son) or ship's Agent can arrange.
GANGWAY/DECK WATCHMEN: Not normally required.
OPENING/CLOSING HATCHES: By crew.
CUSTOMS ALLOWANCES: British standard allowance.
CARGO GEAR: Shore gear, no heavy lifts.
REPATRIATION: Arranged by Agents.
AIRPORT: London 70 miles.
TIME: GMT. GMT plus 1 hour in Summer.
HOLIDAYS: Normal British holidays, work sometimes arranged.
POLICE/AMBULANCE/FIRE: Tel. 999.
EMERGENCY CO-ORDINATION CENTRE: U.K. Coastguard – Dial 999 or VHF Channel 16 or Tel: Walton-on-Naze 5518.
TELEPHONES: None.
SERVICES: Compass adjusting arranged by Agents.
BANKS: Barclays, Midland, Nat-West, Lloyd's and Williams & Glyn all have branches in the town.
STORING: See "Prelims" page viii.

1. By truck.
2. Not applicable.
3. Yes, subject to cargo handling.
4. Yes
5. Normal U.K. Requirements.
6. Yes.

SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
DELAYS: Normally tidal delays only.
AUTHORITY: Colchester Borough Council, Harbour Office, Hythe Quay, Colchester, Essex, United Kingdom. *Tel:* Colchester (0206) 575858. *Contact:* Captain K. Goody, Harbour Master.

COLERAINE: 55.10 N. 06.46 W.

PORT LIMITS: 5.5 mile tidal stretch of the River Bann to the riv entrance.
DOCUMENTS: Normal U.K. requirements.
PILOTAGE: Compulsory, order through Agents or direct from Harbo Office or Pilot. 24 hours notice preferred. Pilot Station, Portstewart Ba Pilot boat call sign "S. G. Martin", call on Channel 16, workin Channel 12.
ANCHORAGES: Vessels awaiting tide can anchor in Portstewart Bay offshore winds or in Skerry Roads, East of Portrush.
RESTRICTIONS: The port is tidal and deeper vessels are restricted high tides. Limited night working.
MAX. SIZE: The recommended maximums are 250 ft. length, 40 breadth, 14 ft. 6 in. draft.
HEALTH: Normal U.K. procedure.
TUGS: Not normally required, nearest available tug is at Londonder Harbour.
BERTHING: Main Quay 900 ft., Detached Wharf 140 ft. and separa Oil Jetty. Max. draft vessels may ground safely on mud at LW.
CRANES: Two Priestman Lion 35 grabbing cranes for bulk coal, et One NCK Pentland for bags, pallets, etc. Heavy lift cranes arrangement.
SPECIALISED CARGO HANDLING FACILITIES: No facilities container or Ro/Ro traffic.
BRIDGES: A railway bridge with 60 ft. lifting span crosses the rive 0.5 miles down stream from the Harbour.
STEVEDORES: Messrs Wm. Dalzell & Sons Ltd.
MEDICAL: Full hospital/medical facilities available.
DENSITY: Varies from salt to fresh with tide.
FRESH WATER: Fresh water is available from mains hydrants at a berths.
FUEL: All grades available, 48 hours notice advisable.
REPAIRS: Local engineers can carry out most repairs. Divers als available for underwater work.
DRY DOCKS: None.
HATCHES: Hatches normally opened or closed by the crew.
AIRPORT: Belfast (Aldergrove 40 miles).
HOLIDAYS: 1st January, Easter Monday/Tuesday, May Day, 12th/13t July, Last Monday in August, 25th/26th December.
POLICE/AMBULANCE/FIRE: Tel: 999 in emergencies.
DELAYS: Vessels may be delayed by swell at the river entrance in ver bad weather conditions.
AUTHORITY: Coleraine Harbour Commissioners, The Harbour Offic The Quay, Coleraine BT52 1BJ, Co. Londonderry. *Tel:* 0265-201 *Contact:* W. R. Dalzell, Harbour Manager.

COWES (including Newport, Isle of Wight): 50.46 N. 01.18 W.

DOCUMENTS: As for "Portsmouth".
PILOTAGE: See "Southampton" for sea pilotage. As Cowes is within th Isle of Wight Pilotage District, a Sea Pilot must be employed by a vessels subject to compulsory pilotage. Trinity House Cowes Pilo conduct vessels between the anchorage area and berths in Cowe Harbour and Newport, 5 miles further up the River Medina. Pilots boa from launches *Thosbro 1 and 2,* which are equipped with VH Channels 16, 12, 9 and 6. A Pilot can always be obtained by makin link-call to Cowes 293812 or 292501 (24 hours service) or vi Southampton Pilots VHF Channel 16.
ANCHORAGES: Vessels waiting to proceed to Cowes or Newpo should anchor within the area bounded by Old Castle Point, "Prin Consort" light-buoy and the harbour entrance light-buoy. The prohibite anchorage on either side of the leading line must be respected, an vessels must not obstruct the fairway into Cowes, nor the deep wate channel used by large vessels bound for Southampton. The moorin buoys are reserved for hovercraft and the Trinity House lighthous tender. Mooring chains run East and West for 500 ft. from each of thes mooring buoys. Tidal streams in the anchorage are strong. Cowes is a international yachting centre, and the anchorage is often crowded wit small craft, especially during July, August and September.

Cowes Roads anchorage, North of the deep water channel, is used b large vessels waiting to berth in Southampton Water, taking bunkers o changing crews.
MAX. SIZE: Cowes – 300 ft. long, 17 ft. draft at high water spring Vessels must expect to take the bottom in soft mud at low wate Newport – 150 ft. long, 8 ft. draft. Newport Harbour practically dries o at low water.
RESTRICTIONS: Tankers may load and discharge at all times, subje to the Petroleum Acts.

A channel marked by small orange buoys is reserved for the use o hovercraft. Other vessels using the area should do so with caution.
FLOATING BRIDGE: A chain ferry plies between East and Wes Cowes. An all-round amber light is shown from the leading end of th bridge when under way. Approaching vessels should sound 1 prolonge blast on the whistle when not less than 0.5 mile away. The bridge give way to all river traffic. The chains of the ferry are at least 2 ft. above th river bottom in mid-channel at all times.
HEALTH: See "Portsmouth".
RADIO: See "Southampton" for Sea Pilot communications. Se "Pilotage" for local communications.

Southampton Port Radio, the port operations and radar station for th port of Southampton, will often assist in cases of difficulty, althou there is no obligation for them to do so and they accept no responsibili Southampton Port Radio VHF Channels 16, 14, 12, 11, 10, 18, 20 an 22. Medium frequency through Niton Radio.

TUGS: Harbour tug (3.5 ton bollard pull) and tow-boat launches are available to assist vessels.

BERTHING: *Medina Wharf.* Vessels 17 ft., spring draft, length 270 ft. OAL. Loading and unloading bulk cargoes of stone, coal, fertilisers, grain, etc.

Kingston Wharf. As for Medina Wharf, above.

STEVEDORES: By arrangement with Agent and wharf owners. Normal working hours: 0800 – 1700 hrs. Monday to Friday. Overtime on Saturdays, etc., by arrangement. No work on public holidays.

MEDICAL: All medical facilities are available. Agent should be given advance notice of requirements. If call is solely to land sick personnel, see "Southampton" entry.

DENSITY: Cowes – 1025 salt water.

Newport – varies according to amount of recent rainfall and state of tide.

FRESH WATER: Available on all commercial wharves.

FUEL: Fuel and Diesel oil available by arrangement with Agent.

CRANES: Hammerhead crane at Elliot Turbo Machinery Ltd., 50 tons. Medina Wharf: 2 grabbing cranes of 4.5 tons for bulk cargoes.

OPENING/CLOSING HATCHES: By ship's crew.

REPAIRS: All hull and engine repairs undertaken to vessels capable of Cowes entry. Graving dock for ships up to 200 ft. in length and 14 ft. draft.

SERVICES: Compass adjuster, radar and radio mechanics available locally. Charts and general stores available locally.

SHIP SUPPLY SERVICE: *Thomas Bros.:* 2×40 ft. launches (20 knots) available throughout 24 hours for stores – 12 persons – liberty boats, surveys, etc., and marine contract work – U.K. and Northern France. Tel: (0983) 293812.

Solent Cruises: 2×45 ft. fast vessels with twin screw, D.O.T. loadline exemption, able to carry up to 89 persons (reduced number in Winter).

Solent Cruises are contractors to the local authorities for the transfer of sick persons from the Isle of Wight to the mainland.

Contact on VHF Channel 16, (Jenny Lee – 2 RAH) when afloat or Telephone Isle of Wight (0983) 64602.

A 24 hour service is offered for transport of personnel, stores and passengers.

Marine Support and Towage Limited: Tel: (0983) 295369, 296424, 297363 (24 hours). Office (0983) 296934.

Details of Vessels:

Name	Length	General Description and Capabilities
Roperunner	33 ft.	Heavily fendered steel work launch, used for running mooring ropes/wires for large vessels 6,000 tons – 250,000 tons. Large open after work space, forward wheelhouse. Fitted with radar and multi-channel VHF radio. 120 h.p. diesel, 1 ton bollard pull. Speed 8 knots.
A. Stopford	40 ft.	Keith Nelson twin screw diesel fast launch, for personnel transport and light storage duties, open after cockpit with towage facility. Licenced for 12 passengers. 2×145 h.p. diesels. Speed 16 knots – 18 knots. Fitted with radar, VHF radio and echo sounder.
MST Lock	64 ft.	Steel harbour and esturial motor tug. 300 h.p. Crossley diesel, 3 ton bollard pull. Fitted with radar, VHF radio and echo sounder.
Presstan	68 ft.	Steel coastal tug, full D.O.T. loadline. 545 h.p. diesel, 6.5 tons bollard pull. Fitted with radar, VHF radio and echo sounder.

Above vessels are available on hourly, daily or long term charter, U.K. coast or continent. Company is experienced in offshore back-up, ship supply, etc. A 24 hour office facility call out is maintained.

St. Helens Laundry Ltd.: Tel: (0983) 872250, 873731.

Able to supply laundry and dry cleaning services to any vessels at Southampton Docks, Fawley Terminal, Netley, The Solent, Portsmouth Harbour or Docks, and the St. Helens Roads and Nab Anchorages.

OIL POLLUTION: Cowes and the Solent are world-famous yachting centres. Pollution is dealt with severely.

AUTHORITY: Cowes Harbour Commissioners, Harbour Office, Town Quay, Cowes, Isle of Wight, PO31 7AS. *Tel:* (0983) 293952. *Contact:* Captain H. N. J. Wrigley, Harbour Master/Clerk.

CROMARTY FIRTH PORT (See Plan Book)

(A) INVERGORDON.
(B) NIGG OIL TERMINAL.

(A) INVERGORDON: 57.41 N. 04.10 W.

DOCUMENTS: *At Boarding on arrival:*

1 copy Maritime Health Declaration and Derat Exemption.

Form I.S.6 – List of members of the crew who are aliens or who were engaged outside the United Kingdom.

Form C.13 – General Declaration (in duplicate).

Form C.14 – Ship's Stores Declaration (in triplicate).

Form C.16 – Cargo Declaration (in duplicate).

Form C.142 – Crew Declaration (in duplicate).

List 142.A – Parcels list – small packages of merchandise and addressed packages not borne on the ship's report.

Account of cargo in unregistered spaces (deck cargo) if arriving from a port outside Home Trade limits.

For vessels carrying cargo on deck or in other unregistered spaces (e.g. oil fuel in double-bottom and other ballast tanks), the Master must also complete Form SUR.238 Declaration of Deck Cargo in duplicate.

Delivery of forms. When a vessel is not boarded by a Customs Officer on arrival, 1 copy of each of the forms listed must be delivered by the Master or his authorised agent to the proper place at the port of arrival. The Regulations require delivery of these forms within 3 hours of the vessel's arrival at the place of loading or unloading. The second copy of Forms C.14 and C.142 must be retained on board by the Master or other responsible officer for use by Customs Officers who may subsequently visit the vessel.

Certificate of Registry.

Certificate of British Tonnage.

Light Dues Certificate relating to the vessel.

To the Agent:

Bills of Lading.

Cargo Manifests.

PILOTAGE: Pilotage not compulsory for Cromarty Firth except West of 04° 09′ W. and to Admiralty Pier. Vessels under 300 g.r.t. are exempt. Cruising station of pilot boat is the Cromarty Lighthouse where Pilot will board. Pilot boat painted black hull, buff upper structure.

Pilot boards from tug at Fairway Buoy for large tankers.

Approaching vessels may give their ETA to pilot station via VHF Channel 16, when in the vicinity of 30 miles, but a 24 hour notice will be required. In the event of bad weather, vessels will be guided by Pilot launch to safety where Pilot will board. Watch kept on VHF Channels 16 and 11 (24 hours) by Cromarty Firth Port Authority. Call sign "Cromarty Firth Port Control". Local weather forecasts available.

ANCHORAGES: Large tankers anchor 1 mile South of Fairway Buoy (L. Fl. 10 secs. Racon). Main anchorage West of Cromarty Ness Light.

RESTRICTIONS: Vessels may enter between 0600 hrs. and 2200 hrs. when Pilot will be available.

MAX. SIZE: Max. permissible length 800 ft., draft 36 ft. Also see "Berthing".

Nigg Oil Terminal: See "Section B".

HEALTH: International quarantine signals to be used. Advise "Portelth Dingwall" in advance if any suspected diseases on board.

Also see "Health – All Ports" before first U.K. port.

RADIO: Vessels approaching from North should pass their ETA cable via Wick Radio GKR 431, and vessels approaching from East via Stonehaven Radio GND 458 to their Agents.

VHF: Link calls through Cromarty Radio (based at Wick) Channel 16 and working Channel 28. Also see "Pilotage".

TUGS: Caledonian Towage Co. Ltd. – Tel: Invergordon 852611 – suitable tugs stationed at the port which work in conjunction with Pilots. Tug's lines used.

BERTHING: *Admiralty Wharf:* The wharf is the property of M.O.D. (Navy), however the berths are used regularly by commercial vessels.

Berths 1 and 2 (Outer South): Lengths 443 ft. Max. draft 36 ft. Max. LOA 800 ft. Also see "Tankers".

Berth 3: Max. draft 18 ft. Max. LOA 220 ft.

Berth 6: Max. draft 18 ft. Max. LOA 180 ft.

British Alcan Pier: Outer Berth: Length 318 ft. Dredged depth 38 ft. MLWS (1974). Max. berthing length 750 ft. approx. using dolphins. (50,000 d.w.t.)

Inner Berth: Length 200 ft. Depth 20 ft. MLWS (1974).

Invergordon Oilfield Support Base, Invergordon: Front berth 150 m., side berth 60 m. Front dredged to 8.9 m. below C.D. Side 4.3 m. minimum. Bunkers diesel – see "Fuel".

CRANES: Mobile cranes up to a maximum 75 tonnes available from stevedoring firms, plus crane-barge of up to 200 tonnes capacity from Caledonian Towage.

STEVEDORES: F. Lyons (Stevedores and crane hirers) – Burghead STD (0343) 835360. James Jack (Stevedores and crane hirers) – Tel: Evanton STD (0349) 830388.

MEDICAL: Medical cases can be dealt with at short notice through local Agent. Hospital facilities available.

TANKERS: Vessels up to 800 ft. Max. draft 36 ft. may use Admiralty Wharf, Berths 1 and 2 combined. Also see "Section-B".

DENSITY: 1022.

FRESH WATER: Obtainable alongside quay. Rate of delivery 30 t.p.h., each hydrant.

FUEL: This can be ordered through local Agent, delivery by road tanker, small quantities, notice required.

GANGWAY/DECK WATCHMEN: Ship's gangway and safety net required. Watchmen from ship's personnel.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: The following Certificates are required to be held on board for production when required:

International Load Line Certificate.
Safety Construction Certificate
Safety Equipment Certificate.
Safety Radio Certificate.

CUSTOMS ALLOWANCES: Following quantities are generally left out for use on board by each member of crew:

Ships arriving from foreign ports within Home Trade Limits: Tobacco 125 gm. (4 oz. or 100 cigarettes). Spirits 0.185 litre (0.25 bottle), wine 0.375 litre (0.5 bottle).

All other ships from foreign ports: Tobacco 250 gm. (8 oz. or 200 cigarettes). Spirits 0.375 litre (0.5 bottle), wine 0.75 litre (1 bottle).

IDENTIFICATION CARDS: Not required.

REPAIRS: General repairs undertaken by Cromarty Firth Engineering Co. Ltd. – Tel: Evanton 830551; MacKay & MacLeod – Tel: Evanton 830363 and Wm. Cook Engineering – Tel: Evanton 830484.

REPATRIATION: Can be arranged.

AIRPORT: Dalcross Airport at Inverness, operated by British Airways, distance from Invergordon 30 miles (via Kessock Bridge).

TIME: British Summer Time, 1 hour advanced on GMT. GMT in Winter months.

HOLIDAYS: 1st and 2nd January. Christmas Day.
POLICE/AMBULANCE/FIRE: Police, tel. Invergordon 852222 or dial 999; Ambulance, arrangements through local doctor, tel. Invergordon 852522; Fire Station, dial 999 and ask for their service.
TELEPHONES: H.M. ships only.
SHORE LEAVE: Allowed.
GENERAL: Permit must be obtained from Port Authority or Ministry of Defence when burning or welding is to be carried out at Admiralty Pier.
DEVELOPMENTS: Reclamation is taking place of 8 acres of land adjacent to the existing Oilfield Support Base on the Westward side, as additional lay-up area.

(B) NIGG OIL TERMINAL: 57.41 N. 04.02 W.

LOCATION: Nigg Oil Terminal operated by Britoil plc., provides shipping facilities for crude oil piped ashore from the Beatrice Field in the Moray Firth. The terminal is located on the North side of the Cromarty Firth in approximate position Lat. 57° 41.5′ N., Long. 4° 02.5′ W. and comprises a single berth jetty linked to the shore by a trestled roadway.
PILOTAGE: East of 4° 09′ W. the Cromarty Firth is a non-compulsory pilotage area. Vessels using Nigg Oil Terminal must however employ the Admiralty Pilot, who will board at the fairway buoy.
ANCHORAGE: The recommended anchorage for vessels awaiting a berth is 1 mile South of the fairway buoy in approximate position Lat. 57° 40′ N., Long. 3° 54′ W. An anchorage within the Cromarty Firth may be made available by the Port Authority.
RESTRICTIONS: *Depth alongside berth:* A minimum depth of water of 21 m. below chart datum is available alongside the berth.

Channel depths: The least depth in the approaches to the terminal in August 1980 was 15.1 m. below C.D. and occurred in the buoyed fairway approximately 0.5 nautical miles within the port limits.

Tidal range: Tides range at Springs from 0.8 m. at LW to 4.3 m. HW.

Tidal restrictions: Subject to draft, vessels will be able to berth and sail at any state of the tide, possibly excepting Spring ebbs. Berthing head Eastwards is to be preferred.

MAX. SIZE: *Length restrictions at berth:* Max. 290 m. LOA. Minimum 190 m. LOA.
Max. displacement: 157,500 tonnes.
VHF:

Communications:	Port Authority	Channel 11 & 16
	Port Emergency	Channel 11
	MOD Pilot	Channel 13
	Tugs	Channel 13
	Pollution Control	Channel 10
	Nigg Oil Terminal	Channels 49, 50

Portable VHF/UHF sets: These must not be used within the Terminal Area unless they are classed as "intrinsically safe". The Terminal will lend approved VHF equipment if necessary.
TUGS: Berthing and unberthing operations will be assisted by a minimum of 2 tugs of 50 tons and 38 tons bollard pull respectively. A relief tug of 40 tons bollard pull may be substituted for either of these tugs. A third tug of 19 tons bollard pull will also be available if required. The vessel's agent will arrange for tugs as required by the Master. A firefighting tug will remain on standby at all times when a tanker is at the Nigg Oil Terminal Jetty. Whilst underway within Port limits a 1 tug escort is required.
BERTHING: *Berthing velocity:* A Doppler speed of approach measuring instrument is installed on the jetty with a dual display atop the jetty gangway tower. This display gives digital information in ft./min. on the speed of approach of each end of a berthing vessel. The digital display is supplemented by coloured lights calibrated as follows:
Flashing green – speed of approach 0/10 ft./min.
Flashing amber – speed of approach 11/20 ft./min.
Flashing red – speed of approach greater than 20 ft./min.
A steady green light indicates a receding velocity.

Vessels must not exceed a berthing velocity of 20 ft./min., regardless of displacement, and should aim to achieve a berthing velocity of less than 10ft./min. (i.e. 2 flashing green lights.).

Mooring arrangements: The Plan (see "Plan Book") depicts a mooring arrangement for a typical 80,000 d.w.t. vessel. Similar configurations will be employed for all vessels in the range 40,000/120,000 d.w.t.

Seebeck quick release mooring hooks are fitted on all dolphins.

Each berthing dolphin is fitted with a 3-hook assembly; each hook of 100 tonnes capacity.

Each berthing dolphin is fitted with a 2-hook assembly; each hook of 100 tonnes capacity.

The 50 tonnes bollards at the corners of the jetty head are for use by small craft only.
LOADING: *Loading arms:* 3×16 in. Emco Wheaton loading arms, each designed to ANSI 150 lb. pressure rating, are installed on the jetty head. Each arm may be used either for deballasting or for loading and these operations can take place concurrently provided that the terminal approves the system of onboard separation.

The minimum acceptable ship's figure size is 12 in. Nominal Bore. The M.I.B. couplings can be adjusted to 12 in., 14 in. or 16 in. flange sizes. Vessels must present manifold flanges with a minimum clearance of 8 in. behind the flange and 3 ft. axial clearance around the centre of the flange face in order to provide adequate clearance for the coupling jaws. If necessary spool pieces must be fitted. Flanges of steel or nodular iron must be presented. Cast iron manifold materials are not acceptable. The vessel's manifold connections must remain within an envelope between 2.85 m. and 6.1 m. off the berthing face and between 4.6 m. and 25.6 m. above chart datum.

If ranging or drift-off exceeding 2.7 m. occurs the coupling ball valves will close and the couplings will automatically disconnect.

If sustained wind speeds exceed 35 knots loading operations will stop and arms will be drained. Arms will be disconnected if wind speeds exceed 40 knots.

Loading rates and pressures: Loading rates of 50,000 bbls./hour ar attainable utilising 2 loading arms. the maximum pressure permitted a the ship's rail is 128 p.s.i.

Ballast reception: Ballast water reception facilities are available at th Terminal. Ballast must not be discharged overboard within the por Vessels not having segregated ballast tanks must deballast ashore Vessels with segregated ballast must retain their ballast onboard fo inspection and analysis after berthing, and disposal of this ballast i subject to the results of this inspection and analysis. Permission will no be granted for the overboard discharge of segregated ballast with an o content in excess of 5 parts per million.
FRESH WATER: Fresh water is available on request from the Termina from a connection on the jetty head. Approximate maximum deliver rate is 30 t.p.h.
FUEL: Bunkers are not available at Nigg Oil Terminal.
REPAIRS: Repairs may only be commenced upon receipt of a wor permit signed by the Terminal Superintendent. Immobilisation of vessel alongside the jetty is only permitted with the written permission o the Terminal Superintendent and of the Port Authority.

Readiness to vacate berth: Engines and all other essential equipmen of vessels alongside the jetty must be maintained in a state of readines for vacating the berth at short notice.
STORING: Loading of stores onto a vessel alongside the jetty may b carried out only with the specific permission of the Termina Superintendent and in a manner and at a time approved by him.
SHORE LEAVE: A pass system will operate. Shore leave will normall be by launch from the jetty launch landing pontoon. Shore leav arrangements are the responsibility of the vessel's Master and wi normally be made by the ship's Agent. Details of the arrangements ar to be provided to the Terminal Superintendent.
GENERAL: *Permanent watch:* During operations a responsible membe of the ship's crew must be stationed in the vicinity of the manifold.

Smoking: No smoking is permitted in the Terminal Area or on th weather deck of any vessel in the Terminal Area. Smoking may b permitted at the Master's discretion in two onboard locations, to b approved by the Terminal Superintendent.

Emergency: In the event of an emergency any assistance require must be summoned via the Terminal Control Room.

Craft alongside: Craft may not lie alongside a vessel at the jett without the written permission of both the Master of the vessel and th Terminal Superintendent.

Refuse: No refuse or waste may be disposed of overboard from vessel within the Port.

I.S.G.O.T.T.: Vessels must be provided with a copy and be familia with the contents of the International Safety Guide for Oil Tankers an Terminals. Reference copies are available on temporary loan from th Terminal.

Important telephone numbers:
Nigg Oil Terminal: Nigg (086 285) 631.

DARTMOUTH (Including Totnes): 50.21 N. 03.34 W.

(See Plan Boo

PORT LIMITS: A line from Inner Froward Point to Combe Point.
DOCUMENTS: Normal documents for U.K. ports.
PILOTAGE: No direct radio contact with Pilots. Contact local Agent o Berry Head Coastguard Station who will telephone Pilot.
Pilot station 5 cables S.S.E. Castle Ledge Conical Buoy.
ANCHORAGE: Anchor at pilot station.
MAX. SIZE: Max. length 400 ft., max. draft 26 ft.
HEALTH: Pratique granted by Customs on arrival.
Also see "Health – All Ports" before first U.K. port.
RADIO: Route cables, etc., through Niton or Lands End Radio Station
VHF: Watch maintained on Channel 11, 0900 – 1700 hrs. durin weekdays. Call sign "Dartnav".
TUGS: Tugs are not normally available.
BERTHING: All berthing on midstream buoys.
Totnes: Max. Size: At Spring Tides coasters of about 1,000 tons up t 240 ft. LOA and drawing 12.5 ft. proceed up river to the Baltic Wha which lies half a mile below Totnes Bridge.
Berthing: 750 ft. quay. Dries out all tides.
MEDICAL: All medical services are available; if possible give notice o requirement.
DENSITY: Normally salt. 1025.
FRESH WATER: Available by barge.
FUEL: Diesel available by barge.
FIRE PRECAUTIONS: Normal.
GANGWAY/DECK WATCHMEN: It is advisable to have watchmen.
OPENING/CLOSING HATCHES: Crew open.
CARGO GEAR: Ship's gear.
REPAIRS: All repairs unless of a major or underwater type can b carried out.
SURVEYORS: West Marine Surveyors & Consultants Limite Consulting Marine Surveyors, Engineers & Naval Architects, The O Custom House, Brixham, South Devon. Tel: Brixham (STD 080 4 2604. After normal office hours tel: 0803 842925. Cables: Surveyo Brixham. Telex: 42962 – Survey G.
REPATRIATION: Facilities exist.

AIRPORT: 35 miles from Exeter airport. Internal and short range Continental flights.
TELEPHONES: Not normally available, except for H.M. ships.
HOLIDAYS: Not applicable.
POLICE/AMBULANCE/FIRE: Dial 999 for emergencies. Local hospital adjacent to Harbour Office.
SHORE LEAVE: Permitted. Seaman's book adequate.
GENERAL: Dartmouth does not now operate as a commercial port except for small vessels up to about 800 d.w.t. en route to Totnes, although the harbour is suitable for ships of 18,000 d.w.t., and mooring buoys are available for such vessels.

Lay-up facilities available for vessels up to 22,000 tons displacement.
AUTHORITY: Dart Harbour and Navigation Authority, The Old Post Office, South Embankment, Dartmouth, Devon. *Tel:* Dartmouth 2337/3767. *Cables:* "Harbour Master Dartmouth". *Contact:* Captain C. J. Moore, Harbour Master.

DOUGLAS: Isle of Man: 54.09 N. 04.28 W.

(See Plan Book)

PORT LIMITS: That part of the coast including all creeks, bays and headlands from HW mark Ordinary Spring Tides which extends from Port Soderick Landing Jetty (Lat. 54° 07′ 24″ N., Long. 04° 31′ 48″ W.) in a Northerly direction to the most Easterly point of Clay Head (Lat. 54° 11′ 42″ N., Long. 04° 23′ 05″ W.) thence in a straight line drawn in a 135° True (S.E.) direction for 3 nautical miles, thence in a straight line drawn to a position 3.5 nautical miles 135° True (S.E.) from Port Soderick Landing Jetty, thence in a straight line drawn to Port Soderick Landing Jetty.

All shipping entering the above defined area should contact Douglas Radio on Channel 16 VHF.
DOCUMENTS: Same as for all U.K. Ports.
PILOTAGE: Not compulsory. Arrangements usually made at least 24 hours before vessels' arrival, through Ships' Agent, or to Harbour Master, Douglas – Tel: 23813. Call Douglas Radio on Channel 16 and then transfer to Channel 12 for instructions 1 to 2 hours before ETA Douglas Bay.
ANCHORAGES: In Douglas Bay:
Douglas Head bearing 196° (T) 7 cables in 6 fathoms
„ „ „ 199° (T) 9.3 cables in 7 fathoms
„ „ „ 200° (T) 8 cables in 6.5 fathoms
„ „ „ 212° (T) 7.9 cables in 10 fathoms
RESTRICTIONS: Enter only on Harbour Master's instructions.
Traffic Signals: International Port Traffic Signals (see Admiralty Notice to Mariners 568/83) are exhibited when required, by day and night, from a mast at the head of Victoria Pier, visible from seaward and from inside the harbour, as follows:

Signal	*Meaning*
3 fixed red lights, disposed vertically	Vessels may not proceed
Fixed green, white, green lights, disposed vertically	A vessel having received specific permission by RT may proceed
3 fixed green lights disposed vertically	All vessels may proceed

Supplementary signals will be exhibited simultaneously in lights from a panel on the roof of a building near the head of Victoria Pier, visible from seaward and from inside the harbour, as follows:

Signal	*Meaning*
Red St. Andrew's Cross	Vessels unless specified may not proceed
White arrow	Vessels may proceed in the direction indicated

The panel will have a flashing orange light at each top corner.
MAX. SIZE: Max. size of cross channel vessels 350 ft. LOA, draft 13 ft.

Max. size of cargo vessels 190 ft. LOA, draft 12 ft. Spring tides 9 ft., Neaps to Inner Harbour, dries out at LW.

Max. size of tankers 230 ft. LOA, draft 13 ft. at LWOST.
HEALTH: See "Health – All ports" before first U.K. port.
RADIO: Port Patrick for vessels coming from North. Anglesey for vessels coming from South.
VHF: Douglas Radio manned at all times. Channel 16 and 12 only.
RADAR: Port Radar available for use in fog or when required. Used with Channel 12 VHF.
TUGS: 2 tugs with bollard pull of 4 tons operated by Laxey Towing Company Ltd. Tugs fitted with VHF.
BERTHING: Passenger vessels – 6 berths for vessels of 350 ft. in length, 13 ft. draft LWST at Victoria Pier and King Edward Pier.

Office Berth – vessels 225 ft. LOA draft 13 ft., dries out at LW.

Cargo Vessels – Battery Pier berth vessels 180 ft. LOA with draft 12 ft. aft, 8 ft. forward at LWST.

Coffee Palace Berth will accommodate vessels of 190 ft. LOA draft 12 ft. Springs, 9 ft. Neaps, dries out at LW.

Market Berth same as Coffee Palace Berth.

Battery Pier – Tankers up to 230 ft. LOA, draft 13 ft. at LWOST. Gas Tankers can berth at inner end of Battery Pier, vessels of up to 180 ft. LOA, draft 12 ft. aft, 8 ft. forward at LWOST. Discharging of cargo vessels and container vessels can be done by shore crane.

All berths at Douglas are salt water.
CRANES: The cranes are 5 ton mobile cranes, capable of lifting about 2 tons – 3 tons when working at full radius. One mobile grab crane.
BULK CARGO FACILITIES: Bulk cargoes of coal and scrap metal are handled at Coffee Palace and Market Berths described above.

Rate of discharge for coal about 60 t.p.h. – 70 t.p.h. by grab crane.
SPECIALISED CARGO HANDLING FACILITIES: Roll-on/Roll-off service operated to Victoria Pier by Manx Line Ltd.

Roll-on/Roll-off cargo service operated by Isle of Man Steam Packet Co. to King Edward VIII Pier.

LPG cargoes are handled at inner end of Battery Pier as described above.
BRIDGES: Swing Bridge only to Inner Harbour.
STEVEDORES: Advice required to Ship's Agent. Rate of discharge – cement 60 t.p.h.; coal 60 – 70 t.p.h.
MEDICAL: Advise Agent when possible, alternatively contact Harbour Master with advance warning. Hospital available.
TANKERS: Tankers pipe-lines 6 in. 2 Tanker berths at Battery Pier – Max. draft. 16 ft. to be taken in on flood tide only. 13 ft. only at LW Spring tides. Discharging rate 180 t.p.h. – 200 t.p.h.
DENSITY: Density of water salt (1025).
FRESH WATER: Fresh water available on request to Agent or Harbour Master.
FUEL: Fuel delivered by road tanker only. Contact Manx Petroleum or Esso.
FIRE PRECAUTIONS: Fire precautions as normal.
CONSULS: None.
REPAIRS: Limited facilities only.
DRY DOCKS: None.
SURVEYORS: None locally, can be arranged with D.T.I. and Lloyd's at Liverpool.
GANGWAY/DECK WATCHMEN: Could be arranged by Agent.
OPENING/CLOSING HATCHES: Handled by crew.
CUSTOMS ALLOWANCES: Same as U.K.
CARGO GEAR: Cargo can be discharged by ship's own gear or mobile cranes.
REPATRIATION: Repatriation only done through arrangement with Agents.
AIRPORT: Ronaldsway Airport 8 miles from Douglas and served by regular airlines.
TIME: Same as U.K.
HOLIDAYS: Good Friday, Easter Monday, Spring Holiday, T.T. Friday (1st week in June), Tynwald Day (5th July), August Holiday, Christmas Day, Boxing Day, New Year's Day.
TELEPHONES: Connections to ships can be arranged at passenger piers.
POLICE/AMBULANCE/FIRE: Police Tel: 26222; Ambulance Tel: 3661; Fire Brigade Tel: 3333.
EMERGENCY CO-ORDINATION CENTRE: H.M. Coastguard, Ramsey, Isle of Man.
SERVICES: None.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Identification cards not required for British Ships. Same as U.K.
STORING: See "Prelims" page viii.

1. By truck.
2. Not applicable.
3. Trucks can go alongside vessels except tankers when working cargo or ballasting.
4. Fork lift trucks could be permitted.
5. U.K. Customs regulations.
6. Storing usually done by crew.

SHIP SUPPLY SERVICE:

1. General Marine Services Limited (Tel: (0624) 22364 or 21160), who operate the pilot launch and ship to shore transfers of personnel, stores, etc. This launch is kept afloat and a 24 hour-service is available.

2. Laxey Towing Company Limited operate one tug of 420 h.p., and two dumb barges. This company carries out towing and lighterage operations in addition to the transport of cargoes by barge. Tel: (0624) 23556; after hours (0624) 781724.

There is no helicopter service on the Island.
REGULATIONS: No unusual regulations.
DELAYS: Delays can be expected due to tidal conditions, or awaiting a berth; also delays caused by N.E. gales, which make Douglas Outer Harbour untenable.
AUTHORITY: Isle of Man Harbour Board, Sea Terminal Building, Douglas, Isle of Man. *Tel:* (0624) 23813. *Contact:* Captain W. B. Kinley, Chief Harbour Master. H. G. Moore, Chief Executive.
AGENT: Denholm (IOM) Ltd., 12 Finch Road, Douglas, Isle of Man. Tel: (0624) 25682. Cables: Denman Douglasiom.

DOVER: 51.07 N. 01.18 E.

(See Plan Book)

PORT LIMITS: The seaward boundary of the Port extends 1 mile off both the Eastern and Western entrances.
DOCUMENTS: Required on arrival:
Crew List H.O. Form I.S.6. or IMO FAL Form 5 (in duplicate).
Crew Declaration Form C.142 (in duplicate).
Ship's General Declaration (in duplicate) C13.
Ship's Surplus Stores Declaration (in triplicate) C14.
Derat Certificate available for inspection.
It is required to report and clear a vessel at Customs House if remaining in port more than 24 hours for loading and discharging cargo or embarking and disembarking passengers, with following:
Passenger List. Cargo Manifests (2 copies). Ship's documents.
PILOTAGE: Requests for Pilot normally made by local Agent.

Dover bound vessels from Westward, subject to compulsory pilotage must embark their Pilots at a position 1.5 miles S.W. of Folkestone Harbour. Such vessels should inform the Folkestone Pilot Station of their ETA 6 and 2 hours in advance.

Folkestone Pilot Station is situated close Westward of the root of the Breakwater. Pilot launches have black hulls and white wheelhouses, and display the pilot flag by day and exhibit pilot lights by night. When embarking/disembarking a Pilot from these launches, headway should be maintained. The pilot station and launches are equipped with VHF. Vessels leaving Dover Westbound must be under pilotage to this same position.

Dover bound vessels from Eastwards, subject to compulsory pilotage and requiring a Pilot off Dover, should report their ETA 12, 6 and 2 hours in advance to Dover Port Control, giving g.r.t. and maximum draft. Such Pilots are embarked 1 mile S.E. of the Eastern Entrance, the pilot boats are operated by the Dover Motor Boat Company.

Dover Port Control maintain a 24 hour watch on Channels 74, 16 and 12.

DEEP SEA AND COASTAL PILOTS: For Channel, North Sea, British Coast and Baltic.

Contact agency 36 hours before arrival by radio, giving ETA Dover and destination port(s).

Agencies are: "Hutchinson Gravesend" and "Hammond Dover".

On approaching Dover contact Port Control by VHF for instructions and: For "Hutchinson" Pilot – hoist, flash or sound No. 1 For "Hammond" Pilot – hoist, flash or sound "B".

Pilots will also board at any UK or continental port as required.

ANCHORAGE: Limited space available in Outer Harbour. Contact Port Control in advance for instructions.

The Outer Harbour comprises an area of approximately 600 acres. The Northern extremity indicated by buoy 'B' Eastern end and buoy 'C' Western end and 4 intermediate marker buoys, the Southern extremity denoted by a line through the Southern most tip of the Prince of Wales Pier and the Southern most tip of the Eastern Arm. The Eastern boundary is formed by a S.E.'ly line drawn through buoy 'B' and the Western boundary is formed by a S.E.'ly line draw through buoy 'C'.

The maximum depth at MLWS is 7.3 m.

RESTRICTIONS: Attention is drawn to the strict requirement of obtaining permission from Port Control to enter or leave the harbour.

It will be noted that although the traffic control signal may be exhibited for entry/departure, every vessel manoeuvring to enter or leave the port is required to obtain specific permission to enter or leave, as the case may be.

Vessels awaiting permission to proceed should keep at a safe distance of at least 1.5 miles clear of the entrance until so authorised. Responsibility for entering or leaving with caution and the safe navigation of each vessel subsequent to the receipt of permission to proceed continues to remain the responsibility of the Master.

Explosives – Dangerous Cargo: Declaration is to be made and permission obtained prior to entering the harbour. Dover Harbour Board is not compellable to receive within the harbour any articles which in their opinion would endanger safety of harbour or vessels or goods.

HEALTH: Pratique, obtained by radio via Coastguard Station giving name of ship, ports of call during voyage, nature of cargo, number of crew and passengers, port of destination and Agent, condition and health of all on board with details of any sickness. Coastwise vessels from U.K. ports have automatic Pratique.

Also see "Health – All Ports" before first U.K. port.

RADIO: Vessels from East use North Foreland Radio call sign GNF and vessels from Westward use Niton Radio call sign GNI.

RADAR/VHF: Port Control and Admiralty Pier Signal Station are fitted with radar and VHF, vessels can make initial contact with "Dover Port Control" on VHF Channels 74, 16 and 12. Operational frequency is Channel 74. See "Pilotage".

TUGS: Two tugs of 2,900 h.p. each. Tug names 'Deft' and 'Dextrous'. Twin engined Voith Schneider. Tugs will normally join vessels inside harbour entrance, but may meet vessels outside by arrangement. Tug's rope used. Tug charges on hourly rate. Price on application from Dover Harbour Board.

BERTHING: All berths in Outer Harbour can be reached at all times. There are 3 berths available on the Eastern Arm fitted with Yokohama fenders, maximum depth MLWS is 8.3 m. Berths are used for lay-by, general cargo, regular coastal oil tankers and vessels taking water, stores and crew changes.

Those berths in the Wellington and Granville Docks can normally be reached from 1 hour before each high water. All berthing requirements are allocated by Port Control.

Western Docks: This comprises the International Hoverport, Jetfoil Terminal, the Admiralty Pier, and Train Ferry Dock, the Inner Harbour, Tidal Basin incorporating the tug haven, Granville and Wellington Docks.

Granville Dock: This dock is non-tidal and comprises an area of 4.5 acres with depths of water of 21 ft. (6.4 m.) at MHWS, 17 ft. (5.2 m.) at MHWN. The entrance is 65 ft. (19.8 m.) wide and depth on the sill at MHWS is 21 ft. (6.4 m.). Transit sheds and open storage space are available at the Dockside.

Berth No.	*Length (m.)*		
1/2	146	Fruit/Veg/General	Portal cranes
3	76	Fruit/Veg/General	Portal cranes
4	40	Lay-by/Ro-Ro	
5	73	For lay-by only (no hot work)	
6	137	Grain	No cranes
7	96	Coal/Limestone/Coke/Pumice (leased to P.D. Fuels)	

Wellington Dock: This dock is non-tidal and comprises an area of 8 acres with depth of water 15 ft. (4.6 m.) at MHWS, 11 ft. (3.4 m.) at MHWN. The entrance is 70 ft. (21.3 m.) wide and depth on the sill at MHWS is 15 ft. (4.6 m.). Transit sheds and open storage space are available. A slipway 567 ft. (173 m.) in length is capable of taking private and commercial vessels on its cradle, up to 53.3 m. in length.

Berth No.	*Length (m.)*		
8	93	Private	
9	51	Lay-by/Grain	
10	98	Lay-by/Grain	
11	38	Private	
12	116	Sand/Ballast	
13	79	Private	
14	103	Private	
15	110	Fruit/Veg/General	No cranes (mobile only)

Prince of Wales Pier: This separates the inner and outer harbours. Please note that berthing alongside the Prince of Wales Pier is only permitted by special arrangement with the Harbour Superintendent.

Hoverport: All hovercraft services operate from the Hoverport adjacent to and West of the Prince of Wales Pier. "Hoverspeed" operate daily services for passengers and accompanied cars to Boulogne and Calais.

Admiralty Pier: Length 4,140 ft. (1,260 m.), with depths alongside ranging from 6.0 m. to 9.1 m.

There is one single width, single deck, multi-purpose Ro-Ro berth, other berths are used for passenger only services and for lay-bys.

At 150 m. from the base of the Admiralty Pier a jetty 75 m. in length has been constructed, to provide a breakwater for the jetfoil terminal contained to the North of this jetty. The entrance to the jetfoil terminal has been dredged to a depth of 5.0 m. below chart datum. Jetfoils operate daily services to Ostend for foot passengers only.

Train Ferry Dock: Adjacent to the Admiralty Pier is the train ferry dock which is operated by British Rail. Trains run direct into the ferries which operate daily services of passengers and freight to Dunkirk throughout the year.

Tidal Basin: This forms the entrance to the Wellington and Granville Docks and is entered between the Admiralty and Prince of Wales Piers. It comprises an area of approximately 12 acres.

The entrance is 140 ft. (42.7 m.) wide, with a depth of 10.8 m. at MHWS. There are 2 berths in the Tidal Basin, Nos. 16 and 17. No. 16 has a length of 300 ft. (91 m.) and is used by private yachts. No. 17, length 360 ft. (110 m.) leased to P.D. Fuels and principally used for the discharge of stone, slag and aggregates.

A tug haven is under construction in the Tidal Basin adjacent to Clarence Quay. A jetty 45 m. in length will be positioned perpendicular and to the Southern end of Clarence Quay. To the North of the new breakwater will be positioned a pontoon 90 m. long parallel to Clarence Quay, providing berths for all harbour craft including the 2 tugs, dredger, patrol launch, work boats and RNLI Lifeboat. Private berth users will not be allowed to use the berth without express permission from the Harbour Superintendent or Duty Marine Officer.

Eastern Docks:

The docks comprise the Eastern Arm, the Camber and Car Ferry Berths.

The Camber: A tidal basin divided from the Outer Harbour by the South Jetty and Pier 'A'. It will comprise an area of 11 acres with a depth of water of 5.0 m. at MLWS. Extensive reclamation of the camber is underway and completion is expected in March 1985. Commercial vessels and ferries may lie along the Eastern wall of the new reclamation for lay-by when permission from Port Control has been obtained. A 2 deck "Roll-on/Roll-off" freight berth, operated by Townsend Car Ferries Ltd., provides daily freight services to Zeebrugge and Calais.

Car Ferry and Freight Terminal: Operated by Dover Harbour Board. Berths 1 and 2 are situated in the Camber, Berths 3 and 4 being situated to the Westward of Pier 'A' and Pier 'B', Berths 5 and 6 situated at Pier 'C', with double lane loading bridges of 23 m. plus covered passenger bridges. The car ferry/freight berths provide berthing for vessels up to 122 m. in length with depths of water of 5.8 m. at MLWS. Berths are connected with loading bridges to enable cars, coaches and freight to drive on direct on board the vessels, operating to Calais, Boulogne, Ostend and Zeebrugge. Shore facilities provide modern reception buildings, a new passenger handling complex – operational in the latter part of 1984 – Customs clearance halls, restaurant, banking facilities, shipping operators' offices, spacious assembly car parks.

BULK HANDLING FACILITIES: 2×550 t.p.h. shiploaders for grain operated by Dover Stevedoring Co. Ltd.

CRANES: *Enclosed Docks:* There are 5 electrical portal cranes of SWL 3 tonnes installed at Berths 1, 2 and 3 in the Granville Dock also 2 mobile cranes SWL 20 tonnes available for cargo handling. The 2 mobile cranes may be employed for other duties. Hire charges on application to Dover Harbour Board.

Eastern Docks: Two container gantries, 2×20 tonnes SWL are available for hire.

CARGO HANDLING FACILITIES: Seven berths equipped for handling scheduled Roll-on/Roll-off traffic.

STEVEDORES: No particular ETA required as ship's Agent makes all necessary arrangements.

MEDICAL: Medical assistance can be arranged by Agent to vessels passing Dover Harbour. Doctor will board a vessel in English Channel or on arrival at anchorage in Outer Harbour. Hospital facilities are available.

GANGWAY/DECK WATCHMEN: Supplied on request.

OPENING/CLOSING HATCHES: By crew.

CERTIFICATES: Certificates to be obtained for foreign clearance: Register, Load Line, Safety Construction, Passenger and Safety Equipment.

IDENTIFICATION CARDS: Are necessary, plus passes for ship's personnel at Eastern Arm berths having to pass through Eastern Docks Terminal. Passes obtainable from Patrolman's Office on the Eastern Arm.

CONSULS:

DUNBAR: 56.01 N. 02.31 W. **(See Plan Book)**

PORT LIMITS: A line drawn across seaward end of entrance channel.
DOCUMENTS: Standard U.K. documents.
PILOTAGE: Local pilotage may be obtained.
APPROACHES: Leading lights bearing 198°, occulting green 6 secs.
ANCHORAGES: Safe anchorage in Castle Bay except in Northerly gales.
RESTRICTIONS: No berthing if heavy swell entering harbour.
MAX. SIZE: LOA 50 m., draft 4 m. at HWS. Vessels lie aground on sandy bottom at LW.
HEALTH: Standard U.K. procedure.
RADIO: Forth Radio.
VHF: None.
RADAR: None.
TUGS: None.
BERTHING: Prior permission must be obtained for vessels of 20 m. LOA or greater.
Cargo unloaded by ship's own gear.
CRANES: None.
MEDICAL: No medical facilities at harbour.
FRESH WATER: Available on quayside by hose connection.
FUEL: From road tanker by prior arrangement.
CONSULS: None.
REPAIRS: Minor repairs possible.
SURVEYORS: Lloyd's at Leith Docks.
GANGWAY/DECK WATCHMEN: By arrangement with Harbour Master.
CARGO GEAR: By ship's gear or mobile crane (by arrangement with Harbour Master).
AIRPORT: Edinburgh (Turnhouse) 35 miles.
TIME: GMT. GMT plus 1 hour in Summer (late March – late October).
HOLIDAYS: None.
POLICE/AMBULANCE/FIRE: Dial 999 in an emergency. Police, Tel: Dunbar 62718; Ambulance, Tel: Haddington 3307.
BANKS: Local branches of Bank of Scotland and Royal Bank of Scotland only.
EMERGENCY CO-ORDINATION CENTRE: H.M. Coastguard, Maritime Rescue Sub-Centre, Forth District, Crail. Tel: Crail 666.
STORING: Small quantities of stores can be loaded from quay. Trucks can come alongside at quay.
AUTHORITY: Department of Water and Drainage, Lothian Regional Council, Alderston House, Haddington, East Lothian. *Tel:* Haddington 4131. *Telex:* 727 586. *Contact:* T. Brown, Harbour Master, *Tel:* Dunbar 63005.

DUNDEE: 56.28 N. 02.57 W. **(See Plan Book)**

PORT LIMITS: A vessel is considered to be an "arrived ship" when:
(a) For berthing turn-arrival at Fairway Buoy.
(b) For Laytime – usually "off or at the berth" and subject to Charter-Party terms.
DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Tobacco Manifest.
1 Health Declaration.
Cargo Manifests.
Bills of Lading.
Derat Certificate.
Lights Certificate.
PILOTAGE: The port is approached by a well-defined main channel with up-to-date navigational aids. To provide information on navigation and safety the Authority operates a Port Control Service which maintains a 24 hour listening watch on VHF Channel 16 (156.8 MHz) and also operates on Channels 12 and 11 (156.6 MHz and 156.5 MHz).

Pilotage is compulsory in Dundee Pilotage District. Pilots board incoming vessels within a 3-mile radius seaward of Tay Fairway Buoy or as close to as weather permits. The pilot boat is only on sea station when shipping is expected and accurate ETAs are essential.

ETA should be given 6 hours before arrival either by radiotelephone link call to Dundee Port Control 24121 or by radiotelegram to "Dockyard Dundee" Dundee or by telex 76644 Dpa G. Amendments should be made up to 2 hours before the original ETA. When within VHF range (approx. 25 miles from Tay Fairway Buoy) ETAs may be confirmed by contacting "Dundee Harbour Radio" on Channel 16 and transferring to Channel 12 to pass messages.

Pilot boats, when on station, keep a listening watch on Channel 16 and transfer to Channel 6 (156.3 MHz) to pass messages.
ANCHORAGES: Pilots are instructed where to anchor vessels. There are 3 deep-water anchorages to accommodate vessels up to 28 ft. draft. Two anchorages for vessels up to 22 ft. draft, and other minor anchorages.
RESTRICTIONS: Tide and draft 28.5 ft. at MHWS. Vessels enter 2 hours before HW. 26 ft. at MHWN. Vessels enter 2 hours before HW.
MAX. SIZE: Length 600/700 ft., beam 90 ft., draft 28.5 ft.
HEALTH: Health declaration on arrival – if clean, automatic Pratique. Suspect disease as per international requirements. Pratique automatic if already called at another port.
Also see "Health – All ports" before first U.K. port.
RADIO: Any UK coast station. Nearest stations – Stonehaven and Forth.
VHF: Towage is operated by the Authority's tugs – 'Scotscraig' (1,100 h.p.) and 'Castlecraig' (750 h.p.). Tugs join vessels in the vicinity of West Ferry. Tug lines are optional. Tugs operate on Channels 16, 12 and 6. Also see "Pilotage".
TUGS: Tugs join vessel in vicinity of West Ferry. Tug lines optional, charge made if tugs lines used.
BERTHING: See Table overleaf.
CARGO HANDLING FACILITIES: All types of general cargo are handled, including packaged timber and side-loading of forest products. Grab facilities for bulk material. Conveyors are arranged for grain and suitable bulk materials.
Cold Storage: Private cold storage in the vicinity of the port is accessible on application.
Containers: Container handling with ship's gear or mobile cranes.
Cranage: Wide range of cranage, both mobile and portal, with grabbing facilities. Heavy lifts up to 100 tonnes can be arranged.
Grain Handling: Grab facilities. Conveyors are available.
Grain Storage: Temporary shed accommodation.
Minerals Handling: By grab facilities. Pressure discharge of cement and barytes.
Sheds: All riverside berths are equipped with transit sheds not less than 30.5 m. wide, fronted by broad concrete aprons. Total shed area is 37,075 sq.m. Within the harbour area there is extensive storage area and warehouse facilities.
Ro/Ro Berth: At Eastern Wharf. Accepts vessels up to 25 m. beam with stern ramps up to 12.5 m. wide. Linkspan single-lane carriageway. 4 m. wide. Road vehicles up to 42 tonnes. Trailer park adjacent.
Timber Yards: As a major East Scotland port for forest product imports, the port has extensive private yards and open-stacking areas for timber.
STEVEDORES: One ETA to Agent or port suffices for all services.
Full stevedoring facilities are arranged by: Dundee Stevedores and Porters Ltd., Victoria Lockway, The Harbour, Dundee. Tel: 0382 21571.
MEDICAL: Advance notice required for ordinary medication for arrivals week-ends. Hospitals and casualty stations available.
TANKERS: Diameter of hoses – 8 in. Slop discharge facilities not available. 2 tanker berths – 28 ft. draft. Discharge only at West Berth.
DENSITY: 1005 at MLWS. 1002 at MHWS.
FRESH WATER: Available, 24 hour service. Delivery, hose from quays. Rate, 30 t.p.h.
FUEL: Bunkering by direct pipe-line is readily available to vessels up to 300 ft. (92 m.) in length with 18 ft. (5.5 m.) draft or by road tanker to any vessel. Large quantities of any fuel type by coastal tanker, subject to 3 or 4 days' notice.
FIRE PRECAUTIONS: Regulations are handed to Master on arrival.
GANGWAY/DECK WATCHMEN: Recommended for large vessels.
OPENING/CLOSING HATCHES: Stevedores will give weather cover only.
CERTIFICATES: As required by Department of Transport (Lifesaving, Radio, Registry, Drugs, Crew Agreement, Load Line) also Derat.
CUSTOMS ALLOWANCES: Foreign-going: 25 cigarettes or 1 oz tobacco per day. 8 days allowance granted. Home trade: same as for foreign-going but only 4 days allowance granted. Spirits: quarter pint per day for 4 days, further issue granted after 4 days for foreign-going only.
CONSULS:

Denmark	23044	Netherlands	23111
Finland	23111	Norway	23044
France	21252	Sweden	21061
Italy	65222		

REPAIRS: Dundee can offer fitting-out wharves and heavy lift capacity. Various local firms undertake engine and electrical repairs to vessels. Construction, repair and maintenance services for the offshore oil industry are now well developed.
DRY DOCK: Dry dock available for vessels of up to 500 ft. length, 46 ft. beam, draft 13 ft. 6 in. Springs.
SURVEYORS: Lloyd's and DTI.
REPATRIATIONS: Facilities exist.
AIRPORT: Dundee Airport: Only U.K. flights available.
TIME: British Standard Time (GMT plus 1 hour). GMT in Winter months.

BERTHING: Deep-drafted vessels must arrive at the Fairway Buoy at least 2 hours before HW to berth on same tide.

HOLIDAYS: 1st, 2nd and 3rd January; 2nd Monday April; 1st Monday in May; Last Monday July; 1st Monday October; Christmas Day and 26th December.
POLICE/AMBULANCE/FIRE: Tel: 999.
TELEPHONES: Quay telephones installed.
SHORE LEAVE: At the discretion of the Master.
IDENTIFICATION CARDS: Not required.
GENERAL:
Electric Power: Electric power to vessels available at repair berths.
Fire Fighting: Tayside Fire Brigade Services. One of the Port Authority's tugs is fitted with monitor.
Mooring: The Authority provide boatmen's services for the mooring and unmooring of ships, if required.
Motor Vehicle Compounds: An area of 1 acre which can be extended.
Navigation Lights: The main estuarial approach light is the Abertay Lightfloat supported by port and starboard buoys marking the main channel as detailed in Admiralty Chart 1481.
Passenger Cruise Liners: Dundee is a port of call for passenger cruise liners at riverside berths. The city has quick access to some of Scotland's finest scenery and places of historic interest.
Policing: Effective security is provided by Tayside Police.
Ships Stores: Ship supplies are offered by a number of private firms with premises adjacent to the harbour. These include the special requirements of the offshore oil industry.
Steelyards: The port has 2 road transport weighbridges and portable weighbridges in sheds for sampling, etc.
Tidal Reference: Tide heights are related to Lowest Astronomical Tide (Admiralty Chart Datum).
Range of tides at HWN – 4 m. (12 ft.).
Range of tides at HWS – 5.2 m. (17 ft.).
REGULATIONS: Absolutely no smoking, penalty £50.
AUTHORITY: Dundee Port Authority, Harbour Chambers, Dock Street, Dundee DD1 3HW, United Kingdom. *Tel:* (0382) 24121. *Telex:* 76644 DPA G. *Cables:* Dockyard, Dundee. *Contact:* William Gold, Chief Executive. Captain John J. Watson, Harbour Master.

DUNDRUM: 54.16 N. 05.51 W.

PILOTAGE: No official Pilots, but local Pilots available.
BERTHING: Tidal harbour. Depths from 3.3 m. (Neap tides) to 5.1 m. (Spring tides). Tides much affected by N.E. winds. No commercial activities take place in the port.
CRANES: One 2 tonne grab.
AUTHORITY: East Downshire Ltd., 3 The Quay, Dundrum, Co. Down, BT33 0LT, Northern Ireland. *Tel:* Dundrum 203. *Contact:* B. Heenan, Harbour Master or I. W. Graham, General Manager.

DUNOON: 55.56 N. 04.56 W. (See Plan Book)

Priority is given to the ferry services using this pier, although other shipping may use the facility.

The wharf has two access arms to shore and an adjustable Ro/Ro link span for side loading vessels. The main berth is 150 m. long with a depth of 4.3 m. below Chart Datum. Fresh water is available. VHF Channels 16, 12 and 31 are available, call sign "Dunoon Pier".
AUTHORITY: Strathclyde Regional Council (SRC), Department of Roads, Strathclyde House, 20 India Street, Glasgow G2 4PF. *Tel:* 041-227-2475. *Contact:* W. S. McAlonan, Director. Piermaster, *Tel:* 0369 2652.

AGENT: See "Clyde Port", Greenock Office attends.

FALMOUTH: 50.09 N. 05.04 W. (See Plan Book)

DOCUMENTS:
2 Crew's Effects Lists (C142).
1 Ship's Report by Master, or Authority (C74).
1 Home Office Form IMO FAL Form 5.
2 Stores Lists.
1 Certificate of Deck Cargo Tonnage.
1 Light Certificate.
1 Port Dues Certificate
Ship's Certificate of Register.
Mercantile Marine Office Certificate – for British ships only.
Load-line Certificate.
Safety Equipment and Construction Certificates, Radio Certificate.
Lloyd's Certificate.
Derat Certificate.
Agents to complete Health Arrival Report.
PILOTAGE: This is a compulsory pilotage district. The Pilot will board from a cutter 3 miles South of St. Anthony's Lighthouse. In poor visibility a ship requiring a Pilot uses the distinguishing signal of "G" to which Pilot Cutter will reply with "H". Pilots maintain VHF watch on Channel 16 throughout 24 hours – Call sign "Falmouth Pilot Radio"; preferred working frequency Channel 9.
ANCHORAGES: Vessels in excess of 665 ft. usually anchor in Falmouth Bay. Other vessels in outer harbour. Mooring Buoys available.
MAX. SIZE: See "Tankers".
HEALTH: See "Health – All ports" before first U.K. port.
VHF: Falmouth Harbour Radio (office hours) Channels 16, 14, 13 and 12.
TUGS: Available. On call during working hours and outside of hours when required if advance notice given. Tug's lines are to be used.

BERTHING: There is a large and 3 smaller dry docks and in addition, B.P. maintain a bulk storage plant. 13 deep-water berths. Combined frontage 8,000 ft. Vessels of 920 ft. have been accommodated. Draft LWOST 18 ft. – 27 ft. depending on berth.

Cross Roads Buoy and St. Just Moorings: Max. size of vessel normally permissable on the Cross Roads Buoy, except by special arrangement with the Harbour Master: Length overall: 183 m. (600.5 ft.) Draft: No limit. Anchor cable size: 77 mm. SQ (U2) steel.

Max. size of vessel on fore and aft St. Just Mooring normally permissable except by special arrangement with the Harbour Master: Length overall: 205 m. (672.5 ft.) Draft: No limit. Anchor cable size: 82 mm. SQ (U2) steel.

Caldy and Frigate Buoys: Max. size of vessel normally permissable on either of these buoys except by special arrangement with the Harbour Master: Length overall: 61 m. (200 ft.) Draft: 3.5 m. (11.5 ft.). Anchor cable size: 28 mm. SQ (U2) steel.

Offshore Exploration: Falmouth Docks and Engineering Co. operates an offshore supply base with all services and on an exclusive basis.

STEVEDORES: Employed through The Falmouth Docks and Engineering Co.

TANKERS: Tankers berth at Eastern Breakwater provided draft not more than 27 ft. berthing at H.W. Max. length 550 ft. There is a tank-cleaning installation available. Tankers of 840 ft. with draft 17 ft. forward and 23 ft. aft have been accommodated at Eastern wharf.

Coastal Tankers berth at Boyers Cellars, max. draft 16 ft.

FUEL AND FRESH WATER: Gas oil is available and water is piped on the Dock Company wharves. At the repair berths, or in Carrick Roads or Falmouth Bay. Bunkers and water must be delivered by barge. Water by tug in Carrick Roads or Falmouth Bay.

CONSULS: Belgium, Denmark, France, Germany F.R., Greece, Netherlands, Norway, Sweden and Spain.

GANGWAY/DECK WATCHMEN: Available in shipyard on request.

OPENING/CLOSING HATCHES: Normally carried out by crew.

AIRPORTS: London (Heathrow and Gatwick) 5.5 hours via Reading, or Bristol, St. Mawgan, 28 miles.

MEDICAL: Doctors and hospital facilities available. Agents should be advised in advance of any medical attention required.

CUSTOMS ALLOWANCES: Usual U.K. allowances.

REPAIRS: All ship repairs can be carried out by local repair yards.

DRY DOCKS: Falmouth Shiprepair Ltd. (Tel: (0326) 3114006).

Total wharf space: 2,438 m. Minimum depths alongside 6.10 m. to 8.53 m. LWOST. 24 hour access.

Cranage up to 60 tons.

Services: Electricity, water, steam and air.

Gas-freeing and tank cleaning facilities.

Bunkering.

Dry Docks	*Length* m.	*Breadth* m.	*Depth on sill at HWOST* m.
No. 1	169	22.9	7.9
Queen Elizabeth Dock	259	29.6	11.0
No. 3	229	26.8	8.5
No. 4	198	26.2	8.2

Drydocks can accommodate vessels up to 100,000 d.w.t.

Repairs can be carried out at 13 deep-water berths and in deep-water harbour.

Engineering, fabrication and electrical services; grit blasting and high pressure water-washing. Sea-going maintenance teams.

Personnel experienced in handling all types of cargo, including explosives. Rail links to berths. Open storage, warehousing and office accommodation. Diving services. Management and secretarial services. Helicopter Pad. Security – 24 hour patrol.

4 tugs from 9.5 tons to 19.5 tons maximum bollard pull.

REPATRIATION: Facilities available.

TIME: British Standard Time is GMT. British Summer Time – GMT plus 1 hour (Summer).

HOLIDAYS: 1st January; Good Friday (variable date); Easter Monday (variable date); Spring Bank Holiday (variable date); August Bank Holiday (variable date); Christmas Day (25th December); Boxing Day (26th December).

FELIXSTOWE: 51.57 N. 01.21 E. (See Plan Book)

DOCUMENTS:

Stores List.

Crew List.

Health Declaration.

Manifests.

Bills of Lading.

Ship's papers, including Register, Load-line Certificate, Safety Equipment Certificate, Radio Certificate, U.K. Light Dues, if any.

PILOTAGE: Pilots are normally shipped and landed from a pilot cutter in the vicinity of the Sunk Light Vessel. Vessels from or bound North using the Shipway Channel and whose normal course does not pass the Sunk, may use the Cork Pilot Station in the vicinity of the Cork Light Float which is run by launches. The cost of pilotage and boat service is the same for both stations.

Inwards: To obtain a Pilot an ETA must be sent at least 8 hours in advance and confirmed at least 2 hours in advance either to Harwich Pilots or the Sunk Pilot. Failure to do so will incur a surcharge and may result in delay.

Information Required: Ship's name, ETA, destination, max. draft, gross tonnage, and whether arriving at Sunk or Cork.

Communications: 8 hours ETA preferably through a coast radio station. 2 hours ETA by VHF.

Harwich Pilots: Telex: 98472, Tel: Harwich (02555) 3129 or 6300, VHF on Channel 16 or 9.

Sunk Pilot: Either through Harwich Pilots as above or MF Call 2182 working 2241 or other ship to ship frequency. VHF Channel 16.

Outwards: Pilot should be ordered through Harwich Pilots as above at least 2 hours in advance, except when sailing between midnight and 0800 hrs. when the order should be given by 2000 hrs. Order should specify landing at Sunk or Cork.

Sunk Pilot Station: The Sunk Pilot Cutter has a black hull, a buff funnel, the word "Pilots" painted on her sides and flies the Pilot flag. At night she exhibits the lights and signals in accordance with the International Rules for the Prevention of Collision at Sea, and cruises in the vicinity of the Sunk Light Vessel to provide Pilots for ships bound, making for Felixstowe, Harwich, Ipswich and Mistley as well as the ports on the rivers Colne, Blackwater, Crouch and other ports within the London Pilotage District and to disembark Pilots from outward bound ships. If through stress of weather she is unable to carry out her duties there she moves to smoother waters, usually in the vicinity of either the West Sunk or Gunfleet Spit buoys. In these circumstances shipping is warned by means of radio navigation warnings broadcast from North Foreland, Humber and Scheveningen Radios which give her position.

The attention of Masters is drawn to the requirement of stopping and giving a satisfactory lee for the Cutter's boarding boats. These 18 ft. boats have a maximum speed of 5 knots.

Contact procedures: Vessels wishing to contact the pilot vessel at the Sunk by radio telephony direct may:

(i) When within M/F range (approx. 50 miles) call the Cutter on 2182 kHz. The working frequency is 2241 kHz.

(ii) When within VHF range (approx. 25 miles) call the Cutter on Channel 16. The working frequency is Channel 6.

The Sunk Pilot Cutter may also be contacted by either W/T or R/T through any Post Office Coast Station addressed "Sunk Pilot" via North Foreland Radio. Alternatively messages to the Harwich Pilot Station, Tel: Harwich (02555) 3129 or 6300, or telex, Harwich Pilots 98472, will be passed direct to the Sunk Cutter.

Vessels bound for Felixstowe or Harwich may embark their Pilot at the previous port or at Brixham Pilot Station. Vessels requesting this facility should contact Harwich Pilots, Tel: Harwich (02555) 3129 or 6300, telex Pilots Harwich 98472, giving as much notice as possible, stating name and draft of vessel, port and terminal of embarkation, ETD, and whether or not deep sea pilotage is required.

Also see "Radar/VHF".

ANCHORAGES: At Cork Light Vessel; Quarantine anchorage off Harwich Road; "Northshelve" off Harwich; and in River Stour.

APPROACHES: Traffic Regulatory Systems in effect.

RESTRICTIONS: Dredging of approach channel to all quays is currently being considered. Deepest water alongside is 11.89 m. LWOST. At least 3 ft. keel clearance required at all times between channel bed and keel of vessel.

MAX. SIZE: General cargo vessels: Dock Basin 145 ft. wide entrance. Depth 7.1 m. LWOST. No lock gates. Suitable vessels able to leave on any state of tide.

North Quay: 195 m. in length.
South Quay: 186 m. in length.
East Quay: 131 m. in length.

Container Vessels: Landguard Container Terminal depth 11.9 m. below Chart Datum. At Dooley Container Terminal depth 11.5 m. LWOST. Walton Container Terminal depth 11.89 m. LWOST.

Ro/Ro vessels Ferry Terminal: Ro/Ro Bridge No. 1: Vessels up to 137.2 m. overall, depth 23.3 ft. LWOST. Ro/Ro Bridge No. 2: Vessels up to 152.4 m. length, depth 25.3 ft. LWOST. Ro/Ro Bridge No. 3: Vessels up to 137.2 m. length, depth 7.71 m. LWOST. Ro/Ro Bridge No. 4: Depth 10.15 m. LWOST. Vessels up to 213 m. overall.

Tanker Jetty: Vessels 180 m. overall, depth 9.1 m. LWOST.

HEALTH: Pratique flag in daylight and lighted signals in darkness to be displayed by vessel on arrival. Health Declaration to be given in writing or verbally by Master on arrival. If disease suspected, then report to pilot station who will advise Health Authorities.

Also see "Health – All ports" before first U.K. port.

RADIO/RADAR/VHF: See overleaf.

TUGS: 4 tugs (40 tons to 18 tons bollard pull) plus 1 reserve stationed at Felixstowe, join vessels in Harwich approaches or where ordered by Pilots. Vessels to use tug lines at additional cost. Tugs on VHF Channel 14 and 16 (24 hours) Channels 6, 8, 9 or 12 working. Also 2,182 kHz.

BERTHING: Regulated by Harbour Master through Pilot stations and tugs. Vessels able berth within restrictions of individual berths.

CONTAINER TERMINALS:

	Depth of Water at LWOST	*Length of Quay in metres (feet)*	*Quayside cranes*	*Park Gantry cranes*	*Forklift trucks*	*Towing units*	*Port trailers*	*Remarks*
Landguard Container Terminal	11.9 m. (dredged annually)	469.4 (1,540) 3 container berths	2×40 ton and 2×30 ton capacity Paceco Vickers Portainers	6 Paceco Transtainer cranes with a 35 ton capacity. (Rubber tyred with automatic lifting frame for containers.)	84 forklifts with a capacity of up to 40 tons, including 14 Short Mast Trucks, 50 paper clamp attachments. 14 pallet trucks, with a capacity of up to 2 tons.	91 elevating fifth wheel tug units. 29 tractor units two fifth wheel dolleys.	273 fifth wheel trailers with a capacity of up to 50 tons.	This equipment also in the Dock Basin and Northern Roll-on/Roll-off Terminals.
Dooley Container Terminal	11.5 m. (dredged annually)	244 m. (800 ft.) container quay	3 Conrad Stork container cranes with 40 ton capacity	5 Paceco Transtainer cranes with a 35 ton capacity. (Rubber tyred with automatic lifting frame for containers).				
Walton Container Terminal	11.89 m. (dredged annually)	305 m. (1,000 ft.) container quay	2 I.H.I. container cranes with 40 ton capacity	7 Paceco Transtainer cranes with a 35 ton capacity. (Rubber tyred with automatic lifting frame for containers).		16 elevating fifth wheel tug units.	24 fifth wheel trailers with a capacity of up to 50 tons.	

Rail Facilities: All berths are served by rail including 2 Freightliner Terminals, 1 of which serves the Landguard Container Terminal, the second the Walton and Dooley Container Terminals.

CARGO HANDLING FACILITIES: *General Cargo Division:* Mobile pneumatic grain discharger, discharge rate 30 t.p.h. into silo with capacity of 3,500 tons.

Mobile cranes, capacity 27.5 tons. Scotch derrick crane, capacity 32 tons at 90 ft. radius.

Roll-on/Roll-off Division: No. 1 Berth: Townsend Thoresen Ferry Terminal. Upper and Lower deck loading ramps. Electric travelling crane, capacity 32 tons at 110 ft., depth 23.3 ft.

No. 2 Berth: Townsend Thoresen Ferry Terminal: One hydraulic loading ramp designed to carry loads up to 140 tons. Upper loading ramp designed to carry loads up to 32 tons. Least depth 25.3 ft. LWOST.

No. 3 Berth: Hydraulic loading ramp designed to carry two lanes of traffic with loads up to 140 tons. Electric travelling crane with capacity of 35 tons at 95 ft. radius, least depth 25.3 ft.

No. 4 Berth: Allows a combination of Roll-on/Roll-off and container vessels to be accommodated. The hydraulic loading ramp is designed to carry two lanes of traffic with loads of up to 140 tons.

STEVEDORES: 24 hours notice required by Agent to advise stevedores of vessel's ETA, in order to arrange berthing and allocation of labour. All stevedoring arranged between Dock Company and vessel's Agent.

RADIO: Northforeland, Humber, Niton (or any other radio station convenient to vessel's position).

RADAR/VHF: To facilitate the arrival and departure of vessels trading to and from the Port of Felixstowe, a pilot station operates in the vicinity of the Cork Lanby in position Lat. 51° 56′ 42″ N., Long. 01° 27′ 06″ E. This station is additional to, but is not a substitute for, the Sunk Pilot Vessel. It is only for the use of vessels bound to or leaving the port, whose normal course does not take them past this vessel. Full service is provided at the Sunk Station.

Inward bound ships: Vessels requiring a Pilot at the Cork Station should apply to the Sunk Pilot Station, or Harwich Pilot Station (Telex: 98472) giving 24 hours' advance notice, and an 8-hour estimated time of arrival (ETA) at the Cork should be given through a G.P.O. Coast Station as should the gross tonnage, maximum draft and port of destination. Any adjustment to this time should be given at least two hours before arrival. Messages should be addressed to "Sunk Pilot Vessel Northforelandradio". As soon as *within MF range* (approximately 50 miles), they should call the Sunk Pilot Vessel on 2182 kHz. When contact has been established, the pilot vessel will transmit and listen on 2241 kHz or any other agreed licensed intership frequency for passing messages. The pilot vessel should be contacted again as soon as *within VHF range* (approximately 20 miles), calling on 156.8 MHz (VHF Channel 16) and then transferring to 156.3 MHz (VHF Channel 6) for further messages. It should be remembered that attempts to establish contact by radio at extreme ranges cause much interference.

Outward bound ships: Masters of vessels about to sail from Felixstowe proceeding Northbound, via Shipway, should order their Pilot to the Cork Pilot Station and vessels Southbound should order their Pilot to the Sunk Pilot Station. These requirements to be made known when order is given to the Harwich Pilot Station. Pilots for ships outward bound should be ordered by telephoning Harwich (code 02555) 3129, giving at least two hours notice.

Service is provided by 40 ft. fast pilot launches with black hulls, white wheelhouses and flying the pilot flag. The launches keep a constant listening watch on Channel 16 VHF (change to Channel 6 for working). It is recommended that the vessel about to ship or land her Pilot should keep in VHF communication with the launch. There is a shore VHF station with a duty Pilot; allocated frequencies are 156.8 MHz (Channel 16) for calling and 156.45 MHz (Channel 9) for working.

Harbour Operations Service and Port Signals: An operations service, jointly operated by the Harwich Harbour Conservancy Board and the Trinity House Pilotage Service, is provided from the Harbour Master's Office, Harbour House, Harwich.

This service is provided by Harbour Board officers and Trinity House Duty Pilots, co-operating mutually, on a continuous 24 hours a day basis to provide vessels using the port with information and advice. The following communication facilities are available:

1. VHF radio telephone; Channel 16, calling and safety; Channel 71, prime harbour working frequency; Channel 20, Harbour Board radar information frequency; Channel 11, harbour service frequency; Channel 9, pilotage service frequency; Channel 38, Trinity House frequency.

2. Land line communications: (i) Telephones; harbour operations: Harwich 6535/6; pilotage service: Harwich 3129 and 6300; (ii) Telex: Trinity House Pilotage service and Harwich harbour joint operations service; 98472.

3. Other equipment: the centre is provided with a standard harbour surveillance radar 2×16 in. conventional marine displays, and 1×16 in. ARPA Radar; also provided is an electronic tide gauge, wind direction and force instruments. All vessels should provide timely advice of their arrivals and departures to and from the port and report their movements through the harbour and its approaches as directed.

The dock closed signal will be exhibited at the seaward end of the South Pier at the entrance to the Dock Basin when vessels are manoeuvring within or leaving the tidal basin. The red revolving light, one second flashing 19 ft. above HWOST is visible over an arc of about 180° from Landguard Point to the River Orwell entrance.

(For further information see Admiralty Notice to Mariners No. 55 of 1979.)

MEDICAL: Prior notice desirable through Agent to arrange attention. All services available.

TANKERS: 4 in. and 6 in. connections. No slop facilities. No facilities for gas freeing alongside or in harbour.

One tanker berth available. Vessels up to 600 ft. overall, 25,000 d.w.t. Depth of water 30 ft. LWOST.

DENSITY: 1025 salt water.

FRESH WATER: Pipe-line connections to all quays. Delivery approx. 50 t.p.h. Barge service available for supplies to vessels at anchor.

FUEL: Marine diesel and gas oil available, pipe-line and barge delivery. 24 hours notice required.

FIRE PRECAUTIONS: Standard precautions at all berths.

GANGWAY/DECK WATCHMEN: Not compulsory. If required, cost negotiable.

OPENING/CLOSING HATCHES: Work undertaken by crew.

CERTIFICATES:

Valid Derrick and Rigging Certificates.
Ship's Register.
Load-line.
Safety Equipment.
Radio.
Derat.
Construction.
(Light Dues Receipts).

CUSTOMS ALLOWANCES: 100 cigarettes or equivalent in tobacco or cigars per man. 1 bottle spirits.

IDENTIFICATION CARDS: Not necessary if in possession of Seaman's Book or Passport.

CONSULS: Royal Norwegian Vice-Consul Ipswich (9) 59281; Royal Swedish Vice-Consul Felixstowe 278844; Icelandic Vice-Consul Felixstowe 285651/4; Netherlands and Germany F.R. Harwich 6666.

REPAIRS: Facilities exist for small repairs only.

DRY DOCKS: None available.

REPATRIATION: All facilities available.

AIRPORTS: Southend – 70 miles; Heathrow – 90 miles. International flights.

Air UK flights from Norwich to Aberdeen, Amsterdam, Edinburgh, Esbjerg, Humberside, Leeds/Bradford, London (Heathrow), Newcastle and Teesside.

TIME: GMT. In Summer months, April to October, time advanced 1 hour.

HOLIDAYS: All normal Bank Holidays, but official notification of port closures for such holidays is given well in advance of relevant dates.

POLICE/FIRE/AMBULANCE: Emergency points on all quays. Tel. 300 or, outside dock area, 999.

TELEPHONES: Shore connections available by prior arrangement for vessels on regular trades.

SERVICES: Most services available for dry cargo vessels, but no special tank cleaning or tank washing facilities for tankers.

SHORE LEAVE: No restrictions.

GENERAL: ETA to Agent required 72 hours, 48 hours, and 24 hours prior arrival.

DEVELOPMENTS: Dredging of the main approach channel to 11.00 m. (Chart Datum) underway.

Trinity Terminal: Terminal under construction to the North of Walton Container Terminal. On completion in mid-1986, the terminal will have a quay of 1,800 ft. and depth of 13.4 m. (Chart Datum). 4 gantry cranes and all back-up facilities will be available. The first 1,000 ft. of quay will be ready for use in January 1986.

Lloyds Bank, West Street, Fishguard, Dyfed. Tel: Fishguard 872309. No telex.

STORING: See "Prelims" page viii.

1. Vessel can be stored by barge or truck, limited space of approximately 15 ft. width available for trucks.
2. Loading of stores can be carried out from barge with ships equipment.
3. Trucks of limited size can proceed alongside berth.
4. Fork lifts can be used to handle stores.
5. Prior notification to local customs,.
6. Sealink can assist with stores if given prior notification.

AUTHORITY: Sealink UK Ltd., Fishguard Harbour, Dyfed, SA64 0BU, Wales. *Tel:* Fishguard (0348) 872881. *Telex:* 48167. *Contact:* B. Fenemore, Shipping and Port Manager. Captain D. R. C. Lewis, Marine Superintendent.

FLEETWOOD: 53.55 N. 03.00 W. (See Plan Book)

LOCATION: The port of Fleetwood is situated on the Lancashire coast approximately 38 km. (24 miles) North West of Preston and 42 km. (26 miles) South West of Lancaster.
DOCUMENTS:

Manifests.
Bills of Lading.
Ship's papers.
Crew Lists.
Customs Documents.
Health Documents.

PILOTAGE: Pilot to be picked up off No. 1 Fairway Buoy. Ordered through ship's Agent giving 24 hours notice of ETA.
ANCHORAGES: Good anchorage in outer limits of harbour in Lune Deeps in 14 fathoms.
RESTRICTIONS: Vessels under power must not navigate any portion of this harbour above No. 11 Buoy at a greater rate of speed than is necessary to navigate safely, also on passing other vessels, either steam or sail, hopper barges, pontoons in tow, etc., in the channels outside the above mentioned No. 11 Buoy and within harbour limits due care must be taken to pass them at a rate of speed that will not cause risk from displacement or what is commonly called "backwash", and that all vessels must be navigated in this harbour strictly in conformity with Rule 9 (Narrow channels) contained in the Collision Regulations for Preventing Collisions at Sea, 1972.

Vessels bound into Fleetwood must not enter the river without being sure they have sufficient depth of water to ensure their getting to the quays or piers to which they are bound.

In the event of any vessel grounding on the "Tiger's Tail" or in any other part of the Fleetwood Harbour, the Master shall not attempt to refloat the vessel by reversing the engines, or by any other means whatsoever, until all incoming vessels following have passed the stranded vessel and the channel is clear of shipping.

Locks are normally open from 2 hours before HW to 1 hour after HW.
MAX. SIZE: (Within enclosed docks): 107 m. LOA: 14.1 m. beam.

So far as draft is concerned, allowances have to be made for clearing the lock invert. These allowances vary according to the beam of the ship and the following scale may be taken as a guide:

Beam of Vessel (m.)	*Clearance Required* (m.)
11.28	0.69
13.41	1.22
14.02	2.21
14.17 maximum	3.12

HEALTH: See "Health – All ports" before first U.K. port.
RADIO: VHF Port Operations and Information Service. Call sign: Fleetwood Harbour Radio Channel 16 (156.80 MHz): Calling and Safety. Channels 11 and 12: Port Operations.

All movements of vessels arriving for and sailing from the Harbour and Docks are controlled by the Harbour Master using the VHF Port Operations and Information Service located in the Harbour Master's Office on the West side of Fleetwood Harbour. (Lat. 53° 55′ 30″ N., Long 3° 00′ 12″ W.). This service is operated for the 24 hour period, and vessels must maintain a listening watch when approaching or leaving the Port. Messages must be restricted to matters appertaining to general navigation, berthing instructions and the safety of ships or persons within the Port Area. Messages of any other nature will not be accepted.
TUGS: No tug service at Fleetwood. Tugs available from Liverpool if required.
BERTHING: Under normal conditions the lock gates operate for 2 hours before to one hour after HW.

There are 3 quay cranes at the Wyre Dock, and 3 mobile cranes, 2 with 35 tonne capacity and one with 10 tonne capacity. The General Cargo berths can be used for handling liquid chemicals and bulk cargoes. Grain can be shipped direct into silo (rate 200 t.p.h.) at one of these berths. There is a Roll-on/Roll-off berth in the harbour. This is a daily service to Larne and Dublin for wheeled vehicles and trailer loads.

Dock	*Quay Length (Total)* (m.)	*Depth of Water (Absolute Min.)* (m.)	*Max. Size of Vessel* *Length* (m.)	*Beam* (m.)	*Draft* (m.)	*Approx. d.w.t.*
Wyre Dock	823	5.5	107	14.1	5.5	3,500
Fish Dock	800	5.5	107	14.1	5.5	3,500
Harbour/	To suit vessel					
Ro-Ro Berth	150	4.5	152	20.3	4.2	5,000
Isle of Man Berth	91	As required	107	—	4.2	—

Storage and Warehousing Facilities: One covered transit shed totalling 720 sq.m. (8,000 sq.ft.) is located on the Wyre Dock quayside. Ample open storage space is available within the docks estate.

Fish Dock: Modern facilities for fish handling, marketing and processing are available operated by Fish Handling (Fleetwood) Ltd. and a large number of wholesale fish merchants.

Ro-Ro Berths: Separate berths handling Irish Sea and Isle of Man freight and passenger ferry services are located within the port. Ample land is available for development of Ro-Ro business.

Offshore Supply Facilities: The port has been used as a supply base for oil exploration in the Irish Sea and facilities for offshore operations include a helicopter pad.
STEVEDORES: Arranged through ship's Agent.

Port Working Hours: Wyre Dock: Mondays to Thursdays 0800 – 1200, 1300 – 1700 hrs. Fridays 0800 – 1200, 1300 – 1600.

Overtime and weekend working by arrangement. Harbour berths worked to meet requirements of services.
MEDICAL: Ship's Agent will organise medical attention if required.
DENSITY: 1015 at half tide; 1025 at high water.
FRESH WATER: Fresh water available through stand pipes. Charge according to consumption (sliding scale).
FUEL: All grades of fuel available.
FIRE PRECAUTIONS: No specific requirement outside usual "No smoking" precautions.
GANGWAY/DECK WATCHMEN: Ship's watchmen required.
OPENING/CLOSING HATCHES: Normally carried out by crew.
REPAIRS: 2 slipways located in Fish Dock with lifting capacities of 1,050 tons and 150 tons respectively.
REPATRIATION: Arranged through ship's Agent.
AIRPORT: Squires Gate, Blackpool, 10 miles away.
TIME: GMT in Winter. GMT plus 1 hour in Summer months.
HOLIDAYS: Christmas Day and Boxing Day; New Years Day; Good Friday and Easter Monday; Spring Bank Holiday; May 1st; Autumn Bank Holiday.

Cargo working can be arranged on any of these days upon request.
POLICE/AMBULANCE/FIRE: British Transport Police available on Docks Estate. Ambulance 999; Fire 999.
TELEPHONES: Can be arranged through Post Office.
SERVICES: Compass adjusting.
SHORE LEAVE: Crew members are allowed ashore.
AUTHORITY: Associated British Ports – Fleetwood, Dock Office, Fleetwood, Lancs. FY7 6PP. *Tel:* (03917) 2323/6. *Telex:* 677296. *Contact:* D. Dixon, Port Manager.

FOSDYKE BRIDGE: 52.52 N. 00.02 W.

PILOTAGE: Service provided by Boston Pilots. Tel: 0205-62 114. VHF Channels 16, 12.
APPROACHES: Common approach channel shared with Port of Boston.
MAX. SIZE: Spring tides: Max. draft 4.50 m.; Max. LOA 56 m. Neap tides: Max. draft 2.80 m.; Max. LOA 46 m.
VHF: Fosdyke Port Radio operates on Channel 14. A listening watch is maintained during shipping movements on the River Welland.
TUGS: Service operated by wharfingers.
BERTHING: Private wharf 69.50 m. long giving 2 berths alongside, situated on North bank of river, operated by John Parsons Marketing Ltd., Fosdyke Bridge, Boston, Lincs. PE20 2DB. Tel: 0205-85 206. Telex: 37208.
FRESH WATER: Available.
AUTHORITY: No authority exists. For Berthing Master contact Fosdyke (0205-85) 240.
AGENT: Welland Ships' Agents, Fosdyke Bridge, Fosdyke, Boston, Lincs. PE20 2DB. Tel: (0205-85) 240. Telex: 37208. Contact: R. A. Waterfield, Manager. Tel: 0945-583181 (Home).

FOWEY: 50.20 N. 04.39 W. (See Plan Book)

PORT LIMITS: The whole of the Fowey River to a line across the entrance to the harbour. A vessel is considered to have arrived on entering the harbour unless she is anchored just outside by the Pilot to await suitable conditions for entering, in which case she is considered to have arrived on being so anchored.
DOCUMENTS:
Crew and Passenger Lists are essential, using IMO forms.
Aliens List is essential.
List of Bonded Stores, including beer.
List of Personal Dutiable Articles owned by Crew.
Bill of Health, if available.
Derat Certificate.
Manifest of all cargo on board.
Copies of Bills of Lading.
Stowage plan, if available.
Normal Ship's Papers.
PILOTAGE: Vessel requiring Pilot gives ETA as far in advance as possible to Agent. Vessel displays normal signals off port. VHF calling Channel 16, working Channel 9. Pilot cutter (LOA 55 ft.) has a dark blue hull and orange upperworks. The Pilot boards off entrance. Vessels can anchor South of entrance if necessary.
Pilots VHF station open for messages from arriving ships up to 2 hours before time of ETA received by Agent.
RESTRICTIONS: Vessels can enter at any time, if their draft is less than 18 ft. Otherwise according to tide. Depth of ship channel at LWOST – 20 ft.
MAX. SIZE: LOA 450 ft., beam 60 ft. Loaded draft of 28 ft. Vessels of this draft have to be handled at or near high water.
Vessels up to 486 ft. in length have been handled, but subject to prior consultation with the Harbour Master and owners of the loading berths.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Land's End Radio, Niton, or Portishead.
VHF: For arriving vessels see under "Pilotage".
Fowey Harbour Commissioners "Fowey Harbour Radio" calling Channel 16, working Channel 10, ECC Ports Ltd., loading berths operators, "Fowey Port Radio", calling Channel 16, working Channel 12.
TUGS: Two diesel tugs are available and normally join vessels on entering entrance. Ship's lines usually used. No tug required for vessels under 300 ft. in length under normal conditions. Only 1 tug required for vessels under 350 ft. length.
BERTHING: Vessels waiting for berths are normally moored, using their own anchor with their stern to a buoy. On the berth, vessels require long ropes.

Berth	*Max. LOA (approx.)* (m.)	*Depth of Water at LWOST* (m.)
Jetty No. 3	110	7.0
Jetty No. 4	120	7.3
Jetty No. 5/6	170	6.7
Jetty No. 8	140	8.5

CARGO FACILITIES: The port is specially equipped to handle china clay and ball clay in bulk and to a limited extent in bags. No other commodity passes through the port either inwards or outwards. There are 5 berths. Berth No. 4 has a bulk conveyor capable of handling up to 330 t.p.h., Berth No. 6 up to 500 t.p.h. and Berth No. 8 up to 1,000 t.p.h. Berth No. 3 for liquid slurry coal only. A 3 tonne mobile crane is available.
STEVEDORES: Earliest ETA possible is required, especially when a vessel arrives over week-end.
MEDICAL: If Medical Officer is required on arrival, advise Agent earliest opportunity. Hospital facilities are available.
DENSITY: River fully salt at all states of the tide.
FRESH WATER: Available at all jetties, delivered by hose and rate very variable.
FUEL: Gas/Oil only available. As much notice as possible is advisable.
GANGWAY/DECK WATCHMEN: Not normally employed.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCES: 200 cigarettes *or* 100 cigarillos *or* 50 cigars *or* 250 grams tobacco. Drink over 22% alcohol 0.5 litre *or* under 22% alcohol 1 litre *or* 1 litre fortified sparkling wine. 2 litres still wine. 50 grams perfume. 0.25 litre toilet water. Half this allowance for vessels arriving from home trade ports which for this purpose is from Elbe/Brest range of ports.
IDENTIFICATION CARDS: Not needed.
CONSULS:

Finland	J. A. Samuel, Albert Quay, Fowey.	Tel. 072683 – 3274
France	J. A. Samuel, Albert Quay, Fowey.	Tel. 072683 – 3274
Denmark	Ross Carter, Albert Quay, Fowey.	Tel. 072683 – 3274
Netherland	Ross Carter, Albert Quay, Fowey.	Tel. 072683 – 3274

REPAIRS: Not possible. Minor repairs only.
SURVEYORS: West Marine Surveyors & Consultants Ltd., Consulting Marine Surveyors, Engineers & Naval Architects, The Old Custom House, Brixham, South Devon. Tel: Brixham (080 45) 2604. After normal office hours: Tel: 0803 842925. Cables: Surveyor, Brixham. Telex: 42962 Survey G.
REPATRIATION: Facilities exist.
HOLIDAYS: Saturdays, Sundays, and all Public Holidays.
POLICE/AMBULANCE/FIRE: Telephone 999.
TELEPHONES: No arrangements made for connection on board.
SERVICES: Compass adjusting can be arranged.
SHORE LEAVE: Allowed.
DELAYS: There is a possibility of delay in heavy rain.
AUTHORITY: Fowey Harbour Commissioners, Albert Quay, Fowey, Cornwall PL23 1AJ. *Tel:* (072683) 2471. *Contact:* Captain J. G. Wilson, Harbour Master.
AGENT: South Coast UK Ltd., Albert Quay, Fowey, Cornwall PL23 1AL. Tel: Fowey (072683) 3274 or 3414. Telex: 45331 (AB Foyagt G). Cables: "Scuk Fowey". After Hours: Tel: Fowey 3428, 2370, 3629, 2525, 2346 or Par (072681) 2881. Ship's Agents and Shipbrokers.

GARSTON: 53.21 N. 02.54 W. (See Plan Book)

LOCATION: On the North bank of the River Mersey, 6 miles from Liverpool city centre.
DOCUMENTS, HEALTH: and all general information, refer to "Liverpool".
RESTRICTIONS: Locking into/out of Garston commences 3 hours before HW and ceases 3 hours after for vessels of 250 ft. in length or under. Vessels over this length must enter when the river and dock are level – about 1 hour before HW to half an hour after.
MAX. SIZE: Length 500 ft., beam 63 ft., draft 27 ft.
RADIO: As Liverpool.
VHF: Stalbridge Pierhead is linked to the Mersey Docks & Harbour Co. Port Operation Radio/Telephone system. Docking and berthing instructions may be obtained through Channel 20 (call sign "Garston Docks"). Information will also be conveyed through these Channels or through Anglesey Radio on MF R/T.
BERTHING:

Dock	*Quay Length (Total)* (m.)	*Depth of Water (Absolute Minimum)* (m.)	*Maximum Size of Vessel* *Length* (m.)	*Beam* (m.)	*Approx Draft* (m.)	*d.w.t.*
Stalbridge Dock	975	6.37	152	19.2	8.3	10,000
Old & North Docks	1405	5.6	Old 152	19.2	5.5	5,000
			North 122	16.2	5.5	5,000

Storage and Warehousing: Garston provides a covered transit shed 32,614 sq.ft. (3,031 sq.m.) in area, located on the North Dock and a warehouse 5,005 sq.ft. (465 sq.m.) at Stalbridge Dock.
Forklift Trucks: 2×12,000 lbs., 1×10,000 lbs., 3×4,000 lbs.
Dock Facilities:
Stalbridge Dock:

	No.	*Capacity*
Cranes	1 (Scotch Derrick)	32 tonnes
	2	10 tonnes
	2	7.5 tonnes
	5	6 tonnes

Two belt loading coal shipping appliances loading capacity 500 tonnes per hour.
High capacity fork and clamp lift trucks available.
Old & North Docks:

	No.	*Capacity*
Cranes	2	7.5 tonnes
	5	6 tonnes

32 tonne Scotch derrick.
CONTAINER FACILITIES: North Dock Container Berth in operation equipped with 3×35 tonne transporter cranes and back-up facilities.
Stalbridge Dock in operation equipped with 1×32 tonne transporter crane and back-up facilities.
STEVEDORES: *Port Working Hours:* Monday-Friday 0800 – 1700 hrs (overtime by arrangement). Saturday & Sunday 0800 – 1700 hrs. by arrangement.
DENSITY: 1025.
FRESH WATER: Available Monday to Friday 0800 to 1600 hrs. All watering required outside of these hours is by arrangement and must be paid for at overtime rates. Rate of delivery, 10 t.p.h.
OPENING/CLOSING HATCHES: Hatches to be opened and closed by the crew except on request.
AIRPORT: Liverpool Airport, 1 mile distant.
HOLIDAYS: Normal English Bank Holidays. Vessels can be worked on these days but this involves additional payment.
POLICE/FIRE/AMBULANCE: Dial 999 and ask for service required.
TELEPHONES: No connection can be made to vessels. Shore base facilities.
DEVELOPMENTS: Improvement to container back-up facilities and widening of the entrance passageway at North Dock has been undertaken.
AUTHORITY: Associated British Ports – Garston, Port Office, Dock Road, Garston, Liverpool L19 2JW. *Tel:* 051-427 5971. *Telex:* 628706
Contact: A. Winfield, Port Manager.

GIRVAN: 55.15 N. 04.51 W. (See Plan Book)

DOCUMENTS: Normal U.K. documentation. H.M. Customs attendance obtained by contacting Harbour Master.
PILOTAGE: By local fishermen only – contact Harbour Master.
ANCHORAGES: To seaward clear of channel approaches. This area is hazardous in gales, particularly from the N.W.
RESTRICTIONS: Draft currently very restricted at MLWS due to siltation. Harbour Master will advise on water depths available.
MAX. SIZE: LOA 50 m., beam 9 m., draft 3.5 m. Vessels with max. draft will only be moved at or near HW.
HEALTH: Under H.M. Customs control.
RADIO: ETA messages etc. via Portpatrick Radio Station, Call on 2182 kHz – VHF Channel 16 (British ships may call on 2381 kHz but listen on 1792 kHz).
VHF: Harbour VHF ship to shore available 0900 – 1700 hrs. daily, Monday to Friday inclusive. Calling: Channel 16; Working: Channel 12.
TUGS: None.
BERTHING: South Pier Quay: 107 m. long, depth 2.2 m. MLWS.

Ailsa Berth:	49 m. long,	depth 2.2 m. MLWS.
Fish Wharf:	42 m. long,	depth 2.1 m. MLWS.
Fish Quay:	62 m. long,	depth 2.2 m. MLWS.

Note: Fish Wharf and Fish Quay used only for fishing vessels.
CRANES: No port cranes available. Mobile cranes can be hired from local companies.
MEDICAL: Small local hospital, contact Harbour Master for assistance.
DENSITY: Water brackish, being sea water with fresh water river discharge.
FRESH WATER: Available.
FUEL: Diesel fuel only.
FIRE PRECAUTIONS: Normal safety procedures.
CONSULS: None, nearest at Glasgow.
REPAIRS: Small engine and deck gear repairs may be carried out alongside.
DRY DOCKS: None. 2 slipways, max. length of vessel which can be slipped, 21 m. – 33 m. overall.
SURVEYORS: Not available.
GANGWAY/DECK WATCHMEN: None. If desired would have to come from ship's crew.
HATCHES: Worked by crews.
CUSTOMS ALLOWANCES: Apply to H.M. Customs Officers.
CARGO GEAR: Hire-in mobile cranes or ship's own gear.
REPATRIATION: No arrangements.
AIRPORT: Prestwick, distance 38.4 km. North Atlantic services only. Glasgow, distance 91 km. Internal U.K./Europe/Scandinavian services.
TIME: Winter – GMT. Summer – March to October, British Summer Time i.e. 1 hour ahead of GMT (dates as announced).
HOLIDAYS: Cargo working unlikely on Christmas Day and New Year's Day.
POLICE/FIRE/AMBULANCE: In emergency dial 999 otherwise telephone numbers are: Police: Girvan (0465) 3587. Fire: Ayr (0292) 267471. Ambulance: Girvan (0465) 2571.
EMERGENCY CO-ORDINATION CENTRE: Marine Rescue Co-ordination Centre, (H.M. Coastguard), Greenock. Tel: Greenock (0475) 29014 or 29988. Telex: 777006.
TELEPHONES: No ship links.
SERVICES: No special services available locally. Compass adjuster available from Glasgow.
SHORE LEAVE: Unrestricted after Customs clearance.
IDENTIFICATION CARDS: Clear requirements with Customs.
REGULATIONS: No unusual regulations.
DELAYS: Normal breakdown/weather delays.
BANKS: Local banks only.
STORING: See "Prelims", page viii.
3. Yes.
4. Yes.
There is no accommodation for storage.
SHIP SUPPLY SERVICE: The units used for supply are small motor vessels approximately 10 m. long. They are licensed to carry up to 12 passengers under the D.O.T. regulations. they are limited to operating up to 3 miles off-shore, with an extension for operating supply services to Ailsa Crag.
The operators are:
1. Alexander Ingram, 5 Shalloch Square, Girvan. Tel: Girvan 2320.
2. John McCrindle, 7 Harbour Street, Girvan. Tel: Girvan 3219.

GENERAL: The harbour is formed at the mouth of the river known as "Water of Girvan". The water in the channel and basin is, therefore, a mixture of sea and fresh water.

A breakwater protects the inner part of the channel on the North side. A timber and steel sheet pile jetty protects the basin from river scour. Access is hazardous in N.W. gales.

In 1979 the harbour channel was deepened to give a minimum depth of water of 3 m. at MLWS. Siltation is a continuing problem and the depth available has been reduced as noted in previous sections.

The harbour is primarily a fishing port. However, it is used regularly by small tankers and cargo vessels of the coasting type, bringing in raw materials for local industry. As may be noted, berthing accommodation is very restricted.

AUTHORITY: Strathclyde Regional Council, Department of Roads, Ayr Division, Wellington Square, Ayr KA7 1DR. *Tel:* Ayr (0292) 266922. *Telex:* 777688. *Contact:* Mr. George Forbes, Harbour Master, Girvan. *Tel:* Girvan (0465) 3648.
AGENT: See "Ayr".

GOOLE: 53.42 N. 00.50 W. (See Plan Book)

PORT LIMITS: Goole is a river port with conservancy jurisdiction to the junction of rivers Humber, Ouse, Trent. However, laytime commences from commencement of next normal working shift after ship is on berth and ship's Agent has issued "Notice of Readiness". This may be 0800 hrs. or 1300 hrs. dependent on time of issue of notice.

Precedence of order of arrival of vessels is determined by arrival time at Ocean Lock Entrance, Goole Docks.

DOCUMENTS:
Bills of Lading/Manifests (prepared by Agents at port of origination).
"Imperfect" Customs Entry.
Request (to work vessel).
*Request for Immigration Officer to be in attendance – if carrying passengers.
*Crew List to Immigration Officer (for foreign personnel).
Ship's Register.
Ship's Agent will normally notify Immigration Officer.

PILOTAGE: Compulsory from Spurn to Goole, two stages.
1st stage: Spurn Light Vessel to Hull Roads.
See "Grimsby" Pilotage.
2nd stage: Hull Roads to Goole. Pilot will board vessel in Hull Roads.

ANCHORAGES: Bull Anchorage on chart of Humber Estuary, or in Hull Roads, otherwise only on advice of Pilot.
RESTRICTIONS: State of tide, Springs or Neaps. Port entered during tidal hours, 3 hours 15 minutes before HW to 30 minutes after HW, according to draft. Pilots will advise.
Locks: 3 entrance locks, largest being 110 m. long and 25 m. wide. Depth on sill 8.0 m. (MHWS) and 6.0 m. (MHWN).
MAX. SIZE: Subject to suitable tides, vessels of approximately 100 m. overall length, 5.5 m. draft, 24 m. beam and 3,000 d.w.t. can be accepted. It should be noted that vessels with a beam in excess of 13.4 m. will find certain berths in the port inaccessible due to bridgeway restrictions.
HEALTH: Pratique issued by H.M. Customs Waterguard (in absence of Port Health Official). Pratique accepted when entering after calling at another port in the U.K.

Also see "Health – All Ports" before first U.K. port.

RADIO: Via Humber Radio, call sign GKZ – call on Channel 16. Give ship's name and call sign and pass message.
VHF:

Station	*Call Sign*	*Channel Nos.*	*Operational Times*	*Remarks*
Humber Ports Operation and Information Service, Pilot Office, 50 Queen Street, Hull.	"V.T.S. Humber"	16 12 10 13	Continuous watch maintained	Calling and safety. Navigation and safety information etc. for Rivers Humber, Ouse and Trent.
Blacktoft Jetty	"Blacktoft Jetty Radio"	16 14	3 hours before HW Goole until 1 hour after HW Goole	Calling and safety. Port Operations and berthing instructions for Blacktoft.
Goole Docks	"Goole Docks Radio"	16 14	Continuous watch maintained	Calling and safety. Port operations and docking instructions for Goole.

Also see "Hull".

TUGS: Tugs available but not normally used. If required, to be arranged through Ship's Agent.
BERTHING: Berthing instructions given to vessel on arrival at entrance locks. No specific requirements.
SPECIALISED CARGO HANDLING FACILITIES: Three appliances for loading of rail-borne bulk cargoes, e.g. coal, coke, pitch, fluorspar, etc.

Two appliances for loading of canal-borne bulk cargoes (coal, coke, pitch, etc.).

12×7.5 tonne and 5×6 tonne quay cranes, equipped with suitable grabs for sand, ores, fertilisers, coal, grain, sulphur, scrap, etc.

8 mobile cranes up to 40 tonne capacity and fleet of forklift trucks with capacities up to 35 tonnes and capable of lifting 20 ft., 30 ft. and 40 ft. containers.

2×32 tonne Scotch derrick cranes for container handling.

50 tonne and 40 tonne electric travelling cranes for heavy lifts.

Ro-Ro: 1 ramp for abnormal loads of up to 450 tonnes – otherwise no special facilities needed as water is maintained at a constant level.

Some bulk liquids (creosote, tar), direct to or from road tanker vehicles.

STEVEDORES: Arrangements made by ship's Agent who should be given ample notice of time of arrival of vessel.

Port Working Hours:

	Monday to Thursday	0800 – 1200	1300 – 1700
	Friday	0800 – 1200	1300 – 1600
Overtime	Monday to Thursday	0600 – 0800	1700 – 1900
	Friday	0600 – 0800	1600 – 1800
	Saturday	0600 – 1200	
	Sunday	0600 – 1200	1300 – 1700

MEDICAL: Ship's Agent will arrange for attendance of doctor on notification. Doctor's, dentists and hospital services available. Ship's Agent can arrange service required.
DENSITY: Water in Goole Docks is fresh water and is maintained at constant level. Entry is by locks. Density 1000.
FRESH WATER: Delivery by water-boat through hose-pipes. Rate 30 t.p.h.
FUEL: All grades available on reasonable notice being given to Ship's Agent.
FIRE PRECAUTIONS: No specific precautions unless there are exceptional circumstances, when special arrangements can be made with local Fire Service.
GANGWAY/DECK WATCHMEN: Necessary. Usually provided from crew. Otherwise by negotiation locally.
OPENING/CLOSING HATCHES: Responsibility of crew.

SHIP CERTIFICATES:
Ship's Register (including load-line).
Radio Safety.
Life-Saving.
Light Dues.
Change of Articles.
Derat Certificates.

CARGO GEAR: Normally not required, as ample port facilities available.

IDENTIFICATION CARDS: May be required to be produced to Immigration Officer or H.M. Customs Offical, especially in the case of foreign flags.

CONSULS: France, Netherlands and Denmark.

REPAIRS: All types of deck and engine repairs possible by local ship repairers.

DRY DOCKS: No. 2 Dry Dock: 301 ft. length, 50 ft. width at entrance, 15 ft. depth on sill. Two other dry docks. The water in the wet docks at Goole is maintained at a constant level and all dry docks are entered direct from the wet docks.

REPATRIATION: Arranged by Ship's Agent.

AIRPORT: Humberside Airport. Daily services to Amsterdam, Aberdeen, Edinburgh, Esbjerg, Norwich and London.

TIME: GMT in Winter; GMT plus 1 hour in Summer months.

HOLIDAYS: Good Friday; Easter Monday; May Day; Spring Bank Holiday (last Monday in May); late Summer Bank Holiday (last Monday in August); Christmas Day; Boxing Day and New Years Day. No cargo working on these days.

POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.

TELEPHONES: No arrangements for ship connection.

SHORE LEAVE: No restrictions.

REGULATIONS: Visitors to vessels require permits from Port Authority and Master or ship's Agent. Smoking not permitted ashore in dock area.

AUTHORITY: Associated British Ports – Goole, 6-8 Stanhope Street, Goole, North Humberside, DN14 5BB. *Tel:* (0405) 2691/6. *Telex:* 57626. *Contact:* B. J. Harding, Port Manager.

GRANGEMOUTH: 56.01 N. 03.43 W. (See Plan Book)

PORT LIMITS: At Grangemouth a vessel is not considered to be an "arrived vessel" until she is tied up at the allocated berth.

DOCUMENTS:
1 Crew List.
1 Passenger List.
1 List of all high duty goods in crew's possession.
1 Cargo Manifest.
All Valid Certificates.

PILOTAGE: Compulsory in river. Pilot boards at Inchkeith. Pilot boat on VHF, also see "Radio".

ANCHORAGES: North of Grangemouth West Buoy, 2 fathoms. Charleston Roads 5 fathoms. East of Inchkeith, up to 8 fathoms.

RESTRICTIONS: 24 hour locking system in operation depending on draft. The height of the tide must always be taken into account when dealing with larger vessels.

MAX. SIZE: Dry cargo vessels: Length 600 ft., beam 90 ft. Tankers: Length 575 ft., beam 90 ft. Draft according to state of tide. Vessels other than tankers max. draft 25 ft. 6 in. Tankers, up to 34 ft. max. draft.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Wick, Stonehaven and Cullercoats coastal stations. Forth Radio.

Port VHF (FM) Communications: Station: Lock Control Office, Lock Entrance, Grangemouth. This centre will maintain a continuous watch. Call sign: Grangemouth Docks.

156.8 MHz Channel 16 calling and safety. All vessels should maintain a listening watch on this Channel and use it to establish contact with Grangemouth Docks. Once contact is established the Duty Operator will request vessels to shift to the Port Operations Channel.

156.7 MHz Channel 14, Port Operations. A working Channel restricted to messages relating to the movement and safety of ships, and in emergency, to the safety of persons.

156.6 MHz Channel 10, Inter-ship. A working Channel for tug-to-tug and tug-to-bridge communications.

156.3 MHz Channel 6, Inter-ship. A working Channel for communication with other vessels.

156.5 MHz Channel 9. A working Channel for tug to tug and tow to tow communications.

No message of a personal character or messages of any other nature than those pertaining to the general navigation and safety of ships and persons within the Port Area can be accepted.

TUGS: Tugs can join vessel at Hen and Chicken Buoy or Lock Gates and should be pre-booked. Tugs' lines used. 2×25 ton bollard pull and 1×18 ton bollard pull.

BERTHING: The water in Grangemouth Docks is maintained at the same level by impounding pumps. On passing through the lock entrance berthing is allocated according to the nature of the cargo and draft of vessel.

The depth of water available at the berths varies in each dock, the max. depths being approx.: Grange Dock 26 ft.; Carron Dock 23 ft.; Old Dock 17 ft.

CARGO HANDLING FACILITIES: Bulk cargoes can be handled at most berths within the port. The East Wall berth has 4×10 ton grabbing cranes, 4×7.5 tonne mobile cranes are available. Other berths have 10 and 6 ton cranes. 1×35 tonne Scotch derrick. Container berth is 1,000 ft. long and has 2×32 ton transporter cranes.

A Ro-Ro berth in operation. Liquid chemicals and LPG Carriers are handled at the LPG berth and BP jetties. No. 1 North Jetty, which is a common user jetty handles chemicals.

STEVEDORES: No particular advice necessary to stevedores. Essential, however, advise Agent 24 hours prior arrival, who will advise stevedores.

MEDICAL: No advance notice necessary. Hospital facilities available in immediate district.

TANKERS: B.P. Refinery (Grangemouth) Limited. Private jetties in Eastern Channel. South Side Jetties "J2" and "J3" 34 ft. "J4" and "J5" 19 ft. 6 in. North Side Jetties "E1" and "E2" 34 ft. No. 1 North Side Jetty, pipe-lines connected to Ross Chemical and Storage Co. are 1.5 in. nitrogen line, 6 in. chemical line, 10 in. heavy fuel line, 2 in. fresh water supply, 8 in. motor spirit line, 8 in. gas oil line. Draft at No. 1 North 32 ft. 6 in.

DENSITY: 1019 average.

FRESH WATER: Available in most berths. Watermen supervise delivery on request. Delivery rate varies depending on berth.

FUEL: All grades available from oil installations.

GANGWAY/DECK WATCHMEN: Not necessary but can be done by ship's personnel.

OPENING/CLOSING HATCHES: Custom of port is crew open and close hatches but stevedores will do so if required.

CUSTOMS ALLOWANCES: At the discretion of Local Customs Inspector. Normal allowances are equivalent of 5 ounces tobacco per man and equivalent of 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port more than 3 or 4 days may receive extra allowances.

CERTIFICATES: For Customs Clearance valid Certificates in respect of radio, load-line, construction, safety equipment, deratisation, necessary.

CONSULS: Norwegian, Danish and Swedish consuls available locally.

SURVEYORS:
(1) Macleod & McAllister Ltd., Old Granary Office, Meadowside Quay, Glasgow G11.
(2) Thomas Nicol and Son, 11 Bothwell Street, Glasgow G2.
(3) S. A. Greer & Co., 15 North Claremont Street, Glasgow G3.
(4) E. K. Wallace & Son Ltd., 11 Bothwell Street, Glasgow G2.
(5) Lloyd's Register of Shipping, 27 Thistle Street, Edinburgh.

REPAIRS: All types of repairs can be carried out afloat.

DRY DOCKS: Carron dry dock length 350 ft., breadth 50 ft., depth 22 ft. Middle dry dock length 335 ft., breadth 50 ft., depth 19 ft.

REPATRIATION: All facilities exist.

AIRPORT: 1 hour from Glasgow and Edinburgh airports where numerous connections for London thence world wide travel.

TIME: British Standard Time (1 hour ahead of GMT). GMT during Winter months.

HOLIDAYS: First 3 weekdays in January; 1st Monday May; 3rd Monday July; 2nd Monday September; Christmas Day and 26th December.

POLICE/AMBULANCE/FIRE: In public telephone dial 999 and ask for appropriate service. With dock circuit telephone dial 241 for Police or dial 222 and ask for Fire/Ambulance.

EMERGENCY CO-ORDINATION: Coastguard Fifeness Tel: 033 35 666. Major Port Emergencies are controlled by the Police dial 999 or contact through Harbourmaster Grangemouth Tel: 486839.

SERVICES: Compass adjusting, calibrating, etc., can be done in river. No equipment for tank cleaning but can accept tank washings ashore.

BANKS: Royal Bank of Scotland, La Porte Precinct, Grangemouth.
Bank of Scotland, La Porte Precinct, Grangemouth.

STORING: See "Prelims" page viii.

Vessels may be stored by trucks alongside dry cargo berths. There are no facilities for storing, by trucks, vessels berthed at jetties in Eastern Channel.

Trucks may, by prior arrangement, proceed alongside dry cargo berths to store vessels.

Stevedores fork lifts may be employed to handle ship's stores.

Customs regulations are in force for stores remaining on board. Details of stores, including bonded goods such as spirits, etc., must be supplied to Customs on arrival, and a constant check is kept whilst the ship is in Port. Regarding stores loaded aboard, any bonded goods must be presented to Customs for inspection and approval. Restricted amounts only are permitted.

Local riggers may be employed for storing.

SHORE LEAVE: Allowed.

AUTHORITY: Forth Ports Authority, Dock Office, Grangemouth, Stirlingshire FK3 8UE. *Tel:* (0324) 482591. *Telex:* 777432. *Contact:* J. W. Simpson, Port Manager.

AGENT: John Denholm & Co. Ltd., Old Dock Road, P.O.Box 13, Grangemouth FK3 8TZ. Tel: (0324) 482201. After Hours: (031) 337 1920, (050 682) 3555, (0324) 553 769. Telex: 77334. Cables: Denholm Grangemouth.

GRANTON: 55.59 N. 03.13 W. (See Plan Book)

DOCUMENTS: See "Leith".

PILOTAGE: Pilot station Firth of Forth located at Granton, boarding station West of fairway buoy at Longitude 3° West. Contact with pilot cutters can be made on VHF Channel 16 and R/T 2182 kHz. Pilotage not compulsory for vessels passing South of Inchkeith Island.

ANCHORAGES: Good holding ground at Inchkeith Island and Leith roadstead 8 m. – 19 m. at C.D. Request should be made to Forth Navigation Service.

RESTRICTIONS: The entrance between the breakwaters is 103 m. in width. The rise of tide, 5.182 m. at springs and 3.658 m. at neaps permits the entry or exit of vessels up to 7.07 m. draft at HW.

A red flag bearing St. George's Cross exhibited at the Middle Pier Head signifies that vessels should not enter the harbour until the flag is lowered.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Forth, Stonehaven and Cullercoats radio stations.
RADAR/VHF: Port and estuary radar service. VHF contact can be made with Leith Harbour Radio on Channel 16. Forth Navigation Service should be contacted on VHF Channel 16 by all vessels passing Forth Ports Authority seaward limit (line joining North and South Carr Beacons).
TUGS: Sound signal for vessels requiring tug services is four long blasts. Tugs, if required, join the vessel in the roads. Tugs towing gear available, and compulsory.
BERTHING: *Middle Pier:* Quayage 210 m. max. depth 5.1 m. LWOST. In addition, there is a 122 m. crosspiece at the end of the pier where depth of water is 7.6 m. LWOST.
West Pier: Quayage 140 m. max. depth 7.0 m. LWOST.
TANKERS: Tankers are accommodated at the end of the West Pier, adjoining port entrance.
MEDICAL: No advance notice of medical attention required. All hospital facilities available.
FRESH WATER: Available alongside at all berths.
FUEL: All grades available subject 24 hours notice in advance.
REPAIRS: Facilities available for all minor repairs.
AIRPORT: Edinburgh Airport, served by regular airlines, situated about 6 miles away.
CONSULS: See "Leith".
HOLIDAYS: Public holidays observed annually: Third Monday in April; third Monday in September; Christmas Day (25th December); 26th December; 1st, 2nd and 3rd January.
AUTHORITY: Forth Ports Authority, Tower Place, Leith, Edinburgh EH6 7DB. *Tel:* (031) 554 4343. *Telex:* 72681. *Cables:* "Harbour Leith". *Contact:* Mr. J. R. Grant, Port Manager, Leith and Granton.
AGENT: John Denholm & Co. Ltd., 55 Constitution Street, Leith EH6 7AY. Tel: (031) 554 0651. After Hours: (031) 337 1920, (0324) 553769. Telex: 72115.

GREAT YARMOUTH: 52.34 N. 01.44 E.

(See Plan Book)

DOCUMENTS: Usual U.K. requirements.
PILOTAGE: A 24-hour service is provided by Trinity House, subject to 1 hour's notice. Pilots can be contacted on VHF Channels 12 and 9. B.A. Chart 1536.
RESTRICTIONS: When large or awkward vessels are navigating within the port, it may be necessary to hold or slow down other vessels. This is normally done in consultation with the Pilots concerned.
SIGNALS – Control Tower – South Pier: Amber fixed light or all lights extinguished – DO NOT ENTER.
Harbour Office – Brush Bend: Two horizontal red fixed lights – VESSEL(S) ENTERING.
Vessels proceeding downriver must not come below the passenger slipway 132 m. from the North end of Brush Bend while lights are exhibited.
Entry Signals – Control Tower – South Pier:
Fl. amber 1 ev. 5 secs. Ebb less than 1 knot, height 4.2 m.
Fl. amber 2 ev. 5 secs. Ebb less than 1 knot, height 4.5 m.
Fl. amber 3 ev. 10 secs. Ebb less than 1 knot, height 4.8 m.
Fl. amber 4 ev. 10 secs. Flood.
Fl. mauve 1 ev. 5 secs. Ebb more than 1 knot, height 4.2 m.
Fl. mauve 2 ev. 5 secs. Ebb more than 1 knot, height 4.5 m.
Fl. mauve 3 ev. 10 secs. Ebb more than 1 knot, height 4.8 m.
Fl. mauve 4 ev. 10 secs. Flood.
MAX. SIZE: Max. length 138 m., max. draft 5.7 m. HWOST.
With a tidal range of only 1.8 m. and a minimum entrance depth of 4.3 m., Great Yarmouth can be used by vessels up to 4,000 d.w.t. and with a length of up to 120 m. at any time.
HEALTH: Usual U.K. procedure. Contact Port Health Officer for Derat, Fumigation, Quarantine or Livestock Quarantine.
VHF: Masters of vessels intending to enter the harbour must notify the Harbour Master at least 1 hour before arriving off South Pier, giving ETA, max. draft, gross tonnage and last port of call. Masters must also obtain clearance before starting to navigate through the entrance between the piers.
Where possible, VHF radio-telephone must be used for giving information and obtaining clearance to navigate from the Harbour Master. The following VHF Channels and frequencies are used: 9, 11, 12 and 16.
Yarmouth Radio keeps a continuous watch on Channels 12 and 16. The Haven Bridge operates on Channel 12.
Reporting: All vessels over 50 g.r.t. and any others fitted with VHF must report to Yarmouth Radio when passing Ocean Terminal, Atlas Berth and Turntide Jetty (Breydon Water), giving direction of travel.
TUGS: The port's 550 h.p. tug *Hector Read* has a bollard pull of nearly 7 tonnes and can be used for all harbour work, including salvage in the port and approaches. It is fully equipped with salvage and fire fighting pumps as well as other salvage equipment. Contact should be made through the Harbour Master.
BERTHING:
South Quay: Length 470 m.
ABC Wharf: Length 140 m., used for carrying out repairs afloat.
Fish Wharf: Used by Norfolk Line and offshore companies.
East Quay: Length 202 m. Great Yarmouth Warehousing Co. has its main depot on the East Quay, comprising 2,209 sq.m. of warehouses and 3,716 sq.m. of open storage.
Atlas Quay: Length 240 m., with Ro/Ro ramp.
Ocean Terminal: Ro/Ro berth with 70 m. quay. Max. loading 40 tonnes.
Bollard Quay: Length 297 m.
Southtown Wharf: Two berths, lengths 98 m. and 115 m. Can accommodate 2 vessels of length 100 m. simultaneously.
CRANES: The Port and Haven Commissioners have 3 mobile cranes, including 2 that can lift up to 24 tonnes. The third has a maximum lift of 3.5 tons. On the South Quay there are 2×5 ton electric luffing cranes mounted on rails. All are equipped with grabs and hooks. Cranes can also be hired from several local companies.
BRIDGES: *Signals – Haven Bridge:*
Northbound Vessels:
By Day: Blue flag hoisted S.E. Buttress.
By Night: Fixed blue light over fixed white light S.E. Buttress exhibited (5 minutes before bridge opening).
Southbound Vessels:
By Day: Red flag hoisted N.W. Buttress.
By Night: Fixed red light over fixed white light. N.W. Buttress exhibited (5 minutes before bridge opening).
Channel Lights: Exhibited when bascules raise for passage of shipping.
S.E. corner of West Buttress – 2 fixed red vertical.
N.E. corner of West Buttress – 2 fixed red vertical.
S.W. corner of East Buttress – 2 fixed green vertical.
N.W. corner of East Buttress – 2 fixed green vertical.
STEVEDORES: A pool of more than 80 dockers is available to the port's 3 stevedoring companies through Great Yarmouth Port Labour Company. Arrangements are made by Port Agents.
MEDICAL: Doctors and dentists can be arranged through Agents. Hospital facilities available.
FRESH WATER: Water, drinking or fresh, is available on the public quays. Those currently in use are East Quay, Bollard Quay, South Quay and Ocean Terminal.
FUEL: A bunkering station is operated by B.P. Gas Oil is delivered at up to 50 tonnes per hour to any vessel able to use the port.
Total storage capacity of all fuels is about 10,200 tonnes, of which about a third is available for marine use.
CONSULS: Belgium: Consul, Lowestoft. Tel: (0502) 69619.
Denmark: Vice-Consul, Great Yarmouth. Tel: 856831.
Finland: London Embassy. Tel: (01) 235 9531.
France: Consul, Lowestoft. Tel: (0502) 69619.
Italy: London Embassy. Tel: (01) 235 8643.
Netherlands: Vice-Consul, Great Yarmouth. Tel: 856831.
Norway: Vice-Consul, Great Yarmouth. Tel: 850431.
Spain: London Embassy. Tel: (01) 235 5555.
Sweden: Consul, Felixstowe. Tel: (03942) 78844.
REPAIRS: Several ship repair companies are located in Great Yarmouth and most types of repairs can be undertaken.
DRY DOCKS: Richards (Shipbuilders) repairs ships up to 80 m. long and 12.5 m. beam. Sill depth 4.45 m. at MST. Also a shipbuilding berth.
SURVEYORS: Both Marine and Cargo Surveyors can be arranged through the Agent.
AIRPORT: Flights are available by helicopter and light aircraft from North Denes Airfield, 5 km. from the North of the town.
Air U.K. and Genair operate scheduled daily flights from Norwich to British and Continental destinations.
An emergency helipad has been built on the Port Authority premises close to the harbour entrance.
TIME: GMT. Summertime (GMT plus 1 hour) kept from March to October.
POLICE/AMBULANCE/FIRE: Dial 999 in an emergency.
EMERGENCY CO-ORDINATION CENTRE: H.M. Coastguard, Gorleston Divisional H.Q. Tel: 63443.
SERVICES: Compass adjusting can be carried out.
As this port services the oil industry, many types of oil-related services are available from several companies.
BANKS: Barclays Bank plc. Tel: 857601.
Lloyds Bank plc. Tel: 855177.
Midland Bank plc. Tel: 843631.
National Westminster Bank PLC. Tel: 857521.
DEVELOPMENTS: Redevelopment of the Fish Wharf is under way to improve Ro/Ro facilities at Atlas Quay.
A further Ro/Ro facility is being considered, close to the mouth of the River Yare.
Passenger terminal to be constructed at Atlas Quay.
AUTHORITY: Great Yarmouth Port & Haven Commissioners, 21 South Quay, Great Yarmouth, Norfolk NR30 2RE. *Tel:* 0493-855151. *Telex:* 975102 (Gyport). *Contact:* M. C. M. Boon, Chief Executive. Captain R. W. Forbes, Harbour Master. Tel: 0493-863476.

GRIMSBY: 53.34 N. 00.04 W.

(See Plan Book)

VESSEL TRAFFIC SERVICES HUMBER: See "Hull".
NOTICES: See "Hull".
DOCUMENTS: See "Immingham".
PILOTAGE: See "Immingham".
ANCHORAGES: Hawke and Sunk Roads, Haile, Spurn and Bull Anchorages. See "Hull". The Pilots will advise where to proceed to anchor and also provide Pilot.
RESTRICTIONS: See "Berthing" – entrance locks.
MAX. SIZE: Maximum breadth 67 ft., maximum length of vessel that can be locked 268 ft. but vessels of greater length can enter docks on HW when all lock gates are open. 3 ft. clearance under the keel is required. Vessels having a draft of 19 ft. can normally enter the docks on any tide when the height of water is sufficient to allow 3 ft. clearance. Vessels with 21 ft. draft can be taken on spring tides. Vessels can enter usually approx. 3 hours before and 2.5 hours after high water.
Commercial Docks: Max. LOA 139 m., draft 5.8 m., beam 19.8 m.
Fish Docks: Max. LOA 73.2 m., draft 5.5 m., beam 12.2 m.
HEALTH: Master has to report any "Reportable" illness as detailed in Form "Port 38" to "Porthealth Grimsby". Also see "Health – All Ports" before first U.K. port.
RADIO: Humber Radio, 2182 kHz, or VHF Channel 16. Also see "Hull".
VHF: See "Hull" – Vessel Traffic Services Humber.

TUGS: Normally join in Grimsby roads. Optional whether use ship's or tug's lines. Tugs operate from Immingham so plenty of notice required.

BERTHING: *Grimsby Docks:*

	Commercial Docks	Fish Docks
Entrance Locks:		
Length	90.0 m.	43.6 m. & 21.4 m.
Width	21.4 m.	10.6 m. & 13.0 m.
Sill level MHWN	6.8 m.	5.7 m. & 6.8 m.
Quay cranes	11 electric – capacity 3 to 7.5 tonnes	1 electric – capacity 15 tonnes 1 electric – capacity 5 tonnes
	2 mobile cranes – capacity 20 tonnes for ship discharge	1 mobile – capacity 15 tonnes

There are 2 Roll-on/Roll-off berths in the Royal Dock, one to/from Esbjerg and a second to/from Norway. There is also one in the Alexandra Dock for motor vehicles.

2×500 t.p.h. Shiploaders available for Grain.

STEVEDORES: Vessels are allocated labour in order of arrival so it is only necessary to give the Agent the ETA preferably before noon on the previous day. Normal working hours 0800 – 1700 hrs., Friday 0800 – 1600 hrs. Overtime can be worked 1700 – 1900 hrs. Monday to Thursday. On Saturdays and Sundays as required.

MEDICAL: Hospitals and all other medical facilities are readily available. If immediate attention is required on arrival please advise Agent by radio or telegram.

FRESH WATER: Available at all quays. Rate approx. 20 t.p.h.

FUEL: Normal gas and diesel oils available by both road and barge with at least 24 hours notice. This is also quayside tankage in fish docks.

GANGWAY/DECK WATCHMEN: Not necessary, but the service is available if Master requires it.

OPENING/CLOSING HATCHES: Responsibility of the crew. The hatch beams can be removed and replaced by the shore cranes but there is an extra charge for this operation.

CUSTOMS ALLOWANCES: 200 cigarettes per 8 days. 1 bottle wine and 1 bottle spirits per 4 days. All seals to be broken.

CARGO GEAR: In accordance with the regulations laid down by H.M. Factories Inspector.

IDENTIFICATION CARDS: Some sort of identification whilst crew are ashore is advisable. (Seaman's Book or Passport).

CONSULS:

Belgium, Vice-Consul	Hull	27464
Denmark, Vice-Consul	Grimsby	57521
Dominican Republic	Grimsby	59101
Finland, Vice-Consul	Immingham	72387

SERVICES: Compass adjusting, tank cleaning, etc., are available.

SHORE LEAVE: Crew are allowed ashore.

BANKS: See "Immingham".

STORING: See "Immingham".

GENERAL: The Grimsby Dock Master can be contacted on VHF Channel 16 and then change to Channel 18 or 9 for speaking.

AUTHORITY: Associated British Ports, Port Office, Cleethorpe Road, Grimsby, South Humberside DN31 3LL. *Tel:* (0472) 59181. *Telex:* 52250. *Contact:* J. M. Hughes, Port Manager.

HARTLEPOOL: 54.42 N. 01.12 W. (See Plan Book)

DOCUMENTS: *Ship's Official Papers Including:*

Ship's Register.
Ship's Construction Certificate.
Load Line Certificate.
Derat Certificate.
Safety Equipment Certificate.
Radio Equipment Certificate.
U.K. Light Dues Certificate.
Crew List.
Bills of Lading, Manifest and Stowage Plan (Usually sent in advance).
Ship's Stores List.

PILOTAGE: Call by VHF when 3 hours from port and again 30 minutes before arrival. 2 hours required for sailing. VHF Channel 16, 14, 12, 9, 8 and 6.

Pilotage not compulsory. Tel. No. Hartlepool 66030.

Pilots usually board in vicinity of Longscar Buoy from a cutter showing the usual international signals.

ANCHORAGE: N.E. of Longscar Buoy but special care must be exercised in vicinity of prohibited anchorages near Ekofisk Oil Pipe-line and River Tees Fairway.

RESTRICTIONS: Daylight entry only for vessels exceeding 24.4 m. beam. Entrance Channel 1.1 km. long., 61 m. wide. Nominal dredged depth 5.0 m. below LAT.

MAX. SIZE: Overall length 181.3 m. Beam 29.2 m. reduced draft of 7.92 m. Vessels approaching any of the max. sizes must consult Dock Master in advance.

HEALTH: New Regulations. The Public Health (Ships) Regulations in force.

Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio. VHF Hartlepool Port Radio Channel 16 and 12.

TUGS: Two twin screw diesel (1,200 h.p.) tugs available during tidal periods. Tugs ropes available at extra charge.

BERTHING: Victoria Harbour, Deep Water Berth. Length 295 m. Depth 9.5 LAT. Equipped with 10 tonne cranes.

Wood Quay: Length 300 m. Depth 4.5 m. LAT. No cranes (North Sea barges, repairs).

Entrance to the enclosed docks at Hartlepool is by 'The North' entrance, Victoria Harbour, which has a depth of water 8.18 m. on the sill at MHWST the entrance width is 21.33 m.

North Basin (Non-Tidal): Length of Dock 182.87 m. Depth on sill is 3.1 m. below LAT. No Cranes.

N.W. Corner: Roll-on/Roll-off berth. Max. LOA 135 m. Max. beam 20 m. Max. draft 6.25 m.

Central Dock (Non-Tidal): Length of Dock 301.73 m. Width of Entrance 21.33 m. Depth alongside is 2.5 m. below LAT. No Cranes.

West Quay – Conveyor: A dry cargo bulk loading appliance capable of loading any cargo of sizes up to 3 in. cube into vessels of 8,000 tonnes carrying capacity or less, according to tidal conditions prevailing at the entrance locks.

North-West Corner: Roll-on/Roll-off Berth. Max. length of vessel 135 m. Max. beam 20 m. Max. draft 6.25 m.

Union Dock (Non-Tidal): 11 Cranes 10 tonnes – 3 tonnes. Length of quayage 1,551.94 m. Width of Entrance 20.32 m. Depth of Water of 2.2 m. below LAT.

Roll-on/Roll-off berth to handle loads of up to 450 tonnes. Max. length of vessel 85.34 m. Max. beam 14.93 m. Max. draft 5.79 m. Bulk road vehicle chute.

Coal Dock (Non-Tidal): Length of Quayage 689.11 m. Width of Entrance 20.32 m. Depth of Water of 2.2 below LAT.

Jackson Dock (Non-Tidal): Length of Quayage 600 m. Width of Entrance 20.32 m. Depth of Water of 1.6 m. below LAT.

STEVEDORES: All stevedoring undertaken by Port Authority on day work basis with voluntary overtime available (including week-ends). Shift working can also be provided.

MEDICAL: Full hospital and emergency services available at all times. Shore Telephone No. 999 or call on VHF 16.

DENSITY: 1025.

FRESH WATER: Available from shore hydrants and tugs at 20 t.p.h.

FUEL: Available by road and bunkering vessels.

GANGWAY/DECK WATCHMEN: Available by private arrangement through Agents.

HATCHES: To be opened and closed by ship's crew.

IDENTIFICATION CARDS: Seaman's Book or Passport advisable.

CONSULS:

Belgium
Denmark
Finland
French Consular Agency
Netherlands
Norway
Portugal
Sweden
West Germany

REPAIRS: Deck and engine repairs available.

SURVEYORS: Hull and cargo surveyors available through Shipping Agent.

AIRPORT: Teeside Airport nearby with regular U.K. and Continental Services.

TIME: GMT and BST (GMT plus 1 hour) during Summer months.

HOLIDAYS: Normal Bank Holidays.

STORING: See "Prelims", page viii.

1. Yes.
2. Yes – no regulations concerning storing.
3. Yes.
4. Yes.
5. Normal standing regulations.
6. Yes.

EMERGENCY CO-ORDINATION CENTRE: Tees Harbour Office.

DEVELOPMENTS: New deep water Ro/Ro Berth under construction for vessels up to 10,000 d.w.t.

AUTHORITY: Tees and Hartlepool Port Authority – Hartlepool Docks, Middleton Road, Hartlepool, Cleveland TS24 0SE. *Tel:* Hartlepool 76771. *Telex:* 58669. *Contact:* N. Britton, Director. Captain A. Kirk, Dock Master.

HARWICH (Including Parkeston Quay and Navyard Wharf): 51.56 N. 01.15 E. **(See Plan Book)**

The Harbour Authority is the Harwich Harbour Board whose jurisdiction extends from the seaward area of the Deep Water Channel to the mouth of the River Orwell on one hand and as far up the River Stour as the tide flows on the other.

The Harbour Master's Office is at Harbour House, Angel Gate, Harwich (Tel: 4303. Telex: 98472), at which is based the Harwich Harbour Operations Service maintained on a 24 hour basis by a Duty Officer and a Trinity House Duty Pilot.

The Harbour Operations Service (Call sign "Harwich Harbour Radio") maintains a listening watch on Channel 16, and operates on Channel 71.

The service is equipped with surveillance radar, radar information is available on request.

British Rail, at Parkeston Quay, keep a 24 hour listening watch on Channel 16 and work on Channel 18.

DOCUMENTS:

1 Home Officer Form 1.B.6 may be obtained from H.M. Customs Boarding Officer.
1 C.142 Crew Declaration List.
1 Maritime Declaration of Health ("Q" Flag procedure).
2 Ship's report by Master.
1 Stores List.
1 Certificate of Deck Cargo Tonnage (if carried).
1 Grain Certificate (if carried).
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List required by vessels other than packet vessels.
1 Landing Card for each passenger.
1 Ship's Certificate of Registry.
1 Mercantile Marine Office Certificate – for British vessels only.
1 Load Line Certificate.
1 Safety Equipment Certificate.
1 Lloyd's Certificate.
1 Derat Exemption Certificate.
1 Ship's Register.
1 Lights Bill.
1 Radio Safety Certificate.

In addition Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Pilotage into harbour is compulsory for all ships of 50 tons and over, with the exception of vessels of not more than 3,500 tons gross regularly employed in the home and coasting trades and not carrying passengers.

Also see "Felixstowe".

CORK PILOT STATION

Boarding Point: To facilitate the arrival and departure of ships trading to and from the ports of Felixstowe, Harwich and Ipswich, a Pilot station operates in the vicinity of the Cork in a position Lat. 51° 56′ 42″ N., Long. 01° 27′ 06″ E. *This station is additional to, but is not a substitute for, the Sunk pilot vessel. It is for the use of ships bound to or leaving the above-mentioned ports whose normal course does not take them past the Sunk pilot vessel.* Full service is also provided at the Sunk station.

The Cork station is operated by a fast Pilot launch with black hull and white wheelhouse, flying the Pilot flag, and at night exhibiting lights and signals in accordance with Rule No. 29 of the International Rules for the Prevention of Collisions at Sea.

The attention of Masters is drawn to the requirement when being served by a fast pilot launch of maintaining headway throughout the operation of shipping or landing a Pilot.

ETAs and Amendments: Inward Bound Ships. Ships requiring a Pilot at the Cork station should apply to the Sunk pilot vessel in the same manner and giving the same information but stating their estimated time of arrival at the Cork.

Outward Bound Ships: Masters of ships about to sail from Harwich and Felixstowe and wishing to use the Cork pilot station should state this when ordering their Pilots for departure. However ships may carry their Pilots out to the Sunk pilot station should they so desire. Pilots for ships outward bound should be ordered by telephoning Harwich (code 02555) 3129 – see "Harwich Shore pilot station" below.

Contact Procedure: The Cork pilot launches keep a constant listening watch on Channel 16 (VHF).

Working Frequencies: Having made contact on Channel 16 (VHF) ships should transfer to the working frequency Channel 9 (VHF).

HARWICH SHORE PILOT STATION (OPERATIONS)

The Shore pilot station (Operations) is situated at Harbour House, Harwich and is part of the Port Operations Service jointly operated by the Harwich Harbour Board and Trinity House. It should be noted that Pilots' accommodation and administrative offices are situated at the main pilot station at Town Quay, Harwich.

The pilot station (Operations) is manned by a Duty Pilot and is equipped with VHF, telex and telephone.

All requests for the services of Pilots for ships bound into or out of Harwich and Felixstowe should be made to this station. Orders for Pilots for outward bound ships should state whether the Pilot will be landed at the Sunk or the Cork. Requests from inward bound ships for the services of the Ipswich Pilots and for the Pilots for the Rivers Colne, Blackwater, Crouch and Roach may also be passed through this station.

Contact Procedure: A 24-hour listening watch is maintained on Channel 16 (VHF). The call sign is "Harwich Pilots Radio".

Working Frequencies: Having made contact on Channel 16 (VHF) ships should transfer to the working frequencies, Channels 9 and 12 (VHF).

Ships not fitted with VHF may contact the pilot station (Operations) through the Sunk pilot vessel on MF.

Other communication details are:

Telephone number:	Harwich (code 02555) 3129 or 6300
Telex number:	98472, Pilots Harwich

APPROACHES: Traffic Regulatory System in effect.

ANCHORAGES:

Erwarton: Situated to the North and West of Parkeston Quay with an average depth of 5.5 m. at LW.

Parkeston: Situated to the North of Parkeston Quay, with an average depth of 5.5 m. at LW.

Shelf: Situated on the Western side of the main Channel between the North and South Shelf Buoys. Average depth of 3.7 m. at LW.

Inner: Situated at the Pitching Ground. Average depth 8.0 m. at LW.

Cork: Situated to the North of the Harwich Channel. Area approx. 2 miles × 1 mile. Average depth 6.5 m.

RESTRICTIONS: Normal max. draft allowed alongside the berths at Parkeston Quay is 20 ft.

Normal cargo working at Parkeston Quay ceases at 2200 hrs., but berthing and night work by arrangement at any time.

MAX. SIZE: Normal max. permissible length 500 ft. arrangements for larger vessels can be made. Normal max. permissible breadth for Roll-on/Roll-off is 75 ft. Normal max. permissible draft – 20 ft. The height of the tide does not restrict a vessel berthing alongside the quay if her draft is within 20 ft.

HEALTH: Maritime Declaration of Health required ("Q" Flag procedure). Obtain Pratique through H.M. Customs Boarding Officer if no sickness on board.

If there is sickness on board the Customs Official will notify the Duty Port Medical Officer.

If the vessel is from another port in the U.K. Pratique is automatic.

Also see "Health – All Ports" before first U.K. port.

RADIO: North Foreland Radio (call sign GNF) or Humber Radio (call sign GKZ) are the most convenient stations to pass ETA cables, etc., to Agents or receivers

TUGS: 5 tugs are available in Harwich Harbour for use in the area. M.T. "Alfred" and M.T. "Ganges", 40 ton bollard pull.; M.T.'s "Sauria", "Egerton" and "Langton", 18 tons bollard pull. Tugs' lines usually used.

24-hour service, 7 days per week. Constant watch on Channel 16 VHF. Additional tugs up to 2,250 h.p. can be obtained from London at 24 hours' notice.

BERTHING: There are 8 berths at Parkeston Quay, of which 2 are Portal Ro-Ro berths and 1 is a Pontoon Ro-Ro berth. Normally max. draft permissible alongside is 20 ft. A new berth is under construction.

Berthing, etc., by arrangement. Applications for berths must be made through the Shipping or Port Manager, British Rail, Parkeston Quay, giving as much advance notice as possible. Also see "Navyard, Harwich" before "Authority".

STEVEDORES: All labour at Parkeston Quay are members of National Union of Railwaymen, and arrangements for their use must be made through the Shipping and Port Manager, British Rail, Parkeston Quay.

MEDICAL: Prior notice through British Rail, Parkeston Quay, desirable to arrange attention. All services are available.

TANKERS: A berth is available for tankers for the purpose of discharging and loading to the local oil refinery.

DENSITY: 1025 (sea water).

FRESH WATER: Fresh water can be supplied from quayside hydrants.

FUEL: Can be arranged by either barge or road tanker.

GANGWAY/DECK WATCHMEN: Watchmen are not provided or required by the port, but ships may use their own watchmen.

OPENING/CLOSING HATCHES: To be carried out by ship's crew.

CARGO GEAR: There are 8 level luffing cranes, safe working load averaging from 3 tons to 10 tons, which can be used for discharging and loading. There are also 2 transporter cranes, 30 tons SWL and 4×30 ton Goliath rubber tyred gantries.

IDENTIFICATION CARDS: Seaman's Identity Cards sufficient.

CONSULS: Dutch, German, Danish, Belgian.

REPAIRS: Minor repairs can be carried out by British Rail workshops at Parkeston Quay. As much advance notice as possible required.

REPATRIATION: All facilities available.

AIRPORT: Nearest is Ipswich, 22 miles; Southend, 70 miles.

HOLIDAYS: All normal Bank Holidays. Only passengers and car travellers are dealt with at Parkeston Quay on these days. Freightliners sail only if loaded before the holiday. Train ferries operate normal services.

POLICE/FIRE/AMBULANCE: Dial 999 and ask for service required.

TELEPHONES: Arrangements can be made, with advance notice given.

SHIP SUPPLY SERVICE:

The Alexandra Towing Co. (Felixstowe) Ltd., The Dock Office, Felixstowe Dock, Felixstowe, Suffolk.

Felixarc Marine, Felixstowe Dock, Felixstowe, Suffolk.

Orwell & Harwich Navigation Co., The Quay, Harwich, Essex.

DEVELOPMENTS: Eastern end of Parkeston Quay to be lengthened in due course to provide more container berths.

Dredging of the Main Channel to 11.0 m. underway.

NAVYARD, HARWICH:

Operators: Harwich Dock Co. Ltd. Telephone: Harwich 8949. Telex: 98229. Listens on VHF Channel 16, working Channel 22.

Berths:

Berth No. 1: Length 42 m.
Berth No. 3: Length 160 m., depth 8.6 m.
Berth No. 4: Length 90 m., depth 4.5 m.
Berth No. 5: Length 160 m., depth 6.5 m.

(Berths 3, 4 and 5 equipped with Ro/Ro ramps).

Stevedores:

All labour at Navyard is employed by Harwich Dock Co. Ltd. Berths and labour must be booked through Operations Manager (24 hour service available).

Cargo Equipment:

2 Ransome Rapier NCK 60 mobile cranes – capacity 35 tonnes.

Other equipment includes 14 tugmasters, 10 forklifts to 25 tonnes.

Other Services:

Telephones, fresh water, bunkers, medical services can all be arranged. Harwich Dock Company Ltd., provides ships and goods agency services at this and other ports.

AUTHORITY: Harwich Harbour Board, Harbour House, Angel Gate, Harwich CO12 3EJ. *Tel:* Harwich 4303. *Telex:* 98472. *Contact:* V. A. Sutton, General Manager and Harbour Master. Captain R. W. Shaw, Assistant Harbour Master (Operations).

HEYSHAM: 54.02 N. 02.55 W. (See Plan Book)

DOCUMENTS: As for other British ports plus Walney Light Dues.
PILOTAGE: Trinity House Pilotage Service, Barrow District. Compulsory for all vessels of 50 tons gross tonnage and over with the exception of vessels of not more than 1,500 tons gross regularly employed in the home and coasting trades and not carrying passengers. Also see "Barrow-in-Furness".
ANCHORAGES: Heysham Lake. 0.5 mile N.W. of No. 1 Buoy. Position: Lat. 53° 59′.4 N., Long. 3° 00.0′ W. Depth: 40 ft. at LW.
RESTRICTIONS: Entry possible at all states of tide. Harbour maintained at 4.1 m. below Admiralty chart datum of chart No. 2010.
MAX. SIZE: 480 ft. (146 m.) length, draft 17 ft.
HEALTH: See "Health – All Ports" before first UK port.
RADIO: Heysham Harbour Radio, VHF Channels 16, 14 and 74.
TUGS: None available.
BERTHING: Vessels may be berthed at any time. 1 Ro/Ro ramp, 1 berth exclusively for gas base, 1 general cargo berth North Quay, 2 general cargo berths.
CRANES: 1×30 ton portal crane on North Quay; 1×23 tonne portal crane; 4×7.5 ton portal cranes on South Quay.
DENSITY: Salt water.
FRESH WATER: Available from the quays.
FUEL: Gas oil by road vehicle.
GANGWAY/DECK WATCHMEN: Ship's watchmen required.
AIRPORT: Nearest, Liverpool and Manchester; 60 miles.
REPAIRS: Small repairs possible, no docking facilities.
PROVISIONS: Available locally.
POLICE/AMBULANCE/FIRE: Telephone 999 in emergency.
SHORE LEAVE: No restrictions on landing.
AUTHORITY: Sealink UK Ltd., Sea Terminal, Heysham, Lancs. LA3 2XF. *Tel:* Heysham (0524) 52373. *Telex:* 65260. *Contact:* Captain P. A. Read, Port Manager.

HOLYHEAD: 53.19 N. 04.41 W. (See Plan Book)

DOCUMENTS:
1 Crew List and where applicable a Passenger List.
1 Pratique issued by Customs.
1 Crew Declaration (C.142 for H.M. Customs).
1 List of Consumable Stores (tobacco, snuff, alcohol).
1 Declaration of Health.
1 Cargo Manifest.
1 Ship's Report.

PILOTAGE: Pilotage compulsory under Trinity House Authority. Local Pilot available on request.
ANCHORAGES – PROHIBITED ANCHORAGE: The breakwater affords partial shelter to the outer anchorage and complete protection to New Harbour; there are depths of from 19 ft. to 42 ft. in the former and of from 17 ft. to 40 ft. in the latter.

The accommodation for vessels of deep draft in New Harbour is limited. Small vessels should always proceed into New Harbour and anchor in the S.W. part, leaving the outer part and the roadstead for large vessels. The bottom is hard, overlaid with mud but the holding ground is sufficiently good if an adequate amount of cable is veered. During Easterly winds an uncomfortable sea is raised; vessels may then obtain shelter in the Eastern part of outer anchorage. Anchorage is prohibited within 1.5 cables on either side of the track followed by Mail Steamers from the head of the breakwater to the entrance to Old Harbour; the limits of this area are shown on charts.

MAX. SIZE:
Inner Harbour: Restricted to vessels of 4.5 m. draft and vessels exceeding this draft will only be accepted after consultation with the Shipping and Port Manager.
Outer Harbour: Vessels of approximately 60,000 tons can be accepted alongside the Anglesey Aluminium Jetty where the berth is dredged to 46 ft. at MLWS.

HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Holyhead Radio, VHF Channel 16, No Port Radar.
TUGS: Available through Agents. Tugs up to 1,375 h.p.
BERTHING: By prior arrangement with Shipping and Port Manager.
STEVEDORES: No stevedores. Vessels loaded and discharged by Sealink dock porters. Outside vessels berthing at Public Quay can be discharged and loaded by making prior arrangements with Agent.
MEDICAL: Medical Officer available. Stanley Sailors Hospital situated in close proximity to Harbour.
DENSITY: Salt water (1025).
FRESH WATER: Available at all berths within the Inner Harbour and alongside Anglesey Aluminium Jetty.
FUEL: Fuel oil and diesel oil available provided that adequate warning is given to Agent. Only 1 berth available for bunkering of large vessels of deep draft alongside Anglesey Aluminium Jetty.

Prior arrangements must be made with Sealink UK Ltd. in conjunction with Anglesey Aluminium Metals Ltd., telephone Holyhead 3333.

No oiling barge available for bunkering vessels at anchor.

GANGWAY/DECK WATCHMEN: Required at all times when vessels are in port.
REPAIRS: Repairs can be carried out by Sealink UK Ltd. workshops.
DRY DOCK: Length 412 ft., breadth 70 ft. 3 in., depth on sill 20 ft. at Spring tides.
SURVEYORS: Cargo Inspectors can be contacted, if required.
Surveyors representing Lloyd's Register, Bureau Veritas, etc., can be contacted on request.
AIRPORT: RAF Station Valley, Anglesey (6 miles away).
HOLIDAYS: Saturdays, Sundays and all Public holidays.
POLICE/AMBULANCE/FIRE: Tel. 999.
EMERGENCY CO-ORDINATION CENTRE: Maritime Rescue Sub-Centre, Coastguard. Tel: 0407-2051.
TELEPHONES: No telephone connection for outside vessels. Public telephone within port limits.
SERVICES: Compass adjusting can be arranged.
BANKS: British banks only available in the Holyhead area, exchange facilities are provided.
STORING: See "Prelims", page viii.

1. Vessels can be stored by barge or truck, usually by truck.
2. Vessels can be stored during loading or discharging.
3. Trucks can proceed alongside at the berth.
4. Forklift trucks can be used to handle stores.
5. Customs Regulations, where applicable, in force.
6. Local riggers can be employed, if necessary.

SHORE LEAVE: Allowed.
AUTHORITY: Sealink U.K. Limited, Rail House, Turkey Shore Road, Holyhead, Gwynedd LL65 2DD. *Tel:* (0407) 2304. *Telex:* 61283. *Contact:* G. Imlah, Shipping and Port Manager. Captain R. Daley, Marine Superintendent/Harbour Master. Captain P. M. McOwan, Assistant Shipping and Port Manager. Mr. D. E. Ing, Superintendent Marine Engineer.

HOUND POINT: 56.00 N. 03.22 W. (See Plan Book)

LOCATION: The terminal is operated by B.P.
Position of terminal Lat. 56° 00′ 20″ N., Long. 03° 21′ 45″ W.
DOCUMENTS:
1 Crew List.
1 Passenger List.
1 Crew's Effects List.
1 Stores List.
All valid Certificates.

PILOTAGE: Pilotage in Firth of Forth is compulsory. Contact "Forth Pilot" VHF Channel 16. Pilot boards large vessels in vicinity of Fairway Buoy 56° 03.5′ N., 03° 00′ W. as there is limited depth and manoeuvring space at normal Pilot boarding ground East of Inchkeith. For large vessels in ballast, Pilots require gangway/pilot ladder combination rig.
ANCHORAGE: When vessel has to wait for Pilot, berth or tide, "Forth Navigation Service" will assign anchorage. These anchorages are in a line E.S.E. to S.W. of Fairway Buoy. Good holding ground at anchorages.
RESTRICTIONS: Vessels will be berthed at slack water – flood or ebb-only. The same in most cases for unberthing.
MAX. SIZE: Vessels up to 300,000 d.w.t. can berth at Hound Point Terminal with no defined restriction on LOA. Vessels berth starboard side alongside, heading East.

Max. permitted loading draft 20.72 m. (Neap tides) 21.64 m. (Spring tides). Minimum depth alongside terminal 25.0 m.

HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: *Arrival advice:* For advance notice refer to Charterer's instructions.
RADAR/VHF: Estuary radar service. VHF contact can be made with Forth Navigation Service Channel 16. Hound Point Terminal operates VHF Channel 9; B.P. Grangemouth VHF Channel 16 (calling) and Channel 19.
TUGS: 4 tugs of 35 tonnes bollard pull available. Tugs ropes are used.
BERTHING: Hound Point Terminal is a Sea Island in the Firth of Forth about 13 miles from Fairway Buoy. The approach channel from Fairway Buoy to berth is marked by buoys and has a guaranteed minimum depth of 66 ft. at LWST.

Maximum of 4 loading arms of 16 in. available for deballasting and/or loading. Loading rate about 8,000 t.p.h. by gravity and with 2 arms connected. This rate decreases as tank level drops.

When 4 arms are connected loading rate can be as high as 18,000 t.p.h. by means of booster pumps.

Facilities to receive any amount of dirty ballast are available. Discharge through 16 in. loading arms into 24 in. line with minimum of 5 kg./sq.cm. back pressure.

No need to prepare ship's derricks unless stores are taken on board.

API of cargo about 36.7.
DENSITY: 1020 – 1025.
FRESH WATER: Not available.
TIME: GMT in Winter. GMT plus 1 hour in Summer.
CONSULS: See "Leith".
GENERAL: Outside the Firth of Forth, clear of the land on the South side, streams are weak, spring rate up to 1 knot, but at spring tide the velocity at the terminal is up to 3.5 knots (Refer to Tidal Stream Atlas).
AUTHORITY: Forth Ports Authority, Tower Place, Leith, Edinburgh EH6 7DB. *Tel:* (031) 554 4343. *Telex:* 72681. *Cables:* "Harbour Leith". *Contact:* Mr. J. R. Grant, Port Manager, Leith & Granton.
AGENT: John Denholm & Co. Ltd., Old Dock Road, P.O.Box 13, Grangemouth FK3 8TZ. Tel: (0324) 482201. After Hours (031) 337 1920, (0324) 553769, (050 682) 3555. Telex: 77334. Cables: Denholm Grangemouth.

HULL: 53.44 N. 00.14 W. (See Plan Book)

VESSEL TRAFFIC SERVICES HUMBER:

The Humber Ports Operation and Information Service operates a VHF (FM) radio telephone service available to all vessels navigating the Rivers Humber, Ouse, and Trent from the Queen Elizabeth Dock.

A continuous watch is maintained on Channels 10, 12, 13, 14, 16 and 52. The call sign is "VEE TEE ESS" Humber. The Telephone Number is Hull 0482 – 701787. Telegraphic address "Humberops", telex 527656.

The Service provides information regarding the arrival, berthing, anchoring and departure of vessels and also information on navigational aids, navigation generally, visibility, and the safety of vessels and persons. Tidal information, including the height of tide at Bull Sand Fort, Immingham, Hull and Hessle, is also available on request. Messages of any other nature and messages of a personal character cannot and will not be accepted. Messages of this kind should be passed through the British Telecom Ships Telephone Service via "Humber Radio" on Channel 26.

Other VHF (FM) Stations situated on the River Humber and the Channels used are shown in the Appendix to this Notice. These Stations provide direct communication between a vessel and the Dock or Pier Master at the place of destination. In general, vessels should obtain their navigation and safety information from the Vessel Traffic Services Humber and their berthing, docking and other pre-arrival information from the Station serving their destination.

A general broadcast giving weather reports, tidal information and navigational warnings is made by the Vessel Traffic Services Humber on Channel 12 every 2 hours commencing at 0103 hrs., prior notification being given on Channel 16.

Procedure:

(i) Vessels fitted with appropriate VHF R/T equipment on approaching the Humber should set watch on Channel 16.

(ii) Vessels wishing to communicate with the pilot station should call "Spurn Pilot" on Channel 16 and shift to Channel 14 for exchange of traffic.

(iii) On entering and before sailing or moving in the Humber, vessels should call "VEE TEE ESS" Humber on Channel 16. When contact is established they will be requested to transfer to Channel 12 for exchange of arrival or departure information. Watch should then be resumed on Channel 16 and 12.

(iv) Vessels wishing to communicate with the Station serving their destination should do so at the appropriate time on the Channels shown in the Appendix, reporting their departure from Channel 12 to "VEE TEE ESS" Humber. Vessels are advised that, when communicating with these Stations, contact with the Vessel Traffic Services Humber can only be re-established through Channels 16 and 12 and it is particularly advisable to maintain a listening watch on Channel 16 whenever practicable in the event of unforeseen circumstances developing in the River.

All times in messages should be given in local time using the 24 hour notation.

To achieve the full advantage of efficient communication, strict telephone discipline and attention to procedure, particularly on the Calling Channel, is imperative. The operating procedure should be in accordance with that laid down in Chapters VI and VII of the G.P.O. Handbook for Radio Operators (1975 Edition, with Supplements).

These services will be offered and will be rendered on the condition that neither the Associated British Ports, nor any of its servants or Agents, shall be liable to any person for loss or damage of any kind howsoever caused or arising whether as a result of negligence or otherwise or as a result of the non-availability of the services.

NOTICES:

GENERAL DIRECTIONS FOR NAVIGATION IN THE HUMBER: PROCEDURE AND INSTRUCTIONS FOR SHIPS USING THE RIVER HUMBER

1. *Time of arrival. ETA:*

1.1 Ship Owners, Masters and Agents are required to inform the Associated British Ports of the Estimated Time of Arrival of their vessels as per the General Directions together with relevant information regarding draft, hazardous cargo, last port of call, nationality of vessel. In this context the Associated British Ports means the Dock Master at the particular port to which the vessel is bound, the Vessel Traffic Services Humber or the Pilot Office at Hull, Grimsby or Goole. Reference British Transport Docks Board Notice to Mariners Nos. 2 and 3 of 1974.

1.2 Ship Owners or Agents are requested to inform the Masters of their vessels of the importance of amending ETA's as necessary due to changing circumstances. Such amendments can be passed to the Associated British Ports by radio through Humber Radio either in the form of a link call or telegram.

Appendix:

		14		Port Operations in River Hull.
		6	0900 – 1100 hrs. Sat. irrespective of tide.	Inter-ship use.

1.3 Within the Associated British Ports organisation Vessel Traffic Services Humber will disseminate relevant information received to all interested parties.

1.4 Within the river any message related to the movement and safety of vessels will be passed by Vessel Traffic Services Humber to the vessel concerned and Ship Owners and Agents may avail themselves of this service at any time.

2. *Time of departure. ETD:*

2.1 In order to maintain a complete and up to the minute picture of traffic movement Dock Masters are requested to notify the Vessel Traffic Services Humber of the intended time and actual time of departure of vessels from their docks. This information should be passed by land line. Exchange of information thus engendered should ensure that all Officers of the Associated British Ports are fully informed of traffic movements. In the case of berths not under the jurisdiction of a Dock Master (e.g. wharves on the River Trent), it is anticipated that the present system of communication through Vessel Traffic Services Humber and the Pilot Office will be sufficient.

3. *Navigation of the river:*

3.1 Vessels entering the river should communicate with the Vessel Traffic Services Humber (VHF Channels 16 and 12). A two way exchange of information is essential to ensure the smooth flow of traffic on the Humber necessary for the safety of vessels using the ports. In addition the Vessel Traffic Services Humber can fully advise Owners, Agents and Dock Masters etc., as to the movement on the river of the vessels in which they are interested. Vessels approaching their destinations desirous of communication with the station serving their destination should do so as per the instructions in Notice to Mariners No. 3 of 1974.

4. *Completion of passage or departure from river:*

4.1 Inward bound vessels should on completion of their passage report to Vessel Traffic Services Humber indicating the closing down of their station. VHF/RT should not be used whilst laid alongside in dock.

4.2 On departure from the river vessels are requested to report the disembarking of their Pilots and their intention of proceeding to sea.

4.3 All reported departures from normal traffic movement (e.g. engine failures, vessels weather bound at Spurn etc.), will be disseminated by the Vessel Traffic Services Humber to the appropriate authorities.

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing card for each passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British Ships only.
Load Line Certificate.
Safety Equipment Certificate.
Lloyd's Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition Manifests and Bills of Lading are usually sent to Agents direct from the loading port.

PILOTAGE: Compulsory. *Humber Pilotage District – Spurn Pilot Station:* Mariners are advised that the Pilotage Control Station (Tel: 096 – 46 – 392; Telex: 527393) is established on the Spurn Peninsula in a position Lat. 53° 34′ 29″ N.; Long. 00° 06′ 48″ E.

The station is manned at all times with a Pilot Master in attendance and vessels bound to the Humber requiring the services of Humber Pilots must give advance notice by signal through a G.P.O. Coast Station to the Spurn Pilot Station giving ETA at the seaward limits of the Humber Pilotage District, draft, and destination at least 12 hours in advance. Any adjustment to the time should be given at least 2 hours before arrival.

Vessels wishing to communicate direct with the Spurn Pilot Station by VHF radio telephony may if within VHF range (approximately 20 miles) call "SPURN PILOT" on VHF Channel 16 and after contact transfer to Channel 14 for passing messages.

(Note: Attempts to establish communication on VHF at extreme range can cause unnecessary interference).

Inward vessels bound for ports up river of Hull desiring to pick up a Goole or Trent Pilot in Hull Roads should give at least 2 hours advance notice of their ETA in Hull Roads to the Vessel Traffic Services Humber on VHF Channels 16 or 12 or through a G.P.O. Coast Station (Telegraphic address "Humberops") or by Telex No. 527656.

Compliance with this procedure will ensure, as far as possible, the shipping of Pilots without delay.

ANCHORAGES: The undermentioned anchorages have been designated for the use of sea-going vessels. Masters are asked to co-operate by using these anchorages and to avoid anchoring in the Fairway or elsewhere.

Spurn anchorage for vessels awaiting Pilot, Bull anchorage for vessels awaiting berth and vessels outward (awaiting orders, etc.), Hawk anchorage for vessels sheltering and Haile anchorage for vessels carrying explosives.

Spurn Anchorage. From position "A" 121° distant 3.65 miles from Spurn Lighthouse, in a 125° direction 1.60 miles; thence in a 020° direction 0.60 mile; thence in a 077° direction 1.00 mile; thence in a 347° direction 0.70 mile; and thence in a 257° direction 2.40 miles to position "A".

Haile Anchorage: (Explosives): From position A, 216° distant 2.18 miles from Spurn High Lighthouse in a 284° direction 0.77 mile; thence in a 139° direction 0.80 mile; and thence in a 027° direction 0.46 mile to position A.

Bull Anchorage: From Position "A", 193° distance 2.1 miles from Spurn High Lighthouse, in a 090° direction 1.96 miles thence in a 294° direction 1.76 miles, thence in a 274° direction 0.93 miles, thence in a 206° direction 1.0 miles, thence in a 116° direction 0.88 miles, thence in a 026° direction 0.55 miles to Position "A".

Hawk Anchorage:

(1) Lat. 53° 35′ 00″ N., Long. 00° 04′ 14″ E.
(2) Lat. 53° 36′ 16″ N., Long. 00° 01′ 33″ E.
(3) Lat. 53° 36′ 09″ N., Long. 00° 00′ 52″ W.
(4) Lat. 53° 34′ 51″ N., Long. 00° 04′ 02″ E.

RESTRICTIONS: Vessels may be accepted through the day and night, the only restrictions on the larger vessels being influence of tides together with the undermentioned physical limitations. The larger deep drafted vessels are usually docked from 3 hours before HW until HW, with similar restrictions on vessels sailing. Ships drawing up to 19 ft. can have access to the docks over the full 24 hours on neap tides and can be docked/undocked over an 18 hour period on spring tides.

Locks	*Entrance lock*		*Depth of water on sill*			
	Length	*Width*	*at MHWS*		*at MHWN*	
	ft.	*ft.*	*ft.*	*in.*	*ft.*	*in.*

Albert and William Wright Docks	320	80	28	1	23	2
			at MLWS			
Salt End Jetty Number 1	tidal		35	0		
Salt End Jetty Number 3	tidal		35	0		

MAX. SIZE: The maximum permissible dimensions for a general cargo/bulk carrier vessel (excluding tankers) requiring a berth in the enclosed docks are as follows: King George & Queen Elizabeth Docks, length 635 ft., beam 83 ft., draft 31 ft. at neaps, up to 36 ft. at springs.

HEALTH: Pratique is normally automatic. In case of suspected illness, death on board or the presence of captive birds or animals on board, Master must radio the Hull and Goole Port Health Authority through the Post Office or Coastal Radio Stations not more than 12 hours or less than 4 hours before arrival using the following telegraphic address "Portealth Hull" or through the Vessel Traffic Services Humber using call sign "Vee Tee Ess" Humber on VHF Radio Channel 12. The usual flag or light signals should be shown except where only animals are present and Free Pratique should be obtained from the Hull and Goole Port Health Authority.

RADIO: Portishead Radio – call sign GKL but when within 200 miles of the Humber can go through Humber Radio – call sign GKZ.

VHF: See "Vessel Traffic Services Humber".

TUGS: Head boat normally joins vessel in vicinity of Salt End, about 2 miles from dock, and the other tug or tugs connect with vessel when approaching the dock. Where vessel supplies own ropes for towage these to be good stout hawsers. Wire ropes will not be accepted. There is a charge for use of tug's hawsers.

BERTHING: *Dock or Jetty*	*Length of Operational Quays (ft.)*	*Normal Depth (ft.)*
King George	11,229	37 ft. 07 in.
Queen Elizabeth	5,400	37 ft. 07 in.
Albert William Wright	11,329	as high water
Salt End Jetty No. 1	258	35 ft.
Salt End Jetty No. 2	396	35 ft.
Riverside Quay	1,065	18 ft. 06 in.

BULK HANDLING FACILITIES: Container terminal at Queen Elizabeth Dock equipped with 2 transporter cranes, one 40 tons and one 35 tons capacity and 12 straddle carriers.

Roll-on/Roll-off container services operated from King George and Queen Elizabeth Docks. Grain silos of 60,000 tons capacity. Edible oil storage available.

CRANES: 1 sheerlegs of 150 tons. 51 cranes with capacity up to 32 tons.

STEVEDORES: Enable Agent order gangs important receive accurate ETA. See "Holidays".

Working hours: 0800 – 1200 hrs. Monday to Friday. Overtime possible 1630 – 1830 hrs. Monday – Friday; 0800 – 1200 hrs. on Saturdays and 0800 – 1830 on Sundays.

MEDICAL: Necessary for Agents to be advised of any urgent cases of illness in order that they can arrange for a doctor or if necessary an ambulance to be available immediately on berthing. Hospital facilities available.

If vessel required to remain in river awaiting berth, arrangements can be made for any serious case to be taken from vessel by lifeboat and conveyed to Grimsby for immediate treatment.

TANKERS: The Oil terminal at Salt End handles refined or semi-refined chemical and petroleum products which are transferred from the vessel along the oil jetties through a series of chemical and service pipes which range from 4 in. for chemicals, 8 in. and 12 in. for spirit and 16 in. for fuel oils and molasses. Facilities available for the discharge of Slop residue.

There are 2 tanker berths at Salt End and maximum dimensions of vessels are length 670 ft., draft 34 ft.

DENSITY: 1013/1015.

FRESH WATER: King George and Queen Elizabeth Docks. Available at any time. Ex Quay. Rate of delivery – 15 t.p.h.

All other Docks. Available at any time. Ex Mains. Rate of delivery – 15 t.p.h.

If water required urgently after 1700 hrs. weekdays or on Saturdays or Sundays Agents must be notified in good time to enable them order men out.

FUEL: Fuel oil available, viscosity up to 3,500 secs. Redwood. Gas oil and diesel also available. At least 24 hours notice required.

FIRE PRECAUTIONS: Masters receive an emergency services dock plan with an explanatory leaflet.

GANGWAY/DECK WATCHMEN: Watchmen available if required by Master.

OPENING/CLOSING HATCHES: Can be carried out by stevedores when ordered. Ship charged with actual cost, but ship's crew may do so if required.

CUSTOMS ALLOWANCES: Foreign trade – max. allowance 0.5 lb. cigarettes or cigars or tobacco. Home Trade – (Elbe/Brest limits) half the above. Wine and/or Spirits. Foreign Trade – 1 pint – opened. Home Trade – (Elbe/Brest limits) half the above allowance.

CARGO GEAR: When working with ship's gear a Register of Machinery, Chains and Wire Ropes, etc., with all Test Certificates and record of inspections to be produced to the stevedores before work commences.

PILOTAGE: Compulsory.

Humber Pilotage District – Spurn Pilot Station: A Pilotage Control Station (tel. No. 096–46–392; telex No. 527393) is established on the Spurn Peninsula in a position Lat. 53° 34′ 29″ N., Long. 00° 06′ 48″ E.

The station is manned at all times with a Pilot Master in attendance and vessels bound to the Humber requiring the services of Humber Pilots must give advance notice by signal through a G.P.O. Coast Station to the Spurn Pilot Station giving ETA at the seaward limits of the Humber Pilotage District, draft, and destination at least 12 hours in advance. Any adjustment to the time should be given at least 2 hours before arrival.

Vessels wishing to communicate direct with the Spurn Pilot Station by VHF radio telephony may if within VHF range (approximately 20 miles) call "Spurn Pilot" on VHF Channel 16 and after contact transfer to Channel 14 for passing messages.

(Note: Attempts to establish communication on VHF at extreme range can cause unnecessary interference).

Inward vessels bound for ports up river of Hull desiring to pick up a Goole or Trent Pilot in Hull Roads should give at least two hours advance notice of their ETA in Hull Roads to the Vessel Traffic Services Humber on VHF Channels 16 or 12 or through a G.P.O. Coast Station (telegraphic address "Humberops") or by telex No. 527656.

Compliance with this procedure will ensure, as far as possible, the shipping of Pilots without delay.

ANCHORAGES: "Hawk", "Bull" and "Haile Explosives anchorage". – The Pilot station will advise where to proceed to anchor and also provide Pilot. See "Hull".

RESTRICTIONS: No restrictions, vessels may enter the harbour day or night. Max. draft for entering harbour 34 ft. HW. Compulsory Pilots boarding Spurn Light-vessel, decide whether vessel shall proceed up river or anchor and await suitable state of tide.

MAX. SIZE: Also see "Tetney Terminal" and Immingham Oil Terminal under "Tankers".

Immingham Dock max. length 198 m., breadth 26.2 m., draft 10.4 m. on density 1010.

HEALTH: Master to report any "Reportable" illness as detailed in form "Port 38" to "Porthealth Immingham".

See "Health – All Ports" before first U.K. port.

RADIO: Humber Radio – 2182 kHz or VHF Channel 16. Dock Master VHF Channel 16. Tankers use Channel 19.

VHF: See "Hull" – Vessel Traffic Services Humber.

TUGS: Will join vessel off dock entrance, optional use of tow lines. If using tug's tow lines, charge for this service, depending on vessel's length.

BERTHING: Unless Master or Agent indicates preference, the Port Authorities will decide which side alongside. River Pilot deciding in conjunction with Dock Master most suitable berthing time for harbour and river installations.

Ro-Ro Terminals: The enclosed dock system incorporates 2 Ro-Ro freight terminals: 1×4 berth facility is operated by Tor Line while a second single berth terminal is available on a common user basis.

BULK HANDLING FACILITIES: *British Steel Corporation Ore Terminal:* Adjoins N.C.B. Terminal. Max. length 1,095 ft., max. draft subject to approach channel, 43 ft. – 46 ft. Two appliances for discharging, rate 2,000 tonnes per hour each.

National Coal Board Terminal: Adjoins B.S.C. Ore Terminal, length – no restriction up to 600 ft. thereafter dependent on vessel using ore berth. Draft average 40 ft.

One appliance for coal loading, rate 4,000 tonnes per hour.

Grain: 2×500 t.p.h. shiploaders available.

CRANES: 19 electric cranes 3 – 20 tonnes capacity and 1 electric derrick 32 tonnes capacity.

STEVEDORES: Firm ETA to Agent required if possible before noon on previous day before arrival.

Working Hours: Monday – Thursday, 0800 – 1700 hrs.; Friday, 0800 – 1700 hrs.; overtime by arrangement.

MEDICAL: No advance notice necessary for medical treatment as all hospital facilities available.

TANKERS: Also see "Tetney Terminal".

Immingham Oil Terminal. Up to 250,000 d.w.t. with part cargo conducive with Humber dredged channel. Length up to 1,100 ft., breadth, no restriction, draft depends on height of water in channel, average 43 ft. Three 12 in. lines for crude oil. Two lines 12 in. and 10 in. all other products. One 8 in. line for bunkers.

Eastern Jetty: Max. Length approx. 650 ft. breadth, no restriction, draft depends on low water, range 27 ft. to 36 ft. 10 in., 8 in., 6 in. lines, depends on Receivers. Bunker line available.

Western Jetty: Max. Length approx. 800 ft. breadth, no restriction, draft depends on low water, range 27 ft. to 36 ft.

Killingholme North: Length 580 ft. max., beam, no restriction, draft 30 ft. 6 in. One 8 in. line. One 4 in. bunker line.

Killingholme South: Length 565 ft. max., beam, no restriction, draft 31 ft. One 8 in. line. Bunker line available. No slop tanks available.

DENSITY: In harbour 1010.

FRESH WATER: Available all berths by hose. Rate of delivery 20 t.p.h.

FUEL: 24 hours notice required. All grades available.

FIRE PRECAUTIONS: Copy of these regulations handed to the Master on arrival.

GANGWAY/DECK WATCHMEN: Watchmen not usually employed, but left to the discretion of the Master.

OPENING/CLOSING HATCHES: See "Grimsby".

CERTIFICATES:

Ship's Register.
Load Line.
Safety Radio.
Safety Equipment.
Safety Construction and any British Light Dues Receipts.
Derat Certificate.
Oil Pollution Certificate (Tankers).

CUSTOMS ALLOWANCES: 8 days – 200 cigarettes per person approx. Wine/spirits, 4 days – 0.25 pt. per day; this depends on the Customs Officer's discretion.

CARGO GEAR: This must comply with the Department of Employment and Productivity regulations. Normally discharge carried out by shore cranes, although overside berths available.

IDENTIFICATION CARDS: Seaman's book or passport sufficient for crew members going ashore.

CONSULS:

Finland	Immingham 72387	Netherlands	Grimsby 43177
Denmark	Grimsby 57521	Norway	Hull 224151
Greece	Hull 224151	Sweden	Immingham 72387

REPAIRS: All major repairs possible.

DRY DOCKS: 1. Length 225.6 m., width at entrance 17.1 m.
2. Length 182.9 m., width at entrance 27.4 m.

SURVEYORS: Classification/P&I and cargo surveyors available.

REPATRIATION: All facilities exist for dealing with crews and passengers.

AIRPORTS: Leeds Bradford Airport and Humberside Airport for Amsterdam (3 flights from each daily), Aberdeen and London for International destinations.

TIME: GMT. Summertime, GMT plus 1 hour.

HOLIDAYS: See "Grimsby".

POLICE/AMBULANCE/FIRE: Police; Docks – Immingham 72414, 72068, 72067; County – Immingham 76444. Ambulance; County – Cleethorpes 692912. Fire; 999 ask for Fire.
EMERGENCY CO-ORDINATION CENTRE: Humber Estuary, Humber Ports Operations and Information Service. Tel: Hull 35599 – Hull Radio on VHF Channels 16 and 12.
TELEPHONES: Public telephones available.
STORING: See "Prelims" page viii.

1, 2, 3. It is normal practice for such stores to be delivered to ships side at in-dock berths by road vehicles. At the Eastern and Western River Jetties at Immingham, however, vehicles are not permitted and the approximate distances fom the root of the Jetties to ships side is from 400 m. to 500 m.

4. Fork lift trucks could be used at in-dock berths, if necessary.

If proceeding to NCB/BSC or Immingham Oil Terminals – check with Terminal Authorities.
BANKS: All major U.K. Banks have branches in the area.
DEVELOPMENTS: Associated British Ports is to build a new deep water terminal at Immingham for handling bulk liquids.

The facility will be used primarily by tankers carrying North Sea liquefied petroleum gas from Flotta and Sullom Voe for Calor Gas Ltd. and Conoco Ltd.

The terminal will also be used for the export of LPG.

Completion is planned for mid-1985.

The terminal will be sited to the West of the port, and will accommodate fully laden gas carriers up to 75,000 cu.m. at any state of the tide.

As well as its primary purpose of handling liquid propane and butane, the terminal will have the potential to accept additional traffic from other companies.
AUTHORITY: Associated British Ports, Port Office, Cleethorpe Road, Grimsby, South Humberside DN31 3LL. *Tel:* (0472) 59181. *Telex:* 52250. *Contact:* J. M. Hughes, Port Manager.

IPSWICH: 52.02 N. 01.10 E. (See Plan Book)

DOCUMENTS: Masters can conclude all documentation in port. Ship's Agent will give the necessary advice.
PILOTAGE: See "Felixstowe".

A pilot station has been established in the Orwell Navigation Centre at Ipswich Dock Head, Tel: Ipswich 211347 (after hours Tel: 56011) who will receive orders, and requests for information, regarding the pilotage of vessels in the Ipswich pilotage district – Pilots should be ordered at least 2 hours prior to departure.
ANCHORAGES: No anchorages within port. All vessels will proceed direct to berth, otherwise anchorage provided in Harwich Harbour.

RESTRICTIONS: Up to 250 ft. (76 m.) in length the lowest permissible U.K.C. is 2 ft. 6 in. (0.76 m.). Over 250 ft. (76 m.) and up to 360 ft. (109.7 m.) in length the lowest permissible U.K.C. is 3 ft. 0 in. (0.91 m.) Over 360 ft. (109.7 m.) in length by special arrangement (U.K.C.=Under Keel Clearance).
Night Navigation: Vessel of up to 330 ft. (100.6 m.) in length can navigate at any time provided the U.K.C. is observed.

Certain vessels between 330 ft. (100.6 m.) and 360 ft. (109.7 m.) in length may be navigated at any time at the discretion of the Pilot provided that a request is received by the Ipswich Pilot Office, 48 hours in advance of the vessel's arrival/departure, so that the vessel's capabilities in relation to the river can be assessed by the Trinity House Pilots and the Ipswich Port Authority Harbour Master.
Petroleum Tankers – Daylight: There will be no special restrictions or requirements other than conforming with the U.K.C.
Petroleum Tankers – Night: Tankers up to 260 ft. (79.2 m.) in length can navigate at any time provided that U.K.C. requirement is observed. Tankers between 260 ft. (79.2 m.) and 330 ft. (100.6 m.) in length can navigate provided that:

(a) The U.K.C. requirement is observed.
(b) There will be no opposing traffic on the river above No. 5 Buoy.
(c) Visibility is at least 2.5 miles.

Chemical Tankers having on board Hazardous Cargo (i.e. Commodities specified in IMO Hazardous Codes): Will navigate in the river during daylight only.
N.B. Tankers in this category having discharged their cargo and having no hazardous cargo remaining on board will not be constrained by this provision.

Also see "Bridges".

MAX. SIZE: 460 ft. (140.2 m.) overall length and 25 ft. 6 in. (7.7 m.) draft.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Masters to contact ship's Agent through North Foreland, Humber, Niton or Portishead depending on position of vessel. All these radio stations hold cable addresses and staff telephone numbers of Agents.
VHF: A 24 hour VHF radio facility has been established. Vessels arriving should contact "Ipswich Port Radio" on VHF Channel 16 on entering the River Orwell and report and/or maintain a listening watch as instructed. Channels 14 and 12 will be used for the passing of messages which should be restricted to the safety of navigation or persons.
TUGS: Vessels of 360 ft. (109.7 m.) in length and up to 415 ft. (126.5 m.) will use 1 tug. Vessels of 415 ft. (126.5 m.) in length and up to 460 ft. (140.2 m.) will use 2 tugs. Vessels of less than 360 ft. (109.7 m.) in length but having a deadweight capacity of 5,000 tons or more will use 1 tug.

Special consideration may be given to vessels fitted with Bow Thrust facilities.

BERTHING: Vessels bound for berths in the Wet Dock should arrive off the lock 2 hours before HW.
Cliff Quay: Length: 3,250 ft (990 m.).

Depth of water alongside: 28 ft. (8.5 m.) below LWOST. Subject to silting.

Approach Channel: 19 ft. (5.8 m.) below LWOST.

Cranes: 12 portal jib cranes from 3.00 to 15.25 tonnes lifting capacity and 1 derrick crane capable of lifting 32.5 tonnes at 90 ft. (27.4 m.) radius, and 40 ft. (12.1 m.) outreach from the face of the quay. A Karrilift container gantry is also available.

Largest vessel which can be accommodated: 460 ft. (140.2 m.) overall in length, 25 ft. 6 in. (7.7 m.) draft inwards, 24 ft. 6 in. (7.4 m.) outwards.

The Quay handles containers and heavy lifts up to 32.5 tonnes and is particularly well equipped to handle cargoes direct to and from both road and rail transport. The South end has been developed as a modern terminal for handling all types of general cargo, including containers, flats and palletised units. Spacious modern transit sheds, together with a container park, are sited conveniently behind this part of the Quay. Vessels up to 25 ft. 6 in. (7.7 m.) draft can be handled at the terminal.

Roll-on/Roll-off cargo terminal to be established at the quay which is presently equipped for coal handling.
Grain Terminal: Located at Cliff Quay. Capable of handling vessels up to 10,000 tonnes capacity at a loading rate of 550 t.p.h. (malt) and 700 t.p.h. (other grain products). Grain silo capacity 11,000 tonnes.
Container Terminal: A new container terminal is under construction at Cliff Quay and will be operational by November, 1984. The terminal will have a 40 tonne ship to shore luffing crane and 2 shoreside gantries with 1-9-1 configuration.
West Bank Terminal: This Terminal provides 3 berths with a total quay frontage of 310 m. and is dredged to 20 ft. (6.1 m.). A container berth is backed up by 7 hectares of hardstanding, including a transit shed of 2,750 sq.m. floor area. The berth is served by 3 portal cranes of 37.5 tonnes, 35 tonnes and 10 tonnes capacity and is adjacent to a Freightliner Terminal offering daily services and incorporated into the Railfreight Speedlink network.

A Ro-Ro berth is backed up by 5 hectares of hardstanding. The bridge ramp is designed to carry a load of 180 tonnes with maximum axle loads of 45 tonnes. The ramp has a carriageway of 36.9 m. long×7 m. wide and can handle traffic at all states of the tide.

The Dock: The dock is situated within the town of Ipswich. It is some 26.25 acres (10.63 hectares) in extent and is approached by an entrance lock 300 ft. (91.4 m.) long by 50 ft. (15.2 m.) wide and ships up to 47 ft. 6 in. (14.4 m.) beam can be brought in.

The following are the depths on the outer sill: At HWOST, 23 ft. 6 in. (7.16 m.). At LWOST, 10 ft. (3.04 m.). At HWONT, 20 ft. 6 in. (6.25 m.). At LWONT, 12 ft. (3.65 m.).

Owing to the shape of the lock-pit modern vessels require the following clearances:

Beam	*Clearance*
40 ft. (12.19 m.)	3 ft. (0.91 m.)
42 ft. (12.80 m.)	4 ft. (1.22 m.)
45 ft. (13.71 m.)	5 ft. (1.52 m.)
48 ft. (14.63 m.)	5 ft. 6 in. (1.67 m.)

Inside, in addition to some 2,700 ft. (823 m.) of private quays owned by merchants having warehouses or mills adjoining, where small vessels can berth, there are the following quays owned by the Authority:

(i) *South West Quay:* This quay is 800 ft. (244 m.) in length with a depth of 19 ft. (5.79 m.) of water alongside at mean dock level. The quay is served by 3 modern 7.5 tonne portal electric travelling cranes and mobiles as required.

(ii) *Timber, Public Warehouse,* and *End Quays* total 940 ft. (286 m.) in length and have a depth of water alongside varying from 12 ft. (3.65 m.) to 20 ft. (6.09 m.). Public Warehouse Quay has transit shed and warehouse space behind the quay and is served by mobile cranes capable of lifting up to 5 tonnes.

(iii) *Tovell's Wharf* is a 600 ft. (183 m.) reinforced concrete quay with 22 ft. (6.70 m.) of water alongside. It is served by 2×4 tonne and 1×5 tonne electric travelling luffing cranes.

(iv) *Orwell Quay* is 775 ft. (236 m.) in length, with 18 ft. (5.48 m.) of water alongside and includes a combined container and Roll-on/Roll-off berth with a derrick capable of lifting 32.5 tonnes at 112 ft. (34.14 m.). Two transit sheds, with a floor area of 15,100 sq.m. are situated immediately behind the quay apron together with further extensive covered and open areas.

BRIDGES: The Western half of the River Orwell Bridge has a clearance of 38.8 m. above MHWOST.

Masters of larger vessels are advised to check their air drafts and if in any doubt contact their Agent or the Ipswich Port Authority before proceeding up the River Orwell.

STEVEDORES: Ship's Master normally advises his Agent of his ETA, disposal of cargo on board, and all relevant details. The Agent passes this information to Stevedores.

MEDICAL: All medical facilities available in port. Vessels requiring medical assistance on arrival should advise all details by radio telephone or on their ETA cables.

TANKERS: It is desirable that when Master of a tanker gives an ETA he also indicates the size of pipe-line, size of connection and discharging point in order that necessary arrangements can be made at discharging point of receiving oil terminal. There are no slop facilities at port of Ipswich, and all cleaning and gas-free operations must be carried out outside precincts of the Harwich Harbour Conservancy Board. Only one tanker berth at Ipswich but there are 6 intake points on quay and it is usual for 4 coastal tankers to be accommodated, depending on the overall length and berth availablity. A maximum draft on the berth of 23 ft. (7 m.) subject to silting.

DENSITY: Approx. 1020 oz. depending on the amount of fresh water in river due to heavy rain.

FRESH WATER: Available at all quays. Delivery by hose through meter at 10 t.p.h.

FUEL:

Gas oil 35 secs. Redwood.
Light fuel oil 200 secs. Redwood.
Medium fuel oil heated 950 secs. Redwood.
Heavy fuel oil heated 3,500 secs. Redwood.
At least 24 hours' notice required.

GANGWAY/DECK WATCHMEN: No watchmen required by Port Authority, but sufficient men available at all times to move vessels, if necessary.

OPENING/CLOSING HATCHES: Hatches opened by ship's crew.

CERTIFICATES: Following certificates are required by Agents in order to arrange Customs clearance:

Ship's Register.
Radio Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Derat Certificate.
British Tonnage Certificate, if required.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes, or equivalent in tobacco, per man. Wine and/or Spirits, 1 bottle per man.

CARGO GEAR: Cargo working gear is supplied by stevedores. Normally, quayside cranes are used for discharging and loading. In event of cargo gear being used in port, Ship's Gear Certificate, duly certifying that all gear has been examined and is in every way workable and suitable for discharge and/or loading of cargo, is to be produced.

IDENTIFICATION CARDS: Not required as long as each crew member has in his possession a seaman's book and/or passport.

CONSULS: Vice-Consul for Sweden and Vice-Consul for Norway. Tel: 59281.

REPAIRS: Only small repairs on board.

SURVEYORS: Lloyd's Register, Tel: 52518.

REPATRIATION: Facilities exist at port for effecting crew changing and arranging repatriation.

AIRPORT: Ipswich Airport is 2 miles from the port. Charter flights available for ship's crew. Tel: 70111.

HOLIDAYS: Normal holidays for English ports.

TIME: GMT in Winter months. Summer time, GMT plus 1 hour.

POLICE/AMBULANCE/FIRE: In emergency dial 999. Otherwise Police – Ipswich 55811; Ambulance – Ipswich 56407; Fire – Ipswich 75345.

SHORE LEAVE: Allowed.

DEVELOPMENTS: See "Berthing".

Main channel at Harwich presently being dredged to 11.0 m.

AUTHORITY: Ipswich Port Authority, Old Custom House, Key Street, Ipswich IP4 1BY. *Tel:* (0473) 56011. *Telex:* 988787. *Contact:* A. J. Hanson, Commercial Manager. Captain J. M. Bain, Harbour Master.

KING'S LYNN: 52.45 N. 00.24 E. (See Plan Book)

DOCUMENTS:

Pilot Note to be filled in and signed by the Master on completion of pilotage services both inwards and outwards.

Cargo tonnage return to be completed by the ship's Agent.

PILOTAGE: Pilotage is compulsory between an East-to-West line through Bar Flat Buoy in the Wash and the Freebridge at King's Lynn.

Vessels may be boarded from pilot cutter in the Wash from approx. 2.5 hours before high water between Cork Hole, the Sunk Buoy and Roaring Middle Light Float. Unless prevented by weather or breakdown a pilot cutter cruises between King's Lynn No. 1 Light Buoy and the Sunk Light Buoy approx. 2.5 hours before high water until such time as it is too late for a vessel to transit the Approach Channel on that tide.

Requests for a Pilot sent at least 24 hours before the service is required (with amendments if necessary up to 14 hours before) to the Pilot Office, Common Staith, King's Lynn (Tel: King's Lynn 3411, telegrams "Conservator" King's Lynn) or through local Agent. The Pilot Office is at the Harbour Office and maintains VHF R/T watch on Channels 16 and 14 from 0900 – 1700 hrs. Monday to Friday and from 4 hours before high water until 1 hour after high water on each tide after 1700 hrs. and before 0900 hrs. The pilot cutter listens on Channel 16 when on station and is fitted with Channels 14, 12, 11 and 6 as working channels.

No. 3 and 4 pilot launches "Brackley" and "Denver" are 40 ft. fibre glass craft with blue hulls, white superstructure and orange tops to the wheelhouses. In the event of bad weather the pilot launch on duty will fore-run vessels into Cork Hole (Lat. 52° 53′ N., Long. 00° 24′ E.) before boarding Pilots.

Requests for Pilots for ships in port, should be made to the Pilot Office at least 2 hours before the Pilot is required to attend the ship. The signals to be used or displayed where the services of a Pilot are required in accordance with the provisions of the Merchant Shipping (Pilot Signals) Order, 1970.

ANCHORAGE: In the Wash vessels anchor within an area bounded by the Roaring Middle Light Float and the King's Lynn No. 1 Light Buoy and the Sunk Light Buoy. Anchoring close to No. 1 Buoy in sufficient depth of water assists early boarding of Pilots. Depth of water 20 ft. minimum.

RESTRICTIONS: King's Lynn Harbour is situated on the River Great Ouse about 2 miles inland from its mouth, at the S.E. corner of the Wash.

The shipping channel in the approaches to King's Lynn and its approaches in the Wash is subject to changes in depth and direction as published on Admiralty Charts.

Harbour Master will advise in advance upon the suitability of vessels and tides.

All ship movements are at high water, times in accordance with a position list maintained at the Harbour Office on the basis of information supplied in advance from Masters of vessels and their Agents.

At the Docks entrance lock docking signals are exhibited from a signal mast. Gale warnings are exhibited from a signal mast on Common Staith.

MAX. SIZE: Max. dimension for vessels entering the Harbour: length 300 ft. (No. 6 Berth, South Quay), beam 45 ft., draft 11 ft., on lowest neap tides, and 17 ft. on highest spring tides. Access over high tide only. Harbour Master to be consulted for vessels approaching these limits.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: The King's Lynn Conservancy Board operates in the River Great Ouse and its approaches in the Wash a VHF (FM) port operations and information radio-telephone service in the International Maritime Band, call signs: "King's Lynn Harbour Radio" (Channels 16, 14, 12 and 11); "King's Lynn Pilots" (Channels 16, 14, 12, 11 and 6).

Associated British Ports operates a docks operations and information service, call sign: "King's Lynn Docks Radio" (Channels 16, 14 and 11).

TUGS: Controlled by King's Lynn Conservancy Board and in attendance at the discretion of the Board's Harbour Master. Vessels joined in the Wash Approaches and/or lower reach of River Great Ouse (Marsh Cut). Vessels should provide own hawsers. If ordered, tug hawser available.

Harbour Master may require any vessel to use and employ a tugboat.

BERTHING: *Alexandra Dock:* Size 780 ft. × 310 ft. Approached from the River Great Ouse and King's Lynn Harbour by a lock. Vessels of length 88.0 m. and beam 13.5 m. can be accepted. The depth of water on sill is 22 ft. to 26 ft. (springs) and 18 ft. (neaps).

Bentinck Dock: Size 1,000 ft. × 400 ft. Connected with the Alexandra Dock by a passage and gates over which pass 2 swing bridges. Also double-sided jetty 235 ft. long.

The quays of the 2 docks have a water frontage of approximately 1 mile and provide a total of 16 berths.

3 quay cranes up to 20 tons capacity available.

STEVEDORES: Gangs usually can be provided at minimum notice. Main commodities and handling rates: timber (200 cbm pre-pack, pre-slung, per gang-hour), steel coils (250 tons per gang-hour), tinplate (90 tons per gang-hour), grain (200 t.p.h. per gang hour), also roll-on/roll-off and container handling.

TANKERS: 3 tanker berths in enclosed docks. Discharge from vessels is to 6 in. connecting pipes feeding 8 in. pipes to storage tanks.

MEDICAL: It is advisable to give advance notice of required medical attendance via Agent. In emergency the Harbour Office will pass on requests received over the VHF R/T Port Operations and Information Service. For other medical information, refer to the Port Medical Officer of Health and H.M. Customs.

FUEL: Available at berths alongside King's Lynn Harbour on 24 hours previous notice. Light-grade fuel oil, gas oil, petrol and paraffin only.
FRESH WATER: Available on all berths through 4 in. pipes off hydrants from public supply.
OPENING/CLOSING HATCHES: Done by crew. Cranes available for heavy beams.
GANGWAY/DECK WATCHMEN: Vessels responsible for providing own gangways at King's Lynn Harbour berths, where the Regulations require the Master or other person having the care of any ship or other craft to have a proper number of hands on board to attend moorings and to comply with all the requirements and directions of the Harbour Master or his Deputy or Assistants.
CONSULS: Vice-Consul for the Netherlands and Germany F.R.
REPAIRS: Limited facilities only available locally for hull and engine repairs.
AIRPORT: Charter flights and some regular flights, from Cambridge and Norwich airports about 45 miles from King's Lynn. Regular flights from London (Heathrow) about 100 miles from King's Lynn.
POLICE/AMBULANCE/FIRE: In emergency dial 999 and ask for the service required. Normal service: Police – King's Lynn 61311; Ambulance – King's Lynn 3503 or 3910; Fire Service – King's Lynn 5163.
HOLIDAYS: Cargo work usually available at overtime rates on Saturday and Sundays and on all public holidays.
DEVELOPMENTS: Container storage terminal to be built at the rear of Bentinck Dock. 42 ton container forklift already available. Terminal to be operational mid-1984.
AUTHORITY: The King's Lynn Conservancy Board, Harbour Office, Common Staith, King's Lynn, Norfolk PE30 1LL. *Tel:* (0553) 3411 and 3412. *Cables:* "Conservator" King's Lynn. *Contact:* M. J. Kiddle, General Manager. Captain D. W. Garside, Harbour Master and Pilot Master.

Associated British Ports, – King's Lynn, St. Ann's Fort, King's Lynn, Norfolk PE30 2EU. *Tel:* King's Lynn (0553) 2636, after June 1985 – (0553) 772636. *Telex:* 81368. *Contact:* A. S. Kent, Port Manager. D. J. Harrison, Assistant Port Manager.

KIRKCALDY: 56.07 N. 03.09 W.

DOCUMENTS/PILOTAGE: See "Leith".
RESTRICTIONS: Dock gates open for 2 hours before HW.
MAX. SIZE: Vessels of 1,500 d.w.t. regularly use the port. Width at dock gates 15.2 m. Depth 5.2 m. Max. width to enter 14.4 m.
RADIO: See "Leith".
VHF/RADAR: Forth Navigation Service from Leith or Methil Harbour Radio.
TUGS: None.
BERTHING: 494 m. of berthing space available in dock.
BULK CARGO FACILITIES: Privately owned grain discharge plant.
STEVEDORES: Available from Methil.
AUTHORITY: Forth Ports Authority, Dock Office, Kirkcaldy. *Tel:* Kirkcaldy 260176. *Contact:* Captain I. C. Bayliss, Harbour Master. Captain R. Taylor, Port Manager.

LARNE: 54.51 N. 05.48 W. (See Plan Book)

DOCUMENTS: See "Belfast".
PILOTAGE: Not compulsory, though private Pilots operate who, when required, are engaged by ship's Agent. Pilots board off Fairway Buoy. Port VHF. Channels 16 and 14.
ANCHORAGES: Inner anchorage in Larne depth up to 5 fathoms. Anchorage outside Fairway Buoy exposed in N.E. winds.
MAX. SIZE: Draft dependent on berth but max. 18 ft. at MLWS, and 19 ft. at MLWN. Oil tankers proceed to Ballylumford Power Station which lies across Larne Lough directly opposite Larne Harbour. Approach channel has depth of 30 ft. below datum and berth has 35 ft. below datum.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Portpatrick.
TUGS: 2 × 3.5 tons bollard pull tugs based at Larne, suitable for small vessels. As a rule tugs are not required for vessels using Larne Harbour. Tugs from Belfast serve oil tankers to Ballylumford.
BERTHING: 1 berth equipped with two 5-ton cranes for grabbing and general cargo work. 2 berths are equipped with cranes of 32 tons and 35 tons capacity for handling containers. 4 berths are equipped with ro/ro ramps, capable of taking loads up to 180 tons and ships up to 70 ft. beam.
STEVEDORES: Larne Harbour Ltd. carry out all the stevedoring. 24 hours' notice required for arrangements.
MEDICAL: No advance notice required for medical attention, a hospital being situated 1 mile from harbour. No special inoculations or certificates required.
TANKERS: 1 tanker berth in Larne Harbour. Depth alongside, 18 ft. below datum. Discharging only. LPG tankers max. LOA 171 ft., pipe diameter 4 in. For Ballylumford, see "Max. Size".
DENSITY: 1025.
FRESH WATER: Unlimited by shore hose. Rate 7 t.p.h. to 10 t.p.h.
FUEL: Fuelling carried out by road tanker. Arrangements to be made through ship's Agent.
GANGWAY/DECK WATCHMEN: Agents arrange watchmen.
OPENING/CLOSING HATCHES: Performed by crew.
CUSTOMS ALLOWANCES: Agents arrange with Customs.
IDENTIFICATION CARDS: Not required.
CONSULS: Consuls in Belfast can be contacted through ship's Agen
REPAIRS: Limited repairs by local firms. Major repairs by Belfast firms
REPATRIATION: Possible.
AIRPORT: 20 miles. Regular flights.
HOLIDAYS: 12th and 13th July, Easter Monday and Tuesday, 1st Ma Christmas Day, Boxing Day and New Year's Day. No cargo worked o these days.
POLICE/FIRE/AMBULANCE: Dial 999 and ask for Emergency servic required.
TELEPHONES: Only on Cross Channel vessels.
SHIP SUPPLY SERVICE: John McLoughlin & Son (Shipping) Ltd North End, The Harbour, Larne. Tel: Larne 3785 & 4085.

Ship supply and personnel transfer carried out by tugs and launches
DEVELOPMENTS: Common-user passenger terminal unde construction. Completion expected mid-1985.
AUTHORITY: Larne Harbour Ltd., 9, Olderfleet Road, Larne BT40 1AS County Antrim, Northern Ireland. *Tel:* (0574) 79221. *Contact:* Captai B. R. Dickinson, Harbour Master.

LEITH: 55.59 N. 03.10 W. (See Plan Boo

DOCUMENTS:
2 Report Forms (C. 13).
3 Stores Declarations (C. 14).
2 Crew Declarations (C. 142).
Crew Lists
Passenger Lists } As Required.

Also additional forms for specific circumstances, e.g. deck cargo livestock etc.

(Also see "Glasgow".)

PILOTAGE: Pilot station Firth of Forth located at Granton, boardin station West of Fairway Buoy at Long. 3° West. Contact with pilot cutters can be made on VHF Channels 16 and radio-telephone 2182. Pilotage not compulsory for vessels approaching South of Inchkeith Island.

Large vessels are normally docked 1.5 hours before HW. Vessels u to 20 ft. draft, dock at any time.
ANCHORAGES: Good holding ground at Inchkeith Island and Leit roadstead depths 8 m. – 19 m. at C.D. Request should be made to Fort Navigation Service.
RESTRICTIONS: None. Vessels can enter harbour day or night.
Lock: Entrance to the port is from the Firth of Forth through the entrance lock which is 259 m. long and 31.6 m. wide between fenders, depth over the outer sill MHWST 12.239 m.

The lock is operated 24 hours a day, 7 days a week.
MAX. SIZE: Governed by draft of vessels. Max. permissible draf alongside in Imperial Dock 9.1 m. and in Western Harbour 9.7 m., i dock water density is 1015.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Forth, Stonehaven and Cullercoats Radio Stations.
RADAR/VHF: Port and Estuary radar service. VHF contact can be made with Leith Harbour Radio on Channel 16. Forth Navigation Service must be contacted on VHF Channel 16 by vessels entering Forth Por Authority Seaward Limit (line joining North and South Carr Beacons).
TUGS: Attend inward-bound vessels in Leith roads. Tug's towline available and compulsory. Tugs on VHF Channels 16, 6, 8, 11, 1 and 14.
CRANES: 2×11 tonnes, 1×7.3 tonnes and 1×3 tonnes mobile diese cranes. Also see "Berthing".
BULK HANDLING FACILITIES: See "Berthing".
Grain Storage: Imperial Basin: 55,880 tonnes. Western Harbou (private) 53,848 tonnes.
STEVEDORES: ETA advices given by Master to ship's Agent an conveyed by them to stevedores.
MEDICAL: No advance notice of medical attention required. All hospita facilities available.
TANKERS: 1 tanker berth available – max. permissible draft 9.1 m. i dock water of density 1015. Discharge lines 6 in. and 8 in. No slo discharge facilities.
DENSITY: 1015.
FRESH WATER: Available alongside at all berths.
FUEL: All grades available subject to 24 hours notice in advance.
GANGWAY/DECK WATCHMEN: Usually supplied by ship but shor watchmen arrangeable by special agreement.
OPENING/CLOSING HATCHES: Custom of the port is that this work normally carried out by ship's crew.
CERTIFICATES:
Ship's Register.
Load-line.
Safety Radio.
Safety Equipment.
Cargo Construction.
Derat Certificates.
Light Dues receipt.
CUSTOMS ALLOWANCES: Usual amounts allowed by Customs an Excise.
CARGO GEAR: No additional requirements necessary to comply fu with local safety regulations as all gear supplied by stevedores.
IDENTIFICATION CARDS: Not required.
REPAIRS: Facilities available to carry out all types of deck and engin repairs.
DRY DOCKS: Largest dry dock "Imperial", length 167.6 m. width entrance 21.3 m. depth over blocks at 7.7 m. also 2 smaller dry docks

BERTHING:

REPATRIATION: All facilities available for effecting crew changes and repatriation by sea, air and rail.

AIRPORT: Edinburgh Airport served by regular airlines and located approx. 9 miles from Leith.

TIME: British Standard Time, GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: Public holidays observed annually: 3rd Monday in April; 3rd Monday in September; Christmas Day (25th December); 26th December; 1st, 2nd, and 3rd January. Cargo work can be arranged on public holidays except 1st and 2nd January.

POLICE/AMBULANCE/FIRE: Tel. 999 and ask for service required or call Leith Harbour Radio on VHF Channels 16 and 12.

TELEPHONES: Can be arranged with G.P.O.

SERVICES: Compass adjusting facilities available.

SHORE LEAVE: No restrictions.

DELAYS: Minimal delays in berthing, loading and discharging.

AUTHORITY: Forth Ports Authority, Tower Place, Leith, Edinburgh EH6 7DB. *Tel:* (031) 554 4343. *Telex:* 72681. *Cables:* Harbour Leith. *Contact:* Mr. J. R. Grant, Port Manager, Leith & Granton. I. T. Whale, Business Development Officer.

AGENT: John Denholm & Co. Ltd., 55 Constitution Street, Leith EH6 7AY. Tel: (031) 554 0651. After Hours: (050 682) 3555, (031) 337 1920, (0324) 553769. Telex: 77334.

LERWICK: 60.09 N. 01.08 W. (See Plan Book)

PORT LIMITS: All waters contained within the following boundaries including Dales Voe and Aith Voe.

Straight line drawn from the N.E. extremity of Hawks Ness (Lat. 60° 13′ 27″ N., Long. 1° 10′ 00″ W. approx.) in an E.S.E.'ly direction to the N.E. extremity of Green Holm and thence in a S.E.'ly direction to the N.E. extremity of Score Head in the island of Bressay. Thence in a W.'ly and S.'ly direction along the high water mark of all foreshores to Whinna Skerry (Lat. 60° 07′ 45″ N., Long. 1° 07′ 17″ W. approx.). Thence in a straight line in a W.'ly direction to the S. extremity of Ness of Sound. Thence along high water mark of all foreshores in a generally N.'ly direction to Hawks Ness.

BUOYAGE: Buoyage in Lerwick Harbour is IALA System "A".

DOCUMENTS: See "London".

PILOTAGE: *Pilot Office:* At foot of Victoria Pier in Harbour Master's Office. Lat. 60° 09′ N., Long. 1° 08′ W. Limits of Pilotage District similar to Port limits given above. Licenced Pilots always available on 24 hour service subject to following correct procedure given below.

Call Sign: Lerwick Harbour Radio.

Frequencies: Calling: VHF Channel 16. Working: VHF Channel 12. Pilot Cutter: VHF Channels 6, 11, 12 and 16.

Port Control: Fitted with VHF Channels 11, 12 and 16. Continuous watch is maintained 24 hours per day, 7 days per week on Channel 16 except when working vessels on Channel 12.

Procedure: The Port Control Office controls the movement of all vessels arriving or departing by either entrance and all movement within the harbour from public or private quays or supply bases, whether such vessels are under the control of Pilots or not.

(a) Vessels requiring pilotage should arrange with Agent not less than 24 hours before arrival. Vessels without Agent should contact Lerwick Harbour Master through Coast Radio Stations not less than 24 hours before arrival. Vessels leaving ports less than 24 hours steaming away should advise time of sailing, projected speed and ETA at time of leaving last Port. Vessels inward from Continental Shelf should advise time of leaving location, projected speed and ETA at time of leaving last location. Amended ETAs should be advised 2 hours before the time given in the last transmitted ETA. VHF contact should be made with Lerwick Harbour Radio while still 1 hour away when final pilotage and berthing arrangements will be made. Port control cannot guarantee a Pilot on station unless 1 hour's notice is given.

(b) ETA messages should also contain information on which harbour entrance is to be used, draft and length overall. Vessels entering by the South entrance will be boarded West of Kirkabister Lighthouse or near Knab Point if weather conditions are unsuitable. Vessels entering by the North entrance will be boarded abeam of the Green Holm and 0.5 miles N.E. of Beosetter Holm. If boarding conditions in this area are unsuitable the South entrance must be used.

(c) "Knab", 18 m. Dark blue hull, white upperworks. Pilot boat and tug, can be used for towing, bollard pull 8 tons.

(d) Outward vessels should call the Port Control 1 hour before departure when information on traffic movement will be given and arrangements for pilotage will be made. When moving within the harbour all vessels should maintain a continuous listening watch on Channel 16. All vessels moving within the harbour should report to the Port Control immediately prior to leaving the berth or anchorage, whether a Pilot is on board or not.

(e) Pilotage within Lerwick Harbour is compulsory, but all vessels not carrying passengers are exempt.

(f) Telephone number of Lerwick Harbour Master and pilot station is Lerwick 3462.

ANCHORAGE: Ample anchorages in harbour roads.
Inner South Harbour depth up to 60 ft.
Breiwick Bay (Inner South Harbour) depth up to 90 ft.

MAX. SIZE: Vessels up to 20 ft. draft and 320 ft. long alongside berth as routine. Vessels of greater length and for draft may be accommodated alongside after discussion with Harbour Master. Anchorages available for any size of vessel subject to prior consultation with Harbour Master, if above 10,000 g.r.t. No mooring buoys available.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Nearest Coast Radio Station "Shetland Radio" Frequency and other details as for "Wick Radio" except for VHF working Channel which is Channel 27.

"Lerwick Harbour Radio" see "Pilotage".

TUGS: No tugs available but Pilot cutter will give towage assistance within her capabilities.

BERTHING: Berths are available for the handling of most cargoes including Roll-on/Roll-off and arrangement should be made through Agents well in advance of arrival. No berths available for handling liquid chemicals. Mobile cranes available from Harbour Authority up to 30 tons capacity or through private operators to 110 tons capacity.

	Length	*Depth*
South Harbour	3,000 ft.	10 ft. to 35ft.
Shell & BP Bases, Holmsgarth	1,000 ft.	15 ft. to 25 ft.
Holmsgarth, 5 berths, including 2 Ro/Ro	3,000 ft.	18 ft. to 35 ft.
Norscot Base	2,000 ft.	18 ft. to 21 ft.
Ocean Inchcape	656 ft.	20 ft. to 24 ft.

STEVEDORES: Arranged through Agent.

MEDICAL: Medical aid can be arranged through Agent or Coastguard at any time day or night.

TANKERS: BP Oil have their own discharging berth. Tankers are also able to discharge at various offshore oil industry supply berths

DENSITY: Density 1025 at all states of tide.

FRESH WATER: Available at most berths, 65 t.p.h. to 100 t.p.h. No water boat.

FUEL: Gas oil available on demand.

FIRE PRECAUTIONS: No-smoking regulations in operation inside all transit sheds. Usual tanker terminal regulations in operation. Handling of explosives covered by local Bye-Law.

GANGWAY/DECK WATCHMEN: Ships usually supply own watchmen. No fixed sum if shore watchman is employed.

OPENING/CLOSING HATCHES: Crew open hatches.

CUSTOMS ALLOWANCES: Tobacco, wine/spirits; at the discretion of the Customs and Excise.

IDENTIFICATION CARDS: Foreign seamen have to supply same if left behind, i.e. hospital, etc.

CONSULS:

Denmark (Vice)	3057	Iceland	4121
Finland (Vice)	3057	Netherlands(Vice)	3057
France (Vice)	3057	Norway	3057
W. Germany	2556	Sweden	2556

REPAIRS: Repairs to fishing vessels and other small craft in steel, wood and fibre glass. Also engine and machinery repairs. Comprehensive electronics repair facilities.

DRY DOCKS: No dry dock available, slip available to take small vessels up to 100 d.w.t.

REPATRIATION: Facilities exist.

AIRPORT: 25 miles to airport. 5 services per day to Aberdeen operated by British Airways. Charter flights by Dan Air and other airlines.

Tingwall, 7 miles from Lerwick, Loganair Twin Otter service to Edinburgh.

HOLIDAYS: Scottish holidays. Working can be arranged on these days if so desired.

POLICE/AMBULANCE/FIRE: Emergency telephone 999 or call Port Control VHF Channel 16. Harbour Master and Port Control 3462 night or day.

COASTGUARD: Lookout on top of Knab Point manned 24 hours a day. Fitted with MF and VHF Radio Channels 16, 13, 10 and Zero.

TELEPHONE: Ships telephones can be arranged.

SERVICES: No tank-cleaning equipment. Compass adjuster can be procured if necessary.

SHORE LEAVE: No restrictions.

AUTHORITY: Lerwick Harbour Trust, 1/2 Alexandra Buildings, Lerwick ZE1 0LL. *Tel:* (0595) 2991, 2828, 3462. *Telex:* 75496. *Contact:* A. B. Laurenson, General Manager. Captain D. I. Polson, Harbour Master.

LIVERPOOL: 53.28 N. 03.02 W. (See Plan Book)

DOCUMENTS: Required on arrival, Crew List Form I.B.6 to be completed; this list to include all passengers and any British subjects who joined vessel outside of U.K. If any person falling into this category should be on board they must not leave until permission to land is granted by Immigration Officer.

Customs Form C.142, Declaration of goods obtained abroad or during a voyage, must be completed and signed by Master, and each crew member. Health Declaration must be completed. Above forms should be obtained from Pilot.

Manifest and Bills of Lading should be forwarded to vessel's Agent so as to be available before vessels arrival.

Ship's Papers Required:
Ship's Register.
Certificate for British Tonnage (if issued).
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
International Load-line Certificate.
Derat Exemption Certificate.

PILOTAGE: At least 48 hours before arrival, vessels should give ETA Lynas/Mersey Bar to Agents who will arrange docking and pilotage and advise the Master accordingly.

Pilot Stations: For vessels bound in from the South and West, Pilots board at Point Lynas, North Anglesey, using 40 ft. launches. Contact shore pilot station on VHF Channel 9 with call sign "Lynas Pilot".

For vessels bound in from the North, Pilots board in the vicinity of the Bar Lanby Buoy using launches. Contact shore pilot station on VHF Channel 11 (or 12) with call sign "Liverpool Pilot". It is essential to make this contact as early as possible.

Penalty charges operate for late arrivals, therefore Masters should keep ETA's updated and make contact by VHF as early as possible.

ANCHORAGE: In the event of berths not being readily available for vessels, normally they must wait at the Mersey Bar Anchorage which is in the open roadstead. There are river anchorages, but these are only usually for vessels about to enter the dock system.

RESTRICTIONS: No restrictions on night entry, except VLCCs, tidal restrictions depend on vessel's draft and to which berth vessel proceeding, larger vessels usually have to wait for HW.

MAX. SIZE: Tranmere: up to 41 ft. (12.5 m.) draft dependent on tide. Birkenhead: up to 28 ft. 6 in. (8.68 m.) draft. Liverpool Docks: up to 40 ft. (12.2 m.) draft.

Royal Seaforth Dock: 42 ft. (12.8 m.) of water depth, up to 75,000 d.w.t.

HEALTH: Maritime Declaration of Health Form must be completed and handed to Customs Officer or Port Health Officer, whoever first boards ship. This form is obtainable from Pilot. In event of any suspected disease or fever on board, or if ship has called during last 4 weeks at any port in Brazil, China, Indo-China, India, Pakistan, Burma, Colombia and the port of Dar-es-Salaam, West African ports between Lat. 20° North and 20° South, the Master should, prior to entering port, make radio contact with Liverpool Port Health Authority, via Anglesey Radio or Port Radar Station (Signal "Portelth Liverpool") giving them following information:

1. Name of Ship. 2. Date of departure from and name of last infected port. 3. Number, ages and sex of any cases of infectious diseases or other relevant information. 4. Expected time of arrival at Rock Light.

Before reaching the Rock Light if medical clearance has not been obtained the following signal must be displayed: by day – fly the flag signal "Z W". By night – show red light over white light.

When medical clearance is obtained Pratique will be issued at discretion of Customs Officer.

If there is no suspected disease on board and vessel has not called at any of the above ports listed, Master can radio for Free Pratique. Unless otherwise instructed, Customs Officer will again issue Pratique.

Vessels arriving from another U.K. port do not require Pratique or health clearance.

Also see "Health – All Ports" before first U.K. port.

RADIO: Portishead Radio, call sign: GKL; Landsend Radio, call sign GDL; Wick Radio, call sign: GKR; but on approaching Liverpool, the local radio station is Anglesey Radio, call sign: GLV.

RADAR/VHF: Vessels should establish contact by VHF/RT with the Port Radar Station call sign "Mersey Radio" before sailing and inward bound when within VHF/RT range and not later than when in the vicinity of the Bar Lighted Buoy.

Harbour Radar: The Liverpool Port Radar Station is situated at the N.W. corner of Royal Seaforth Dock 53° 27′ 56″ N., 03° 02′ 22″ W.

The radar coverage extends seaward over Liverpool Bay for a radius of 20 miles from the station and in the River Mersey as far South as the approaches to the Manchester Ship Canal.

Vessels entering or leaving the Port in conditions of low visibility can, on request, be supplied with continuous information of their position whilst navigating in the river or sea channels, providing such vessels can be identified.

A general situation and movement statement, giving all intended movements inwards and outwards for the Port of Liverpool, Eastham, Bromborough, Garston and Cammell Lairds and approximate times at the dock entrance or river berth, together with a list of Local Navigation warnings in force, latest weather reports and area forecast, is broadcast on Channel 9 at 3 hours before each high water. This full statement is repeated with any amendments and the disposition of the River Anchorages North and South at 2 hours before each high water.

Any local navigation warning is broadcast on receipt on Channel 12.

A full list of navigation warnings is broadcast on Channel 9 every 4 hours, commencing at 0001 hrs. No separate broadcast of this list is made during the period from 4 hours before high water to 1 hour before high water as such warnings are included in the General Situation and Movement Statement.

Docking Instructions: The VHF/RT Stations at the Dock Entrances and Stages are provided to facilitate docking and berthing operations and to provide direct communication between the Dock Master or Stage Master and a vessel. The Range of these stations is limited to a distance of 6 to 8 miles.

Tug Communications: Channels 8 and 10 are reserved for tug communications and should not be used for any other purpose. Due to the heavy working of these Channels, especially at tide time, and in order to minimise interference, vessels and their tugs when communicating to one another on VHF/RT, should, when possible transmit on reduced power.

Large Vessels Swinging: Vessels of 150 m. or over in length intending to swing in the river should give advance notice of at least 10 minutes to Mersey Radio of their intentions so that Mersey Radio can broadcast on Channel 12 a swinging warning to all ships.

Port VHF Radio Telephone Communications System:

Station	*Call Sign*	*Hague Channel Number*	*Remarks*
Liverpool Port Radar Station	Mersey Radio	16	Calling and safety
		12	Port Operations – Calling and navigation.
		9	Port Operations and routine broadcasts
		18, 22	Port Operations and Radar information
		19	Radar information and general, for tanker traffic for Tranmere only.
		4	Navigation Broadcasts. Transmitting Only.
			A continuous watch is kept on Channels 16 & 12 at Port Radar Station
Gladstone Dock Master's Office	Gladstone Dock	5	Port Operations and Docking Instructions.
Langton Dock Master's Office	Langton Dock	21	
Alfred Dock Master's Office	Alfred Dock	5

Eastham Locks Office	Eastham Locks	7	Port Operations and Docking Instructions
M.D. & H.C. Pilot Stations			
Point Lynas Shore Station	Lynas Pilot	16	Calling and safety
		9	Ship to shore.
Liverpool Control Centre	Liverpool Pilot	16	Initial calling
		12	Initial calling
		11	Calling & ship to shore

Local Priority Messages: A vessel which has an urgent message to transmit to Mersey Radio concerning urgent navigation matters and which message should receive priority over normal Port Operations R/T Communications, should indicate the urgency of the message by prefixing the call sign of the Port Radar Station with the spoken word "PRIORITY" i.e. "PRIORITY MERSEY RADIO" repeated 3 times followed by normal procedure.

In special circumstances such as the launch of a vessel or in an emergency such as a wreck, it may be necessary temporarily to establish a patrol for the control of traffic. Vessels will be warned of the existence of any such patrol by "Mersey Radio" and any such patrol vessels or launches will maintain a listening watch on Channel 12 and communicate with other vessels on Channel 6.

R/T Procedure

Channels to be Used for Calling and for Preparatory Signals: Mersey Radio and ship stations will call on Channel 12. Channel 16 should only be used for distress, urgency or safety communications.

Channels for Reply: Calls received on Channel 12 should be replied to on the same Channel, but if calls are received on Channel 16, replies should be made on this Channel.

Indication of the Channel to be Used for Radio Telephone Traffic: When communication has been established on Channel 12 between a ship and "Mersey Radio", the shore station will indicate the number of the Channel to be used for passing and receiving information if Channel 12 is busy.

Times: All times in messages should be given in local time, i.e. BST or GMT, using the 24 hour notation.

R/T Discipline: To ensure that the full advantage of efficient communication is achieved, strict telephone discipline and attention to procedure, particularly on the calling Channel is imperative. Channel 16 must only be used for establishing contact between ship and shore or ship and ship, and must not be used for the passing of messages except in cases of distress within Port limits. Channel 12 should be used for establishing contact between ship and shore or ship and ship.

Sequence of R/T Communication for Vessels Entering the River Mersey: (i) Vessels wishing to communicate with the Liverpool Pilotage District Point Lynas Shore Station should call "Lynas Pilot" on Channel 9. Channel 16 shall only be used in case of difficulty in establishing initial contact.

(ii) Vessels wishing to communicate with the Liverpool Pilotage Control Centre should call "Liverpool Pilot" on Channel 11 as early as possible.

(iii) When within VHF R/T range and not later than when in the vicinity of the Bar Lighted Buoy the vessel should establish contact with Mersey Radio on Channel 12 and pass her arrival information on Channel 12 or other Channel indicated by Mersey Radio, watch should be kept on Channel 12 unless instructed to remain on another working Channel for Port Operational reasons. A vessel at anchor at the Bar anchorage should keep watch on Channel 16.

(iv) Vessels requiring radar information or assistance will be requested to shift to Channel 18 or 22, or if a tanker for Tranmere, Channel 19.

(v) Vessels should inform Mersey Radio when they are ceasing to keep a listening watch on Channel 12. If they are shifting to a tug or a dock entrance or Tranmere Oil Stage Channel they should inform Mersey Radio of such intention.

Vessels Sailing from the River Mersey: Vessels, on sailing from any Stage or Dock, should establish contact with Mersey Radio on Channel 12 and then maintain watch on that Channel unless instructed to remain on another working Channel for Port Operational reasons. Vessels requiring radar information or assistance will be requested to work on Channel 18 or 22, or if a tanker from Tranmere, Channel 19.

TUGS: Join vessel after passing Rock Light. Normally use tug's lines but optional. Charge for tug's hawsers.

BULK CARGO FACILITIES: *Grain Berths:* Royal Seaforth Grain Terminal accommodates ships of up to 75,000 d.w.t. up to 250 m. overall length and 13 m. draft. Discharge is by 2 marine towers at up to 2,000 tonnes p.h. into 133,000 tonnes capacity silo. 2×750 tonnes per hour dischargers (Buhler) for animal feedstuffs at Berth S.2 storage capacity 30,000 tonnes.

Other grain berths include Birkenhead East Tower Berth accommodating vessels up to 192 m., draft 8.8 m.; Buchanan's Mill, max. length 145 m. (152 m. by arrangement), draft 8.7 m.; Ranks/Ocean Mill, max. length 144.7 m. (152 m. by arrangement), draft 8.7 m.; Spillers Mill, max. length 137 m. (152 m. by arrangement) draft 8.7 m.

Grab Cargoes: (Minerals, ores, coal, meals, etc.).

N.3 Huskisson Branch Dock: 2 berths for vessels up to 9.3 m. draft, each equipped with 4 grab cranes.

S.E.2 Alexandra Dock: Vessels up to 8.84 m. draft, equipped with 3 grabbing cranes for handling animal feeding stuffs; discharge to road via hoppers and direct by conveyor to silo storage.

E. Bramley Moore: 2 × 5 tonnes grabbing cranes for handling vessels up to 3,000 tonnes d.w.t. and 5.8 m. draft. Discharge direct to road vehicles.

North Bidston Dock: Quay length 305 m., 8.7 m. draft, max. length 192 m., 3 transporters each with an hourly digging capacity of 350 tonnes discharging to road or rail via 175 tonnes hoppers or into coasters or barges.

Cavendish Quay: 2 × 20 tonnes level luffing jib cranes with a grabbing capacity of 15 tonnes. Each designed to handle up to 450 t.p.h. Loading to road or rail with 2 × 100 tonnes capacity mobile weigh hoppers.

Duke St. Wharf: Vessels up to 8.7 m. draft discharged by 2 × 7.5 tonnes electric level luffing cranes.

BULK LIQUID FACILITIES: *Tranmere:* Petroleum oils at Tranmere South Stage, accommodating tankers up to 115,000 tons displacement, max. draft 11.1 m. plus height of tide and Tranmere North Stage accommodating tankers after lightening up to 210,000 tons displacement, max. draft 12.0 m. plus height of tide.

Liverpool: N.2 Gladstone (edible oils, 2 berths total quay length 376 m., 12.8 m. draft).

S.1 Canada (edible oils and molasses, up to 213 m. length, 9.75 m. draft).

S.E. Nelson (wines and spirits for vessels up to 99.1 m. length, 6 m. draft).

S.E. Salisbury (edible oils for vessels up to 6 m. draft).

Birkenhead: N. Alfred (8.6 m draft, edible oils).

Ilchester Wharf (8.6 m. draft).

E. Lewis (edible oils and molasses for vessels up to 195 m. in length, 8.7 m. draft).

SPECIALISED CARGO HANDLING FACILITIES: *Containers:* The container terminal at Royal Seaforth Dock has a continuous quay 1,100 m. in length, served by 6 gantry cranes and a fleet of straddle carriers working to a 22 ha. container park supported by a 26 ha. back-up area. Tractor trailer units are used to feed the integral Freightliner Rail Terminal.

Containers can also be handled at all general cargo berths.

Timber and Forest Products: At the Royal Seaforth Timber Terminal, 610 m. of continuous quay are served by 4 × 10 tonnes cranes discharging packaged timber to a 20 ha. stacking and back-up area. Two sheds provide covered storage of 9,290 sq.m. for plywood, pulp-kiln-dried timber.

Roll-on/Roll-off: There are 13 berths in the port with Roll-on/Roll-off ramp facilities; Royal Seaforth, S.3, S.6 and S.10; Gladstone No. 3, North Hornby. S.W. and N.W. Alexandra, E. Langton, N.E. 3 Canada, S.E. Nelson, S.E. Trafalgar, S.W. Princes and S. Bidston (Birkenhead).

Heavy and Indivisible Loads: Good road access and specialised facilities include 3 berths strengthened to accept loads of up to 300, 400 and 1,000 tonnes respectively.

STEVEDORES: Earliest possible ETA to be given to arrange gangs.

TANKERS: See "Bulk Liquid Facilities".

DENSITY: River Mersey salt water. Docks approx. 1020.

FRESH WATER: Available at all berths, ex-quay. No water barges available. Rate of delivery 15-20 t.p.h.

FUEL: Most major oil companies are represented and can supply range of fuels of various viscosities. Notice required depends on the berth at which vessel is lying as bunkers are supplied ex-lighter at most berths. Notice required can vary depending on availability of barges, but generally at least 3 to 4 days notice is required.

FIRE PRECAUTIONS: Tankers may not carry out repairs whilst at discharging berth unless permission is obtained from Harbour Authorities. Fire precautions notice is placed on board by Harbour Authorities.

GANGWAY/DECK WATCHMEN: Watchmen not necessary but available if required.

OPENING/CLOSING HATCHES: Carried out by ship's crew for bulk cargoes and by stevedores for general cargoes.

CERTIFICATES:

Register/Certificate of Measurement.
Certificate of British Tonnage (if issued).
Safety Radio Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Load-line Certificate.
Derat Certificate.
Cargo Gear Test Certificates.

CUSTOMS ALLOWANCES: Crew members who remain on vessel during vessel's stay in port may be allowed, under certain conditions, to keep for their own use on board small quantities of any tobacco, spirits and other goods declared on Customs Form C.142. The amount allowed depends on the number of days the vessel is in port.

CARGO GEAR: Cargo Gear Certificates must be produced with the necessary up-to-date endorsement.

IDENTIFICATION CARDS: Not required.

CONSULS: The following countries have representatives in Liverpool:

Australia
Belgium
Bolivia
Brazil
Chile
Colombia
Denmark
Dominican Republic
Ecuador
El Salvador
Finland
France
Germany (Fed. Rep.)
Greece
Haiti
Iceland
India
Japan
Lebanon
Liberia
Monaco
Netherlands
Nigeria
Norway
Panama
Paraguay
Peru
Philippines
Spain
Sweden
Thailand
Uruguay
Venezuela

SURVEYORS: (1) Caleb Brett and other companies available. (2) Lloyds, A.B.S. and B.V. are available.

REPAIRS: All types of deck and engine repairs can be carried out.

DRY DOCKS: Largest (Cammel Laird) – length 950 ft. × 140 ft. Also 7 smaller dry docks (M.D.H.C.).

REPATRIATION: Can be effected, but must be arranged through Agent, so that Immigration Clearance can be arranged.

AIRPORT: City Centre to Airport approximately 7 miles, regular service to London for international connections.

Regular Services from Liverpool Airport to:

Aberdeen	Air Ecosse
Amsterdam	Genair
Belfast	British Midland
Brussels	Jersey European Airways
Cork	Jersey European Airways
Dublin	Jersey European Airways
Dublin	Air Lingus
Isle of Man	British Midland
Jersey	British Midland
Gatwick	Genair
Heathrow	British Midland
Stansted	Jersey European Airways
Newquay (Cornwall)	Genair

(the above are all passenger services with the exception of Dublin which is mainly freight).

TIME: British Standard Time, which is 1 hour in advance of Greenwich Mean Time, reverting to GMT in Winter months.

HOLIDAYS: Good Friday; Easter Monday (movable); 1st Monday in May; last Monday in May; last Monday in August or first Monday in September, whichever may be closest to August 31st. December 25th-26th and New Year's Day. Weekly holidays Saturday, Sunday. Cargo can be worked on official holidays, other than 25th-26th December, also arrangements can be made for cargo to be worked on Sundays.

MEDICAL: If doctor is required to attend immediately on arrival of vessel, prior notice will be required, but generally doctor is arranged for most convenient time after vessel's arrival.

Hospitalisation is available, but seamen will only be admitted if immediate treatment is required. It is preferred for foreign seamen requiring hospital treatment to be repatriated, if able to travel.

Dentist available by appointment only.

POLICE/AMBULANCE/FIRE: Telephone 999, ask for service required.

EMERGENCY CO-ORDINATION CENTRE: "Formby Coast Guard" Tel: Formby 72903 – 72902 – 70724.

TELEPHONES: A temporary telephone can be placed on board a vessel, at most berths, whilst in port.

SERVICES: Compass adjusting, D.F. calibration can be arranged.

BANKS: Allied Irish Bank Ltd, 5/9 Renshaw Street, Liverpool 1; Banco Exterior C A, 6 Victoria Street, Liverpool 1; Bank of Credit & Commerce, International (Overseas Ltd), 41 Castle Street, Liverpool 2; Bank of Ireland, 25 Victoria Street, Liverpool 1; *Citibank Trust Ltd, Tower Buildings, 22 Water Street, Liverpool 2; *American Express International, Travel Agents, Lord Street, Liverpool 2.

*Not Banks as such but possibly undertake closely allied functions.

STORING: See "Prelims" page viii.

1. All vessels can be stored by either barge or truck.
2. Barge storing at Tranmere Oil Stages is restricted to "Approved" barges.
3. Trucks do not always have direct access to vessels by driving along quayside. Approach may be via sheds.
4. Forklift trucks can be used in most cases.
5. As per British Customs Regulations.
6. Riggers can be employed.

SHORE LEAVE: All bona fide crew members may be granted temporary shore leave during the vessel's stay in port, on condition that they leave in the same ship. This permission does not apply to any alien member of the crew who is refused leave to land by an Immigration Officer, or to whom an Immigration Officer has given notice prohibiting him from landing without leave.

SHIP SUPPLY SERVICE: Alexandra Towing Co. Ltd., Castle Chambers, 43 Castle Street, Liverpool 2. Tel: 051-227 2151.

Carmet Tug Co. Ltd., Lock Head, Bromborough, Wirral. Tel: 051-645 5579.

Manor Diving and Marine Services Ltd., Customs House, Four Bridges, Birkenhead, Merseyside. Tel: 051-647 8300.

Rea Towing Co. Ltd., Odyssey Works, Corporation Road, Birkenhead, Merseyside. Tel: 051-647 6263.

In addition the Port of Liverpool has the Buoyage Tender and Salvage vessel "Vigilant" which has fire fighting capability and is classed 100 A1 for River Mersey and Liverpool Bay Service.

AUTHORITY: The Mersey Docks and Harbour Company, Port o Liverpool Building, Pier Head, Liverpool L3 1BZ. *Tel:* (051) 200-2020 *Telex:* 627013 MDH G. *Contact:* Captain K. J. Lewis, Marine Operation Manager (*Tel:* (051) 200-2114).

AGENT: Lambert Brothers Ship Agencies Ltd., Peel Hous 5 Harrington Street, Liverpool, L2 9UG. Tel: 051-236 7206. Tele 629510. Cables "Lambert Liverpool".

LOCHMADDY: 57.36 N. 07.11 W.

PORT LIMITS: Lochmaddy Bay.

PILOTAGE: Pilot can be arranged if required. VHF Channels 16 and 12 Tel: 087 63 337/282/226.

ANCHORAGES: Available in Lochmaddy Bay.

RADIO: Skye Radio.

VHF: Lochmaddy Harbour on Channels 16 and 12.

RADAR: No radar service.

TUGS: None.

BERTHING: Length of berth 220 ft. Depths alongside at LWS: East en 20 ft., West end 8 ft.

CRANES: Available by arrangement. 10 ton lift.

BULK CARGO/SPECIALISED CARGO-HANDLING FACILITIES None.

BRIDGES: None.

MEDICAL: Doctor and hospital available.

TANKERS: No facilities.

DENSITY: Salt water.

FUEL: Gas oil available. Tel. 087 94 238.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS/DRY DOCKS/SURVEYORS: None.

GANGWAY/DECK WATCHMEN: Available if required.

HATCHES: Opening/closing carried out by crew.

AIRPORT: 20 miles to Benbecula Airport.

POLICE/AMBULANCE/FIRE: Police Tel: 087-63-328. Ambulance Te 087-63-324. Fire Tel: 0463-2222722.

SERVICES: None.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Required.

REGULATIONS: None.

SHIP SUPPLY SERVICE: Crew members, and essential stores can b transported between ship and shore at Lochmaddy by launch. Ship requiring such service should contact Harbour Office. VHF Channel 1 or Telephone 087-63-337 or 282, and at night 087-63-226.

DEVELOPMENTS: Ro/Ro to be fitted by 1985.

AUTHORITY: Western Isles Islands Council, Harbour Offic Lochmaddy, N. Uist. *Tel:* Office 087-63-337 and 087-63-282. Afte Hours 087-63-226. *Telex:* 777273. *Contact:* J. M. Robertson, Harbou Master.

LONDON and Thames District: 51.30 N. 0.05 W.

(See Plan Book

PORT LIMITS: The seaward limit means lines drawn fro Lat. 51° 37′ 00″ N., Long. 00° 57′ 19″ E. (Foulness Point in the county o Essex) to Lat. 51° 46′ 05″ N., Long. 01° 20′ 32″ E. (Gunfleet o lighthouse) and thence to Lat. 51° 26′ 36″ N., Long. 01° 25′ 30″ E. an thence to Lat. 51° 24′ 55″ N., Long. 00° 54′ 21″ E. (Warden Point in th county of Kent).

An arrived ship is considered (subject to Charter Party terms) to hav arrived when vessel is instructed to anchor at a designated anchorage as ordered by the Port Authority, if berth where vessel's operations ar to be carried out is not available. Otherwise when vessel is alongside Usual anchorage for larger vessels is below Southend, which i allocated to vessels by the Port Authority.

DOCUMENTS:

1 copy of H.M. Customs and Excise form C.142 to be complete showing each crew members declaration as to the amount o cigarettes, tobacco, spirits, wine, radios, lighters, etc., belonging t them on board the ship to enable Customs to ascertain if i conformity or excess of requirements.

1 copy of IMO Crew List.

1 copy of List of Passengers on board, showing names, place o joining vessel, passport details.

Ship's Register to be available for inspection on arrival.

List of space occupied by cargo in unregistered spaces.

Chief Engineer's declaration as to the quantity of fuel carried in doub bottom tanks.

Details of any livestock on board.

Ship's Stores declaration arrival Form C.14 to be completed.

Details of previous ports of call.

PILOTAGE: Pilotage by licensed Pilots in London Pilotage District i compulsory unless previous exemption is granted.

Vessels approaching from South enter the pilotage area o Folkestone Harbour, position (Lat. 51° 04′ 37″ N., Long. 01° 11′ 21″ E.)

Vessels approaching from the North collect the Pilot at Sunk Pilo Cutter which operates in the vicinity of the Sunk Light Vessel o Harwich.

Radio Communication – General: The maximum range for radio messages is about 20 miles for VHF. The shore Pilot stations and shore based fast launches operate on VHF only.

Attempts to establish communication at extreme ranges cause much unnecessary interference. The first estimated time of arrival should be sent through a Post Office Coast Station giving at least 1 hours' notice of the ETA. Anything less than 1 hour's notice *must* involve ships in delay. The maximum range for MF radio messages is about 50 miles.

Ships should if possible remain in direct contact with the pilot launch or pilot vessel on their approach, as this facilitates shipping the Pilot.

SUNK PILOT STATION

The Sunk Pilot Cutter, painted black with a buff funnel and the word "Pilots" painted on her sides in white and at night exhibiting lights and signals in accordance with Rule 29 of the International Rules for the Prevention of Collision at Sea, cruises in the vicinity of the Sunk Light vessel to provide Pilots for ships heading for the Port of London and other ports in the London Pilotage District, and disembark Pilots from outward bound ships. In very severe weather the Cutter may move to smoother water, usually in the vicinity of the West Sunk or Gunfleet Spit Buoys. In these circumstances shipping is warned by means of radio navigation warnings from North Foreland, Humberside and Scheveningen radios, which gives the cutter's position.

The attention of Masters is drawn to the requirement of providing a satisfactory lee for the pilot cutter's boarding boats. These 18 ft. boats have a maximum speed of 5 knots.

Contact procedure:– Vessels wishing to contact the pilot vessel at the Sunk by radio telephony direct may:

(i) when within M/F range (approximately 50 miles) call the cutter on 2182 kHz (M/F). The working frequency is 2241 kHz.

(ii) when within VHF range (approximately 25 miles) call on Channel 16. The working frequency is Channel 6.

The Sunk Pilot Cutter may also be contacted by either W/T or R/T through any Post Office Coast Station addressed "Sunk Pilot" via North Foreland Radio. Alternatively messages to the Harwich Pilot Station, telephone Harwich (02555) 3129 or 6300, or telex, Pilots Harwich 98472, will be passed direct to the Sunk Cutter.

The attention of Masters of VLCCs is drawn to the special arrangements for Pilot boarding described below:–

VLCCs requiring a Pilot at the Sunk Station should give the Pilot vessel 12 hours' in advance and through a Post Office Station or the Harwich Pilot Station, their ETA, g.r.t. and Port of Destination. Confirmation of ETA should be given at least 2 hours before arrival. Anything less than 2 hours' notice will involve ships in delay.

Pilot Boarding Arrangements for VLCCs:–

The Masters of all VLCCs requiring a Pilot at the Sunk Pilot Station are requested to comply with the following directions so as to ensure that the boarding operation can be carried out with the minimum inconvenience to the ship and the optium safety.

The Master of the VLCC should establish voice contact with the Sunk Pilot Cutter at the earliest possible time.

The Sunk Pilot Cutter will advise the Master:–

(a) The position in which the Pilot will board and the time of boarding.

(b) The mode in which the Pilot will board, i.e. with the VLCC at anchor or under way. If under way then the speed ordered should be minimal consistent with maintaining steerage way.

In the interests of safe boarding of the Pilot, the VLCC should not proceed inwards of the agreed boarding position.

Vessels bound for the Thames from Rotterdam or ports North of Rotterdam may embark their Pilot at the previous port. Vessels requesting this facility should contact Harwich Pilots, telephone Harwich (02555) 3129 or 6300, telex Pilots Harwich 98472, giving as much notice as possible, stating name and draft of vessel, port and terminal of embarkation, ETD, and whether or not North Sea pilotage is required.

FOLKESTONE PILOT STATION

Pilot launches, with black hulls and white wheelhouses and flying the pilot flag, operate from a shore station at Folkestone to provide Pilots for ships making the port of London and other ports in the London Pilotage District and to disembark Pilots from outward bound ships. The conspicuous building is 77 ft. high and flies a pilot flag by day; by night it displays an illuminated sign with the word "Pilots". The launches normally ship and land Pilots in a position 225° distant 1 mile from Folkestone Pier Light in fine weather but farther off in bad weather.

A shore VHF station is maintained at Folkestone (Lat. 51° 04′ 37″ N., Long. 01° 11′ 26″ E.), and all requests to ship and land Pilots off Folkestone should be made to it.

Ships requiring a Pilot at the Folkestone Station should give the shore station, 12 hours in advance and through a Post Office Coast Station, their estimated time of arrival, gross tonnage, maximum draft and port of destination. Any adjustment to this time should be given at least 2 hours before arrival. The message should be addressed to "Pilots Folkestone".

The following Channels are in use by Folkestone Shore VHF station (call sign "Folkestone Pilots Radio"):

Channel 16 (Calling): A 24 hour listening watch is kept on this Channel, and ships should make contact on it.

Channel 9 (Working): After initial contact has been made on Channel 16, a transfer should be made to Channel 9 for the exchange of operational messages. It is stressed that the shore station has no other working frequency and that ships wishing to communicate with it must have Channel 9 fitted.

Masters of ships approaching Folkestone are advised to maintain a listening watch on Channel 16 so that they can receive any messages for their ships from the pilot station.

Masters are warned that it is difficult to receive VHF signals from Folkestone when their ships are to the Westward of Dungeness owing to the presence of very large buildings.

The station is manned by a duty Pilot and is equipped with telex, telephone, radar and a daylight signalling lamp. The communications details are:

Tel. Folkestone (code 0303) 56766.
Telex 96381, Pilots Folkestn.
Telegraphic address "Pilots Folkestone".

Ships without VHF should send any amendment of their ETA in sufficient time to allow its delivery through the Post Office telex network. Ships without VHF should also establish their identity by visual means during their final approach.

If requested Folkestone Station Pilots may also be embarked off Brixham 1.5 miles N.E. of Berry Head in position Lat. 50° 24′ N., Long. 03° 27′ W., or off Cherbourg at buoy "CH I" in position Lat. 49° 43′ N., Long. 01° 40′ W. 24 hours notice is required by Folkestone Pilot Station for picking up at Brixham, and 36 hours for Cherbourg.

Should a deep drafted vessel not wish to approach too closely to the Folkestone Pilot Station, then the pilot cutter will meet the vessel 1 mile to the S.E. of the East Road port red can lighted buoy, Gp. Fl. 4 red every 15 seconds, which is moored about 4.75 miles N.E. of Dungeness in position Lat. 50° 58′ 18″ N., Long. 01° 03′ 48″ E.

N.E. SPIT.

Ships bound to or from ports between Amsterdam and Dieppe inclusive may land or ship their Pilots by means of a pilot launch which operates as required, but does not cruise, in the vicinity of the N.E. Spit Buoy, but it is emphasised that ships from beyond these 2 ports or bound to ports beyond them are required to ship or land their Pilots at the Sunk or Folkestone Pilot Stations.

A shore VHF station operates from North Foreland Lighthouse (Lat. 51° 22′ 27″ N., Long. 01° 26′ 49″ E.) which is linked by land-line to the pilot station at Folkestone. The call sign is "North East Spit Pilots Radio" and the only Channel available is Channel 9. A 24 hour listening watch is kept on this Channel.

Advance notification of ships requiring services of a Pilot at the N.E. Spit should be given 6 hours beforehand through a Post Office Coast Station, addressed "Pilots Folkestone", or by telephone to Folkestone (code 0303) 56766 or telex 96381.

"North East Spit Pilots Radio" should then be contacted when within VHF range.

Communication with North East Spit pilot launch may be made on Channel 9 VHF. A ship about to ship or land her Pilot should keep in radio contact with the pilot launch.

Ships without VHF should send their ETA or any subsequent amendment in sufficient time to allow its delivery through the Post Office telex network.

The N.E. Spit Pilot will board vessels between the "Elbow Buoy" and the "N.E. Spit Buoy", depending on weather, from a fast launch which is based in Ramsgate Harbour.

RIVER MEDWAY

Messages for the Medway Pilots may be passed through the launches of the Medway Ports Authority, call sign "Medway Patrol". They keep a continuous watch on 2,182 kHz.

Ships bound for the River Medway are requested to call on 2,182 kHz., when 20 – 30 miles from Sheerness, stating their estimated time of arrival, requirements and draft. When contact has been made on 2,182 kHz ships should transfer to 2,241, 2,246 or 2,301 kHz or other licensed intership frequency for passing messages. Ships may also call the Medway Port Operations Service, call sign Medway Radio, when within 20 miles of Sheerness, on VHF Channel 16, transferring to Channel 14 for passing messages.

RIVER THAMES

Sea Pilot leaves vessel at Gravesend when River Pilot boards for final river passage.

PROCEDURE FOR OBTAINING THE SERVICES OF A LICENSED TRINITY HOUSE CHANNEL PILOT.

Ships outward bound from above Gravesend: Masters are requested to give advance notice of estimated time of arrival at Gravesend. Masters of ships fitted with VHF may pass this information direct to Gravesend Radio on the appropriate Port Operations Channel.

Channel Pilots for outward-bound ships are obtainable only from the Royal Terrace Pier, Gravesend, from where they board ships by means of black-painted pilot vessels flying the pilot flag, in response to the statutory signals or a VHF message to Gravesend Radio. In thick or foggy weather 1 prolonged blast followed by 4 short blasts should be sounded by means of a whistle or fog horn or a VHF message should be sent to Gravesend Radio.

In addition to the above, the following signals should be displayed:

	By day	*By night*
Ship's gross registered tonnage	*International Code pendant*	*White lights*
Not exceeding 2,000	—	1 over the starboard bow
Exceeding 2,000 but not exceeding 6,000	3	1 over the bridge
Exceeding 6,000 but not exceeding 12,000	2	1 over the starboard bow and 1 over the bridge
Exceeding 12,000	1	1 over the starboard bow

Ships outward bound from below Gravesend or shifting between the Nore or Sheerness and Gravesend: When the services of a Channel Pilot are required for shifting a ship inwards between the Nore and Sheerness and Gravesend, or for conducting a ship outwards from below Gravesend, a telephone message should be sent to the Channel Pilots, tel. Gravesend (0474) 3619, stating Name of ship. Time and place at which Pilot is required to join ship. Where bound, Ship's gross tonnage. Ship's draft.

It is particularly stressed that the Pilot must be given adequate time to travel from Gravesend to the ship for her time of sailing, and that allowance must be made for the slowness of night travel and the inaccessibility of some wharves and moorings.

PROCEDURE FOR OBTAINING THE SERVICES OF A LICENSED TRINITY HOUSE RIVER THAMES PILOT.

Duty Pilot: A Trinity House River Thames Duty Pilot is available in the Information Room at the Gravesend pilot station. He can be contacted by telex (Pilot Gravesend 96444) or by telephone Gravesend (0474) 67716/7. Among his duties is the provision of information to Shipowners and Agents, and the Duty Pilot will be pleased to give advice and guidance on the pilotage of ships in the River. The Duty Pilot is in continuous touch with the Duty Officer of the Thames Navigation Service.

Ships outward bound or shifting: When the services of a Trinity House River Thames Pilot are required for piloting a ship down river to Gravesend, or for shifting a ship in the river above Gravesend, a telex message should be sent to Pilot Gravesend 96444. If the message cannot be passed by telex the same information should be given by telephoning Gravesend (0474) 67716/7.

The telex message must start with the word "Pilot" to show that it is an order for a Pilot, and to be consistent with other information now received at the pilot station by telex, should be in the following form:

1. *Order for Pilot.* The word "Pilot" should be used to show that it is an order for a Trinity House Pilot rather than general information on expected movement. This should be on a separate line from the other information.

2. *Time Pilot required.* This should be expressed as a time on the 24-hour clock followed by a date, e.g. 1035/15 or 2215/16.

3. *Ship's Name.*

4. *Draft.* This should be given in feet.

5. *Berth where lying.* If a shift is required the shift should be shown as "FM Smiths WHF to Jones WHF". If one location is given this is the place where the ship is lying and where the Pilot is required. The abbreviation FM (From) should precede the place where the ship is lying in all messages.

6. *Route or where is bound.* This should state N., S., or E. to show where ship is bound, i.e. N. for ships outward bound to the North, S. for ships outward bound to the South, and E. for ships outward bound to near continental ports between Amsterdam and Dieppe. If an outward Channel pilot is required the letter "P" should be added so that it reads NP, SP or EP.

7. *Name of Owner or Agent.*

The message should start with the heading of "Pilot" and should continue as follows:

Time	*Ship*	*Draft*	*Berth*	*Route*	*Agent*
2030/15	*Tasman*	13	FM Robinsons WHF	S	E. Wright
0010/16	*British Isles*	18.5	FM Hightown Tier	NP	Despatch Co.
0830/17	*Nicola*	14	FM Black Bys to Spring WHF		Noel S.S. Co.

It is particularly stressed that the Pilot must be given adequate time to travel from Gravesend to the ship for her time of sailing, and that allowance must be made for the slowness of night travel and the inaccessibility of some wharves and moorings. Normally a minimum of 3 hours is required.

Inward bound ships: It is most important that all inward bound ships notify their estimated time of arrival at Gravesend and keep this information up to date. An estimated time of arrival should be given by using the Post Office public correspondence service through North Foreland Radio at least 3 hours before arrival at Gravesend and preferably immediately after the embarkation of the Sea Pilot. When in VHF range this information may be passed direct to Gravesend Radio on the appropriate port operations channel. In addition the following supplementary information should be communicated: draft, and, if known, berth and name of Agents.

Trinity House River Thames Pilots for inward-bound ships are obtainable only from the Royal Terrace Pier, Gravesend, from where they board ships, by means of black-painted pilot vessels flying the pilot flag, in response to the statutory signals or a VHF message to Gravesend Radio. In thick or foggy weather the letter "G" in Morse code should be sounded by means of a whistle or fog horn or a VHF message should be sent to Gravesend Radio.

Table of Abbreviations: Abbreviations used in this notice are:

FM=From. WHF=Wharf. N=The route of an outward ship is to the North. S=The route of an outward ship is to the South. E=The route of an outward ship is to near continental port between Amsterdam and Dieppe. NP=The route of an outward ship is to the North and she requires a Channel Pilot. SP=The route of an outward ship is to the South and she requires a Channel Pilot. EP=The route of an outward ship is to the East and she requires a Channel Pilot. Bys=Buoys.

Pilot Ladders: Instances of the use of unsatisfactory and unsafe pilot ladders continue to be reported by Trinity House Pilots.

Faulty ladders endanger the lives of Pilots.

Instructions have been issued to all Trinity House Pilots to report immediately any pilot ladders which do not comply strictly with the provisions of the Merchant Shipping (Pilot Ladders) Rules 1965, the Merchant Shipping (Pilot Ladders) (Amendment) Rules 1971 and the Merchant Shipping (Pilot Ladders) (Amendment) Rules 1972.

Masters of ships are reminded of their obligation to comply with the statutory rules and are requested also to comply with the following Trinity House recommendations, ensuring that:

1. The Officer responsible for the embarkation and disembarkation of the Pilot is a Watch-keeping Deck Officer.

2. The ladder is in one length and does not consist of two or more lengths shackled or lashed together.

3. The ladder is secure.

4. The ladder is used solely for embarking and disembarking Pilots.

5. A light is provided so that the pilot ladder overside and also the position where the Pilot boards the ship is adequately lit.

6. The ladder is clean and free from oil and grease.

7. Means are provided to enable the Pilot to pass safely and conveniently from the head of the ladder into the ship or on to the ship's deck. Where portable stanchions and accompanying bulwark step ladders are used for this purpose, the portable stanchions *must* be rigidly secured to the ship's structure against being unshipped and supported at not less than 2 points to prevent lateral movement, and the bulwark step ladder should also be independently attached and firmly secured. The stanchions should be of reasonable height and adequately capped to allow firm grip. *Under no circumstances should a stanchion or handrail be attached to the bulwark step ladder.*

8. The ladder is in good condition and its treads remain horizontal. The treads are to have a rough upper surface.

9. The length of the ladder does not exceed 30 ft. Whenever the distance from sea level to a point of access to the ship is more than 30 ft., access from the pilot ladder to the ship must be by means of an accommodation ladder or other equally safe and convenient means.

10. The ladder is rigged so that each step rests firmly against the ship's side.

11. Spreaders are provided not more than 10 ft. apart to prevent the ladder twisting.

12. 2 manropes and a safety line are provided; and a lifebuoy with self-igniting light is available.

13. The ladder is rigged well clear of discharges and water outlets, and at a place where most lee can be given to the Pilot Vessel.

14. Where a pilot hoist is used a ladder must be at hand ready for use in case the hoist fails.

The Masters of small, "all-aft" ships, in which the main deck is frequently awash when a Pilot is being shipped or landed, or of any type of ship in which the bulwark rails are below the deck of the pilot vessel coming alongside, are asked to provide a boarding platform on each side of the forward end of the raised quarter deck and on the same level as that deck.

The platform should be easily accessible from the quarter deck and should have adequate handrails, those on the outboard side being portable. Fittings should also be provided for the rigging of a pilot ladder. When a pilot ladder is rigged from a boarding platform the top rung of the ladder should not be less than 12 in. nor more than 15 in. below the level of the platform. The top of the ladder should be secured at least 3 ft. 6 in. above the platform in such a way as to make a safe handhold for the Pilot entering or leaving the platform.

If a pilot ladder is unsafe a Pilot may refuse to board, thus delaying the ship. If the ladder is unsatisfactory for boarding the Master of that ship renders himself liable to a fine of double the amount of the pilotage dues involved, for failure to comply with the Pilotage Act 1913; and if the ladder does not meet the statutory requirements, the Master renders himself liable to a fine not exceeding £50 in accordance with the Merchant Shipping Act 1984.

THAMES NAVIGATION SERVICE:

Traffic Co-ordination Centre, Gravesend: This centre programmes all movements within the port, including the docks. All information required by the Authority regarding ETA, ETD, etc., should be passed through this Centre. Also deals with all matters concerning provision of tugs in docks, dummy pontoons, or other services for vessels in dock, moorings in the river and any enquiry reference bye-laws, regulations, etc.

Gravesend Radio: VHF R/T Channel 16, Working Channels 12, 18 and 20.

Radar coverage – Erith to Tongue Anchorage. Information supplied on request.

All vessels to report to this station on entering the port or before leaving the berth and whilst manoeuvring in the River. Also report position at stated intervals at points laid down in Notice to Mariners and Way Points on Admiralty Charts.

Tidal heights – Tilbury to Estuary given on request and included in navigation broadcast given every 30 minutes on the hour and half-hour.

Woolwich Radio: VHF Channel 16; Working Channels 14 and 22. All vessels entering the area above Crayfordness leaving the berth, manoeuvring and whilst on passage, report to this station.

Navigation broadcast given every 30 minutes at 15 minutes and 45 minutes past the hour.

Receives advance warning of intention to pass through Thames Flood Barrier.

Tidal heights at North Woolwich given on request.

Radar coverage Greenwich to Erith: This station is situated adjacent to the Thames Barrier on the south side of Woolwich Reach. It exercises traffic control over ALL vessels and craft wishing to proceed through the Barrier Control Zone which extends from Margaretness to Blackwall Point. All vessels intending to navigate through the barrier must pass their ETA's to Woolwich Radio on VHF Channel 14 when:

(a) Passing Crayfordness Point inward bound.
(b) On leaving a berth which lies between Crayfordness Point and Margaretness Point inward bound.
(c) When clearing Tower Bridge outward bound.
(d) On leaving a berth or lock between Tower Bridge and Blackwall Point outward bound.

For full details regarding traffic control in the Thames Barrier Control Zone see Notices to Mariners. Vessels wishing to leave from a berth within the Barrier Control Zone should first obtain permission to proceed.

Patrol Service: 24-hour patrol by launches fitted VHF Channels 16, 14, 12, 6 and radar. Can be contacted through Gravesend or Woolwich Radio.

Liaison is maintained through the Thames Navigation Service with Owners, Agents, Pilots, Watermen and all emergency services.

For help, advice, assistance or any matter affecting ships and shipping, contact: Thames Navigation Service:– Telephone

Marine Traffic Co-ordinator — Gravesend 60311
Duty Officer — Gravesend 57724
Telex 262880

ANCHORAGES: Great Nore and Little Nore anchorages allocated by Medway Port Operations, all other anchorages allocated by the Thames Navigation Service dependent upon the size and draft of vessel, the length of stay required at the anchorage and the specific details of the vessel, i.e. explosives, petroleum, etc.

Explosives anchorage at Chapman Anchorage for discharging/loading to/ex barge to/from appointed river wharves.

RESTRICTIONS: Certain restrictions are placed on the navigation of vessels carrying petroleum, chemicals, explosives and other hazardous commodities.

Vessels which are carrying any of the above mentioned cargoes should call Gravesend for details of these restrictions and ascertain whether it is permitted for them to navigate.

Notwithstanding any of the aforementioned restrictions, all vessels should comply with the "General Directions for Navigation in the Port of London 1975". (Copies obtained from the Harbour Master, Port of London Authority, Thames House, Tilbury Docks, Essex RM18 7EH.)

The tides at London Bridge have a range of 4.6 m. at mean neaps and 6.6 m. at mean springs.

The sea approach to Shellhaven is dredged to allow the passage of vessels to 13.7 m. at mean neap tides. The depth to Gravesend Reach is about 7.9 m. to 8.1 m. below LAT.

MAX. SIZE: Tankers:

Berth	*Depth at low water*	*Length*
Coryton	14.0 m. maximum	1,100 ft.
Shellhaven	14.6 m. maximum	1,200 ft.
Holehaven	11.2 m. maximum	720 ft.
Purfleet	8.6 m. – 11.2 m. maximum	700 ft.
Grays	11.2 m. maximum	620-750 ft.

Other river and tanker berths restrictions apply according to tides and berth.

Deep-draft tankers for berthing at Shellhaven is sometimes over a period of 2 tides. Passage on the 1st tide to deep water anchorage, vessel to leave anchorage on make of 2nd tide and arrive off the installation half an hour before high water of this tide.

BERTHING:

Cargo Berths: The Port of London Authority operates one enclosed dock system at Tilbury Docks.

Specialist and general purpose facilities for handling general cargo, rolling cargo, forest products, latex, grain, unitised cargo/containers and passengers are provided at Tilbury Docks in Essex. Bulk wine and spirits are handled at Phoenix Wharf, Rainham, Essex.

Continued below and on page 1502.

(Berthing continued)

Port of London Authority:

PLA facilities are managed in three divisions: Containers, Conventional and Grain.

Depths of water shown for berths in the enclosed docks and on the river are the authorised depths to which the berths may be dredged. Actual depths may be less than the authorised depth and the advice of the PLA or tenants Operating Manager should be sought if necessary.

Berth	*No. of Berths*	*Length (ft.)*	*Depth (ft.)*	*Equipment*	*Remarks*
TILBURY DOCKS:					
Entrance lock dimensions: Length 1,000 ft. (305 m.). Width 110 ft. (33.5 m.). Depth 45.5 ft. (13.9 m.).					
Access to berths (except the Grain Terminal, Northfleet Hope Container Terminal, cargo and repair jetties, riverside Roll-on/Roll-off terminal and passenger landing stage) is gained through an entrance lock.					
Northfleet Hope Terminal	1 (in dock) 1 (in river)	850 1,000	35.0 41.0 (MLWS)	2 container cranes 45 tonnes (in dock), 2 container cranes 35 tonnes (riverside), straddle carriers, tractors and trailers.	OCL/ACT and partners. Container services. Accommodation for 5,500 containers at any one time (inc. 1,464 reefers). Operation: 24 hours per day, 7 days a week.
PLA Container Terminal	3	2,540	38.0	4 container cranes 30-45 tonnes, van carriers, tractors and trailers, forklift trucks.	(Container Division). Containers to and from cellular and purpose built lift-on/lift-off all container or semi-container vessels. Electrical reefer points. Floating cranes for uncontainerisable cargo. Operation: 24 hours per day, 7 days a week.
Brostrom Terminal	4	2,200	38.0		Ro-Ro and self sustaining container vessels.
42 Berth (Tilbury) Ltd.	1/2	700	38.0	1×30 tonne mobile. Heavy duty forklift trucks, tractors and 35 tonne trailers.	Forest products.
PLA General Purpose Berths	14	8,900	up to 38.0	60×5 tonne quay cranes, forklift trucks, mobile cranes, van carriers, tractor/trailer units, 1×80 tonne mobile, 1×36 tonne land based and up to 120 tonne floating heavy lift cranes, 1 container crane 30 tonnes.	(Conventional Division). Conventional, Ro-Ro and unitised general import and export cargoes. Containers to and from semi-container/Ro-Ro vessels. Forest products. Heavy lifts. Scrap metal.
PLA Riverside Ro-Ro Terminal	1	Ship length up to 500 ft.	20.0 (MLWS)	Tractors	(Conventional Division). Ro-Ro. Suitable for bow or stern ramp vessels.
Tilbury Passenger Landing Stage	1/2	Ship length up to 740 ft.	Dredged to 10 m. below datum	2 covered gangways.	(Conventional Division). Embarkation and disembarkation of passengers for ships, hovercraft, hydrofoils and launches and Tilbury/Gravesend local ferry.
Seaboard Pioneer Terminal Ltd.	1	870	38.0	Forklift trucks, tractors, trailers.	Forest products.
Svenska Terminal in London Ltd.	1	750	38.0	Straddle carriers, forklift trucks, trailers, tractors.	Forest products and Ro-Ro cargo.
West Africa Terminal Ltd.	5 (ship) 2 (barge)	2,700 100 ft. each	31.0	9 quay cranes 10 tonnes, 2 quay cranes 15 tonnes, 5 mobile cranes 15 tonnes, 2 mobile cranes 35 tonnes, light and heavy duty forklift trucks, tractors and trailers.	(Conventional Division). Cargo to and from West Africa and North America, conventional general cargo, forest products, including logs, containers and Ro-Ro.
PLA Tilbury Grain Terminal	1 Deep Sea 1 Short Sea 6 barge berths 1 Coaster discharge berth	900 230	42.0 (MLWS)	2×1,000 tonnes per hour marine leg elevator towers, coaster and barge loading points, 2×200 tonnes per hour pneumatic elevators (coastal jetty). Silo capacity 100,000 tons. Export vessels now handled. 30,000 tonnes on outer jetty and 10,000 tonnes on inner jetty.	(Grain Division). Terminal has direct feed by conveyor to 4 adjacent privately-owned mills: Allied Mills Ltd., Rank Hovis Ltd., Spillers French Milling Ltd., Cargill Albion Ltd. Laing National Ltd.

(Berthing continued)

Private Wharfingers:

Berth/Wharf Name	*No. of Berths*	*Length (ft.)*	*Depth (ft.)*	*Equipment*	*Remarks*
Bridge Wharf (Bow Creek)	6 (barges)	270-290	15.0 (MHWS)	Up to 5 tonnes, mobile.	Metals of all descriptions and bulk ore by grabs.
Bridges Wharf (Battersea)	1	225	13.0 (MHWS) Dries at LW	3 cranes up to 10 tons.	Handling and storage of inflammable and hazardous chemical products etc.
Bruce's Wharf	3	205-300	22.0 (MHWS)	4 cranes up to 35 tonnes.	Terminal for Seebee and Container Services. Terminal for Meyer International Plc. Timber Importers.
Convoys Wharf	1	800	18.0 (MLWS)	6×2 tonnes.	Newsprint, forestry products and general cargo. Operators of nationwide warehousing and transport interests.
	1	410	23.0 (MLWS)	Ro-Ro pontoon.	
Denton Wharf	3	260-600	34.0 (MHWS)	11×3 – 30 tonnes. 2×30 tonne container park gantries.	Discharge and loading of all types of conventional cargo and containers to and from ships and barges. Groupage service. Licensed for handling explosives.
Erith Deep Wharf	1 (ship) 2 (barges)	600 600	21.0 (MLWS)	5×6.5 – 7.5 tonnes. 2×4.5 tonnes.	Direct handling ship/road transport or ship/warehouse. Handling of forestry products. Lash/Seebee barges.
Imperial Wharf	1	300	26.0	3×5 tonnes.	Forest products.
The London Steel Terminal	2	295	16.4 (MHWS)	3 cranes up to 30 tonnes.	Handling of steel using electro-mechanical grabs for steel coils. All operations including shipwork carried out under cantilevered roof providing all weather working. Container services.
Lovells Wharf	1	280	18.0 (MHWS)	3 cranes up to 20 tonnes.	Steel and other metals (London Metal Exchange approved warehouse).
Mast Pond Wharf	1	220	16.5 (MHWS)	1×5 tonne, mobile.	Bulk handling, overside or direct delivery.
Mulberry Wharf	1	225	17.0 (MHWS)	1×5 tonne mobile, 1×2.5 tonne fixed.	Bulk handling, overseas and direct delivery.
Phoenix Wharf	2	625-800 (floating jetty)	20.0 (MLWS)	4 cranes up to 30 tonnes. (8 – 10 tonnes ex-ships hold).	Forest products in all forms, steel, fertilisers and bulk cargoes, empty containers. Bulk wine and spirits.
	(Ro-Ro Berth)	450	16.0 (MLWS)	3 tugmasters.	For continental ferry service and Import/Export of motor vehicles.
Pinns & Limmer Wharves	3-4	850	18.0 (MHWS)	4×50 tonnes. (30 tonnes on ships).	Bulk materials, heavy lifts and unitised cargoes.
Purfleet Deep Wharf	2	1,000	27.5 (MLWS)	7 (jetty)×5 – 6 tonnes. 2 (shoreside)×40 tonnes.	Equipped with modern floating Roll-on/Roll-off berth. Handling of forestry products.
Tower Wharf	3	300-650	36.0 (MLWS)	11 cranes up to 5 tonnes (Quay). 4 cranes up to 22 tonnes (Shore).	All cargo except bulk.
Victoria Deep Water Terminal	2	850 350	22.0 (MLWS)	3×5 – 32 tonnes. 2×30-40 tonne container gantries. 1×30 tonne transtainer container park gantry.	Container unit loads and groupage.
Victoria Wharf (Dartford Creek)	(8 barges)	—	Afloat at all times	3-12 tonnes mobile cranes.	Forest products and general cargoes.

The depths quoted are to be taken as approximate only. For detailed information contact the wharf operator or Thames Navigation Service.

TANKERS: (Also see "Notices"). There are about 40 berths for tankers in the Thames District, main terminals of which are listed below. Recommended that Masters cable terminal with discharge manifold size, enabling wharf have correct pipes ready. Slop tanks are available at most wharves.

Company	No. of Berths	Length **(ft.)	Depth **(ft.)	Remarks
BP (Northfleet)	1	170.0	—	Able to handle vessels 3,000 d.w.t. High and low flash point products. Storage capacity 20,000 tons.
BP (Fulham)	1	—	—	Lube oil, gas oil and spirits.
Esso (Purfleet) No. 1	1	Max. LOA 628	26.5 (LWS)	Max. size 28,000 d.w.t. Products handled: F.O., G.O., D.O., kero, gasoline. 4×10 in. (clean products); 2×10 in. (fuel oil). Max. pressure 150 psi.
Esso (Purfleet) No. 2	1	Max. LOA 628	26.5 (LWS)	Max. size 18,000 d.w.t. Products handled: F.O., lube oil, G.O., kero. 3×6 in. (lube oil); 2×6/8/10 in. (fuel oil); Max. pressure 150 psi. Total capacity (Berth Nos. 1-2): White oils 187,000 tons. Fuel oil 126,000 tons. Lube oil 39,000 tons.
Mobil* (Coryton) No. 1	1	Max. LOA 650	Max. draft 33 (MLW)	Max. displacement 40,000 tons. Products handled: L.P.G., gas oil, lube oil, fuel oil, gasoline.
Mobil* (Coryton) No. 2	1	—	Max. draft 18 (MLW)	Coaster berth, max. displacement 2,000 tons. Products handled: Same as No. 1 berth (excluding L.P.G.).
Mobil* (Coryton) No. 3	1	Max. LOA 900	Max. draft 44 (MLW)	Max. displacement 100,000 tons. Products handled: Crude and fuel oil (3,000 t.p.h.), gas oil (2,000 t.p.h.), gasoline (1,000 t.p.h.), products (350-500 t.p.h.). Other products handled: Diesel oil, naphtha and Av. Tur.
Mobil* (Coryton) No. 4	1	Max. LOA 1,200	Max. draft 45 (MLW)	Max. displacement 230,000 tons (320,000 d.w.t. with part load). Crude oil only handled. 4×16 in. steel arms. Rate 3,500 t.p.h. each arm.
Mobil* (Coryton) No. 5	1	Max. LOA 200 m. Max. draft 37 ft.	Depth 43 (MLW)	Max. displacement 40,000 tons. 4×10 in. arms for loading/discharging fuel oil, gasoline and gas oil (rate 2,000 t.p.h.). 1×10 in. arm for receiving refrigerated butane.
Conoco Ltd.	1	256 Max. LOA 625 ft.	44.0 (MHWS)	White oils, capacity 70,000 tonnes.
F.T. Everard & Sons Kent Ltd.	Globe Wharf Deep Water Jetty	450 300	14.0 (MHWS) 14.0 (MLWS)	Vegetable and edible oils. White oils including motor spirit. Chemicals and other low flash liquids. Fuel oils. Storage capacity: 40,735 water tons in 63 tanks.
London & Coastal Oil Wharves Ltd.	1	720	36.0 (average low water)	Hydrocarbon oils. Chemical and other low flash liquids. Vegetable and edible oils. Storage capacity: 303,600 cu.m. (45 cu.m. to 20,320 cu.m. capacity tanks).
Murco Petroleum Ltd.	2	730	37.0 (MLWS)	Motor spirit, distillates. Storage capacity: 52,000 tonnes motor spirit. 10,870 tonnes distillates. Shares Blue Circle Industries Ltd.'s Wouldham Jetties with Unitank Storage Company Ltd.
P.D. Oil & Chemical Storage Ltd.	7	840	34.0 (MLWS)	Hydrocarbon oils and all chemicals. Total storage capacity: 423,000 cu.m. Oil storage capacity: 365,000 cu.m. Chemical storage capacity: 58,000 cu.m. (50 cu.m. to 15,000 cu.m. capacity tanks).
Tate & Lyle Feeds Ltd.	1	100-200	25.0 (MHWS)	Hydrocarbon oils, some chemicals, molasses. Storage capacity: 21,000 water tons of bulk liquid storage tanks (260-3,700 tons water capacity).
Thames Matex	3	750	34.0 (MLWS)	Hydrocarbon oils, chemicals, vegetable oils. Storage capacity: 352,000 cu.m. (125 tanks-200 cu.m. to 10,000 cu.m. capacity).
Thames Terminal Ltd.	1 (ship) 2 (barge)	750	34.0 (MLWS)	High and low flash petro-chemicals, edible and mineral oils, fuel oils. Storage capacity: 160,000 cu.m. for fuel oil, gas oil, lubricating oil and kerosene. 40,000 cu.m. for chemicals, edible oils, etc.
Unitank Storage Co. Ltd.	2	750	34.0 (MLWS)	High and low flash petroleum, some chemicals. Storage capacity: 310,000 cu.m. in 52 mild steel tanks (1,700 cu.m.-20,800 cu.m. capacity). Shares Blue Circle Industries Ltd.'s Wouldham Jetties with Murco Petroleum Ltd.
Shell (Shell Haven) "A"	1	Max. LOA 259.1 m.	†12.5 m.	Deadweight unlimited. Size of vessel limited to 20,000 s.d.w.t. when height of HW exceeds 5.8 m. (due to strength of tide). When VLCC on "B" jetty, size of vessel not to exceed 40,000 s.d.w.t. When 100,000 d.w.t. vessel on "B" jetty, largest on "A" not to exceed 70,000 s.d.w.t. Berth to be vacant when VLCC berthing at "B". 1×6 in. (L.P.G.).
Shell (Shell Haven) "B"	1	Max. LOA 320.0 m.	†14.6 m.	Deadweight unlimited. VLCCs and other large crude carriers berth head down river at slack HW. Products handled: Crude oil, fuel oil, unleaded white oils, leaded white oils (discharge only), aviation spirit. 4×10 in. and 4×8 in. (white oils and fuel oil). 4×10 in. and 4×16 in. (crude).
Shell (Shell Haven) "C"	1	Max. LOA 237.7 m.	†10.4 m.	Max. d.w.t. 55,000 tons. Import/export white and black oils. 4×10 in.
Shell (Shell Haven) "E"	1	Max. LOA 182.9 m.	†8.8 m.	Max. displacement 25,000 tons. Chemical import/export, lube oil import. 5×6 in.
Shell (Shell Haven) "G"	5	No LOA restriction	(outer) †8.0 m. (inner) †4.0 m.	(Outside) No. 1 and 2 berth. Max. size 3,000 s.d.w.t. (Inside) Nos. 3, 4 and 5 berths. Max. size 1,000 s.d.w.t. Coastal jetty for export of white and black oils. (Outer) 6×8 in. (Inner) 5×6 in.
Texaco (Canvey Island)	1	Max. LOA 580 ft.	Depth (subject to dredging) 40 ft. Max. draft 32 ft.	Products handled: Gasoline, gas oil, diesel, kerosine, jet fuel. Pumping rates into barges, 200-250 t.p.h. with max. pressure 100 p.s.i. Discharge rate 400-1,500 t.p.h.

Other Wharves: In addition to the above some manufacturing and service industries have their own riverside premises with ship berths. Thames Navigation Service will assist with information. Otherwise contact Waterside Manufacturers and Associated Industries. Tel: 01-481 3681.

*Bunkers available at all berths. Fresh water not available. **Unless otherwise stated. †Design datum (All berths subject to siltation).

††Tank cleaning is permitted when back loading operations are to take place. Tank cleaning for other purposes may take place only after agreement from the Terminal.

Dirty ballast separator system allows a cumulative rate of 1,500 cu.m./hr. from all jetties. No waxy material, chemicals or chemical additive is accepted.

Vessels should arrive with minimum possible ballast commensurate with safe handling of vessel.

HEALTH: Port of London Health Authority:
Public Health (Ships) Regulations, 1979.
Notes for the guidance of Masters/ships Agents:

1. (1) It is the responsibility of the Master of a vessel due to arrive in the Port of London to report to the Port Health Authority the presence of sickness or animals on board, or of the occurrence, during the voyage, of the death, other than by accident, of a crew member or passenger.
2. (2) This information should be transmitted to North Foreland Radio Station for forwarding to "Portelth London", not more than 12 hours or less than 4 hours before vessel's arrival in the Port.
3. (3) Vessels already in the Port can contact the Port Health Authority directly by telephoning Tilbury (03752) 2663.
   At Public Holidays (and all times other than 0900 – 1700 hrs. Monday to Friday) an answering machine is connected to this number giving the telephone number of the Duty Officer who will give any advice or assistance required.
4. (4) The Port of London Health Authority District includes that part of the River Medway comprising Sheerness, Isle of Grain, Ridham Dock and Queenborough.

Also see "Health – All Ports" before first U.K. port.

RADIO: Outside UK waters from the South, call long range station "Portishead Radio"; approaching London, "Niton Radio" or Northforeland Radio giving Agents draft and ETA. "Gravesend Radio" when in the Thames and its estuary.

TUGS: Tugs usually pick up vessels for Shellhaven and Holehaven in reaches approaching berth, or Gravesend for berths/docks up river. Tugs and lines can be hired from Alexandra Towing Co. (London) Ltd., Alexandra House, Royal Pier Road, Gravesend, Kent. Tel: (0474) 534227.

P.L.A. provide a towage service within the enclosed docks.

CRANES: (See "Berthing").

BULK CARGO FACILITIES: (See "Berthing").

SPECIALISED CARGO HANDLING FACILITIES: (See "Berthing").

BRIDGES: No bridges below Tower Bridge which opens for shipping on request.

STEVEDORES: Ordered by the Agents; no ETA to stevedores from vessel necessary; labour to be ordered by 1200 hrs. day before required.

At PLA General Purpose Berths order by 1100 hrs. day before except for weekends/public holidays when 1600 hrs. 2 days before. PLA/TCS Container Terminals work 24 hours a day, including weekends.

MEDICAL: Not necessary to contact Agents once port health requirements satisfied unless urgent medical treatment required on board on arrival. All medical treatment, vaccinations available.

DENSITY: Varies according to position and tides.

FRESH WATER: Available at all berths either from shore or barge.

FUEL: All types, grades available by barge, or from terminals.

FIRE PRECAUTIONS: Tankers – no smoking on open decks, only cabins. Deck fire hoses to be connected. Explosive workings at Chapman anchorage, same precautions. Red flag to be flown by these vessels. Fire tug to be in attendance when explosives being worked. Smoking not permitted in the docks or berths.

GANGWAY/DECK WATCHMEN: Available but not compulsory, Master's discretion.

OPENING/CLOSING HATCHES: Liner vessels by crew, with stevedore assistance. Tramp vessels according to charter party.

CERTIFICATES: These certificates to be on board.
Ship's Register.
Load Line.
Safety Radio.
Safety Equipment.
Safety Construction.
Derat Exemption.
Previous U.K. Light Due Bills.
Cargo Gear and Chain Register complying to U.K. Factory Acts.
British Tonnage Certificate if available.

CUSTOMS ALLOWANCES: Customs usually permit 200 cigarettes or 0.25 lb. tobacco per person on board for 4 days. They can refuse to issue duty free or amount allowed at their discretion. Usually permit 1.3 pints or 1 bottle spirits per person for 4 days. They can issue less or refuse to allow as duty free at their discretion.

CARGO GEAR: To comply with U.K. Factory Acts, valid chain and Cargo Gear Register to be on board. Stevedores usually supply cargo slings, etc.

IDENTIFICATION CARDS: Seamen's identity book required to be retained on board in port.

BANKS: All British and most foreign banks represented in London. British banks have branches in Thameside towns.

CONSULS: All British Commonwealth countries are represented in London by a High Commissioner's Office.

Most foreign countries maintain embassies or a consular representative in London.

REPAIRS: All repairs, gas freeing possible; pre-advice recommended.

DRY DOCKS: Largest dry docks at Tilbury, 752 ft. length, 133 ft. breadth. There are smaller dry docks available on the river.

REPATRIATIONS: All facilities exist for changing crews, repatriations.

AIRPORTS: All flights serve London Heathrow and Gatwick Airports. Southend Airport serves domestic and Continental services.

TIME: British Summer Time which is 1 hour in advance of GMT. GMT during Winter months.

HOLIDAYS: *Public Holidays:* Work is available on official holidays if practical. New Year's Day, Good Friday; Easter Monday; May Day Monday; Spring Bank Holiday Monday; August Bank Holiday Monday; Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Contact by public telephone; dial 999 and ask for service needed. PLA telephones dial 259 (fire) and 222 for others.

EMERGENCY CO-ORDINATION CENTRE: See "Thames Navigation Service" and "Notices".

TELEPHONES: Ship to shore connections available at most berths.

SERVICES: All types of service for navigational aids, radar, compass adjusting, nautical instruments repaired, slop discharge barges available. Tank-cleaning, gas-freeing services available.

SHORE LEAVE: Crew members allowed ashore but must rejoin on sailing.

REGULATIONS: No livestock allowed ashore without permission Customs and Port Health Authorities. Rabies regulations enforced.

NOTICES: *Emergency Procedures for Vessels on The River Thames.*

Report immediately by the quickest means available to either Thames Navigation Service on VHF radio, Gravesend Radio, VHF Channel 12, Woolwich Radio, VHF Channel 14, or public telephone Tel: 999.

Message: Vessel's name and present position together with details of emergency and assistance required.

Collision, Fire or Other Accident: If involved in or sighting a collision or accident report as above.

Human Injury or Man Overboard: In event of serious personal injury or recovery of a person from the river when vessel's crew require additional assistance report as above.

Machinery or Steering Failure: In event of machinery or steering failure report as above.

If necessary to anchor then endeavour to anchor clear of the fairway if size and draft permit.

Details of Port of London Authority Combined Accident Procedure Applicable to Vessels (POLACAP): In event of a major accident, the Thames Navigation Service will broadcast on appropriate VHF Channels an outline of the accident, including in the message:

Word	*Meaning*
"POLACAP"	Serious accident as specified has occurred - Combined Accident Procedure is in force.

Action by Vessels on Receipt of POLACAP Message: Maintain current communications watch, keeping requests for information to MINIMUM. If in vicinity of accident be prepared for traffic regulation, which, if required, will be operated by PLA Harbour Master's Launches.

If directly involved in or assisting with the accident, switch to VHF Channel 16 for inter-ship/craft communications, and report to Thames Navigation Service.

On scene control will be exercised from the forward control craft using call sign POLACHIEF. This craft will identify itself by a blue rotating light and in addition by day will hoist a red ball at the masthead.

When Combined Accident Procedure is no longer in force, Thames Navigation Service will pass:

Words	*Meaning*
"CANCEL POLACAP"	Combative measures to deal with the major accident are completed and no further action required.

June 1984.
H. Revell, Director of Port Services, Port of London Authority.

This Notice supersedes similar Notice dated February 1968.

Notice to Mariners – 41 of 1981.

Merchant Shipping (Tankers) Regulations 1981 (EEC Requirements):

In compliance with the above regulations, as from 15th October, 1981, the Master of any tanker of 1,600 g.r.t. or over, which is carrying or which has carried and has not been gas freed, a cargo of chemicals, gas or oil in bulk, before entering or navigating within the limits of the Port of London shall make a report to the Harbour Master.

Reporting: This report should be sent in sufficient time to ensure that it arrives at the Thames Navigation Service, Gravesend, prior to the tanker entering port limits. Masters of vessels bound for London from near Continental ports may send their report from the previous port if more convenient.

The report should be sent, *preferably by telegram or telex,* to the Thames Navigation Service. Telegraphic Address: Thames Nav Gravesend. VHF Radio: Gravesend Radio, Channel 12. Telex: 262880 PLATNS. Tel: 0474-57724.

The Report: The report must provide answers to the following questions in the order listed.

- (a) Tanker's name and call sign.
- (b) Country where registered.
- (c) Length, beam and arrival draft.
- (d) Destination and ETA.
- (e) Tankers bound for the Medway, ETA at No. 1 Medway Buoy.
- (f) Nature and type of cargo (together with Flash Point if known).
- (g) Is an inert gas system fitted?
- (h) If an inert gas system is fitted, is it fully operational?
- (i) Do any of the cargo tanks have an atmosphere which has been rendered non-flammable?
- (j) If the tanker has a cargo of chemicals or gas has it been issued with a certificate stating that it complies with:
  - (i) IMO Code for Ships carrying dangerous chemicals.
  - (ii) IMO Code for Existing Ships carrying Liquefied Gas.
  - (iii) IMO Code for Ships carrying Liquefied Gas.
- (k) Does the tanker have any hull, machinery or equipment defects which may materially affect:
  - (i) Its safe manoeuvrability.
  - (ii) The safety of other vessels.

  or constitute a hazard to
  - (iii) The marine environment.
  - (iv) Persons or property.

If the answer is 'Yes' to any of the 4 questions contained in (k), then details of the problem must also be provided.

Amendments to The Report: On entering port limits or before commencement of any movement within the port (i.e. shifting berth or sailing) the Master shall inform the Thames Navigation Service (Gravesend Radio) of any alterations that may apply to the existing report.

Check List: The Master of the above type of tanker is required under the regulations to make available to the Pilot a Standard Check List. The Master shall ensure that a copy of this Check List is provided to the Harbour Master after arrival at the berth.

Notice to Mariners – 50 of 1981.

Inert Gas Systems and Crude Oil Washing (COW): (Reference Statutory Instruments No. 541, 544 and 687 of 1980).

The attention of tanker Masters are drawn to the following conditions, which must be observed whenever crude oil washing of tanks is to be undertaken in the Port of London.

1. *Notification*

(a) At least 24 hours prior notification of the intention to COW is to be received by the Director of Marine Operations (through the Thames Navigation Service) together with written assurance that all systems have been checked and found satisfactory in accordance with the ship's COW Manual and IMO requirements.

(b) One hour before the actual commencement of COW, a further advice must be received by the Director of Marine Operations (through the Thames Navigation Service) that COW is about to commence and that all systems are fully operational.

2. *Terminal Approval*

No vessel is to undertake COW without the approval of the Terminal Management and having complied with IMO COW requirements applicable to that ship.

3. *Failure of Systems*

Following the failure of the inert gas system to supply either the correct quality or quantity of inert gas, or a failure of any other part of a COW system, all cargo discharge, de-ballasting and tank cleaning must cease forthwith, and the Authority is to be immediately advised. Operations are NOT to be resumed until after consultation has taken place and agreement reached between the Authority, the Terminal Management and the ship's Master.

4. *Tanker Drafts*

No tanker crude oil washing is to be accepted at any berth where the vessel cannot safely be afloat at any state of the tide.

Notice to Mariners – 3 of 1982

Precautions to be Observed by Vessels

All Vessels – Navigation Between Sea Reach No. 7 and West Blyth Buoys:

1. Shall proceed at a moderate speed when passing berths where specified vessels with cargoes of LNG, LPG, ammonia or explosives are present or manoeuvring in the vicinity. When specified vessels with these cargoes are present details will be included in the routine broadcasts by Gravesend Radio.
2. Shall communicate to Gravesend Radio the intention to overtake a specified vessel. Gravesend Radio will broadcast this information and overtaking should not take place until this has been promulgated, and all vessels navigating in the area are aware of the manoeuvre. It is essential that the overtaking vessel proceeds with engines on stand-by, ready for manoeuvring, and anchor stations manned, ready for immediate use in case of emergency. Where it is necessary for a deep drafted vessel to overtake a specified vessel of lighter draft, then, provided it is practical and navigationally safe to do so, the specified vessel should facilitate this manoeuvre by moving to the side of the fairway to give the deep draft vessel the deeper water.
3. Shall give specified vessels, and specfied vessels shall give all other vessels, whether underway, at anchor, or berthed, the widest practical clearance.
4. Shall take particular care when manoeuvering for, or preparing to leave a berth having due regard for vessels underway and passing through the area. It is to be noted that the special requirements of deep drafted, and certain other vessels manoeuvring for these berths may demand priority of movement.
5. Shall before leaving a berth obtain a situtation report of other vessels navigating in the area.
6. Shall ensure that anchor parties are immediately available and anchors ready for letting go.

Additional Instructions for Specified Vessels:

1. Before entering or navigating within port limits, the Master shall advise the Pilot, if carried, and the Thames Navigation Service of the condition of propelling, steering and anchoring machinery, navigation radar and VHF radio equipment and special fire detection and fire fighting equipment carried in connection with the special cargoes, stating whether or not they are fully operational. Attention is drawn to the Port of London General Directions for Navigation, 1975, No. 15, which refers to vessels with mechanical and equipment defects.
2. Shall when navigating above Sea Reach No. 7, at all times proceed at a 'moderate speed'.

Specified Vessels – Recognition Signals:

1. A specified vessel, except petroleum ships, and vessels carrying explosives (which are required to display the signals which follow under the PLA Petroleum and Explosives Byelaws) shall whether underway, at anchor or secured to a berth, indicate the hazardous nature of the vessel's cargo or cargo tanks by displaying:

   Between sunrise and sunset – International Code Flag "B"
   Between sunset and sunrise – a red light
2. These signals shall be displayed at the masthead or where they can best be seen, and shall be of such size and character as to be visible all round the horizon for a distance of at least 2 miles, and shall be in addition to any navigation lights or other signals which may be required by any other regulations, rules or byelaws.

Definitions: Specified vessel means any vessel laden with or having on board quantities of (IMO Codings in brackets):

(a) LNG, LPG, ammonia or non-gas free following discharge of these cargoes. (Class 2).

(b) Explosives. (Class 1).

(c) Low flash and toxic chemicals or non-gas free following discharge of these cargoes. (Classes 3.1, 3.2, 6.1 and 9.0).

(d) Petroleum ships and barges as defined in the PLA Petroleum Byelaws. (Classes 3.1 and 3.2).

Moderate Speed: Shall not be more than 8 knots through the water, or minimum speed necessary for adequate control and safe navigation, whichever is the greater.

Port of London Petroleum Byelaws – Definition of 'Petroleum Ship': Petroleum Ship: Shall mean any vessel other than a petroleum barge having on board or about to take on board petroleum spirit as cargo or having discharged petroleum spirit if the holds and tanks have not been rendered free from inflammable vapour to the satisfaction of the Harbour Master but it shall not include a ferry boat working Woolwich Free Ferry by reason only of the ferry boat's having on board or being about to take on board one or more road vehicles engaged in the conveyance of petroleum spirit.

Definition of 'Petroleum Barge': Petroleum Barge: Shall mean any barge approved and licensed by the Port Authority for the conveyance of petroleum spirit on the Thames except when the same is empty *and rendered free from inflammable vapour to the satisfaction of the Harbour Master.*

Notice to Mariners 3 of 1981 is hereby cancelled.

Notice to Mariners – 11 of 1982

Dangerous Goods – Notice to be Given by Owner or Master:

The Owner or Master of a vessel carrying dangerous goods shall, before the vessel enters the Port of London, give at least 24 hours notice to the Director of Marine Operations of the nature and quantity of the dangerous goods carried in the vessel as required by Section 150 of the Port of London Act 1968 (see below). The Master of a vessel whose duration of voyage is less than 24 hours may give notice within 1 hour of departure from the last port of call.

A similar notice is to be given to the Harbour Master by the Owner or Master of a vessel at least 24 hours before any dangerous goods are loaded on the vessel anywhere within the Port of London.

Both these notices should also include the following details:

(a) Whether the dangerous goods are in bulk, and if not, how they are packaged or carried, including details of the type and size of any drums, portable tanks or other portable containers.

(b) The flash point, if the dangerous goods are flammable.

(c) The vessel's proposed discharging or loading berth (even if the dangerous goods are to be retained on board).

(d) To which of the Classes 2 to 9 set out in the Merchant Shipping (Dangerous Goods) Regulations 1981 (S.I. 1981 No. 1747) the dangerous goods belong.

In this Notice to Mariners, the expression "dangerous goods" means all dangerous goods for which a list, manifest or stowage plan must be carried in the vessel carrying the goods pursuant to Regulations 7(5) and 13(1) of the Merchant Shipping (Dangerous Goods) Regulations 1981 (S.I. 1981 No. 1747) if, in relation to the classes of dangerous goods set out in Regulation 7(2) of those Regulations, the goods fall within:

Classes 2, 3, 4.1, 4.2, 4.3, 5.1, 5.2, 6.1, 6.2, 7, 8 or 9

but does not include carbide of calcium, liquid methane or petroleum spirit the handling of which is subject to separate byelaws, as is also the case with explosives (Class 1).

Dangerous Goods Shipments: The Notice referred to above for shipments of all dangerous goods must be sent to:

Harbour Master, Thames House, Tilbury Docks, Essex. Tel: (03752) 3444. Telex: 99267.

Dangerous Goods Handled in Dock: All dangerous goods which are due for loading or discharging in the Port Authority's enclosed docks are subject to the terms and conditions set out in the Authority's published booklet "Schedule of Dangerous Goods" which is available from the Director of Tilbury, Tilbury Docks, Essex RM18 7EH.

Some descriptions of dangerous goods (designated Group 3) in the schedule require the prior approval of the PLA before entering the enclosed docks and the appropriate applications should be made to the Director of Tilbury (address as above). Tel: Tilbury 3444, Ext. 276. Telex: 99267.

Dangerous Goods Generally:

Movement of Vessels: In conditions of reduced visibility such as fog or falling snow, vessels carrying dangerous goods should not move without the permission of the Harbour Master.

Labelling of Containers: All dangerous goods which have been taken on board a ship at any port within the territorial waters of the United Kingdom must be packaged and marked in accordance with the provisions of Regulations 8 and 9 of the Merchant Shipping (Dangerous Goods) Regulations 1981 as should dangerous goods taken on board any British vessel registered in the United Kingdom.

Dangerous goods taken on board foreign registered vessels outside the territorial waters of the United Kingdom should, ideally, be similarly packaged and marked.

Flammable Liquids (Non-Petroleum) – (Flash Point Less Than 73°F – 22.7°C)

1. *Limitations of Quantities:*

   Masters of vessels are hereby informed of the following limitations in respect of the conveyance of flammable liquids (non-petroleum). These limitations take effect from the date of this notice.

   Masters of vessels carrying such liquids are further advised that they may be subject to further direction from the Harbour Master if they navigate between sunset and sunrise.

   To Barking Creek: Unrestricted as to quantity whether in bulk or in drums, portable tanks or other portable containers.

   To Bow Creek: Up to a maximum quantity of 1,000 tons (1,016 tonnes) whether in bulk or in drums, portable tanks or other portable containers.

   To Saundersness: Up to a maximum quantity of 500 tons (508 tonnes) in bulk or in drums, portable tanks or other portable containers, except that a maximum of 1,000 tons (1,016 tonnes) may be carried in a vessel previously approved for the purpose by the Port Authority.

Above Saundersness: Up to a maximum quantity of 150 tons (152 tonnes) in bulk or in drums, portable tanks or other portable containers, except that a maximum 1,000 tons (1,016 tonnes) may be carried in a vessel previously approved for the purpose by the Port Authority.

2. *General:*

(a) Flammable liquids may be carried in barges but should only be accepted for carriage in bulk in barges which have been approved for the purpose by the Port of London Authority.

(b) Drums should not be of a greater capacity than 450 litres each unless prior permission is given by the Port of London Authority.

(c) Vessels at river wharves when discharging flammable liquids overside into barges should only do so into barges on the outside or riverward side of the vessel. Such barges should not be left unattended and should be afloat at all times. Under no circumstances should a barge loaded with flammable liquids be left or moored between a vessel and a river wharf.

(d) Immediately after any tank vessel carrying bulk flammable liquids is discharged and before it is removed from the quay at which it has been discharged, all hatches and manholes to the cargo tanks and adjoining spaces shall be closed down and properly secured and kept so closed down and secured whilst the vessel is in transit.

(e) Day and night signals for vessels carrying flammable liquids in bulk to be as for vessels carrying petroleum spirit.

(f) The above mentioned requirements do not apply to shipments of flammable liquids of less than 450 litres provided that shipment is contained in suitable receptacles and is not merely the residue of a larger consignment.

(g) No other cargo should be discharged from or loaded onto a vessel while flammable liquids in bulk with a flash point not exceeding 141°F (61°C) are being discharged from or loaded into the vessel.

Port of London Act, 1968, Section 150 – Notice Concerning Dangerous Goods

1. Except in case of emergency, the Owner or Master of a vessel:

(a) which it is intended to bring into the limits carrying dangerous goods; or

(b) which is within the limits and on which it is intended to place dangerous goods;

shall before that vessel enters the limits of before the dangerous goods are placed on board, as the case may be, give notice to the Harbour Master of the Port Authority of the nature and quantity of the dangerous goods in question and, if such notice is not given, the Owner or Master of the vessel shall be guilty of an offence and liable to a fine not exceeding £100. Provided that:

(i) The notice required by this subsection shall, when practicable, be given not less than twenty-four hours before the vessel enters the limits or the dangerous goods are placed on board, as the case may be; and

(ii) nothing in this subsection shall, impose any obligation upon the Owner or Master of a vessel to give any notice to the Harbour Master in respect of the carriage of dangerous goods in that vessel by reason only that the vessel passes through any part of the limits on a voyage between places situated on the River Medway or on the Swale or on that part of the Kent coast between Warden Point and the North Foreland or on that part of the Essex coast between Foulness Point and the Naze and any other places not within the limits.

AUTHORITY: Port of London Authority, Leslie Ford House, Tilbury Docks, Tilbury, Essex RM18 7EH. *Tel:* Tilbury (03752) 3444. *Telex:* 99267. *Contact:* John N. Black, Chief Executive. John S. McNab, Director of Tilbury. Captain Gordon Varney, Harbour Master.

AGENT: Lambert Brothers Ship Agencies Limited, 450 High Road, Ilford, Essex. Telegrams: "Lambert Ilford" and "Lambert London EC3". Telex: 897147 and 897435. Tel: 01-553 3311.

LONDONDERRY (incl. Moville): 54.59 N. 07.19 W.

(See Plan Book)

The main port of Londonderry is situated about 21 miles from the sea on the River Foyle.

PORT LIMITS: Extend from Lifford Bridge to a line drawn from Greencastle Fort in the County of Donegal to the Tower on Magilligan Point in the City and County of Londonderry.

DOCUMENTS: For Londonderry see "Belfast". For "Moville" see "Dublin".

Since the Port of Londonderry falls within the Republic of Ireland and the United Kingdom, both Governments are concerned in regard to Customs documents. Moville, which is situated down river from Londonderry, is located in the Republic of Ireland and is the anchorage where deep-sea vessels lie prior to proceeding to Londonderry. Should vessels discharge cargo or load cargo at this anchorage, Irish documents are required. The port is under the control of the Londonderry Port and Harbour Commissioners who are recognised by both Governments.

PILOTAGE: The Londonderry Port and Harbour Commissioners are the Pilotage Authority for the Londonderry Pilotage District. For information regarding pilotage application should be made to The Secretary, Harbour Office, Londonderry, Northern Ireland. Tel: (0504) 262553.

Pilotage is compulsory, vessels normally taking the Pilot at Carrickarory Pier, Moville. A Pilot may be taken at the Fairway buoy by special arrangement.

The Pilot station is located at Carrickarory Pier, Moville, 55° 10′ 57″ N.; 07° 03′ 27″ W.

Deep-draft vessels usually take Pilot 2 hours before HW time Londonderry, so as to arrive at Londonderry on the top of HW.

Pilotage service may be obtained in response to following signals:

Inward-bound vessels: By day. 1. The International Code Signal G 2. The International Code Signal P.T.; 3. The Pilot Jack hoisted at the fore; 4. By daylight signalling lamp to the pilot station. If required after hours telephone Harbour Radio (Londonderry 263218)

By night. Pilot Station unattended at night. Vessels should contact harbour radio on VHF Channel 16 or Londonderry (0504) 263218.

By day or night. 1. By VHF (FM) radiotelephony to the pilot station at Carrickarory Pier. 2. By VHF (FM) radiotelephony to the pilot launch "James McDonald." 3. After hours and weekends VHF (FM) to Harbour Radio.

In poor visibility. By sounding the letter G in Morse Code on the steam whistle or siren.

As visibility to seaward from Carrickarory Pier is restricted it is important that Owners, Masters or Agents notify the Berthing Master (tel: Londonderry 263680) or outside Office hours Harbour Radio (tel: Londonderry 263218) of the name of vessel; estimated time of arrival at the Fairway Buoy; draft of water of the vessel. It is also important that VHF (FM) communication be established with pilot station, pilot launch "James McDonald", or Harbour Radio as early as possible before arrival in Lough Foyle. Call signs, frequencies and procedure are as follows:

VHF (FM) Communications:

1. Pilot Station at Carrickarory Pier, Moville: Call sign "Foyle Pilots". Equipment VHF (FM) R/T single frequency working. A continuous listening watch is kept during office hours on Channel 16 (156.80 MHz.) except when pilot launch is operating, when watch is transferred to the launch. When communication has been established on Channel 16 (calling and safety channel) operators should switch to Channel 14 (156.70 MHz.)

2. Harbour Radio: A continuous listening watch is kept on Channel 16 (156.80 MHz) outside of office hours. Once communication has been established switch to Channel 14 (156.70 MHz).

3. Pilot launch: Name of vessel "James McDonald". Equipment VHF (FM) R/T single frequency working. When launch is operating a listening watch is kept on Channel 16 (158.80 MHz). When communication has been established on Channel 16 (calling and safety channel) operators should switch to Channel 14 (156.70 MHz).

4. Harbour Office, Londonderry: Call sign "Harbour Office". Equipment VHF (FM) R/T single frequency working. All vessels fitted with VHF (FM) R/T while navigating in the river or at anchor in Moville Bay should keep a listening watch on Channel 16 (156.80 MHz). When communication has been established on Channel 16 (calling and safety channel) Operators should switch to Channel 14 (156.70 MHz).

Messages must be restricted to those related to the movement of vessels and safety of vessels and persons. Messages of any other nature and messages of a personal character cannot be accepted.

Outward-bound vessels and vessels shifting:

When the services of a Pilot are required for an outward-bound vessel or for shifting a vessel, 4 hours notification should be given to the Berthing Master (Tel: Londonderry 263680) during office hours, of name of vessel; time of departure; draft of water of vessel; where bound. Early notification should be given to enable Pilot to board vessel in good time.

ANCHORAGES: The only anchorage at Londonderry is located at Moville.

RESTRICTIONS: See "Max. Size".

MAX. SIZE: For vessels using main port of Londonderry, overall length 152.5 m. draft 7.2 m.

Due to new road bridge at Madam's Bank, height clearance 32 m. H.W.O.S.T.

For vessels using N.I.E.S. Oil Jetty, Coolkeeragh, Londonderry, overall length 183 m. draft (salt water) 7.2 m.

Maximum draft of vessels is increased on Spring tides at Coolkeeragh and Londonderry.

HEALTH: Pratique is automatic except in the case where the Master suspects one of the dangerous diseases on board when he should notify the Agent.

Also see "Health – All Ports" before first U.K. port.

RADIO: Malin Head Radio Station, Republic of Ireland, covers W/T and R/T transmissions and Portpatrick Radio Station, Scotland, covers R/T transmissions.

TUGS: One tug is available which is owned by the Londonderry Port and Harbour Commissioners.

BERTHING: Vessels of deep draft or large dimensions can only berth at Londonderry to arrive on top of high water. Decisions in this matter are taken by the Pilots in conjunction with the Harbour Master.

A total of 800 m. of ferro-concrete wharf is available. All berths dredged to 7.6 m. LWOST

CRANES: 3×5 tons electric grabbing cranes; 2×2 tons electric hook cranes; 1×1.5 tons mobile crane; 3×20 tonnes mobile cranes and 1×35 ton container crane..

STEVEDORES: ETA advices should be given before 1600 hrs. on week-days to arrange work for the next morning and before 1100 hrs. on Saturday to arrange work for Monday morning.

MEDICAL: Doctors and hospital facilities available. Agents should be advised in advance of any medical attention required.

TANKERS: No slop facilities available. Deep-sea tankers discharge heavy fuel oil for electricity power station at N.I.E.S. Jetty, depth 8.8 m. Coolkeeragh, diameter of pipes 8 in. Crew are required to connect and disconnect hoses under port conditions.

Shell Oil: Max. LOA 120 m. Depth 6.0 m.

Du Pont: Depth 8.5 m.

DENSITY: Water at Londonderry is brackish and average density 1005 to 1018.

FRESH WATER: Available at all berths direct from shore lines.

FUEL: Gas-oil and light marine diesel available by road tankers and from Shell Jetty at Pennyburn. Shell Mex and B.P. can supply light medium and heavy fuel oil by road tanker.

GANGWAY/DECK WATCHMEN: Can be covered by crew; shore watchmen available if required.
OPENING/CLOSING HATCHES: This is required to be carried out by ship's crew under local port labour conditions.
CARGO GEAR: Ship's winches and derricks should be in good working order and have DTI Certificates or equivalent. Cluster lighting is required for night work.
IDENTIFICATION CARDS: Not obligatory but should be carried.
CONSULS: Nearest at Belfast.
REPAIRS: Deck and engine repairs are carried out by a local engineering works. No major repairs available.
REPATRIATION: Can be arranged by ship's Agent on request.
AIRPORT: The nearest airport to Londonderry is Aldergrove (Belfast) Airport, which is 61 miles from Londonderry.
HOLIDAYS: Port Holidays at Londonderry are: St. Patricks Day (17th March); Easter Monday; 12th July; 1st Monday and Tuesday in August; 12th July; Christmas Day and Boxing Day.
POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required, or Police 265161; Ambulance 265171; Fire 261815.
TELEPHONES: No telephones available for connecting on board.
SERVICES: No tank cleaning available or facilities for discharging of tank-washings. Compass adjusters available from Glasgow.
REGULATIONS: Copies of Port Bye-Laws may be obtained through Agent.
AUTHORITY: Londonderry Port and Harbour Commissioners, Harbour Office, Londonderry BT48 6AF, Northern Ireland. *Tel:* (0504) 264884, 264885, 262553. *Contact:* Captain P. J. Collier, Chief Executive. G. S. Wilson, Secretary.

LOWESTOFT: 52.29 N. 01.45 E. (See Plan Book)

DOCUMENTS:
Crew List (at least 2 copies).
Passenger List (at least 2 copies).
Manifest (at least 3 copies).
Customs & Health Documents (normal U.K. regulations).
Ship's Papers (to be presented to Customs or Port Authorities).
PILOTAGE: Pilots on standby at all times. Pilot launch fitted with VHF and maintains listening watch on Channel 16. Pilots can also be ordered by RT via Humber and Northforeland Radio, hence by phone.

Pilot's private telephone No. Lowestoft 60277 or Lowestoft 61976, or at the Lowestoft Harbour Masters Office, tel. Lowestoft 2286 (this number manned 24 hours). Pilot boat, black hull, white upper work with "Pilot" painted on each side. Light and sound signals as laid down in the International Code of Signals.

Pilot boards vessel at West Holm Buoy or East Newcome Buoy. Vessel should not approach harbour closer than these limits when awaiting Pilot.
ANCHORAGES: Pilotage anchorage North of a line joining West Holm Buoy and Lowestoft Lighthouse.
RESTRICTIONS: No specific restrictions provided the height of tide is sufficient for draft of vessel. Large vessels normally enter on high water slack tide due to cross currents at entrance.

There are regulations governing the passage of vessels through the harbour entrance. Masters of vessels shall observe the Harbour Control Light which is a white flashing light situated below the fixed red light on the South Pier Lighthouse. This light is visible except between 232° to 286° true from the light. When this light is flashing vessels may proceed to sea, but no vessel shall enter the harbour. At all other times vessels may enter the harbour, but no vessel shall proceed to sea.

A green occulting light is shown on the North Pier Head and a red occulting light on the South Pier Head, from sunset to sunrise.

Two fixed vertical green lights are shown on the Inner North Pier Head. These Inner Pier lights will be clearly visible from a vessel upon entering the harbour but will also be visible from certain directions before entry.

A "horn" signal is fixed on the South Pier Head for use in foggy weather. 4 blasts of 2 seconds each will be given every minute.
MAX. SIZE: Max. length approx. 450 ft. Draft up to 21 ft. MHWS. (Check with Port Authority for current situation.)
HEALTH: See "Health – All Ports" before first U.K. port.
TUGS: 3 tugs are available; tug's lines normally used.
BERTHING: *Outer Harbour* (comprising Hamilton and Waveney Docks and Trawl and Yacht Basins). Used largely for fish traffic:

Width at entrance	150 ft.
Depth at entrance	23 ft. MHWS
Water area	40 acres
Length of quays	4,500 ft.
Depth of water at quays	18 ft. MHWS 12 ft. MLWS

Inner Harbour. Used for general cargo and grain traffic.

Water area	70 acres
Length of quay	6,500 ft.
Depth of water at quays up to	23 ft. MHWS 17 ft. MLWS

CRANES: 1×200 tonne crane, 1×35 tonne crane and 1×32 ton container crane. Mobile cranes also available.
CARGO HANDLING FACILITIES: *Grain Silo:* Grain silo has a capacity of 13,000 tonnes and discharging and loading rates of 90 tonnes and 150 tonnes per hour respectively.
Containers: Container vessels are accepted, along with the general cargo carriers, in the port's Inner Harbour.
STEVEDORES: Shipping Agent should be advised of ETA, etc., to enable gangs to be available. Working hours: 0800 – 1700 hrs. Overtime as required.
MEDICAL: Advance notice desirable of medical attention required on arrival. Hospital facilities available in Lowestoft.
FRESH WATER: Can be supplied at various points on quays from hydrants with waterman in attendance. Normal hours 0800 to 1700 hrs. Monday to Thursday and 0800 – 1600 hrs. Friday, outside those hours overtime rates payable. Approx. flow 15 t.p.h.
FUEL: Marine diesel available from road tankers or fuel barge within the harbour. 24 hours notice is normally required for supplying gas oil or boiler fuel; this comes from road tankers.
FIRE PRECAUTIONS: Local fire services available in an emergency. Special arrangements can be made for taking fire-fighting equipment to sea. Normal harbour fire-prevention regulations apply to all berths.
OPENING/CLOSING HATCHES: Carried out by crew.
CONSULS:

Belgium	Tel:	Lowestoft	2301
Denmark	„	„	„
France	„	„	„
Netherlands	„	„	„
Norway	„	„	„

REPAIRS: All types of deck and engine repairs are possible in the port.
DRY DOCKS: One dry dock. Length 248 ft. Width at entrance 48 ft. Depth of water on sill 14.5 ft. MHWS.
AIRPORTS: Nearest international airport served by regular airlines is London (Heathrow). Smaller airport at Norwich (27 miles) not served by regular airlines.
POLICE/AMBULANCE/FIRE: In an emergency dial 999 and ask for service required. For normal enquiries: Police Lowestoft 2121; Ambulance Lowestoft 2572; Fire Lowestoft 2227.
GENERAL:
Air/Sea Rescue Services at R.A.F. Cottishall (35 miles).
Royal National Lifeboat Institution, lifeboat berthed at Lowestoft.
Modern transit sheds.
SERVICES: Compass adjusting. VHF, Radar, radio repairs. All ships' provisions are available by arrangements with the shipping Agencies.
SHORE LEAVE: Leave is permitted.
AUTHORITY: Associated British Ports, Port House, Lowestoft, Suffolk, NR32 1BG. *Tel:* (0502) 2286/7. *Telex:* 97448 Apblow G. *Contact:* A. R. Klinck, Port Manager.

LYDNEY: 51.43 N. 02.33 W. (See Plan Book)

PILOTAGE: Available from Sharpness.
RESTRICTIONS: Entry and exit only possible at HW and for a very short period afterwards.
VHF: Not permanently manned. Used solely for directing vessels. Standard multi-channel. Channel 16 for call up.
BERTHING: *Tidal Basin:* 82.3 m.× 22.8 m. Width of entrance 10.5 m. Depth at HWST 7.3 m.
Inner Dock: 237.7 m.×32 m. Width of entrance 7.0 m. Depth 3.6 m.
FRESH WATER: Limited supply from small bore tap.
FUEL: Not available.
AIRPORT: Gloucester (Staverton) 24 miles, Bristol 24 miles, Cardiff 30 miles.
GENERAL: The port does not offer any cargo handling facilities and traders need to make use of the overhead crane owned by Mallinson-Denny Limited. This is situated upstream of the inner lock gates and therefore severely limits the size of vessel which can enter.
AUTHORITY: Severn-Trent Water Authority, Lower Severn Division, Southwick Park, Gloucester Road, Tewkesbury, Gloucestershire GL20 7DG. *Tel:* Tewkesbury (0684) 294516. *Telex:* 43520. *Contact:* Mr. R. J. Bishop, Water Amenity Officer. W. B. Price, Harbour Master, Tel: (0594) 562303 (part-time only – 48 hours notice required).

MANCHESTER: 53.29 N. 02.14 W. (See Plan Book)

GENERAL: The port of Manchester includes the whole of the Manchester Ship Canal and Queen Elizabeth II Dock. The Canal is approximately 36 miles long from its entrance at Eastham on River Mersey to the Manchester Docks.
DOCUMENTS:
1 Maritime Declaration of Health.
1 Crew Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each Passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load-Line Certificate.
Safety Equipment Certificate.
Lloyd's Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.
In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Non-compulsory. Orders for Pilots may be lodged with the Pilotage Office at Eastham (Tel. 051-327 1233). As much notice as possible should be given, particularly in the case of inward-bound vessels due to arrive at Eastham. Helmsmen can be obtained in same manner.

RESTRICTIONS: Eastham Locks. The main entrance to the Canal is at Eastham where there are two locks side by side, one 600 ft. by 80 ft., and the other 350 ft. by 50 ft. The outer or lower sill of each lock is 11.36 ft. below Chart Datum (1975). The levels of upper sills of the 80 ft. and 50 ft. locks are 32 ft. and 29 ft. respectively below statutory water level in Canal.

Both locks are operated for incoming and outgoing vessels of suitable draft during a period of 8 hours on each tide, i.e. from 4 hours before high water to 4 hours after high water.

The Canal is constructed to give an available depth of water of 30 ft. from Eastham to Ince Oil Berth (5.375 miles) and of 28 ft. from Ince to Manchester Docks.

The size of vessel which can navigate the Canal is governed by the dimensions of locks, the height of fixed bridges and limitations for the draft of vessel.

Maximum length: The greatest length measured between perpendiculars drawn at the foreside of the foremost extremity and at the afterside of the aftermost extremity of the hull or any attachments to the hull shall not exceed 560 ft. The acceptance of ships proceeding above Ince with overall length greater than 530 ft. is subject to approval of the Harbour Master.

The length measured between perpendiculars drawn at the foreside of the stern and at the afterside of the rudder post, or through centre of the rudder stock if there is no rudder post, on the Summer load waterline shall not exceed 535 ft.

The length measured between perpendiculars drawn at the afterside of the rudder plate and at the foreside of the foremost extremity of any part of the hull which is below a horizontal line drawn through the top of the rudder plate shall not exceed 544 ft.

Maximum beam: Vessels not proceeding beyond Ince Oil Berth: 72 ft. overall. Vessels proceeding beyond Ince Oil Berth: 63 ft. 6 in. overall.

Provided the height of masts and/or funnels or other structures is not more than 70 ft. 9 in. from water-line, vessels can pass under all fixed bridges under normal conditions. As, however, the headroom is less during periods of high-water levels, a vessel, in order to avoid possible detention, should reduce masts and funnels or other structures to 70 ft. above the water-line. The restriction as regards height does not apply to vessels proceeding only as far as Runcorn Bridge.

Facilities are available at Eastham for removing and replacing tops of masts and funnels.

MAX. SIZE: When vessels are loading inwards for the Canal, Masters should take these facts into their calculations and have regard to the following limitations, all of which are expressed as maximum draft in fresh water:

Vessels inward bound to a berth	*Arrival draft (in fresh water) at Eastham not to be such as would exceed:*
Between Eastham Locks and Ince Oil Berth	28 ft. 10 in.
Between Ince Oil Berth and Latchford Locks (Other than Runcorn Docks)	26 ft. 06 in.
Between Latchford Locks and Mode Wheel Locks	24 ft. 00 in.
In the Manchester Docks upstream of the Inner Gates of Mode Wheel Locks and downstream of the Railway Swingbridge.	22 ft. 00 in.
In the Manchester Docks upstream of the Railway Swingbridge to No. 3 Dock Pomona	14 ft. 00 in.

Vessels loading outward at any point between Eastham Locks and Ince Oil Berth should not have a draft exceeding 28 ft. 6 in. upon completion of their loading in this section.

Vessels loading outwards at any point between Ince Oil Berth and Latchford Locks (other than Runcorn Docks) should not have a draft exceeding 26 ft. 6 in. upon completion of their loading in this section. Vessels requiring to swing in the Manchester Dock Basin should not have a draft exceeding 22 ft. 00 in. upon completion of their loading in this section.

Vessels loading outward at any point between Latchford Locks and Mode Wheel Locks should not have a draft exceeding 24 ft. 00 in. upon completion of their loading in this section. Vessels requiring to swing in the Manchester Dock Basin should not have a draft exceeding 22 ft. upon completion of their loading in this section.

Vessels loading outward at any point in the Manchester Docks upstream of the Inner Gates at Mode Wheel Locks and downstream of the Railway Swingbridge should not have a draft exceeding 22 ft. 00 in. upon completion of their loading in this section.

Vessels loading outward in the Manchester Docks upstream of the Railway Swingbridge to No. 3 Dock Pomona should not have a draft exceeding 14 ft. 00 in. upon completion of their loading in this section.

Large vessels can swing in the basins at Stanlow and Manchester Docks. Small vessels can swing at certain other points on the Canal.

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an officer of H.M. Customs depending on where ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All Ports" before first U.K. port.

TUGS: The Canal Company maintains a fleet of high-powered tugs which may be hired to assist vessels, 12 hours notice required.

(A) MEDWAY (See Plan Book)

PILOTAGE: Sunk Pilot Station: The Sunk Pilot Cutter, painted black with a buff funnel and the word "Pilots" painted on her sides in white and at night exhibiting lights and signals in accordance with Rule 29 of the International Rules for the Prevention of Collision at Sea, cruises in the vicinity of the Sunk Light Vessel to provide Pilots for ships heading for the Medway and other ports in the London Pilotage District, and disembark Pilots from outward bound ships. In very severe weather the cutter may move to smoother water, usually in the vicinity of the West Sunk or Gunfleet Spit Buoys. In these circumstances shipping is warned by means of radio navigation warnings from North Foreland, Humberside and Scheveningen Radios, which gives the cutter's position.

The attention of Masters is drawn to the requirement of stopping a satisfactory lee for the pilot cutter's boarding boats. These 18 ft. boats have a maximum speed of 5 knots.

Contact Procedure: Vessels wishing to contact the pilot vessel at the Sunk by radio telephony direct may:

(i) When within M/F range (approximately 50 miles) call the cutter on 2182 kHz (M/F). The working frequency is 2241 kHz.

(ii) When within VHF range (approximately 25 miles) call on Channel 16. The working frequency is Channel 6.

The Sunk Pilot Cutter may also be contacted by either W/T or R/T through any Post Office Coast Station addressed "Sunk Pilot" via North Foreland Radio. Alternatively messages to the Harwich Pilot Station, Tel: Harwich (02555) 3129 or 6300, Telex: Pilots Harwich 98472, will be passed direct to the Sunk Cutter.

The attention of Masters of VLCCs is drawn to the special arrangements for Pilot boarding described below:

VLCCs requiring a Pilot at the Sunk Station should give the pilot vessel 12 hours' in advance and through a Post Office Coast Station or the Harwich Pilot Station, their estimated time of arrival, gross tonnage and port of destination. Confirmation of ETA should be given at least 2 hours before arrival. Anything less than 2 hours notice must involve ships in delay.

Pilot Boarding Arrangements for VLCCs: The Masters of all VLCCs requiring a Pilot at the Sunk Pilot Station are requested to comply with the following directions so as to ensure that the boarding operation can be carried out with the minimum inconvenience to the ship and the optimum safety.

The Master of the VLCC should establish voice contact with the Sunk Pilot Cutter at the earliest possible time.

The Sunk Pilot Cutter will advise the Master:

(a) The position in which the Pilot will board and the time of boarding.

(b) The mode in which the Pilot will board, i.e. with the VLCC at anchor or under way. If under way then the speed ordered should be minimal consistent with maintaining steerage way.

In the interests of safe boarding of the Pilot, the VLCC should not proceed inwards of the agreed boarding position.

Vessels bound for the Medway from Rotterdam or ports North of Rotterdam may embark their Pilot at the previous port. Vessels requesting this facility should contact Harwich Pilots, Tel: Harwich (02555) 3129 or 6300, Telex: Pilots Harwich 98472, giving as much notice as possible, stating name and draft of vessel, port and terminal of embarkation, ETD, and whether or not North Sea pilotage is required.

Folkestone. Vessels for River Medway that are approaching from the South obtain Inward Sea Pilot at Folkestone Pilot Station. Telex: 96381. Tel: Folkestone 56766. Telegraphic Address: "Pilots, Folkestone". Notice required: preferably 24 hours notice ETA, then confirmation 12 hours prior arrival with ETA, draft, gross tonnage and destination.

Pilot boards from launch 1 mile South of Folkestone Pier. Contact Pilots by VHF Channel 16, then Channel 9, two hours before arrival (call sign "Folkestone Pilots Radio").

Deep drafted vessels can be provided with Pilots in deeper water by arranging to be met by the Sunk Pilot Vessel in a suitable position about 3 miles East of the Sunk Light Vessel.

North East Spit: Vessels approaching within the range Dieppe/Amsterdam obtain inward ISP between the "Elbow Buoy" and "East Margate Buoy". Telegraphic address: "Pilots, Folkestone". Telex: 96381. Tel: Folkestone 56766. Advance notice essential as Pilots not always on station. Notice required: preferably 6 hours giving ETA, draft, gross tonnage and destination, confirming 2 hours prior to arrival. Contact Pilots on VHF Channel 16, changing to Channel 9 for working (call sign "North East Spit Pilot Radio"). Light or sound signals as per International Code. Pilot boards between the "Elbow Buoy" and the "East Margate Buoy", depending on weather, by fast launch which is stationed in Ramsgate Harbour. Contact Pilots on Channel 16, changing to Channel 9 for working.

Medway: Medway Pilots join ships at Little Nore Sheerness for all Medway ports, i.e. Isle of Grain, Sheerness, Oakham Ness, Otterham, Rochester, Queenborough and Ridham. Telegraphic Address: "Pilot Sheerness". Tel: Sheerness 662276. Notice required, minimum 2 hours. Pilots may be contacted through Medway Radio on VHF Channel 74 or pilot launch keeps watch on Channel 74 when in service. Lights and sound signals as per International Code.

VHF/RADAR: Medway Port Operations and Information Service (Medway Ports Authority) is situated at Garrison Point, Sheerness. Tel: Sheerness 663025. Telex: 96435 (call sign "Medway Radio"). Fitted with VHF, Channels 16, 74, 9 and 22. The station has radar service surveillance of Inner Estuary, Sea Reach, Medway Approach Channel and Lower Reaches of River Medway.

REGULATIONS: All vessels required to proceed in accordance with instructions of Port Authority. Vessels are requested to advise Medway Ports Authority – Medway Port Operations Service (call sign "Medway Radio") VHF Channels 16, 74, 9 and 22 of ETA, shifting of sailing movements.

Prior notification to the Medway Ports Authority is required, detailing the carriage of all explosives and "dangerous goods".

GENERAL:

Tidal Information:

Tidal streams in the River Medway vary between about 2.5 knots at Springs and 1.5 knots at Neap Tides, although velocities vary considerably from Reach to Reach, the areas of maximum encountered velocities are: off Garrison Point Sheerness and through Rochester Bridge.

Average Tidal Heights are as follows: (metres)

Sheerness	5.7 MHWS	4.8 MHWN
Chatham	6.0 MHWS	4.9 MHWN
Rochester	6.2 MHWS	5.0 MHWN

High Waters occur approximately:

Margate	45 minutes	before Sheerness
Herne Bay	20 minutes	before Sheerness
Whitstable	10 minutes	before Sheerness
Rochester	9 minutes	after Chatham
Wouldham	28 minutes	after Chatham
New Hythe	33 minutes	after Chatham
Allington Lock	41 minutes	after Chatham

Tide Tables may be obtained at the offices of the Medway Ports Authority.

(B) SHEERNESS: 51.27 N. 00.44 E. (See Plan Book)

Situated on Isle of Sheppey at junctions of Thames and Medway Rivers.

DOCUMENTS: See "London".

PILOTAGE: See "Medway".

ANCHORAGES: For vessels entering River Medway up to 107 m. length, Little Nore Anchorage, Sheerness. Over 107 m. length – as directed by Medway Port Authority (Medway Radio) or Thames Navigation to Great Nore, Sea Reach or Warps.

RESTRICTIONS: Subject to tidal conditions and under keel clearance appropriate size of vessel. Minimum depth of Medway Approach Channel 8.5 m. at Chart Datum.

Entry as directed by Medway Port Operations (Medway Radio). Station keeps watch on VHF Channels 16, 74, 9 and 22.

Occasional restriction for vessels over 130 m. overall length entering approach channel between sunset and sunrise when the Traffic Warning Lights are exhibited from Garrison Point.

MAX. SIZE: Five deep water terminals for vessels up to 230 m. in length and 11.0 m. in draft.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Portishead. Local Stations: From South – Lands End, Niton, Northforeland. From North, Cullercoats, Humber, Northforeland.

VHF/RADAR: See "Medway".

TUGS: River Medway – For Sheerness, Ridham Dock, Isle of Grain, Oakham Ness – Tugs usually meet vessels at Garrison Point Sheerness. Tug's lines used, no extra charge.

BERTHING: Sheerness, deep water berths and Ferry Terminal – as directed by Medway Port Operations and Information Service (Medway Radio).

Berths equipped for handling containers, forest products, motor vehicles and wine in bulk and for general cargo of all kinds, including fresh fruit and vegetables.

Storage facilities available for bulk wine, vehicles, forest products and the warehousing of general cargo.

Sheerness Deep Water Berths – No. 1 – suitable for vessels up to 230 m. length and 11.0 m. draft.

No. 2. Suitable for vessels up to 210 m. length and 11.0 m. draft.

No. 3. Suitable for vessels up to 230 m. length and 11.0 m. draft.

No. 4. Suitable for vessels up to 230 m. length and 9.0 m. draft.

Ferry Terminal – Berth 11. Suitable for either bow or stern door vessels of up to 165 m. in length and 7.0 m. in draft. Present service twice daily Sheerness/Flushing and vice versa.

STEVEDORES: All stevedoring at Sheerness is provided by the Port Authority.

CRANES:

Berth No.	*Remarks*
1	3 – 3 & 5 tonne Electric
	1 – 7.5 tonne Electric

2 Cargo Declarations.
1 Oil Pollution Certificate (OPIC).

PILOTAGE: See "Medway".

ANCHORAGES: *Estuary Passage and Anchorages:* Vesse proceeding to Isle of Grain will initially contact the Thames Navigatio Service (Gravesend Radio Channels 16-12) and comply with th 'General Directions for Navigation in the Port of London 1975' un entering the Medway Area. Prior contact should be made with th Medway Ports Operations Centre (Medway Radio, Channe 6-74-9-22). Anchorages are allocated according to size and draft vessel and if outside the Medway area are nominated by the T.N.S.

RESTRICTIONS: Tidal port. 24 hour movements, subject to tid conditions and under-keel clearance appropriate to size of vessel. Th declared depth in the Medway Approach Channel is 8.5 m. at cha datum.

MAX. SIZE: 40,000 tonnes Summer deadweight and 250 m. LOA.

HEALTH: Under new procedures which apply from April 1st, 1978 Health Clearance is only required if the vessel is "Suspect". In this cas the Port Health Authority should be advised by radio messa addressed to "Portelth London" not more than 12 hours and whe practicable not less than 4 hours before arrival.

See "Health – All Ports" before first U.K. port.

RADIO:

Notice of 72 hours and over – Portishead Radio.
Notice of 12-72 hours – Landsend Radio.
Notice up to 12 hours – from South, Northforeland Radio.
– from North, Humber Radio.

RADAR/VHF: See "Medway".

TUGS: 3 tugs available, one equipped for fire-fighting. Tugs join ar leave vessels at Garrison Point, Sheerness. Normally use tug lines, co included in tug hire.

BERTHING: There are 3 main jetties suitable for coastal and ocea going vessels (Nos. 3, 4 and 7). Jetties 1, 2, 5, 6, 8 and 9, No. 1 coast and No. 1 barge jetty are all closed. Jetties 3, 4 and 7 are of 'T' heade design and can accommodate vessels of various sizes up to a maximu of 70,000 tonnes Summer deadweight and 250 m. LOA. Maximum sa drafts for the Medway Approach Channel and on the berths can advised on request.

Ballast water containing Petroleum may normally be discharged in the Company's oily ballast system by arrangement.

DENSITY: Approx. 1020.

FRESH WATER: Available all jetties by pipe-line.

FUEL: Only gas oil is available from Nos. 3 and 4 jetties, pr arrangements can be made for the delivery of other fuel oils by barg

MEDICAL: Advance notice of medical attention and inoculatio required is advisable. Hospital facilities available in surrounding area

FIRE PRECAUTIONS: *Safety Regulations:* A copy of the BP Oil Ke Refinery Jetty Safety Regulations is put on board each vessel on arriva The booklet additionally contains various tear-out check lists, forms confirmation of bunker requirements and requests for immobilisatio and permitted repairs. These must be completed by ship and sho representatives before operations commence.

GANGWAY/DECK WATCHMEN: *Gangways:* Vessels provide the own gangway at all jetties and are responsible for maintaining it as safe means of access.

REPAIRS: Local marine repair company can undertake repairs general nature. No drilling or hot-work permitted alongside jetties.

REPATRIATION: All facilities for repatriation by land, sea and a through London and Dover. Attendance of British Ministry and Foreig Consulate Officials arranged through Agent.

POLICE/AMBULANCE/FIRE: The Refinery Fire Service (which als operates an ambulance) can be summoned by dialling 222 on th Refinery telephone system. This procedure should be followed in ar emergency – e.g., a major accident or hose failure, etc.

Refinery Security can be contacted by dialling 221. Any request f attendance by the County Police should be made through Refine Security Dept.

TELEPHONES: Public telephone kiosks on the foreshore road.

CUSTOMS ALLOWANCES: At the discretion of the local Custom Officer. Normal allowances are 200 cigarettes (F.G.) or 100 cigarette (H.T.) or equivalent and 1 bottle of spirits per man. Additionally 1.5 litre of wine per man per day. Separate arrangements apply when crew a leaving ship. Vessels in port more than 4 days may receive an addition allowance.

TIME: British Standard Time is GMT plus 1 hour. GMT in Winter month

SHORE LEAVE: A Security Warden will board each vessel on arrival collect from the Master a copy of the crew list. This should specify whic crew members are leaving the vessel, the names of wives or othe visitors expected and, if known, details of crew members joining. should also note if any crew members are not permitted to go ashore

The list will be retained at the Security Gate and passes will be issue when crew members pass out and collected from them on their retur Crew leaving should be issued with baggage passes by the ship.

GENERAL: Agents have difficulty in providing most services at wee ends, therefore, requests for Bond, cash, Consular Officials, etc., shoul be radioed as soon as possible.

OPERATOR: BP Oil Kent Refinery Ltd., Isle of Grain, Nr. Rocheste Kent. *Tel:* Medway (0634) 278000. *Telex:* 965584. *Contact:* C. B. Hoo Marine Officer.

AGENT: See "Rochester".

(D) CHATHAM DOCKYARD: 51.24 N. 00.33 E. (See Plan Book

Until 1984 the Naval Dockyard and now operated by the Medwa (Chatham) Dock Co. Ltd., under the control of the Medway Port Authority.

DOCUMENTS: See "London".

PILOTAGE: See "Medway".

ANCHORAGES: See "Sheerness".

RESTRICTIONS: Movement of vessels subject to tidal conditions and under keel clearance appropriate to the size of vessel. Entry as directed by Medway Port Operations (Medway Radio). There are occasional restrictions for vessels over 130 m. in length between sunset and sunrise.

Limiting Depths: Medway Approach Channel 8.5 m. at Chart Datum.
Long Reach 5.8 m. at Chart Datum.
North Lock 3.9 m. at Chart Datum.
South Lock 3.5 m. at Chart Datum.

MAX. SIZE: All working berths in No. 3 Basin can accommodate vessels drawing 8.5 m. Max. length for the locks 143 m. and 25 m. beam.

HEALTH: See "Medway (Rochester)".

RADIO: Portishead. From South: Lands End, Niton, North Foreland. From North: Cullercoats, Humber, North Foreland.

VHF/RADAR: See "Medway".

TUGS: 3 tugs available, operated by J. P. Knight Ltd., prior notice required via ship's Agent. Tug(s) join in Gillingham Reach.

BERTHING: Access to all 3 basins is via the North or South Lock situated at Bull Nose in Gillingham Reach. Dry Docking and repair facilities are available in No. 1 Basin. (Thames Ship Repairers Ltd. Tel: Medway 813041).

All 8 cargo handling berths are presently confined to No. 3 (Outer) Basin.

Berth No.	*Length (m.)*	*Cranes*	*Remarks*
1	168	None	Vehicle import/export terminal.
2	140	None	Ro-Ro ferry.
3	140	2×5 tonne	General cargo.
4	140	2×10 tonne	General cargo, Sto-Ro vehicles.
5	168	1×5 tonne	Ro-Ro, common user.
6.	122	2×5 tonne	General cargo, Sto-Ro vehicles.
7	122	1×40 tonne	Container, common users, heavy lift.
8	168	2×5 tonne	Forest products, Sto-Ro terminal.

Storage facilities are available.

For further details contact: Mr. J. Dixon, Tel: Medway 405397.

STEVEDORES: All stevedoring provided by the Dock Company.

MEDICAL: Advance notice of medical attention and inoculations required is advisable. Hospital facilties available in surrounding area.

DENSITY: 1020 (within No. 3 basin).

FRESH WATER: Metered supply available on all berths.

FUEL: No facility within the dockyard for the supply of fuel, although subject to weather conditions being suitable, bunkering from barges can take place in the anchorages.

GANGWAY/DECK WATCHMEN: Ship's responsibility.

SURVEYORS: Cargo surveyors available from London or Gravesend.

REPAIRS: All types of deck and engine repairs can be carried out either in berth, in dry dock or at river buoys.

DRY DOCKS: Sheerness: 2 dry docks available; the largest for vessels up to 86 m.

Basin No. 1 in Chatham Dockyard – 2 dry docks available operated by Thames Ship Repairers Ltd. Tel: Medway 813041. Max. size of vessel: 215 m.×26 m.×10m. 120 tonne heavy lift crane available.

REPATRIATION: Usual facilities available for crew changes. Repatriation can be arranged by various sea routes or by air through Heathrow or Gatwick.

TELEPHONES: No telephones are placed aboard vessels nor are public telephones available on the quay side other than in offices in close proximity. In an emergency contact Docks Security on Medway 827130 or Medway Port Operations and Information Service, call sign "Medway Radio" on Channel 16 or 74 or 11 (Tel: Sheerness 663025).

ANCHORAGES: See "Sheerness".

RESTRICTIONS: No entry restrictions only as to state of tide and draft and as directed by Medway Radio (Medway Port Operations and Information Service, Garrison Point). Station keeps watch on Channel 16, 74, 22 and 9. Channel 14 is allocated for port operations generally. For vessels exceeding 106.67 m. (350 ft.) in length, daylight navigation.

MAX. SIZE:

Ship Berths: Max. Length: 114 m. (122 m. LOA with special dispensation obtained from the Harbour Master. Bow thruster, tug, etc., required). Max. draft 7.6 m.

River Berths: Length 49 m. – 122 m. Depth 4.3 m. – 7.6 m. MHWS 2.7 m. – 6.1 m. MHWN. Max. LOA 46 m. – 122 m.

HEALTH: Pratique obtained on arrival at Berth.

Also see "Health – All Ports" before first U.K. port.

RADIO: From South: Lands End, Niton, Northforeland. From North: Cullercoats, Humber, Northforeland.

TUGS: J. P. Knight (Rochester) Ltd., 348 High Street, Rochester (Tel. Medway STD 0634 – 42408 and Sheerness STD 0795 – 662821), cover the whole of the Medway Ports Area.

The following companies operate within the Medway Ports Area on a smaller scale with towing and recovery services:

Medway Towing & Light Recovery – Medway STD 0634 – 54300
N.E. Murray (Marine Contractors) – Sheerness STD 0795 – 663701
P. E. Woodger (Craft Hire) Ltd. – Sittingbourne 23874
Mr. J. Oliver – Medway STD 0634 – 406525

BERTHING:

Rochester: There are 5 dredged berths maintained by the Medway Ports Authority and mooring buoys to accommodate 118 lighters and 14 LASH barges situated between Chatham Reach and Rochester Bridge.

Size restrictions vary from 46 m. to 140 m., the latest minimum depths can be obtained from the Medway Ports Operations and Information Service situated at Sheerness (Garrison Point).

The facilities or riverside berths are operated by commercial interests:

Arco Shipping Ltd. at Neptun Wharf	Medway 34011
Transit Freights Ltd. at Crown Wharf	Medway 75686
Honigs (Rochester) Ltd. at Limehouse Wharf	Medway 46261
Wm. Cory & Sons Ltd. at Cory's Wharf	Medway 41022
Anglosped Ltd. at Stanley's Wharf	Medway 409365
Lynch and Sons Ltd. at Lynch's Wharves	Medway 77831
Crescent Shipping Ltd. at Barnetts Wharf	Medway 79541/8
John Howards Ltd. at Crown & Quarry Wharf and Howards Wharf	Medway 402040 (20 lines)

Details of alongside berths handling equipment, latest depths and relevant information can be obtained from the appropriate wharf concerned.

Current depths can be ascertained from Medway Port Operations Service.

Pier Wharf: (Lat. 51° 24′ North; Long. 0° 33′ East)

Situated at the Western Arm of Gillingham Dock and operated under a consortium of companies. Length of wharf 183 m. with varying depths from 3 m. to 5 m. at MHWS. Mobile crane of 4 tonnes and forklift of 4,000 lbs. Storage warehouses and storage capacity available.

Ship repair and boat builder – Medway Marine Structures – STD 0634 - 576600.

Tylers Wharf: (Lat. 51° 24.6′ North; Long. 0° 34′ East)

Situated at West Hoo Creek owned and operated by the Lifeline Moulding Co. Ltd. Length of wharf 73 m. with a depth of 3 m. at MHWS. Large sheerlegs of 30 tons and mobiles available. Boat builders and outfitters.

Mooring Facilities: Buoys are provided at points within the River Medway and Swale. Arrangements to use these buoys and current charges can be made through the Medway Ports Authority.

Kethole Reach: Buoys 20, 21, 22, 23 and 24: 4 fore and aft moorings to accommodate vessels up to 200 m. length and 16,000 tonnes displacement.

Saltpan Reach:

Buoy No.	*Class*	*Maximum Displacement*	*Remarks*
1	3rd	8,000 tons	
2	Super 1st	70,000 tons	
4	Super 1st	70,000 tons	
5	4th	3,500 tons	BACO
6	4th	3,500 tons	LASH
7	4th	3.500 tons	LASH
8	4th	3,500 tons	LASH
9	4th	3,500 tons	LASH
10	4th	3,500 tons	LASH
11	4th	3,500 tons	LASH

MEDICAL: Port Medical Officer available if necessary on arrival at Sheerness with 24 hours notice to Agents. Doctor and hospital facilities available at Rochester.

DENSITY: 1020 unless excessive land water coming down river.

FRESH WATER: Quantities up to 200 tons available for delivery by water barge.

FUEL: Oil bunkers may be obtained at the main installation at the Isle of Grain Oil Refinery or by barge or by road tanker. The last 2 methods require minimum 48 hours notice, similarly with supplying lubricating oil which is not available at the Isle of Grain.

OPENING/CLOSING HATCHES: To be carried out by crew.

CARGO GEAR: Discharge by ship's gear at ship berth and by mobile cranes up to 10 tons at all river berths.

CONSULS:

Vice-Consul Netherlands, Tel. Medway 43256.
Consul Sweden, Tel. Medway 44632.
Vice-Consul Finland, Tel Medway 44632.

REPAIRS: The Medway Dry Dock Co. Ltd. (Tel: Sheerness STD 0795 – 662241/662461) provide 2 Dry Docks of 87.84 m. and 65.58 m. respectively. A smaller slipway is available and alongside berths also.

The Medway Slipway Yard at Rochester High Street of Doust and Company Limited (Tel: Medway STD 0634 – 43087) provide ship repair facilities and operate 2 slipways. The larger can accommodate up to 600 tonnes and 55 m. in length. Afloat repair facilities and riverside berths also available.

Acorn Shipyard (ex New Medway), Gas House, Rochester, Kent ME1 1PJ (Tel: Medway STD 0634 – 41355/6/7), provide ship repair facilities at the Isle of Grain; Sheerness and River Medway, and operate 1 patent slipway of 85.0 m. working length and 1 grid situated at Rochester.

DRY DOCKS: All repair facilities available on river berths for vessels up to 60.96 m. (200 ft.) in length; on a grid for up to 76.19 m. (250 ft.), and a slipway for up to 42.67 m. (140 ft.).

AIRPORT: London Airport (Heathrow), Southend Airport and Gatwick.

POLICE/AMBULANCE/FIRE: Dial 999 and state service required and where vessel berthed, also contact Medway Radio in cases of emergency.

SERVICES: Compass adjustors available.

REGULATIONS: See "Medway".

DEVELOPMENTS: Continued expansion and reclamation at Sheerness: Development of Frindsbury Marshes (Rochester).

AUTHORITY: Medway Ports Authority.

AGENT: Norpark Shipping Co. Ltd., Bridge Wharf, Horse Wash Lane, The Common, Rochester, Kent ME1 1PV. Tel: (0634) 815761. After Hours (0634) 366988, (088332) 736. Telex: 966422.

(F) OTHER FACILITIES:

(1) BLOORS WHARF – RAINHAM CREEK: 51° 22′ 48″ N., 00° 36′ 42″ E.
Situated at the head of Rainham Creek a distance of 10.3 nautical miles from Rochester. Main wharf 183 m. long with 3.1 m. at MHWS. The Western arm is 61 m. long with a depth of 2.1 m. at MHWS.

The Wharf is owned and operated by Medway Secondary Metals Ltd. (A British Anzani Company). Telephone: STD 0634-34411. Mobile cranes, forklifts and crushing equipment available. Large storage capacity and warehouses also available. Shipbreaking and re-cycling of metals.

(2) FAVERSHAM: 51° 19′ N., 00° 54′ E.
DOCUMENTS: See "London".
PILOTAGE: Not compulsory. Advisable to engage local person by arrangement with Agent or contact Medway Port Operations and Information Service.
ANCHORAGE: The Swale (East) 1 mile (approx.) upstream of the Sand End buoy.
RESTRICTIONS: No night restrictions. Tidal creek – vessels enter from 1.5 hours before High Water according to draft.
MAX. SIZE: 43 m. LOA, 7.6 m. beam, 2.7 m. draft, on Spring tides only.
RADIO: North Foreland.
VHF/RADAR: See "Medway".
TUGS: None available.
BRIDGES: Maximum size of vessels proceeding to basin above Faversham Swing Bridge – 43 m. length, 7 m. beam. Draft – the minimum clearance for vessels up to 34 m. in length is 0.5 m. over the sill, and for longer vessels 0.6 m. over the sill.
MEDICAL: Notify Agent of any medical treatment required.
FRESH WATER: Available on some berths.
FUEL: No local installation. Bunkers may be obtained by road tanker – contact Agent.
REPAIRS: Minor repairs can be carried out locally. For nearest grid, slipway and dry dock facilities see "Rochester" and "Sheerness".

(3) KINGSNORTH: 51° 25′ N., 00° 36′ E.
DOCUMENTS: See "London".
PILOTAGE: See "Medway."
ANCHORAGES: Vessels proceeding to Kingsnorth must contact Medway Ports Operations Centre (VHF Channels 16 and 74) when a designated anchorage will be allocated appropriate to the size of the vessel.
RESTRICTIONS: Tidal port. 24 hour movements, subject to tidal conditions and underkeel clearance appropriate to size of vessel. Minimum depth of approach channel 8.5 m. at Chart Datum.
MAX. SIZE: Max. length: 229 m. No breadth restriction. Depth: 6.3 m. min. depth alongside at Chart Datum.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Notice of 72 hours and over, Portishead Radio. Notice of 12-72 hours. Landsend Radio. Notice of up to 12 hours, from South, Northforeland Radio, and from North, Humber Radio.
RADAR/VHF: See "Medway".
TUGS: Although tugs are not normally required for berthing at Kingsnorth 3 tugs are available, 1 of them equipped for fire fighting. Tugs join and leave vessels at Garrison Point, Sheerness. Normally use tug lines, cost included in tug hire.
BERTHING: *Kingsnorth Jetty:*
Lat. 51° 24′ 36″ N.
Long. 0° 36′ 18″ E.

The jetty is owned and operated by C.E.G.B. (Kingsnorth) and is situated at the Western end of Long Reach a distance of 6.3 nautical miles from Sheerness and 5.85 nautical miles from Rochester.

The jetty is of concrete construction and is 580 m. long and "L" shaped with a 306.3 m. face, there is a single upstream connected dolphin making an overall face of 330.7 m.

The size of vessels using the jetty are governed by draft.
Minimum depth at MLWS is 6.9 m.
MHWS is 12.8 m.

There is an inner spur situated on the approach arm 396 m. from the jetty face. It is primarily intended for stern Ro-Ro craft, and has 2 starboard berthing dolphins situated at 30.5 m. and 61.0 m. respectively.
Depth at MLWS is 0.6 m. above Chart Datum.
MHWS is 5.3 m.

The jetty is used for the import of coal for Kingsnorth Power Station.
Address: Kingsnorth Power Station
(South Eastern Region)
Hoo, Rochester,
Kent ME3 9NQ
Telephone: STD 0634 – 250088 Telex 965015

MEDICAL: Advance notice of medical attention and inoculations required is advisable. Hospital facilities available in surrounding areas.
TANKERS: Advisable radio Agents connection sizes required. No slop tank available. 1 large tanker berth only.
DENSITY: Approx. 1018.
FRESH WATER: Available by pipe-line on jetty.
FUEL: Bunkers not usually available on jetty, but may be delivered by barge. Advance notice essential.
FIRE PRECAUTIONS: No immobilisation or repairs allowed without prior authorisation. No hot-work allowed alongside jetty.
GANGWAY/DECK WATCHMEN: Services of shore watchmen not necessary. Shore gangway may be used.
REPAIRS: Local marine repair company can undertake repairs of general nature. No drilling or hot-work permitted alongside jetty.
REPATRIATION: All facilities for repatriation by land, sea and air, through London and Dover. Attendance of British Ministry and Foreign Consulate officials arranged through Agent.
POLICE/AMBULANCE/FIRE: Dial 999 from public call box. Medway Ports Operations Centre can be alerted on Channel 16 and 74 to call these services.
TELEPHONES: No facilities exist for placing telephones onboard.
GENERAL: Agents have difficulty in providing most services at weekends, therefore, requests for bond, cash, consular officials, etc., should be radioed as soon as possible.

(4) OAKHAM NESS JETTY: 51° 24′ 55″ N., 00° 38′ 45″ E.
The jetty is jointly owned and operated by C.E.G.B. and K.C.A International Ltd. and is situated in Kethole Reach a distance of 4.5 nautical miles from Sheerness (Garrison Point). The jetty is of concrete construction and is 1,960 m. long. The jetty head is 27.5 m. long with upstream and downstream attached dolphins making a 85.0 m. face. There are 2 further berthing dolphins unattached, both upstream and downstream. The max. size of vessel permitted on the jetty is restricted to 55,000 d.w.t. with a max. length of 229 m.
The depth at MLWS is 10.6 m.
at MHWS is 16.7 m.

C.E.G.B. have a separate storage capacity of 300,000 tons for crude oil primarily for Kingsnorth Power Station.

(5) OTTERHAM QUAY – RAINHAM: 51° 22′ 30″ N., 00° 37′ 42″ E.
Situated at the head of Otterham Creek a distance of 2.75 nautical miles from the junction of Long Reach and Kethole Reach and 10.25 nautical miles from Rochester.

There is 192 m. of quay space with a max. length restriction imposed on loaded vessels of 73 m. There is 3.3 m. at HWNT and 4.6 m. at HWST.

Dockside and mobile cranes up to 9 tonnes are available, fleet of fork lift trucks with 3 tonne capacity.

There is 8,984 sq.m. of wharf stacking area together with 15,217 sq.m. of warehousing available. Cold storage facilities of 1,003 sq.m. are also available.

The Quay is owned and operated by Crescent Shipping (sole proprietors London and Rochester Trading Co.). Telephone STD 0634-35121 Telex: 96312.

(6) QUEENBOROUGH: 51° 26′ N., 00° 44′ E.
Area of harbour extends from Queenborough Spit to Long Point in the West Swale. Queenborough Creek is landlocked and small commercial interests operate within the creek which is buoyed, all berths dry out but are safe berths.
MHWS 5.8 m. Weather – prev. S.W.

The ex-Coal Wharf known as the Washer Wharf, situated at Loder Hope is operated by Senorvic Ltd. (Tel: Sheerness 663065) and is primarily used for loading scrap metals.

(7) RIDHAM DOCK: 51° 23′ N., 00° 46′ E.
Situated 900 m. (0.5 nautical mile) S.E. of Kingsferry Bridge in the Swale. Restrictions on vessels governed by London Pilotage Committee in the light of water available in the Swale, Kingsferry Bridge and restricted bends in the navigational channel. Max. LOA 102 m. Beam 16.8 m. and draft 6.7 m.

Beam of vessels transitting Kingsferry Bridge restricted to 15.3 m maximum.

Vessels of 82 m. and over LOA require a tug in attendance.

Ridham dock is owned and operated by Independent Sea Terminals (Tel: STD 0795 – 70881). The terminal has 4 berths, 2 of 244 m. and 2 o 213 m. approximately. These are serviced by 8 electric cranes 2× tonnes and 6×5 tonnes. There is a fleet of forklift trucks 8,000 lbs. t 36,000 lbs. plus a 25 ton container handler. 5 hectares of marshalling area for containers including refrigerator points.

Vessels dock only on or near HW and take the ground at LW, the bottom being soft mud. Special facilities for reefer ships going aground.

The terminal covers approximately 26.7 hectares and 13,000 sq.m. warehousing are available.

Authority: Independent Sea Terminals Ltd., Ridham Dock Sittingbourne, Kent. *Tel:* 0759 70881. *Telex:* 96409. *Contact:* R. F Shortland, Managing Director.
AGENT: See "Rochester".

METHIL: 56.11 N. 03.01 W.

DOCUMENTS/PILOTAGE: See "Leith".
ANCHORAGES: Deep water anchorages available in Largo Bay.
RESTRICTIONS: Dock gates opened from 3 hours before HW until H
MAX. SIZE: Max. beam 14.4 m. to pass dock gates.
RADIO: See "Leith".
VHF: Methil Harbour Radio on Channel 16.
TUGS: Available from Leith.
BERTHING: No. 1 Dock has 340m. of berthing space, max. dep alongside 6.7 m. MHWS. No. 2 Dock has 500 m. of berthing space, ma depth alongside 8.2 m. MHWS. Transit shed with 1,120 sq.m.
CRANES: 4×4 tonne mobile cranes (with grabs) available.
BULK CARGO FACILITIES: 2×1,000 tonnes capacity grain silos a discharge plant at No. 1 Dock (private).
STEVEDORES: Local company supplies labour.
AUTHORITY: Forth Ports Authority, Dock Office, Methil. *Tel:* Lev 26725. *Contact:* Captain I. C. Bayliss, Harbour Master. Capt R. Taylor, Port Manager.

MILFORD HAVEN: 51.42 N. 05.10 W. (See Plan Book)

PORT LIMITS: The seaward boundary of the port is 3 miles from St. Ann's Head.

DOCUMENTS:

5 Crew Lists.
2 Crew Stores Declarations (C.142)
3 Ship Stores Declarations (C.14)
2 E.E.C. Safety Check Lists.
Agents will prepare other Customs papers.

Ship's Papers:

Register.
Load Line Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Oil Pollution Insurance Certificate (tankers).
British Tonnage Certificate (if applicable).
U.K. Light Dues for Current Year (if applicable).

PILOTAGE: Pilots normally board incoming ships from a green-hulled pilot vessel, in a position S.W. of Mid-Channel Rock Light-tower, as close thereto, as weather, size of ship and circumstances permit. When the Western Channel is being used by very large ships other ships may be requested by the Port Signal Station, or by the pilot vessel, to use the Eastern channel, if draft, and length of ship permit, in which case the Pilot will board close to Sheep Buoy. Deep-draft ships should not approach too close whilst awaiting the pilot vessel. They should remain at least 3 miles S.W. of Mid-Channel Rock Light-tower. It is important, when manoeuvring at slow speeds to embark a Pilot to make proper allowance for the set of the tidal stream, which sets across the entrance.

Accurate times of arrival are requested so that the pilot vessel may be on station at the correct time. ETAs should be given at least 12 hours before arrival and amendments should be made 2 hours before the latest ETA.

ETAs and subsequent amendments should be passed by radio telegram or radio telephone through any United Kingdom Coast Station to Milford Haven Signal Station (Milford Haven 2343. Telex: 48575) or to the local Agent of the ship. Alternatively when within 30 miles of St. Ann's Head ETA's may be passed direct to Milford Haven Conservancy Board Signal Station calling on VHF Channel 16 then transferring to Channel 12 (the Port working frequency). In addition ships may call the pilot vessel on MF radio calling on 2,182 kHz and transfer to the working frequencies 2,241, 2,246 or 2,301 kHz.

ANCHORAGES: Anchorage normally available for vessels up to 40 ft. draft in Dale Roads. Anchorage for smaller vessels normally available in Dale Shelf or Stack anchorages. Signal Station will advise mariners on the availability of these anchorages.

RESTRICTIONS: The West Channel with minimum depth of 55 ft. at the entrance and 54 ft. inside is the channel used by the largest tankers. The East Channel with minimum depth of 32 ft. is available to all vessels of suitable size and vessels able to do so are requested to use it when the largest tankers are entering or leaving in the West Channel.

MAX. SIZE: Vessels of 65 ft. draft can be handled on virtually all high waters, but draft restriction always dependent on tide, 63 ft. at worst HW neaps, or up to 68 ft. in favourable conditions.

HEALTH: The Port Health Authority must be notified in advance if any animals on board or of any suspected disease or fever.

Also See "Health – All Ports" before first U.K. port.

RADIO: Lands End Radio, Ilfracombe Radio, Celtic Radio and Cardigan Bay Radio.

VHF: It is important to maintain continuous radio telephone contact with Signal Station when within one hour's steaming of St. Ann's Head, and at all times when in Haven and not safely moored to an alongside berth, including all times spent at anchor or at buoys.

All vessels equipped with VHF radio should adopt following procedures:

Entering the Harbour: Contact Signal Station on Channel 16 when within one hour's steaming of St. Ann's Head. After making contact ship will be requested to maintain watch on Channel 12 until vessel safely moored alongside or at anchor.

Going to anchor or to a buoy mooring: Report to Signal Station when secured and then maintain a continuous watch on Channel 16.

Berthing alongside: Report to Signal Station when safely moored and may then shut down.

Leaving the Haven: Maintain continuous listening watch on Channel 12 until Pilot has disembarked, when Signal Station should be informed and vessel should maintain a continuous watch on Channel 16 until one hour after passing St. Ann's Head.

Navigating within the Haven: Maintain a continuous watch on Channel 12. When radio telephone is used between vessel and tugs during berthing operation, Channel 6 or 8 will be used and Signal Station should be informed before vessel comes off Channel 12.

Signal Station will answer calls on Channel 16 for any ship in the port which has been instructed to move off international calling frequency.

RADAR: Harbour surveillance radar in operation.

TUGS: Tugs normally join vessels to Westward of Esso Jetty, but Master will be advised by Pilot. Tug's lines used, cost of lines inclusive of towage charge.

BERTHING: VLCCs enter at HW and normally berth heading East. Vessel will be required to swing after unloading and prior to departure.

Milford Docks: Enclosed dock, minimum depth on sill 26 ft., lock length 550 ft., width 69 ft., 5,033 ft. of quayage includes 1,050 ft. fish market and 600 ft. modern cargo handling berth. Vessels of up to 36 ft. draft may be handled on Spring tides.

Port Operators and Storage (Formerly Celtic Sea Supply Base): One cargo berth, depth 20 ft., for vessels up to 350 ft. length. Max. size approximately 6,500 d.w.t.

CRANES: In Milford Docks – 2×25 ton mobile, 1×15 ton mobile, 2×6 ton electric. Further mobile cranage available if required.

SPECIALISED CARGO HANDLING FACILITIES:

Containers: Container traffic is handled at Milford Docks although there is no specialised container handling equipment.

Ro-Ro: Pembroke Dock Ferry Terminal has one Ro-Ro berth, depth alongside 21 ft., and can accommodate ferries up to 425 ft. in length, max. size 6,000 g.r.t. (approx.).

LPG: LPG is handled at the Amoco, Esso, Gulf and Texaco oil terminals.

STEVEDORES: Ordered prior to arrival with at least 3 days notice.

MEDICAL: All oil terminals have well equipped medical centres. Local hospital facilities available.

TANKER TERMINALS:

Amoco:

No. 1 Berth: Depth 64 ft., 1×18 in., 4×16 in. crude lines, 2×12 in. and 3×8 in. product lines, max. size 275,000 d.w.t.

No. 2 Berth: Depth 38 ft., 1×18 in., 1×12 in., 2×10 in. and 2×8 in. product lines, 1×8 in. and 1×6 in. LPG lines, max. size 30,000 d.w.t.

No. 3 Berth: Depth 22 ft., 1×18 in., 1×8 in. and 2×6 in. product lines, 1×8 in. and 1×6 in. LPG lines, max. size 5,000 d.w.t.

B.P.:

No. 1 Berth: Out of commission.

No. 2 Berth: Depth 54 ft., 5×10 in. cargo lines, 1×8 in. fuel line, max. size 113,000 d.w.t.

No. 3 Berth: Depth 64 ft., 5×16 in. cargo lines, 1×10 in. fuel line, max. size 275,000 d.w.t.

No ballast facilities at B.P.

Esso:

No. 1 Berth: Depth 54.75 ft., 5×12 in. cargo lines, max. size 190,000 d.w.t.

No. 2 Berth: Out of commission.
No. 3 Berth: Out of commission.
No. 4 Berth: Out of commission.
No. 5 Berth: Out of commission.

Gulf Oil:

No. 1 Berth: Depth 45 ft., 3×10 in. and 2×12 in. cargo lines, max. size 65,000 d.w.t.

No. 2 Berth: Depth 52 ft., 6×12 in. cargo lines, max. size 135,000 d.w.t.

No. 3 Berth: Depth 32 ft., 6×8 in. product and 1×4 in. LPG cargo lines, max. size 6,000 d.w.t.

Texaco:

No. 1 Berth: Depth 68 ft., 4×16 in. crude, 4×10 in. black oil and 4×10 in. clean oil cargo lines, max. size 275,000 d.w.t.

No. 2 Berth: Depth 52 ft., 2×12 in. LPG ship discharge lines with 1×8 in. vapour return line, 4×10 in. black oil, 6×10 in. clean oil and 2×10 in. ballast/bunker lines, max. size 100,000 d.w.t. (75,000 cu.m. LPG).

No. 3 Berth: Depth 36 ft., 1×12 in. LPG ships discharge with 1×4 in. vapour return line, 2×12 in. black oil and 2×10 clean oil lines, max. size 35,000 d.w.t. (30,000 cu.m. LPG).

No. 4 Berth: Depth 20 ft., 1×6 in. black oil, 3×6 in. clean oil, 1×6 in. LPG and 1×6 in. ballast lines, max. size 2,000 d.w.t.

No. 5 Berth: Depth 20 ft., 1×6 in. black oil, 3×6 in. clean oil, 1×6 in. LPG and 1×6 in. ballast lines, max. size 4,500 d.w.t.

DENSITY: 1025.

FRESH WATER: Available at all berths.

FUEL: All oil terminals can supply all grades of bunkers, except that Esso can only supply gas oil grades. Fuel also available within Milford Docks and from bunkering barge elsewhere in the Haven.

FIRE PRECAUTIONS: Fire wires to be rigged fore and aft on all tankers.

GANGWAY/DECK WATCHMEN: Available if necessary – very rarely required.

CUSTOMS ALLOWANCES: Tobacco, 0.5. oz. per man per day. Spirits, 0.25 pint per man per day.

IDENTIFICATION CARDS: Not necessary.

CONSULS: The following countries are represented by Consuls at the port or elsewhere in South Wales:

Belgium
Brazil
Denmark
Finland
France
West Germany
Italy
Netherlands
Norway
Spain
Sweden
Turkey

REPAIRS: All types of deck and engine voyage repairs carried out.

DRY DOCKS: One dry dock at Milford Docks, 600 ft. × 63 ft. × 18 ft.

SURVEYORS: Lloyd's at Milford Haven, ABS and NV in South Wales. Cargo inspectors available – Saybolt, Moore, Barrat and Redwood have local offices.

REPATRIATION: Crew changes frequently carried out and repatriation arranged. Crew arriving by rail to join vessels at Amoco, Esso, Gulf and Milford Docks should be directed to Milford Haven station, joining vessels at BP or Texaco to Pembroke station and for vessels at Port Operators and Storage or Pembroke Dock Ferry Terminal, to Pembroke Dock station.

AIRPORT: Nearest airport is Cardiff (Wales) Airport, distance approximately 100 miles. Flights to London for onward connections.

TIME: GMT in Winter months, BST (GMT plus 1 hour) March to October.

HOLIDAYS: Oil Terminals operate 24 hours/365 days. Other berths observe standard U.K. holidays but cargo work can be arranged if required.

POLICE/AMBULANCE/FIRE: Police – Milford Haven 2351, Pembroke 682121; Ambulance – Haverfordwest 3347; Fire – Haverfordwest 2131.

EMERGENCY CO-ORDINATION CENTRE: Emergencies within the port are co-ordinated by the Milford Haven Conservency Board Signal Station. Emergencies outside the port and S.A.R. co-ordinated by H.M. Coastguard St. Ann's Head (Tel: Dale 218).

TELEPHONES: No telephones on board. Public call boxes exist on all oil jetties.

SERVICES: Ministry of Defence compass adjuster available subject to operational commitments.

SHORE LEAVE: Shore leave allowed.

STORING: Vessels can be stored by barge or truck and local riggers are available to assist. Storing can normally take place during cargo operations but, in the case of oil tankers, trucks cannot proceed alongside the ship and storing from a barge must be carried out near the stern of the ship. Fork lift trucks cannot be used to store oil tankers.
SHIP SUPPLY SERVICE: D.V. Howells and Sons Ltd., P.O. Box 14, Milford Haven, Dyfed SA73 3ER. Tel: Milford Haven (06462) 3091/2418/4733. Telex: 48575.

Marine & Port Services Ltd., The Dockyard, Pembroke Dock, Dyfed SA72 6TF. Tel: Pembroke (0646) 682271/5. Telex: 48303.

Additionally, there is a tug company operating in Milford Haven with a fleet of locally based tugs whose prime duty is the berthing and unberthing of tankers at oil terminals in the Haven and firefighting responsibilities, although occasionally a tug may be called offshore for salvage purposes. The tug company is Cory Ship Towage Ltd., Slip Hill, Milford Haven, Dyfed SA73 3BB. Tel: Milford Haven (06462) 2296/7.

There is a helicopter squadron based at RAF Brawdy, Haverfordwest, which provides a rescue service and, on occasions, airlifts seriously injured or sick personnel from ships in the area, usually on request through the local Coastguard Station.
AUTHORITY: Milford Haven Conservancy Board, P.O.Box 14, Milford Haven, Dyfed, SA73 3ER, U.K. *Tel:* Milford Haven (06462) 3091 office, Milford Haven (06462) 2342 or 2343. Signal Station – 24 hours. *Telex:* 48575 – 24 hours. *Contact:* Capt. G. Dudley, O.B.E., Harbour Master.
AGENT: G. S. Kelway Ltd., Murray Crescent House, The Rath, Milford Haven SA73 3JR, Dyfed. Tel: Milford Haven 2313/4. After hours: Milford Haven (06462) 5587, 2615, 2364. Telex: 48213. Cables: "Kelway Milford Haven".

MISTLEY: 51.57 N. 01.05 E.

LOCATION: Private port situated on the River Stour within Harwich Harbour. Seven tidal berths, vessels lay safe aground (also see "Harwich").
DOCUMENTS: Normal requirements – local Agents will advise.
PILOTAGE: Order via Agents or direct with Harwich Pilots.
Call sign: "Harwich Pilots".
VHF: Channel 16 and 9.
Telephone: Harwich (0255) 3129.
Telex: 98472.

Compulsory ETA 8 hours before arrival and 2 hours confirmation. Details required: Name of vessel, ETA, destination, max. draft., g.r.t.
ANCHORAGES: Safe anchorage in Harwich Harbour or Cork Pilot Station.
RESTRICTIONS: Vessels can enter/depart on HW according to state of tide and draft. Day and night navigation.
MAX. SIZE: No length or beam restrictions. Draft varies between 3.3 m. neap tides to 4.3 m. spring tides. Dredging work to channel and berths presently on hand will result in an increase in acceptable draft limits.
HEALTH: As per Port Health Regulations. See "Harwich".
RADIO: Northern Approach: Humber Radio, Tel: (0521) 73447.
Southern Approach: North Foreland Radio, Tel: (0843) 20592.
VHF: Harwich Harbour Radio, Channel 14.
TUGS: Available from Felixstowe and Mistley via ship's Agents.
BERTHING: Instructions given via Pilot or Agents. Loading/discharging via shore cranes/elevators.
CRANES: Mobile cranes up to 10 tons and Scotch Derrick up to 30 tons.
BULK HANDLING FACILITIES: Bulk cargo facilities available for discharge of grain, ores, fertilisers, etc., by grab. Loading elevators for grain, etc.
STEVEDORES: All cargo handling instructions and enquiries to: The Mistley Quay and Forwarding Co. Ltd., High Street, Mistley, Manningtree, Essex. Tel: 0206 394431. Telex: 98692.
MEDICAL: All requirements via Agents with advance notice.
DENSITY: 1026.
FRESH WATER: Available with notice. Up to 20 tons-charge £10 plus overtime charges if incurred.
FUEL: Bunkers available from major suppliers via Agents.
SURVEYORS: Cargo inspectors, superintendents and surveyors are available locally via Agents.
GANGWAY/DECK WATCHMEN: Ship's gangway, watchmen not necessary.
HATCHES: Opening and closing by crew.
CUSTOMS ALLOWANCES: Normal U.K. Regulations.
CARGO GEAR: All work by shore cranes, heavy lift up to 30 tons.
REPATRIATION: Facilities via Agents.
TIME: GMT. Summertime, GMT plus 1 hour.
HOLIDAYS: No work on public holidays unless overtime working is arranged in advance.
POLICE/AMBULANCE/FIRE: See "Harwich".
TELEPHONES: No onboard facilities available.
SHORE LEAVE: Possible.
IDENTIFICATION CARDS: Not necessary.
DELAYS: None.
DEVELOPMENTS: Dredging of the approach channel to Mistley and within the port to increase acceptability of larger vessels is presently in hand but at present it is not possible to indicate when such improvements will be completed. Please enquire to the Port Owners, The Mistley Quay & Forwarding Co. Ltd.
AUTHORITY: *Port Owners:* The Mistley Quay & Forwarding Co. Ltd., High Street, Mistley, Manningtree, Essex. *Tel:* 0206 394431. *Telex:* 98692.
Local Port Authority: The Harwich Conservancy Board.

MONTROSE: 56.42 N. 02.17 W. (See Plan Book)

PORT LIMITS: The port is bounded by a line drawn in a NW'ly direction from Scurdie Ness Lighthouse to the Annat Bank and thence by both banks of the river to the road bridge which completes the inner boundary.
DOCUMENTS:
1 Crew List,
1 Passenger List,
1 Store List,
1 Personal Effects List for baggage coming ashore,
1 Manifest or Bill of Lading.
Ships Register, Load Line Certificate, Radio Certificate and LSA and Safety Certificates to be sighted.
PILOTAGE: Pilotage is compulsory. Pilots are available throughout the 24 hours. International Code Flag "G" to be exhibited.

Vessels should approach the port to a position with Scurdie Ness Lighthouse bearing 250° distance 0.5 mile where Pilot will normally board.

Pilot cutter *"Celurca"* has a dark blue hull with white upper works and "Pilots" painted in black on each side of the wheelhouse. The normal red and white pilot flag is flown during daylight and regulation lights exhibited at night. VHF Channel 16 for calling with a working frequency on Channel 12.

In bad weather it may be necessary for a ship to proceed inwards at the radioed directions of a Pilot to a position on the outer leading marks and inside the lighthouse where the Pilot may board safely. This will only apply during periods of strong Easterly gales and very heavy seas and may be applicable for only a few times in a year. Similarly the port may be closed under severe weather conditions on average 2.5 days per year.
ETA Messages: Masters should cable Agent with 24 hours notice of arrival giving overall length and deepest draft and also call Montrose Harbour Radio within 2 hours of arrival at the pilot station.
ANCHORAGE: In position mentioned above with Scurdie Ness bearing 250° distance 0.5 mile, in about 13 m.
MAX. SIZE: Since the harbour was reconstructed and deepened ships of 450 ft. LOA and 5,500 tons have been handled on a max. draft of 24 ft.
HEALTH: "Q" flag to be flown when coming from a foreign country until cleared inwards. In event of disease or fever warn Agents by radio. Strict attention paid to quarantine regulations regarding dogs which are not allowed ashore.

Also see "Health – all ports" before first UK port.
RADIO: Messages to Agents may be sent through Stonehaven Radio. Harbour service is on Channel 12. Call Montrose Harbour Radio on Channel 16.
RADAR/VHF: No port radar service. Harbour service and pilot vessel work on VHF Channels 16 and 12.
TUGS: Pilot vessel is equipped with towing hook and pusher bow to assist in berthing and unberthing if necessary. Vessels lines used. Small charge made for such work.
BERTHING: North Riverside Quays: No. 6 – 112 m., No. 7 – 141 m. No. 8 – 87.5 m., No. 9 – 69 m. No., 10/11 – 152 m.

Depths vary from 6 ft. at No. 8 to 16 ft. at No. 10/11 at chart datum.

South Riverside Quays: Berth Nos. 12, 13, 14, 15, 16, 17 and 18. These are extensively used by oil related vessels and this area of the harbour has been leased to Sea Oil Services Ltd.

Total wharf length available is 1,600 ft. with depth alongside 20 ft. a MLWS.

Fixed Ro-Ro Ramp available between Berth Nos. 6 and 7. Vessel able to land bow or stern ramp of width 8 m. Depth alongside 18 ft.
STEVEDORES: Provided by J. M. Piggins & Co. Ltd., phone Montrose 72827. Telex 76251.
CARGO HANDLING FACILITIES: The stevedores are well equipped with mobile cranes, fork lifts, etc., and only rarely is ship's gear used unless it is of rapid, modern type. Grab discharge is used for bul cargoes and conveyor belt systems for loading same.

Rates of loading or discharge:— Bagged cargoes 250 tons per gang per day; Bulk 400 tons; Bulk grain loading 700 tons; Unitised pul 500 tons; Paper 500 ton; Timber 500 tons all per gang per day.

There is always available a large motor transport fleet at the port an the Agents also have their own road haulage company.
TANKERS: There is no oil berth in the harbour except the facilitie offered by Sea Oil Services for the receipt into their 3,000 ton storag depot of gas oil.
MEDICAL: Small hospital in Montrose. Several major units within eas reach by road.
DENSITY: At high water average 1024 but can be as low as 1005 at L during heavy river outflow.
FRESH WATER: Supplied from quayside hydrants at all berths.
CONSULS: None in Montrose.
GANGWAY/DECK WATCHMEN: Can be arranged. Owing to range tide on riverside berths mooring watch strongly recommended.
OPENING/CLOSING HATCHES: Normally done by ship's crew.
CERTIFICATES: On arrival ship's register may be asked for.
CUSTOMS ALLOWANCES: As arranged between Customs Offic and Master.
CARGO GEAR: The port is equipped with mobile cranes which can used at any berth. These are of various capacities and the maximum is 25 tons for which prior notice is required.
IDENTIFICATION CARDS: Not required.
REPAIRS: Minor deck and engine repairs can be carried out.
DRY DOCKS: None.
SURVEYORS: Cargo ship and engine surveyors Johnston & Sma Swan & Co., or Pirie & Smith available from Aberdeen at short no

Cargo Superintendents regularly working at the port on loading and discharging various bulk cargoes, include Cargo Superintend (London) Ltd., 50 Wellington Street, Glasgow; James Patterson, Old Granary Buildings, Meadowside Quay, Partick, Glasgow, Malcolm Main at same address.

FUEL: Obtainable from road tanker, gas oil and H.S.D. from more prominent oil companies. Rix Oils can supply gas oil from local stocks. Contact J. Piggins.
FIRE PRECAUTIONS: Normal rules to be observed.
REPATRIATION: Facilities available with excellent railway connections. Air connections from Aberdeen.
AIRPORT: Aberdeen 36 miles. Montrose has facilities for light aircraft and helicopter landing.
TIME: GMT with 1 hour advance for British Summer Time, approximately March to October.
HOLIDAYS: *Port Holidays:* Christmas Day; Boxing Day; 1st and 2nd January; One day Spring, Mid-Summer and Autumn Trades Holidays.
POLICE/AMBULANCE/FIRE: Report to Dock Office immediately. Dial 999 and ask for whichever emergency service required.
EMERGENCY CO-ORDINATION CENTRE: Maritime Rescue Sub Centre – Forth District Tel: Crail 666.
TELEPHONES: Not possible to place telephones aboard. Kiosk on Wharf near Agents office. Comprehensive connections to Continent and Telex services from Agent's office.
SERVICES: Laundry, Ship Chandlers and Lloyd's Agent immediate.

Compass Adjuster, Radio/Radar Mechanics can be called in from Aberdeen at short notice.
BANKS: Usual branches of Scottish banks all in High Street. No American or European banks.
STORING: Vessels can be stored by truck. Trucks can proceed alongside vessel. Fork lifts can be used if required. Customs notification required for all bonded stores.

Stevedores can be employed to assist with storing and also lashing and fastening deck cargo.
SHORE LEAVE: No restrictions on crew members after inward clearance.
AUTHORITY: Montrose Harbour Board, Harbour Office, 2 Meridian Street, Montrose, Tayside. *Tel:* (0674) 72302, 73153. *Contact:* A. G. Graham, Harbour Master.

NEWHAVEN: 50.47 N. 00.04 E. (See Plan Book)

PORT LIMITS: A line drawn from a position 300 ft. South of breakwater in a 075° direction to Seaford Bay.
DOCUMENTS: See "London".
PILOTAGE: Trinity House Pilots, Newhaven District: VHF "Newhaven Radio" Channels 16 and 12. Pilot boats are small fast launches painted orange. Light and sound signals for a Pilot is "G". Notice of ETA 12 hours before arrival, if possible. Anchorage for a vessel awaiting a Pilot is 0.5 to 1 mile S.W. of the breakwater, depending on weather conditions. Pilots normally board S. to S.W. of the breakwater, but in severe gale conditions they keep station 100 m. from breakwater end, and guide vessels in with VHF or lamp. Notice should also be given to the red and green signal lights at the West Pier end lighthouse, and on no account should vessels pass breakwater end if signal is at red. In normal weather, pilot ladder should be on lee side about 1 m. above water. In Southerly gales Pilots prefer a ladder on each side, if available.
RESTRICTIONS: 5.0 m. through entrance to port LWOST. Inner harbour then dredged depth of 4.0 m. in accordance with chart datum 3.5 m. below OD Newlyn (tide gauge readings are directly applicable to soundings).
MAX. SIZE: Max. LOA 520 ft. 25 ft. draft taking bottom on soft mud at low water. Vessels greater than 350 ft. LOA length must either be towed into or out of port. Vessels for North Quay must not exceed 250 ft. length, draft 17 ft.
HEALTH: See "Health-All Ports" before first UK port.
RADIO: Radio Station Newhaven Radio, call sign Newhaven Radio.
RADAR/VHF: No radar service. Ship's may contact West Pier control point on Channel 16, working on Channel 12.
TUGS: One tug available upon request, owned by Sealink U.K. Ltd.
BERTHING: Vessels may be berthed at any time, with prior notice given.
BRIDGES: Vessels requiring to berth at North Quay must arrive within 2 hours either side of high water in order to pass through swing bridge which governs access to this quay.
STEVEDORES: ETA should be given as far in advance as possible and not less than 24 hours before ETA.
DENSITY: Salt water.
FRESH WATER: Available on request. Supplied by shore hosepipe.
FUEL: Available by previous arrangement.
FIRE PRECAUTIONS: Usual no-smoking precautions on quayside in port area.
GANGWAY/DECK WATCHMEN: Not provided by Port Authorities but recommended at discretion of Ship's Master.
CONSULS: Norwegian Vice-Consul and French Consular Agency.
REPAIRS: Repairs of a temporary nature only may be carried out by Sealink U.K. Ltd. workshops, Ship & Industrial Repairs Ltd., Unit A3, Beach Road, Newhaven and C. R. Irving Ltd., Chapel Street, Newhaven.
AIRPORT: Nearest airport Gatwick, distance 30 miles. Served by regular airlines and Shoreham, distance 17 miles.
POLICE/AMBULANCE/FIRE: Police: Civil, Newhaven 515219; Port, Newhaven 514131 (extension: 229). Ambulance: 0830 – 1700 hrs., Lewes 515400; 1700 – 0830 hrs., Lewes 512819; Fire: 999.
SHORE LEAVE: Allowed.
AUTHORITY: Sealink U.K. Ltd., Beach Road, Newhaven Harbour, East Sussex. *Tel:* Newhaven 514131. *Telex:* 87151. *Cables:* Sealink, Newhaven. *Contact:* G. G. Burke, Shipping and Port Manager.

NEWPORT: 51.35 N. 02.59 W. (See Plan Book)

DOCUMENTS:

- Crew List.
- List of stores for individual crew members.
- Cargo Manifest.
- Cargo Plan.
- Ship's Register.
- Loading Certificate.
- Safety Equipment Certificate.
- Safety Construction Certificate.
- United Kingdom Light Bills.

PILOTAGE: Telegraphic address – "Sewpil G 498180". Advance notice required – 24 hours. VHF Channel – Channel 16 for contact, thence Channel 6 for conversation. Description of pilot boat – diesel launch, black hull, white superstructure. Particular light or sound signals to be made by vessels requiring a Pilot – Code Signal 8, i.e. 3 longs 2 shorts. Pilot boat is located in vicinity of Breaksea Lightvessel, or in vicinity of Merkur Buoy, for small vessels. Maintain VHF contact (if possible) with pilot cutter and obey instructions with reference to positioning of vessel to facilitate boarding of Pilots.
ANCHORAGES: Large vessel should anchor in deep water to North of one Fathom banks. Deeper water anchorage (10 – 14 fathoms) in area between Breaksea Lightvessel and East 1 Fathom Bank Buoys to the South, and shallow water off Barry Roads to the North. Small vessels will find safe anchorage in Barry Roads in varying depth, depending on weather conditions and draft.
RESTRICTIONS: Entrance to Newport Docks is by means of a sea lock 1,000 ft. long, 100 ft. wide.
MAX. SIZE: Max. size of vessels accepted at Newport is 800 ft. long, 96 ft. beam, 33.5 ft. draft.
HEALTH: Port Health Authority board vessel at entrance lock and Pratique is automatic.

See "Health – All Ports" before first U.K. port.
RADIO: At sea – Land's End radio station, call sign GIL. Within Bristol Channel radio station Portishead, call sign GK– last letter according to frequency).
VHF: Vessels requiring entry can contact port on VHF radio Channels 16, 9 and 11.
TUGS: Normally join at Newport Deeps. Ship's line used.
BERTHING: South Dock, normal depth of water 35 ft. North Dock, normal depth of water 27 ft. Junction passage connecting South and North Dock restricts vessels to a max. size of 56 ft. 6 in. beam and 25 ft. draft.
SPECIALISED CARGO HANDLING FACILITIES:

Combi Ship Operations: Heavy lift/containers for combi vessels are handled by the 25 tonne cranes at the same berth where breakbulk general cargo is handled.

Forest Products: The North side, South dock area extends to over 11 hectares with 1 hectare under cover.

Banana Imports: There is a terminal of 3 hectares for a weekly Jamaican service importing bananas and exporting general cargo. Included within the terminal is a transit shed of 3,716 sq.m.
CRANES: Heavy lift/container cranes: 2×25 tonne electro-hydraulic and 1×32 tonne Scotch Derrick cranes.

Bulk handling: 6×11.5 tonne electric grabbing cranes.

General cargo: 2×11.5 tonne, 2×10 tonne and 20×6 tonne electric cranes.

Handling equipment up to 27 tonnes capacity with a comprehensive range of attachments is available.
STEVEDORES: Labour is allocated to vessels on arrival.

Working Hours: Monday to Friday: 0730 – 1700 hrs., 0600 – 1400 hrs., 1400 – 2200 hrs.

Saturday: 0730 – 1200 hrs., 0600 – 1400 hrs., 1000 – 1400 hrs.

Sunday: 0600 – 1400 hrs., 1400 – 2200 hrs.
MEDICAL: No advance notice of medical attention for crew members is required and hospital facilities are available.
DENSITY: Average density of water in docks is 1016.
FRESH WATER: Available at all berths.
FUEL: All classes of fuel available.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco, 0.5 lb. per Crew member, reduced by 50% on coastal trade. 1 pint of spirit and 1 pint wine per Crew member, reduced by 50% on coastal trade.
IDENTIFICATION CARDS: Not required.
REPAIRS: All wet dock and engine repairs possible.
DRY DOCK: Bristol Channel Ship Repairers Ltd., 454 ft. × 64 ft.
REPATRIATION: All facilities for the changing of crew and repatriation are available.
AIRPORT: Glamorgan Rhoose Airport terminal 28 miles from Newport. Regular connection planes to London Airport.
TIME: BST, GMT plus 1 hour. GMT in Winter months.
HOLIDAYS: Work not undertaken on Christmas, Easter, Spring and Summer Bank holidays. With the exception of Christmas holiday (25th and 26th December) dates on other holidays vary.
POLICE/AMBULANCE/FIRE: Telephone number 999 stating which service is required.
TELEPHONES: Telephone facilities are available aboard vessels.
SERVICES: Tank cleaning equipment. Facilities for tank washing, compass adjusting are available.
SHORE LEAVE: No restrictions to crew members.
SHIP SUPPLY SERVICE: A Ship Supply Service could be provided by Cory Ship Towage with their tugs at Cardiff if required. Address: Cory Ship Towage Ltd., S.E. Wales Office, Alexandra Dock, Newport, Gwent NP9 2NP. Tel: Newport 56835/6.
AUTHORITY: Associated British Ports, Dock Office, Alexandra Dock, Newport, Gwent NP9 2UW. *Tel:* (0633) 65411. *Telex:* 498585. *Contact:* R. J. Nicholls, Port Manager.

AGENT: Lambert Brothers Ship Agencies Ltd., *Tel:* (0222) 480751 *Telex:* 497701 *Cables:* Lambert Cardiff.

PEEL, Isle of Man: 54.14 N. 04.40 W. (See Plan Book)

PILOTAGE: Not compulsory.
MAX. SIZE: See "Berthing".
VHF: Channels 16 and 12 available only when vessels expected.
BERTHING: Outer Harbour: Max. LOA 250 ft., although twin screw cross-channel vessels up to 350 ft. LOA can be accommodated under certain conditions. Max. draft 14 ft. to lie afloat over LWOST. Not tenable with strong Northerly winds.

Inner Harbour: Max. LOA 160 ft., draft 10 ft. on Neaps, 13 ft. on Springs. Dries out at LW. No quay space for storage.

AUTHORITY: Isle of Man Harbour Board, Sea Terminal Building, P.O.Box 11, Douglas, Isle of Man. *Tel:* 0624-23813. *Contact:* H. G. Moore, Chief Executive.

Harbour Master at Peel, Tel: (0624) 842338.

AGENT: See "Douglas".

PENZANCE: 50.07 N. 05.32 W.

PILOTAGE: Trinity House Pilots are available at all times. Call "Penzance Pilots" during normal working hours or when vessel is expected on VHF Channel 16. Working Channels 12 and 9 are also available. At all other times contact the Pilot through Land's End Radio.
MAX. SIZE: Largest vessel 1,660 n.r.t.
RADIO: Land's End Radio.
VHF: VHF Channel 16 and Working Channels 12 or 9 are manned from 0800 – 1200 hrs. and 1300 – 1630 hrs. local time plus from HW−2 until HW+1.

Also see "Pilotage".

BERTHING: Penzance Dock: Dock entrance 50 ft. wide. 5 berths, longest 450 ft. Vessels for discharging cargoes should have a max. length of 300 ft. and a max. draft of 5.49 m. springs or 4.4 m. neaps.

Penzance Harbour: 4 berths, 1×320 ft., 1×250 ft. and 2×200 ft. This dries at LW. There is one drying berth designed for Ro/Ro vessels with a max. draft of 4.72 m.

STEVEDORES: Available through the Port Agents.
MEDICAL: Facilities available by request through Port Medical Officer. Evacuations arranged through Port Medical Officer and Mount's Bay Boarding Service.
FRESH WATER: Available on all berths.
FUEL: Marine gas oil and lubricating oils available.
CONSULS: Vice-Consul for Netherlands and France available.
DRY DOCKS: Length 245 ft., breadth 40 ft., max. draft 12.5 ft.
SURVEYORS: Lloyd's, Germanischer Lloyd, Bureau Veritas and Det Norske Veritas.
REPATRIATION: This can be arranged through Mount's Bay Boarding Service and J. H. Bennetts Ltd. See "Ship Supply Service".
AIRPORT: There is an airport at Newquay with connecting flights to London Heathrow via Plymouth and/or Exeter. There is a heliport at Penzance which connects with the Isles of Scilly.
POLICE/AMBULANCE/FIRE/COASTGUARD: Services are available by dialling 999 for emergencies only. Police are available on 0736-2395, Fire Service on 0736-2918, Ambulance Service on 0872-78181 and Coastguard on 0326-317575.
SHIP SUPPLY SERVICE: *Mount's Bay Boarding Service:*

By helicopter: British Airways operate a regular service between Penzance and the Isles of Scilly (30 miles S.W. of Land's End). Mount's Bay Boarding Service (MBBS) can charter helicopters to rendezvous with ships at sea.

Parcels: MBBS collect and despatch stores, parts, charts, etc, via British Rail "Red Star" parcels service, T.N.T. "Overnite" and "Courier" services, or G.P.O. Datapost.

Charts: British Admiralty/Decca charts and publications are available within 12 hours.

Stores: Fresh, frozen and dry stores are obtainable within 6 hours. Bonded stores are available within 24 hours.

Spare parts: MBBS arrange clearance, forwarding and transport of spare parts to meet vessels on arrival. Undivided lifts of 1.5 tonnes can be handled (up to 10 tonnes by arrangement).

Crew transfer: MBBS can land and clear crew through Customs and Immigration, and arrange for their travel onward to worldwide destinations. MBBS can meet crew and either embark or accommodate them until the vessel's arrival.

Landing sick crew: Although in urgent cases, vessels are in direct contact with Coastguard Rescue Co-ordination Centre, Falmouth, MBBS arrange the landing of non-urgent cases. In both cases MBBS liaise with local Coastguards, Customs & Immigration Officers, Doctors and Hospitals, and can usually provide interpreters for non English-speaking crew. MBBS visit and look after the interests of hospitalised crew, and can report on their progress to your company. MBBS arrange travel and repatriation of crew members either with or without escort, according to Doctors' and company instructions.

Contact: J.H. Bennetts Ltd. (See "Agent".)

SERVICES: Compass adjusting, divers, engineering, welding, hydraulic and electronic repairs and servicing are available.
AUTHORITY: (a) Penwith District Council. *Tel:* 0736-2341.

(b) Harbour Office. *Tel:* 0736-66113. *Contact:* Captain M. Tregoning, Harbour Master. Address: Harbour Office, Wharf Road, Penzance, Cornwall TR18 4AB.

AGENT: J. H. Bennetts Ltd., 72-73 Market Jew Street, Penzance, Cornwall TR18 2LF. Tel: 0736-4345. Telex: 45530 (Jhb G).

PERTH: 56.24 N. 03.29 W. (See Plan Book)

LOCATION: On River Tay, 35.4 km. above Dundee and 48.3 km. from sea.
DOCUMENTS: Normal documentation for arrival and departure U.K.
PILOTAGE: Not compulsory but highly advisable. Approaching River Tay, vessels should call "Dundee Port Control" as per Dundee Port Information. Masters will be advised by Dundee Port Control when River Pilot will board for transit up river from Dundee to Perth. River Pilots board at Dundee 2 hours before high water Dundee.
ANCHORAGES: No anchorage above Dundee.
RESTRICTIONS: Clearance under bridges 78 ft. at MHWOS. Vessels normally accepted for transit with 0.1 m. clearance on draft in daylight and 0.2 m. clearance on draft in darkness, but this is at the sole discretion of the Harbour Master (Perth).

Longest vessel 260 ft. in daylight. Longest vessel 220 ft. in darkness, but this may be relaxed at the sole discretion of the Harbour Master (Perth).

MAX. SIZE: Length 77 m., draft 4.12 m.
RADIO: VHF for upper river transit. "Perth Harbour" Channel 9.
TUGS: By arrangement with Dundee tug owners. Small tug/push boat may be available at harbour.
BERTHING: Tidal harbour about 3 acres with total quayage of 2,400 ft. Depth at LW 9 ft. HWST 15 ft. At LW vessels sit evenly on soft muddy bottom.
CRANES: 14 mobile cranes available. SWL ranging from 5 to 40 tons. Ample fork lifts and elevators for loading bulk.
STEVEDORES: North Eastern Shipping and Warehousing Co. Ltd. Tel: 0738-33226. Telex: 76611.

Calport Ltd. Tel: 0738-26675/24372. Telex: 76458.

DENSITY: River Tay above bridges pure fresh water.
BRIDGES: See "Restrictions".
FRESH WATER: Available at all berths.
FUEL: Available by road tanker, arranged by Agent.
REPAIRS: Small repairs undertaken locally by good engineering firm. Major repairs undertaken at Dundee.
AIRPORT: Edinburgh (Turnhouse) 44 miles, Glasgow (Abbotsinch) 70 miles, Prestwick 90 miles. Motorway M90, connects Perth with airports. Dundee operates variety of daily air services.
HOLIDAYS: (1985): 1st and 2nd January, 8th April, 6th and 27th May, 9th September, 14th October, 25th and 26th December.
POLICE/AMBULANCE/FIRE: Police: 21141. Ambulance: 22123 Fire: 22226.
AUTHORITY: (a) Tayside Regional Council Transport Dept., Friarfield House, Barrack Street, Dundee. *Tel:* (0382) 23281. *Contact:* Mr. L Watson, Deputy Director of Public Transport.

REPAIRS: Ship repairing facilities available.

HOLIDAYS: Cargo work can often be arranged on Public Holidays subject to prior notice.

POLICE/AMBULANCE/FIRE: Telephone 999.

TELEPHONES: By special arrangement with the GPO, can be placed on board.

SHIP SUPPLY SERVICE: Cory Ship Towage Ltd., 1-3 Buller Road, Torpoint, Cornwall PL11 2LD.

Bellamy & Co. (Plymouth) Ltd., Millbay Pier, Millbay Docks, Plymouth PL1 3DT. Tel: (0752) 665154. After hours 779586, 330338, 775957. Telex: 45225.

The Royal Navy maintain a helicopter service for landing sick crew men from ships beyond the port limits.

DEVELOPMENTS: Associated British Ports are to build a second Ro-Ro berth at West Wharf in Millbay Docks. The Facility is expected to be completed early 1986 and will accept vessels with LOA 180 m. and draft 8.0 m.

AUTHORITY: Associated British Ports, Port Office, Millbay Docks, Plymouth, Devon PL1 3EF. *Tel:* Plymouth (0752) 662191 *Telex:* 45219 Apply G. *Contact:* Captain J. R. Willan, Docks and Marine Superintendent.

Cattedown Wharves for Cattedown Wharves and Bethyi Gwynn for Victoria Wharves.

POOLE: 50.43 N. 01.59 W. (See Plan Book)

DOCUMENTS: As for other British ports.

PILOTAGE: Pilots board 0.5 mile South of Poole Bar Buoy from cutter. Prefer ladder 0.50 m. from water and a good lee. VHF watch kept on Channel 16 working Channels 9 and 14. As much notice as possible. Address: Pilots, Poole.

ANCHORAGE: Vessels can anchor anywhere in Poole Bay and Studland Bay. Good holding ground and protected in all but Easterly gale.

RESTRICTIONS: Vessels drawing up to 3.7 m. can enter at any state of tide. Drafts of 5.0 m. must wait to within 2 hours of HW.

MAX. SIZE: Max. length 111 m., beam – no limit, draft 5.0 m.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Vessels using the Port may call the Harbour Master direct on VHF Channel 16 – working frequency Channel 14 call-sign "Poole Harbour Radio".

TUGS: 2 tugs, 8 ton and 5 ton bollard pull. Join at Stakes Buoy, by special application arrangements can be made to join at North Haven Point. Ship's lines. No difference in charges.

Pilots will advise whether a tug is necessary or not. Any vessel in excess of 1,000 d.w.t. or 300 ft. LOA due to pass through the Poole Bridge is required to take a tug. The gap in the bridge is 60 ft.

BERTHING: Berthing time depends on draft at some private quays. No restriction at New Quay or Ro/Ro berths.

New Quay:
Length: 520 ft. (157 m.).
Depth alongside: 16 ft. (4.9 m.).
Equipment: 3 ton capacity level luffing rail-mounted crane and 35 tonne capacity crawler crane equipped for hook/bulk/grab/spider grab duties giving an operational capacity of 6 tonnes at 18 m.; warehouse facilities; open storage area 3,500 sq.m.; mobile crane capacity 200 tonnes.

Yard Quay:
Length: 200 ft. (61 m.).
Depth alongside: 10 ft. to 12 ft. 9 in. (3.0 to 3.9 m.).
Equipment: Warehousing facilities; limited open storage.

Ballast Quay:
Length: 270 ft. (82 m.).
Depth alongside: 14.6 ft. (4.4 m.).
Equipment: 6.5 ton capacity level luffing crane fitted with grab/hook for bulk handling/general cargo duties.

Poole Town Quay:
Length: 1,300 ft. (396 m.).
Depth alongside: 14 ft. to 16 ft. (4.3 to 4.9 m.).
Equipment: Pneumatic grain handling plant; average discharge rate of 54 t.p.h., with transit storage capacity of up to 200 tons; mobile crane capacity 40 tonnes.

Bulwark Quay:
Length: 382 ft. (116 m.).
Depth alongside: 14.6 ft. to 16 ft. (4.4 to 4.9 m.)
Equipment: 25 ton Scotch Derrick; warehousing facilities; limited open storage.

Private Quays:
J. T. Sydenham (Timber Wharf)
Length: 250 ft. (76 m.).
Depth alongside: 15.3 ft. (4.6 m.).
Equipment: Mobile crane capacity 45 tonnes.

Other Private Quays:
Corrals (Fuel)
J. Bolson & Son Ltd. (Marine Repair & Engineering).
South Coast Sand & Ballast (Sea Dredged Aggregates).

PORTLAND: 50.34 N. 02.26 W.

PILOTAGE: Available from Weymouth. Pilot boards in position 50° 36′ N. 02° 24′ W.

ANCHORAGE: Vessels seeking shelter from Westerly gales are likely to find more room and better shelter outside the breakwaters in Weymouth Bay.

VHF: All Harbour movements are controlled on VHF Channel 13.

TUGS: Admiralty tugs available.

BERTHING:

Castletown Pier: Castletown Pier is a commercial wharf and leased to Kingston Minerals Ltd. for the discharge of fertilisers. Max. LOA of vessel 82.3 m, beam 12 m. with max. draft 5.3 m.

CRANES: 1 mobile crane.

FUEL: Available by road tanker.

GENERAL: The Harbour and the immediate vicinity are classified as a Dockyard Port under the supervision of the Queen's Harbour Master, Portland. Attention is drawn to Chart 2268 which gives details of the Restricted Area around the Naval Base, of designated Anchor Berths for H.M. Ships, of Prohibited Anchorage areas and of the numerous Admiralty moorings and telephone cables. The Harbour, which is protected by breakwaters, is easily accessible by the North Ship Channel (12 m. LWS) or East Ship Channel (12.5 m. LWS). The South Ship Channel is blocked both above and below the surface and is only suitable for small boats.

AUTHORITY: Flag Officer Sea Training, H.M. Naval Base, Portland. *Contact:* Queen's Harbour Master, H.M. Naval Base, Portland, Dorset. DT5 1BQ. *Tel:* Portland (0305) 820311 Ext. 2106.

*Safety Equipment Certificate.
Lloyd's Certificate.
*Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.
*List C143 for packages not cargo or crew/passenger effects.
*Danish Tollpass for ships arriving from Denmark.

Form of Authority for Agent to make Report and clear vessel outwards for Master.

Note: Where cargo is to remain on board for unloading at another port after Portsmouth, 3 copies of Ship's Report are required by the Customs House.

PILOTAGE: Portsmouth is within the Southampton and Isle of Wight Trinity House Pilotage District (see "Southampton" entry for limits of District) and a vessel liable to compulsory pilotage must employ a Pilot from and to the limits of the District. Non-compulsory vessels may obtain a Pilot in the vicinity of the 'Outer Spit' buoy. (Note: All vessels carrying explosives or petroleum products are compulsory from the 'Outer Spit' buoy and within the Harbour area, by Order in Council. This also applies to regular Home Trade vessels.) Ministry of Defence Pilots must be employed in addition for vessels using Admiralty berths or being assisted by Admiralty-owned tugs.

In addition to 48 hours notice to local Agent, advise Nab, Needles or Portsmouth Pilot, as appropriate, ETA 48 hours and again 2 to 3 hours immediately prior to arrival. The Nab, Needles and Portsmouth pilot stations are maintained by fast launches under the control of the Duty Pilot at the Pilot Station, 37 Berth, Southampton Docks. The Duty Pilot keeps a continuous watch on VHF Channel 16; call sign 'Nabpilot', 'Needlespilot' or 'Portsmouthpilot' as appropriate. Working frequency, Channel 9 only, but can listen on Channels 14, 12 and 6. No medium frequency: M/F and R/T messages via NITONRADIO. Duty Pilot's telephone numbers: Southampton 32345 and 32346.

The launches only put to sea when required. Failure to send an accurate ETA 2 to 3 hours before arrival could cause delay to the offending vessel.

Strict compliance with the requirements of the Merchant Shipping (Pilot Ladders) Safety Rules is requested by the Pilots, who may refuse to board vessels with unsatisfactory and dangerous ladders. Manropes are not required. Ladders should reach to about 3 ft. from the water, each rung resting firmly against the ship's side; a good lee should be provided whilst making approximately 3 to 7 knots headway.

In most cases, vessels bound to and from the Westward will find it more convenient to use the Nab or Eastern approach to Portsmouth. For details of entrances and pilot launches, see "Southampton".

ANCHORAGES: Small vessels may anchor close Westward of th 'Outer Spit' buoy, unless prohibition signal flying – see "Restrictions" Larger vessels will be allocated a numbered anchor berth in th Spithead Man-of-War anchorage.

If anchorage is prohibited in Spithead, St. Helen's Roads, Ryde Roads or Cowes Roads are the nearest safe anchorages. Moorin Buoys 1, 2 and 3 off North Corner in the Harbour are sometimes used. Pilots will be fully informed before the vessel's arrival.

RESTRICTIONS: The following traffic signals are exhibited and must be complied with by all vessels. Shown by Central Signal Station (C), Blockhouse (B), Gilkicker (G), Dolphin Pier (D) and H.M. ships concerned (S).

Day	*Night*	*Meaning*	*Shown by*
Red flag with white diagonal.	Red Green Green	No vessel to enter or leave harbour or enter approach channel North of Outer Spit Buoy.	C B G
Red flag with white diagonal over black ball.		No vessel to enter harbour or approach channel. Outward shipping may proceed.	C B G
Black ball over red flag with white diagonal.		No vessel to leave harbour. Inward-bound shipping may proceed.	C B G
Black pendant.	White Red Red	No merchant or private vessel to anchor in man-of-war anchorage in Spithead.	G
Answg. Pendant over Pt 0.		All vessels North of Outer Spit keep clear of warship flying this signal.	S
Answg. Pendant over Pt. 9.	Green Green Green	All vessels and boats keep clear of H.M. ships under way.	C B G
Answg. Pendant over flags N E.	Green Red	Proceed with great caution, ships leaving Camber (Not ferries).	B
Answg. Pendant over flag A.	Red Red	Divers down, keep clear.	Diving boat
Flag E	Orange	Submarine entering or leaving Haslar Lake. At night, light flashes when sub. under way. All vessels keep clear of submarines.	B D

Speed limit of 10 knots in harbour and when within 1,000 yards o shore; 12 knots within 1,000 yards of any H.M. ships and anywhere within the Dockyard Port not covered by the 7 knots limit. Dockyard Por boundaries are shown on Admiralty charts.

Time of entry is restricted by the vessel's draft and state of tide. Ente Camber only at 4 hours before high water or at high water slack. Vesse do not berth at South Railway Jetty from 2 hours before high water un high water.

MAX. SIZE: Commercial berths: Camber – length 270 ft., draft 16 f Flathouse – length 457 ft., draft 22 ft. Albert Johnson Quay – lengt 470 ft. depth at MLWS, 12.5 ft. Continental Ferry Port Ro/Ro Link spa length of quay 460 ft. Depth 24 ft. LWS max. LOA: 330 ft.

Vessels at the Camber, Flathouse and Rudmore Wharves mus expect to take the bottom in soft mud at low water Springs.

HEALTH: Foreign arrivals to complete Maritime Declaration of Healt They are cleared immediately on arrival by either a Port Doctor or a officer of H.M. Customs, depending on where ship comes from an whether there is sickness on board.

Vessels arriving from ports within accepted area (North Europea ports) and coastal arrivals need not present Declaration in all case when there is sickness on board, Port Health Authority must b informed, preferably not more than 12 hours nor less than 3 hou before arrival.

See "Health – All Ports" before first U.K. port.

RADIO: See "Southampton" for pilotage communications.

Harbour Control is exercised through "Queen's Harbour Master' f commercial traffic on VHF Channels 16 and 11. Gilkicker Radio o Channels 16 and 14 is also available for commercial vessels, and t vessels entering the area bounded by the "Warner" buoy in the East a the "Sturbridge" buoy in the West must contact Gilkicker, even if o passing through the District. Channel 13 is the working channel for H. ships and the Q.H.M.'s office; call sign "Q.H.M.". H.M. ships are requir to keep a listening watch on Channel 16 when in the Portsmouth a Southampton control areas, and will 'shift' to working frequenc selected by mutual agreement. Gilkicker is also equipped for visu signalling. Medium frequency calls to Pilots and Port Authorities o available by link call through Nitonradio.

TUGS: 200 ton tug with bollard pull of 5 tons (must be ordered wel advance of arrival) and several tow-boat launches are available t commercial vessels at commercial berths. Two 1,600 h.p. diesel pad tugs, 5 screw tugs and 3 Voith-Schneider water tractors are available f larger vessels at Admiralty berths.

STEVEDORES: Registered dock workers and cranes must be orde by 1500 hrs. on the day previous to commencement of discharge loading, depending upon receipt of exact ETA from Master.

MEDICAL: All medical facilities available. Agent should be advised advance. (See "Southampton" entry if arrival is solely to land s personnel).

CUSTOMS ALLOWANCES: As for "Southampton".

DENSITY: 1025 salt water.

FRESH WATER: Available.

FUEL: Fuel and Diesel Oil available by road tanker or bunker barge fr Fawley.

FIRE PRECAUTIONS: Notices will be delivered to Master if berthing any jetty where special precautions apply.

OPENING/CLOSING HATCHES: By ship's crew.

CRANES: 3 derricks of 32 tons; 2 mobile cranes of 15 tons; 2 docks cranes of 10 tons; 3 mobile cranes of 5 tons; Provided by the P Authority.

CONSULS:
Belgium
Denmark
Finland
France
Netherlands
Norway
Sweden

REPAIRS: Minor deck and engine repairs can be carried out locally. Larger repairs and dry dock facilities at Southampton.
AIRPORT: Fast train service from Portsmouth to London Airport. Eastleigh Airport local, but mainly short flights to Channel Islands and feeder services.
SERVICES: All marine, radio and radar services can be obtained from Southampton.
REPATRIATION: All facilities exist.
TELEPHONES: None on board.
SHIP SUPPLY SERVICE: J. Butcher & Sons (Port Services) Ltd., 19 Pembroke Road, Old Portsmouth PO1 2NS. Tel: (0705) 822584. After hours 821347 and 821033.

The Company provides the majority of the towing services in the commercial port, operating in the Eastern Solent from Cowes to Nab Shoal including Spithead, The Mother Bank and St. Helen's Roads. A fleet of 11 vessels is operated, headed by the 525 b.h.p. Kort Nozzle Tugs "Janet James" and "Carol James" providing towing services (including towboats for smaller ships using Mile End and Camber Docks) and boats for mooring, rope running and berthing purposes. The passenger launch and workboat service transports ships' crews, Agents, technicians, store and equipment within the harbour area and Eastern Solent.

The Tugs and tow boats have been purpose built for berthing and unberthing ships up to 140 m. at the commercial port.
DEVELOPMENTS: With the opening of the Portsmouth section of the M27 and M275, there is immediate access to the Flathouse and Albert Johnson quays at the Rudmore Roundabout. At present, Thoresen operate daily services to Cherbourg and Le Havre, Brittany Ferries twice daily to St. Malo and Sealink daily to the Channel Islands.
AUTHORITY: Portsmouth City Council, Harbour Offices, Norman House, Kettering Terrace, Portsmouth PO2 7AE. *Tel:* Portsmouth 822251. (Ext. 4795). *Telex:* 86382 Cen Lib. *Contact:* Port Manager and Harbour Master (Ext. 4790).

PORT ASKAIG: 55.51 N. 06.07 W. (See Plan Book)

Operated mainly as a ferry port although other shipping may use the facilities available.

The wharf operated by Strathclyde Regional Council (SRC) is 60 m. long with a depth of 4.06 m. below Chart Datum. It has a Ro/Ro ramp suitable for use by end loading vessels. Fresh water is available. Western Ferries operate a second Ro/Ro berth at Port Askaig.
AUTHORITY: Strathclyde Regional Council (SRC), Department of Roads, Strathclyde House, 20 India Street, Glasgow G2 4PF. *Tel:* 041-204 2900. *Contact:* W. S. McAlonan, Director.

PORT ELLEN: 55.37 N. 06.13 W.

Operated by Caledonian MacBrayne Ltd., used mainly by ferries. Chart B.A. 2037 covers the area.
PILOTAGE: Not compulsory.
ANCHORAGE: Approach with Carraig Fhada Light bearing 332°(T) until 2 cables off light. Alter course to 026°(T) till lighthouse bears 270°(T) × 2.2 cables, then altering course to 353°(T). Anchorage position is reached when lighthouse bears 206°(T) × 3.6 cables, equidistant with Na Sglithean Beach, 3.6 cables. Depth at anchorage 5 fathoms.
APPROACHES: Harbour entrance 7 cables wide, depth 7 to 8 fathoms.
BERTHING: Car Ferry Berth can accommodate vessels up to 1,200 g.r.t. either side of the dolphin. Inner Berth can accommodate vessels up to 600 g.r.t. Depth at pier 12 ft. LWOST, range 3 ft. to 4 ft.
AUTHORITY: Caledonian MacBrayne Ltd., The Ferry Terminal, Gourock PA19 1QP. *Tel:* 0475-33755. *Telex:* 779318. *Cables:* "Calmac" Gourock.

PORT ST. MARY, Isle of Man: 54.04 N. 04.44 W. (See Plan Book)

PILOTAGE: Not compulsory.
MAX. SIZE: See "Berthing".
VHF: Channels 16 and 12 available only when vessels expected.
BERTHING: Outer Harbour (Alfred Pier): Max. LOA 170 ft., draft not to exceed 10.5 ft. to lie afloat over LWST.

Inner Harbour: Max. LOA 160 ft., draft 8.5 ft. at Neaps, 12 ft. at Springs. Harbour dries out at LW. No quay space for storage.
AUTHORITY: Isle of Man Harbour Board, Sea Terminal Building, Douglas, Isle of Man. *Tel:* 0624-23813. *Contact:* Harbour Master. Tel: 0624 833206.

PORT TALBOT: 51.35 N. 03.49 W. (See Plan Book)

DOCUMENTS:
Ship's Register.
Test Certificate for ship's gear.
Manifest.
Master's Report to be completed on arrival.
Customs and Health documents as required by H.M. Customs and Port Health Authorities, to be completed on arrival.

PILOTAGE: Compulsory. Station – Swansea Bay. Usual International signals. VHF Channels 16 and 12.
ANCHORAGES: Swansea Bay.
RESTRICTIONS: *Ore Terminal* in New Harbour, entrance channel 1.5 miles long, 550 ft. wide. Depth 60 ft. MHWS, 53 ft. MHWN.
MAX. SIZE:
Ore Terminal: 100,000 tons d.w.t. ore carriers. Draft 48 ft. 6 in.
HEALTH: See "Health – All Ports" before first U.K. port.
TUGS: Join off Breakwater.
BERTHING: *New Harbour:* British Steel Corporation provide 3 unloading appliances on the jetty and also a conveyor-belt system to carry the iron ore to the stocking ground close to harbour and steel works. Grabs on the unloading appliances weigh 22 tons each, and each have a pay-load of 22 tons. The 3 discharging appliances together have an unloading rate of 5,400 t.p.h. Average rate throughout discharge from start to finish of the 3 discharging appliances together is 2,700 t.p.h.
STEVEDORES: ETA advices sent by vessels to local Agent and then advised to British Steel Corp. as stevedores. Labour ordered by Agent from B.S.C.
DENSITY: Ore Terminal 1025.
FRESH WATER: By gravity 10 t.p.h. Harbour pumping 100 t.p.h.
FUEL: By barge or road tanker. Any grade available.
GANGWAY/DECK WATCHMEN: None, but bye-laws state that vessel must be manned.
OPENING/CLOSING HATCHES: Performed by crew.
CUSTOMS ALLOWANCES: Tobacco, 1 oz. per day per man, max. 8 days. Wine/Spirits, 0.25 pint per day per man, every 4 days.

3. Yes.
4. No.
5. Usual regulations.
6. Riggers not available.

SHIP SUPPLY SERVICE: It is the practice for pilot cutters of Swansea and Port Talbot to ferry personnel, stores etc. to vessels off shore and due to dock at the respective ports.
Contact: Swansea Pilotage Authority, 90 Exchange Buildings, Swansea SA1 1SY, W. Glam., S. Wales. Tel: Swansea (0792) 53631. Cables: Pilority.
AUTHORITY: Associated British Ports, Harbour Office, Adelaide Street, Swansea, West Glamorgan SA1 1QR. *Tel:* Swansea (0792) 50855. *Telex:* 48150. *Contact:* Mr. T. Wilkinson, Port Manager. Captain T. Boyd, Dock and Harbour Master.

RAMSEY, Isle of Man: 54.19 N. 04.21 W.

PORT LIMITS: Line joining Shellag Point (3.25 miles North of harbour entrance) and Cor Stack (2.75 miles S.E. of harbour entrance) defines the port limits.
DOCUMENTS: Same as other U.K. ports.
PILOTAGE: Service provided by Harbour Master and is not compulsory. There is no regular pilot boat. Pilot will board 0.5 miles East of harbour entrance.

Contact Harbour Master direct by telephone (0624) 812245 or by VHF Channels 16 and 12 at tide times only. In all cases as much notice as possible should be given.
ANCHORAGES: No specific anchorages, but anchoring not permitted within 4 cables of harbour entrance or within 4 cables of Queen's Pier (3.5 cables S.E. of harbour entrance). Moderately good holding ground in sand, often used by sheltering vessels in S.S.W. or N.W. gales.
RESTRICTIONS: Harbour dries out each LW.
MHWN: Max. available depth 3.80 m.
MHWS: Max. available depth 5.50 m.
MAX. SIZE: For East Quay and West Quay: Max. length 61 m., breadth 9.0 m. Draft 3.0 m. on Neap tide, 4.0 m. at Spring tides.
For Channel Berth: Max. length 70 m., breadth 13 m.
For all berths max. available depth will vary according to tide.

HEALTH: Standard U.K. procedure.
RADIO: R/T, W/T and VHF through Portpatrick Radio (GPK) or Anglesey Radio (GLV).
VHF: Coverage from Harbour Master's Office includes port and approaches, Channels 16 and 12 at tide times only.

Coverage of North Irish Sea from Snaefell Summit by Douglas Harbour Radio, continuous 24 hour watch on Channel 16. Messages may be passed through Douglas Harbour Radio to amend ETA Ramsey etc.
RADAR: No port radar.
TUGS: Two tugs (420 i.h.p. and 345 i.h.p.) based at Douglas. Can be made available with sufficient notice, if required.
BERTHING: All berths dry out each LW. Bottom is sand and shingle.

Name	*Length* (m.)	
Channel Berth	76	
East Quay	116	
West Quay	80	
North Quay	73	For lay-by only.

With exception of North Quay all berths readily accessible to road traffic.
CRANES: No cargo handling gear at any berth. Mobile cranes can be arranged through Agents with reasonable notice.
BULK CARGO FACILITIES: Bulk cement handling facility at East Quay with 2×500 ton silos. Privately owned.
SPECIALISED CARGO HANDLING FACILITIES: No Ro/Ro, container handling or bulk liquid handling facilities.
BRIDGES: Access to upper harbour through swing bridge, by arrangement with Harbour Master. Sufficient depth of water usually available 2 hours either side of HW. At least 24 hours notice required to swing the bridge outside normal working hours, weekends and holidays. Within normal working hours less notice is acceptable.
STEVEDORES: Arranged through Agent. A minimum of 24 hours notice required and all working hours are negotiable in advance. Main commodities discharged are grain and coal by mobile crane with grab – average discharge rate is approx. 60 t.p.h. Occasional grain cargo loaded by mobile elevator at approx. 40 t.p.h.
MEDICAL: Hospital facilities available without prior notice.
TANKERS: No tanker facilities or berths available.
DENSITY: 1025.
FRESH WATER: Available by hose at approx. 30 t.p.h. on East, West and North Quays.
FUEL: Delivery by road tanker from Douglas to all berths except North Quay. Gas oil and medium fuel oil available at 24 hours notice.
CONSULS: None.
REPAIRS: All types of deck and engine repairs possible by small shipyard in upper harbour.
DRY DOCKS: No dry docks but 2 slipways; one for vessels about 185 g.r.t. and one for about 50 g.r.t. Both slipways in upper harbour.

Also a grid in upper harbour which dries out at approx. half tide, length 40 m., breadth 7.5 m. This grid used occasionally by vessels of up to 500 g.r.t. for bottom plate inspection/repairs. At least 72 hours notice required, more if possible. Grid hire arrangement through Harbour Master.
SURVEYORS: All surveyors from Liverpool by arrangement.
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: Normally handled by ship's crew.
CUSTOMS ALLOWANCES: Standard U.K. allowance.
CARGO GEAR: Loading/discharging of general by ship's gear or mobile crane. Discharge of bulk by grab equipped mobile cranes. A wide range of mobile cranes up to 25 tons available for hire at reasonable notice.
REPATRIATION: Facilities available for repatriation of crew members.

Daily scheduled aircraft connections to London and other U.K./Irish airports. Daily ferry services to Heysham and Liverpool. These services operate all year with supplementary air and sea services to other destinations during the Summer.
AIRPORT: 25 miles distant.
TIME: GMT and BST.
HOLIDAYS: New Year's Day, Good Friday, Easter Monday, May Day, Whit Monday, Senior TT Race Day (usually 1st or 2nd Friday in June), Tynwald Day (5th July), August Bank Holiday, Christmas Day, Boxing Day.

Cargo not normally worked on these days but all working hours are negotiable in advance.
POLICE/AMBULANCE/FIRE: All emergency services available by telephoning 999 on any telephone, no charge is made for this call. Assistance possible from H.M. Coastguard on VHF Channel 16.
EMERGENCY CO-ORDINATION CENTRE: H.M. Coastguard, Ramsey Marine Rescue Sub-Centre, Queens Promenade, Ramsey. Tel: (0624) 812322. Telex: 627382. VHF Channel 16.
TELEPHONES: There are no facilities for telephones to be placed on board.
SERVICES: Compass adjuster and Lloyd's Agent available.
SHORE LEAVE: When Immigration and Customs requirements satisfied (for vessels arriving from a port outside the U.K.), no restriction on crew shore leave provided that they rejoin prior to the vessel's departure.
IDENTIFICATION CARDS: Not required.
DELAYS: Berthing delays are not usual (disregarding awaiting tide) except when strong N.E. to S.E. winds make navigation in the harbour entrance hazardous. These conditions may cause 1-2 days delay if severe.
BANKS: Barclays Bank, 52 Parliament Street. Tel: (0624) 813124.
I.O.M. Bank, 20 Parliament Street. Tel: (0624) 812829.
Lloyd's Bank, 71 Parliament Street. Tel: (0624) 812225/814233.
Midland Bank, St. Paul's Square. Tel: (0624) 814000.
Nat. West. Bank, Peel Street. Tel: (0624) 812109.
Major banking facilities are available in Douglas.

STORING: See "Prelims", page viii.
1. Vessel may be stored by barge or truck.
2. No restrictions unless dangerous cargo being handled. dangerous cargo being handled as cargo or as part of the stores ther other cargo work/storing to cease.
3. Berths accessible to all road traffic.
4. Fork lift trucks may be used on quayside.
5. Bonded stores available through Local Agent, who will arra necessary clearance, etc. H.M. Customs may attend at their discret
6. Riggers may be arranged through Local Agent at reasona notice.

SHIP SUPPLY SERVICE: See "Douglas".
AUTHORITY: Isle of Man Harbour Board, Sea Terminal Buildi Douglas, Isle of Man. *Tel:* 0624-23813.

Harbour Office, East Quay, Ramsey, Isle of Man. *Tel:* 0624-8122
Contact: Harbour Master.

AGENT: See "Douglas."

RYE: 50.56 N., 00.47 E. (See Plan Boo

PILOTAGE: Call "Rye Pilots" 1 hour before to 1 hour after HW. Pil attend station when vessels expected – ETA 24 hours in advance.

Vessels fitted with VHF Radio should keep watch on Channel when arriving and sailing from Rye and call for instructions on tra movements.
NAVIGATION: *Leading Marks:* On West Bank inside West Groyne m be moved as channel alters.

Day – Beacons with triangular topmarks points together.

Inner Leading Light – Occulting Green 4 secs. with white sec 326°T to 331°T.

Tide Signals: Shown from harbour office 0.75 miles inside harbo entrance on East Bank.

Night – 7 ft. to 10 ft. on bar. Fixed Green.
Over 10 ft. on bar. Fixed Purple.

Day – None but horizontal timbers on tripod beacon at harbo entrance indicate plus 5 ft., plus 10 ft., plus 15 ft. above Ordnan Datum.

Traffic Signals: Day and Night: Qk. Fl. Yellow above Harbour Offi and at West end of Alsford's Wharf denote immediate shippi movement into or out of harbour.

Day – on Flagstaff yard arms behind Harbour Office denotes expect shipping movements on tide.

One Black Ball – ship arriving from sea.
Two Black Balls side by side – ship sailing.
Three Black Balls in a triangle – ships arriving and sailing.

Fog Signals: East Pierhead Horn every 7 secs.

Radio Direction Beacon: Call sign "RYE" position Lat. 50° 57.5′ N Long. 0° 43.5′ E. Frequency 321 kHz continuous.
RESTRICTIONS: See "Berthing".
MAX. SIZE: LOA 230 ft. Max. draft 13 ft. 06 in.
VHF: Call sign "Rye Harbour Radio" Channels 16 and 14. 0900 1700 hrs. daily. "Dover Coastguard" VHF Channels 16 and 67.
BERTHING: Cargo vessels entering Rye Bay should follow the coa from Dungeness coming from the East or Fairlight coming from the We keeping at least 2 miles offshore until Rye Fairway Buoy is reach (Spher. R.W. Fl. 10 secs.), position 149° T, 1.8 miles from the harbo entrance. Anchorage 5 fathoms. at MLWS.

The entrance is 42 m. (140 ft.) wide and is recognised by conspicuous tripod beacon (Fl. 5 secs. Red), 30 m. seaward of the We Groyne which is 240 m. seaward of the East Pier with the light po (Qk. Fl.(9) 15 secs.). The channel virtually dries and is liable to chan 2 leading marks with triangular top marks inside the entrance on t Western beach indicate the line of best water (October 1983). The E Pier submerges at HWS and is marked by starboard hand beaco There is a strong eddy inside the East Pier during the flood stream.

Inside the entrance the channel narrows to 30 m. and runs straight half a mile (329°T) to Rye Harbour Village where there is an in leading light (Occ. W.G. 4 secs.). Strict attention should be paid to R Hand Beacons (4 with Qk. Fl. Red) which mark a training wall on t West side of the channel (submerged at plus 8.3 O.D.N.)

The Rother has a strong flood stream and as the harbour dries ou should NOT be approached 3 hours either side of LW. In gales fr from the S.E. through to S.W. waves break across the entrance.

The best time for any vessel to enter or leave the port is 1 hour ei side of HW but care is needed because movement of cargo vess takes place during this period (see "Navigation" – "Traffic Signa Visiting yachts may berth at the Admiralty Jetty by the Harbour Of and in mud berths at Strand Quay in Rye by arrangement with t Harbour Master. Subject to weather conditions it is possible for vess drawing less than 1.5 m. to enter the harbour at HW minus 2.5 ho (before the flood tide flows at maximum rate) to plus 3 hours.

H.M. Customs clear craft entering from abroad at the Harbour Of

Alsford's Wharf is located 1 mile from the entrance on the West ba of the river.
GENERAL: *Tidal Information:* These tide tables are referred Ordnance Datum Newlyn and GMT.

Chart Datum equals O.D. Newlyn minus 4 m. (13 ft.)
O.D. Newlyn equals Chart Datum plus 4 m. (13 ft.)
Duration of Mean Rise at Rye Harbour:
Spring – 3 hours 15 minutes.
Neaps – 5 hours 00 minutes.

Latest Surveys (September 1982) indicates that the channel has been moving Eastwards with a sand bar extending 110 m. Eastward from the tripod beacon. Average depth in the channel at the entrance:

At MHWS – 5.5 m. (19.2 ft.)
At MHWN – 4.5 m. (15 ft.)

Depth over bar:

At MHWS – 4.2 m. (13.8 ft.)
At MHWN – 2.5 m. (8.2 ft.)

For depth at HW at Alsford's Quay add 1.52 m. (5 ft.) to predicted height given in tables.

For depth at HW at Strand Quay mud berths deduct 0.6 m. (2 ft.) from predicted height.

The following approximate corrections for level and time of HW should be added/subtracted to convert these tables for use at the undermentioned coastal areas:

Hastings	minus 0.8 ft.	minus 2 minutes
Dungeness	plus 0.9 ft.	minus 6 minutes
Folkestone	minus 1.6 ft.	minus 15 minutes

AUTHORITY: Southern Water, Kent Division, Luton House, Capstone Road, Chatham, Kent ME5 7QA. *Tel:* Medway (0634) 46655. *Telex:* 965134 Krw Me G. *Contact:* Mr. George Roberts, Rivers Controller. Tel: Rye 223256. Captain C. H. Marsh, Harbour Master. Tel: Rye 225225.

SCALLOWAY: 60.08 N. 01.16 W. (See Plan Book)

Scalloway is a small port on the Atlantic side of the Mainland of Shetland and is located only 7 miles by road from Lerwick.

The main trade is centred around the catching, processing and export of fish, but there has been a marked increase in general trade since the recent improvement of port facilities.

Most services are available and can be arranged through the local shipping Agents.

Communications: Listening watch is maintained on Channel 16 only during office hours. At other times contact to be made through Shetland Radio. Local shipping Agent Tel: Scalloway 636 (office), after hours: Scalloway 304. Pier Master Office, Scalloway 574, home Scalloway 324. Assistant Pier Master, Lerwick 3485.

PILOTAGE: Request for Pilot should be made via local Agent at least 12 hours in advance of ETA and confirmed 1 hour before arrival by calling Scalloway Harbour Radio on Channel 16 VHF. No particular light or sound signals required. Usual station off Fugla Ness lighthouse on the Island of Burra. Alternative station at entrance to North Channel. Vessels awaiting Pilot maintain position off Fugla Ness. Pilotage not compulsory.

ANCHORAGES: Good holding bottom in Scalloway Bay.

RESTRICTIONS: No night time or tidal restrictions. Largest scale and up to date charts essential.

MAX. SIZE: Only restriction, draft limit of 6.1 m.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Shetland Radio.

VHF: Vessels should listen to Channel 16 VHF when in VHF range.

BERTHING:

Berth No.	*Length (m.)*	*Least Depth (m.)*
1	66	7.5
2	53	4.0
3	77	4.2
4	75	6

No. 1 Berth can accommodate vessels up to 95 m. in length.

CRANES: Mobile cranes available. Ships normally employ their own cranes.

STEVEDORES: Should be arranged through Agents.

MEDICAL: Doctor based at Scalloway. Hospital at Lerwick.

FRESH WATER: Available from standpipe at all berths, rate 10 t.p.h.

FUEL: Marine gas oil by pipe or from road tanker. 1 hour advance notice through Agent.

REPAIRS: Most types deck and engine repairs.

SLIPWAYS: Slip accommodation for vessels up to 180 tons.

SURVEYORS: Lloyd's Agency at Lerwick: Hay and Company (Lerwick) Ltd., 106a Commercial Street. Tel: (0595) 3057. Telex: 75295.

CUSTOMS ALLOWANCES: See "Lerwick".

REPATRIATION: Facilities for effecting crew changes.

AIRPORT: Sumburgh Airport 25 miles. British Airways several times daily. Tingwall Airstrip 3 miles.

HOLIDAYS: Cargo or shipping operations not affected by holidays.

POLICE/AMBULANCE/FIRE: Dial 999.

TELEPHONES: No arrangement for placing telephones on board. The Port Authority provide a telephone box in the harbour area.

SERVICES: Compass adjusting. Provisions of all kinds can be obtained locally.

SHORE LEAVE: Crew members allowed ashore.

AUTHORITY: Shetland Islands Council, Ports and Harbours Department, Port Administration Building, Sella Ness, Graven, Shetland. *Tel:* Sullom Voe 242551. *Contact:* Captain C. J. Nicolson, Deputy Harbour Master/Deputy Port Director.

SCAPA FLOW, Orkney Isles (Flotta Terminal): 58.53 N. 03.05 W. (See Plan Book)

OPERATOR: Occidental of Britain Inc., Flotta Terminal, P.O.Box 14, Kirkwall, Orkney. Tel: Longhope 341.

DOCUMENTS:

Maritime Declaration of Health (Form supplied by Pilot or Agent).
Vaccination List.
Immigration Form H.O. Form IS6.
Crew Lists — 2 required.
Ship's Stores List.
Crew Personal Effects Declaration, Customs Form C.142.
Last Port Clearance.
Ship's Register.
Load Line Certificate.
Safety Construction Certificate.
Safety Radio and Safety Equipment Certificates.
Derat Certificate.
Previous British Light Dues Receipts.

Customs and Health: Weather permitting, Customs, Immigration, Health and Agent will embark with the Pilot.

Customs House: Customs clearance inward and outward will be the responsibility of ship's Agents.

Light dues will be paid by the vessel.

Cargo Documents: Bills of Lading; Cargo Manifest, Quantity and Quality Report; Tanker Time and Loading Report; Certificate of Origin; Ship's Cargo and Ullage Reports; Master's Receipt for Shipping Documents and Documentation Transmittal Reports will be prepared by Company Representative.

Ship's Agent: All ship's business other than Cargo and Customs documentation and the shipping documents under section above will be conducted by the ship's Agent.

EDP: Early departure procedures apply to most vessels. Blank Bills of Lading are signed by the Master on arrival, and the tonnages inserted on completion of loading.

PILOTAGE: Pilot vessels *Scapa Pathfinder, Scapa Pilot* and *Scapa Patrol* watch VHF Channel 16.

Inside pilot station (58° 46′ N., 03° 07′ W.) located 2.0 miles 180° from Cantick Head Lighthouse.

Unfamiliar vessels, VLCCs, also any vessel without full information about the unusually strong currents in Pentland Firth is recommended to embark the Pilot at the appropriate outside position (Refer to Tidal Stream Atlas, Admiralty Publication H.O. Number NP 209).

Port restrictions which may cause delays: Weather preventing embarkation of Pilot at either inside or outside positions.

Local wind conditions in Scapa Flow preventing a safe approach to the berth.

Remarks: In Scapa Flow the weather conditions, in particular the wind, can change suddenly and quickly deteriorate, not only in Winter but at any time of the year.

Mooring Masters: A Company Mooring Master will board vessels to the Northward of the Calf of Flotta or at her designated anchorage within Scapa Flow prior to berthing at any Terminal Facility. A Company Mooring Master will be on board during the time that a vessel is moored and he will liaise between the Terminal and ship personnel throughout any deballasting, loading or discharging operation.

The Company Mooring Master may ensure that Masters of vessels are familiar with, and strictly observe, all local regulations concerning the safety of operations and pollution of the sea by oil whilst laid at the Company's facilities.

Vessels using the Company's facilities are required to provide the Mooring Master with accommodation and messing of a standard equivalent to that enjoyed by the vessel's officers.

ANCHORAGE: Inside Scapa Flow several anchorages are available depending upon prevailing winds. Sea anchorage outside, in the approaches to the Pentland Firth, is not possible.

APPROACHES: The approach to the Terminal is through the Pentland Firth from East or West, and then Northward through Hoxa Sound, the main entrance to Scapa Flow. Consult Admiralty Sailing Directions Vol. 1, and Admiralty Tidal Stream Atlas for Orkney and Shetland, Publication No. 209. Principal charts are as follows and Decca coverage is available: Admiralty Chart Nos. 2162, 2581, 35.

MAX. SIZE/RESTRICTIONS: The current maximum sizes of crude tankers permissible at Flotta is 200,000 d.w.t. at the SPMs and 150,000 d.w.t. at the jetty.

Since the advent of segregated ballast tankers, an anomaly has arisen between the physical size of tankers, upon which these maximums are based and the deadweight capacity. In order to prevent confusion as to the size of tanker that is acceptable, the following guidelines will be enforced.

	Conventional Ballast Tankers	*Segregated Ballast Tankers*
SPMs	200,000 d.w.t.	170,000 d.w.t.
Jetty	150,000 d.w.t.	130,000 d.w.t.

Prior to accepting crude vessels it must be clarified whether the vessel is a segregated ballast tanker or a conventional ballast tanker. If a segregated ballast tanker then the deadweight must be indicated. If the tanker has been converted from a conventional ballast tanker to a segregated ballast tanker, then the original deadweight should also be indicated.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Arrival Notices.

Pilots: By coastal radio station 24 hours and 12 hours prior to arrival. VHF contact at least 3 hours prior to arrival at the pilot station.

Terminal: By coastal radio station 7 days, 72, 48 and 12 hours prior to arrival at the pilot station.

VHF contact should be established at least 3 hours prior to arrival at the pilot station.

The Terminal must be advised by VHF via the "Harbour Control", when the Pilot has boarded or when 6 miles from Stanger Head at the entrance to Hoxa Sound.

INFORMATION REQUIRED PRIOR TO ARRIVAL:
Radio advice prior to arrival: Terminal operated by Occidental of Britain, Flotta Terminal, telex 75212 (OXYOPS G), via Portishead Radio, of ETA with following details. Also advise Agent of ETA, drafts fore and aft for arrival, and any immediate requirements on arrival.

Standard Message to Crude Vessels (Initial Visit): Masters are advised that reception facilities are available for clean ballast only. All ballast must be discharged to reception facilities ashore. No ballast from either cargo or permanent ballast tanks is permitted to be discharged into Scapa Flow.

Please advise the following details:

AAA	Arriving and sailing drafts and ETA.
BBB	Cargo requirements in metric tonnes.
CCC	Grade of previous cargo.
DDD	Quantity of Cargo tank ballast and position uplifted.
EEE	Quantity of permanent ballast and position uplifted.
FFF	Quantity of ballast for discharge ashore.
GGG	Last port and destination.
HHH	Is inert gas system fully operational and cargo tanks inerted?
JJJ	Oxygen level in cargo tanks.
KKK	Gross nett and summer d.w.t. tonnages.
LLL	Maximum loading rate.
MMM	Total time for deballast.
NNN	Number and size of cargo manifolds.
OOO	Availability of reducers to adapt manifolds to suit 16 in. 150 ASA flanges three required.
PPP	Can vessel load and deballast simultaneously while maintaining a minimum of a two valve separation?
QQQ	Is vessel equipped with a patent A.K.D. stopper or similar capable of accepting an 80 mm. end link?

Vessels are required to load part cargo prior to discharging ballast.

Minimum 10 ton SWL derrick required on port side for SPMs. Derrick required at jetty if it is necessary to fit spool pieces to accept loading arms. Ballast manifold is aft of two crude connections on SPM.

Your attention is drawn to the serious view taken by port and terminal authorities of pollution. Heavy fines are imposed to which is added the cost of clean up operations. Please ensure all crew members are conversant with and comply with pollution requirements.

Principal pollution causes are leaking sea valves overboard discharge valves and cargo or bunker overflows. We recommend sea valves, overboard discharge and bilge discharges are checked tight. Prior arrival cargo and bunkering procedures should be reviewed with chief officer and chief engineer. All scuppers to be plugged.

NOTE: On subsequent visits vessels should only answer AAA to JJJ inclusive.

Standard Message to Liquid Gas Carriers (Initial Visit):
LIQUID GAS CARRIERS ARRIVING AT SCAPA.
LPG vessels arriving at Flotta Terminal with ballast for discharge to Scapa Flow will comply with the following instructions in respect of this ballast.

1. Ballast for discharge must have been taken on board within 24 hours of arrival and at a distance of at least 12 miles off shore.
2. The Master will provide the Terminal with signed advice stating date, time and positions between which ballasting operations were carried out, quantity of ballast for discharge and tanks in which it is contained.

Harbour Authority officials may board vessels to ascertain that these procedures have been adhered to and the quality of the ballast is suitable for discharge. The Authority's decision as to whether or not the ballast is acceptable for discharge will be final. Non compliance will result in delays being occasioned by the vessel.

Masters are advised that this concession for discharge of permanent ballast relates only to LPG carriers and your attention is drawn to the serious attitude adopted by Port and Terminal Authorities to pollution incidents of any kind.

To prevent problems arising due to surge pressures caused by too rapid closure of emergency shutdown valves (ship side) it is required that the minimum closure rate from fully open to completely closed be 9 seconds when loading LPG or 13 seconds for Ethane loading.

Please advise the following details:

AAA	Arriving and sailing draft and ETA.
BBB	Cargo requirements in metric tonnes.
CCC	Previous cargo and quality of tank atmospheres.
DDD	Tank temperature on arrival.
EEE	Time required for cooldown.
FFF	Height of manifold above water line at arrival draft.
GGG	Closure timed of emergency shutdown valves.
HHH	Quantity of ballast and amount to discharge.
JJJ	Last port and destination.
KKK	Gross, nett and summer deadweight tonnages.
LLL	Maximum and cooldown loading rates.
MMM	Availability of deck tanks to accept coolant and quantity required.
NNN	Size of cargo/vapour return manifold and position of vapour return manifold relative to cargo manifold.

Purging and/or coolant is not carried out alongside.

Vessel will require to load sufficient coolant for purging and/or coolant to be carried out at anchor.

NOTE: On subsequent visits vessels should only answer AAA to JJJ inclusive.

VHF: *Harbour Pilots and Harbour Control:*
VHF Listening: 16 Telex: 75475
Working: 9, 11 and 20
Mooring Masters/Terminal:
Mooring Masters 161.15
Terminal 161.30 } Private Frequencies Only
Loading Operations 161.15
,, ,, 161.30 } Private Frequencies Only
N.B. Launches are fitted with VHF Listening Channel 16
Working Channel 14, 12, 8, 6

TUGS: 3 tugs (2 × 37 ton bollard pull and 1 × 45 ton bollard pull) available, and compulsory, for berthing. They are fire fighting tugs equipped with Warren Springs pollution dispersent equipment.

Whenever a tanker is on a berth, 1 stand-by tug is anchored in close vicinity for safety and pollution purposes. Fire wires must be rig off-side forward and aft.

1 tug (standby tug) is towing aft whilst tanker is moored to SPM.

READINESS: *Notice of Readiness to load/discharge:*

Notice of Readiness will be accepted subject to the follow conditions;—

a. The Terminal is open (this decision shall be communicate the Master of the vessel by the Company).
b. i) The vessel has been boarded by the Company Mooring Ma prior to her proceeding towards the berth *or*
   ii) The vessel has anchored within the anchorage area awaitin berth.

N.B. Although vessels will be loaded in order of Acceptance of No of Readiness, it should be borne in mind that Acceptance of Notic Readiness is contingent upon complete compliance with all requirements of Port Conditions.

c. Acceptance of Notice of Readiness may be withdrawn by Company upon the occurrence of any of the following events
   The decision by the Mooring Master that the vessel's dra equipment and/or appurtenances are not suitable for berthin the Terminal. If this decision has not been taken, for reas within the Mooring Master's control, within 24 hours f Acceptance of Notice of Readiness, the Company shall deemed to have waived its right to withdraw acceptance un this sub-paragraph.
   Any supervening decision of the Harbour Authority wh prevents the vessel from berthing.

N.B. A derrick or crane with a safe working load of not less than 10 t is required for handling hoses at the SPM berths.

BERTHING:
Position:
SPM 1: Lat. 58° 52′ 11.86″ N. Long. 3° 07′ 20.68″ W.
SPM 2: Lat. 58° 52′ 17.72″ N. Long. 3° 05′ 47.79″ W.
Main Control Building (Radio Mast): Lat. 58° 50′ 31.05″ Long. 3° 07′ 08.01″ W.

SPM Particulars:
Pillar Type Single Buoy Mooring – 2.
Tanker Size – 35,000 d.w.t. – 200,000 d.w.t.
Minimum Water Depth – 75 ft.
Max. Draft – 72 ft.
Mooring System – 10 m.×3 in. chain, 40 m.×21 in. rope gromm 10 m.×3 in. chain and 6 m.×2⅝ in. chain.
Crude Manifolds – 2×16 in.
Ballast Manifolds – 1×16 in.
Maximum Loading Rate – 80,000 bbls.p.h.
Hose Weight – Minimum 7.5 tons
Ballast connection is positioned aft of the 2 crude connections.

A load monitoring system is fitted to each SPM giving constant str readings to the Terminal Control Room and the Mooring Master board the tanker. In adverse weather conditions strain gauge readin will indicate when vessel should prepare to vacate the berth.

LPG/Crude Oil Jetty:
Finger type jetty with breasting dolphins.
Tanker Size – 4,000 d.w.t. – 150,000 d.w.t.
Minimum Water Depth – 63 ft.
Maximum Draft – 62 ft.
LPG Manifolds – 1×10 in. loading plus 1×10 in. vapour return.
LPG Loading Rate – 10,000 bbls.p.h.
Crude Manifolds – 4×16 in.
Crude Loading Rate – 80,000 bbls.p.h. maximum.
Ballast Manifold – 1×16 in. (crude gantry only).
Maximum Deballasting Rate – 40,000 bbls.p.h.

Terminal Capacity:
1. Crude Oil:
There are 5 tanks, each of 500,000 bbls. nominal capacity for stor of stabilised crude oil, plus a further 2 of 1,000,000 bbls. each.
2. Liquid Petroleum Gas:
There are 2 tanks, each of 100,000 bbls. nominal capacity for stor of propane.
3. Ethane:
There are 5 ethane tanks, each of 500 cu.m. nominal capacity.

Remarks: Vessels moored to the SPMs are required under condit to maintain a tug towing astern to keep the mooring system unde tension of 15 tons – 20 tons.

When ship's piping does not permit the pumping of permanent bal through the manifold, the possibility to load some cargo prio deballasting the cargo tanks' clean ballast may be granted by p arrangement with the terminal. In all cases where ships inten deballast and load simultaneously there must be at least a 2 va separation.

DENSITY: 1025.
FRESH WATER: Not available.
FUEL: Bunkers not available at present, but lubricants in small qua available. Ships should cable requirements to Agent as soo possible.

MOORING AND HOSE HANDLING:

On SPMs: Ship's derrick and manifold connections will require to be prepared on the port side. An accommodation ladder will be rigged to starboard with a pilot ladder ready to port.

Securing equipment for single chain mooring forward and hose connecting gear will be hoisted on board from Company work launch by ship's derrick. A good mooring line will be required from forecastle head as a messenger for the buoy mooring.

Tanker Loading Pier: The loading pier is equipped with rigid articulated pipe arms mounted on gantries for loading liquid petroleum gas and also for loading crude oil. The crude oil gantry is also fitted with a ballast discharge arm.

There is an access roadway between the Pier head and the shore. Mooring lines are run to dolphins by terminal mooring boats. Vessels with tension winches when moored at the pier must have winches on 'Manual brake'.

Arrival Draft: Vessels must arrive at the Company's facility in an adequate ballast condition compatible with safe manoeuvring during handling. Excessive trim or insufficient ballast could incur delay until such time as an acceptable condition is reached.

BALLAST: All berths are equipped with water ballast discharge lines. There is a water ballast tank of 500,000 bbls. capacity and a ballast treating facility capable of handling 40,000 bbls.p.h. It is prohibited to discharge water ballast into Scapa Flow.

Bilge Ballast Discharge: Vessels should arrive in Scapa Flow with clean ballast only.

The discharge of bilges and/or ballast by vessels into Scapa Flow is strictly prohibited.

N.B. All ballast water including permanent ballast must be discharged through the Terminal ballast reception and cleaning facility.

Discharge of ballast and simultaneously lifting of cargo is not permitted unless approval has been given by the Mooring Master.

The salvage in ballast shall become the property of the Company, in consideration of the Company's operation of the Terminal ballast reception and cleaning facility.

MEDICAL: Medical and dental services are available by arrangement. Hospital facilities are available at Balfour Hospital, Kirkwall.

REPAIRS: There are no dry-docking facilities available, but local engineering firms undertake minor repairs to machinery and equipment.

Immobilisation of engines: Not allowed on any of the berths, and not recommended when at anchor. When at the anchorage, however, in special circumstances, and provided the Harbour Master's permission is first obtained, it may be possible.

TRAVEL: There are daily air services, during the week, to Aberdeen, Inverness, Glasgow and Edinburgh from Kirkwall Airport. There is no service on Sunday, There is a daily ferry service from Stromness to Scrabster to connect with British Rail. During the Winter months there is no service on Sunday.

CONSULS: Denmark, Netherlands, Norway and West Germany.

LAUNCH SERVICES: Launch services from Flotta and SPM berths are available by arrangement with local Agents to Scapa Pier.

SHORE LEAVE: There are no restrictions on shore leave for ships' personnel. For vessels moored at SPMs arrangements can be made with the Agent for a launch service to be operated to the shore. For safety reasons, the boat selected for this service must have good stability, to prevent accidents in cases of hazardous boarding due to weather conditions.

SAFETY: Should communications fail, the Mooring Master will authorise continuous soundings of the Ship's whistle or siren as a signal to stop loading (ships in the vicinity capable of so doing should inform the Terminal Control by VHF that this signal is being sounded in case it is inaudible ashore). Ships hearing the signal and unable to contact the Terminal should inform "Harbour Control".

SERVICES: Stores are of good quality, and the laundry facilities are good, but limited. Tank cleaning and dirty ballast facilities are not available.

GENERAL:

Accidental Spills and Leakage: All oil spills and leakages must be immediately reported to the Mooring Master, who will inform the Harbour Authority forthwith. All deballasting/loading/discharging operations will be immediately suspended until the cause of the spill/leakage has been determined, and rectified to the satisfaction of the Mooring Master, and the Harbour Authority.

Galley and Other Refuse: Dumping of all refuse into Scapa Flow and approaches is prohibited. Refuse must be retained on board in sealed containers. (Vessels in port over a long period may make arrangements with their local Agent for collection).

Lighting: Sufficient lighting must be provided in the way of all overboard discharge points to facilitate detection of leaks or spillage. Adequate lighting must also be provided at the loading manifold.

Lifting of Stores; When tankships are at SPMs, loading or off-loading of stores, provisions, drums or any other goods or articles on, to or from the main tank deck is prohibited while cargo is being lifted.

Under certain circumstances and with the approval of the Company's Mooring Master, stores may be worked on the poop during the cargo lifting.

When tankships are moored at the pier, vessels and boats are prohibited from coming alongside during cargo lifting, unless all cargo operations are shut down, all tank openings are closed and secured, and permission from the Mooring Master has been obtained.

Working of stores over the pier will not normally be allowed.

During Loading/Deballasting Operations at SPMs: Mooring Masters will carry Company communication equipment. Ship's VHF must also be available to the Mooring Master at all times. Ship's whistle must be available throughout the time a Mooring Master is on board.

Emergency signals in the event of complete communication failure will be as follows:—

By day: Continuous blasting of ship's whistle accompanied by the hoisting of 2 black balls in a position conspicuous to the Terminal Control Room.

By night: Continuous blasting of ship's whistle accompanied by continuous flashing on an Aldis type signal lamp aimed towards the Terminal Control Room.

In the event of such a communication failure all loading operations shall cease until an effective means of communications has been established.

AUTHORITY: Orkney Harbour Authority, Harbour Authority Building, Scapa, Kirkwall, Orkney. *Tel:* 0856 – 3636. *Telex:* 75475. *Contact:* Director of Harbours.

AGENT: John Jolly, 21 Bridge Street, Kirkwall, Orkney Isles. Telegraphic Address: "Jolly Kirkwall Telex", Telex 75253. Tel. Kirkwall 2268 (24 hours answering service) and 3462. VHF call sign (Private frequency 161.25 mHz): Jolly.

SCRABSTER: 58.37 N. 03.32 W. (See Plan Book)

PILOTAGE: Not compulsory. Pilotage available for Pentland Firth and locally. Pilots can be contacted on VHF Channel 16, working Channel 12.

MAX. SIZE: 5.2 m. draft, 2,500 d.w.t. can be accommodated at Ro/Ro berth.

VHF: See "Pilotage".

TUGS: None.

BERTHING: Ro/Ro Berth: Length 100 m., depth 5.5 m.

Inner Harbour: 2 wharves, length 30.5 m., depth 3 m.

Fishing Berths: Quay 300 m. long, depth 1 m.

CRANES: Mobile cranes up to 36 tons available.

SPECIALISED CARGO HANDLING FACILITIES: Ro/Ro Berth available. See "Berthing".

STEVEDORES: Cargo worked 24 hours.

TANKERS: Vessels up to 2,000 d.w.t. can use Tanker Terminal.

FRESH WATER: Available.

FUEL: By road from Tanker Terminal, 24 hours notice required.

REPAIRS: Engine and minor hull repairs can be undertaken.

AIRPORT: Nearest at Wick, 32 km. away.

HOLIDAYS: Usual UK holidays.

AUTHORITY: Scrabster Harbour Trust, Harbour Office, Scrabster. *Tel:* 0847-62779/64618. *Telex:* 75449. *Contact:* Captain R. G. McKay, Harbour Master.

AGENT: See "Cromarty Firth".

SHARPNESS and GLOUCESTER: 51.43 N. 02.29 W. (See Plan Book)

The Port of Gloucester comprises the wet docks at Sharpness and Gloucester which are connected by a ship canal named "The Gloucester and Sharpness Canal".

PORT LIMITS: Sharpness Dock entrance.

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B.6.
3 Stores Lists.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate (British ships only).

In addition Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Pilotage is compulsory. Masters of vessels bound for the Ports of Gloucester, Sharpness, Chepstow and Lydney requiring the services of a Pilot at the Barry Roads Station must give at least 24 hours notice of their intended arrival at the Pilot Station. Failure to give this notice could lead to a vessel being delayed. Draft and g.r.t. are also required. Masters who expect their passage time to be less than 24 hours should send advice from their sailing port with gross tonnage, draft, speed and ETA. Masters of vessels bound for Chepstow should also state mast height above the appropriate water line and whether masts can be lowered. (Vertical clearance limited by Bridge to 52 ft. (15.8 m) above MHWS)

Vessels are boarded at Barry Roads by the Cardiff Pilot Cutter which is equipped with VHF Channels 16, 6, 8, 9, 11 and 14. Radio contact with the Cardiff Pilot Cutter should be made not later than 1 hour before arrival at Breaksea L.V. In fog ships sound "9" (4 longs, 1 short). Pilot replies the same. Masters can send ETAs direct to the Pilotage Agent, Sharpness. Tel: Dursley (0453) 811323.

Dock Pilots: Dock Pilots are available, not compulsory but advisable for berthing in Sharpness Dock, transit of the Sharpness Canal and in Gloucester Dock.

ANCHORAGES: Barry Roads afford good anchorage in moderate weather for vessels awaiting a Pilot.

RESTRICTIONS: 3 ft. water clearance over outer sill for vessels of maximum draft 21 ft. 6 in. Neap tides impose certain restrictions.

Beam	*Clearance Required*
Less than 10.36 m.	0.61 m.
10.36 m. – 13.71 m.	0.76 m.
13.72 m. – 16.76 m.	0.91 m.

Note: The River Severn at Sharpness dries out at low water.

MAX. SIZE: Maximum Length – no restriction. Maximum beam – 55 ft. (16.76 m.) Maximum draft – 21 ft. 6 in. (6.55 m.).
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Niton Radio, Lands End Radio, Ilfracombe Radio.
VHF: Sharpness Radio Channels 16, 14 and 9. Range normally within pilotage waters only.
TUGS: *(River):* Larger vessels normally pick up tugs off Avonmouth if required by Pilot. *(Dock Tugs):* Not suitable for river work. 3 tugs available in Sharpness Dock and for use between Sharpness and Gloucester if required. All tugs take ships lines.
BERTHING: Max. draft 21 ft. 6 in. Fresh Water. Range of dock level 9 in.

Available Berths: 10 to 14 berths depending on ship length. This includes a Container berth and a scrap berth. Available length of Quay – 12,000 ft.

Cargo Equipment and Methods: Cranes 6×3 tons, 6×6 tons all Portal and 2 Scotch Derricks of 32 tons. Grabs, Slings and Pallets, etc. Load/discharge by shore gear.
BULK CARGO FACILITIES: 2 grain silos, 1 fixed suction plant.

Belt driven elevators provided as required.
BRIDGES: 16 swing bridges between Sharpness and Gloucester. No mast height restrictions.
STEVEDORES: British Waterways Board.
MEDICAL: Absolutely necessary for Agent to have as much notice as possible if any medical attention is required. All facilities available.
DENSITY: 1000/1003.
FRESH WATER: Available by stand pipe, 20 t.p.h.
FUEL: Through Agents, 12 hours notice, most grades available.
FIRE PRECAUTIONS: According to local laws available on request.
CONSULS: See "Bristol".
REPAIRS: All types of deck and engine repairs are possible.
DRY DOCK: 360 ft. by 47 ft. by 14 ft. over blocks.
SURVEYORS: Most Societies are available.
GANGWAY/DECK WATCHMEN: Ship's personnel, but watchmen can be arranged if necessary.
HATCHES: Opened by ship's crew.
CUSTOMS ALLOWANCES: As for other U.K. ports.
REPATRIATION: All arrangements through Agents.
AIRPORT: London or Birmingham within 2 hours. Local taxi service available.
TIME: BST is GMT plus 1 hour. GMT in Winter months.
HOLIDAYS: Easter (varies). May Day. Spring Bank Holiday (last Monday in May). August Bank Holiday (varies, usually last Monday in August). Christmas Day (25th December), Boxing Day (26th December). Work can usually be arranged on these holidays although unusual to work 25th/26th December.
POLICE/AMBULANCE/FIRE: Telephone 999 ask for service required.
TELEPHONE: No ship to shore connection. Public telephone kiosks available.
SERVICES: Taxi. Laundry. Ship chandlery.
SHORE LEAVE: Possible.
IDENTIFICATION CARDS: Not necessary unless being repatriated.
REGULATIONS: British Waterways Board Byelaws 1962.
GENERAL: *Gloucester and Sharpness Canal and Gloucester Dock:* Maximum size of Vessel: Length 205 ft. (62.5 m.), beam 31 ft. (9.45 m.), draft 11 ft. 6 in. (3.5 m.) fresh water. Vessels exceeding these dimensions may be considered subject to Harbour Master's approval.
AUTHORITY: British Waterways Board, Dock Office, Sharpness, Berkeley, Gloucestershire GL13 9UD. *Tel:* (0453) 811644. *Telex:* 43376. *Contact:* Mr. D. McNeill, Dock Manager. Captain G. A. Boyack, Harbour Master.

SHOREHAM: 50.50 N. 00.15 W. (See Plan Book)

DOCUMENTS and all general information, refer to "London". Distance from London, 80 km.
PILOTAGE: Pilotage is compulsory for all foreign-going vessels, all coastal vessels of over 1,500 g.r.t. and all passenger-carrying vessels. Send ETA 12 hours and 2 hours in advance, including max. draft. Pilot boards within 2 nautical miles of harbour entrance. Tel: Brighton (0273) 592455. Cables: Shoreham Pilots. VHF: Channels 16, 6, 9, 14. Hours: Pilot Station office hours and tidal hours.
ANCHORAGE: Off Harbour. Depths as per English Channel Charts.
RESTRICTIONS: No night restrictions. Locks manned 4 hours either side of high water. According to size and draft these times can be extended by prior arrangement.

Main entrance channel, 122 m. wide, leads into a 91.4 m. channel to the Eastern arm.

Dimensions of Prince Philip Lock: 113.9 m. length, 17.3 m. width.
MAX. SIZE: *Canal:* Length 105.9 m., beam 16.7 m., draft 6.7 m. (subject to tide).
Western Arm: Length 82.3 m., beam 14.3 m., draft subject to tide.
HEALTH: See "Health – All Ports" before first UK port.
RADIO: Niton Radio/Northforeland Radio. ETA to Shoreham Harbour Master 24 hours prior to arrival.

When within VHF range advise Harbour Master (via "Shoreham Harbour Radio"), ETA, draft, beam, LOA and of any circumstances which may affect seaworthiness or handling capacity of the vessel.

Port Operation and Information Service manned continuously, contact by VHF calling Channel 16, working Channel 14. Station is situated on the middle pier.
TUGS: One tug (Bollard Pull 10 tonnes). Tug lines used for which no extra charge. Communications between vessel and tug take place on VHF Channel 6.
BERTHING: See "Restrictions".

Heavy lift cranes, 35 tons, 45 tons and 90 tons. Capacity for contai handling.

A bulk wine terminal capable of handling 4,731,750 litres of wine available.

A grain silo terminal with a storage capacity of 13,000 tonnes h been constructed within the canal.

A Ro-Ro berth has been constructed at the East end of Aldringt Basin.
STEVEDORES: Reasonable ETA is sufficient for gangs to be calle
MEDICAL: All facilities available.
DENSITY: Approx. 1025.
FRESH WATER: Available at most berths.
CONSULS: Danish.
AUTHORITY: Shoreham Port Authority, Harbour Office, Albion Stre Southwick, Brighton BN4 4ED. *Tel:* Brighton 592613. *Telex:* 87817 *Contact:* Captain J. Robertson, Harbour Master. P. Lacey, Gene Manager.

SILLOTH: 54.52 N. 03.24 W (See Plan Boo

PORT LIMITS: A vessel is considered to be an "arrived vessel" for t purposes of stemming when she arrives at the pilot station Workington (see Admiralty Chart No. 1346). Laytime norma commences when the vessel berths in the New Dock, Silloth.
DOCUMENTS: Normal U.K. requirements.
PILOTAGE: Compulsory for all vessels except for those qualifying special exemption. Vessels should send their ETA to local Agents or the Dock Master, Silloth, at least 12 hours before arrival. Pilot bo "Medway Patrol" is stationed off Workington when vessels are expect and listens out on Channels 16, 14 or 12 VHF. Pilot boards vess between 2.5 hours and 1.5 hours before HW, Silloth.
ANCHORAGES: Vessels may anchor at the pilot station in goo weather, but are advised to seek shelter in Ramsey Bay, Isle of Man Wigtown Bay in adverse weather conditions.
RESTRICTIONS: The port lies in a relatively sheltered position in t Solway Firth, and in consequence, access during adverse weather mainly governed by the practicability of boarding and landing Pilots Workington. Vessels over 75 m. in length do not normally enter the po at night.
MAX. SIZE: *Neap Tides:* Length 90 m., beam 15 m., draft 4 m.
Spring Tides: Length 90 m., beam 15 m., draft 6 m.

Typically, the port is used by vessels of between 500 tonnes a 1,500 tonnes deadweight.
VHF: A "Port Operation" and Information Services operates Channels 16 and 12 from 2.5 hours before HW, Silloth, call sign, "Sill Harbour Radio".
TUGS: There are no tugs available at the port.
BERTHING: The port comprises two docks:

The outer, Marshall Dock is tidal and contains no berths.

The inner, New Dock is enclosed by dock gates which are ope from 1 hour before to 1 hour after HW. Minimum depths in the New Do are maintained at 4 m. on Neaps and 6 m. on Springs. The spec gravity of the water in the dock is normally about 1.022.
Cargo Berths: The New Dock contains 7 berths:

No. 1 Berth: A "single user" bulk grain import berth operated by Ca Flour Mills Ltd. Suction elevators, 60 tonnes per hour.

No. 2 Berth: A general cargo berth with limited quay space.

No. 3 Berth: A specialised bulk molasses import terminal operated Carr's Flour Mills Ltd.

No. 4 'A' Berth: A "common user" import terminal for bulk agricultu materials (mainly animal feeds) operated by D. A. Harrison & C Suction elevators and grabs; 100 tonnes per hour; automated handl and storage.

No. 4 'B' Berth: A specialised import/export bulk cement termi operated by D. A. Harrison & Co. 100 tonnes per hour, automa handling and storage of cement powders.

No. 5 Berth: Main general cargo berth. Mobile cranes and eleva covered storage.

No. 6 Berth: Specialised livestock import terminal operated by T.A Ltd., under the control and supervision of M.A.F.F. officials. Lairag facilities for 700 cattle. The berth can also be used for general carg

No. 7 Berth: General cargo berth for small vessels of up to 50 m length.
BULK CARGO FACILITIES: See "Berthing".
STEVEDORES: D. A. Harrison & Co., Anvil House, West Newt Aspatria, Cumbria. Tel: (0965) 20529. Telex: 64493. Working hours the port are unlimited 24 hours per day, 365 days per year.
CRANES: 2 × 30 tonne mobile cranes are permanently available in t port. Larger or additional cranes can be conveniently hired in. Sh gear is never used.
HATCHES: Always handled by ship's crews.
FRESH WATER: Available at all berths.
FUEL: Fuel oil can be loaded from road tanker.
POLICE/FIRE/AMBULANCE: Police: Tel. 31313 or 09002 Fire: Tel. 999; Ambulance: Tel. 31309 or 999. The nearest pu telephone is at the entrance to the docks.
REPAIRS: Any type of repair which does not require dry dock facil can be carried out by local contractors.
DRY DOCKS: None.
AIRPORT: Nearest airports are Carlisle, 39 km., Newcastle 140 k Prestwick 225 km. and Manchester 260 km.
BANKS: The Midland Bank, Station Road, Silloth. The Natio Westminster Bank, Eden Street, Silloth.
AUTHORITY: Associated British Ports Co. plc, Dock Office, Si Docks, Cumbria CA5 4JQ. *Tel:* (0965) 31358 or 31165. *Con* Captain J. R. W. Myers, Dock Master.

SOUTHAMPTON: 50.54 N. 01.24 W. (See Plan Book)

DOCUMENTS:
1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each Passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load-line Certificate.
Safety Equipment and Safety Construction Certificate.
Lloyd's Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Compulsory, with usual regular Home Trade and other small exemptions. In addition to 48 hours' notice to local Agent, advise Nab or Needles Pilot as appropriate, ETA 48 hours and again 2 to 3 hours immediately prior to arrival. The Nab and Needles stations are maintained by fast launches under the control of the Duty Pilot at The Pilot Station, Berth 37, Southampton Docks. Duty Pilot keeps a continuous watch on VHF Channel 16; call sign Nabpilot or Needlespilot as appropriate. Working frequency; Channel 9 only, but can listen on Channels 6, 12 and 14. No medium frequency: M/F and R/T messages via Nitonradio. Duty Pilot's telephone numbers: Southampton 32345 and 32346.

The launches only put to sea when required. *Failure to send an accurate ETA 2 to 3 hours before arrival could cause delay to the offending vessel.*

The Nab and Needles stations also provide Pilots for vessels bound for Portsmouth, Cowes or other small ports within the Trinity House Southampton and Isle of Wight Pilotage District.

Strict compliance with the requirements of the Merchant Shipping (Pilot Ladders) Safety Rules is requested by the Pilots, who may refuse to board vessels with unsatisfactory and dangerous ladders. Manropes are not required. Ladders should reach to approximately 3 ft. from the water, each rung resting firmly against the ship's side; and a good lee provided whilst making approximately 5 to 7 knots headway.

Eastern Approaches or Nab Tower. The station is maintained by 40 ft. fast launches, black hulls, white wheelhouses, showing international signals. VHF Channels 6, 9, 12 and 16. Vessels under 40 ft. draft are normally boarded between the "New Grounds" and "Dean Tail" light buoys, approximately 2 miles N.N.W. of Nab Tower, although in bad weather, boarding at the "Warner" buoy or St. Helen's Roads might be advised by the Duty Pilot. Launches operate from Ryde Pier or from Portsmouth Harbour.

Vessels over 35 ft. draft are restricted by tide for time of entry, and will be advised by the Duty Pilot. Vessels of 40 ft. draft and over use the Nab Channel and a message advising Tanker Master of transit times will be sent by "Essoship Fawley" and confirmed prior to arrival by Duty Pilot by VHF.

The Nab Channel has a limiting depth of 39.7 ft. (although 43 ft. can be carried to West of centre line (1976)) below Chart Datum (April 1976). Pilot will board all vessels of 40 ft. draft and over in a position 2 to 3 miles South of the Nab Tower. Masters of such vessels are strongly recommended not to approach closer than 2 miles to the Nab Tower without a Pilot, owing to strong tidal streams. It is advisable for a deep-drafted ship to anchor 3 miles South of the Nab Tower if waiting for the tide. Advice will always be given on request to the Duty Pilot by VHF.

Pilot *will not* board vessels under 40 ft. draft outside the defined pilotage district unless specifically requested by the Master to do so. The additional "Out of District" charge for boarding beyond the normal limits will be debited to Owners.

Western Approach – Needles: Vessels drawing more than 31 ft. are advised to enter via the Nab. Masters are strongly urged not to proceed beyond the Fairway Buoy without a Pilot, especially on the flood tide. Safe anchorage in vicinity of "Fairway" Buoy.

Station maintained by 40 ft. fast launch, black hull and white wheelhouse, showing international signals. Launch operates from Yarmouth Harbour or Lymington. Needles pilot launch is fitted with VHF Channels 6, 9, 12 and 16. No medium frequency.

When it is considered that the weather is deteriorating to the extent that the boarding and landing of Pilots could in the near future become dangerous, a message will be sent to all ships through Nitonradio, as follows:

> "Needles Pilot operating bad weather routine. Vessels should ascertain at least 3 hours before their ETA Needles whether a Pilot will be available. This information can be obtained either through Niton Radio or direct from Needles Pilot on VHF".

If it is not safe to ship or land the Pilot at the Needles, Masters will be advised to proceed to the Nab.

In poor visibility a vessel requiring Pilot at either Nab or Needles uses a distinguishing signal of "G" to which the pilot launch will reply with "H".

Also see "Notices".

GENERAL NAVIGATION: A Duty Operations Officer, responsible to the Dock and Harbour Master Southampton maintains a continuous watch in the Port Signal and Radar Station (Berth 37): call sign "Southampton Port Radio". He is to be informed prior to any movement to, from or within the port area and will give information on the movement of other vessels. Harbour Radar Information and guidance will be given on request. The Radar reference line shown on the Admiralty Charts is superimposed on the Harbour Radar displays.

Particular attention should be paid by Masters to the designated "Reporting Points" marked on the Admiralty Charts. Reports should be made on VHF to Southampton Port Radio, to enable the proper identification and co-ordination of the ship movement, to be made to the benefit of all mariners navigating within the Solent area. This applies equally to naval and to non-compulsory vessels.

The following VHF Channels are operated within the port.
Southampton Port Radio: Channels 16, 14, 12, 18, 20 and 22.
Harbour Patrol Launch (Call sign Southampton Patrol) Channels 16, 14, 12, 10, 8 and 6.
Nab and Needles Pilot Launches: Channels 16, 14, 12, 9, 6 and 0.
Nab and Needles Pilot Stations: Channels 16 and 9. (Duty Pilot).
Southampton Pilot Launch (call sign Southampton Pilot) Channels 16, 14, 12, 9, 6 and 19.
Southampton Pilot Station (call sign Southampton Pilot) Channels 16 and 9 (Duty Pilot).
Tugs: When berthing vessels: Channels 71 or 74.
Esso Petroleum Terminal, Fawley: Channels 16, 14 and 19.
B.P. Oil Ltd., Hamble. Channels 16, 14, 19, 42, 44 and 46.

A patrol launch (Harbour Master flag by day, all-round blue light by night) is controlled by the Duty Operations Officer Southampton for pollution detection and keeping channels clear of pleasure craft for the passage of large vessels.

Vessels *(a)* drawing more than 10.5 m. *(b)* more than 288 m. in length *(c)* of more than 100,000 d.w.t. and *(d)* LPG vessels exhibit a large black cylinder by day and 3 vertical red lights by night. Vessels showing these signals are not to be passed or overtaken within channel limits between the "West Bramble" and "Hook" light buoys, these vessels are considered to be constrained by their draft or restricted in their ability to manoeuvre and may not be able to comply with the Collision Regulations at other times. Will indicate inability by 5 short blasts on the whistle. "Clear channel" control is exercised by the Duty Operations Officer at Port Signal and Radar Station, Berth 37, Southampton Docks. The Thorn Channel has a limiting depth of 12.6 m. (April 1976) at low water datum.

Up to 7 vessels other than LPG vessels (only 3 LPG) of under 91.4 m. in length are permitted with prior permission to anchor out of the channel to the East of the "Hook" Buoy in the designated Small Ships Anchorage, the limits of which must be strictly observed. Three numbered anchorages are available in an emergency for vessels not exceeding 168 m. in length in Fawley Reach, where vessels must moor to 2 anchors. Permission to anchor including within the small ships and numbered anchorages must be obtained from the Duty Operations Officer, Southampton Port Radio.

Also see "Notices".

MAX. SIZE: The largest passenger and container vessels call regularly at Southampton. Tankers: Fawley can accept partly loaded VLCCs up to 14.9 m. draft.

HEALTH: See "Health-All Ports" before first UK Port.

TUGS: 2 tugs are permanently stationed at Fawley; if more than 2 tugs are required it should be noted that week-end requirements have to be advised to the tug operators not later than 1530 hrs. on Friday of each week.

If a vessel required more than 2 tugs and is due to arrive at Fawley between 0001 hrs. Saturday and 0900 hrs. Monday, ETAs must be submitted well in advance of 1530 hrs. on the Friday prior to arrival. It is usual to use the wires provided by the tugs for towing.

BERTHING: The Pilot boarding the ship at the Sea Station or anchorage will also berth the ship. Non-compulsory vessels can obtain or disembark a Pilot in the vicinity of the "N.W. Netley" or "Hook" buoys by contacting "Southampton Pilot" on VHF.

(entrance 99.1 m., 325 ft. wide)	1-2N	5.0	16.5	401	1316

Other berths are available. Lesser draft berths not shown. The depths of water are maintained as far as practicable, but are subject to variation and are not guaranteed.

* To find the depth of water in the berths add the tidal rise to the depths shown in the above table.

† Chart datum is approximately the lowest low water level.

BULK HANDLING FACILITIES: Grain handling at Berths No. 36, 47, 101, 102 and 109.

Ro-Ro facilities at Berths No. 105 and 201 – 202.

CRANES:

Type	*No.*	*Capacity in tonnes*
Container cranes	8	Up to 40
Quayside cranes	28	Up to 10
Floating crane	1	100
		(Replacement on order, 150-175 tons)
Dry dock cranes	7	Up to 51
Mobile cranes	3	10

TANKERS: Esso Marine Terminal, Fawley.

Approach: Terminal is approached by either the Nab or the Needles. The Nab with a dredged channel of 43 ft. below chart datum admits the larger vessel. Double high water with an average tidal range of 13.25 ft. (Springs) and 7.75 ft. (Neaps). Rate of Spring Tide 2 knots, Neap Tide 1 knot.

Anchoring in the fairway adjacent to the terminal requires permission from Southampton Harbour Authorities. Approval will only be given to vessels of 300 ft. or under. Usual practice is not to moor with both anchors. This applies to Controlled Anchorage only. Depth of 41 ft. LW is available. Anchorages in the Solent and Cowes Roads are more generally used. Good holding ground with depth of 50 ft. LW.

Accommodation: Terminal has 2 approach trestles, 1,900 ft. long leading seaward to the main pierhead trestle with its 9 berths. This trestle is 4,575 ft. long and lies parallel with the channel. 5 main ocean berths are on the seaward side and the 4 coastal berths on the landward side. Dimensions of the berths are as follows:

Berth	*Length of 'T' Head*	*Distance between centres*
No. 1	222 ft.	800 ft.
No. 2	222 ft.	800 ft.
No. 3	222 ft.	800 ft.
No. 4	222 ft.	800 ft.
No. 5	300 ft.	1,000 ft.
No. 6	80 ft.	395 ft.
No. 7	80 ft.	400 ft.
No. 8	80 ft.	400 ft.
No. 9	100 ft.	440 ft.

Equipment: Suitable cargo hose handling equipment is positioned at each of the 9 berths. To facilitate the handling of mooring lines, air powered hoists are available at each of the berths. Mooring boats are in attendance for running lines. VLCCs are required to meet minimum standards with regard to their mooring equipment. All water ballast containing oil or likely to contain oil must be pumped ashore. 2×67,000 barrel ballast tanks are provided on shore. With the approval of the Terminal Manager minor repairs can be undertaken whilst discharging/loading at the Terminal. Major repairs can be undertaken at anchor or at Southampton Docks. Working is continuous throughout. Facilities installed at the berths and available for use by tankers include fresh water, bunkers, steam, compressed air, nitrogen. Ship's stores of all kinds are available in any quantity at Southampton. All deliveries of stores must be made by water transport. For quarantine purposes vessels are either boarded prior to berthing or immediately after berthing. Two firefighting tugs of 2,530 h.p. are permanently stationed at the Marine Terminal. Additional tugs can be provided on notice from Southampton.* All tugs are equipped with Radio Telephone and operate on Channels 8 or 10 of the Port Operations Service. Provision of shore steam is made in exceptional circumstances.

*A standby charge is levied on vessels over 16,000 d.w.t.

Pilotage: Compulsory. Inward-bound vessels embark Pilots at the Nab or Needles entrances. Tankers up to 250,000 d.w.t. berthed at any time during the day or night subject to tidal conditions.

Rules for Berth Planning: The following limitations are now in force when planning berth movements.

1. Berth size restrictions:
Berth No. 1: Max. size of vessel 50,000 tonnes displacement.
Berth No. 2: Max. size of vessel 82,000 tonnes displacement.
Berth No. 3: Max. size of vessel 65,000 tonnes displacement.
Berth No. 4: Max. size of vessel 176,000 tonnes displacement.
Berth No. 5: Max. size of vessel 240,000 tonnes displacement.
Berth No. 6: Max. size of vessel 3,500 tonnes displacement.
Berth No. 7: Max. size of vessel 3,500 tonnes displacement.
Berth No. 8: Max. size of vessel 3,500 tonnes displacement.
Berth No. 9: Max. size of vessel 8,000 tonnes displacement.

2. Vessels on Berth 6 must not exceed 330 ft. (100.5 m.) in length.

3. Distance between vessels secured on any berths must be 100 ft. (28.7 m.) or more. (This is required under local by-laws for fire regulations.)

4. Distance allowed for berthing vessels must not be less than vessel's length +0.4 length. (Agreement with Pilots).

5. Maximum draft of vessels:
Berth No. 1 33 ft. 03 in. (10.2 m.)
Berth No. 2 41 ft. 00 in. (12.6 m.)
Berth No. 3 41 ft. 00 in. (12.6 m.)
Berth No. 4 49 ft. 00 in. (14.9 m.)
Berth No. 5 49 ft. 00 in. (14.9 m.)
Berth No. 6 18 ft. 06 in. (5.6 m.)
Berth No. 7 18 ft. 06 in. (5.6 m.)
Berth No. 8 18 ft. 06 in. (5.6 m.)
Berth No. 9 21 ft. 08 in. (6.6 m.)

These drafts are subject to change and are therefore updated quarterly.

6. Tide charts are to be prepared for Nab and Thorn Channels for vessels over 40 ft. (12.19 m.) draft.

7. Check product can be loaded on nominated berth.

8. Check product or ullage availability before berthing vessel.

9. Check that maintenance will not interfere with operation of berth.

10. No vessels to berth on Ocean Berths with mean wind speed above 30 knots from N.W. through to S.W. to S.E.

11. No vessels to berth on Coaster Berths with mean wind sp above 30 knots from N.W. through to S.W. to S.E.

12. Ensure liaison maintained with S.H.B. regarding sailings coinci with movement of vessels over 70 knots (hovercraft).

Fawley Coastal Berth Manoeuvring Requirements: Fawley coa berths comprise Berths 6, 7, 8 and 9 and are situated on the ins (Western Side) of the Marine Terminal complex.

Before any manoeuvring is undertaken on these Berths the follow requirements are to be followed:

1. Marine Controllers are to be informed of vessel manoeuvring p

2. Vessels without bow thruster capability should berth stemm the tide.

3. All vessels over 61 m. (200 ft.) LOA must have the assistance of Esso mooring boat when:
(a) berthing.
(b) sailing if berthed starboard side to.

4. Vessels over 85 m. (279 ft.) in length will not normally swing Wes a line between Fawley buoy and the S.E. of Fawley Jetty. Exceptio may be made only *after* consultation between Terminal and the Pilo Master of the vessel. Due account must be made of wind, tide, wea and time. Only then will vessels be permitted to swing West of that l referred to above.

5. Vessels over 85 m. (279 ft.) LOA without bow thruster capabili must have in attendance when berthing port side to or sailing after be starboard side to:
(a) Esso mooring boat, *and one tug.*

Such vessels when berthing starboard side to or sailing after be port side to must have in attendance:
(a) Esso mooring boat.

They may also be required to have a tug if prevailing conditio require it.

6. Vessels of 91.5 m. (300 ft.) LOA or more when berthing at Nos. 6 or 8 to have at least one adjacent berth vacant during the berth movement.

7. No vessel to berth when wind is from South to West with mean w speed above 30 knots, i.e. within S.W. quadrant.

8. The Esso mooring boat will be made available on request to ass with any vessel not covered in these instructions. Its communicat Channel is 71 (74 in an emergency).

THESE BOATS MUST NOT BE USED FOR TOWING.

B.P. Terminal, Hamble. Situated immediately opposite Fawley; has two main berths on the outside faces and a small coastal berth (No. 3) on the inner face of No. 2 berth. Berth No. 1 is the Northerly berth, and is used for larger vessels (presently under reconstruction), having a depth of 31 ft. 6 in. below PLWD alongside and in the approaches. The berth face is 250 ft. long, so head or stern moorings are taken to 2 mooring buoys at the N.W. end of No. 1 berth. They are hook buoys; no lashings or mooring shackles are needed. No. 2 berth is similar in dimensions to No. 1 berth, the distance between centres being 530 ft. No. 3 berth is 250 ft. long, with 16 ft. 6 in. alongside at PLWD and 13 ft. in the approaches.

Facilities and services as for Fawley with the exception of transport, no transport being available within the depot. Ship's personnel are allowed to walk through the installation to Hamble Village where public transport to Southampton is frequent.

All grades of fuel and diesel bunkers and fresh water available on all berths.

Also see "Notices".

BUNKERS AND WATER: All grades of fuel oil and diesel oil are available and water is piped on all berths. Bunkers and stores can also be obtained by barge in Cowes Roads anchorage, but water is not readily obtainable there.

CONSULS:

Country	Status	Address/Telephone No.
Belgium	Consul	c/o W. Bates & Co. Ltd., Oxford House, College Street, SO9 1LN Tel: 22766/7
Denmark	Vice-Consul	c/o Benjn, Ackerley & Son Ltd., Canute Chambers, Canute Road, SO9 1FJ Tel: 27171
Dominican Republic	Consul	Mascot Ships Agents, c/o MacIntyre Scott & Co. Ltd., West Bay Road, SO9 4NW Tel: 34033
Finland	Vice-Consul	c/o Sandell Bros. Ltd., Ryde Terrace, SO9 2UL Tel: 30966
France	Consular Agent	R. H. Hammond Ltd., 236 Winchester Rd., SO1 2SB Tel: 772442
Germany (Federal Republic)	Consul	c/o Wainwright Bros. Bowling Green House, 1 Orchard Place, SO1 1BR Tel: 23671
Greece	Vice-Consul	c/o Keller Bryant & Co. Ltd., 21-22 Queens Terrace, SO9 3FD Tel: 28566
Italy	Consular Agent	c/o Herbert Ferryman Ltd., Galen House, 1-9 Oakley Road, SO9 7AT Tel: 788011
Netherlands	Consul	c/o Macship Agencies Ltd., 4th Floor Havelock Chambers, Queens Terrace, SO1 1BP Tel: 29051
Norway	Consul	c/o G. Haswell & Co. Ltd., 28 Queen's Terrace, SO9 2UJ Tel: 23555
Philippines	Consul	Mann & Son (London) Ltd., No. 201 Berth Offices, Prince Charles Container Port, SO1 0HH Tel: 772416
Spain	Consul-General	Richmond House, (First Floor) Terminus Terrace, College Street, SO1 1EJ Tel: 35835
Sweden	Consul	c/o Meadows Freight, 12-14 Queens Terrace Tel: 25033

REPAIRS/DRY DOCKS: All ship repairs can be effected. Largest dry-dock is 1,200 ft. long overall, 135 ft. wide and has 34 ft. over the blocks. One other dry dock maintained within the Port by Vosper Ship Repairers Ltd.

OIL POLLUTION: Southampton Water is an international yachting centre and has many holiday beaches on its shores. Consequently, oil pollution is treated very severely and heavy fines are imposed on offenders.

The Esso Refinery operates a clean-up service, the full economic cost of which is billed to the offending ship.

MEDICAL: Doctors and hospital facilities available. Agent should be advised in advance of any medical attention required.

An organisation exists for hospitalisation of sick seamen from vessels off Cowes, Isle of Wight. Arrange through Nitonradio, Nab, Needles or Southampton Pilot or through vessel's Agent. Minimum delay to vessel.

CUSTOMS ALLOWANCES: By statute, crews of vessels in port are allowed 25 cigarettes per day per man. 0.3 litres (0.5 pint) of spirits and 1 bottle of table wine per day per man.

TIME: British Standard Time is GMT plus 1 hour, reverting to GMT in Winter months.

AIRPORT: Eastleigh Airport. Air U.K. have flights to Amsterdam, Guernsey, Jersey, Brussels and Paris.

HOLIDAYS: Good Friday (variable date); Easter Monday (variable date); May Day; Spring Bank Holiday (variable date); Autumn Bank Holiday (variable date); Christmas Day (25th December); Boxing Day (26th December); New Year's Day (1st January).

POLICE/AMBULANCE/FIRE: Dial 999 from any telephone and ask for service required.

SHIP SUPPLY SERVICE: Williams Shipping Company (Fawley) Limited, Clyde Buildings, Town Quay, Southampton SO1 1LX. Tel: (0703) 25271. Telex: 47436.

Services Supplied: Fast launches for personnel ship to shore, essential small packages and/or sick crew members.

D.O.T. approved to operate; not more than 6 passengers, area Swansea to Selsey, not more than 5 miles offshore.

Motorised barges for all types of supplies, deck and engine, and stores. Also, vessel with UK loadline that can meet vessels passing in the English Channel with essential stores.

Mainly used for storing vessels in Oil Terminals, Cowes Roads and Motherbank.

Also see "Cowes".

NOTICES: *Notice to Mariners No. 2 of 1984.*

The Dockyard Port of Portsmouth,
the Port of Southampton
and the Isle of Wight Pilotage District
Movement of Gas Tankers in the Solent

1. Notice is hereby given that these directions have been jointly promulgated by the Queen's Harbour Master Portsmouth and the Dock and Harbour Master Southampton, in agreement with the Isle of Wight Pilotage Service, to ensure the safe navigation of gas tankers within the Isle of Wight Pilotage District.

2. This Notice applies to all gas tankers loaded or partly loaded and gas tankers which have not been rendered gas free.

3. Gas tankers in transit within the Isle of Wight Pilotage District may not enter an area in which the visibility is less than 0.5 miles.

4. Before navigating within the area between the North Sturbridge Buoy and the Warner Buoy, all gas tankers must establish communications with the Queen's Harbour Master Portsmouth on VHF R/T Channel 11 to advise of their transit and to ascertain movements into and out of Portsmouth Harbour.

5. Gas tankers when navigating between Hook Buoy and West Bramble Buoy in the Western Approach Channel shall be given the sole occupancy of that channel.

6. Gas tankers when navigating between East Bramble Buoy and Calshot Buoy in the North Channel shall be given the sole occupancy of that channel.

7. No vessel may anchor closer to a gas tanker than twice their combined lengths.

8. At no time will more than 3 gas tankers be permitted to anchor within the designated Small Ships Anchorage in Southampton Water.

9. No gas tanker exceeding either 8,000 cu.m. total capacity or 6,000 g.r.t. will be permitted to enter or leave the Port of Southampton via the West Solent.

Signed: Dock and Harbour Master.

Notice to Mariners No. 3 of 1984.

The Merchant Shipping (Tankers)
(EEC Requirements) Regulations 1981
Isle of Wight Pilotage District

1. Notice is hereby given that the Merchant Shipping (Tankers) (EEC Requirements) Regulations 1981 (SI 1981 No. 1077) came into operation on Thursday, 15th October, 1981.

2. Application.

These Regulations apply to all tankers of 1,600 g.r.t. or over which:

(a) are carrying a cargo of chemicals, gas or oil in bulk; or

(b) having previously carried such a cargo, have discharged that cargo, but whose tanks are not free of vapours given off by residues of such cargo, and have an atmosphere which has not been rendered non-flammable.

The Regulations do not apply to any ship belonging to Her Majesty or owned or operated by any State and used, for the time being, only on the non-commercial service of that State.

3. Reporting.

The Master of a tanker to which these Regulations apply shall at least 24 hours in advance of entering the Isle of Wight Pilotage District notify the Dock and Harbour Master Southampton the following information by telegram or telex using one of the following modes:

Telegraphic Address:	Dock and Harbour Master Southampton
Telex Number:	477410 – Btp Ds G
VHF Radio:	Southampton Port Radio Call Sign SPR, Channel 12, 14.
Telephone Number:	0703 – 23844 extn: 2440

(a) the name and call sign of tanker;

(b) the country in which the tanker is registered;

(c) the overall length, draft and beam of the tanker;

(d) the harbour where the Master intends first to berth the tanker;

(e) unless the Master does not propose to berth the tanker at the harbour which is being entered, the ETA at the pilot station or harbour limits of the harbour where the Master intends first to berth the tanker;

(f) the nature and quantity of any chemicals, gas or oil carried by the tanker;

(g) whether the tanker is fitted with an inert gas system;

(h) whether the inert gas system, if fitted, is fully operational;

(i) whether the cargo tanks have an atmosphere which has been rendered non-flammable;

(j) whether or not a certificate has been issued in respect of the tanker;

(i) if its cargo includes chemicals, that it complies with the IMO Code for Ships carrying Dangerous Chemicals; and

(ii) if its cargo includes gas, that it complies with the IMO Code for Existing Ships carrying Liquefied Gases or with the IMO Code for Ships carrying Liquefied Gases;

(k) any defect in the hull, machinery or equipment of the tanker, which may:

(i) affect materially the safe manoeuvrability of the tanker; or

(ii) affect materially the safety of other vessels in or in the vicinity of or in the approaches to the harbour; or

(iii) constitute a hazard to the marine environment; or

(iv) constitute a hazard to the persons or property on land or in the vicinity of the harbour.

4. The Master of a tanker to which the Regulations apply shall in advance of entering the Isle of Wight Pilotage District forthwith notify the Dock and Harbour Master Southampton of any change in the information notifiable under item 3 (k) above which occurs after such information was notified to the Dock and Harbour Master Southampton.

5. While a tanker to which these Regulations apply is within the Port of Southampton or the Dockyard Port of Portsmouth, the Master of that tanker shall notify the Dock and Harbour Master Southampton or through him the Queen's Harbour Master Portsmouth of any change which occurs in the information where appropriate notifiable under items 3 (k) and 4 above.

6. Check List.

The Master of a tanker to which these Regulations apply shall make available a check list in the form set out in the Schedule contained in the Regulations and completed in respect of the tanker to the Dock and Harbour Master Southampton or the Queen's Harbour Master Portsmouth if they so request.

7. Isle of Wight Pilotage District.

The Isle of Wight Pilotage District comprises that part of the sea with all harbours, docks and tidal waters within an imaginary line drawn from a point 1 mile true South from low water mark of ordinary spring tides at Selsey Bill to a position in Lat. 50° 40′ N., Long. 00° 57′ W., thence to a point 1 nautical mile true South from low water mark of ordinary spring tides at Whitehorse Culver Cliff in the Isle of Wight thence to a point 1 nautical mile true South from St. Catherine's Point and thence direct to Peverell Point but excluding any docks belonging to the Admiralty and any part of this area which lies within the Poole Pilotage District.

8. Authentication.

This Notice where applicable within the Port of Southampton is the direction of the Dock and Harbour Master as authorised pursuant to Section 52 of the Harbours, Docks and Piers Clauses Act 1847 and the Southampton Harbour Act 1939. The Port of Southampton is as defined in the Southampton Harbour Act 1887 as amended by the River Hamble Revision Order 1969 and extended by the British Transport Docks Act 1972. (The limits of the Port of Southampton are as shown on Admiralty Charts).

9. This Notice where applicable within the Dockyard Port of Portsmouth is the direction of the Queen's Harbour Master as authorised pursuant to the Dockyard Ports Regulation Act 1865, and the Dockyard Port of Portsmouth Order 1978.

(The limits of the Dockyard Port of Portsmouth are as shown on Admiralty Charts).

10. These Directions have been jointly promulgated by the Queen's Harbour Master Portsmouth and the Dock and Harbour Master Southampton.

Signed: Dock and Harbour Master.

Notice to Mariners No. 5 of 1984.

Port Operations. R/T Communications
and Radar Information

1. Notice is hereby given that the following Port Operations, VHF R/T communications and radar information procedures are effective in the Port of Southampton and its approaches.

2. There is no alternation to the availability of the existing services including the provision of Harbour Radar Information. Messages on Port Operations Channels must be restricted to the movement and safety of ships and the safety of life.

3. Marine Incidents and Accidents.

A vessel involved in a marine incident or accident must immediately report this to Southampton Port Radio and state whether or not assistance is required.

4. The Solent and Southampton Water Marine Emergency Plan.

This plan has been prepared to deal with any serious marine accident occuring in the Solent or in the Ports of Portsmouth or Southampton and is intended to ensure that adequate Service and Civilian resources are made available to deal with any emergency.

5. VHF R/T Communications.

(a) The Port Signal and Radar Station Southampton, call sign SPR, maintains a continuous watch on Channels 16, 14, 12, 18, 20 and 22 and monitors Channels 71 and 74.

(b) The Queen's Harbour Master Portsmouth, call sign QHM, maintains a continuous watch on Channels 11, 13 and 73.

(c) Vessels should maintain a continuous watch on VHF R/T Channel 12 or 14 and report to SPR as appropriate when passing the designated reporting points, and, in addition, if embarking a Pilot, when the Pilot has boarded.

(See "Appendix" on page 1529.)

6. Co-Ordination of Shipping Movements.

(a) The Duty Operations Officer responsible to the Dock and Harbour Master, Southampton maintains a continuous watch in the Port Signal and Radar Station. Tel: 0703 – 23844, extn: 2440.

(b) The movement of vessels and the general situation in the Port and its approaches is monitored continuously at Southampton Port Signal and Radar Station whence information will be passed to Masters and Pilots. The full exchange of information is essential to efficient operations and the need to maintain R/T communications with SPR cannot be over-emphasised.

(c) In co-ordinating the movement of vessels it may be necessary the Duty Operations Officer to require certain vessels to rema alongside or at anchor, or to regulate their time of entry into the Po their departure or progress.

7. Movement Reporting Procedure.

(a) All vessels in excess of 20 m. length, bound to or from or passi through the Port of Southampton, vessels bound to or from Portsmou or passing through the Dockyard Port of Portsmouth and vessels boun to or from anchorages or other locations in the Solent are required communicate by VHF R/T with SPR.

(b) Inward bound vessels should establish contact when approachi Nab or Needles.

(c) Vessels outward bound from the Port of Southampton shou establish contact at least 15 minutes prior to leaving the berth.

(d) Vessels clearing Portsmouth Harbour should establish conta when passing Southsea War Memorial.

(e) Vessels leaving an anchorage either inward or outward boun should first establish contact at least 15 minutes before gettin underway.

(f) Vessels bound to or from Portsmouth Harbour are also required report to QHM. See Dockyard Port of Portsmouth Local Notices Mariners.

8. Movement Reporting Points.

(a) Vessels bound to or from the Ports of Southampton an Portsmouth, or other destination in the Solent or passing through th Solent are required to report by VHF R/T when passing Movemen Reporting Points indicated on Admiralty Charts.

(b) The initial report by all inward bound vessels should include:

1. Ship's Name or IRCS.
2. Deepest draft.
3. Destination and Last Port of Call.
4. ETAs at various locations as requested.
5. Deficiencies of ship, navigation equipment, machinery and carg
6. Tankers in addition should report any change in the informatio notifiable under the Merchant Shipping (Tankers) (EE Requirements) Regulations 1981 and confirm that a check li has been completed.

(c) The initial report by outward bound vessels from the Port Southampton should include:

1. Ship's name or IRCS.
2. ETD.
3. Deepest draft.
4. Other information requested.
5. Where applicable, tug working Channel to be used.
6. ETAs at various locations as requested.
7. Next Port of Call.

(d) The initial report by vessels from anchorages and other locatio in the Solent should follow the procedure for inward or outward boun vessels as appropriate.

9. Harbour Patrol.

The Operations Officer is assisted by a Patrol Officer who maintains continuous harbour patrol. To assist Mariners in identifying the Harbou Patrol Launch at night, a blue all round light is exhibited at the mas head. The Harbour Patrol is fitted with VHF R/T call sign SP.

10. Height of Tide.

Automatic tide gauges are located at Calshot, Dock Head and Prin Charles Container Port. Tidal information is available on request and recorded.

11. Wind Speed and Direction.

Wind speed and direction information is available on request and recorded.

12. Harbour Radar.

(a) Remote controlled radar Stations are situated at Calshot Spit an Hythe and depicted on Admiralty Charts. Each station is fitted with 25 ft. horizonal aperture scanner 110 ft. above MHWS searching over 0.3° horizontal and 4° vertical beam width rotating at 20 rpm in winds to 80 knots.

(b) Vessels can be supplied with continuous information relating their progress, approach to navigation marks and other vessels, trans and turning marks, channel margins and the manner in which the vess is progressing round the West Bramble and Calshot turns. Manoeuvri instructions, however, will not be given unless specifically requested the Master or Pilot.

(c) Computer Assisted Measurement System.

This system employs a small digital computer and a variable mar which can be placed over any target on the display to provide following information:

1. The bearing and distance between the scanner and a select target.
2. The bearing and distance between any two targets.
3. The course made good by a selected target.

Facilities are available to store up to 24 targets such as Navigat Buoys, vessels at anchor, etc. The bearing and distance from a selected target to any one of the stored targets can be quickly obtai and the closest point of approach determined.

(d) Accuracy of Bearing and Distance Measurement.

Bearing accuracy from point A to point B is to 0.5° and distances are 25 m. or to 0.3% of the most distant echo from the scanner, whichev the greater.

(e) Radar Reference Line.

An alternative position fixing system indicates the position of a ves relative to a Reference Line electronically produced as points 1 ca apart on the radar display linked to the Calshot Radar only. The Ra Reference Line is shown on the Admiralty Charts of the area as a brok line with points at 1 cable and circles where the line changes directio

A vessel underway will, upon request, be given her position using the distance between the points of the Reference Line as a scale to estimate the position:

1. As a distance RIGHT or LEFT of the Reference Line relative to her direction of progress.
2. As a distance along the Reference Line to a navigational mark or marks in transit.

The position of another vessel will be given:

3. As a distance from the Reference Line ON THE SAME SIDE or ON THE OTHER SIDE.
4. As a distance along the Reference Line.

Note: In areas where a Reference Line is not shown progress will be indicated relative to navigational marks and other vessels.

(f) Bearings and Distances.

Bearings and distances will be related to the bow (stem) of the vessel concerned unless otherwise stated.

13. This Notice is issued in agreement with QHM Portsmouth.

STORNOWAY: 58.12 N. 06.22 W. (See Plan Book)

PORT LIMITS: Now extended to a line from Southern end of Holm Island on the East to Rugh A'Bhaigh Vaine on the West – approximately 7.5 cables to seaward of Arnish Point Light.

PILOTAGE: Pilotage not compulsory. Vessels requesting Pilot request same with ETA. Boarding off Arnish Point Lighthouse.

ANCHORAGES: Anchorage in harbour between Goat Island and mouth of Creed River, 8 fathoms.

RESTRICTIONS: Entry night or day and at any state of tide. No bar on entrance.

MAX. SIZE: 400 ft. by 60 ft. by 22 ft. draft to berth alongside, 600 ft. length by 35 ft. draft for anchorage in bay.

HEALTH: The customary flying of "Q" flag.

Also see "Health – All Ports" before first U.K. port.

RADIO: Wick Radio or alternatively Oban Radio.

RADAR/VHF: R/T-VHF established in harbour, Channels 16 and 12. Emergency messages may be passed through Stornoway Coastguard on 81.8 m.

TUGS: No tugs available at port. Fishing vessels have been used, when necessary, for this purpose.

BERTHING: Vessels can be berthed at any time, provided berth is free.

Roll-on/Roll-off ferry terminal for Stornoway/Ullapool service in operation.

Depth of Water at Low Water Spring Tides: West side No. 1 Pier: 24.5 ft. shallowing to 12 ft. at junction of North Beach Quay. East side No.1 Pier: 24.5 ft. shallowing to zero at inward end. West side No. 2 Pier: 17.5 ft. shallowing to zero at inward end. East side No. 2 Pier: 16.5 ft. shallowing to zero at inward end. Inner Harbour decreases from 12 ft. at junction of Esplanade Quay to 8 ft. at upper end of Cromwell Street Quay.

STEVEDORES: Arranged by Agents on receipt of ETA.

MEDICAL: Advance notice desirable, Hospital facilities available in the town.

TANKERS: Normal safety requirements. One tanker berth only 15 ft. mean draft, max. length 220 ft.

DENSITY: Pratically always dead salt; 1025 density.

FRESH WATER: Fresh water available by hose at 15 t.p.h.

FUEL: 24 hours notice required.

GANGWAY/DECK WATCHMEN: Service of watchmen not necessary. Watchmen from shore may be employed if required.

OPENING/CLOSING HATCHES: Normally crew.

IDENTIFICATION CARDS: Not required.

CONSULS: French, Swedish, Norwegian; tel. Stornoway 2012, 2054, 3173 respectively.
SURVEYORS: Marine & Engineer Surveys (Hebrides) Ltd., Stornoway.
REPAIRS: Minor deck and engine repairs can be carried out locally.
DRY DOCKS: No dry dock but one slipway of 750 tons displacement.
REPATRIATION: Facilities exist for this service.
AIRPORT: 3 miles from port, served regularly by British Airways from Glasgow, Aberdeen and Inverness.
HOLIDAYS: New Year's Day, Christmas Day and all other local Bank Holidays. Cargo work can be arranged except New Year's Day. (No Sunday work.)
POLICE/AMBULANCE/FIRE: Police, Stornoway 2222 (can deal with all three services).
EMERGENCY CO-ORDINATION CENTRE: Stornoway Coastguard Tel: 2013 or 2014.
TELEPHONES: Can be arranged by prior application through Aberdeen office.
STORING: See "Prelims" page viii.

1. By truck. 4. Yes.
2. – 5. Notice No. 69.
3. Yes. 6. Yes.

GENERAL: ETA to be sent 24 hours beforehand so that necessary arrangements can be made.
AUTHORITY: Stornoway Pier and Harbour Commission, Amity House, Esplanade Quay, Stornoway PA87 2XS. *Tel:* (0851) 2688. *Cables:* Harbour Commission. *Contact:* General Manager or Harbour Master.
AGENT: Duncan MacIver Ltd., 3 Maritime Buildings, Stornoway PA87 2XU. Tel: (0851) 2012. After Hours: (0851) 2682, (08503) 219. Telex: 75363.

STRANRAER: 54.55 N. 05.02 W. (See Plan Book)

DOCUMENTS: As for other British ports.
PILOTAGE: Not compulsory.
ANCHORAGE: Deep water anchorage at Lady Bay.
MAX. SIZE: Largest vessel handled 420 ft. long. Working draft 15 ft.
HEALTH: See "Health – All Ports" before first UK port.
TUGS: Not available.
RADIO: VHF watch kept on Channel 16 at Sealink Scotland Ferry Terminal. Working Channel is 14.
BERTHING: *East Pier:* 3 berths dredged to 15 ft. at L.A.T. One with vehicular ramp.

Ross Pier: Length 500 ft. Dredged to 16 ft. at L.A.T. Double tier vehicular ramp at this berth.
CARGO GEAR: Portable crane of 10 tons capacity.
MEDICAL: Medical Centre and hospital in town.
FRESH WATER: Available at East Pier.
FUEL OIL: Limited quantities of oil can be supplied from road tankers.
REPAIRS: Small repairs can be carried out by local engineering firm.
GENERAL: Inshore lifeboat based at Stranraer.
AUTHORITY: *East Pier:* Sealink (Scotland) Ltd., Ferry Terminal, Stranraer Harbour, Stranraer DG9 8EL. *Tel:* (0776) 3531. *Telex:* 778125. *Cables:* Marine Rail Stranraer. *Contact:* Captain R. W. Bathgate, Shipping and Port Manager.

West Pier: Regional Council Harbour Master.

AGENT: See "Clyde Port".

SULLOM VOE: 60.27 N., 01.17 W. (See Plan Book)

GENERAL: The Port of Sullom Voe is a major deep water harbour. It is owned and operated by the Shetland Islands Council as Harbour and Pilotage Authority.

The Port Administration Building, from which all marine operations are monitored and controlled, stands on Sella Ness in position: Lat. 60° 26.8′ N., Long. 01° 16.5′ W.

Services offered by the port and financed through conservancy charges include port radar, navigational advice to Shipmasters, intensity controlled navigational lighting to assist berthings in poor visibility, meteorological advice, shore access gangways and speed of approach docking equipment. Services offered and financed through separate charging structures include pilotage and mooring boat services. Boat hire can be arranged for vessels anchored or standing off. The towage service is operated by a separate towage company and financed directly through towage charges.

The harbour is presently designed to accept tankers up to 365 m. LOA, with a draft of up to 22.6 m. and LPG carriers up to 260 m. in length with a draft up to 15.9 m. In addition to liquid bulk and LPG cargo, the port is designed to handle general, dry bulk, Ro-Ro and containerised cargo.

There are 2 entrances to Yell Sound. The primary Northern route, suitable for oil and gas tankers, lies on the Western side of Yell Sound and is marked by leading lights situated on Gluss Isle. The South Eastern approach is considered suitable for coastal traffic and vessels up to 200 m. LOA and having a draft of not more than 11.6 m.

Both routes merge at the entrance to Sullom Voe; the lead into the Voe is indicated by a sectored light situated at Skaw Taing and leading markers located on Fugla Ness. In the case of vessels other than coastal vessels, all manoeuvres South of Lamba Island will be assisted by tugs.

Ships will generally be berthed starboard side alongside at the oil loading berths. This will involve a 180° swing within the Voe; in a turning area marked by sectored lights which are located on Sella Ness and Scatsta Ness. Vessels may berth port side alongside during adverse wind conditions.

The turning area has a diameter of 800 m., and depth of 15 m. at LAT. For the purpose of manoeuvring within the pilotage district a minimum under keel clearance of 2.0 m. is required.

Although current rates of up to 7 knots may be experienced in areas of Yell Sound, records indicate that the maximum current likely to be experienced within Sullom Voe, on the deep draft route, is unlikely to exceed 1 knot.

The tidal range within the Harbour Area is 2.3 m. at Springs and 0.6 m. at Neaps. The main tidal current flows to the South on the flood and to the North on the ebb.

Note: Strong winds are frequently experienced at Sullom Voe and may be accompanied by sudden gusts from any direction. The prevailing wind direction is S.W.

It is essential that whilst alongside the jetty, moorings are tended carefully and regularly and conform with the recommended mooring pattern. (See "Plan Book".)

The Sullom Voe Oil and Gas Complex is located within the port limits on Calback Ness in position: Lat. 60° 27.5′ N., Long. 01° 17.0′ W., and is operated by BP Petroleum Development Limited on behalf of several oil company participants.

The oil reaching Sullom Voe through the Brent and Ninian Pipe-lines is collected from a group of oilfields located in the East Shetland Basin.

CONDUCT OF VESSELS ENTERING YELL SOUND:

a) Masters of tankers and gas carriers entering the Port of Sullom Voe are advised to refer to Charts BA 3298 and 3297.
b) Navigation within the Pilotage District is prohibited unless the vessel is mechanically and navigationally sound, anchors have been cleared away and there is a responsible person who can speak and understand English on the bridge.
c) The berthing of tankers and gas carriers is suspended when wind speeds are consistently gusting in excess of 30 knots. Masters will be advised by Port Control in the event of such suspension.
d) Vessels should afford a safe lee for the pilot boat during boarding and landing operations at the Northern Station – Reporting Point A ('Alpha').
e) At Reporting Point B ('Bravo') the Master should order the crew to stations fore and aft in preparation for securing tugs, while speed is reduced accordingly.
f) The bow and stern tugs will be made fast in the area North of Reporting Point C ('Charlie').
g) The alongside tugs shall be secured by bow lines as soon as possible thereafter.
h) The vessel's speed must not exceed 5 knots South of a line joining Skaw Taing and Trumba Point.
i) Standard practice requires vessels to be swung on arrival (except when weather conditions dictate otherwise) and berthed starboard side alongside the jetty designated (see "plans" for mooring guidelines).

Note: Tugs will use their own lines for securing.

MINIMUM REQUIREMENTS: In order to avoid delays, all vessels programmed for Sullom Voe should comply with the recommendations of the Council of the European Committee for Vessels Transiting Community Seaports, and be fitted with:

(i) Fully operational radar.
(ii) Fully operational VHF radio with Channels 16, 14, 20 12, 10, and 9.
(iii) Sufficient crew to handle tugs' lines and moorings efficiently.
(iv) Efficient propulsion and deck machinery.
(v) Efficient and adequate moorings to secure vessels safely.
(vi) Efficient signalling equipment.
(vii) Fully operational tachometer, rudder and helm indicators.
(viii) Efficient mooring stations communications systems.
(ix) An efficient anchor windlass and anchors.
(x) A complete and valid set of Safety Certificates.
(xi) All officers to be properly qualified and carry recognised certificates of competency.

Note: If any vessel cannot comply with any of the above, Sullom Voe Port Control should be advised prior to arrival or departure.

DOCUMENTS:
General Declaration (C13). In duplicate.
Ship's Stores Declaration (C14). In triplicate.
Crew Declaration (C142). In duplicate.
Small Parcels List (C143). Single copy (if appropriate).
Self-Declaration Deck Cargo (DC1). In duplicate (if appropriate).

When the vessel is not boarded on arrival the Master must arrange for 1 copy of each form to be lodged within 3 hours of arrival at the Custom Office, located in the Port Administration Building at Sella Ness.

PILOTAGE: Pilotage is compulsory within the Sullom Voe Pilotage District. Masters of British registered vessels of less than 1,600 g.r.t. may be eligible to sit an examination to gain a Pilotage Exemption Certificate under the conditions laid down in Section 11 of the Sullom Voe Pilotage Byelaws.

Vessels of less than 300 g.r.t. are exempt from compulsory pilotage under the conditions laid down in Section 12 of the Sullom Voe Pilotage Byelaws.

The district takes in the waters of Yell Sound and Sullom Voe, including all creeks, voes and inlets bounded on the North by a line drawn from the Northern extremity of the Point of Fethaland to the Northwestern extremity of Fogla Lee and in the S.E. by a line drawn from the Northwestern extremity of the Ness of Sound to the Northern extremity of Ulynarey Island and thence to the Northern extremity of Mio Ness.

All vessels entering or leaving the Sullom Voe Pilotage District are requested to contact Sullom Voe Harbour Radio initially on VHF Channel 16, whereupon they will be asked to change to a working Channel.

The traffic situation will be broadcast daily at 4 hourly intervals, commencing at 0000 hrs. local time on VHF Channel 20. Any vessel may, however, receive the traffic situation at other times on request.

Brief local weather forecasts will be broadcast at 0800 hrs. and 2000 hrs. local time on VHF Channel 20. Gale warnings will be broadcast when received and in the traffic broadcasts.

Any vessel intending to use the deep water channels marked by the leading lights of Gluss Isle, the white sector of Queyfirth Light, the white sector of Skaw Taing Light, the Fugla Ness leading lights or the Sella Ness leading light, for the purpose of fishing must report such intentions to Sullom Voe Harbour Radio and report at intervals not exceeding 2 hours while fishing.

Sullom Voe Harbour Radio maintains a continuous listening watch on the following VHF Channels: 16, 9, 10, 12, 14 and 20. Vessels should, where possible, refrain from using Channel 16 except for initial calling and Channel 10, which is designated for emergency purposes.

Pilots: Licensed Pilots are available on a 24-hour basis. A continuous VHF watch is maintained. Call sign "Sullom Voe Harbour Radio".

Pilot Boarding Areas: All vessels approaching Sullom Voe by the North Entrance and which require a Pilot and all vessels of 200 m. LOA and over should rendezvous with the Pilot in a position with Point of Fethaland light bearing 260° T×1.6 miles. Vessels of less than 200 m. LOA approaching Sullom Voe by the S.E. channel should rendezvous with the Pilot in position Lat. 60° 28.5′ N., Long. 00° 56.5′ W. with Firths Voe lighthouse bearing 260° T×7 miles.

Pilot Boats: The Authority has 3 boats for use at the Port of Sullom Voe.

(i) "Sullom Mareel" LOA 16.2 m., service speed 16 knots.
(ii) "Sullom Spindrift" LOA 19.8 m., service speed 20 knots.
(iii) "Sullom Shoormal" LOA 19.8 m., service speed 20 knots.

The main construction of all boats is of G.R.P. They are fully equipped with modern navigational aids.

The freeboard of each boat is approximately 1.5 m.

Pilot Ladder Requirements: All vessels calling at the Port of Sullom Voe must comply with "The Merchant Shipping (Pilot Ladders) Rules 1975" (S.I. 1046) and (Pilot Ladders) Amendment Rules 1977.

The following points are stressed:

(i) The rigging of pilot ladders and the embarkation and disembarkation of Pilots thereby shall be supervised by a responsible officer of the ship.
(ii) Every pilot ladder shall be secured in a position clear of any possible discharges from the ship, and so that each step rests firmly against the ship's side.
(iii) Every pilot ladder shall be secured in a position where the Pilot can gain safe and convenient access to the ship after climbing not less than 1.5 m. and not more than 9.0 m.
(iv) Whenever the distance from the water to the point of access to the ship exceeds 9.0 m., access to the ship must be by means of a combination of a pilot ladder and an accommodation ladder, or an equally safe and convenient means.
(v) Adequate lighting shall be provided at night so that the pilot ladder overside and also the position where the Pilot boards the ship shall be properly illuminated.

Pilot Hoists: Pilots are not obliged to use pilot hoists. Any use of these devices must only be at the option of the Pilot, and in general, pilot hoists are not acceptable for the boarding and landing of Pilots at Sullom Voe.

Any pilot hoist offered must, in any case, comply fully with IMO recommendations on performance standards for mechanical pilot hoists and also with the recommendations of the European Maritime Pilots Association.

Note: Because of the low ambient air temperature combined with strong wind conditions, experience has shown that it is not uncommon for pilot hoists driven by compressed air to freeze. Careful attention should be paid to this equipment during the Winter months.

Pilot Boarding Arrangements: In all normal circumstances the boarding and landing of Pilots at Sullom Voe will be carried out by the Authority's, pilot vessels.

Sometimes sea conditions at the North boarding station prevent the boarding and landing of Pilots by boat even though wind speeds may be within operational limits. During such periods, helicopters are used at the discretion of the Authority, to carry out Pilot transfer by winching. Such operations have hitherto been carried out on an ad-hoc basis but arrangements have recently been formalised to increase their effectiveness.

Certain criteria are important in relation to the use of helicopters for Pilot transfer by winching and these are as follows:

1. The service is available only when weather conditions preclude the use of boats.

2. The service is available only during local airport opening hours which are generally 0730-2030 weekdays and 1045-1430 on Sundays.

3. The service is available only to crude carriers and combination carriers provided with approved helicopter operating areas. It is not available to LPG carriers.

4. All operations are carried out strictly in accordance with the International Chamber of Shipping Guide to Helicopter/Ship operations and all vessels served by this means are required to observe the provisions set out in that document.

5. Individual agreement of Owners and/or Masters of vessels is obtained on each occasion the service is used.

6. Vessels are not generally serviced on a single vessel basis but this may occur. Generally several sailing and arriving vessels will be serviced simultaneously by one helicopter for reasons of economy.

7. No extra charge accrues to the vessel when helicopters have to be used because of weather conditions. The regular and published boarding and landing fee is applied.

8. Helicopter operations are co-ordinated by Sullom Voe Harbour Control. Vessels served should follow instructions issued by Port Control to facilitate transfers when such operations are in progress.

9. Helicopters used are Sikorsky S61N aircraft operated by British Airways Helicopters.

10. Only experienced aircrew fully qualified in winching operations are used and Marine Pilots of this Authority are all experienced in this mode of transfer and trained in accordance with Section 8(h) of the ICS Guide to Helicopter/Ship operations.

APPROACHES: *Routeing and Aerial Surveillance in Shetland Waters.* Vessel routes in Shetland Waters:

Applicable to all tankers, combination carriers and LPG vessels calling at Sullom Voe.

Shetland Islands Council, conscious of the dangers to navigation around the Shetland coast, due largely to outdated surveys, offshore obstructions, strong tides, rapid weather changes and the presence of fishing vessels, vigorously discourages navigation within 10 miles of the coastline.

An agreed procedure has been reached between the Oil Industry and Shetland Islands Council of which the following is an extract:

1. Masters are strongly recommended to keep at least 10 miles off the Shetland Islands, including Foula and Ve Skerries, when approaching or leaving Yell Sound. Since Fair Isle is part of Shetland Islands it is recommended that vessels navigate the Fair Isle channels approximately midway between Fair Isle and either Mainland Shetland or North Ronaldsay, Orkney.
2. It is further recommended that passage between off-lying islands/skerries etc., including Foula and Mainland Shetland should not be attempted.
3. For the final approach to/departure from Yell Sound, vessels are strongly recommended to navigate on the offshore side of the boundaries joining the following co-ordinates:

When approaching from/proceeding to the West:

A.	Lat. 60° 42.5′ N.	Long. 01° 42′ W.
B.	Lat. 60° 42.5′ N.	Long. 01° 22′ W.
C.	Lat. 60° 40.0′ N.	Long. 01° 17′ W.

When approaching from/proceeding to the East:

D.	Lat. 60° 40.0′ N.	Long. 01° 14.0′ W.
E.	Lat. 60° 56.5′ N.	Long. 01° 14.5′ W.
F.	Lat. 61° 01.5′ N.	Long. 00° 59.5′ W.
G.	Lat. 61° 01.5′ N.	Long. 00° 48.0′ W.
H.	Lat. 60° 56.5′ N.	Long. 00° 27.0′ W.

4. Vessels which have permission to use the pilot station at the S.E. entrance to Yell Sound are requested to navigate as follows:

A. Vessels approaching the Shetland Islands from the South and making for the pilot station at the S.E. entrance to Yell Sound or wishing to anchor in Colgrave Sound are advised to navigate to a position 10 miles East of Out Skerries before altering course to the pilot station or to Colgrave Sound.

B. Vessels approaching from the North and making for the pilot station at the S.E. entrance to Yell Sound or wishing to anchor in Colgrave Sound are advised to navigate to a position 10 miles East of Fetlar before altering course to the pilot station or Colgrave Sound.

5. Where, for any reason of safety or emergency, it is not possible to comply with the foregoing, you are required to notify immediately your intentions with reasons, to Sullom Voe Port Control by VHF Channel 16 or via Agents. Charts should not be cleaned off until berthed at Sullom Voe to assist checking by Port Authority.

ANCHORAGES: There are no suitable anchorages available for large tankers in the Port of Sullom Voe.

However, LPG carriers of less than 180 m. LOA may be anchored in a designated area within the harbour at the discretion of the Harbour Master.

Where Masters are faced with an extending berthing delay they should be guided by Charts BA 3059 and 3293 in taking up a secure anchorage in Colgrave Sound, referred to in 'North Coast of Scotland Pilot' page 99. VHF communication between Sullom Voe and Colgrave Sound is good.

Masters should beware of 2 submarine oil pipe-lines on the East Side of Shetland shown on the latest charts and referrred to in 'North Coast of Scotland Pilot' pages 94 and 95.

Except when advised otherwise, Masters should proceed to a point 6 miles off Gruney Island (Lat. 60° 39′ 00″ N., Long. 01° 18′ 00″ W.). Thereafter, Masters should follow directions in 'North Coast of Scotland Pilot' page 54, noting, however, that there are areas of poor VHF reception with Sullom Voe to the West and North of Yell Sound.

MAX. SIZE: See "Berthing", "Loading/Discharging Facilities" and "Liquefied Petroleum Gas Facilities".

HEALTH: The following Port Health procedure applies at the Sullom Voe Terminal.

The Master has no need to obtain health clearance unless:

(i) An authorised officer otherwise directs.
(ii) A death or illness has occurred as defined in the Public Health (Ships) (Scotland) Regulations.
(iii) An abnormal mortality among rats or mice on board has occurred.

Where it is necessary to obtain "Free Pratique" for health purposes, the Master should provide the following documents:

(i) Maritime Declaration of Health.
(ii) A list of passengers and crew leaving the ship, together with the addresses they are going to in the United Kingdom.

Derat Exemption Certificates: The Sullom Voe Terminal is an "approved" Port, and Derat Exemption Certificates will be issued by the local Health Authority.

Also see "Health – All Ports" before first U.K. port.

RADIO:

ETA Requirements: Vessels bound for Sullom Voe are required to provide the Pilotage Authority with the following information.

(i) An estimated time of arrival at least 24 hours prior to arrival or on leaving the last port (whichever is later). In addition to this ETA Masters are to include the estimated time of crossing Lat. 58° 20′ N. and estimated longitude on crossing that latitude, and the intended inward courses and turnpoints to the Gruney Island pilot station. Vessels arriving from the North Atlantic or Northern North Sea should use a position 200 miles from the pilot station.

(ii) Confirm the vessel's ETA at least 6 hours before arrival at the seaward limit of the Pilotage District and thereafter notify any significant change in excess of 1 hour.
(iii) On coming within range of "Sullom Voe Harbour Radio", the ETA to be given by VHF.

Pre-Arrival Information: 24 hours prior to arrival, all vessels calling at Sullom Voe should cable "Portcontrol Sullomvoe" the following information:

(i) Ship's name and call sign.
(ii) Port of Registry.
(iii) Name of Master.
(iv) G.R.T.
(v) Summer deadweight (tonnes).
(vi) Length overall and beam (metres).
(vii) Draft fore and aft.
(viii) Whether to berth or in transit.
(ix) Whether loaded or in ballast. If loaded, nature and quantity of cargo.
(x) Whether vessel is carrying segregated ballast.
(xi) If so, quantity and where loaded.
(xii) Dirty ballast quantity (tonnes).
(xiii) Total ballast/bunkers/FW and stores as a percentage of the Summer d.w.t. (minimum acceptable 35%).
(xiv) Which pilot station on arrival.
(xv) Pilot boarding arrangements.
(xvi) Number of crew.
(xvii) Last Port of call.
(xviii) Does ship have a fully operational inert gas system?
(xix) Is there on board an IGS exemption certificate? (All vessels above 20,000 d.w.t., must have and use inert gas).
(xx) Are all cargo/slop tanks inerted to a maximum of 8% oxygen content (2% for LPG carriers).
(xxi) Is all navigation, safety, anchoring and mooring equipment fully operational and ready for use? If not, specify. All anchors to be cleared away on arrival at the pilot station.
(xxii) Confirmation to be given that vessels are complying in all respects with "The Merchant Shipping (Tankers) (EEC Requirements) Regulations 1981".
(xxiii) Details of inward courses (to be telexed 24 hours prior to arrival).

VHF: All shipping movements within the pilotage district are monitored from Port Control Room in the Port Administration Building at Sella Ness.

The Port Control Room is manned on a 24 hour basis by Marine Officers who are licensed Pilots.

These Marine Officers, in their capacity as Port Control Officers, maintain a continuous VHF and radar watch. They provide advice to Masters and Pilots on all navigational aspects (including weather forecasts) within the area, direct shipping movements within the port, and liaise with the Terminal Operator and emergency services.

The following VHF Channels are continuously monitored in the Port Control Room.

Channel 16	Calling, safety and distress.
Channel 9	Tanker pilotage, tugs and radar assistance.
Channel 10	Port emergency, fire or oil pollution.
Channel 12	Secondary Port Control working frequency.
Channel 14	Main Port Control working frequency.
Channel 20	Traffic and weather broadcasts.

The call-sign for Sullom Voe Pilots is "Sullom Voe Harbour Radio".

In addition, *Sullom Voe Oil Terminal* constantly monitors Channels 19 and 46 over which pre-arrival information concerning loading procedures will be given.

Since the Terminal has no direct access to Channel 16, initial contact should be made on Channel 19 using call sign "Sullom Voe Terminal".

It is emphasised that Masters should try to contact the Terminal as soon as possible prior to arrival at the pilot boarding area, so that loading information may be exchanged before commencing the inward passage through Yell Sound.

Control of Traffic: The Port Control Room directs the movements of all vessels within the Pilotage District and the Harbour Area. Overtaking and passing is prohibited in the deep water channel within an area bounded by a line joining Queyfirth Light and the Northern extremity of Lamba Island and a line joining Skaw Tang Light and the front leading light on Gluss Isle. With the introduction of LPG traffic, a further restriction on overtaking and passing has been included in the main tanker route as follows:

No vessel having an overall length in excess of 50 m. shall navigate so as to pass or overtake an LPG carrier underway anywhere within Yell Sound or Sullom Voe between lines drawn between the Northern extremity of Muckle Holm (Lat. 60° 35.1′ N., Long. 01° 15.8′ W. approximately) and the Northern extremity of the North Holm of Burravoe (Lat. 60° 35.4′ N., Long. 01° 18.2′ W. approximately) and between the Northern extremity of Lunna Holm (Lat. 60° 27.5′ N., Long. 01° 02.4′ W. approximately) and the Southern extremity of Heoga Ness (Lat. 60° 29.4′ N., Long. 01° 02.4′ W. approximately).

Reporting Positions: During the transit of Yell Sound, all vessels are required to report to Port Control when passing the following positions:

"A"	122.5°×1.5′ from Gruney Island Lt.	(60° 38.6′ N., 1° 15.3′ W.)
"B"	274°×0.5′ from Muckle Holm Lt.	(60° 34.9′ N., 1° 16.9′ W.)
"C"	094°×0.4′ from Queyfirth Lt.	(60° 31.5′ N., 1° 18.7′ W.)
"D"	270°×0.5′ from Skaw Taing Lt.	(60° 29.3′ N., 1° 16.7′ W.)
"X"	355°×1.25′ from Mossbank	(60° 28.5′ N., 1° 10.7′ W.)

The provision of additional reporting points in the S.E. entrance is under review.

RADAR: Full radar coverage exists for Yell Sound and Sullom Voe.

The main scanner is located on the hill of Vats Houllands (Lat. 60° 27′ 57″ N., Long. 01° 17′ 28″ W.) and is connected by microwave link to displays in the Port Control Room.

Port Control Officers maintain a continuous radar watch, and the transit of each vessel is monitored and recorded. Advice is available to vessels on request.

TUGS: At present a fleet of harbour tugs provide a towing service for vessels at the Port of Sullom Voe. These are stationed at the Sella Ness Jetty adjacent to the Port Administration Building.

The fleet is operated by Shetland Towage Ltd., a private company owned and operated by a joint venture between Shetland Islands Council, Clyde Shipping Company and Cory Ship Towage.

The fleet consists of 3 twin screw 3,800 h.p. vessels, each having a bollard pull of 55 tons. These vessels are fully equipped as fire-fighting tugs and pollution control vessels and were built by Hall Russell and Company Ltd., in Aberdeen, in 1978. Named after Shetland birds, they are:

"Stanechakker", "Swaabie", "Lyrie"

Two new additions to the fleet are Voith water tractors, built in 1983 by Ferguson Ailsa Ltd., at Port Glasgow. These vessels have twin 32G Voith units developing 4,000 b.h.p. and a bollard pull of 45 tons. Also given bird names, they are:

"Tirrick", "Shalder"

The use of tugs and their numbers will be as directed by the Harbour Master. Prior to arrival, vessels should ensure that heaving lines of adequate length and breaking strain are readily available to assist in securing the tugs.

Tugs will normally meet incoming vessels at a position North of Lamba Island. Officers and crew should be standing by to receive lines and all necessary tugs must be secured before the vessel's ability to manoeuvre becomes restricted.

When a vessel is berthing, tugs will be secured to the bow and stern of the vessel with towing lines and alongside in a push pull mode. Their mode of operation and disposition will be fully explained by the Pilot on arrival. Tug lines will normally be used throughout, either from towing hook or towing winch.

It is requested that wherever possible tug orders for movements before 0900 hrs. on a particular day shall be placed not later than 1700 hrs. on the preceding day.

BERTHING: Attention is drawn to the minimum under keel clearance of 1 m. required alongside and the minimum under keel clearance of 2.0 m. in the channel.

Ore/Oil and Ore/Bulk Oil vessels up to a maximum size of 300,000 tons Summer deadweight may berth at Sullom Voe. Oil tankers up to any extreme maximum of 350,000 tons Summer deadweight will be accepted.

Limiting Vessel Sizes:

No. 1 Jetty:	**Crude Oil Carriers**
LOA	170 m. to 280 m.
d.w.t.	18,000 tons to 120,000 tons
Berthing Displacement	100,000 tons (max.)
Depth alongside	16.9 m.(min.)
Max. allowed draft	15.9 m.
	LPG Carriers
LOA	140 m. to 260 m.
Capacity	10,000 cu.m. to 75,000 cu.m.

No. 2 Jetty:	**Crude Oil Carriers**
LOA	210 m. to 365 m.
d.w.t.	50,000 tons to 350,000 tons
Berthing Displacement	250,000 tons (max.)
Depth alongside	23.1m. (min.)
Max. allowed draft	22.1 m.

No. 3 Jetty:	**Crude Oil Carriers**
LOA	170 m. to 365 m.
d.w.t.	30,000 tons to 350,000 tons
Berthing Displacement	250,000 tons (max.)
Depth alongside	23.6 m. (min.)
Max. allowed draft	22.6 m.

No. 4 Jetty:	**Crude Oil Carriers**
LOA	170 m. to 365 m.
d.w.t.	30,000 tons to 350,000 tons
Berthing Displacement	250,000 tons (max.)
Depth alongside	23.6 m. (min.)
Max. allowed draft	22.6 m.

Note: (i) Vessels entering in ballast or partially loaded conditions should ensure that their draft does not exceed 13 m. as this is the draft normally allowed in the South Turning Area.

(ii) Where it is not possible for vessels to arrive with a draft of 13 m. or less, berthing will be carried out in accordance with the Harbour Master's directions.

Loading Systems:

No. 1	Crude	4×12 in.	Loading arms var. hydraulic connections.
	LPG	2×12 in. 1× 8 in.	Loading arms var. hydraulic connections.
No. 2	Crude	4×16 in.	Loading arms var. hydraulic connections.
No. 3	Crude	4×16 in.	Loading arms var. hydraulic connections.
		and 1×12 in.	Loading arm.
No. 4	Crude	4×16 in.	Loading arms var. hydraulic connections.

Manifold Heights:

	Heights above chart datum *Max.*	 *Min.*
No. 1 Crude	22.70 m.	1.80 m.
LPG	19.00 m.	3.50 m.
No. 2 Crude	31.30 m.	2.60 m.
No. 3 Crude (16 in. arms)	31.30 m.	4.23 m.
(12 in. arm)	19.90 m.	2.70 m.
No. 4 Crude	31.30 m.	4.23 m.

Maximum allowable pressure on lines and connections: 150 p.s.i.

Jetty Orientation:

No. 1	280°/100°
No. 2	135°/315°
No. 3	135°/315°
No. 4	145°/325°

Gangway: Shore tower type gangways are provided at all times. If for any reason, a shore gangway will not be available, ships will be advised in good time.

Maximum Loading Rate per Arm:

Crude:	12 in. loading arm	2,500 long t.p.h.
	16 in. loading arm	5,000 long t.p.h.
LPG:	8 in. loading arm	900 cu.m/hr.
LPG:	12 in. loading arm	2,100 cu.m/hr.

MOORING:

Oil Loading Berths: Four loading berths Nos. 1, 2, 3 and 4.

The loading berths are located in deep water on the Northern shores of Sullom Voe, adjacent to the Terminal complex at Calback Ness.

The berths are numbered 1 to 4 in sequence from East to West. Number 1 jetty has facilities for both crude and LPG carriers and can accommodate vessels up to 120,000 d.w.t. Numbers 2, 3 and 4 jetties have crude loading facilities only, catering for tankers up to an absolute maximum of 350,000 d.w.t. and bulk carriers (Obo's, Ore/Oil etc.) up to an absolute maximum of 300,000 d.w.t.

Each jetty is of conventional "T" shaped construction with 4 breasting dolphins in line with the jetty head. The mooring dolphins are offset from the line of breasting dolphins to provide an optimum lead for mooring lines. Vessels may land at a maximum angle of 8° to the jetty face. Quick release mooring hooks are fitted on all dolphins. For use with large vessels, quick release mooring pulleys have been fitted on No. 2, 3 and 4 berths. These pulleys, one at each end of the berth are designed to accept a ship's mooring wire in the form of a bight.

Large flexible rubber fenders are fitted to the outer faces of each breasting dolphin. Each has a generous energy absorbing capacity but the optimum speed of approach for the largest ship is indicated by a single green light on the speed approach indicator panel on the jetty head. This equipment shows by the following combination of coloured light signals the speed of approach of the ship toward the jetty measured separately at the two outer berthing dolphins:

GREEN
GREEN/ORANGE
ORANGE
ORANGE/RED
RED

Any colour combination except the red (i.e. any approach speed below 22 cm./sec.) is acceptable at berthing for vessels displacing up to 100,000 tons at jetty 1 and 250,000 tons at jetties 2, 3 and 4.

The 2 lateral "distance off" indicators each comprise of 20 fibre optic bars. Each bar element is switched separately at specified distances, all bars being illuminated at 99 m. In addition to indicating distance off, this system provides some indication of the vessel's angle of approach to the jetty face.

Each mooring operation will be assisted by two purpose-built mooring boats.

Special Direction 3/81 Tankers and Gas Carriers Mooring Requirements:

Note 1

Except with the permission of the Harbour Master, this Direction shall apply to all vessels in excess of 10,000 tons gross.

1. In vessels equipped with synthetic moorings or a mixture of synthetic moorings and wires, a minimum of 4 headlines/sternlines, 4 breastlines and 2 springs at each end should be used.

2. Under no circumstances should synthetic ropes and wires be used leading in the same direction, to the same dolphin.

3. Where wires are used they should be of a similar breaking load to that of the ropes.

4. If conditions 1, 2 and 3 cannot be complied with the loading arms must not be connected until alternative arrangements have been arranged with the Harbour Master and the Terminal Operator.

ACTIONS TO BE TAKEN IN SEVERE WEATHER CONDITIONS

5. At least 1 tug shall be called out to assist in keeping *any* vessel alongside when all the following conditions exist:

(a) Where the mean freeboard height of the vessel exceeds the mean draft,
(b) Where the wind is gusting to 50 knots or more and
(c) When the wind is from a direction in line with or inside the berthing line of the jetty.

6. At the time of suspending loading/deballasting operations because of deteriorating weather conditions, the Terminal Loading Supervisor will advise Port Control immediately of any vessels in the condition stated in 5(a) above.

7. When a tug is called out under the conditions stipulated in (5) above:

(a) The Terminal Loading Supervisor will notify the Master of the situation and request that the vessel be brought to a state of immediate readiness.
(b) With the exception of the Port Controller, such Pilots as are available will station themselves aboard those vessels which are considered to be most vulnerable.
(c) The Duty Harbour Master will be notified.

8. Notwithstanding anything contained in 1 – 7, the Duty Port Controller may, *after consultation with the Harbour Master*, call out such tugs as are required, at any time, if he feels the situation warrants this action. In the case of large vessels in light condition for example, it may be prudent in certain circumstances to call out the tugs when the wind off the berth is less than 50 knots. In such cases the Duty Port Controller should exercise his discretion.

General Mooring Requirements:

(i) Masters should ensure that mooring lines are in good condition, winch brakes or securing devices should be in efficient operating order and should have a holding power of at least 60% of the braking load of the vessel's mooring lines. (On vessels constructed before 1978 these conditions may be met by placing the winch in gear and applying power in addition to applying the brake).
(ii) Any known defects in the vessel's mooring system or limitation of mooring winch brakes should be reported to the Pilot and the Terminal before arrival in order that, if necessary, additional precautions may be agreed.
(iii) In order to avoid damage to loading arms and the serious consequences of oil pollution, the vessel should be kept close alongside at all times.
(iv) It is recommended that wires (or wires fitted with synthetic fibre rope tails of at least 25% greater breaking load to the wire), should be used for all mooring lines.
(v) Except with the permission of the Harbour Master, the following shall apply to all vessels in excess of 10,000 tons gross.
  (a) In vessels equipped with synthetic moorings or a mixture of synthetic moorings and wires, a minimum of 4 headlines/sternlines, 4 breastlines and 2 springs at each end should be used.
  (b) Under no circumstances should synthetic ropes and wires be used leading in the same direction, to the same dolphin.
  (c) Where wires are used they should be of a similar breaking load to that of the ropes.
  (d) If conditions a, b and c cannot be complied with the loading arms must not be connected until alternative arrangements have been agreed with the Harbour Master and the Terminal Operator.
(vi) Particular care should be taken to ensure sufficient transverse restraint from breast moorings. When synthetic fibre mooring lines are used, pre-tensioning of these lines on making fast will help prevent drift of the vessel away from the berth in "off the berth" wind conditions.
(vii) As soon as the vessel is secured, brakes on all mooring winches should be firmly applied. Winches must not be left on automatic tensioning. Full steam pressure or power to all mooring winches should be maintained at all times when alongside. On split drum mooring winches only one layer of rope shall be permitted on the working half of the drum.
(viii) An efficient watch must be maintained on the vessel's moorings at all times to ensure that all lines are properly tensioned and tended when required. The deck watch should make regular checks that mooring winch brakes are applied at the correct setting.
(ix) Masters should endeavour to ensure compliance with the mooring layout as advised by the Pilot. Large vessels should also use the "pulley" mooring hooks in the manner advised.
(x) Notwithstanding anything contained above, the Duty Port Controller may, after consultation with the Harbour Master, call out such tugs as are required, at any time, if he feels the situation warrants this action.

LOADING: *Connection of Loading Arms:* Crude: The connection of loading arms will be undertaken by shore personnel. Vessels should arrive with 12 in. or 16 in. ASA 150 manifolds, ready for connecting to the loading arms.

LPG: The connection of loading arms with be undertaken by shore personnel. The terminal carries a wide range of LPG reducers both ASA 150 and ASA 300, rating up to 12 in.

Masters should ensure that fire extinguishers are ready for use at the ship's manifold, in accordance with jetty regulations.

Crude Oil Storage: 16 conventional floating roof storage tanks are constructed, each with a capacity of 600,000 barrels. These provide storage facilities in the event of port closures and ensure sufficient stocks to enable tankers to load without delay.

The storage tanks have been constructed with bases as much as 30 m. above sea level, to allow gravity loading. However 5 oil loading pumps are installed to increase the loading rate as may be required by the vessel.

Loading Rates: A maximum loading rate of 30,000 t.p.h. can be provided by the Terminal with a maximum of 20,000 t.p.h. to any one berth.

The LPG loading system delivers up to 3,000 cu.m. per hour.

Cargo Measurement: Meters are installed for cargo measurement.

Early Departure Procedure: An early departure procedure is operated at the Sullom Voe Terminal.

LIQUEFIED PETROLEUM GAS FACILITIES: There is a single LPG insulated pipe-line from the LPG storage area to Jetty No. 1 for tanker loading. The LPG tankers using Jetty No. 1 will range in size from 10,000 to 75,000 cu.m. capacity and they will transport butane and propane under refrigerated conditions as in the onshore tankage.

Navigation, Mooring, Berthing: Except by permission obtained from the Harbour Master, no LPG ship shall at any time be navigated in, lie on, or be moored in any part of the harbour.

No LPG ship shall be anchored or moored except
(a) at a quay duly approved by the Harbour Authority
or
(b) in such position as the Harbour Master shall from time to time direct

and no LPG ship shall be removed from such last mentioned position except in accordance with the order or permission of the Harbour Master or for the purpose of leaving the harbour forthwith.

An LPG ship shall at all times lie safely afloat.

While an LPG ship is at a quay
(a) it shall be securely made fast as close alongside as possible in a manner approved by the Harbour Master.
(b) its moorings shall be adjusted from time to time to allow for the rise and fall of the tide and for the loading and discharging of cargo.

Except in accordance with such conditions as may from time to time be prescribed by the Harbour Master, no ship or harbour craft shall, when moored, unmoored or anchored, lie or pass within 30 m. of any LPG ship which is moored or anchored, without permission of the Harbour Master.

Loading and Discharging: All jetty LPG drains and ships' scuppers whereby LPG can in case of spillage escape to the Harbour shall be open before loading or discharging commence and shall be kept open during the whole period of such operations.

All vessels calling at Sullom Voe Terminal must be in possession of a certificate of fitness under the terms of the IMO code for the construction and equipment of ships carrying liquefied gases in bulk, or be in possession of an appropriate Classification Society's Certificate.

Also see "Report" dated October 1983.

DRY CARGO FACILITIES:

Construction Jetty: A concrete pier suitable for coastal traffic is located in Garths Voe, East of No. 1 jetty.

This pier, orientated on a 108°/288° axis is 100 m. long and can accept ships on both the North and South faces.

The North Berth is equipped with a fixed Ro/Ro ramp which has a width of 10.7 m., a total length of 23.7 m. and a fixed gradient of 1:22. The height of the sill is 1.67 m. above MHWS.

The pier is well fendered with patent fenders and tyres. The depths at the pier range from 9.9 m. at the Eastern extremity, rising to 3.9 m. at the Ro/Ro ramp.

Bunkers can be supplied by road tankers to vessels using this jetty.

There is no permanent dock labour force available on site at Sullom Voe. However, stevedoring services can be obtained as and when required from Lerwick, arrangements for which should be made through the local ships' Agents or receivers of cargo, as appropriate.

Garths Pier: This 2 finger jetty is situated adjacent to Sella Ness Industrial Estate.

The inside berths have a length of 41 m. and the outside berth a length of 65 m. Each finger is 7.3 m. wide. There is a depth of 4 m. alongside for the lengths stated; thereafter the depth decreases rapidly.

Graven Pier: A small concrete fishing pier is situated on the Southern shore of Garths Voe. The pier has been designated as an unsafe structure and must not be used. Vessels previously using Graven Pier should now use Garths Pier.

Tug Jetty: Harbour tugs and pilot boats are stationed at an "L" shaped jetty located on the Southern shore of Garths Voe adjacent to Sella Ness. This jetty, of cellular design is constructed of concrete and steel.

Fendering arrangements consist of used car tyres suspended at intervals along the jetty face. This pier is suitable for coastal traffic but is not used as such on a regular basis, except for discharge of fuel oils to the Graven storage facilities.

The present minimum depth off the North face of the jetty is approximately 6.9 m.

Duty paid gas oil available from bunkering points on this jetty.

BALLAST:

Ballast Requirements: For the purpose of manoeuvring, all vessels are required to maintain a reasonable ballasted condition, subject to the requirements specified in the section dealing with Oil Pollution Surveillance above.

Vessels should carry sufficient ballast so that the propellor remains immersed whilst maintaining a reasonable stern trim.

Masters are advised that the Port Authority requires, unless otherwise directed by the Harbour Master, that the propellor of any ship to be immersed at all times when vessels are alongside. When operations permit, the proportion of cargo loaded to ballast remaining onboard must be such as to ensure that the vessel can be safely manoeuvred at any time whilst in the harbour. It must be understood that shifts of wind and changes of wind force in Sullom Voe are at times violent and the adoption of an adverse trim in relation to the ship's optimum manoeuvring characteristics will not be accepted.

Ballast Reception Facilities: It is prohibited to discharge any ballast other than segregated clean ballast into the waters of Sullom Voe.

All dirty ballast or non-segregated ballast will be discharged ashore for treatment.

The Terminal can accept ballast whilst providing the vessel with cargo. Ballast will initially be pumped into settling tanks where excess oil will be skimmed off into recovered oil tanks. The remaining ballast will undergo further treatment before being discharged into Yell Sound. The ballast water will be monitored throughout the cleaning process.

Inert Gas: A random check of the quality of the inert gas in 3 of the vessels' tanks will be made on arrival longside to ensure the vessel complies with the statutory requirements regarding inert gas. If any of the tanks are found to have an oxygen content in excess of 8% the vessel will be required to vacate the berth and return to sea to complete inerting.

Discharge of Dirty Ballast Water: The discharge of ballast water from oil cargo tanks or any ballast water containing quantities of oil or high levels of mineral or chemical pollutant, into the waters of the harbour is prohibited.

The discharge of ballast water from segregated or permanent ballast tanks into the waters of the harbour will be permitted provided that:–

1. The Master of the vessel advises the Harbour Authority prior to arrival:
   - (a) The place at which the ballast was taken.
   - (b) The quantity and disposition of the ballast.
   - (c) That to his knowledge the ballast is free from oil contamination.
2. Samples have been taken and analysed by the Terminal Operator. Hydrocarbon level to be 5 p.p.m. or less.
3. The Master of the vessel advises the Harbour Authority:

On each occasion he intends to discharge the ballast and at least 30 minutes before commencing discharge.

- (i) The time at which he intends commencing deballasting, and
- (ii) The time at which he expects to complete deballasting.

The Oil Pollution Control Officer of the Harbour Authority will on occasions board vessels carrying segregated ballast to obtain samples. Analysis will be made of these samples to ascertain the quantity of hydrocarbon, colliforms and heavy metal pollutants within the ballast. The Harbour Authority may, as a result of information so obtained, refuse permission for the discharge of segregated ballast water taken on board in certain locations.

The discharge of segregated ballast is not to commence before permission has been received from the Loading Supervisor. He will have:

- (i) confirmed with the laboratory that the hydrocarbon level is 5 p.p.m. or less;
- (ii) advised Port Control that the discharge of segregated ballast is about to commence.

MASTERS ARE STRONGLY ADVISED TO CLOSELY MONITOR THE DISCHARGE OF SEGREGATED BALLAST AT REGULAR INTERVALS TO ENSURE THAT OIL IS NOT ENTRAINED IN THE BALLAST WATER.

OIL POLLUTION SURVEILLANCE: Only clean ballast contained in tanks completely segregated from main cargo tanks will be allowed to be discharged into the Harbour, but then only after testing by the Terminal Operator and approval by the Port Authority.

Recent pollution of beaches and serious damage to wildlife around the shores of Orkney and Shetland suggests that certain vessels have disregarded the IMO Conventions on Oil Pollution and discharging dirty ballast whilst approaching or immediately after sailing from Sullom Voe.

Such procedures cannot be condoned by the UK Department of Trade, Local Authorities or the Terminal Operator, and with the object of preventing this practice (which is contrary to internationally agreed rules) air surveillance of all shipping in waters around Orkney and Shetland has been introduced.

As detailed in the section entitled "ETA Requirements" (see "Radio"), Masters are requested to advise Sullom Voe Port Control (Telex: Sulvoe 75142. Telegraphic Address: Portcontrol Sullomvoe) of their ETA 24 hours in advance of arrival. In addition, this message is to include the estimated time of crossing Lat. 58° 20′ N., Longitude on crossing this Latitude, and the intended inward courses and turnpoints to the Gruney Island Pilot Station (Lat. 60° 38.6′ N., Long. 01° 15.3′ W.). Vessels arriving from the North Atlantic or Northern North Sea should use a position 200 miles from the pilot station.

Prior to sailing from Sullom Voe, all vessels are requested by the Port Authority to indicate intended outward bound courses and turnpoints until South of Lat. 58° 20′ N. or 200 miles from the pilot station as appropriate. This should be detailed on the Tanker Safety Checklist provided by your Agent.

Any vessel sighted discharging dirty ballast will be immediately reported to the UK Government Authorities for appropriate action to be taken. In such circumstances, vessels may be liable to extensive delay until investigations have been completed.

Prevention of Oil Pollution: Prior to arrival, vessels are requested to ensure that all crew members are conversant with the anti-pollution regulations, which must be complied with at all times.

Principal causes of pollution are leaking ship side valves, cargo/bunker overflows and pumping engine room bilges. Therefore it is recommended that sea valves, overboard discharges (which should be shut) and ballast/cargo/bunker/bilge operations are checked by the Chief Officer and the Chief Engineer before arrival. Scuppers must be plugged on main and poop decks in respect of vessels loading/discharging bulk oil.

On arrival the terminal will give all assistance necessary but are empowered to take action in the event of contravention of pollution prevention requirements.

Masters must advise if their vessel has sustained any damage which could cause oil pollution and confirm any known oil losses from hull or sea valves.

Vessels are required to arrive at the Sullom Voe Terminal with a total deadweight of net less than 35% of summer d.w.t including bunkers, fresh water and stores.

Vessels should confirm in advance the amount of ballast, indicating the quantities of segregated ballast, and cargo tank ballast, separately. (See "Radio" – Pre-arrival information).

MEDICAL: Medical attention for ship's crews is available on request through Agents. All specialist services including inoculation and vaccination are available.

FUEL: There are no bunkering facilities available for tankers calling at the Port of Sullom Voe.

FRESH WATER: Potable water can be supplied to tankers at Sullom Voe in an emergency.

CUSTOMS: A selective system of boarding commercial vessels arriving from a non-U.K. port, will apply at the Sullom Voe Terminal.

CONSULS: In Lerwick.

Denmark	(C. W. L. Aitken)	106a Commercial St.	Lerwick 3057

REPAIRS: Engineering facilities are available to carry out repairs afloat to hull and machinery. Drydock facilities do not exist for vessels over 120 ft.

Electronic Navigational Aids and Radio: All major companies have agencies in Shetland. Repair facilities exist for all types of electronic equipment.

Engine Readiness: Main engines must be maintained in a state of readiness for vacating the Terminal at short notice at all times except in the cases of approved repair work as detailed in Regulation 14 of "Jetty Safety Regulations".

REPATRIATION: Crew changes can normally be arranged. Air and sea connections are available to mainland destinations.

It should be borne in mind, however, that during the winter months delays to air traffic are not uncommon due to prevailing weather conditions whilst in summer delays can be experienced due to low visibility.

Ships will not be permitted to retain their berth awaiting the arrival of crew members.

AIRPORT: Shetland's airport network is within easy reach of Sullom Voe and scheduled flights are available daily to all major UK cities, with connections to worldwide destinations.

BANKS:

Bank of Scotland. Tel: Lerwick 2624. Telex: 75309.
Clydesdale Bank. Tel: Lerwick 5664.
The Royal Bank of Scotland. Tel: Lerwick 3540.

GENERAL:

The following services can be provided for vessels by the Shipping Agencies. Masters are requested to provide notice of requirements prior to arrival.

Compass Adjusting: A service is available for large vessels. Requests should be made in good time to ship's Agents in order that the adjuster may board with the Pilot on arrival.

Storing: Due to the high berth occupancy at Sullom Voe it is not possible to carry out major storings. However, a limited amount of fresh provisions for immediate voyage requirements can be supplied providing it can be easily handled by the ship's crew.

Fresh and frozen meat can be supplied in any quantity with Shetland lamb a speciality. Shetland knitwear goods of high quality are available at reasonable prices. Other local products include sheepskin rugs, traditional jewellery and handicrafts.

Bonded Stores: Bonded stores are available in any quantity.

Lubricating Oils: Most major oil companies have authorised dealers in Shetland. Lubricating oils of all grades are available at competitive prices.

Charts and Nautical Publications: Available on application to ship's Agents. Advance notice is required for the supply of large sets.

Lloyd's and Salvage Association: If service or survey is required, this may be obtained through their Shetland Agents, Hay & Co. (Lerwick) Ltd.

Sea Travel: P&O Ferries maintain a regular Ro-Ro and Passenger ferry service between Lerwick and Aberdeen.

Provisioning: This service is provided by ship's Agents on request.

Shore Leave/Taxis: All personnel proceeding ashore must be in possession of a shore pass, a supply of which is handed to Masters on the vessel's arrival.

Transport is provided free from the root of each jetty to Seafarers' Centre, and taxis can be arranged for those wishing to travel further afield in Shetland.

There is no public transport system serving the Sullom Voe area.

Telephones: This facility is provided at the Seafarers' Centre operated by the British Sailors' Society and situated outside the main gate.

Weather Routeing: This service is available to Shipmasters on application to Shetland Weather Centre.

British Sailors' Society: The British Sailors' Society has a Seafarers' Centre just beyond the Terminal Entrance. The facilities that are offered are as follows:

Chapel, Library, Telephone facilities, Lounge/Television Room, three Pool tables, darts, and a Beer Bar serving lunchtime snacks.

The resident manager, Mr. Ted Wilkins, has been appointed to run the Centre and a mini bus service is in operation to collect and return seafarers who desire to relax ashore for a time whilst their ship is at Sullom Voe.

Two Honorary Chaplains have kindly offered their services to the Centre. So any seafarer wishing practical, spiritual and welfare help, please contact the manager on Sullom Voe 242715.

CHARTS AND PUBLICATIONS:

Charts: British

BA. 1119	Orkney and Shetland Islands, Fair Isle Channel.
BA. 3297	Sullom Voe.
BA. 3298	Yell Sound.
BA. 3292	Eastern Approaches to Yell Sound, etc.
BA. 1233	Northern Approaches to Shetland Islands.

Also see "Publications".

Note: These new charts are metric.

Pilot Books: North Coast of Scotland Pilot N.P. 52.

Admiralty Tide Tables: Admiralty Tide Tables, Volume 1, N.P. 201-8.

Tidal Stream Atlas: Orkney and Shetland Islands N.P. 209.

Approaches to Sullom Voe (Shetland Islands Council Publication).

Lights: Admiralty List of Lights, Volume A.

Additional Charts and Publications relevant to Sullom Voe may be published in the near future.

Admiralty Agents for the supply of hydrographic charts and publications are Hay & Co. (Lerwick) Ltd.

Publications – Navigational: Masters and/or Agents are requested to ensure that the following publications are available on board any vessel bound for Sullom Voe, which intends to navigate under Sections 11 and 12 of the Pilotage Byelaws:

a. Sullom Voe Harbour Authority – General Directions for Navigation.
b. Sullom Voe Harbour Byelaws.
c. Sullom Voe Pilotage Byelaws (1979).
d. Notices to Mariners in force for the area, issued by the Director of Ports and Harbours.
e. Charts B.A. 3297, B.A. 3298 and B.A. 3292.
f. Approaches to Sullom Voe – Tidal Stream Atlas.
g. Guidebook – Port of Sullom Voe, which includes tide tables.

NOTICES:

Landing in Great Britain of Live Animals, Live Birds and Meat:

The attention of Masters is drawn to 'Notice to Masters of Vessels and Commanders of Aircraft (IM24 (Rev 79))' of which the following are extracts:

Diseases of Animals Acts 1950 and 1975, Rabies Act 1974, Destructive Imported Animals Act 1932 and Ponies Act 1969.

WARNING: Her Majesty's Government exercise strict controls at ports and airports to prevent the introduction of animal disease and destructive animals into Great Britain. Severe penalties may be applied to those who do not comply with the import regulations.

Dogs, cats and other mammals (including ship's pets) brought to Great Britain on board a vessel which are not intended to be landed do not need a licence, but must at all times be securely confined in an enclosed part of the ship so as to prevent their escape and must not come in contact with any other animals except those similarly confined. The authorities must be informed immediately if any animal should escape.

Notice to Mariners 4/82:

Spur Booms

Anti-Pollution Spur Booms have been established at several permanent sites around the shores of Sullom Voe, and mooring buoys have been laid to facilitate quick deployment at each location as follows:

		Buoy Position	
Location	*Boom Layout*	*Latitude*	*Longitude*
Tivaka Taing	Spur Boom	60° 28′ 41″ N.	01° 18′ 37″ W.
Fugla Ness	Spur Boom	60° 27′ 04″ N.	01° 18′ 50″ W.
Lang Ayre	Twin Boom	60° 26′ 53″ N.	01° 20′ 12″ W.
Voxter Voe	Twin Boom	60° 24′ 36″ N.	01° 20′ 40″ W.
Calna Taing	Spur Boom	60° 26′ 26″ N.	01° 19′ 21″ W.
Scatsta Voe	Twin Boom	60° 26′ 38″ N.	01° 16′ 50″ W.
RAF Jetty	Spur Boom	N/A	
Roe Clett	Spur Boom	60° 28′ 56″ N.	01° 17′ 19″ W.

Buoy Description: Body: Yellow Pillar; Character: GP. FL. 4 EV. 12 sec.; Daymark: Yellow St. George's Cross; Range: 3 miles; Light: Yellow.

Notice to Mariners 5/82:

Bight of Haggrister: Mooring buoy. A permanent barge mooring has been established in position: Lat. 60° 24′ 37″ N., Long. 1° 22′ 02″ W. Description: Yellow cylindrical; unlit.

Dumb barges will be permanently moored at the buoy.

Mariners are requested to exercise caution when navigating in the vicinity of these locations.

HYDROGRAPHIC NOTES:

Prohibited Anchorages

1. Owing to the existence of the tanker turning area within the vicinity of Sella Ness and Scatsta Ness, Mariners are advised that anchoring East of a line joining the following positions is prohibited, viz.:

From Position: Lat. 60° 26′ 57″ N., Long. 01° 19′ 17″ W.
To Position: Lat. 60° 26′ 32″ N., Long. 01° 18′ 10″ W.

2. Owing to the existence of an outfall pipe between Skaw Taing and Swarta Taing, all vessels are advised that fishing and anchoring is prohibited within the area bounded by Little Roe and lines produced seawards from two sets of day transit marks diamond in shape and yellow in colour which are established in the following positions:

A: Lat. 60° 29′ 15″ N., Long. 01° 16′ 42″ W.
Lat. 60° 29′ 10″ N., Long. 01° 16′ 44″ W.
B: Lat. 60° 29′ 10″ N., Long. 01° 16′ 17″ W.
Lat. 60° 29′ 06″ N., Long. 01° 16′ 21″ W.

Outfall Marker Buoy – Calback Ness: A yellow spherical navigational buoy with a yellow St. Andrews cross topmark and a radar reflector showing a light GP. FL.4(Y). EV. 12s. has been established in position:

Lat. 60° 29′ 29″ N., Long. 01° 16′ 08″ W.

This buoy marks the seaward end of the ballast water outfall pipe.

Permanent Navigation Marks Tanker Jetties – Sullom Voe

Permanent navigation marks have been established on the mooring dolphins at either extremity of the tanker jetty complex as follows:

No. 1 Jetty East end dolphin in position Lat. 60° 27′ 21″ N., Long. 01° 17′ 02″ W. two fixed red lights vertically disposed 2 m. apart, the lower of which is 5 m. above MHWS. Visible 3 miles.

No. 4 Jetty West end dolphin in position Lat. 60° 27′ 56″ N., Long. 01° 18′ 20″ W. two fixed red lights vertically disposed 2 m. apart, the lower of which is 5 m. above MHWS. Visible 3 miles.

Misuse of VHF Radio:

Owners, Masters and Skippers are reminded to read Merchant Shipping Notice No. M814, which refers to the misuse of VHF Radio.

The improper use of VHF is illegal and can cause serious disruption to communications concerned with the movement of shipping in the port area.

The co-operation of all port users is requested to ensure that such misuse does not occur.

SAFETY: *Smoking:* Smoking is prohibited on vessels during loading operations. Except in 2 or at most 3 smoking rooms allocated by the Master and approved by the Terminal Representative.

Matches and lighters shall not be carried by personnel outside the approved smoking areas, or on the jetties.

Fire Precautions: Every vessel's fire-fighting appliances, (including main and emergency fire pumps) must be kept ready for immediate use.

Before deballasting and loading/discharging operations commence, and during periods when permitted repair work is being carried out, fire hoses must be uncoiled and connected to the fire main with at least one fire pump maintaining pressure on the main.

Jetty Fire-Fighting Facilities: The oil loading jetties are each equipped with 2 independent hose supply systems, one for water alone and the second for either water or foam mixture.

These systems supply hydrants which are spaced out along the jetty access road and jetty head.

Monitors are installed to provide a water curtain in the area of the jetty head and between the access tower and manifold area. Elevated monitors are also positioned at the top of the access and monitor towers. A sprinkler system protects the access tower.

Hose couplings are 2.5 in. standard instantaneous female type and the fire main to the access tower can accept international connections.

The working pressure of the fire system is 250-260 p.s.i. A fire hose connection is situated on the construction jetty to allow fire-fighting tugs to link into the system.

POLLUTION: It will be appreciated that oil spillages are viewed seriously by Government, Local Authorities, Port Authorities and Terminal Operators. Spillages will be investigated by the appropriate authorities and the Master and/or Owner may be liable to prosecution. Delay to the vessel could well arise.

Masters are therefore requested to ensure that every precaution is taken to prevent oil spillages at the Sullom Voe Terminal.

COASTGUARD SERVICES: H.M. Coastguard is the authority responsible for initiating and co-ordinating all sea and coastal search and rescue operations in the Shetland sea area. They also keep in close touch with the S.A.R. organisations of all countries in adjoining sea areas.

Regular stations are maintained at Lerwick M.R.S.C. (Marine Rescue Sub Centre), with a sector office in the Port Administration Building at Sella Ness.

Rescue equipment is maintained and manned by auxiliary coastguards at Baltasound, Mid Yell, Fetlar, Out Skerries, Whalsay, Bressay, Noness, Sumburgh, Fair Isle, Burra Isle, Walls, Sandness, Hillswick and North Roe.

Safety and Weather Information is available through the remote controlled VHF radio sites at Saxavord (Unst), Collafirth, Lerwick and Sumburgh. A 24 hour radio watch is maintained by Lerwick M.R.S.C. (call sign SHETLAND COASTGUARD) on Channel 16 and 2182 kHz, and by Sullom Voe Coastguard (Channel 16) during normal office hours or as required.

This enables safety and distress calls from vessels, up to 40 miles out from Shetland, to be picked up on the Coastguard VHF network. On receiving a call for assistance or advice, the Coastguard can instantly alert the appropriate facility, which might be a military or civilian helicopter, RNLI lifeboat, shore rescue teams or vessels at sea.

Other VHF Channels are 0, 6, 10, 67 (working) and 73.

Civilian SEARCH AND RESCUE HELICOPTERS, based at Sumburgh, are contracted by the Department of Transport (H.M. Coastguard) for long range search and rescue purposes. These helicopters are fitted for winching, and carry comprehensive rescue equipment including a salvage pump and inflatable dinghy capable of being dropped to vessels in distress.

They have a speed of about 100 knots and a range of approximately 150 nautical miles from Sumburgh. Navigation equipment includes V.O.R., I.L.F., Decca A and D/F Console. Communications facilities are:

MF	2182, 3095 and 5693.5 kHz
VHF AM	118/135.95 MHz
VHF FM	Marine Frequencies

A VHF facility through (Compass Head) Sumburgh Aerial on Channels 0, 6, 10, 16, 67 and 73.

MEDICOS: Vessels requiring medical advice or medical assistance should adhere to the radio regulations and contact either Collafirth or Shetland Radio on Channel 16 VHF. If unable to contact the coast radio station, vessels can contact Shetland Coatguard direct on Channel 16 VHF.

R.N.L.I. STATIONS: The following lifeboats are on station:

Lerwick: 58 ft. Arun Lifeboat 'Soldian'.
Details: Speed 18 knots, range – 220 nautical miles.
Navigation – Radar, Decca, D/F etc.
Communications M/F 2182 kHz, 1647.5 kHz, 162.5 kHz.
1827 kHz, 2226 kHz, 2241 kHz.
2306 kHz, 2381 kHz, 2548 kHz.
VHF Channels 0, 6, 8, 9, 10, 12, 14, 16, 27, 67.

Aith: 52 ft. Barnett Class Lifeboat 'John and Frances Macfarlane'.
Details: Speed 9.4 knots, range – 195 nautical miles.
Navigation – Radar, D/F.
Communications M/F 2182 kHz, 1647.5 kHz, 2381 kHz.
2527 kHz.
VHF Channels 0, 6, 12, 14, 16, 27, 67.

All requests for lifeboat or helicopter assistance should be routed through Shetland Coastguard M.R.S.C.

EMERGENCY SERVICES AND PROCEDURES:

Fire	Phone Sullom Voe 242797	VHF Channel 10
Oil Pollution	Phone Sullom Voe 242797	VHF Channel 10
Ambulance	Phone Sullom Voe 242797	VHF Channel 10
Security	Phone Sullom Voe 242797	VHF Channel 10

All emergency services at the oil terminal are co-ordinated by the "Emergency Services Control" situated at the Terminal fire station.

On vessel's arrival at the Terminal, the responsible officer and the Loading Supervisor will discuss action to be taken in an emergency situation. The Master of the vessel should study and comply with the 'Jetty Safety Regulations', a copy of which will be supplied.

Safety inspections will be undertaken by the Loading Supervisor throughout the vessel's stay alongside. Spot checks will also be made by the Terminal emergency services department.

In the event of an emergency, vessels should immediately contact Sullom Voe Port Control 242494/242495/242551 or VHF Channel 10.

SHIPMASTER'S REPORT: December 1981.

It is necessary to provide access to the vessel on the offshore side in the form of accommodation ladder with vessels having high freeboard.

All crew members require passes for shore leave and must use transport from the jetty. This transport is arranged by the security guard in the hut at shore end of jetty.

Usually with moorings it is springs first then breast lines. The Terminal is not concerned with head or stern ropes. Some of the dolphins are fitted with shore based pulley systems and these count as 2 ropes for mooring purposes.

Telephone calls may be made from the Mission (U.K. and International) and paid for in pounds sterling.

REPORT: October 1983.

Gas Carriers: Gas carriers shall conform to the following requirements and the pipe-line operators concerned shall, at the time of nomination, confirm to the terminal operator that the carrier nominated so conforms throughout the time she will be within the port limits.

a. The tanker conforms to the standards required in the EEC memorandum of understanding or to state control.

b. The tanker complies with the Statutory Instrument 1981 No. 1077 Merchant Shipping, Merchant Shipping (Tankers) (EEC requirements) Regulations 1981.

c. The tanker can comply with the conditions of carriage as specified on her IMO Certificate of Fitness.

d. The tanker will during the loading and simultaneously handling of ballast follow the procedures as outlined in her approval trim and stability document.

e. The tanker can be adequately moored to equivalent OCIMF standards, i.e. resisting loads due to any of the following current conditions acting simultaneously with a 60 knot wind from any direction:
3 knots at 0° and 180°
2 knots at 10° and 170°
3/4 knots from direction of maximum beam current loading.

f. The tanker can accept a minimum bulk loading rate per hour of 3 per cent of her total cargo carrying capacity up to a maximum of 3,000 cu.m. per hour.

g. The tanker reliquefaction units are capable of handling a minimum bulk loading rate per hour of 3 per cent of her total cargo carrying capacity up to a maximum of 3,000 cu.m. per hour.
(a) without venting to atmosphere and:
(b) without the use of a vapour return line to shore.

h. All cargo tanks will be cooled down on arrival and the vessel ready to commence loading. Any vessel that cannot comply and requires to purge and/or cooldown prior to loading will only be accepted on the basis of prior agreement having been reached between the terminal operator and the pipe-line group nominating the vessel.

i. That the following tests will be carried out within 24 hours before arrival and any defect, and any change in the status of the systems thereafter, be reported to the Port Authorities:
(a) ventilation of compressor/pump/control room.
(b) gas detection system
(c) emergency shut down system
(d) pressure and temperature control units
(e) cargo tanks' safety relief valves setting.

SHIPMASTER'S REPORT: August 1984.
Vessel: 140,000 d.w.t.
Tugs: Normally 4 tugs for berthing and 2 tugs for sailing, tugs' lines. 2 tugs make fast and 2 push only. On arrival the forward tug requires a heaving line from the main deck for forward then he steams forward to pass his line up through the centre fairlead.
Moorings: Under normal conditions 1st 2 backsprings, then 2 to 3 breasts, then 2 to 3 head/sternlines.
Gangway: Shore gangway.
Departure: On departure Pilot normally boards 1 hour after completion of loading and EDP is used.
Surveyor: Lloyd's Surveyor comes from Aberdeen and requires 2 to 3 days' notice.

AUTHORITY: Shetland Islands Council, Ports and Harbours Department, Port Administration Building, Stella Ness, Mossbank, Graven, Shetland ZE2 9QR. *Tel:* Sullom Voe (0806) 242551. *Telex:* 75142. *Telefax:* Sullom Voe (0806) 242511, ext. 211. *Cables:* Portcontrol Sullomvoe. *Contact:* Director of Ports and Harbours.

SUNDERLAND: 54.55 N. 01.21 W. (See Plan Book)

DOCUMENTS:
Crew List. 1 form I.B.6A to be delivered to an Immigration Officer within 24 hours of arrival.
Passenger Lists. Form P.R.4. in duplicate and Form P.R.10 in duplicate.
Customs Documents. Crew Declaration Form C.142 in duplicate.
Cargo Manifests, triplicate.
Ship's Papers:
Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Derat Certificate.
Customs Light Bills.

PILOTAGE: Call Sunderland Harbour Radio, Channel 16, working Channel for port is 14. Pilotage not compulsory, but advisable for all but small vessels. Pilots maintaining continuous watch on VHF Sound signals for vessel requiring Pilot is Morse Code No. 6. Pilot boards 0.5 to 0.75 mile off piers. In bad weather pilot cutter leads vessel into inner harbour, and Pilot boards there.

ANCHORAGES: 0.5 to 0.75 miles N.E. of Roker Pier Lighthouse.

RESTRICTIONS: Vessels may enter South Dock from 2 hours before until half an hour after high-water. Vessels may lock in outside of these times depending on draft and state of tide. For North Dock and Corporation Quay restrictions depend on draft and state of tide.

MAX. SIZE: South Dock – length 142 m. beam 18.9 m., draft 8.08 m. with Spring tides, 7.16 m. with neap tides.

River – length 183 m., beam – no restriction, draft 8.38 m. subject to siltage.

HEALTH: Pratique procedure: Pratique granted by Port Health Authority on arrival.

Suspected disease or fever: All ships from suspected areas must radio Port Health Authority 24 hours in advance of arrival, stating general condition of crew members. Pratique is automatic when ships arrive from other U.K. ports.

Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats.

TUGS: Join vessel at or outside harbour entrance. Tug's ropes normally used.

BERTHING: In South Dock vessel must arrive from 2 hours before up to 30 minutes after high water. Vessels may lock in as under "Restrictions". At Corporation Quay small vessels berth at any time. Large vessels usually berth at same time as mentioned for South Dock.

Bridge swung to allow vessels to pass through.

BRIDGES: In South Dock bridge swung to allow vessel to pass through. Railway Bridge clearance, 25.1 m. MHWS.

STEVEDORES: The Port of Sunderland Authority carry out all stevedoring. Agents should advise as early as possible in order to arrange berthing and gangs, 5 to 6 days notice if possible. ETA from ship 2-3 days in advance. Working rates of principal commodities are;

Bagged cargoes	15	t.p.h.	
Scrap – fragmented	100	,,	
Scrap – heavy	25	,,	
Chrome and heavy ores	40	,,	
Wood Pulp	30	,,	(loose bale)
Wood Pulp	80/90	,,	(unitised)
Limestone	325	,,	
Containers	15	units per hour	

MEDICAL: Well served with General practitioners and hospital facilities, and attention can be arranged at very short notice. However, unless urgent, 24 hours notice desirable.

TANKERS: 4 installations (lines either 0.16 or 0.2 m.) 3 installations in South Dock and 2 berths, the S.E oil berth 98 m., the S.W. oil berth 89 m. 1 vessel of maximum length 142 m. can use this berth, draft 8.08 m. Spring tides; 7.16 m. Neap tides. At Corporation Quay vessel 183 m. long, draft 8.58 m.

DENSITY: Usually 1025. May be less after heavy rain.

FRESH WATER: Available. Arrangements can be made to supply water at any time.

FUEL: Bunkers supplied at Corporation Quay pipe-line from Petrofina Ltd. All grades available – Corporation Quay and Hendon Dock. Viscosities range from 32 secs. to 3,500 secs., and can be blended to any requirement in this range. 12 hours notice necessary. Rate 250 t.p.h.

GANGWAY/DECK WATCHMEN: Services of watchmen recommended.

OPENING/CLOSING HATCHES: This work is normally carried out by ship's crew, otherwise shore riggers.

CERTIFICATES:
Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Derat Certificate.

CUSTOMS ALLOWANCES: As per H.M. Customs and Excise Regulations.

IDENTIFICATION CARDS: Not required. Must possess valid Seaman's Book and/or Passport.

CONSULS:

Denmark	Tel. Sunderland		670811
Iceland	,,	,,	670811
Finland	,,	,,	672846
France	,,	,,	673694
Netherlands	,,	,,	75441
Norway	,,	,,	670101

REPAIRS: All repairs possible.

DRY DOCKS: One dry dock in use, length 112 m., breadth 16.5 m.
Floating dock, length 65.5 m., breadth 13.72 m.

REPATRIATION: Facilities available for effecting repatriations, with good rail, road and air communications.

AIRPORT: Approximately 20 miles. Newcastle Airport served by regular airlines, all the year round, to all parts of the world. Air UK operate flights to Aberdeen, Amsterdam, Bergen, Copenhagen, Norwich, Paris and Stavanger.

HOLIDAYS: Official Holidays for General Cargo ships: New Year's Day (no work except by special agreement); Good Friday; Easter Monday; May Day; Spring Bank Holiday; Summer Bank Holiday; Christmas Day (no work except by special agreement); Boxing Day (no work except by special agreement).

POLICE/AMBULANCE/FIRE: Police Station Tel. Sunderland 76155; Ambulance Control Tel. Sunderland 72875; Fire Station Tel. Sunderland 56456. Or call 999 from any telephone and ask for service required.

TELEPHONES: Permanent arrangements do not exist, but a temporary arrangement can be made at any time.

AUTHORITY: Port of Sunderland Authority, Barrack Street, Sunderland SR1 2BU. *Tel:* (0783) 40411. *Telex:* 537037. *Contact:* Harbour Master.

SWANSEA: 51.37 N. 03.56 W. (See Plan Book)

DOCUMENTS:
Light Bill receipt.
Crew List.
Manifests.
Bill of Lading copies.
Customs and Health.

PILOTAGE: Compulsory for vessels of 1,500 g.r.t. and above. Request for Swansea Bay Pilots by International Signal Code for Sea Pilots, by telephone call for Dock Pilots. Telegraphic address for Swansea Pilots is "Pilority, Swansea".

Advance notice of ETA required at least 12 hours. VHF Channels 16 and 6. Pilot boat has bright yellow hull with red boot-topping; superstructure painted white. Pilot cutter's sound signal is "SM", 3 short and 2 long blasts. The area of boarding is usually 1 mile S.E. of Mumbles Lighthouse in all weathers. Usual requirements for ladders are in force, and Pilots require ladder to be about 4 ft. to 5 ft. above water.

ANCHORAGE: About 1 mile S.E. of the Mumbles Lighthouse.

RESTRICTIONS: Berthing is in accordance with tide. King's Dock Lock operates for a minimum of 8 hours each tide. River-side berths and Swansea Ferryport Terminal operate over a greater period.

No night-time restriction of entry.

MAX. SIZE: Max. size for entry is 655 ft. long, 86 ft. beam, 32 ft. 6 in. draft.

These vessels are docked over high water period. Any vessel whose dimensions are approaching maximum, or slightly in excess, for port should advise Port Manager well in advance. A vessel with a beam of 87 ft. 04 in. has been accepted.

HEALTH: Usual international health regulations are to be observed. Any vessel which is suspect should inform Port Medical Officer of Health.

RADIO: All communications for ship movements through "Swansea Dock Radio" Channels 16 and 14 VHF. Agents, receivers, etc., can be called through usual coastal radio stations – this includes Ilfracombe Radio.

TUGS: Towage undertaken by private operators. The Alexandra Towing Co. Ltd., at present use a modern fleet of tugs at Swansea and Port Talbot. It is optional whose lines are used, but if tugs line is taken, an extra charge will be made.

BERTHING:

Dock	*Quay Length (Total)* (m.)	*Depth of Water (Absolute Min.)* (m.)	*Maximum Size of Vessel* *Length* (m.)	*Beam* (m.)	*Draft* (m.)	*Approx. d.w.t.*
Kings Dock	2,268	10.1	199	26.5	9.9	30,000
Prince of Wales Dock	1,219	8.1	122	20.7	7.3	—
Queen's Dock	Oil Jetties (Operated by BP Co.)	10.7	199	26.5	9.9	30,000

Roll-on/Roll-off Berth: Situated on the East bank of the River Tawe, this facility provides a 137 m. berth, hinged shore bridge 76 m. long, with a 6 m. roadway. Adequate vehicle marshalling areas and Customs/passenger facilities are available. The nose of the bridge can be lowered through 12.95 m. to allow for variation in tides and ship's flotation.

BULK HANDLING FACILITIES: *Petro Chemicals:* One jetty in Queen's Dock operated by BP Chemicals International Ltd.

Coal: Four coal hoists in the King's Dock, operated by Associated British Ports.

Bulk Cargoes (Sulphur, ores, etc.): Two berths in King's Dock equipped with 5×7.5 ton and 5×10 ton grabbing cranes. Operated by Associated British Ports.

Ferryport: On East bank of River Tawe.

CRANES: 2×25 ton and 9×11.5 ton, 5×7.5 ton and 23×6 ton electric cranes. 6×3 ton mobile cranes also available.

50 fork-lifts up to 11.5 ton and 1 heavy duty fork-lift of 35 tonnes capacity.

BRIDGES: One in dock bridge is under direction of duty Assistant Dock Master. A vessel which has to pass will be informed by the Assistant Dock Master as to the availablity.

STEVEDORES: Stevedoring services are provided wholly by Associated British Ports. Advice of labour requirements must be received by the following times:

General Cargo: By 0700 hrs. to start work at 0700 hrs. By 1030 hrs. to start work at 1130, 1400 or 2200 hrs. same day.

Coal Shipping: By 1530 hrs. for work at 0600 hrs. next day. By 1030 hrs. for work at 1400 hrs. same day.

MEDICAL: Port Medical Officer of Health has an office on King's Dock Lock. Medical attention can be obtained at short notice. In emergencies, the duty Assistant Dock Master can be communicated with, to obtain medical help. Hospital facilities available, and there is a first-class medical centre on the Prince of Wales Dock. Vaccination and fever certificates will be examined when receiving Pratique.

TANKERS: All tankers arriving, working cargo, and departing are required to observe port's Petroleum By-laws and Oil in Navigable Waters Act. British Petroleum Company has further private directives for oil tankers. 5 main tanker berths, 1 petrochemical berth, 2 coastal tanker berths and 2 layby berths in Queen's Dock. 1 tanker/general cargo berth in King's Dock. Deepest draft permitted is 32 ft. 6 in.

Tankers of 1,600 g.r.t. and over to observe Merchant Shipping (Tankers – E.E.C. Requirements) Regulations 1981.

DENSITY: King's Dock Lock density is 1025.

FRESH WATER: Fresh water supplied from hydrants on quays by watermen. Rate of delivery is 2,000 g.p.h., approx., depending on the demand.

FUEL: Various grades of gas oil and diesel can be supplied by barge or road vehicles, or it can be delivered ex-pipeline at Queen's Dock.

FIRE PRECAUTIONS: All matches and lighters must be declared at entrance to oil installation. There are arrangements at the Queen's Dock depot for shore cooking and eating. There is an oil boom between the King's Dock and Queen's Dock to serve as an oil fire break between two docks.

GANGWAY/DECK WATCHMEN: Under Port Regulations, there shall always be on board sufficient men to move or take care of the vessel. Some vessels employ watchmen.

OPENING/CLOSING HATCHES: Normally done by the ship's crew, but if riggers are employed by vessel for general duties they open up hatches.

CERTIFICATES:

Certificate of Freeboard.
Certificate of Registry.
Certificate of Pratique.
Light Bill.
Manifest.
Bill of Health.
Bills of Lading.
AA (1) Certificate.

CUSTOMS ALLOWANCES: At discretion of local H.M. Customs Inspectors.

IDENTIFICATION CARDS: Not compulsory, but they are helpful if a crew member has to identify himself to Authorities.

CONSULS:

France	Tel: Swansea 55274	Norway	Tel: Swansea 50564
Vice-Consuls:			
Belgium	Tel: Swansea 50021	Netherlands	Tel: Swansea 53921
Finland	„ „ 53921	Portugal	„ „ 57757

SURVEYORS: Cargo Inspectors available locally.

Ship Surveyors located in Swansea and Cardiff.

REPAIRS: All types of deck and engine-room repairs are possible.

DRY DOCK: 2 Dry docks in port are entered from King's Dock. Dry docks: "Duke of Edinburgh" 670 ft. × 92 ft.; "Palmers" 560 ft. × 75 ft.

REPATRIATION: Mercantile Marine Office in Swansea where ship's crews are paid-off before Superintendent of Shipping. Necessary arrangements can be made for repatriation through the Consular Channels.

AIRPORT: Nearest airport at Swansea, 8 miles from Docks. Next are Rhoose (Cardiff) and Bristol Airports where regular scheduled flights are handled.

TIME: Local time is British Standard Time which is plus 1 hour to Greenwich Time. Reverting to GMT during Winter months.

HOLIDAYS: Christmas (25th December); Boxing Day (26th December); New Year's Day; Easter, Good Friday and Monday (movable dates); Spring Holiday, May Day, Summer Bank Holiday (both movable dates). No cargo is worked on these days.

POLICE/AMBULANCE/FIRE: Call 999 from any telephone, and ask for service required.

EMERGENCY CO-ORDINATION CENTRE: S.A.R. Centre based at Mumbles. Tel: Swansea 66534.

TELEPHONES: Arrangements at most berths for placing telephones on board ships in port.

BANKS: Lloyd's Bank Ltd., 25 Wind Street, Swansea. Tel: 42771.

Barclays Bank Ltd., 57 Wind Street, Swansea. Tel: 460991.

STORING: See "Prelims" page viii.

1. Yes
2. No interference with cargo work.
3. Yes
4. Yes
5. —
6. Yes.

SHIP SUPPLY SERVICE: It is the practice for pilot cutters of Swansea and Port Talbot to ferry personnel, stores, etc., to vessels offshore and due to dock at the respective ports.

Swansea Pilotage Authority, 90 Exchange Buildings, Swansea SA1 1SY, West Glamorgan, South Wales. Tel: Swansea (0792) 53631. Cables: Pilority.

GENERAL: Entrance lock is 875 ft. in length, 90 ft. across at cope level. The inner sill is 7 ft. higher than the outer sill. The outer sill is 2.8 m. below Admiralty Chart datum (Chart No. 1161).

Tugs are available at the port for in-dock as well as sea towage.

A diver can usually be obtained by enquiry to the A.B.P. Port Engineer, Swansea.

Port Manager: Tel: 50855/200. Port Engineer: Tel: 50855/275. Dock Master and Fire Officer: Tel. 50855/260.

AUTHORITY: Associated British Ports, Harbour Office, Adelaide Street, Swansea, Glamorgan SA1 1QR. *Tel:* (0792) – 50855. *Telex:* 48150. *Contact:* Mr. T. Wilkinson, Port Manager. Captain T. Boyd, Harbour Master.

TEES RIVER: 54.39 N. 01.08 W. (See Plan Book)

PORT LIMITS: The Port facilities extend from the river entrance to the I.C.I. Billingham Oil Jetty 16 km. up river.

Arrival in the port is accepted as time of passing South Gare Lighthouse inward, or time of anchoring in the Tees Bay.

DOCUMENTS: Ship's official papers including:

Register.
Load-line Certificate.
Derat Certificate.
Safety Equipment Certificate.
Radio Safety Certificate.
Construction Safety Certificate.
U.K. Light Dues.
Oil Pollution Certificate. (Tankers).
Crew List.
C14 Ship's Stores List.
C13 Arrival General Declaration.
C142 Crew Declaration.
Tanker Check List (Tankers over 1,600 g.r.t.)

PILOTAGE: The Tees Pilotage District extends from a radius of 5.6 km. seawards of the South Gare Lighthouse, as far up river as Victoria Bridge, Stockton, including Seaton Channel and is under the control of the Tees Pilotage Authority.

Official Address: Tees Pilotage Authority, 13-14 Bridge Street East, Middlesbrough, Cleveland TS2 1NS. Telephone: Middlesbrough 242924/5 (during office hours), Middlesbrough 590747/700829 (after hours). Telegraphic Address: "Tees Pilots, Middlesbrough".

Pilot station is situated at South Gare and pilot cutter on duty is moored there. Cutters are painted blue with white or orange upper structure and fly the pilot flag by day when on duty and International Regulation lights by night. The duty cutter is equipped with VHF Radio, call sign "Tees Pilots" on Channel 16. Radar is also fitted.

As much advance notice of a vessel's arrival as possible should be given to Pilots: minimum requirement for vessel arriving is 1 hour and for vessel sailing 1 hour 15 minutes.

Pilot boards in vicinity of Tees Fairway Buoy although smaller vessels are occasionally boarded off the South Gare lighthouse. During severe weather the duty cutter may move to Tees Dock and the Pilot will board as far seaward as the conditions permit.

Pilotage is not compulsory.

HEALTH: New Regulations. The Public Health (Ships') Regulations in force from 1.4.78.

See "Health – All Ports" before first U.K. port.

RADIO: Ships approaching from the North or at anchor in Tees Bay use Cullercoats Radio. Ships approaching from Southward use Humber Radio or Whitby Radio which is a slave-station to Cullercoats.

VHF Station	*Call sign*	*Channel Fitted (min.)*
Harbour Master's Office	TEES HARBOUR RADIO	22,16,14,12,11,8
Harbour Master's Launch	TEES HARBOUR LAUNCH	16,14,12,11,9,8,6
Tees & Hartlepool Port Authority Maintenance Craft	"NAME"	16,11,6, etc.
Tees Pilot Cutter	TEES PILOTS	16,14,12,9,8,6
Tees Pilot Station (South Gare)		16,14,9
Tees Tugs	NAME	16,14,12,8,6, etc.

Tees Harbour Radio is manned 24 hours per day and is also available to Hartlepool shipping for relaying port operational messages.

Channel	*Use*	*Channel*	*Use*
22	Port Operations	11	Domestic Port Operations
16	Calling and Safety	9	Pilot Port Operations
14	Port Operations	8	Intership
12	Port Operations		

RADAR: 3 scanner sites give full radar coverage from Smiths Dock to Fairway Buoy and up to 20 miles to seaward. Advice/information available to Masters/Pilots at any time. Advice in poor visibility in prescribed form. Call "Tees Harbour Radio". (See "VHF").

APPROACHES: Vessels are prohibited from anchoring:—

(i) inside the dredged channel.
(ii) within a radius of 1,113 m. of the Tees Fairway Buoy.
(iii) within the limits of 2 divergent lines starting and extending from the dredged channel limits 244 m. apart at the South Gare Light Station, to 550 m. apart between their respective points of intersection with the circumference of the circle defined in (ii).

Small vessels can anchor close N.E. of No. 4 Light Buoy: larger vessels at Fairway Buoy and in all cases outside the 20 m. contour. Vessels waiting Pilots anchor in these areas.

Anchoring in the vicinity of the Ekofisk Pipe-line is to be avoided. See Notice to Mariners (Trinity House) No. 2724 of 1977.

RESTRICTIONS: *Traffic Control:* This is operated by the Harbour Master when vessels over 200 m. in length are moving within the river limits. The primary purpose is to allow the subject vessel to negotiate the channel without embarrassment from other traffic. Overtaking/passing is decided by the Harbour Master when circumstances favour such actions.

Restricted Transit Control: This is imposed by the Harbour Master upon vessels carrying certain hazardous cargoes. The subject vessel is intended to proceed from sea to berth or from berth to sea without meeting other traffic. As a consequence such vessel must be restrained from entering the main channel until an 'all clear' route is available. Some regulated passing.

Port Safety Control: Masters of ALL vessels before committing their vessels to the River Tees Channel are required to satisfy the Harbour Master in respect of shipboard equipment by affirming to the following questionnaire:—

Question No. 1: Your vessel is in all respects seaworthy.
Question No. 2: All secondary power or mechanical systems are in operation and *immediately* available in the event of failure of any primary system.
Question No. 3: Steering is under direct manual control.
Question No. 4: Anchors are ready for use.

In view of the controls it is essential for contact to be made with the Harbour Master before considering entering the river, leaving the berth.

VHF Radio use Channels 22, 16 or 14 to contact. Telephone Eston Grange 45 2541. Telex: 58145.

MAX. SIZE: This matter is constantly under review. At present the largest dimensions acceptable are quoted as: Length 305 m. (1,000 ft.); Beam 46 m. (150 ft.); Draft 17 m. (55 ft.). This depends on the berth nominated, tidal influence and prevailing weather.

A vessel with unusual dimensions e.g. oil rig, or any vessel with dimensions approaching the port maxima must be the subject of consultation with the Harbour Master.

TUGS: Official Address: Tees Towing & Co. Ltd., Cleveland Buildings, Queen's Square, Middlesbrough, Cleveland TS2 1NX. Tel. Middlesbrough 247277 day and night.

Fleet of 8 tugs between 1,550 h.p. and 3,650 h.p. Tugs join vessel in Redcar Reach between No. 9 and No. 17 buoys depending on size, draft and destination. Tug's lines may be used at Master's discretion.

Tugs are on duty daily and only available on 6 hours notice for sailing and arriving after normal office hours.

BERTHING: Small vessels can usually berth at any stage of the tide. Deep drafted vessels enter in accordance with the tide.

T.H.P.A. General Cargo Facilities:

Tees Dock: No. 1 Quay. 3 conventional general cargo berths each of 183 m. length, 1 of 174 m. length and 1 of 213 m. length with flush faced quay. Road and rail access to all vessels. Ample cranage and spacious sheds/open ground. Nominal dredged depth 10.9 m. below LAT.

No. 2 quay: Two berths each 183 m. in length have been built and equipped with electric luffing cranes up to 25 tonnes capacity. Nominal dredged depth 10.9 m. below LAT.

BULK HANDLING FACILITIES: *Redcar Ore Terminal:* Handles iron ore imports for British Steel. Berth dredged to nominal 17.25 m. and able to accommodate vessels up to 305 m. in length, approx. 150,000 d.w.t. 3 ore dischargers capable of handling 2,000 t.p.h.

Potash Terminal: Built on the East side of Tees Dock, this terminal is for the export of Potash mined in North Yorkshire. Dredged to a nominal depth of 10.90 m., the quay is intended to accommodate vessels simultaneously. The main loader is capable of 2,000 t.p.h.: A silo on the site has a storage capacity for 56,900 tons.

ROLL-ON/ROLL-OFF FACILITIES: A link span Ro/Ro berth in Tees Dock can accommodate ships of up to 160 m. in length and 23.7 m. beam. Nominal dredged depth of 8.7 m.

Designed for loads up to 182 tonnes (when carried on 4 axles).

CONTAINER FACILITIES: A privately owned (Bell) purpose-built Container Berth utilising a 32 tonne gantry crane is established downstream of Tees Dock.

STEVEDORES: In order to prepare for loading/discharging, i.e. ordering of gangs, transport, etc., it is necessary to give ETA through their Agents not less than 24 hours before arrival.

In Tees berths, the port works 2 shifts daily, i.e. 0600 – 1400 hrs. and 1400 – 2200 hrs. Mondays to Fridays, with voluntary overtime at weekends.

DENSITY: The density of the river water fluctuates with the seasons and rain amount, being between 1015 and 1025 mainly. Below Smith's Docks the fresh water influence is minimal.

FRESH WATER: Plentiful from wharf and small quantities available from tug in emergency, approx. 20 t.p.h.

FUEL: All grades available by road or river delivery. 48 hours notice of requirements is requested for barge delivery.

MEDICAL: All medical facilities available. Vessels requiring doctor to board are advised to give maximum notice. Emergency medical attention can be arranged through VHF radio contact to Tees Harbour Radio on Channels 22, 16 or 14.

GANGWAY/DECK WATCHMEN: Recommended. Majority of berths are tidal with 5 m. range at Springs.

OPENING/CLOSING HATCHES: Always by crew. Riggers available.

TANKER BERTHS:

Name	*Vessel Length* (m.)	*LAT Nominal depth* (m.)	*Remarks*

Clarence/Deep Water Wharves handle tankers also.

CUSTOMS ALLOWANCES: 0.5 lb. tobacco or 200 cigarettes. (0.25 lb. tobacco for coasters). 1 spirit and 1 wine bottle (0.5 bottle spirit and 0.5 bottle wine for coasters).

IDENTIFICATION CARDS: Not used in Tees.

CONSULS: Sweden, Norway, Denmark, Netherlands, West Germany, Finland. Also French Consular Agency.

REPAIRS: Facilities available for all deck or engine repairs.

DRY DOCKS: None.

SURVEYORS: 1. Moore Barrett & Redwood Ltd., and Caleb Brett cargo inspectors available.

2. Lloyd's Register, American Bureau, German Lloyd, Bureau Veritas, Salvage Association, U.S. Salvage, N.K.K., RIMA and Corporation of China available.

AIRPORT: Teesside Airport with regular flights to London, etc. is 12 miles from Middlesbrough Centre.

Air U.K. have flights to Aberdeen, Amsterdam, Bergen, Norwich and Stavanger.

REPATRIATION: All facilities exist.

TIME: GMT in Winter months. BST (GMT plus 1 hour) operates between late March and mid-October as decided by government.

HOLIDAYS: Normal English Bank Holidays. On certain holidays work can be arranged if suitable notice is given.

POLICE/AMBULANCE/FIRE: Telephone 999 in emergency. If no phone available contact the Harbour Master on VHF Radio Channel 16 or 14.

EMERGENCY CO-ORDINATION CENTRE: Maritime Rescue Sub-Centre, Tees. Tel: Redcar (0642) 474639. Telex: 58132.

TELEPHONES: Many berths can be connected to telephone system using coin boxes; a connection charge is made.

STORING: See "Prelims" page viii.

1. Both.
2. Tankers – No.

Storing may take place before or after cargo operations, while all tanks are battened down.

3. No. Distance varies from 100 yards to half mile depending on berth.
4. No.
5. Applicable to spirits, cigarettes, tobacco and bonded meat only.
6. Yes, but normally by suppliers/ship's crew.

AUTHORITY: Tees and Hartlepool Port Authority, Harbour Master's Office, Tees Dock, Grangetown, Middlesbrough, Cleveland TS6 6UD. *Tel:* (0642) 468127. *Telex:* 58145 HM Tees G. *Contact:* Captain P. J. Lewis, Harbour Master.

TETNEY MARINE TERMINAL: 53.32 N. 00.07 E.

LOCATION: *Tetney Marine Terminal* is the deep water crude oil terminal of Crude Oil Terminals (Humber) Limited, operated by Conoco Limited.

The position of the mono-buoy is 53° 32′ 18″ N., 00° 06′ 48″ E., lying in approx. 60 ft. of water at low water and about 2.5 miles offshore.

Tetney is an open roadstead in the entrance of the River Humber on the East coast of England. The tidal rates in the vicinity of the mono-buoy reach 3.5 knots during Spring tides and the direction of the ebb and flood tides is generally East and West respectively. The tidal range varies between 7 ft. and 22.5 ft.

DOCUMENTS: The following documents should be completed for arrival:

Crew Manifest, C142.
Health Declaration, PS1.
Crew List, IB6.
Stores on Board List.

These documents will be handed to the Master of the Conoco work boat who will take them to Immingham for perusal by H.M. Customs and Immigration. On the return trip of the work boat the Agent and Customs will board to clear the vessel and attend to ship's business. Pratique is granted by H.M. Customs when they visit the vessel.

Stores can be taken at the berth provided the Agents are given the order at least 72 hours before arrival.

The Master of the tanker shall notify to the Harbour Master prior to arrival the information required under S.I. 1981 No. 1077, The Merchant Shipping (Tankers) (EEC Requirements) Regulations 1981.

The Master shall hand to the Berthing Controller tanker check list, Logg 22.

PILOTAGE: Vessels are requested to send ETA and draft to Spurn Pilot 12 hours before arrival and any adjustment to that time at least 2 hours before arrival. Spurn Pilots listen continuously on VHF Channel 16 and use Channel 14 as a working frequency.

Additionally, Agents should be advised of ETA 72 hours before arrival and the following information should be included in the cable, arrival draft, size of forecastle centre mooring fairlead, bow to manifold distance and cargo manifold size.

Pilotage is by Humber Pilots who board in the vicinity of the Humber Light Vessel from a fast launch. Additional berthing information can be obtained from Tetney Base.

The Berthing Controller and his Assistant will board as the vessel approaches the mono-buoy and will assist the Pilot in the mooring operation. He will advise the ship's Officers during the mooring operation, hose connection and disconnection, and will act as Company representative throughout the vessel's stay in the berth.

Vessels must provide a pilot ladder with spreaders and grab lines for the Pilot and Berthing Controllers to board and whilst in the berth a suitable gangway with a pilot ladder near the end in order to board from a small boat.

HEALTH: See "Health – All Ports" before first U.K. port.

VHF: There is a VHF station at Tetney which is manned 24 hours a day and has the call sign, 'Tetney Base'. A continuous watch is kept on VHF Channels 16, 19 (161.55/156.95), and 48 (163.00/158.40). Channel allocation is as follows, 16 calling, 19 ship to shore, and 48 port operations. UHF (467.725 MHz) is allocated for use by the Conoco Berthing Controller, Tetney Terminal and the Conoco owned work boats.

The Pilot and Berthing Controllers carry portable VHF hand sets for use during berthing for inter-ship and ship to tug communications, Channel 9 (156.45 MHz).

Portable radios can be provided for vessels not having a VHF set and the Agents should be so informed in order to allow time to dispatch a set to the ship on arrival. A vessel arriving without suitable means of communication and not having informed the Agent of the fact could incur delays.

BERTHING: The following equipment is required to moor and is placed aboard the vessel when the Berthing Controller boards from the Conoco service craft, Spurn Haven:—

1×50 ton or 70 ton S.W.L. alloy steel shackle.
1×60 mm. diameter wire securing strop, overall length 8 m.

In addition to this mooring gear hose hang-off chains and securing equipment is placed aboard at the same time.

On vessels fitted with a SMIT towing bracket, AKD stopper or similar type patent mooring device, this method of mooring will be utilised.

Prior to arrival, size of centre mooring fairlead should be advised and type of mooring and bracket.

The vessel approaches the mono-buoy on a Westerly heading. A messenger (min. 40 mm. diameter) should be lowered to the water and this will be picked up by the Conoco mooring launch "Monogirl" when approx. 150 m. from the mono-buoy. This messenger will be made fast to a 80 mm. × 92 m. polypropylene pick up rope which should be heaved up as the vessel makes the final approach to the buoy. When the chafing chain is in the fairlead the open links are shackled to the wire strops which are turned up on a suitably sited set of bitts.

HOSES: Hoses are taken on the port side and the port derrick (minimum S.W.L. 10 tons) should be rigged and ready for use on arrival.

2×16 in. hoses are taken aboard, manifolds should be 16 in. 150 ASA and 10 in. and 12 in. 150 ASA can be accommodated by the provision of reducers. Should a vessel have any other size of manifold or be unable to provide adaptors to suit one of the sizes, Tetney Terminal will need to be notified at least 72 hours before arrival.

Hose connection and disconnection is carried out by the ships crew under the supervision of the Berthing Controller. Upon completion of discharge the hoses will be filled with sea water by the ship after which disconnection can commence. When the hoses are blanked off they will be hung off until just before sailing when they will be lowered to the Spurn Haven for towing clear.

POLLUTION: It is the Master's responsiblity to see that no oil of any kind is pumped or spilled overboard from his vessel. This includes oil water from the bilges, crude residues from previous voyages or any other matter that may result in the pollution of the sea. Owners and Masters should comply with any international regulations and recommendations concerning the prevention of pollution of the sea, especially in regard to the river Humber.

SHORE LEAVE: None of the officers or crew shall be allowed shore leave and no boats of any kind, except in an emergency, shall be lowered during the vessel's stay in the berth.

OPERATOR: Tetney Marine Terminal, Crude Oil Terminals (Humber) Ltd., Tetney Lock Road, Tetney, Nr. Grimsby, South Humberside DN36 5NX. *Tel:* (0472) 814101. *Telex:* 527055 Coth G. *Contact:* Captain B. R. Stephenson, Harbour Master & Terminal Superintendent.

TYNE DISTRICT: 55.01 N. 01.24 W. (See Plan Book)

(Including Newcastle, North and South Shields, Jarrow, Tynemouth, Wallsend and Gateshead).

PORT OPERATIONS AND INFORMATION SERVICE: VHF: Call sign "Tyne Harbour Radio" on Channel 16, frequency 156.80 MHz and on Channel 12, frequency 156.60 mHz. The control station is situated at the Harbour Master's Office, North Shields (Tel: 0632 – 572080, 570407), and is manned on a 24 hour basis. Vessels must obtain permission by VHF from the control station before entering the port, similar permisson must be obtained before movement within, or before sailing from the port. A service is provided for the passing of information to shipowners and Agents.

DOCUMENTS:

1 Crew List for H.M. Immigration Office.
1 Form C.142 (Tobacco List) supplied by H.M. Customs.
1 List of Private Addressed Packages not manifested (C.143) supplied by H.M. Customs.

Details of Oil in double bottom tanks, also measurement in cubic feet of cargo in non-registered spaces.

PILOTAGE: Pilots normally board outside Harbour entrance within 1 mile radius. In bad weather Pilots will advise concerning entering. 12 hours advance notice via Agent requested. Frequency medium wave 2182 kHz. Call "Tyne Pilots". VHF – Call on Channel 16, working Channel 9. Cutter – 55 ft. in length painted black with white lettering "Pilots" – displaying pilot's flag. Efficient pilot ladder required as per Board of Trade regulations.

ANCHORAGE: Off entrance River Tyne, recommended 1.5 mile N.E. of North Pier. Minimum 12 fathoms.

RESTRICTIONS: Depths below Chart Datum (L.A.T.) from piers to Jarrow Quay Corner 8.61 m. thence to West end of Jarrow Staith 6.0 m., thence to Swing Bridge 5.2 m. (except in main channels of Swing Bridge and High Level Bridge) thence to Redheugh Bridge 5.61 m. West of Redheugh Bridge there is no authorised dredged depth.

MAX. SIZE: Harbour entrance, length and breadth: no limit. Draft 8.0 m. any state of tide: up to 11.0 m. at high water.

Riverside Quay, draft up to 10.00 m.
Esso Oil Terminal, draft up to 9.00 m.
Newcastle Quay, 27 – 28 berths – 7.5 m.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio W/T "GCC." Cullercoats Radio On R/T.

TUGS: Normally join inside piers, tow ropes optional except manufactured of man-made fibres. Orders for week-end arrivals must be given before 1030 hrs. Saturday. Rates on application to Tyne Tugs Ltd. Tel: South Shields 553361.

BERTHING:

Albert Edward Dock:

Warehouse Quay: 356 m. long, depth of water 7.9 m.
East Dock Wall: 162 m. long, depth of water 7.9 m.
Ro-Ro Berth No. 1, East Dock Wall: depth of water 7.5 m.
Heavy Load Berth (Ro-Ro No. 2) for heavy unit loads on transporters up to 510 tonnes; depth of water 7.9 m.
Tyne Commission Quay: 335 m. long, depth of water 7.11 m.
Tyne Commission Quay Extension: 118 m. long, depth 6.21 m.

Car Ferry Terminal:

Ro-Ro No. 3: 180 m. long, depth of water 7.11 m.
Ro-Ro No. 4: 140 m. long, depth of water 7.5 m.
Whitehill Point Jetty: 90 m. long, depth of water 5.5 m.

Tyne Dock:

North West Quay: 243 m. long, depth of water 8.2 m.
Factory Quay: 196 m. long, depth of water 7.0 m.
Riverside Quay: 384 m. long, depth of water 10.5 m.
Tynegrain Ltd. (Extension of Riverside Quay): Terminal, 26,000 tonnes silo capacity. Loading rate 1,000 tonnes per hour. Max. size 40,000 d.w.t. Depth of water 10.51 m.

Newcastle Quay:

Spillers Tyne Mill: 237 m. long, depth of water 8.01 m., discharge rate 150 tonnes per hour. Silo capacity 34,000 tons.

Jarrow Staith: 2 berths, depth of water 7.11 m. Loading rate 500 tonnes per hour East berth, 250 tonnes per hour West berth.

Harton Staith: 1 berth, depth of water 6.4 m.

TANKERS:

Esso Petroleum Company Limited, Howdon:–
Ocean Jetty: 274 m. long, depth of water 9.51 m.
Coaster Jetty: 167 m. long, depth of water 6.0 m.
Shell U.K. Ltd. Jarrow Oil Jetty: Length 189 m. Depth 7.0 m.
Rohm & Haas Ltd. Jarrow: Chemical Berth, length 180 m. Depth 5.6 m.
Velva Liquids Limited, South Shields: 170 m. long, depth of water 8.0 m.
Velva Liquids Limited, North Shields: 248 m. long, depth of water 7.11 m.
Tanker Cleaning Berth Howdon: 248 m. long, depth of water 7.11 m.

Services: The tanker-cleaning berth at North Shields provides accommodation for vessels about 248 m. length, depth alongside 7.11 m. below Chart Datum. The shore installation, which is owned and operated by the Tyne Tanker Cleaning Co. Ltd., includes large reception capacity for tank washing and oily sludge, separators of the latest type which can deal with oily water at the rate of 1,000 t.p.h. and various treatment and storage tanks; together with boilers and steam pumping plant. Expert staff and modern equipment for carrying out tank washing, cleaning and gas-freeing of vessels at the berth, and for other essential duties are also available, making it possible for tanker crews to be paid off immediately on arrival. The whole installation is protected by a most complete system of fire precautions and fire-fighting equipment.

BRIDGES: At Newcastle 10 miles from entrance, Swing Bridge negotiated against tide; other bridges, max. mast height 24.7 m. above MHWS.

STEVEDORES: Principal Stevedores Port of Tyne Authority. All arrangements through Agent. Stowage plan required prior to arrival.

Plant pool as follows:–

Albert Edward Dock:

Warehouse Quay – 7 cranes, 6 tonnes – 30 tonnes.
East Dock Wall – 3 cranes, 5 tonnes.
Tyne Commission Quay – 5 cranes, 3 tonnes – 40 tonnes.
Tyne Commission Quay Extension – 2 cranes, 6 tonnes.
Ro-Ro Berths – 4 terminal tractors.

Tyne Dock:

Riverside Quay – 7 cranes, 6 tonnes – 12 tonnes.
North West Quay – 5 cranes, 5 tonnes – 10 tonnes.
Factory Quay – 2 cranes, 3 tonnes.

There is a pool of 40 fork lift trucks of 5,000 lbs. - 25 tonnes. capacity available for any location. These trucks can be fitted with attachments for handling paper, pulp, etc.

Also see "Dry Docks".

MEDICAL: Hospitals available, Advise Agent in advance if medical attention required on arrival.

DENSITY: Entrance/Tyne Dock – 1025; Tyne Dock/Jarrow 1020; Newcastle Quay 1005/1010.

FRESH WATER: Available ex-water boat, rate of delivery up to 150 t.p.h.

FUEL: All grades ex-installation, or by barge, 24 hours notice required.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: Crew allowed open and close.

CERTIFICATES:

Register.
Load-line.
Safety Construction.
Safety Equipment.
Safety Radio.
Trinity Light Bills.

CUSTOMS ALLOWANCES: At the discretion of Local Customs Inspector. Normal allowances are equivalent of 0.5 lb. tobacco per man and equivalent to 1 bottle wine per man. Allowances may be halved for home trade vessels. Vessels in port more than 3 or 4 days may receive extra allowances.

IDENTIFICATION CARDS: Required by crews of passenger vessels at Terminal Berths at North Shields.

Ellefsen Marine Limited, 119 Jesmond Road, Newcastle Upon Tyne NE2 1NL.

Gillie & Blair Limited, Proctor House, Side, Newcastle Upon Tyne NE1 3JE.

DEVELOPMENTS: *Coal Handling Plant at Tyne Dock:* The Port of Tyne Authority is engaged in constructing a new coal handling and shipping terminal on a 20 acre site in the recently reclaimed Jarrow Slake, Tyne Dock. The terminal, in conjunction with the National Coal Board, has the capacity to handle 4 m. tonnes per annum and will provide ground stocking facilities for 150,000 tonnes of coal. The target date for the completion of the plant is the end of 1984.

Coal will be delivered by British Rail via the rail connection servicing Tyne Dock. Two new spur lines with head shunt will be constructed and all rail and ancillary works will be carried out to the standards and requirements of British Rail.

The wagon discharging point, consisting of a rail track running over a discharge hopper will be capable of accommodating the contents of a 46 tonne H.A.A. hopper mineral wagon. Coal trains will be marshalled through the wagon discharge point on a "Merry-Go-Round" principle using a locomotive and automatic line side wagon discharging equipment.

The coal will be discharged from the hopper onto wide flat belt feeder conveyors whence it will be delivered by succeeding conveyors to a travelling, slewing and luffing stacker which will form two parallel stockpiles.

Alternatively, the coal may by-pass the stockpiles and be directed through the stacker directly to the shiploading point. Reclamation from the stockpiles will be by a bucket wheel reclaimer capable of blending and homogenising the coal whilst reclaiming over the surface area of the stockpiles. The machine will reclaim coal to its own main line belt and the coal will be transported by succeeding conveyors to a wharfside shiploader mounted on a dolphin type berthing structure capable of accommodating vessels of approximately 25,000 tonnes d.w.t. in a berth dredged to 10.5 m. below Chart Datum. The three berthing dolphins have vertical steel piles with rubber cell fenders to the rear. The berth is designed for subsequent deepening to cater for 50,000 tonnes d.w.t. vessels.

The loading of the main conveyor and stock recovery conveyors will be controlled automatically to ensure the shiploader cannot be overloaded. Incorporated in the conveyor system will be 3 automatic belt weighers and an approved type of sampling equipment. In the event of the shiploader not being used the coal will be delivered to stock and the control of the plant will revert to a separate control room providing a vantage point from which each conveyor system can be directed.

The plant is designed to load vessels at 2,800 tonnes/p.h.

Length of berth, 210 m. Dredged width of berth 25 m. Depth of berth 10.5 m. below Chart Datum. Approaches to berth 8.6 m. below Chart Datum.

For stores, etc., access to vessel by motor is available from the centre of the berth.

AUTHORITY: Port of Tyne Authority, Bewick Street, Newcastle upon Tyne, NE1 5HS. *Tel:* 325541. *Telex:* 53595. *Contact:* Mr. E. W. Oakes, Commercial Director.

AGENT: Lambert Brothers Ship Agencies Ltd., 'D' Floor, Milburn House, Dean Street, Newcastle Upon Tyne, NE1 1LY. Tel: Newcastle (0632) 327341. Telex: 53405. Cable address: "Lambros."

WARRENPOINT: 54.06 N. 06.16 W. (See Plan Book)

PORT LIMITS: Seaward to a line from Ryland River (South Coast) to Ross Memorial (North Coast) approximately 3,000 m. from Warrenpoint.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
1 Store List.
Vessel's Papers and Certificates.
1 Manifest or Bill of Lading.

PILOTAGE: Not compulsory. Pilot station at Greencastle Pier at entrance (North side) to Carlingford Lough. VHF (Warrenpoint Pilot) radio, Channels 16 and 12. Notice to Agents of ETA at 48 hours and 24 hours.

ANCHORAGES: Safe anchorage at Fairmont Roads S.E. Greenore and also inside Carlingford Lough N.W. of No. 13 Buoy.

RESTRICTIONS: None except draft of vessel. Advise Agents.

HEALTH: No certificate necessary. In event of disease or fever contact Agent in advance. Hospitals available.

Also see "Health-All ports" before first UK port.

RADIO: All messages to Agents through Portpatrick Radio or Anglesea Radio.

VHF: Pilot station (Warrenpoint Pilot) and Port Radio (Warrenpoint Harbour) on Channels 16 and 12.

TUGS: None.

BERTHING: All berths except Town Dock have 17 ft. at LWOST.

STEVEDORES: Warrenpoint Harbour Authority. Telephone: Warrenpoint 3381. Telex: 74660

CARGO HANDLING FACILITIES:
2×35 tonne Liebherr Transporter Container Cranes;
2 Poclain HC300 Hydraulic Cranes;
1 Jones 971 HLB Dockside Crane;
2 Babcock Wilcox Luffing Grabbing Cranes.

BULK CARGO FACILITIES: Coal – 2 Luffing Grabbing Cranes at 150 t.p.h.

Grain discharged at up to 250 t.p.h. to Grain Silo of 8 bins, total capacity about 4,800 tonnes. Flat grain store capacity 4,000 tonnes also available.

SPECIALISED CARGO HANDLING FACILITIES: Roll-on/Roll-off berth with 15 ft. at LWOST. Bridge has HA loading. Ramp 6 m. wide Marshalling area about 8 acres.

FUEL: Available by road tankers. 48 hours notice usually required.

FRESH WATER: Available from pipes on quay.

CONSULS: None.

REPAIRS: Small repairs can be undertaken.

DRY DOCKS: None.

SURVEYORS: Lloyd's – Jos. Fisher & Sons, Ltd. Warrenpoint 3500.

GANGWAY/DECK WATCHMEN: Neither compulsory nor necessary.

HATCHES: Opening and closing by crew.

CUSTOMS ALLOWANCES: As permitted by UK Customs and Excise.

CARGO GEAR: Ship's gear only used if shore cranes not available.

REPATRIATION: Airports (Belfast and Dublin) 2 hours away. Transport available. By sea – Belfast 1 hour.

AIRPORTS: Belfast (Aldergrove) 60 miles. Dublin 75 miles. Schedule flights daily to London.

TIME: GMT. GMT plus 1 hour in Summer.

HOLIDAYS: New Year's Day; St. Patrick's Day (17th March); Easter Monday and Easter Tuesday; 1st Monday in May; 12th July; 13th July; 15th August; Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.

TELEPHONES: Not possible to place telephones on board.

SERVICES: Check with Agents. Most services can be supplied given 24 hours' notice.

SHORE LEAVE: After clearance inwards, Crew members allowed ashore without restriction. No passes issued.

DELAYS: Delays in loading or discharging are minimal and infrequent.

AUTHORITY: Warrenpoint Harbour Authority, The Docks, Warrenpoint, Northern Ireland. *Tel:* 3381/3382. *Telex:* 74660. *Cables:* Harbour Authority. *Contact:* A. J. McGuffin, General Manager/Harbour Master.

AGENT: Samuel Stewart and Co. Ltd., The Docks, Warrenpoint. Tel: (069372) 2215. After hours: (0693) 5223, (069372) 793991, (069372) 669356. Telex: 747092.

WATCHET: 51.11 N. 03.20 W. (See Plan Book)

DOCUMENTS: Crew List, Store List, Ship's Register, Manifest or Bills of Lading.

PILOTAGE: Trinity House Outport District, Compulsory, ETA 24 hrs. before arrival to Harbour Master's Office, Watchet 31264, after hours Minehead 3430.

ANCHORAGE: Safe anchorage Blue Anchor Road.

RESTRICTIONS: Accordance with state of tide and draft. Vessels enter 2 hours before HW.

MAX. SIZE: Max. permissible length 97 m., breadth 16 m., draft restrictions according the height of tides, max. draft Neap tides 12 ft. and Spring tides 14 ft. – 16 ft.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: It is best for vessels to give ETA by R/T to Lands End or Ilfracombe Radio.

VHF: Watchet Radio Channels 16, 12, 14 and 9.

TUGS: None.

BERTHING: 2 quays, 1 of 150 m., 1 of 120 m.

CRANES: 3 cranes, 2×5 tons, 1×10 tons.

BULK CARGO: Cranes with grabs.

STEVEDORES: Watchet Marine Ltd.

MEDICAL: Port Doctor in Watchet.

DENSITY: Salt 90%.

FRESH WATER: Available on the quay.

FUEL: All grades, advance notice required.

FIRE PRECAUTIONS: Normal port precautions.

CONSULS: At Bristol.

REPAIRS: Normal repairs to ships possible notice required.

SURVEYORS: West Marine Surveyors & Consultants Limited, Consulting Marine Surveyors, Engineers & Naval Architects, The Old Custom House, Brixham, South Devon. Tel: Brixham (Std 080 45) 2604. After normal office hours Tel: 0803 842925. Cables: Surveyor, Brixham. Telex: 42962 – Survey G.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: Decided by the Customs Officer in charge.

CARGO GEAR: Shore gear, cranes and forklifts.

REPATRIATION: Facilities exist for crew changes.

AIRPORT: Nearest airport at Bristol.

TIME: GMT and British Summertime.

HOLIDAYS: Cargo work can be arranged.

POLICE/AMBULANCE/FIRE: Phone 999 for all three services.

TELEPHONES: None on quay.

SERVICES: Chandler available.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: None required.

DEVELOPMENTS: New warehouse and lorry park.

AUTHORITY: West Somerset District Council, East Wharf, Watchet, Somerset. *Tel:* 31264. *Cables:* Port of Watchet. *Contact:* Captain C. Muller.

WHITEHAVEN: 54.33 N. 03.36 W. (See Plan Book)

DOCUMENTS: Usual required for clearing a vessel from foreign port, i.e. Crew list, Passenger list, Customs Documents, Ship's Register, Manifest and Bills of Lading.

PILOTAGE: Request for Pilot is made by International Code signal G, sound and visual. ETA should be sent 12 hours in advance either to ship's Agent or Harbour Master or both. Area for taking Pilot on board 4 to 5 cables West of Harbour. Pilot boats are Trinity House Pilot Boats – "Viking" and "Cumbria". VHF is installed.

ANCHORAGE: Same area as for boarding Pilot according to draft.

RESTRICTIONS: Vessels may dock from 1.5 hours before HW till 1 hour after HW according to draft.

MAX. SIZE: 270 ft. length, 40 ft. beam and 17 ft. draft (deepest) on Spring tides, 14 ft. draft (deepest) on Neap tides.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Port Patrick and Anglesey Radio Stations.

TUGS: No tugs.

CRANES:
2×10 tonnes lifting capacity.
1×15 tonnes lifting capacity.
2×5 tonnes lifting capacity.

MEDICAL: Agent should receive notice in advance of any medical treatment required. Hospital services are readily available.

DENSITY: Any state of tide density is 1025.

FRESH WATER: Fresh water is available on all berths, any quantity on request to ship's Agent.

FUEL: Most grades and types available.

FIRE PRECAUTIONS: Usual precautions are taken when inflammable cargo is being loaded or discharged.

GANGWAY/DECK WATCHMEN: Advisable to have a watchman but not absolutely necessary.

OPENING/CLOSING HATCHES: Always opened and closed by crew.

CERTIFICATES: Derat Certificate, Load Line Certificate, Radio R/T Certificate, etc.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle spirits.

IDENTIFICATION CARDS: None required.

CONSULS: Norway, Sweden, Denmark and the Netherlands.

REPAIRS: All types of deck and engine repairs carried out.

REPATRIATION: Facilities exist for effecting crew changes and arranging any necessary repatriations.

AIRPORTS: Nearest airports are at Manchester, Newcastle and Prestwick, all approx. 130 miles away.

HOLIDAYS: Cargo may be worked on following days: New Year's Day, Good Friday, Easter Monday, Whit Monday, August Monday, Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Telephone numbers of these services in order are: Whitehaven 2616, 3181 and 2151.

TELEPHONES: No special arrangements exist for placing telephones on board vessels.

SHORE LEAVE: Crew members may come and go at all times.

DELAYS: There are very seldom any delays in berthing and none in loading, discharging or bunkering.

AUTHORITY: Whitehaven Harbour Commissioners, Harbour Office, Pears House, 1 Duke Street, Whitehaven, Cumbria. *Tel:* Whitehaven 2435. *Contact:* Captain J. A. Hogg, Harbour Master (*Tel:* 2436). R. W. Crosbie, General Manager.

WHITSTABLE: 51.21 N. 01.02 E. (See Plan Book)

PILOTAGE: Pilotage is available but Pilots must be ordered through the Lloyd's Agent. A minimum of 4 hours notice is required as Pilots are from Dover.

APPROACHES: Vessels are advised to arrive at the Whitstable Street Buoy not later than 1.5 hours before HW.

To ensure that vessel's approach on the correct heading, (122.5°), and to assist in identifying the entrance, the Whitstable Oyster Buoy has been established in a position bearing 310°×1,950 ft. from the light on the Dolphin on the Western side of the Harbour. This is a red can, flashing 2 red every 10 seconds.

The entrance to the Harbour is marked by a Sector Light fixed to the West Quay Dolphin and shows White, Green and Red. The outer end of the East Quay is marked by 2 fixed Vertical Red Lights. There are fixed Red Leading Lights on the South Quay bearing 122.5° from seaward. *Harbour Signals:* A fixed Red Light shown below the fixed Harbour White Light at night means entry of vessels is prohibited. A fixed White Light *only* means Port open for entry.

MAX. SIZE: The Harbour is tidal and dries out at LW with berths of soft mud capable of accepting vessels of up to 2,000 tonnes capacity. There are 4 quays having a total overall length of 2,205 ft. (679 m.), with accommodation for up to 8 vessels at drafts of 15 ft. 6 in. (4.72 m.) at Spring Tides and 12 ft. 0 in. (3.66 m.) at Neap Tides.

VHF: Ship to shore communication is maintained by VHF Radio, the call sign being "Whitstable Harbour Radio", listening on Channel 16 and working Channels 12 and 9. The station is manned for 3 hours before HW to 1 hour after HW and daily from 0800 hrs. – 1700 hrs.

In Event of VHF Breakdown: On Day Tides between the hours of sunrise to sunset (from 3 hours before until 1 hour after HW), a Docking Light Signal may be in operation, exhibited from the Light Tower in position Lat: 51° 21′ 48″ N., Long: 01° 01′ 39″ E. Character to indicate Port Closed: Fixed White. Character to indicate Port Open and Clear for Entry: One flash every 3 seconds.

TUGS: The services of a tug can be made available via Lloyd's Agent. 24 hours notice is required.

BERTHING:
East Quay: Length 900 ft. (274 m.). 3 berths.
Storage – Transit Shed 12,000 sq.ft. (1,115 sq.m.)
Warehouse 4,000 sq.ft. (371 sq.m.)
Bins – Stone, Slag and Ballast at Inner Berth.
South Quay: Length 500 ft. (152.4 m.). 2 berths.
Storage – 1. Warehouse 9,000 sq.ft. (836 sq.m.)
2. Warehouse 7,000 sq.ft. (650 sq.m.)
Open Storage – Bulk Stone etc. – 2,000 tonnes.
Open Storage and Trailer Park – 5,000 sq.ft. (464 sq.m.)
North Quay: Length 205 ft. (62.5 m.). 1 berth.
West Quay: Length 600 ft. (183 m.), width 130 ft. (40 m.).
Storage – Warehouse 19,000 sq.ft. (1,765 sq.m.)

Depth of Water:

Quay:	*HWS*	*HWN*
North	13 ft. 6 in. (4.11 m.)	10 ft. (3.05 m.)
South	15 ft. 6 in. (4.72 m.)	12 ft. (3.66 m.)
East	15 ft. 6 in. (4.72 m.)	12 ft. (3.66 m.)
West	15 ft. 6 in. (4.72 m.)	12 ft. (3.66 m.)

CRANES: Cranes are privately owned and consist of 4 mobile cranes on tracks. SWL up to 10 tonnes.
FRESH WATER: Available.
FUEL: Available.
AUTHORITY: Canterbury City Council, Harbour Office, Whitstable Harbour, Whitstable, Kent CT5 1AB. *Tel:* Whitstable 274086. *Contact:* Commander F. J. Bloom, Harbour Master.

WORKINGTON: 54.39 N. 03.34 W.

DOCUMENTS: Standard U.K. documents.
PILOTAGE: Compulsory. Minimum notice 12 hours via vessel's Agents. Pilot boards 1 mile West of entrance.
ANCHORAGES: 1.5 miles to 2 miles N.W. of the entrance.
MAX. SIZE: 10,000 d.w.t., length 137.2 m. beam 62 ft. and draft 25 ft.
HEALTH: Standard U.K. procedure.
VHF: Workington Harbour Radio operates on Channels 16, 14 and 11. A listening watch is maintained daily from 2.5 hours before HW until 2 hours after HW.
TUGS: Vessels over 92 m. LOA shall, if the Harbour Master requires, be assisted by a tug. A tug is permanently based at the port and is available at 24 hours' notice.
BERTHING: *Tidal Harbour:* 853 m. of quayage for fishing vessels and other small craft. Depths are from 4.1 m. Neap tides to 7.2 m. Spring tides.

Prince of Wales Dock: Enclosed dock, width of entrance 21.2 m. There is 772.7 m. of quay frontage with depths from 7.2 m. Neaps to 10.2 m. Springs. The dock is 97.8 m. wide at the West end, 76.2 m. at the East end. There is a transit shed situated at the general cargo berth.
CRANES: 3 × 7 tonnes and 2 × 10 tonnes cranes are available. There is a Scotch derrick of 28 tonnes capacity.
BULK CARGO FACILITIES: The new automated coal terminal is capable of handling 1,750 tonnes of coal per hour.
SPECIALISED CARGO HANDLING FACILITIES: Ro/Ro facility available.
STEVEDORES: Normal working 0800 – 1700 hrs. with 3 hours evening overtime if requested.
FRESH WATER: Available.
FUEL: Available.
TIME: GMT plus 1 hour (late March – late October), otherwise GMT.
AUTHORITY: Cumbria County Council, Port of Workington, Dock Office, Workington, Cumbria CA14 2JH. *Tel:* (0900) 2301. *Telex:* 64253. *Contact:* Captain D. C. Thomas, Harbour Master and General Manager.

NOTES

Please also advise Shipping Guides Ltd.

United States of America

GENERAL

AGRICULTURE: All ports.

Arrival Notification: The vessel's Master or port Agent must notify the U.S. Department of Agriculture (USDA) Inspector at each port of arrival of expected time and location of arrival.

Documents: The cargo, stores, and crews' effects lists or manifests must be available for review by the boarding USDA Inspector.

Inspection: The USDA Inspector will examine the galleys, storerooms, lockers, mess areas, and crew quarters in some instances for prohibited plant materials (fruits, vegetables, and plants) and meat products. Some categories of food materials may require being placed under seal. Also, inspections may be made of onboard cargo and cargo holds.

Garbage: All food wastes aboard vessels arriving from foreign or offshore areas (except Canada) must be handled in accordance with USDA regulations. Garbage must be held aboard vessels in leakproof, covered containers for later disposal or, it may be removed with permission and under supervision of a USDA Inspector for disposition in approved facilities. Dumping in territorial waters or unauthorised garbage removal is unlawful and may subject the vessel operator to civil *or* criminal penalties.

Treatments: If quarantine-significant pests are found aboard a vessel, an Emergency Action Notification may be issued to the Master. It will prescribe what treatments are required to the affected articles or area of the vessel and when this treatment must be accomplished.

Honeybees: Honeybees may not be brought into the United States. This is a precaution to keep out Africanised bees, which could gravely upset beekeeping in North America. Do not disturb any signs of bees on board, such as live swarms, dead bees, or hives. Contact the ship's Agent before entering U.S. ports for appropriate instructions regarding disposal and treatment from the USDA inspector.

Animals/birds: All live animals or birds aboard vessels must be retained onboard and reported to the USDA Inspector.

For additional information: Write to "Quarantines", U.S. Department of Agriculture, Federal Building, Hyattsville, MD 20782.

HEALTH: All ports.

The U.S. Public Health Service does not maintain Quarantine Stations at each port of entry. The smaller ports are under the jurisdiction of Quarantine Stations located at strategic ports of entry. Matters of public health significance occurring on vessels destined to ports not manned by Public Health Service personnel should be reported to the Quarantine Station having jurisdiction over that port.

The U.S. Public Health Service Division of Quarantine is also responsible for Ports in Puerto Rico and the U.S. Virgin Islands.

Masters of Vessels arriving at United States ports

Effective July 1, 1973, Radio Pratique as a method of quarantine clearance was discontinued at all ports under control of the United States.

Vessels Subject to Public Health Inspection

Only vessels in the following categories will be subject to onboard public health inspection upon arrival or during stay at ports under control of the United States:

A. Crew or passengers having:

1. Temperature of 100° F (38° C) or greater (a) which persisted for 2 days or more; or (b) which was accompanied or followed by any one or all of the following: rash, jaundice, glandular swelling; or
2. Diarrhoea severe enough to interfere with work or normal activity; or
3. On board occurrence of death, regardless of the signs and symptoms above.

B. Vessels which have been in a plague infected Port in the 60 days prior to arrival in the United States.

Procedures. In accordance with regulations you must inform the quarantine station, through your vessel Agent, at or nearest the intended port of your vessel's first arrival in the United States of the occurrence of illness as specified in A above. Based on information you provide your Agent, or information your Agent already possesses regarding your vessel's itinerary, your Agent will notify the quarantine station if your itinerary included a plague infected country. Arriving vessels no longer need to complete a Maritime Public Health Declaration.

These changes reflect our confidence that you will continue to report, in advance of arrival in the United States, the on-board occurrence of: death; or illness compatible with the signs and symptoms specified above; or death or illness while in port if such occurs after arrival.

COMMUNIST FLAG VESSELS:

SHIPPING AGENT GUIDELINES
UNITED STATES
PORT ENTRY REQUIREMENTS
FOR
COMMUNIST FLAG, CHARTERED AND
CREWED VESSELS
REVISED NOVEMBER 1982
PREVIOUS EDITIONS OBSOLETE
Issued by Department of Transportation
U.S. Coast Guard (G-WPE-2/16)
2100 2nd Street S.W.
Washington, DC 20593

1. GENERAL PROVISIONS

A. *INTRODUCTION:*

The purpose of this document is to clarify and explain administrative procedures for affected vessels. This document is intended to provide primary assistance to shipping Agents in arranging entry into United States ports for vessels they represent.

This document provides guidance for entry by commercial maritime vessels of certain nations into United States ports. These nations are Bulgaria, Czechoslovakia, German Democratic Republic, Hungary, Poland, Romania, Union of Soviet Socialist Republics, and the People's Republic of China. The requirements apply to the Owner, Master, Agent or person in charge of commercial maritime vessels of these nations. The requirements apply also to the commercial maritime vessels of other nations which are owned by, chartered to or employ citizens of these nations. Adherence to these requirements will facilitate legitimate entry of the vessels to which the requirements apply. The requirements do not apply to entry by public vessels of these nations. Public vessel entry applications are handled only on a government-to-government basis.

Access to U.S. ports by any foreign vessel is subject to compliance with applicable laws and regulations of the Federal Government and of state and local authorities in the areas wherein they have jurisdiction. United States port entry procedures and applicable Federal laws and regulations apply generally to all foreign vessels. Specific mention is made in this document of those limited instances where commercial maritime vessels of certain nations are treated differently from other foreign vessels.

National security interests require that the movement of any vessel within the territorial waters of the United States be subject to U.S. Government review. Authority for this is found in Title 50, United States Code, Section 191, Executive Order 10173 as amended, and Title 33, Code of Federal Regulations, Part 6. These authorities are exercised by the U.S. Coast Guard. The requirements herein are intended to expedite this review for vessels to which the requirements apply.

Additionally, these requirements implement and support provisions of treaties, conventions, agreements and similar instruments in force between the government of the United States and the governments of certain nations concerning maritime matters. Interested parties are advised that Title 1, United States Code, Section 112a directs the Secretary of State to compile a publication *"United States Treaties and Other International Agreements* (UST) which shall contain all treaties to which the United States is a party . . ." It also states that the UST "shall be legal evidence of the treaties, . . . in all courts of the United States, . . ." In some instances, these instruments and supporting documents state specific procedures for entry to United States ports, and should be consulted for a complete understanding of requirements applicable to affected vessels. This document addresses only those port entry requirements administered by the United States Coast Guard.

B. *DEFINITIONS:*

1. *4-Day Notice:* This period is *exactly* 96 hours. It commences at the precise hour and minute that the Agent's entry application message is received in Coast Guard Headquarters. Weekends and Federal holidays have no effect on 4-Day Notices. 4-Day Notices should not be submitted more than 2 weeks in advance of the first desired U.S. port call.

II. SPECIFIC REQUIREMENTS: COMMUNIST FLAG VESSELS

A. *PORT ENTRY APPLICATION REQUIREMENTS:*

1. *General:* All Port Entry Applications must be in writing. However, telephone inquiries are welcome during normal business hours (0730 to 1530 Eastern Time). The vessel entry desk, in the Port Security branch at U.S. Coast Guard Headquarters, can be reached by calling (202) 426-1927. For non-business hour emergencies, call U.S. Coast Guard Headquarters Flag Plot (Situation Room) at (202) 426-1830. Port Entry Applications (except Government-to-Government requests) should be submitted by the vessel's Agent direct to Coast Guard Headquarters. *Telex messages are preferred.* Port Entry Applications will *not* be accepted by local or regional Coast Guard Commands. Make application only to one of the following Coast Guard Headquarters addresses:

(a). Telex address: "Commandant (G-WPE), U.S. Coast Guard, Washington, D.C." Telex No. 89-2427. Answerback: "Coastguardwsh".

(b) TWX address: "Commandant (G-WPE), U.S. Coast Guard, Washington, D.C." TWX No. 710-822-1959. Answerback: "Cgdotwsh".

(c) Western Union address: "Commandant (G-WPE), U.S. Coast Guard, 2100 2nd Street S.W., Washington, D.C. 20593 (Prepaid)".

2. *Required Information:* All Port Entry Applications must provide certain information in an orderly manner. See example formats provided in Annex B of this document for additional information. Agents should *double check all information,* including spelling of foreign translations, since incorrectly submitted applications may lead to entry delays. All port entry applications should include the following:

(a) The Agent's complete address, commercial telephone number, and Telex/TWX number with answerback code or Western Union address.

(b) Appropriate message title identification: For example, 4-day notice, 4-working day request, 7-working day request, or 14-day request.

(c) Itinerary number: For example, Initial Itinerary, or Change 1, 2, 3, etc.

(d) Vessel type: This information must precede the vessel's name; however, in most cases you can use an abbreviation as follows:

Merchant Vessel	M/V
Passenger Vessel	P/V
Fishing Vessel	F/V
Fishing Support Vessel	F/V
Fishing Research Vessel	None authorised
Hydrographic Research Vessel	None authorised

(e) Vessel's name, call sign, and flag.

(f) Itinerary Information:
  i. Desired U.S. port of call.
  ii. Desired arrival *and* departure dates.

(g) Cargo information, although optional, is desired.

(h) Last foreign port of call, if known.

3. *Arrival and departure dates:*

(a) Only one day overlap is allowed for multiple port calls (i.e. New York 6/17-19, Philadelphia 6/19-21, Baltimore 6/21-6/27).

(b) Should any single port call exceed two weeks, your Port Entry Application must include an explanation of why.

(c) All approved itineraries *automatically* terminate upon the vessel's departure for a foreign port of call, except when the vessel departs for Canadian ports, which have been noted on the Port Entry Application message.

(d) The vessel's official notification period commences upon receipt of the Agent's request or notice at Coast Guard Headquarters. By return message, Coast Guard Headquarters will inform the Agent of the exact Greenwich Mean Time (GMT) his message was received. All entry and departure times are calculated and specified in GMT. Conversion to local time is the responsibility of the vessel and Agent.

(e) Vessels will be denied U.S. entry when there is insufficient information or insufficient advance notification in the Agent's application messages. *However, this does not prevent the Agent from submitting a new corrected entry application for the vessel.* In such cases, the official notification period commences upon receipt of the corrected entry application, not the original entry application which was denied. Occasionally, however, an Agent's initial entry application may request that a portion of the official notification period be waived. In the event the waiver is denied, the Coast Guard may recognise the receipt time of the waiver request as the time that the official notification period commenced. Only if the initial entry request specifically states that a waiver is requested, would this consideration be recognised.

4. *Early Arrival:* A vessel which holds an approved itinerary for a United States port entry may not enter U.S. territorial waters earlier than necessary to make a reasonably expeditious passage to the port for which the itinerary was approved. Deliberate slow steaming or anchoring within U.S. territorial waters to avoid early arrival will not be considered innocent passage and will result in cancellation of the vessel's itinerary.

5. *Advance Notice of Arrival:* None of the procedures outlined in this document relieves the Master or Agent of his legal requirement to provide 24-hour advance notice of arrival to each local Coast Guard Captain of the Port (33 CFR 161.7) and compliance with other applicable laws and regulations.

B. *ITINERARY CHANGE REQUESTS:*

1. *General:* Agents seek Itinerary Change Requests generally for three reasons: (i) to add ports, (ii) to change the prior Coast Guard approved port call sequence and/or dates, and (iii) to cancel planned port calls after receiving Coast Guard approval to enter. In each case, *the Agent's message request must list the vessel's full remaining itinerary, in addition to the desired change. Failure to list the vessel's entire desired U.S. calls will lead to automatic cancellation of the vessel's itinerary other than the requested change.* Use the same message procedures outlined in the prior section (Port Entry Application Requirements) for Itinerary Change Requests. Actions applicable to the three type of Itinerary Change Requests follow:

2. *Additional Port Calls:* Request for additional port calls are reviewed using the same criteria as for initial port calls. Details as follows:

(i) When the criteria calls for an initial government-to-government request, all requests for additional ports must be made at the Embassy level.

(ii) Agent message should be titled CHANGE 1, 2, 3, etc.

3. *Change Port Call Sequence/Dates:* Change requests to a vessel's approved port call sequence/dates are accepted by the Coast Guard, and in some cases approved, provided the following criteria are met:

(i) The initial port request was not government-to-government. (All others which are government-to-government must continue to be handled at the Embassy level).

(ii) Prior Coast Guard approval was given for the vessel to initially enter the port.

(iii) The itinerary change request was submitted far enough in advance. For example, the maximum processing time needed within the Government ranges from 14 days for a "14-Day Request Port" to 96 hours for a "4-Day Notice Port". However, the Coast Guard will try to expedite whenever possible. Normally 48 hours is the minimum processing time required by the Coast Guard to process an itinerary change request. Whenever possible, the Coast Guard will try to expedite the itinerary changes, however, requests made within the minimum processing time may be delayed.

REMEMBER – The vessel's entire U.S. itinerary must be contained in the message requesting port call sequence or date changes. When a port is not mentioned, the Coast Guard concludes that the port is no longer desired and will delete it from the approved itinerary.

4. *Cancelled Port Calls:* Occasionally cargo loading plans change and certain U.S. port calls may not be desired even though they have previously been requested. Agents should notify the Coast Guard of cancelled port calls as far in advance as possible. Failure to arrive at a port will lead to a vessel's remaining itinerary being cancelled, while, re-entry to a previously approved port will require the minimum entry requirement.

5. *Waivers:* The Coast Guard recognizes that unusual circumstances arise which require Agents to request waivers. Approval of waiver requests will tend to be the exception rather than the rule and all waiver requests should be well documented.

Waiver requests will normally be processed within 48 hours; however, do not consider this a guaranteed time frame.

6. LATE ARRIVAL NOTICES: Will, in most cases, be accepted by the Coast Guard in lieu of Itinerary Change Requests. While strictly optional, Late Arrival Notices do provide Agents with a simplified means to extend by 24 hours, the approved entry date. (see Example 3 of Annex B for additional details).

ANNEX A:
Specific Entry Requirements.

Specific entry requirements for vessels registered in Bulgaria, Czechoslovakia, German Democratic Republic, Hungary, Poland, Romania, the Union of Soviet Socialist Republics and the Peoples' Republic of China are contained in Appendices 1 through 8 respectively. National security interests require that vessels registered in Bulgaria, Czechoslovakia, German Democratic Republic, Hungary, Romania and the Union of Soviet Socialist Republics be prohibited entry to selected U.S. ports. Additionally, personnel from these countries serving as crew members aboard "free flag" vessels may require removal prior to the vessel entering selected ports. A list of these ports is found in Appendix 9 of this Annex. All non-public vessels are subject to a U.S. Coast Guard boarding at anytime. This may be, but is not limited to, the first port of call. Questions concerning these and other port entry matters should be directed to the vessel entry desk at Coast Guard Headquarters at (202) 426-1927.

Appendix 1 – Bulgaria (BU).
Appendix 2 – Czechoslovakia (CZ).
Appendix 3 – German Democratic Republic (GC).
Appendix 4 – Hungary (HU).
Appendix 5 – Poland (PL).
Appendix 6 – Romania (RO).
Appendix 7 – Union of Soviet Socialist Republics (UR).
Appendix 8 – Peoples' Republic of China (CH).
Appendix 9 – Ports unavailable to Warsaw Pact vessels.

Appendix 1 to Annex A:
BULGARIA (BU)

A. *Merchant and Passenger Vessels.*

1. Requirements: 7-working day request for all U.S. ports. Vessel's Agent to submit port call applications to Commandant U.S. Coast Guard (G-WPE).

B. *Fishing Vessels.*

1. Fishing vessels (includes fishing support vessels) authorised by the Fisheries Conservation and Management Act of 1976 (PL 94-265) are permitted to enter selected ports upon providing notice to Commandant U.S.Coast Guard (G-WPE) at least 4 days in advance of the desired entry. Those ports include:

Astoria OR   Eureka CA
Baltimore MD   New York NY
Boston MA   Philadelphia PA
Coos Bay OR

2. Entry to all other U.S. ports are subject to requests submitted on a government-to-government basis at least 14 days in advance of the desired entry date.

C. *Research Vessels.*

1. All research vessels must submit requests for entry on a government-to-government basis at least 14 days in advance of the desired entry date.

D. *Public Vessels.*

1. All public vessel entry applications are handled on a government-to-government basis.

Appendix 2 to Annex A:
CZECHOSLOVAKIA (CZ)

A. *Merchant and Passenger Vessels.*

1. Requirements: 7-working day request for all U.S. ports. Vessel's Agent to submit port call applications to Commandant U.S. Coast Guard (G-WPE).

B. *Fishing Vessels.*

1. Entry to all U.S. ports for fishing vessels are subject to requests submitted on a government-to-government basis at least 14 days in advance of the desired entry date.

C. *Research Vessels.*

1. All research vessels must submit requests for entry on a government-to-government basis at least 14 days in advance of the desired entry date.

D. *Public Vessels.*

1. All public vessel entry applications are handled on a government-to-government basis.

Appendix 3 to Annex A:
GERMAN DEMOCRATIC REPUBLIC (GC)

A. *Merchant and Passenger Vessels.*

1. Requirements: 7-working day request for all U.S. ports. Vessel's Agent to submit port call applications to Commandant U.S. Coast Guard (G-WPE).

B. *Fishing Vessels.*

1. Fishing vessels (includes fishing support vessels) authorised by the Fisheries Conservation and Management Act of 1976 (PL 94-265) are permitted to enter selected ports upon providing notice to Commandant U.S.Coast Guard (G-WPE) at least 4 days in advance of the desired entry. Those ports include:

Baltimore MD   New York NY
Boston MA   Philadelphia PA

2. Entry to all other U.S. ports are subject to requests submitted on a government-to-government basis at least 14 days in advance of the desired entry date.

C. *Research Vessels.*

1. All research vessels (including fishing research vessels) must submit requests for entry on a government-to-government basis at least 14 days in advance of the desired entry date.

D. *Public Vessels.*

1. All public vessel entry applications are handled on a government-to-government basis.

Appendix 4 to Annex A:
HUNGARY (HU)

A. *Merchant and Passenger Vessels.*

1. Requirements: 4-Working day request for all U.S. ports. Vessel's Agent to submit port call applications to Commandant U.S. Coast Guard (G-WPE).

B. *Fishing Vessels.*

1. Entry to all U.S. ports for fishing vessels is subject to requests submitted on a government-to-government basis at least 14 days in advance of the desired entry date.

C. *Research Vessels.*

1. All research vessels must submit requests for entry on a government-to-government basis at least 14 days in advance of the desired entry date.

D. *Public Vessels.*

1. All public vessel entry applications are handled on a government-to-government basis.

Appendix 5 to Annex A:
POLAND (PL)

A. *Merchant and Passenger Vessels.*

1. Requirements: 4-Working day request for all U.S. ports. Vessel's Agent to submit port call applications to Commandant U.S. Coast Guard (G-WPE).

B. *Fishing Vessels.*

1. Fishing vessels (includes fishing support vessels) authorised by the Fisheries Conservation and Management Act of 1976 (PL 94-265) are permitted to enter selected ports upon providing notice to Commandant U.S. Coast Guard (G-WPE) at least 4 days in advance of the desired entry. Those ports include:

Baltimore MD   New York NJ   San Francisco CA
Boston MA   Philadelphia PA   Seward AK
Camden NJ   Portland OR

2. Entry to all other U.S. ports are subject to requests submitted on a government-to-government basis at least 14 days in advance of the desired entry date.

C. *Research Vessels.*

1. All research vessels must submit requests for entry on a government-to-government basis at least 14 days in advance of the desired entry date.

D. *Public Vessels.*

1. All public vessel entry applications are handled on a government-to-government basis.

Appendix 6 to Annex A:
ROMANIA (RO)

A. *Merchant and Passenger Vessels.*

1. Requirements: 4-Working day request for all U.S. ports. Vessel's Agent to submit port call applications to Commandant U.S. Coast Guard (G-WPE).

B. *Fishing Vessels.*

1. Fishing vessels (includes fishing support vessels) authorised by the Fisheries Conservation and Management Act of 1976 (PL 94-265) are permitted to enter selected ports upon providing notice to Commandant U.S. Coast Guard (G-WPE) at least 4 days in advance of the desired entry. Those ports include:

Baltimore MD   New York NY   Philadelphia PA

2. Entry to all other U.S. ports are subject to requests submitted on a government-to-government basis at least 14 days in advance of the desired entry date.

C. *Research Vessels.*

1. All research vessels must submit requests for entry on a government-to-government basis at least 14 days in advance of the desired entry date.

D. *Public Vessels.*

1. All public vessel entry applications are handled on a government-to-government basis.

Appendix 7 to Annex A:

UNION OF SOVIET SOCIALIST REPUBLICS (UR)

A. *Merchant and Passenger Vessels.*

1. Requirements: 14 day request for all U.S. ports. Vessel's Agent to submit port call applications to Commandant U.S. Coast Guard (G-WPE).

B. *Fishing Vessels.*

1. Fishing vessels (includes fishing support vessels) authorised by the Fisheries Conservation and Management Act of 1976 (PL 94-265) are permitted to enter selected ports upon providing notice to Commandant U.S. Coast Guard (G-WPE) at least 4 days in advance of the desired entry. Those ports include:

Astoria OR
Baltimore MD
Boston MA
Dutch Harbor AK
Hilo HI
New York NY
Philadelphia PA
Portland OR

2. Entry to all other U.S. ports are subject to requests submitted on a government-to-government basis at least 14 days in advance of the desired entry date.

C. *Research Vessels.*

1. All research vessels must submit requests for entry on a government-to-government basis at least 14 days in advance of the desired entry date.

D. *Public Vessels.*

1. All public vessel entry applications are handled on a government-to-government basis.

Appendix 8 to Annex A:

PEOPLE'S REPUBLIC OF CHINA (CH)

A. *Merchant and Passenger Vessels.*

1. Requirements: 4-Day Notice for 55 U.S. ports (see Annex C). Vessel's Agent to submit port call applications to Commandant U.S. Coast Guard (G-WPE).

2. Entry to all other ports requires notification to the Commandant, U.S. Coast Guard (G-WPE) by a 7-Working Day Advance Information Request, not less than 7 working days prior to intended entry into such ports. (It is understood that entry will ordinarily be granted but may be denied for reasons of national security.)

B. *Fishing Vessels.*

1. Entry to all other U.S. ports are subject to requests submitted on a government-to-government basis at least 14 days in advance of the desired entry date.

C. *Research Vessels.*

1. All research vessels must submit requests for entry on a government-to-government basis at least 14 days in advance of the desired entry date.

D. *Public Vessels.*

1. All public vessel entry applications are handled on a government-to-government basis.

Appendix 9 to Annex A:

PORTS UNAVAILABLE TO WARSAW PACT COUNTRIES

1. Portsmouth NH (includes Kittery ME, and Dover NH on Piscataqua River).
2. New London and Groton CT.
3. Hampton Roads VA (including Norfolk, Newport News, Jamestown, Yorktown, and Portsmouth VA, and access to the James River).
4. Charleston SC.
5. Port Canaveral FL.
6. Panama City FL.
7. Pensacola FL.
8. Port St. Joe FL.
9. San Diego CA.
10. Port Hueneme CA.
11. Honolulu HI.

ANNEX B

EXAMPLE MESSAGE FORMATS

EXAMPLE 1: This sample message format may be used by an Agent desiring entry of a People's Republic of China (CH) registered vessel into one of the designated 4-day Notice Ports outlined in Annex C.

FM AGENT NAME
COMPLETE ADDRESS
COMMERCIAL PHONE NUMBER
TELEX/TWX NO. (including Answer Back Code)
TO Commandant, U.S. Coast Guard (G-WPE)
Washington DC
Telex No. 892427

4 Day Notice
M/v. Dong Hai (CH) (Call Sign)
Initial Itinerary (or Change 1, 2, etc.)
New York 6/17-6/19, Philadelphia 6/20-6/21
Cargo: In Ballast. To Load Grain
Last Port of Call: Shanghai

EXAMPLE 2: This sample message format may be used by Agents for vessels desiring access to "request" ports.

FM AGENT NAME
COMPLETE ADDRESS
COMMERCIAL PHONE NUMBER
TELEX/TWX NO. (including Answer Back Code)
TO Commandant, U.S. Coast Guard (G-WPE)
Washington DC
Telex No. 892427

4-Working Day Request or 7-Working Day Request or 14-Day Request.
M/v. Polinski (PL) or m/v Czechlava (CZ) (Call Sign)
Initial Itinerary (or Change 1, 2, etc.)
Morehead City 6/30-7/4
Cargo: General
Last Port of Call: Gdynia

*NOTE: Bulgarian, Romanian, Hungarian also apply to Example 2.

EXAMPLE 3: Coast Guard port entry approval messages will provide the official entry time that the vessel is cleared to enter a particular port. This will either be the exact conclusion of the 96 hour official notification period for all four day notices, or at 0001 GMT of the day requested for all other cases. Actual vessel entry is expected to occur during the 24 hour period commencing from the official entry time. An additional 24 hour period may be requested (but is not guaranteed) by providing the Coast Guard Headquarters with a late arrival notice message.

1. Message format as follows:
FM: (Agent Name)
TO: Commandant (G-WPE) (See paragraph C.2. for various message addresses)
1. This is a Late Arrival Notice.
2. The (Type of vessel, name, flag and call sign) has received CG Headquarters approval to enter (Name of port) at (Date and time)
3. Revised ETA (Date and time. This must not be later than 48 hours after official entry approval time.).
END OF MESSAGE

2. In most cases, automatic late entry privileges will be extended to the vessel. Return message traffic will not be sent to the Agent unless late entry is denied. The following criteria apply:

(a) Late Arrival Notices may be submitted for any Communist vessel which has prior Coast Guard approval to enter the U.S. including those processed as government-to-government.

(b) Only one Late Arrival Notice may be submitted per vessel per port call.

(c) The Late Arrival Notice does not change the vessel's approved official entry or departure time. They do, however, delay by 24 hours a vessel's itinerary being cancelled lacking an approved Itinerary Change Request. Itinerary Change Requests and government-to-government requests remain the only means of changing the vessel's official entry or departure time.

(d) The Late Arrival Notice does not replace or eliminate the requirement of 33 CFR 161.7 for 24 hour advance notice of arrival to each local Coast Guard Office (i.e. Captain of the Port (COTP) or Marine Safety Office (MSO)). Agents may, however, desire to send an identical message to Coast Guard Headquarters in fulfillment of 33 CFR 161.7. In this case, change your first sentence to read:

THIS IS A LATE ARRIVAL NOTICE AND 24 HOUR ADVANCE NOTICE OF ARRIVAL.

ANNEX C

U.S. NOTICE PORTS FOR PRC FLAG MERCHANT VESSELS

The following geographical limits define the U.S. ports which have been established as 4-Day Notice Ports in the U.S./PRC Maritime Agreement.

WEST COAST

1. Skagway, Alaska: Taiya Point (in Taiya Inlet on Lynn Canal) to the town of Skagway, Alaska.
2. Ketchikan, Alaska: Tongas Narrows, N.W. of a line between Mountain Point and Gravina Point, and S.E. of a line between Point Higgins and Guard Island, and including Vallenar Bay.
3. Anchorage, Alaska: Waters of Cook Inlet Northward from a line drawn between Cape Douglas and Cape Elizabeth.
4. Bellingham, Washington: Bellingham Bay.
5. Everett, Washington: N.E. end of Possession Sound.
6. Seattle, Washington: Coincident with King County, Washington.
7. Tacoma, Washington: Coincident with Pierce County, Washington.
8. Olympia, Washington: Coincident with Thurston County, Washington.
9. Astoria, Oregon: Coincident with Clatsop County, Oregon.
10. Longview, Washington: Columbia River between mile 62 and mile 70.
11. Portland (including Vancouver, Washington), Oregon: Coincident with 3 Oregon counties: Multnomah, Clackamas, Washington. (Port of Vancouver, Washington considered to be part of Port of Portland).
12. Coos Bay (including North Bend), Oregon: All of Coos Bay to North of Coos River.
13. Eureka, California: Humboldt Bay.
14. Sacramento, California: Sacramento Harbour proper, Sacramento River to limits of navigation.
15. San Francisco (including Alameda, Oakland, Berkeley, Richmond), California: San Francisco Bay, South of Richmond/San Rafael Bridge.
16. Los Angeles (including San Pedro, Wilmington, and Western part of Terminal Island), California: The portion of San Pedro Bay and Cerritos Channel within the City of Los Angeles, California.
17. Stockton, California: Stockton Harbour Proper and San Joaquin River to limits of navigation.
18. Long Beach (including Eastern part of Terminal Island), California: That portion of San Pedro Bay and Cerritos Channel within the City of Long Beach, California.
19. Honolulu, Hawaii: Honolulu Harbour proper.

GULF OF MEXICO

1. Brownsville, Texas: The Brownsville Ship Channel from the Sea Buoy to the Brownsville Turning Basin.
2. Corpus Christi, Texas: The Corpus Christi Channel from the Sea Buoy to the Viola Turning Basin and the La Quinta Channel from its junction to the Corpus Christi Channel.

3. Galveston/Texas City, Texas: The Galveston and Texas City Channels from their intersections with the Houston Ship Channel to their respective turning basins.

4. Houston, Texas: The Houston Ship Channel from 5 Mile Cut to the Houston Turning Basin and the Bayport Turning Basin.

5. Port Arthur, Texas: The ICW from mile 276.5 to mile 288.5 including the East Basin, West Basin, and turning basin of Taylor Bayou.

6. Orange, Texas: The ICW from mile 276.5 to mile 265; the Sabine River from the intersection with the ICW, Northerly to the Navy Yard.

7. Beaumont, Texas: The Neches River from the ICW to Interstate 10 Bridge.

8. New Orleans, Louisiana: Sea Buoy to River mile 155.

9. Burnside, Louisiana: River mile 155 to mile 170.

10. Baton Rouge, Louisiana: River mile 170 to mile 255.2.

11. Mobile, Alabama: The Mobile Ship Channel from the Sea Buoy to the Cochran Bridge and the Hollinger's Island Channel from its junction with the Mobile Ship Channel.

12. Gulfport, Mississippi: Ship Island Pass and Gulfport Ship Channel from the Sea Buoy to the harbour basin.

13. Tampa, Florida: That portion of Tampa Bay contained within Hillsborough County.

14. Boca Grande, Florida: Boca Grande Channel from the Sea Buoy to Port Boca Grande on Gasparilla Island.

15. Port Everglades, Florida: Port Everglades coincident with Broward County.

EAST COAST

1. Portland, Maine: Hussey Sound and Fore River to combined fixed railroad and highway bridge (Route 1 Bridge).

2. Boston, Massachusetts: Boston Harbour proper including Mystic River and Chelsea River to limit of navigation.

3. Fall River, Massachusetts: Mt. Hope Bay, and Tauton River coincident with corporate limits of the City of Fall River.

4. New York (New York and New Jersey parts of the Port of New York Authority), New York: South – 74° West from Sandy Hook to Coney Island, North – George Washington Bridge, East – Throg's Neck Bridge.

5. Albany, New York: Hudson River bounded by Rensselaer County to the East and Albany County to the West.

6. Philadelphia (including Camden, New Jersey), Pennsylvania: Trenton, New Jersey to the Delaware State Line.

7. Wilmington, Delaware: Extending from the mouth of the Christina River Westward to the 3rd St. Bascule Bridge (Lat. 33° 44.06′ N., Long. 79° 33.16′ W.).

8. Baltimore, Maryland: North and West of a line from North Point to Botkin Point but including Annapolis anchorage area between the Chesapeake Bay Bridge and Kent Point.

9. Richmond, VA: James River from Benjamin Harrison Memorial Bridge, Hopewell, VA to limits of navigation.

10. Wilmington, North Carolina: The Cape Fear River from the Sea Buoy to Point Peter and thence the N.E. River to the turning basin at mile 2.

11. Morehead City, North Carolina: Morehead City Harbour including Radio Island from the Sea Buoy at Beaufort Inlet, NC.

12. Georgetown, South Carolina: Entrance Channel between Sand Island and North Island at South Island Bend through Wingah Bay, including all Georgetown and Sampit River, North to where Waccamaw River and Pee Dee River merge at U.S. Route 17 into Winyah Bay.

13. Savannah, Georgia: Savannah River from the Route 17 Bridge to sea.

14. Ponce, Puerto Rico: Playa de Ponce only.

GREAT LAKES

1. Duluth, Minnesota/Superior, Wisconsin: Duluth/Superior Harbour only.

2. Kenosha, Wisconsin: Kenosha Harbour proper.

3. Milwaukee, Wisconsin: Milwaukee Harbour, and rivers to limits of navigation within Milwaukee Breakwater.

4. Chicago, Illinois: Between Burns Harbour (including Burns Waterway Harbour) and Northern limits of Chicago Harbour including Lake Calumet and other waterways inland to the intersection of the Chicago Sanitary and Ship Canal with the Calumet Sag Channel.

5. Bay City, Michigan: Mouth of Saginaw River to limits of navigation.

6. Toledo, Ohio: Maumee River to limits of navigation.

7. Cleveland, Ohio: Cleveland Harbour including Cuyahoga River to limits of navigation.

8. Erie, Pennsylvania: Erie Harbour located within Presque Isle Bay.

PILOTAGE: North West Coast of U.S.A.
Columbia River Bar Pilots are "Sea Pilots" for all ports in Columbia and Willamette Rivers. Namely, Astoria and Portland (Oregon), Longview, Kalama and Vancouver (Washington) – when entering from sea and if providing above Astoria, Columbia River Pilots relieve Bar Pilots for balance of transit.

COLUMBIA RIVER BAR PILOTS
P.O.Box 81, Astoria, Oregon 97103
TWX 910-466-8014
Telephones (503) 325-2641 or 325-2642

RADIO FACILITIES

Pilot Boat Peacock	WS 7217
Pilot Boat Columbia	WYE 7344
Bar Pilots Office, Astoria (Ch. 16) (156.80)	KOK 360
Astoria Marinephone "KFX"	
Ship's Call on	2206 kHz
KFX Answers on	2598 kHz

Or call on and receive KFX on Channel 26.

Pilot boat now equipped with single sideband radios.

Pilot boat guards 2182 kHz and will switch to working frequency after contact.

In order there be no delays, vessels due to arrive at the Columbia River and desiring a Bar Pilot, must cable or telephone the Columbia River Bar Pilots. (Pilot normally not on station unless cable or telephone message received.) USE RADIO STATION KLB, EVERETT, WASHINGTON at least 12 hours before arrival at the lightship. Code address, "BAR PILOTS, STATING THE TIME OF ARRIVAL". If transmitted by any other radio station, delay may occur. If vessel is equipped with VHF, use Channel 16 (156.80 MHz) to call the pilot boat or Bar Pilots' Office, Astoria (KOK 360) and shift to Channel 13 (156.65 MHz).

PILOT LADDER INSTRUCTIONS

1. Please contact the pilot boat via voice radio (Channel 16 or frequency 2182) approximately 30 minutes prior to arrival for desired lee and boarding instructions.

2. The Columbia River Bar Pilots have 2 pilot vessels; the "Peacock" and the "Columbia". When the "Peacock" is on station, Masters will be instructed to rig their pilot ladder 4 ft. above the water's edge. When the "Columbia" is on station, the Master will be instructed to rig the ladder 10 ft. – 12 ft. above the water's edge. The above-mentioned distances above the water are of the utmost importance, particularly in the case of the "Columbia", as the pilot boat can and has pulled the ladder down when it becomes pinched between the pilot boat and the side of the vessel. Pilot ladders and boat ropes shall not be permitted to drag in the water. No tag lines, pull ropes or trailing lines shall be attached to the bottom of the ladder.

3. Pilot ladders shall be rigged amidships, over "draft marks" clear of all obstructions, such as accommodation ladders, and clear of overside discharges from the engine room and deck scuppers.

4. The pilot ladder should be kept clean and used for embarking and disembarking Pilots only. The ladder shall be made in one continuous length, not 2 sections shackled or lashed together. The ladder shall be equipped with spreaders approximately 10 ft. apart in accordance with SOLAS regulations. The ladder must be in good condition, the treads horizontal and the upper surface of rough non-skid quality.

5. The ladder must be adequately lit at night by means of a light shining well over the ship's side in the vicinity of the ladder. The area of the deck where the Pilot boards and leaves should be free of debris and well lighted. Where portable stanchions and bulwark steps are used, they shall be rigidly attached to the ship's structure. A life ring with water light and lifeline attached should be ready at hand. Rigging of the ladder and embarking and disembarking of the Pilot must be under the supervision of a licensed officer.

6. Boat ropes are not to be used, all pilot boats are power propelled.

7. Manropes shall be of manila 3 in. circumference. The manropes shall be free of any knots including the lower end. The manropes should be rigged 1 ft. – 2 ft. longer than the pilot ladder. Manropes are not to be rigged for boarding unless otherwise advised.

8. Should vessel be fitted with a mechanical ladder, the ladder should have a double fall. Also, a conventional ladder must be kept ready at hand, should it be required.

9. If vessel is to take a deck load of logs, please discuss with your Agent the building of a catwalk to provide safe passage to and from the pilot ladder.

AUTOMATIC RADAR PLOTTING AIDS: With effect as from July 1st, 1982, vessels carrying oil or hazardous materials in bulk must have automatic radar plotting aids.

A fine for failure to carry an ARPA could be multiplied by the number of days of the violation.

The United States Coast Guard has stressed, however, that its official policy is enforcement by denial of entry and restriction of operation and not primarily by the enforcement of fines.

While the Coast Guard recognises that the Public Law enables financial penalties to be incurred, it is believed that the terms of the Port and Tanker Safety Act under which the U.S. Coast Guard operates directs it to monitoring and identification of previous offenders and enforcement by prevention of entry into U.S. ports or subsequent restriction of trade and departure.

COAST GUARD REGULATIONS: The U.S. Coast Guard has announced its intention to develop the following regulations implementing sections of the 1978 U.S. Port and Tanker Safety Act requiring:

1. Existing crude oil carriers of 20,000 d.w.t. or above but less than 40,000 d.w.t. to have segregated ballast tanks (SBT) or a crude oil washing system (COW) by January 1st, 1986, or when they reach 15 years of age, which ever occurs later; and

2. Existing product carriers of 20,000 d.w.t. or above but less than 40,000 d.w.t. to have SBT or dedicated clean ballast tanks (CBT) by January 1st, 1986, or when they reach 15 years of age, whichever occurs later.

POLLUTION: Any vessel which does not have a valid I.O.P.P. Certificate on board will not be allowed to transit U.S. waters.

NOTICE: *B.A. Notice to Mariners No. 3013(T) of 1983:*
UNITED STATES OF AMERICA – Chart and Publication requirements.

A statement concerning the U.S. Navigation Safety Regulations relating to Navigation, charts and Publications has been issued in the U.S. Notices to Mariners Weekly 44/83. This is reproduced below. Admiralty Annual Notice to Mariners No. 22 will be amended as appropriate in the 1984 edition.

CHART AND PUBLICATION REQUIREMENTS

Sections 164.30 and 164.33 of Title 33 of the Code of Federal Regulations Part 164 (33 CFR 164), which detail requirements for the carriage of nautical charts and publications, are amended effective October 28, 1983. The regulations contained in these sections are applicable to each self-propelled vessel of 1,600 g.r.t. or more, operating on the navigable waters of the United States, except the Saint Lawrence Seaway, and are reprinted as follows:

§164.30 Charts, publications, and equipment: General.

No person may operate or cause the operation of a vessel unless the vessel has the marine charts, publications, and equipment as required by §§ 164.33 through 164.41 of this part.

§164.33 Charts and publications.

(a) Each vessel must have the following:

(1) Marine charts of the area to be transited, published by the National Ocean Service, U.S. Army Corp of Engineers, or a river authority that:
- (i) Are of a large enough scale and have enough detail to make safe navigation of the area possible; and
- (ii) Are currently corrected.

(2) For the area to be transited, a currently corrected copy of, or applicable currently corrected extract from, each of the following publications:
- (i) U.S. Coast Pilot.
- (ii) Coast Guard Light List.

(3) For the area to be transited, the current edition of, or applicable current extract from:
- (i) Tide tables published by the National Ocean Service.
- (ii) Tidal current tables published by the National Ocean Service, or river current publication issued by the U.S. Army Corps of Engineers, or a river authority.

(b) As an alternative to the requirements for paragraph (a) of this section, a marine chart or publication, or applicable extract, published by a foreign government may be substituted for a U.S. chart and publication required by this section. The chart must be of large enough scale and have enough detail to make safe navigation of the area possible, and must be currently corrected. The publication, or applicable extract, must singly or in combination contain similar information to the U.S. Government publication to make safe navigation of the area possible. The publication, or applicable extract must be currently corrected, with the exceptions of the tide and tidal current tables, which must be the current editions.

(c) As used in this section, "currently corrected" means corrected with changes contained in all Notices to Mariners published by Defense Mapping Agency Hydrographic/Topographic Centre, or an equivalent foreign government publication, reasonably available to the vessel, and that is applicable to the vessel's transit.

SHIP'S OFFICER'S REPORT: The information given for the port of New Orleans (U.S.A.) applies to all the ports in the U.S.A. in the event of the vessel arriving from abroad or from a previous U.S. port. All the documents such as Crew List, Passenger List (Form I-418), Deck, Engine, Stewards & Bonded Stores Lists (Form 1303), Crew's Effects Declaration (Form 1304), are required in duplicate at each port for entry inward.

ALBANY, New York: 42.40 N. 73.45 W. (See Plan Book)

DOCUMENTS: If first port of call in U.S., 2 complete Customs Manifests describing all cargo on board and ports of discharge. Also 1 Cargo List for Albany cargo, 3 Crew Lists, 3 Store Lists, 3 Curio Lists, Ship's Register, Load Line Certificate and Tonnage Tax Certificate.
PILOTAGE: Hudson River Pilot boards vessel off Yonkers, N.Y. Cable address: "Hudpilots, Yonkers, N.Y."
ANCHORAGES: Several anchorage areas in Hudson River en route to Albany if required due to weather. Vessels cannot anchor at Port of Albany.
RESTRICTIONS: Hudson River Channel to Albany has controlling depth of 32 ft. MLW. Vessels with draft in excess of 28 ft. will be required to transit river on favourable tide as directed by Pilot.
MAX. SIZE: Max. permissible length 750 ft., breadth 110 ft., draft 30 ft. Turning basin at Albany 1,100 ft. in width.
HEALTH: See "Health: All Ports" before first U.S.A. port. Illness reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port.
TUGS: One 2,500 h.p. tug stationed at port at all times; additional tugs available upon advance request. Normally 1 tug is sufficient for turning and docking. Tug's lines are used.
BERTHING: 5,000 linear ft. of marginal wharf available at APDC terminal for general cargo, grain, lumber, etc., 32 ft. alongside wharf. Various privately operated deep-water petroleum terminals in port area.
Facilities: 13.5 million bushel grain elevator. 17 million gallon molasses storage – 3 terminals. Scrap Iron Terminal, Banana Terminal.
Equipment: Available at the Port of Albany:

2	Diesel-operated wharf cranes, 5 ton capacity each
1	Gasoline crawler crane, 15 ton capacity
3	Fork-type telescopic lift trucks, 15,000 lb. each (height of lift 17 ft.)
12	Fork-type telescopic lift trucks, 5000 lb. to 7000 lb. each
2	Clamp equipped telescopic lift trucks, 7000 lb. capacity each
9	Gasoline operated lumber carriers
2	Front-end loaders, 1.25 cu. yd. capacity each
1	180 ton capacity bulk car unloader
21	5/8 cu. yd. clamshell buckets
	Hoppers for shipside bulk materials handling
	Complete bagging equipment for all bulk materials

BRIDGES: Minimum vertical clearance of bridges on Hudson River en route to Albany is 135 ft.
STEVEDORES: Rates and information can be obtained from I.T.O. Corporation; 7 gangs available.
FRESH WATER: Supplied during regular working hours daily, except Saturdays, Sundays, and holidays, at $2.75 per 100 cu. ft. plus $22.00 service charge per daily delivery on straight time. Additional charge if supplied during other periods.
GANGWAY/DECK WATCHMEN: Available via ship chandler, not required but recommended.
CONSULS: Italian Vice-Consulate located at Albany, other consulates available at New York City.
REPAIRS: Minor deck and engine repairs can be handled.
AIRPORT: 7 miles distant from port: served by Allegheny, America, Altair and Executive Airlines.
TIME: Eastern Standard and Eastern Daylight Saving, GMT minus 5 hours.
HOLIDAYS: Standard U.S. holidays; cargo work can be arranged on all holidays at overtime rates, except July 4th, Labour Day and Christmas Day.
SHORE LEAVE: Crew members allowed ashore unless restricted by Customs or Immigration requirements.

SHIPMASTER'S REPORT: February 1980.
Pilotage: Compulsory. Pilot boards at Ambrose Light vessel and Hudson River Pilot boards at Yonkers.
Restrictions: Vessels able to enter and leave during darkness at any stage of the tide.
Max. Size: LOA 750 ft. (Approx). *Max. Draft:* 31 ft. to 32 ft. depending on height of river.
Tugs: One tug stationed at Albany (approx. 2,500 h.p.). Additional tugs come from New York.
VHF: Tug only listens out on VHF before vessel arrives.
Services: Following services available: Fresh water, fresh provisions, small repairs, machine shop, airport, Lloyd's surveyor (from New York), Salvage surveyor (from New York), lubricating oil, groceries and meats.
Berthing: Pier No. 2 Albany: Berth located 3 miles from Albany and 145 miles from the entrance. Vessel's size limited by draft and space available in swinging room in basin. Max. size approx. LOA 600 ft., draft 31 ft. Least depth of water in channel from sea to berth 33 ft. (approx). Vessels able to dock and undock at any stage of the tide, day or night.
Grain Loading Facilities: Available.
Ro/Ro Facilities: Available, port now being used to discharge cars from car carriers. No floating cranes available.

AUTHORITY: Albany Port District Commission, Administration Building, Port of Albany, Albany, N.Y. 12202. *Tel:* (518) 445-2595. *Contact:* The General Manager.

ALEXANDRIA, Virginia: 38.48 N. 77.03 W. (See Plan Book)

LOCATION: On the Potomac River 7 miles from Washington D.C.
DOCUMENTS/PILOTAGE: Refer to "Hampton Roads".
RESTRICTIONS: Anchoring necessary between 2200 to 0600 hrs. Berthing daylight only.
Channel: Width 200 ft. Depth 24 ft. Turning basin: length 6,700 ft. width 300 ft.
MAX. SIZE: Governed by draft only – max. 22 ft. 6 in. all times.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: WMH Baltimore, Md.
TUGS: None required.
BERTHING: 2 open piers. Berthing 0600 hrs. to 2200 hrs.
BRIDGES: 1 bridge, closed Monday through Friday 1600–1830 hrs. and 0630–0900 hrs.
STEVEDORES: Informally arranged through Receivers or Shipper's Agents.
MEDICAL: Hospital available.
FRESH WATER: Available at berth – 10 t.p.h.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Shore watchman provided.
OPENING/CLOSING HATCHES: Stevedores. Vessel – depending on understanding.
IDENTIFICATION CARDS: Required by Immigration.
REPAIRS: Minimal facilities.
REPATRIATION: Facilities exist.
AIRPORT: 3 miles. Washington National – multiple flights.
TIME: GMT minus 5 hours.
POLICE/AMBULANCE/FIRE: Agents arrange. Watchmen on duty.
SHORE LEAVE: Allowed.
DELAYS: No unusual delays.
SERVICES: Searle Consortium, Ltd. in Alexandria (Tel: (703) 768-6026) and their sister company, Seaward Marine Services can provide the following: Diving and general underwater inspection services; Underwater hull cleaning; Salvage survey and underwater repairs of a salvage nature; Assistance in the refloating of stranded vessels and Assistance in the arranging/engineering of towage.
AUTHORITY: Virginia Port Authority, Norfolk, Va.

ANACORTES, Washington: 48.31 N. 122.36 W.

(See Plan Book)

DOCUMENTS, PILOTAGE, etc: Refer to "Tacoma".
ANCHORAGES: East End Guemes Channel, 54 ft. minimum depth.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Join vessel in Guemes Channel at Anacortes – lines optional.
BERTHING: Pier No. 1, depth 30 ft.; Pier No. 2, depth 35 ft.
TANKERS: Shell Jetty: depth alongside 42 ft.
STEVEDORES: Request 24 hours' notice.
FRESH WATER: Available from city water system.
FUEL: Available from Shell and Texaco.
GANGWAY/DECK WATCHMEN: Not required by port.
OPENING/CLOSING HATCHES: Stevedores.
CUSTOMS ALLOWANCES: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.
CARGO GEAR: ILWU requirements.
IDENTIFICATION CARDS: Required.
REPAIRS: Minor repairs only.
AIRPORT: 75 miles Seattle International.
TIME: GMT minus 8 hours. From end April to end October, Pacific Daylight Saving Time, GMT minus 7 hours.
HOLIDAYS: See "Tacoma".
POLICE/AMBULANCE/FIRE: Police, Ambulance and Fire dial 911.
TELEPHONES: Available at Pier 2 and at Pier 1 by Phone Co.
SHORE LEAVE: Allowed.
AUTHORITY: Port of Anacortes, P.O.Box 297, Anacortes, Washington 98221. *Tel:* (206) 293 – 3134 (Scan System 576 – 6371). *Contact:* M. Hardy, Marine Terminal Supervisor.

ANCHORAGE, Alaska: 61.12 N. 150.00 W.

(See Plan Book)

DOCUMENTS:
3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Stores List.
2 copies Passenger List (Form I-418).
2 copies Crew List (Form I-418).
Customs Boarding Officer will also examine Ship's Register and Loadline Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:
Master's Oath (Customs Form 1300).
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.
PILOTAGE: The pilot station for Anchorage is at Homer, Alaska. Vessels may contact Pilot by radio telephone. Telegraphic address "Almarrpilot", ETA notice requested 24 hours. Listens VHF Channel 10. Pilot boat green and white. Pilot flag by day, pilot light at night. Pilot boat 1 mile South of Homer Spit (Coal Point), Homer, Alaska. In bad weather, wait inside Homer Spit and advise via radio-telephone.
Also see "Homer".
ANCHORAGES: The best anchorage for deep-draft vessels is West of Anchorage in depth of 10 fathoms to 12 fathoms, silt bottom. Holding ground is good.
TIDE AND CURRENTS: The diurnal range of tide is 29.6 ft., currents from 1.7 knots to 6 knots or more in mid-channel.
RESTRICTIONS: Flow and pan ice is encountered in the Cook Inlet from approximately the end of November until the end of February. This ice does not freeze solid due to the tidal action. The port is in year-round use and expert information on Winter conditions may be obtained from any of the highly qualified licensed ship pilots available in the area.
MAX. SIZE: All berths 35 ft. MLLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Port of Anchorage "KBT-42" on HF-AM and SSB. "WHJ-82" on VHF-FM.
Radio Advice: Masters must notify Agents at Anchorage of ETA at Homer Spit, Alaska, as early as possible. Homer Spit position: 59° 35' N., 151° 40' W. To avoid confusion ETA message to Anchorage should indicate Time Zone used. Alaska Communication System Stations are located at Juneau – call sign AKM – Keeping watch on 500 kHz and working on 452 kHz. This station is reported to be very difficult to contact and is closed during weekends.

The fastest way to forward radio messages in the North Pacific is via San Francisco Radio KPH.

The U.S. Coast Guard Station Kodiak – call sign NOJ – keeps R/T watch on 500 kHz, working on 470 kHz.

Due to difficulties reported in contacting local Alaskan stations, Masters of vessels engaged on trans-Pacific crossings are advised to route radio messages to Alaska and Europe via Singapore Radio or Choshi Radio until the dateline, thereafter via San Francisco radio.
TUGS: Join vessel 1.5 miles S.W. of docks.
BERTHING: 600 ft. general cargo Terminal No. 1, apron width 47 ft., live road limit 600 lb. per sq. ft. General cargo Terminals No. 2 and 3, 610 ft. and 893 ft. respectively, apron width 69 ft. Depth alongside face at MLLW 35 ft.
CRANES: Shore Cranes: Level luffing gantry and Paceco container cranes. Capacity: Level luffing gantry 7.5 tons and 40 tons (5 ton high-speed whip lines). Container cranes 27.5 tons.

Outreach from fender face is 70 ft. for the gantries and 81 ft. on the Paceco. Clear height above MLLW is 132 ft.
TANKERS: The Petroleum Terminal at the port of Anchorage is contiguous to the general cargo docks. The POL Dock is 612 ft. long and contains multiple petroleum manifolds in addition to those on Terminal No. 1. Depth 35 ft. alongside.
STEVEDORES: *Working Hours:* Stevedores do not work on January 1st, September 6th, November 25th and December 25th. The first 6 hours of any shift between 0800 hrs. and 1500 hrs. is at the straight time rate. Work performed on Saturdays, Sundays, holidays and between 1700 hrs. and midnight is at overtime rate. Meal breaks are 1145 hrs. to 1300 hrs. and 1645 hrs. to 1800 hrs. Stevedores do not normally work between midnight and 0700 hrs.
SPECIALISED CARGO HANDLING FACILITIES: 2×27.5 ton Paceco container cranes servicing general cargo Terminal 2 and 3; private bulk cement pipe-lines to shore silos. Ro-Ro service available.
DENSITY: From 1.0098 to 1.0102.
MEDICAL: All facilities available. 3 local hospitals.
FUEL: All grades available.
FRESH WATER: Public Health Service certified water station.
GANGWAY/DECK WATCHMEN: Required shipside.
OPENING/CLOSING HATCHES: By stevedores.
SURVEYORS: B. J. Logan and Associates, (Lloyd's Agency; correspondence to AIMU; National Cargo Bureau), 237 E. Third Avenue, Anchorage, Alaska 99501. Phone: (907) 272-7724.
AIRPORT: 5 miles; served by regular foreign and domestic airlines.
CUSTOMS ALLOWANCES: At the discretion of Customs Officer. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I–95 to be made up for each crew member on arrival. Not necessary for crew men already holding Form I–95, issued for the same vessel.
HOLIDAYS: New Year's Day (January 1st); Lincoln's Birthday; Washington's Birthday; Seward's Day (March 30th); Memorial Day; Independence Day (July 4th); Labour Day; Columbus Day; Alaska Day (October 19th); Veterans' Day; Thanksgiving Day; Christmas Day (December 25th).
POLICE/FIRE/AMBULANCE: Police 272–1414; Ambulance/Fire 272–1515.
EMERGENCY CO-ORDINATION CENTRE: U.S. Coast Guard, Anchorage, Alaska 99513. Tel: (907) 271-5137.
TELEPHONES: Telephones available shipside.

AUTHORITY: Port of Anchorage, 2000 Anchorage Port Road, Anchorage, Alaska 99501. *Tel:* (907) 272-1531. *Telex:* 090-26-431. *Contact:* Port Director.

ASHTABULA, Ohio: 41.53 N. 80.48 W.

(See Plan Book)

Refer to "St. Lawrence Seaway" for important general information.
PILOTAGE: Nearest pilot station is the Welland Canal, Canada.
ANCHORAGES: No anchorage inside boundaries. Good anchorage outside to East of the entrance, depth approx. 20 fathoms.
MAX. SIZE: The Pinney Dock and Transport Company stevedoring dock handling overseas cargoes located just East of entrance to the port. Channel depth of 28 ft. 4 berths, 27 ft. alongside; length of facilities up to 700 ft. by 75 ft. beam. No facilities for oil carriers.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Contact Lorain, Ohio ship-to-shore station for local connections.
TUGS: Tugs normally join vessels just inside harbour entrance. Use ship's or tug's lines optional; if tug lines used an additional charge of 10% of the tonnage will be added. For tug service call ship-to-shore tug Idaho, FM Channel 51.

BERTHING: See "Developments".
STEVEDORES: Work gangs for loading and unloading provided by the Pinney Dock and Transport Company.
MEDICAL: Vessels requiring medical attention call U.S. Coast Guard station located in the main river by calling AM Channel 20. Ambulance and hospital service available. No inoculation, vaccinations, or fever certificates required.
DENSITY: Fresh water.
FRESH WATER: Available at stevedoring dock.
FUEL: Available on 24-hour notice.
FIRE PRECAUTIONS: City fire department. Also water line on face of the dock available.
GANGWAY/DECK WATCHMEN: Overseas stevedoring dock enclosed wire fence, watchmen on dock at all times, guard at main gate.
OPENING/CLOSING HATCHES: Optional by crew or stevedores.
CUSTOMS ALLOWANCES: Only allotments per person consumed aboard allowed.
IDENTIFICATION CARDS: Required.
CONSULS: Nearest at Cleveland.
REPAIRS: All types of deck and engine repairs available; also topside shell repairs.
REPATRIATION: Can be arranged.
AIRPORT: Nearest airport approx. 10 miles South with commuter services to Cleveland Hopkins Airport. Cleveland Hopkins Airport approx. 70 miles West.
TIME: Local Eastern Standard Time except from May to October – Daylight Saving Time.
HOLIDAYS: Stevedoring docks double time on holidays and time plus one-half on Saturdays and Sundays.
POLICE/AMBULANCE/FIRE: Police, 998-2221; Ambulance, 998-2345; Fire, 998-2121.
TELEPHONES: No provisions for placing telephones aboard vessels.
SHORE LEAVE: Crew allowed ashore.
DEVELOPMENTS: A second slip (length 2,000 ft.) and a third pier (length 2,000 ft., depth 28 ft.) have been completed.
AUTHORITY: Ashtabula Port Authority, P.O.Box 889, Ashtabula, Ohio 44044. *Tel:* (216) 992 8428. *Contact:* Robert Weiner, Chairman. Nicholas Paulchel, Harbour Master.

ASTORIA, Oregon: 46.11 N. 123.50 W.

(See Plan Book)

PILOTAGE: Columbia River Bar Pilots, P.O. Box 81, Astoria, Oregon, 97103. Tel 503-325-2641. Also see "General – Pilotage" before first U.S.A. port (Albany).
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
GENERAL: The Port of Astoria Terminals is located 10 miles up-stream from the mouth of the river and 86 miles downstream from the City of Portland, Oregon.

The channel in the Columbia River, from the ocean to Astoria, has a width of 500 ft. and project depth at low water of 40 ft.

At Astoria, the mean range of tide is 7.5 ft. with extreme tidal range of about 12 ft. On a flood tide a velocity of 2 knots is seldom exceeded, but the velocity sometimes attains 5 knots during the ebb tide. This variation is due largely to the strength of the river discharge, with maximum velocity during the freshets which occur during the months of May, June and July. These freshets, however, do not effect the height of water at Astoria. The Columbia River is navigable throughout the year.

A total of 9 berths at the Port of Astoria Terminals are periodically dredged to 35 ft. and 40 ft. at zero tide, but depths vary from time to time.
TUGS: Tugs are available for assisting ships at the option of the vessel.
BERTHING: The 3 piers, including Ro-Ro facilities and barge ramp, comprising the Port of Astoria Terminals are located in the Western part of the City of Astoria at the confluence of Youngs Bay and the Columbia River. Astoria is served by 1 railroad, 3 major highways and 6 barge lines. The piers extend to the main ship channel, allowing vessels to berth or sail at any time. The terminals are operated by the Port of Astoria Commission as a public property open to all carriers and shippers.

Pier No. 1:

Location: Foot of Portway Street, adjacent to Pier No. 2, and separated therefrom by a water slip 400 ft. in width.

Warehouse Shed: Mill type hollow tile wall construction. 167,000 sq.ft. floor area. Floor load of 600 lbs. per sq.ft.

Shed width 92 ft., slip side and face or end.

Shed length 1,150 ft. on slip side; 520 ft. face or end. Blacktop floor. Complete automatic sprinkler system.

Principal Commodities: General commodities, break bulk, plywood, frozen tuna, grain, sacked goods.

Berths: 2 vessels. 650 ft. face or Northerly end; 1,000 ft. slip or Westerly side, depth 40 ft.

Pier Apron: Width 24 ft., slip side; 16 ft., face or end. Dock is 16.1 ft. above MLW.

Equipment: Dock tractors, fork lift trucks, trailer trucks, hand trucks and other necessary miscellaneous cargo handling equipment.

Bagging Facilities: Bagging facilities for dry bulk commodities such as urea, pulses and dry beans. Usage and rates will be negotiated. (Contact Traffic Department).

Water Services: Portable meters and hose connections for vessel service. Rates of delivery, 10,000 g.p.h. Water pressure about 110 p.s.i.

Fire Protection: Complete automatic dry pipe sprinkler system and hose stand pipes.

Electric Current: Lighting 110 volt, 2 phase, 60 cycle, 35 amperes, alternating current. Portable meter and plug-in service available at all berths.

Grain Elevator: 1,100,000 bushel capacity. Unloading capacity, cars to elevator, 8,000 bushels bulk wheat per hour. 2 spouts at end of gallery from elevator for loading to vessels, capacity 20,000 bushels.

Pier No. 2:

Location: Between Pier Nos. 1 and 3. Separated from Pier No. 1 by a water slip, 400 ft. wide, and from Pier No. 3 by a water slip, 350 ft. wide.

Principal Commodities: Lumber, logs, general cargo, break bulk, bulky cargo in open storage.

Berths: 5 vessels; 425 ft. face or Northerly end; 1,307 ft., slip Easterly side, 40 ft. depth; 1,445 ft., slip Westerly side, 35 ft. depth.

Open Dock: 600,000 sq.ft. Dock level 16.1 ft. above MLW.

Equipment: Modern lighting. Tractors, fork trucks, etc. as listed under Pier No. 1, when required. Portable meters and hose connections. Pipe lines on pier for bunkering.

Water Service: City service. Portable meters and hose connections for service to vessels. Rate of delivery, 10,000 g.p.h. Water pressure about 110 p.s.i.

Electric Current: Lighting 110 volt, single phase, 60 cycle, 35 amperes, alternating current. Power 220 volts, 3 phase, 60 cycle, 35 amperes, alternating current. Portable meters and plug-in service at all berths.

Pier No. 3:

Location: Foot of Hamburg Avenue, (adjacent to and separated from Pier No. 2 by water slip 350 ft. wide).

Principal Commodities: Canned goods, wood pulp, paper products, general cargo, break bulk, dry bulk.

Berths: 2 vessels. 1,750 ft. slip on Easterly side; 35 ft. in depth.

Warehouse Transit Shed: Floor area 248,000 sq.ft. Floor load 600 lbs. East side; 1,000 lbs. West side, per sq.ft.

Shed width 160 ft. Shed length 1,550 ft. Mill type reinforced concrete walls and floor construction. Concrete and blacktop floor. Complete automatic sprinkler system.

Pier Apron: Width, slip side 24 ft. Dock level, 16.1 ft. above MLW.

Equipment: Tractors, trailers, fork trucks, etc., as listed under Pier No. 1, when required.

Barge Ramp: A barge ramp capable of handling loads up to 50 tons is now in operation at the outer berth of Pier No. 3. The ramp is utilised for transfer of cargo from barge or vice versa.

Water Supply: Portable meters and hose connections for service to vessels. Rate of delivery, 10,000 g.p.h. Water pressure about 110 p.s.i.

Fire Protection: Automatic dry sprinkler system. Hose stand pipes.

Electric Current: Lighting 110 volts, single phase, 60 cycle, 35 amperes, alternating current. Power 220 volts, 3 phase, 60 cycle, 35 amperes, alternating current. Portable meters and plug-in service available at all berths.

CONTAINER HANDLING: Container Yard (West of Pier No. 3) 11.5 acres paved, fenced and lighted.
CRANES: 30 ton crane on Pier No. 2.
STEVEDORES: Stevedore Services of America and Jones-Oregon.
FRESH WATER: Available, delivery to vessel through portable hose.
FUEL: Bunkering oil facilities for ocean vessels are maintained at Pier No. 2. The rate of delivery for heavy fuel oil is 1,500 b.p.h., and for diesel oil, 800 b.p.h.
DEVELOPMENTS: Proposed coal transhipment facilities (East Skipanon River and Tongue Point Development), also proposed Land Bridge Terminal at Tongue Point.
AUTHORITY: Port of Astoria, 1 Portway, Astoria, Oregon 97103. *Tel:* (503) 325 – 4521. *Contact:* Steve Felkins, Director.

BALTIMORE, Maryland: 39.17 N. 76.35 W.

(See Plan Book)

PORT LIMITS: North Point is the outer limit of Baltimore Harbour for arrival purposes. The anchorage off Annapolis at Thomas Point, for vessels assigned thereto, is considered arrived for charter purposes.
DOCUMENTS:

3 Copies Cargo Manifest (Form 1302).
Direct Arrival – 2 All Cargo on Board.
1 Cargo this Port.
Coast Wise Arrival – 1 All Cargo on Board.
2 Cargo this Port.
3 copies Crew Manifest (curio list) (Form 1304).
3 copies Stores Lists (Form 1303).
3 copies Passenger List (Form I-418).
3 copies Crew List (Form I-418).

Customs Boarding Officer will also examine Ship's Register and Loadline Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port.

Master's Oath (Customs Form 1300) 3 copies.
General Declaration (Customs Form 1301) 3 copies.
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certificate Crew List (Visa Crew List – U.S. Immigration).

PILOTAGE: Each vessel entering the Chesapeake Capes under foreign flag or carrying foreign cargo is required to employ a Pilot of the Association of Maryland Pilots. The Association maintains a pilot boat which is anchored at the entrance of the Chesapeake Capes. Pilots are furnished with a small transistorised portable radio unit, which provide ships' bridge to bridge communication system to ensure navigational safety while traversing the waters of Chesapeake Bay. It is a positive means of communication to ensure ship's position reporting, the safety and movement of vessels, as well as messages related to the operational needs of vessels proceeding to the port, and provide the Pilots' communications instructions expediting operations of vessels when they are aboard.

The pilot boat has a black hull and white superstructure and is located 2 miles North of Cape Henry Lighthouse.

The pilot ladder should be 2 ft. above the water – manropes not required.

Send ETA pilot station via WMH 48 hours before arrival and confirm 24 hours before arrival. Also advise if change in ETA is over 2 hours.

The ETA message should state whether arriving via Chesapeake and Delaware Ship Canal or Cape Henry, and deepest draft and speed of vessel.

Cable address of Pilot: "Marpilot, Baltimore", pilot vessel "Maryland" on VHF Channels 11, 13 and 16. Telex: 87-574.

Shipmaster's Report: June 1981. I had the services of 2 Pilots from the pilot station at the entrance to Chesapeake Bay to Sparrows Point, and back out. The Pilots themselves are trying to have 2 Pilots as law. To have 1 Pilot on a deep drafted vessel such as we were for over 12 hours, sometimes in thick fog, is unfair and whilst faster light drafted vessels can cover the same distance in less than 12 hours the pilotage time is still lengthy.

ANCHORAGES: Numerous anchorages located within harbour limits for ocean-going vessels. 6 such areas are available for vessels of light and deep draft. 4 of these anchorages are located on the East side of the main ship channel between the entrance channel to the Central Soya Company Grain Elevator and Fort Carroll. 2 are on the West side of the main ship channel. At Thomas Point, approximately 22 miles South of Baltimore, there is an emergency anchorage in natural deep water with depth of 50 ft. or more. The U.S. Coast Guard is responsible for the anchorages, but in practice, the Pilots make the assignments.

RESTRICTIONS: There are two different approaches and exits to the sea lanes. The principal route is by way of the Southerly course through the Chesapeake Bay and Cape Henry to the ocean. The distance by this route is approximately 150 nautical miles. There is a main ship channel 20 miles long from Baltimore to the Chesapeake Bay; this channel is 800 ft. wide and 42 ft. deep.

The other route to the sea lanes is via the Chesapeake and Delaware Ship Canal. This offers a short protected route between Baltimore and other leading North Atlantic ports by way of Delaware Bay and allows ships serving North Atlantic European ports to save about 115 miles sailing distance.

Entrance to the Chesapeake and Delaware Ship Canal is located about 50 miles North of Baltimore. The width of the channel is 450 ft. Max. draft 31 ft. (Temporary condition, normally 32 ft.). The canal itself is 15 miles in length, and from the Delaware Bay side the distance to sea lanes is about 60 miles. Navigation lights are maintained so the canal is open to navigation day and night. Mean range of tide is 1.1 ft. at Baltimore. Currents are 0.8 knot on flood and ebb tides.

MAX. SIZE: Length 1,250 ft., draft 42 ft. at Consolidated Coal Pier. No restriction on beam.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: The port has an efficient fleet of tugs in operation. The tugs usually take vessel in tow at Francis Scott Key Bridge. Tug's lines are used at no extra charge.

RADIO: Marine Radio Station WMH with a world wide range operates on 500 kHz., 8610 kHz. and 12952.9 kHz.

BERTHING: Major piers and terminals:

Abbreviations:
WC = Whirley Crane (Tower Gantry)

CRANES: *Floating:* 3×35 ton, 1×130 ton, 1×85 ton, 1×150 ton, 1×275 ton.

One stiff legged derrick, capacity 350 tons, located at South Locust Point Marine Terminal.

BRIDGES: The Chesapeake Bay Bridge-Tunnel is located across the entrance to the Bay, between Cape Henry and Cape Charles. This vehicular crossing consists of fixed causeways and bridges 15 miles in length, and 2 tunnels – one under the Chesapeake Channel and one under the Thimble Shoal Channel. A horizontal clearance of 1,400 ft. at 60 ft. water depth exists.

The Francis Scott Key Memorial Bridge crosses the main ship channel in Baltimore Harbour and is 8,640 ft. long, with main channel horizontal clearance of 800 ft. and vertical clearance of 185 ft. Vessels en route to the harbour from the ocean via the Chesapeake Bay pass under the Chesapeake Bay Bridge (2 parallel bridges), about 138 statute miles above the ocean entrance to the bay. This bridge is 3.7 miles long from shore to shore; its Western end is 0.5 miles S.W. of Sandy Point and its Eastern end is on Kent Island, 4 miles S.W. of Love Point. Least clearance width of 1,500 ft. and vertical clearance 186 ft.

By way of the Chesapeake and Delaware Canal the least horizontal clearance is 500 ft. and vertical clearance of 133 ft.

The Curtis Creek and Middle Branch sections of harbour are each crossed by highway and railroad bridges.

DENSITY: Fresh water.

TANKERS: See "Berthing".

MEDICAL: All facilities available.

FRESH WATER: Can be supplied at all berths. Water barges available.

FUEL: All grades supplied by numerous oil companies by barge or ex-wharf at the oil berths.

REPAIRS: *Bethlehem Steel Corporation.* At the Sparrows Point Shipyard vessels up to 300,000 d.w.t. are constructed, and the facilities include all the necessary equipment for the construction of large and small vessels.

2 other marine yards, 1 of which is located at Key Highway, while the second is located on the Eastern end of Locust Point adjacent to Fort McHenry. The facilities of these plants include 3 dry docks, 2 graving docks and 9 outfitting piers. These facilities handle all types of dry docking and ship repairs. These facilities are closed pending sale.

Maryland Shipbuilding and Drydock Company. This large marine shipyard is located on the water front at Fairfield. Plant facilities include 4 dry docks, 5 outfitting piers and 1 side launch way. All types of ship repairs are handled in this yard.

In addition to the above mentioned facilities there are numerous companies specialising in minor ship's repairs, tank cleaning, repair of all types navigational and optical instruments, fumigation.

Searle Consortium Ltd. and their sister company, Seaward Marine Services provide the following:

Diving and general underwater inspection services.

Underwater hull cleaning.

Salvage survey and underwater repairs of a salvage nature.

Assistance in the refloating of stranded vessels.

Assistance in the arranging/engineering of towage.

AIRPORT: BWI Airport, 8 – 10 miles or 20 minutes from harbour by vehicle with 35 regular scheduled airlines and 580 flights daily.

BANGOR (including Brewer and Orrington), Maine: 44.49 N. 68.47 W. (See Plan Book)

LOCATION: Bangor is located on the West bank of the Penobscot River at the head of navigation. Brewer is on the East bank of the river opposite Bangor and Orrington is on the East bank of the river 2 miles below Brewer.

DOCUMENTS:

1 copy of Crew List.
1 copy of Passenger List.
2 copies of Stores Lists.
2 copies of Foreign Purchase Lists.
2 copies of Inward Foreign Manifest.
1 form 1300 (Master's Oath on entry of vessel).
2 forms 1374 outward foreign Manifest.

PILOTAGE: Pilotage is compulsory for all foreign vessels and U.S. vessels under register in the foreign trade, with a draft of 9 ft. or more, entering or departing from any port or harbour within the waters of Penobscot Bay and Penobscot River North of a line drawn from Marshall Point Livat Port Clyde, thence to Matinicus Rock Light, and thence to Western Head, Isle Au Haut. Pilotage is optional for vessels powered by sail.

Cable PENBAY via Chatham Radio. Ship's Agent usually notifies Pilot 48 hours and 24 hours before arrival at the pilot station. Pilot boat usually stands by on their radio 1 hour before ETA on RT 2182 and VHF Channel 16. Pilot boards at Monhegan Is., 43° 45′ N., 69° 22′ 5″ W. Pilot uses a white boat 36 ft. long and displays "H" by day and the Pilot signals at night. Vessels awaiting Pilot in bad weather must heave-to outside.

ANCHORAGES: The usual anchorage for vessels waiting at the river entrance for a towboat or favourable wind and tide is Northward of Fort Point on the West side of the channel.

Vessels bound up the river anchor anywhere in the channel where soft bottom is found. Vessels towing to Bangor, if the tide does not serve, often anchor off Winterport. On account of the strong ebb current, it is better for vessels going to Bangor, particularly large vessels, to anchor off Fort Point and start up the river about 3 hours after LW.

RESTRICTIONS: CHANNEL:– The controlling depth in the marked channel in Penobscot River from Bucksport to Bangor is 19 ft. to Winterport, thence 13 ft. to Bangor. The channel is marked by buoys to a point about 1.5 miles below South Brewer.

Caution: Deep-draft vessels should exercise caution above Fort Point as depths of 31 ft. to 32 ft. are in mid-channel, about 0.5 mile Eastward of Sandy Point, and rocky ledge, covered 34 ft., also in mid-channel, is reported about 0.2 miles S.W. of Odom Ledge Daybeacon.

The most difficult sections for vessels are off Lawrence and Luce Coves just North of Bucksport where it is difficult to mark the best water and off Frankfurt Flats where large vessels experience difficulty with the sharp turns.

The channel in Penobscot River is crooked and narrow in places, and frequent changes occur. Vessels should not attempt to carry drafts greater than 10 ft. to Bangor at LW. With a deeper draft a Pilot or towboat should be used; 14 ft. or 15 ft. is carried to Bangor and Brewer at HW, and deeper drafts occasionally to the oil berth at South Brewer. The safest time is on a rising tide. Navigation of the river at night is extremely dangerous due to lack of lighted navigation aids. After unusually high tides many logs, dangerous to small craft, are in the river. At times of maximum ebb currents, buoys are occasionally pulled under.

Tides: The mean range of tide varies from 10.3 ft. at Fort Point to 13.1 ft. at Bangor. Currents of 3 knots are not unusual from Odom Ledge to Orrington, and during Spring runoff currents approaching 5 knots may be encountered. Because of these currents, larger vessels should use caution navigating the river. Passage up the river is more advisable during flood current.

Ice impedes but usually does not prevent navigation above Winterport for nearly 5 months each year, beginning about December. During extreme Winters the river is closed to the mouth. The most difficult place below Winterport is abreast Fort Knox, where ice jams occur. If vessels can pass this point, they usually can go to Winterport. The river is kept open by an icebreaker, which prevents much of the damage that might otherwise be caused by ice and freshets. However, in recent years, according to local information, there has been very little ice and the river has seldom frozen over below Bangor. The brackish water formed by tidal action and the river current no doubt have contributed to this.

Freshets occur in the river during March and April; at times they are dangerous to vessels.

MAX. SIZE: At present ships of 560 ft. are taken up the river 2 hours before HW during daylight. Size and draft of ship depend on the berth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels arriving Bangor use radio station at Chatham Mass., or call on the R/T through station WOU at Boston, Mass.

TUGS: 4 tugs available up to 1,200 h.p. Tugs join at Belfast to assist in turning and berthing.

BERTHING:

Texaco Oil Co. Terminal: A timber pile, timber-decked pier, approximately 5,250 sq.ft., used for landing oil tankers. There are 8 storage tanks and 1 warehouse/office building with 1,920 sq.ft. of floor space.

Mobil Oil Co.: A timber crib pier approximately 8,500 sq.ft., used for landing tankers. There are 10 storage tanks and a garage at this facility.

Webber Terminal Inc.: A timber crib pier, approximately 2,340 sq.ft. used for landing tankers. Adjacent to this pier, there is another timber crib pier, approximately 5,280 sq.ft., also used for landing tankers. There are 2 storage tanks and a storage building with 480 sq.ft. of floor space.

Astroline Petroleum Corp. of Maine: There is a log filled bulkhead used for landing tankers. This facility includes 5 storage tanks and 1 tool shed.

Bangor Municipal Dock: A new wooden and steel float with gangway, 1,500 sq.ft. located just below the Joshua Chamberlain Bridge; also 4×4 ton guest moorings are available for recreational use.

Webber Tanks Inc. – Brewer: A rock and timber crib, timber decked pier, approximately 7,200 sq.ft., used for landing tankers. There are 5 storage tanks and a warehouse with approximately 3,850 sq.ft. of floor area.

C. H. Sprague – Brewer-Orrington: A timber pile wharf, approximately 1,600 sq.ft., used for landing tankers. The wharf is in Orrington and fuel is pumped to 3 storage tanks located in Brewer. There is one building, a pump house, approximately 600 sq.ft.

Hampden Recreational Boating Facility: 2 launch ramps with ground float; landing dock; 2 guest moorings, 8 ft. MLW to ramps, 80 ft. wide channel.

Town Launch Ramp – Orrington. This is a paved launch ramp; no docking facilities. There is a 40-space (30 car – 10 trailer) gravel parking area.

BRIDGES: 1 suspension bridge below Bucksport with a height of 135 ft. at high water. Horizontal clearance is 750 ft.

The overhead power cable that crosses the river just above Bucksport has a clearance of 145 ft.

MEDICAL: No advance notice required. There are 3 large hospitals.

TANKERS: 1 berth for ocean-going vessels. 1×8 in. hose with a 10 in. line. 22 ft. at low water. Also see "Berthing".

DENSITY: Nearly fresh water.

FRESH WATER: Supplied at ocean-going berth at the rate of 50 t.p.h.

FUEL: Only available at oil berth.

CERTIFICATES:

Load-line.
Foreign Clearance.
Safety Certificate.
Radio Operator's Licence.

CUSTOMS ALLOWANCES: 200 cigarettes per man, 1 bottle wine/spirits per man.

IDENTIFICATION CARDS: Form I–95 must be filled out upon arriving unless seaman has made one out before on a previous trip.

CONSULS: None.

REPAIRS: Only machinery repairs.

REPATRIATION: Arrangements must be made ahead of time by telegram.

TIME: GMT minus 5 hours in the Winter and minus 4 hours in the Summer.

AIRPORT: Bangor International is 2 miles from the city.

POLICE/AMBULANCE/FIRE: Police 9427377; Ambulance 9893311; Fire 9422293.

TELEPHONES: None put aboard. 1 pay phone on ocean-going berth.

SHORE LEAVE: Allowed subject to Immigration approval.

AUTHORITY: City of Bangor, Dept. of Harbour and Wharves, Harbour Master.

BATON ROUGE, Louisiana: 30.28 N. 91.12 W.

DOCUMENTS:

Original and 3 Crew Lists.
Original and 3 Passenger Lists.
Clearance from last foreign port.
Original and 3 copies Inward Manifest.
Derat Certificate.
Load-line Certificate.
Safety Certificate.
Ship's Register.
3 copies Curio List.

PILOTAGE: Advise Agents ETA sea-buoy 48 hours in advance. Agent then makes arrangements for Pilots. Seven 46 ft. pilot boats – red hulls white cabins, flying white and blue pilot flags. Suggest pilot ladder 6 ft. above water level, no life-line. Call Channel 2738 or VHF Channel 9, 30 miles to 40 miles out. Safe anchorage within 2 miles South Pass or S.W. Pass entrance.

ANCHORAGES: General anchorage Baton Rouge as directed by Pilots.

RESTRICTIONS: No night-time restriction for entry or clearance, docking or undocking.

MAX. SIZE: Exxon Oil Docks can accommodate 1,000 ft. vessels – unlimited breadth; draft governed by S.W. Pass – project depth 40 ft. usually restricted from 37 ft. to 30 ft. draft May through August, due to low water and silting.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: ETA cables can be routed through Tropical Radio WNU New Orleans.

TUGS: Available at Baton Rouge for docking and undocking. Ship's lines used.

BERTHING: No time restrictions on berthing. 2 general cargo docks with total 400,000 sq. ft. transit shed and 2,265 ft. long, 40 ft. wide apron with double marginal tracks; grain elevator and bulk terminal at Burnside, for handling ores, concentrates, etc.; container marshalling yard adjacent cargo docks; also 20-acre paved staging area for project cargo.

BULK HANDLING FACILITIES:
Grain: Cargill Grain Elevator: Max. draft 38 ft. Loading rate 1,000 t.p.h. Silo storage 160,000 tons.
Dry Bulk: Burnside Terminal: 2 unloading gantries for bauxite. Rate 2,000 t.p.h. Max. draft 39 ft.
Molasses: Molasses terminal, leased to Manard Molasses Company, has an 11 million gallon capacity.
Coal: Coal Monitor One: The ultimate in the midstream transfer of coal, Coal Monitor One is a joint venture of Ryan-Walsh Stevedores and P & C Bituminous Coal, Inc. The device has the ability to sample and blend as well as aerate and cool the coal as it is transferred from barge to vessel.

Coal has become a major commodity at the Port with the safe, convenient anchorage buoy facility for ocean going vessels and the connection through major rivers and waterways to the primary coal-producing states. Tonnage is expected to reach 2 to 3 million tons of coal per year at this facility.

Coal Monitor One can handle vessels with airdraft of 65 ft. and beam 135 ft. Loading rate 1,800 tonnes per hour.
Midstream Transfer: The Port's midstream anchorage buoy facility is located in the Mississippi River just opposite its docks for the transfer of cargo between barges and ships. Primarily for the transfer of export coal, the operation is capable of handling import or export steel, salt, coke, or other bulk, heavy lift and bargeborne commodities by the use of floating cranes.
BRIDGES: Sufficient clearance for all stages of river at all times; 2 bridges cross at New Orleans, 1 at Baton Rouge and 1 at Donaldsonville.
CRANES: 2×150 ton crawler; 2×70 ton crawler; 1×50 ton motor crane; 2×45 ton motor crane; 2×35 ton motor crane; 1×30 gantry and 5×100 ton rail car pushers.
STEVEDORES: May be obtained by Agent with 4 hours' notice.
MEDICAL: Agents should receive 24 hours' notice when medical attention is required. 2 excellent hospitals at Baton Rouge, U.S. Public Health Hospital at New Orleans.
TANKERS: Oil tankers load various petroleum and chemical products at Exxon Oil Docks with sufficient hose, reducers, etc., available. Oil residue slop facilities available.
DENSITY: No tide – fresh water at all times.
FRESH WATER: At public docks. At Exxon Oil Terminal simultaneous with loading or discharging at no cost. Ship's crew to make water connections.
FUEL: All grades subject inquiry. Barging essential.
FIRE PRECAUTIONS: Usual fire lines and sprinkler systems.
GANGWAY/DECK WATCHMEN: Only if Master requires.
OPENING/CLOSING HATCHES: Depending on terms of charter, usually by ship's crew.
CUSTOMS ALLOWANCES: Tobacco, each crew member allowed 300 cigarettes. Master allowed reasonable quantity. Wine and/or Spirit, each crew member allowed 1 bottle each of wine and spirits. Master allowed reasonable quantity.
CARGO GEAR: Safety certificate required for ship's gear.
IDENTIFICATION CARDS: Usual passports.
CONSULS: Norwegian only, all other consuls at New Orleans – 80 miles distant.
REPAIRS: All types of deck and engine repairs may be carried out.
SURVEYORS: *Testing, Sampling, Weighing and Cargo Certification:*
Caleb Brett USA Inc., P.O.Box 315, Baton Rouge 70821. Tel: 292-4410.
Chas. Martin, Inspectors of Petroleum, 2835 Plank Rd., Baton Rouge. Tel: 355-8833.
Pittsburgh Testing Lab., 2166 Monroe St., Baton Rouge. Tel: 355-2641.
Saybolt, E. W. Co., 10023 Mammoth Avenue, Baton Rouge. Tel: 925-1231.
Transport Management & Consulting, Inc., 4137 Sherwood Forest Blvd., Suite 110, Baton Rouge 70816. Tel: 293-3025.
USDA, FGIS, Port Allen. Tel: 389-0373.
USDA, FGIS Field Office, Lutcher. Tel: 536-2811.
Marine Surveyors:
Jorgensen, Capt., N.E. 865 E. Riveroaks, Baton Rouge. Tel: 926-6828.
McAnally Engineering Co., Box 66012, Baton Rouge 70809. Tel: 766-8992.
National Cargo Bureau, 7414 Perkins Rd., Suite 180, Baton Rouge. Tel: 769-6353.
REPATRIATION: Crew repatriation and crew changes may be made.
AIRPORT: 6 miles to Ryan Airport, served by regular airlines.
TIME: Local time is Central Standard Time – GMT minus 6 hours; from April through October local time is CS daylight saving time, GMT minus 5 hours.
POLICE/AMBULANCE/FIRE: Tel. Nos. Public Dock: Police 343 – 9234; Ambulance 343 – 6691; Fire 343 – 6691.
TELEPHONES: No arrangements for placing telephones aboard.
GENERAL: Tankers in ballast advised of drift wood conditions in river and ballast their vessels accordingly so as to avoid propeller damage.
SERVICES: Because of restricted river inadvisable adjust compasses. This is usually accomplished below New Orleans where river of sufficient width to permit large vessels to swing. 3 firms engaged in tank cleaning, namely, Watson Marine, Robin Hood Fleeting and Port Allen Marine Cleaning Plant. Slop facilities available at the Exxon Oil & Refining Co. dock.
SHORE LEAVE: Shore leave permitted except when detained aboard by U.S. Immigration.
SHIP SUPPLY SERVICE: *Launch Service:*
Capital Marine Supply, Inc., Box 3018, Baton Rouge. Tel: 343-8379.
Tri-G Marine Supply, Inc., Box 3808, Baton Rouge. Tel: 344-7664.
DELAYS: Normally no delays at Exxon Oil docks in berthing except when vessel's tanks unsuitable for loading. Normal delay at city wharf is 1 day awaiting berth.
NOTICE: To all Masters from a Ship's Agent:
Please be advised that the Agent will need a copy of the Notice of Readiness and Dry Tank Certificate. The Agent will pick these two certificates up from the Master on sailing of vessel. These are needed by the Agents to send out to the Owners and/or Charterers along with the other documents. We have been having problems receiving these documents from the terminal and/or Cargo Surveyor. The terminal will require, on the vessel's arrival at the berth, one copy of the Bill of Lading and/or Customs Manifest. It would be appreciated if you could make an additional copy of these documents when they are prepared by your vessel.
AUTHORITY: Greater Baton Rouge Port Commission, P.O.Box 380, Port Allen, Louisiana 70767. *Tel:* (504) 387-4207. *Contact:* John B. Dutton, Executive Director, T. Med Hogg, Port Sales Manager.

DOCUMENTS, PILOTAGE, etc.: Refer to "Houston".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO/VHF: Exxon Dock "KNQ-Baytown" on VHF Channel 19.
TUGS: Available if required.
BERTHING: All berths at Baytown 38 ft. (salt water).
STEVEDORES: Available. Call L. S. Mitchell Co. Tel: 713-426-4575.
MEDICAL: All medical assistance available.
DENSITY: Brackish to fresh.
FRESH WATER: Available ex-wharf.
FUEL: Bunker C and MDO only, no intermediate fuels. No bunkering by barge.
GANGWAY/DECK WATCHMEN: Required only if crew detained by Immigration.
CUSTOMS ALLOWANCES: Each man 300 cigarettes or 100 cigars or 1 lb. tobacco; 1 quart wine/spirits.
STORING: Permissible with advance notice/approval.
REPAIRS: Sould be cleared with terminal before vessel arrives at dock.
SHORE LEAVE: No restrictions. Terminal bus transports crew from dock to refinery entrance.
AUTHORITY: Port of Houston Authority.
Operator: Exxon Shipping Company, U.S.A., P.O.Box 3251, Baytown, Texas 77520. *Tel:* 425-4452, 425-4453. *Telex:* 510-891-7885 Exxon Dock-Bton. *Contact:* Dock Co-ordinator.

BEAUMONT, Texas: 30.05 N. 94.05 W. (See Plan Book)

LOCATION: On Neches River, above Sabine Lake.
DOCUMENTS, PILOTAGE, RADIO, etc., Refer to "Port Arthur".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs used for docking, 1 for undocking.
BERTHING:

Wharf No. or Name	*Length (ft.)*	*Depth (ft.)*	*Remarks*
1	580	30	
2, 3 and 4	1,373	38	60 ton gantry crane
5, 6 and 7	1,483	36	
Harbour Island Marine Terminal	1,200	40	220 ton mobile crane
Carroll St. Wharf	765	40	
Grain Wharf	543	40	3.5 million bushel grain elevator

CARGO HANDLING FACILITIES: For container ships, conventional break-bulk ships, heavy lift ships or side-loading Ro-Ro ships, the Harbour Island Marine Terminal – 1,200 linear ft. berthing space; 120,000 sq.ft. transit shed; 93 ft. wide apron facing transit shed; 240,000 sq.ft. open wharf space; 8 acres heavy duty hard stand adjacent to open wharf, backed up by 25 more acres for vehicle marshalling; twin marginal rail tracks for full length of wharf; 220 ton capacity truck-mounted mobile crane for containers and heavy lifts; 40 ton forklift machine with, expandable spreaders for container handling and 3-high container stacking or, blades for heavy cargo; 600 ft. undercover working track for all-weather rail car unloading inside transit shed; 200 linear ft. of truck height unloading platform along rear of open wharf; 20 ft. high × 18 ft. wide shed doors for high wide loads and entry for all-weather truck unloading or container stuffing; 40 ft. of water alongside; 1,200 lbs. per sq. ft. deck load capacity.

For stern loading Ro-Ro vessels, wharves 2 and 3 – 758 ft. in length with 75 ft. wide Ro-Ro platform at one end of the wharf. Ro-Ro platform deck elevation +15.89 ft. above mean low Gulf. (12 ft. 7 in. above average tide) 36 ft. of water alongside wharf; convenient roadway access to Ro-Ro platform from 15 acre storage area adjacent to the wharf; double marginal rail tracks for full length of wharf; 60 ton capacity gantry crane travels 700 ft. along face of wharf; 120,000 sq. ft. open wharf space; wharves 2 and 3 may also be used as an alternate to Harbour Island Wharf for containers, conventional break bulk, heavy lift or side loading Ro-Ro vessels. Covered wharf 4 is adjacent, extending total wharf length to 1,300 ft. and offering 57,000 sq. ft. covered area.

For security of cargo, all Port of Beaumont wharves are entirely within a chain link, barbed wire topped security fence, and all vehicular access is through the port's main gate, guarded 24 hours a day. The port is an approved outport of the Military Traffic Management Command, Eastern Areas, U.S. Army, is heavily used for shipments of military material, equipment and supplies, and is subjected to regular security inspections by Army personnel who have given the port high ratings.

For security of small, high value items that are considered especially subject to possible pilferage, the port will permit fencing and shelving of a limited designated security area within a transit shed.

For heavy lift requirements beyond the capacity of the 60 ton gantry or the 220 ton mobile crane, a 500 ton capacity derrick barge is available.

STEVEDORES: *Public Wharves:* Normal working hours 0800/1200 and 1300/1700 Monday to Friday.

TANKERS: Mobil Oil Co., distance from sea 49 miles, depth alongside 36 ft. Pan American Pet. Co., distance from sea 45 miles, depth alongside 38 ft.

Sun Oil Terminal:

Operators: Sunoco Terminals, Incorporated, P.O. Box 758, Nederland, Tx 77627. Tel: 713-727-2301.

Type of Terminal: Refinery. Handling Crude Oil & Lub.

Density: Fresh water.

Distance from sea: 37.4 miles.

Controlling Depth: From channel to berth – 39 ft. – 40 ft. Actual depth alongside – 40 ft.

Vertical clearance at High Water: 136 ft.

Max. length of berth facility: 150 ft.

Max. length of vessel to be moored safely: 900 ft. but that is absolute maximum and normally prefer not more than 850 ft.

Hoses: 4 × 12 in. (Crude). 6 × 6 in. (Lub).

Usual Loading Pumping Capacity: 60,000 bbls.p.h. (Crude). 2,000 bbls.p.h. (Lub).

Usual Discharge Pumping Capacity: 50,000 bbls.p.h.

Fresh Water: Available on 24 hour basis.

Fuel: Available ex-wharf.

Tugs: Per Pilot's requirements.

Anchorage: Max. draft 39 ft. (Two anchorages).

MEDICAL: All facilities available.

DENSITY: Fresh water.

FRESH WATER: Available at berths, or by barge.

FUEL: Available ex-wharf at Mobil terminal. All grades available by barge to other locations.

GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.

CUSTOMS ALLOWANCES: 300 cigarettes and 1 quart wine/spirits for each man.

IDENTIFICATION CARDS: Foreign crew require only Immigration landing permit.

CONSULS: Nearest at Houston.

REPAIRS, DRY DOCKS: Beaumont's Bethlehem Shipyard offers all types ship repair or reconditioning – plus vessel conversion and jumboizing. 2 side-launching ways over 800 ft. each. Floating dry dock with extreme length of 648 ft.; length on bottom 576 ft.; breadth at entrance, 87 ft.; and lifting capacity 17,500 tons. Active in design and construction of mobile drilling platforms and oil and gas production and storage facilities for service offshore.

HOLIDAYS: Longshore holidays are: New Year's Day: Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday; Texas Independence Day (March 3rd); St. Patrick's Day (March 17th); Good Friday; Memorial Day (last Monday in May); Emancipation Day (June 20th); Fourth of July; Labour Day; Columbus Day; Veteran's Day (November 11th); Thanksgiving Day; Christmas Day.

AUTHORITY: Port of Beaumont, P.O.Drawer 2297, Beaumont, Texas 77704. *Tel:* (409) 835-5367. *Telex:* 779486. *Cables:* Portbomont. *Contact:* James W. Martin, Port Director.

AGENT: Strachan Shipping Company, P.O.Box 1309, Beaumont, Texas 777014. Tel: 409-898-8390 Telex: 910-884-5119 Cables: "Strachan".

BELLINGHAM, (Including Cherry Point), Washington: 48.45 N. 122.31 W. (See Plan Book)

DOCUMENTS, PILOTAGE, etc.: Refer to "Tacoma".

HEALTH: See "Health: All Ports" before first U.S.A. Port (Albany). Illness reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available, join vessel in Bellingham Bay.

ANCHORAGE: Deep water available, but poor holding ground.

BERTHING: North Terminal, Berth Nos. 1 & 2 length 1,500 ft., depth alongside 34 ft. MLLW. Berth No. 3 length 400 ft., depth alongside 25 ft. MLLW. Georgia Pacific Dock, Berthing length 600 ft., depth alongside 28 ft. MLLW.

CRANES: 2 × 35-ton capacity rail-mounted gantry cranes at No. 2 berth.

STEVEDORES: 8 local gangs. Additional gangs imported if required.

TANKERS: Cherry Point: 48° 52′ N., 122° 30′ W. 3 oil jetties.

Arco Jetty: Depth 70 ft. Intalco Jetty: Depth 37.5 ft. Mobil Jetty: Depth 43 ft.

Deadweight limit in Puget Sound is 125,000 tons.

HOLIDAYS: See "Tacoma".

MEDICAL: All medical facilities available. 2 local hospitals.

DENSITY: Salt water.

FRESH WATER: Available at all wharves.

FUEL: Available. Barge delivery only.

GANGWAY/DECK WATCHMEN: Required only if detainees aboard.

CUSTOMS ALLOWANCES: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.

AIRPORT: 3 miles from the city.

TELEPHONES: Available.

AUTHORITY: Port of Bellingham, P.O.Box 1737, Bellingham, Washington 98227. *Tel:* (206) 676-2500. *Contact:* D. C. Fleming, General Manager.

BENICIA, California: 38.03 N. 122.10 W. (See Plan Book)

DOCUMENTS: Health and all General Information: refer to "San Francisco".

PILOTAGE: Port located about 25 miles above Golden Gate Bridge. River Pilot joins at San Francisco, using VHF for traffic information. Passage includes passing under 2 bridges, Carquinez Strait Bridge having the least clearance, with 146 ft. (HW) and 151 ft. (LW) (using North Channel). River passage is timed to arrive at Benicia at the first of ebb tide; this is approximately 2.5 hours after HW at Fort Point (Golden Gate).

ANCHORAGE: At San Francisco.

RESTRICTIONS: Tankers must lighten to 36 ft. fresh-water draft. This is done at No. 7 anchorage, 1.5 miles East of Alcatraz Island. This cargo will later be pumped back to the tanker as barges cannot overcome shore back pressure. Turning basin off the berths, radius 1,800 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: 1 small tug assists berthing. Only 1 normally required for unberthing.

BERTHING: Continuous wharf 2,404 ft. long with berth for 3 vessels. The West berth is used for the loading of petroleum products, and the Centre and East berths are equipped for handling general and bulk cargoes. East of this facility is another berth that will accommodate one tanker for discharge of crude oil (Exxon), depth alongside – 38 ft.

MOORINGS: 2 head wires, 4 breasts and 2 springs forward. This is necessary because of current off the bank during ebb tide. 2 stern lines, 2 breast lines and 2 springs aft.

BULK HANDLING FACILITIES: Waterside silos' capacity 26,000 tons with loading conveyor belt capacity 1,000 t.p.h.

TANKERS: Crude oil discharge through 2×12 in. Chicksan arms and 36 in. shoreline, 2.5 miles long. Shore tanks are situated 164 ft. above sea level, initial back pressure 65/70 p.s.i.

FRESH WATER: Available from shore lines.

FUEL: Can only be delivered by barge. Averate rate 300 t.p.h.

DEVELOPMENTS: Current plans call for development of a complete container terminal.

AUTHORITY: Benicia Port Terminal Company, P.O.Box 315, Benicia, California 94510. *Tel:* (707) 745 – 2394. *Contact:* A. D. Vincent, Vice-President.

BOCA GRANDE, Florida: 26.43 N. 82.15 W.

SHIPMASTER'S REPORT: 1978.

LOCATION: On the Eastern side of the Southern end of Gasparilla Island, about 60 miles South of Tampa Bay.

DOCUMENTS: See "Tampa".

Government Officials must travel from Tampa to Boca Grande at vessel's expense.

PILOTAGE: Compulsory for all foreign-going merchant vessels. The Pilot boards vessel near the sea buoy. Pilotage available 24 hours a day.

Request should be made to ship's Agents via Tampa Marine Operator. VHF Channels 16, 12 and 13.

ANCHORAGE: Good holding ground near the sea buoy (Lat. 26° 39.8′ N., Long. 82° 19.6′ W.)

RESTRICTIONS: The channel is less than 300 ft. wide in some places. The traffic is one way and vessels enter only when the stream is half strength or less. Strong Westerly winds may cause a swell which prevents vessels using the channel.

MAX. SIZE: Beam: 80 ft. with 24 ft. max. distance from outside ship's hull to inside hatch coaming.

Draft: 31 ft. 6 in. (9.60 m.) recommended by Pilots. The channel is 32 ft. deep at MLW.

Length: 550 ft. should be a maximum because distance between end bollards is 475 ft.

HEALTH: Same procedure as for any other U.S. port.

A U.S. Public Health physician is located on the island.

RADIO: Tampa Radio – WPD.

TUGS: A small tug for light towing operations is available.

BERTHING: A "T" headed pier 325 ft. long; distance between end bollards: 475 ft. This pier is for loading phosphates in bulk. Max. draft 32 ft. (SW). An oil handling berth with 33 ft. depth is located close Southward of the phosphate pier.

BULK CARGO: Material loaded: Phosphate Rock, Diammonium Phosphate, Triple Super Phosphate (granulated or run of pile) and Defluorinated Phosphate.

The shiploader travel is only 270 ft. so large vessels must shift alongside.

Maximum height of vessel: 34 ft. (10.36 m.) from the water line (MLW) to the rail or the hatch-coaming.

Trimming: Spout trimming is done free of charge. Mechanical trimming (levelling and/or filling) will be performed by the railroad at additional charge.

Loading Rates: Phosphate Rock: about 800 t.p.h spout trimmed.
Diammonium phos.: about 400 t.p.h. spout trimmed.
Triple S. Phos.: about 550 t.p.h. spout trimmed (granulated).
Triple S. Phos.: about 300 – 500 t.p.h. spout trimmed (run of pile).
Defluor. Phos.: about 400 t.p.h. spout trimmed.
When levelling and/or filling is required, loading rates are much lower and extremely variable depending on the construction of the ship.

Work Schedule: Only one work crew is available; therefore, only about 16 hours working time per day and about 8 hours rest period for crew.

Work performed without overtime charge to the shipper 7 days a week except following, no work holidays: January 1st, July 4th, Labour Day, Christmas Day.

TIDES: Approximately 2 ft. variation.

DENSITY: Salt water.

FRESH WATER: Available at phosphate loading berth.

FUEL: No local facilities. Prior arrangements with ample notice must be made via the ship's Agent at Tampa.

CONSULS: See "Tampa".

REPAIRS: No local facilities. To be arranged via Agents with ample notice.

SURVEYORS: The nearest Lloyds' office is at Jacksonville. American Bureau available from Tampa.

STORES AND PROVISIONS: No facilities available for normal ship chandlering. Prior arrangements should be made via Tampa.

GENERAL: Boca Grande is the older of "Seaboard Coast Lines" (SCL) two existing loading facilities, the new one being at Tampa. All Agents are based at Tampa, about 110 miles by road.

BOSTON, Massachusetts: 42.21 N. 71.05 W.

(See Plan Book)

DOCUMENTS:

3 copies Cargo Manifest (Form 1302), 2 copies showing all cargo on board, and 1 copy showing only cargo for this port.
3 copies Crew Manifest (Form 1304).
3 copies Stores List (Form 1303).
3 copies Passenger List (Form I-418).
3 copies Crew List (Form I-418).

Customs boarding officer will also examine Ship's Register, Safety Equipment Certificate and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States Port:
General Declaration (Form 1301).
Health Pratique.
Master's Oath (Customs Form 1300).
All foreign clearances.
Certificate of Financial Responsibility (Oil Pollution).
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.

PILOTAGE: Compulsory. Pilots cruise in boats which are designated by numbers painted in black figures 4 ft. high on deckhouse. The outer boat cruises outside the Graves.

ANCHORAGES:

ANCHORAGE No. 1. *Upper Harbour Anchorage:* Steam and motor vessels permitted to anchor in this basin anchor within the following area: S.E. of a line bearing 205° True from N.E. corner of Boston and Albany Pier No. 5, East Boston; N.E. of a line bearing 122° True from S.E. corner of Lewis Wharf, North Pier; S.W. of a line bearing 292° True from N.E. corner of Southernmost Airport Approach Pier; N.W. of a line bearing 025° True from Buoy No. 12, Fl.R.6 sec.

ANCHORAGE No. 2. *President Roads Anchorage* (40 ft. anchorage): All vessels anchoring in this basin anchor within an area beginning at a point bearing 237°, 522 yards from Deer Island Light; thence to a point bearing 254°, 2,280 yards from Deer Island Light; thence to a point bearing 261°, 2,290 yards from Deer Island Light; thence to a point bearing 279°, 2,438 yards from Deer Island Light; thence to a point bearing 319°, 933 yards from Deer Island Light; thence to a point bearing 319°, 666 yards from Deer Island Light; and thence to point of beginning.

President Roads Anchorage (35 ft. anchorage): All vessels anchoring in this basin anchor within an area beginning at a point bearing 256°, 2,603 yards from Deer Island Light; thence to a point bearing 258°, 3,315 yards from Deer Island Light; thence to a point bearing 264°, 3,967 yards from Deer Island Light; thence to a point bearing 261°, 2,290 yards from Deer Island Light; and thence to point of beginning.

ANCHORAGE No. 3. *Nantasket Roads Anchorage:* Vessels anchoring in this anchorage basin anchor within following area: Westerly of a line bearing 143° from wharf at Gallups Island to Bell Buoy No. 2, S.W. of Georges Island; Northerly of a line bearing 260° from Bell Buoy No. 2, Georges Island, to the Northerly end of Rainsford Island; Northerly of a line bearing 273° from the Northerly end of Rainsford Island to Bass Point, Long Island; Southerly of a line bearing 270° from the wharf at Gallups Island to Long Island.

ANCHORAGE No. 5. *Peddocks Island and Explosive Anchorage:* Vessels anchoring in this anchorage basin anchor within following area; S.W. of a line bearing 122° True from the Easterly end of Rainsford Island to the N.E. end of Rainsford Island to the N.E. end of Peddocks Island, N.E. of a line bearing 165° True from the Westerly end of Rainsford Island to the S.E. end of Peddocks Island.

RESTRICTIONS: There are 3 main channels of entrance from sea to President Roads.

Broad Sound North Channel from Broad Sound to President Roads from N.E. Dredged 35 ft. deep and 1,500 ft. wide and is deepened to 40 ft. in a width of 900 ft. to 1,100 ft. This channel well marked by lighted buoys.

Broad Sound South Channel from Broad Sound S.W. and Westerly to President Roads. Dredged 30 ft. deep and 1,200 ft. wide. This channel is well marked by buoys and ranges but most aids to navigation are not lighted.

The Narrows is channel leading into Boston Harbour from S.E. between Boston Lighthouse and Lovells Island on the N.E. and Point Allerton, Georges Island and Gallups Island on S.W. Depth is 27 ft. Width is generally 1,000 ft. except in a section between Narrows Light and Georges Island where shoaling on N.E side limits it to 700 ft. Channel is well marked.

The Main Ship Channel of Boston Harbour extends from President Roads to the mouths of the Chelsea and Mystic Rivers and to Charlestown Bridge on the Charles River. Channel has been dredged 35 ft. deep and 1,200 ft. wide to the inner end where widths decrease near the river mouths. It has been deepened to 40 ft. for 600 ft. width from President Roads to the mouth of the Mystic River, with a widening to 1,200 ft. at the bend just Northerly of Commonwealth Pier No. 5, South Boston.

Charles River is approach by water to Cambridge and Watertown. About 0.5 mile above the lower bridge there is a dam with a lock 45 ft. by 350 ft. with depth of 17 ft. over the lower sill. Depths above dam decrease gradually to 9 ft., basin level, at head of navigation.

Mystic River is approach by water to Everett, Malden and Medford. Controlling depths are 35 ft., from Mystic River bridge to approximately 1 mile above, thence 20 ft. from the 35 ft. channel to 800 ft. above the Malden Bridge to a point abreast Monsanto Chemical Company plant.

Chelsea River is approach to city of Revere. Channel from entrance to a point opposite the Tenneco Oil Co. terminal has a controlling depth of 35 ft.

Weymouth Fore River is approach by water to Quincy and Weymouth. Controlling depth is 30 ft. to Fore River Bridge. Controlling depth for a distance of 2,800 ft. above Fore River Bridge is 30 ft.

Town River extends N.W. from Weymouth Fore River at Quincy Point. River has a controlling depth of 27 ft. from deep water in Weymouth Fore River to a point opposite the Quincy Oil Co. terminal. Opposite Quincy Oil Co. terminal there is a turning basin 18 ft. deep, 400 ft. wide and 1,000 ft. long.

MAX. SIZE: The primary entrance to Boston Harbour is via the North Channel and President Roads. Controlling depth is 35 ft. MLW. Average rise of the tide in Boston is 9.5 ft.

Generally speaking, vessels drawing 40 ft. are taken at the top of the tide to White Fuel and Exxon only. Vessels going to berths in the Mystic River above the Mystic River Bridge are limited by the bridge's vertical clearance of 135 ft. MHW.

Vessels consigned to berths in the Chelsea Creek are limited to a length of 669 ft., beam of 90 ft. and draft of 36 ft. high water docking. Furthermore, vessels which exceed 630 ft. going above the Chelsea Street Bridge are restricted to daylight docking. Daylight sailing is required from the berths above the McArdle Bridge if the vessel is over 585 ft. long.

As a rule, vessels are docked bow in at the Chelsea Creek berths. If docked between the bridges, departure is stern first through the McArdle Bridge. If docked above the Chelsea Street Bridge, then on sailing, the vessel is turned in the basin West of the Gibbs and Union terminals.

The controlling depth in the channel leading to Weymouth Fore River is 28 ft. MLW. Vessels with a max. draft of 33 ft. 6 in. will be taken at high water, but it should be noted that docking and undocking in Fore River are daylight operations – between sunrise and sunset – and no vessel longer than 628 ft. will be handled.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

BERTHING: There are 259 piers or wharves in the port of Boston providing 158,646 lineal ft. or 30 miles of berthing space measured along the sides and ends of piers and along bulkheads or shore wharves. Many of them have railroad connections. The depths of water available alongside these terminals range up to a maximum of 40 ft. at mean low water. Practically all terminals fronting on main ship channel are in close proximity to storage warehouses, both cold and dry which greatly facilitates transfer of cargo between vessel and warehouse.

Main Terminals:

Hoosac Pier, 3 berths	Depth alongside 35 ft.
Mystic Pier, 4 berths	Depth alongside 40 ft.
Commonwealth Pier, 5 berths	Depth alongside 40 ft.
South Boston, 10 berths	Depth alongside 35 ft.
Castle Island, 7 berths	Depth alongside 35 ft.
East Boston, 3 berths	Depth alongside 32 ft. to 35 ft.
Public Container Terminal, 2 berths	Depth alongside 40 ft.

Sea-land Container Terminal, South Boston (Berth 17, Castle Island):

Operator – Sea-Land Service, Inc. Tel. 268-9720.

Type of Pier – Single face, 500 ft. long. 1×27.5 ton container crane. 10 acre container storage area.

Depth alongside at MLW – 35 ft.

Normal ship side to dock – Starboard.

Line handling boat – not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – Containers.

Castle Island Terminal, South Boston:

Operator – Massachusetts Port Authority. Tel. 482-2930

Type of Pier – Single face. 6 berths No. 16 (610 ft.) adjacent to and extending N.W. of No. 17 (see above); No. 15 to No. 11 (2,995 ft.) adjacent to and extending Westward of No. 16. 294,000 sq.ft. covered storage, 4 million sq.ft. open storage (including 32 acres fenced in automobile storage and 20 acres lumber storage), 50 ton crane, rail service. Berth No. 11 equipped with 2×40 ton gantry cranes.

Depth alongside at MLW – 35 ft.

Normal ship side to dock – Varies.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side. Minimum 40 ft. apron.

Products handled – General cargo, containers, lumber, bulk salt and cement, automobiles, petroleum products (at Berth No. 11 for White Fuel).

White Fuel Company, South Boston:

Operator – Texaco, Inc. Tel. 269-2111.

Type of Pier – Single face.

Depth alongside at MLW – 40 ft.

Normal ship side to dock – Port (bow in).

Line handling boat – required.

Access to vessel (for stores and repairs) – limited, trucks can approach only to within 150 ft. of gangway or ship's side.

Products handled – Avjet, Heating Oil, No. 6 Oil, Molasses.

Size and number of pipe-lines – Numerous – 24 in., 20 in., 16 in., 12 in.

Bbls. per hour discharge capacity – 12,000 to 18,000.

Average distance to storage tanks – 1,000 ft.

Pollution control equipment – 1,600 ft. boom, 16 ft. boat, 300 absorbent pillows, 2,000 gallon pumpout truck.

Eastern Minerals, South Boston:

Operator – Eastern Minerals, Inc. Tel. 269-5857.

Type of Pier – Single face.

Depth alongside at MLW – 40 ft.

Normal ship side to dock – Starboard (bow out).

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – bulk salt, pumice. Discharge rate 5,000 tons per day with fixed grab requiring vessel to be shifted in berth.

Boston Army Base, South Boston:

Operator – Port Terminals, Inc. Tel. 542-7100.

Type of Pier – Single face, three sides: South 3,705 ft., East 351 ft., North 964 ft., 950,000 sq.ft. covered storage, rail service, 2×27.5 ton rail mounted cranes.

Depth alongside at MLW – 35 ft.

Normal ship side to dock – Varies.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side. 50 ft. apron incorporates rail lines.

Products handled – General cargo, containers.

Commonwealth Pier, South Boston:

Operator – Massachusetts Port Authority. Tel. 482-2930.

Type of Pier – Single face, three sides: North and South 1,200 ft. East 400 ft. 500,000 sq.ft. covered storage, 1 million cu.ft. freezer, rail service, passenger lounge, upper level exhibition hall.

Depth alongside at MLW – 40 ft.

Normal ship side to dock – Varies.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side. 20 ft. apron incorporates rail lines.

Products handled – Passengers, general cargo, refrigerated cargo, bulk tallow.

Pier 1, East Boston:

Operator – Massachusetts Port Authority Tel. 482-2930.

Type of Pier – Single face, three sides: East and West 605 ft. South 390 ft. 196,0000 sq.ft. covered storage.

Depth alongside at MLW – 35 ft.

Normal ship side to dock – Varies.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – General cargo, containers.

Metropolitan Petroleum Company, Chelsea:

Operator – Metropolitan Petroleum Company. Tel. 288-1111.

Type of Pier – Timber pile, offshore.

Depth alongside at MLW – 35 ft.

Normal ship side to dock – Starboard (bow in).

Line handling boat not required.

Access to vessel (for stores and repairs) – by hand cart only.

Products handled – Heating Oil, No. 6 Oil.

Size and number of pipe-lines – 2 × 8 in.

Bbls. per hour discharge capacity – 6,000 to 8,000.

Storage tanks adjacent to berth.

Pollution control equipment – 1,000 ft. boom, 18 ft. boat, 50 absorbent pillows, 150 gallons. Aqua-clene.

Note:– Bow to manifold 370 ft. No wire ropes used to moor vessel.

Exxon Company U.S.A., Everett:

Operator – Exxon Company U.S.A. Tel. Marine Department 387-1733, Marketing Terminal 389-7400.

Type of Pier – Timber pile wharf with caissons.

Depth alongside at MLW – 40 ft.

Normal ship side to dock – Starboard.

Line handling boat not required.

Access to vessel (for stores and repairs) – by rail-mounted hand cart.

Products handled – Asphalt, Chemicals, Diesel Oil, Jet Fuel, LPG, Kerosene, Gasoline, No. 2 and No. 6 Oil.

Size and number of pipe-lines – numerous.

Bbls. per hour discharge capacity – Up to 35,000.

Average distance to storage tanks – 5,000 ft.

Pollution control equipment – 1,500 ft. boom, skiff.

Prolerized New England, Everett:

Operator – Prolerized New England Company. Tel. 389-8300.

Type of Pier – Straight face.

Depth alongside at MLW – 37 ft.

Normal ship side to dock – Port (bow out).

Access to vessel (for stores and repairs) – trucks to ship's side, but access may be limited due to vessel's position at conveyor.

Products handled – Ferrous scrap (including Prolerized shredded-scrap).

General notes: Pier is equipped with 2×40-ton cranes. Shredded scrap is loaded from fixed conveyor requiring vessel to be shifted as each hatch is served.

This berth is also used by Distrigas Corp. and Union Carbide Corp.

American (Domino) Sugar Refinery, Charlestown:

Operator – Amstar Corporation. Tel. 242-3670.

Type of Pier – Single face.

Depth alongside at MLW – 33ft.

Normal ship side to dock – Port (bow in).

Line handling boat required.

Access to vessel (for stores and repairs) – trucks to ship's side, but may be limited depending on vessel's position at conveyor.

Products handled – raw sugar. Discharge facility consists of single grab with capacity of 200-250 t.p.h. Vessels limited to approximately 650 ft. overall length.

Revere Sugar Refinery, Charlestown:

Operator – Sucrest Corporation. Tel. 242-2750.

Type of Pier – Straight face.

Depth alongside at MLW – 33 ft.

Normal ship side to dock – Port (bow in).

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – raw sugar. Discharge facility consists of 23.5 ton grabs with total capacity of 350-400 t.p.h. Vessels limited to approximately 600 ft. overall length.

Mystic Scrap Terminal, Charlestown:

Operator – Schiavone Terminal, Inc. Tel. 242-5210.

Type of Pier – Single face.

Depth alongside at MLW – 35 ft.

Normal ship side to dock – Owner's preference.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – Ferrous scrap.

General notes: Pier is equipped with 3×14-ton Clyde gantry cranes. Loading rate 2,500 tons per day. Rail service to pier.

J. F. Moran Container Terminal, Charlestown:

Operator – Massachusetts Port Authority. Tel. 482-2930.

Type of pier – Single face, 1,100 ft. long. 1×45-ton container crane, 1×70-ton container crane, 38,000 sq.ft. container stuffing shed, 30 acre container storage area, rail service.

Depth alongside at MLW – 40 ft.

Normal ship side to dock – Varies.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – Containers.

U.S. Gypsum, Charlestown:

Operator – U.S. Gypsum Co. Tel. 241-9100.

Type of Pier – Single face.

Depth alongside at MLW – 23 ft.

Normal ship side to dock – Port.

Line handling boat not required.

Access to vessel (for stores and repairs – access to berth.

Products handled – Gypsum rock from Nova Scotia, carried in company's own vessels, specially fitted and adapted for discharge at this berth.

Mobil Oil, East Boston:

Operator – Mobil Oil Corporation. Tel. 567-9080.

Type of Pier – Straight face, with centre relieving platform.

Depth alongside at MLW – 30 ft.

Normal ship side to dock – Starboard.

Line handling boat required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – Gasoline, Heating Oil.

Size and number of pipe-line – Various.

Bbls. per hour discharge capacity – 8,000.

Average distance to storage tanks – tank farm adjacent to berth.

Pollution control equipment – 950 ft. boom.

Gibbs Oil Company, Revere:

Operator – Gibbs Oil Company. Tel. 289-7700.

Type of Pier – Timber pile, wooden deck.

Depth alongside at MLW – 35 ft.

Normal ship side to dock – Starboard.

Line handling boat not required.

Access to vessel (for stores and repairs) – only by hand cart.

Products handled – Heating Oil, Gasoline.

Size and number of pipe-lines – 3×10 in., 2×12 in.

Bbls. per hour discharge capacity – 8,000 per line.

Average distance to storage tanks – 2,500 ft.

Pollution control equipment – 1,750 ft. boom, 16 ft. boat. (Shared with Union, Gulf, Northeast.)

Union Oil Company, Revere:

Operator – Union Oil Company. Tel. 284-4490.

Type of Pier – Timber pile, wooden deck.

Depth alongside at MLW – 33 ft.

Normal ship side to dock – Port.

Line handling boat required.

Access to vessel (for stores and repairs) – only by hand cart.

Products handled – Heating Oil, Mogas, No. 5 Oil, No. 6 Oil.

Size and number of pipe-lines – 5×12 in.

Bbls. per hour discharge capacity – 8,000 per line.

Average distance to storage tanks – 2,500 ft.

Pollution control equipment – 1,750 ft. boom, 16 ft. boat. (Shared with Gibbs, Gulf, Northeast.)

Gulf Oil Company, Chelsea:

Operator – Gulf Oil Company. Tel. 884-5980.

Type of Pier – Single face.

Depth alongside at MLW – 26 ft.

Normal ship side to dock – Port.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – Heating Oil, Gasoline.

Size and number of pipe-lines – 5×12 in.

Bbls. per hour discharge capacity – 8,000 per line.

Average distance to storage tanks – 1,000 ft.

Pollution control equipment – 1,750 ft. boom, 16 ft. boat. (Shared with Gibbs, Northeast, Union.)

American Oil, Chelsea:

Operator – Northeast Petroleum Corp. Tel: Office – 884-7570; Terminal – 884-7577.

Type of Pier – Timber pile dolphins, wooden decked parallel to single face abutment.

Depth alongside at MLW – 35 ft.

Normal ship side to dock – Port (bow upstream).

Line handling boat required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – Gasoline, Kerosene, Heating Oil, No. 6 Oil.

Size and number of pipe-lines – 8 in., 10 in., 14 in., depending on product.

Bbls. per hour discharge capacity – Up to 13,000 depending on product.

Average distance to storage tanks – 2,500 ft.

Pollution control equipment – 1,750 ft. boom, 16 ft. boat. (Shared with Union, Gibbs, Gulf.)

Texaco, Chelsea:

Operator – Texaco, Inc. Terminal Tel. 884-7000, Offices 269-2111.

Type of Pier – Single face.

Depth alongside at MLW – For 575 ft. vessels: 31 ft. fwd., 34 ft. aft. For 624 ft. vessels: 21 ft. fwd., 34 ft. aft.

Normal ship side to dock – Port.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – Avjet, Diesel Oil, Gasoline.

Size and number of pipe-lines – 7×12 in.

Bbls. per hour discharge capacity – 5,000 to 10,000.

Average distance to storage tanks – Tank Farm adjacent to berth.

Pollution control equipment – Automatic boom being installed.

Quincy Oil, Quincy:

Operator – Quincy Oil Company. Tel. 773-2500.

Type of Pier – Timber pile, timber deck, offshore wharf.

Depth alongside at MLW – 29ft.

Normal ship side to dock – Port.

Line handling boat not required.

Access to vessel (for stores and repairs) – by hand cart only.

Products handled – Gasoline, Heating Oil.

Size and number of pipe-lines – 2×8 in.

Bbls. per hour discharge capacity – 6,000.

Average distance to storage tanks – Tank Farm adjacent to berth.

Pollution control equipment – 800 ft. boom, work boat.

Mobil Oil, Quincy:

Operator – Mobil Oil Corporation. Tel. 773-7080.

Type of Pier – T-head with dolphins.

Depth alongside at MLW – 30 ft.

Normal ship side to dock – Starboard.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – Gasoline, Heating Oil.

Size and number of pipe-lines – Various.

Bbls. per hour discharge capacity – 8,000.

Average distance to storage tanks – Tank Farm adjacent to berth.

Pollution control equipment – shared with Sprague.

C.H. Sprague & Son Co., North Weymouth:

Operator – C.H. Sprague & Son Co. Tel: Terminal 337-2040, Offices 542-7807.

Type of Pier – Timber pile, concrete deck.

Depth alongside at MLW – 35 ft. 6 in.

Normal ship to side dock – Starboard.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – No. 6 Oil.

Size and number of pipe-lines – 2×12 in.

Bbls. per hour discharge capacity – 10,000 per line.

Average distance to storage tanks – 2,500 ft.

Pollution control equipment – 500 ft. boom, 16 ft. boat. (Shared with Mobil.)

Cities Service Oil Company, Braintree:

Operator – Cities Service Oil Company. Tel. 848-1100.

Type of Pier – 4 cylindrical caissons.

Depth alongside at MLW – 34 ft.

Normal ship side to dock – Starboard.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – Heating Oil, Gasoline.

Size and number of pipe-lines – 1×10 in., 4×12 in.

Bbls. per hour discharging capacity – 10,000.

Average distance to storage tanks – 2,500 ft.

Pollution Control Equipment – 1,500 ft. boom, work boat.

Bulk Cement Piers:

There are 2 berths in Boston used exclusively for the discharge of bulk cement from barges. Both are in the Mystic River.

No. 28: Allied Concrete Corp. Tel: 389-2800. This berth is leased to: Marquette Cement Manufacturing Co. Tel: 235-8006.

No. 33: Atlantic Cement Company, Inc. Tel: 241-9090.

Meat Inspection Station: The Massachusetts Port Authority operates a meat inspection station on Mystic Pier (No. 38) adjacent to the Moran Container Terminal.

Random incoming meat samples are cut, defrosted, weighed, inspected, and re-frozen at this new facility, enabling inspectors to use one central location instead of the 5 other waterfront stations previously utilised.

The chief component of the building is the large, well-lighted, well-ventilated, and sanitary inspection room. Walls are ceramic tile, the floor has quarry tile, and the ceiling is of acoustical tile.

Up to 50 containers of meat a day will be inspected at this modern facility.

SPECIALISED CARGO HANDLING FACILITIES: Also see "Berthing".

RADIO: *Advance Notice of Arrival:* 24 hours advance notice of arrival be given. This notice is made to the office of the Captain of the Port – 223-6979.

The information to be provided consists of: Vessel's Agent's name; Vessel's name, type, flag, and call sign; the ETA; Berth; Last port and next port; Dangerous cargo on board. In return the Captain of the Port will assign a consecutive log number to the vessel.

In event the vessel's ETA is changed by more than 24 hours from first notice, the Captain of the Port should be so notified, identifying the vessel by its assigned log number.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Vessels can proceed from the sea to Boston Upper Harbour under own power. They are usually met by tugs, for docking while in the stream. Barges usually left by the outside tugs at the anchorage grounds, to be docked later by harbour tugs.

TANKERS: Also see "Berthing".

White Fuel Oil Co.	S. Boston	40 ft.

Berthing at all berths normally effected on a rising tide. It is the practice of the port for deep draft vessels to pump part cargo overtide in order to bring vessel to a safe draft by the next Low Water. Berthing at Sprague, North Weymouth is usually starboard side to, which involves swinging vessel.

LNG/LPG: There are 2 facilities in Boston Harbour which handle LNG (Liquid Natural Gas – methane). Boston Gas at Commercial Point, Dorchester, Mass., and Distrigas on the Mystic River, Everett, Mass., have storage capabilities for LNG.

The Exxon Everett facility receives and stores LPG (Liquefied Propane Gas).

The Captain of the Port (COPT) has issued very specific requirements for vessels transiting the harbour and transferring cryogenic cargoes. The Coast Guard team consisting of Port Safety Station, representing the Captain of the Port, and Marine Inspection Office boarding officers and the men assigned to the escort and monitoring details are charged with the responsibility for ensuring compliance with these regulations which are detailed in the 60-page LNG/LPG Contingency Plan issued by the Captain of the Port. Included in the plan are the following General Regulations:

The vessel must:

(1) Hold a current Letter of Compliance for the carriage of methane/propane issued by the Commandant and a Certificate of Financial Responsibility for Oil Pollution.

(2) Enter the harbour only during daylight hours. Additionally, vessels transiting Dorchester may only do so within 2 hours of high water. Weather permitting, the COTP may authorise night departures providing the vessel does not have a full or partial cargo.

(3) Enter the harbour only during periods of good visibility. If the visibility is less than 2 miles the vessel must:

(i) If at sea, not enter the port without the COTP's permission.

(ii) If in port, notify COTP of position and then proceed to berth or anchorage, whichever nearer.

(4) Maintain a radio watch on Channel 13 (156.65 MHz) while underway in the port area. Additionally, a watch should be maintained on Channel 16 (156.8 MHz).

(5) Not commence offloading cargo prior to the satisfactory completion of the arrival safety inspection by Coast Guard Marine Inspectors and the issuance of the Permit to Handle Explosives or Other Dangerous Cargo (CG Form 4260).

Additionally:

(1) The vessel must moor either bow to seaward and be prepared to get underway on short notice, should an emergency so require, or have a tug standing by during all cargo operations. A tug standby will be required on a vessel's first visit to this port.

(2) The vessel will normally be boarded while anchored in President Roads by COTP/OCMI Inspectors unless, prior to the vessel's arrival, the Master sends a message to COTP stating that:

"To the best of my knowledge and belief there are no known casualties to this vessel or its machinery which might affect the seaworthiness. I further state that all cryogenic handling and detection equipment is in proper operating condition."

If this message has been received, the inspection will be made at the dock unless it is the vessel's first visit to Boston. On a vessel's first visit to Boston the boarding will always be made in President Roads. If the vessel does not hold a Letter of Compliance the boarding will be made in Broadsound and the vessel will not be allowed to enter the port until a temporary Letter of Compliance is issued.

(3) Venting gas to the atmosphere is not permitted in port.

(4) All cargo operations must cease if electrical storms are present.

(5) If interpreters are not available, all ship's personnel directly involved in the transfer operation shall readily speak the English language.

(6) If the vessel is at anchorage a permanent bridge watch shall be maintained. A round of bearings fixing the vessel's position shall be taken hourly followed by a report, every 4 hours, to USCG Group Boston on Channel 16 FM reporting anchor holding and operations normal or any significant change in position or deviation from the normal.

Also, whenever an LNG/LPG vessel is transiting Boston Inner or Outer Harbour (to the seaward entrance of the Boston North Channel) no other vessel will be allowed to be underway in an area 2 nautical miles ahead and 1 nautical mile astern of the LNG/LPG vessel in transit. This concept can be thought of as a "moving restricted area" centred on the LNG/LPG vessel. For vessel movement in an area of the Port other than that described above, express permission from COTP Boston must be obtained.

Furthermore, the maximum allowable speed for any vessel movement during an LNG/LPG vessel transit will be 6 knots. A Coast Guard escort craft will always be present during an LNG/LPG vessel transit and will vigorously enforce these vessel movement restrictions. The maximum penalty for violation of any of the rules established under the above authority is imprisonment for not more than 10 years and a fine of not more than $10,000.

It should be noted that these rules establishing a restricted envelope around the LNG/LPG vessel and the 6 knot speed limit apply not only to other vessels but to the LNG/LPG vessel itself. Therefore, the LNG/LPG vessel may not approach any closer than 2 nautical miles to another vessel underway, thus eliminating a possible collision should another vessel lose steerage or suffer a casualty. These rules prohibit crossing, meeting or overtaking situations from occuring in Boston Harbour out to the seaward entrance to the North Channel. However, other vessel movements during an LNG/LPG vessel transit may be allowed with permission of the Captain of the Port.

LNG/LPG Vessel Inspections: Before an LNG/LPG vessel is allowed to conduct cargo operations in the Port of Boston, the vessel must undergo a joint COTP/MIO Boston inspection to determine if all cargo handling and detection systems are in proper working order. One of the tests involves the introduction of a properly certificated amount of test gas (span gas) into the vessel's gas detection system. This allows the Inspector to determine if the gas detection system is functioning properly and is able to detect the presence of LNG or LPG should an actual leak occur somewhere on the vessel. Until recently, if a vessel did not have on board a cylinder of the properly certificated span gas, the Coast Guard Inspectors would provide this service. However, due to the increasing costs of the gas (LNG over $40.00 and LPG over $63.00), the vessel will be required to provide the span gas with a valid certificate attesting to its composition before the inspection can begin. Also, for the inspection to continue, shipboard or civilian technicians must be available to rectify any problem that may develop.

STEVEDORES: Available at various rates.

FRESH WATER: Plentiful supply of excellent water in Boston. It is supplied by terminal at prevailing rates.

FUEL: All grades available in various viscosities. Normally supplied by barge subject to advance notice.

CUSTOMS ALLOWANCES: At the discretion of Customs officers. Normal allowance is 200 cigarettes or 2 lb. of tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.

GANGWAY/DECK WATCHMEN: Available at prevailing prices.

OPENING/CLOSING HATCHES: Performed by stevedores.

REPAIRS: Any type of repair undertaken.

DRY DOCKS:

Bethlehem Steel Co., Shipbuilding

Division, East Boston, Massachusetts	*Length*	*Capacity*
Floating Dry Dock No. 1	622 ft.	18,000 tons
Floating Dry Dock No. 2	479 ft.	20,000 tons
Graving Dry Dock No. 4	256 ft.	

Modern facilities for repair, overhaul, and conversion of vessels of all sizes:

(*a*) a 10,000 ton capacity floating dry dock serviced by 2×150 ton overhead cranes with a yoked capacity of 350 tons. The 5-section dock is 415 ft. long, 120 ft. wide, and has an inside dimension of 85 ft. 7 in.

(*b*) 3 building basins (actually a 3-positioned graving dock). 2 are 132 ft. wide, 867 ft. long; 1 is 150 ft. wide, 938 ft. long. Each basin serviced by 2 Whirley type cranes of 75 and 50 ton capacity.

(*c*) 4 outfitting piers capable of handling up to 10 ships simultaneously provide adequate space for dockside work and for mooring personnel or service barges.

(*d*) 3 conventional "sliding" ways capable of handling ships up to 1,000 ft. in length.

Major Shops: 2-bay fabricating shop served by 17 bridge cranes. Machine shop equipped with large vertical and horizontal mills planers, lathes and a complete small machine complement. Fully equipped sheet metal, joiner, boiler, blacksmith, pattern foundry, galvanizing, pipe and copper, and electrical shops. Complete facilities for inspection of all types including non-destructive testing such as radiography, magnetic particle, liquid penetrant and ultrasonic.

REPATRIATION: Good facilities exist.

HOLIDAYS: New Year's Day (1st January); Washington's Birthday (22nd February); Patriots' Day (19th April); Memorial Day (30th May); Bunker Hill Day (17th June); Independence Day (4th July); Labour Day (first Monday in September); Columbus Day (8th October); Veteran's Day (22nd November); Thanksgiving (fourth Thursday in November); Christmas Day (25th December).

Note: "Or any day celebrated in lieu thereof".

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight saving time, GMT minus 4 hours from April to October.
AUTHORITY: Massachusetts Port Authority, 99 High Street, Boston, Ma. 02110. *Tel:* (617) 482-2930. *Telex:* 94-0365. *Contact:* Martin C. Pilsch, Port Director.

AGENT: Rice, Unruh Co., Beebe Building 129 South Street, Boston, Massachusetts 02110. Tel: Area Code 617 482-7303 (4 lines) (Note: Answering service in attendance outside normal working hours) Telex: 940309, TWX: 710-321-6870 "Riceunruh Boston". Cables: "Riceunruh Boston".

BRIDGEPORT, Connecticut: 41.07 N. 73.11 W.

(See Plan Book)

DOCUMENTS: Refer to "New York".
PILOTAGE: Vessel usually notifies Agent 48 hours before arrival, who will arrange Pilot boarding. Pilot boards either at Brenton Reef in position Lat. 41° 25′ N., Long. 71° 23′ W. or Point Judith in position Lat. 41° 17′ N., Long. 71° 29′ W.
ANCHORAGE: 2 miles South of the entrance with depths in excess of 50 ft.
RESTRICTIONS: Entrance channel has a project depth of 35 ft. at MLW, is 400 ft. wide and 3 miles in length.

Normal time allowed for transit from outside to off the dock is 30 – 40 minutes. Docking time varies from 30 minutes to 1 hour, dependent on which terminal is the destination, and weather conditions.

The New Haven – Bridgeport Pilots Association believe 4 ft. of water in excess of the ship's draft is needed. As a rule of thumb, 31 ft. at low to 37 ft. at high. Any variations from this, a Pilot should be directly consulted. The range of tide is 6.7 ft. Wind strongly affects the tide in the main entrance channel. Flood and ebb cross the channel at a right angle, and velocities depend on the rise of tide for the day.

Vessels up to 70,000 d.w.t. and LOA 825 ft. call at the port.
MAX. SIZE: See "Berthing and Restrictions".
HEALTH: Vessel to cable Agent 24 hours prior to arrival of any illness on board, otherwise Radio Pratique not necessary.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Vessels arriving from North use Chatham Radio. Vessels from South use Amagansett Radio on Long Island.
TUGS: Tugs available from Red Star. The Despatcher monitors VHF and is available 24 hours a day through Channel 24 at Bridgeport.
BERTHING: *Cilco Terminal:* Cilco is a bulkhead dock, length approximately 1,100 ft. Vessels dock port or starboard side to. Two ships can moor at the same time. This is a dry cargo facility. Ships load or discharge all kinds of products. Several mobile cranes are available. Depth 33 ft. at MLW. Bunkers are only available by truck. Fresh water is available.
TANKERS: *Bridgeport Shell – Buckley Bros.:* The Shell berth is located on the East side at right angles to the main entrance, and ships must be turned 90° to approach the dock. The dock is approximately 200 ft. long with 2 main dolphins and catwalks to shore. Head lines and stern lines are run ashore by a messenger. The size of vessels is governed by manifold distance. Light oil products 300 ft. and heavy oil 350 ft. Vessels of length 700 ft. have been moored, 38 ft. at MLW in ship berth. Ships dock port side to.

Bunkers and fresh water are available.

United Illuminating: Berth is 0.6 miles inside the breakwater on the West side of the channel. A turn to port of 120° must be made into a dredged cut 140 ft. wide. The dock is concrete caissons on pilings with catwalks and centre platform. Depth 32 ft. to 37 ft. at MLW. Vessels of 70,000 d.w.t. call, but bow to manifold distance governs size of vessel. (350 ft. – 375 ft.). Vessels dock starboard side to.

Fresh water is available, but bunkers are not. Every tanker, when moored here, has an anti-pollution boom placed around it.
FRESH WATER: Available at all berths.
FUEL: No fuel barge service available. In emergency tank truck delivery can be arranged.
MEDICAL: All facilities available.
AIRPORT: Bridgeport Airport about 3 miles away. New York airports about 50 miles distant.
CONSULS: All countries represented in New York.
HOLIDAYS: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (18th February); Good Friday; Memorial Day; Independence Day (4th July); Labour Day; Columbus Day (14th October); Veterans' Day; Election Day (5th November); Thanksgiving Day (28th November); Christmas Day (25th December).
TIME: Daylight Saving Time, GMT minus 4 hours from April to October.
SERVICES: Ship's stores and launch service available from New Haven. Vessels must provide their own gangway at all docks.
AUTHORITY: City of Bridgeport, Office of the Harbour Master, City Hall, Room 223, 45 Lyon Terrace, Bridgeport, Connecticut 06604. *Tel:* 576 7288. *Contact:* Gilbert Zawadski, Harbour Master. *Tel:* 334-2585 (Home).

BROWNSVILLE, Texas: 25.54 N. 97.28 W.

(See Plan Book)

DOCUMENTS: See "Houston".
PILOTAGE: When a vessel is scheduled to arrive at Brownsville, the vessel's Agent notifies the Harbour Master's office of the approximate ETA. Later, when a firm ETA is received, the Harbour Master's office notifies the pilot office that the vessel is expected on the bar at a certain time and also gives the time which she would like to enter.

The telegraphic address of the pilot office is: Brazos-Santiago Pilots, 411 First National Bank Bldg., Brownsville, Texas.

If possible, it is desired that the Harbour Master's Office be notified 2 hours in advance of the ETA of any vessel.

The VHF Channel to be used when contacting the pilot boat and Harbour Master is 16. When contact is made, this will be switched to Channel 13.

The pilot boat is a steel hull length 43 ft., beam 16 ft. and draft 8 ft. 250 h.p. diesel. Gross tonnage 36 tons.

No light or sound signals are necessary from vessels requiring a Pilot, although light signals may sometimes be used at night – ordinarily a vessel is picked up by visual sighting.

The pilot boat is located on the South tip of Padre Island – the Pilot station is adjacent to the entrance to ship channel with a clear view of the approach to the jetties.

The Pilot is taken on board an incoming vessel at the sea buoy which is located 2 miles off shore.

The anchorage for a vessel awaiting Pilot is 1.5 miles North of sea buoy.

ANCHORAGES: Anchorages are marked on charts.
RESTRICTIONS: *Brazos Island Harbour:*

	Dredged Dimensions			Minimum depths in channel entering from seaward		
Name of Channel	*Feet Width*	*Miles Length*	*Feet Depth*	*Left Outside Quarter Feet*	*Middle Half of Channel Feet*	*Right Outside Quarter Feet*
Brazos Santiago Pass:						
Entrance Channel	300	1.9	38	40.0	39.0	37.0
Channel across Laguna Madre	200	2.9	36	38.0	38.0	38.0
Brownsville Channel:						
Junction Basin to Boca Chica Passing Basin	200	4.0	36	38.0	38.0	38.0
Boca Chica Passing Basin to Goose Island Passing Basin	200	5.4	36	38.0	38.0	38.0
Goose Island Passing Basin to Brownsville Turning Basin	200	2.8	36	37.0	38.0	37.0
Brownsville Turning Basin (extension)	500	1.4	36	37.0	38.0	37.5
Brownsville Turning Basin	500-1000	0.5	36	36.0	37.0	35.0

MAX. SIZE: The max. permissible length 850 – 900 ft., beam 160 ft., draft 34.5 ft.

RADIO: ETA cables to Agent, etc., should be addressed to the Agent via Mackay Radio at Galveston or RCA in Port Arthur. When within a 60 miles range of the port, calls may be made through the Harbour Master's office on VHF Channel 16 and the calls will then be transferred to land lines to any point. Also Brownsville Marine Operator, VHF Channel 26.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
MEDICAL: When medical attention is required, advance notice should be given the Agent by ship's radio.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
VHF: A vessel approaching the port of Brownsville may contact the Harbour Master's office on VHF Channel 16.
TUGS: Tugs normally join an incoming vessel 1.25 miles before she enters the turning basin. The tug's lines are used for which there is no charge.
BERTHING: Cargo facilities include over 7,500 ft. of modern, marginal dry cargo wharves, 14 deepsea docks and 10 barge berths, together with over 583,000 sq.ft. of transit shed space. In addition there is 242,000 sq.ft. of open storage space at the deep-draft docks and 271,000 sq.ft. of open storage at the shallow draft docks.
BULK HANDLING FACILITIES:

Public Grain Elevator: Located at the approach to the Turning Basin, the port-owned and operated elevator has a capacity of over 3,800,000 bushels. An adjacent bulk plant provides flat storage for all types of dry bulk commodities.

Two large gantry cranes handle the loading of vessels. The maximum spout clearance for loading vessels is 45 ft. above the water.

Equipped with two truck dumps and two hopper car dumps, the elevator has the rated loading capacity of 1,200 short tons per hour (1,000 L/T per hour on bulk carriers without wing tanks and 600 L/T per hour on tween deckers).

The 400 ft. wharf is 12 ft. above water and has an unlimited berth length. The draft at dockside is 34 ft. and the channel control depth is 36 ft.

The grain elevator also has the flexibility of unloading vessels (barge unloading capacity is 300 t.p.h.).

Liquid Bulk Handling: Liquid Terminals, Inc., is a new facility that was built to handle and store all types of liquid commodities in bulk. The large storage tanks vary from 5,000 to 20,000 barrels each, providing a total of more than 125,000 barrels capacity for the entire installation. The modern liquid dock adjacent to the facility accommodates vessels with a deep draft of up to 34 ft. Loading racks provide for the efficient transfer of liquids to either truck or rail.

Four oil and chemical docks are located on the North side of the ship channel and are utilised by companies such as Exxon, Texaco, Union Carbide, Petroleos Mexicanos, Line Service, Continental and Permian Oil to handle bulk petroleum and chemical products. Also see "Tankers".
CRANES: Two large floating cranes, rated at 150 metric tons each, are available for heavy lifts at any dockside location in the port area.

STEVEDORES: To arrange for gangs the vessel needs to notify the ship's Agent of ETA; the Agent will in turn notify the stevedores. It is necessary that the Agent be advised of an ETA before 1900 hrs. for an 0800 hrs. start.

Main commodities and average load discharge rates:

Grain	Bulk carrier 1,200 t.p.h.
Grain	tween deck 600 t.p.h.
Cotton	100 bales per hour per gang
Lead and zinc pigs	40 tons per hour per gang
Citrus in boxes	22 tons per hour per gang
Onions and carrots in bags	22 tons per hour per gang
General cargo	25 tons per hour per gang

TANKERS: Ballast facilities are available up to 6,000 barrels per hour. The port loads refined petroleum products. The port has 4 tanker berths, with 34 ft. 7 in. max. draft.

Vessels proceeding to Brownsville normally turn in the basin and berth Port side to. Berthing at Port Isabel Oil Wharf also generally Port side to. Mooring boat employed.

DENSITY: The average density is 32 parts per 1,000.

FRESH WATER: Fresh water is available and can be delivered to a vessel through hose or pipe-line at 150 gallons per minute.

FUEL: No fuel is available locally. It must be barged in from Corpus Christi – advance arrangements are necessary.

FIRE PRECAUTIONS: Tankers are required to berth head out.

GANGWAY/DECK WATCHMEN: Such services are necessary only when detainees are held on board.

OPENING/CLOSING HATCHES: This work is done by the stevedores.

IDENTIFICATION CARDS: Immigration requires form No. I-95 Landing permit.

CONSULS: Mexico: tel. 542-4431.

REPAIRS: Marathon, located at the port, is equipped to handle all normal temporary ship repairs.

DRY DOCKS: None available.

REPATRIATION: There are facilities for this service.

AIRPORT: The local airport is located 2 miles from the port. Ozark Airways operates 4 flights daily.

TIME: Local Time is 6 hours behind GMT.

HOLIDAYS: The following holidays are observed here: Veterans' Day (4th Monday of October); Thanksgiving; Christmas; New Year; Washington's Birthday (Feb. 22nd); Texas Independence Day (March 2nd); Emancipation Day (June 20th); July 4th; Labour Day (1st Monday in September); Decoration Day (last Monday in May).

No work shall be performed on Labour Day or Christmas Day except in case of fire or where property is in danger. When holidays fall on Sunday, the following day will be recognised as the holiday. Also, no work will be performed between 1600 and 1900 hrs. on election days.

POLICE/AMBULANCE/FIRE: Sherriff 546-2451; Brownsville Fire Dept. 542-4375; Ambulance Service 542-2121.

TELEPHONES: Telephones are not available for placing on ships.

SERVICES: Tank cleaning service is available at the port. Ballast facilities are available at Oil Docks 1, 2 and 3. P.I.B. can take care of compass adjusting, etc.

DELAYS: There are no delays unless an incoming ship has been assigned to a berth now occupied. Bunkers must be barged in; arrangements may be made ahead of time to avoid delay.

DEVELOPMENTS: The Federal Government has made an appropriation to initiate a study on deepening ship channel from 36 ft. to 42 ft. and to widen the channel from 200 ft. to 300 ft., bottom width. Plans are being made to build another grain elevator/bulk materials dock, and another chemicals dock in the future.

AUTHORITY: Brownsville Navigation District, Port of Brownsville, P.O.Box 3070, Brownsville, Texas 78520. *Tel:* (512) 831-4592. *Telex:* 766612. *Contact:* James M. Beaman, Director of Trade Development.

BRUNSWICK, Georgia: 31.09 N. 81.30 W.

(See Plan Book)

DOCUMENTS:

Crew Lists: 1 certified copy for Immigration; 2 copies uncertified for Customs.

1 copy Pratique.

3 copies Inward Customs Manifests.

3 copies each Stores, Curio & Narcotics List.

PILOTAGE: Compulsory. 24-hour Pilot service arranged by Agent with 48-24 hour prior notice from ship. Pilot station at Buoy "St. S." Pilot reached through VHF Channels 12, 14, 16 on voice radio. Pilot boat is 25 ft. white hull. Marking is "Pilot" on hull.

ANCHORAGES: 3 miles S.E. of buoy "St. S." sand and mud bottom. In event deep draft (30 ft.) and high winds, anchorage near Ocean Buoy "2B" and inform Pilot as in "Pilotage". Vessels in need or for other good reason, may anchor in St. Simon's Sound, depth 10 fathoms.

APPROACHES: The harbour is located about midway between Savannah and Jacksonville. The harbour is reached by a channel from the Atlantic Ocean, running between St. Simons and Jekyll Island. The channel has a minimum width of 500 ft. and a depth of 32 ft. to St. Simon's Sound, thence a width of 400 ft. and a depth of 30 ft. to Sidney Lanier Bridge, where the channel divides, 13 miles from sea. The Northern branch leads to Lanier Dock, State Dock and the city, 400 ft. wide and 30 ft. deep. The other branch leads N.W. to the pulp plant dock, chemical docks and electrical generating plant, 300 ft. wide and 30 ft. deep.

RESTRICTIONS: No restrictions unless vessel drawing 30 ft. or more, then must await high tide to cross bar.

MAX. SIZE: Max. permissible length 650 ft. Max. d.w.t. over 33,000 tons.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Prior arrival, use commercial Lantana, Chatham Radio for advices to Agent, 48-24 hours in advance.

TUGS: 3 Tugs, 500 h.p. each. Join vessel in St. Simon's Sound after passing lighthouse. Tug lines used.

BERTHING: 1,600 ft. continuous marginal wharf; steel and concrete construction, 57 ft. wide apron. Vessels normally turned to moor port side alongside unless deck cargo or other vessel obstruction means cargo may not be worked over port side. Gantry crane of 27 tons capacity available.

The Brunswick Port Authority operates a bulk commodity terminal at Lanier Dock. The facility is 500 ft. long and constructed of steel and concrete, with a project depth of 30 ft. MLW, equipped with a grab bucket, conveyors and marginal tracks for handling bulk cargoes at rates up to 600 t.p.h. It operates covered warehouses with a capacity of approx. 60,000 tons. A limited amount of open storage space is available equipped with a conveyor system and reclaim facilities. Lanier Dock lies directly adjacent to the Brunswick State Docks and warehouses. Both wharves have a turning basin of 1,000 ft. in length and 600 ft. wide with a project depth of 30 ft. MLW (mean low water) also Barge Dock facility 250 ft. long.

BRIDGES: 1: Lanier Bridge draw bridge; 250 ft. horizontal clearance, 139 ft. vertical clearance, up position, high water. Vessels under control of Pilot and tugs when passing through.

STEVEDORES: Wireless to Agent 48-24 hours prior arrival with number of gangs, working hatches and space in hatch, and special factors, e.g. pilferable cargo, autos, heavy-lifts, etc.

MEDICAL: Advance notice to Agent, or notify on arrival.

TANKERS: Liquid bulk cargo is pine oil distillates loading. Petroleum storage 310,000 barrels, 6 tanks.

DENSITY: Average 1.0166 (high) to 1.0141 (low). Water inside considered brackish.

FRESH WATER: From shore connections at 20 t.p.h.

FUEL: Bunker "C" available at piers. Distillate and blends by barge, if required. 72 hour advance notice to Agent, giving type and quantity.

GANGWAY/DECK WATCHMEN: Not required but available.

OPENING/CLOSING HATCHES: "McGregor" hatches must be opened by vessel prior working. All others may open at discretion to save turn-around time.

CERTIFICATES: Registry, U.S. tonnage tax, CFR Pollution, Load line, SOLAS, Derat.

CUSTOMS ALLOWANCES: Tobacco, 2 cartons. Customs will open bonded stores on request. Spirits, reasonable amount.

IDENTIFICATION CARDS: U.S. Immigration Landing Permits.

CONSULS: None. Consulates at Savannah, Ga., and Jacksonville, Fla., may be used as required by vessel.

REPAIRS: Limited to minor replacement parts to engine, radio, radar of standard makes. Major repairs may be arranged with shipyards of Savannah or Jacksonville.

DRY DOCKS: None.

SURVEYORS: American Bureau of Shipping (912) 232-3793. Atlantic Marine Surveying, Inc. (912) 354-9938. Coleman, Kenney & Silas, Inc. (912) 352-7420. International Adjusters Southern Ltd. (912) 352-7420. National Cargo Bureau, Inc. (912) 236-1527. SGS Control Services, Inc. (912) 232-1995. L. O. Smith, Inc. (912) 233-9876. Southeastern Marine Surveying Company (912) 233-4157. J. W. Tarver, Jr. (912) 233-6661. Charles T. Theus, Inc. (912) 233-3588.

REPATRIATION: Through Agent.

AIRPORT: 20 minutes' drive from quays; 4 flights daily.

TIME: GMT minus 5 hours. Daylight Saving Time, April through last Sunday October. April: advance; October: retard.

HOLIDAYS: 1st January, 15th January, 12th February, 22nd February, 30th May, 4th July, 1st Monday in September, 12th October, 11th November, 4th Thursday in November, 25th December.

POLICE/FIRE/AMBULANCE: Numbers given in Boarding Brochure.

TELEPHONES: None placed aboard. Public pay (coin) telephones on quay clearly marked.

GENERAL: Brunswick, Georgia, is a small port specialising in export of woodpulp in bales, pine-tree products in drums. Imports bulk salt, oil, fertiliser materials and gypsum, some break-bulk general cargo. Vessel requirements handled by Agent in residence, communication by wireless or R/T essential in advance.

AUTHORITY: Brunswick Port Authority, P.O.Box 1039, South Yards, Brunswick, Georgia 31521. *Tel:* (912) 265-3700. *Telex:* TWX 810-7825071. *Contact:* Robert W. Turner, General Manager.

BUFFALO, New York: 42.55 N. 78.55 W.

(See Plan Book)

DOCUMENTS: For vessels arriving from foreign ports:

3 Unfreighted copies of Complete Manifest covering all cargo to be discharged in the Great Lakes.

4 Personal Effects Lists.

4 Crew Lists.

4 Narcotics Lists.

Vessel's Registry and copies of Paid Tonnage Tax Certificates.

Health Pratique.

Clearance from previous port.

PILOTAGE: Not compulsory. Seaway Pilots will assist if required.

ANCHORAGE: Inside South Breakwater, depth 27 ft.

MAX. SIZE: Limited by Seaway Locks. 730 ft. length and Seaway draft.

RESTRICTIONS: St. Lawrence Seaway navigation season. Approximately from 1st April to 15th December. Controlling depth 27 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, but not normally required.
RADIO: WBL – Buffalo.
BERTHING: Outer Harbour: Total berth space 2,400 ft.; depth alongside 27 ft. LW. 2 transit sheds – total of 184,000 ft. dry dock space; sprinkler system equipped, seaway piers for bulk cargoes. South and North Piers 3,506 ft. of berth space, 200 acres open storage area. Depth alongside 27 ft.
SPECIALISED CARGO HANDLING FACILITIES: A mobile gantry crane capable of handling lifts of 55 tons at 40 ft. and portable bulk conveyors. Crawler crane, capacity 230 tons. Conveyor, capacity 2,200 t.p.h. Additional heavy lift equipment available from the Port of Buffalo and commercial sources.
STEVEDORES: Gangs to be ordered by 1700 hrs. for 0800 hrs. start following day, ample gangs available.
DENSITY: Fresh water.
MEDICAL: U.S. Public Health Outpatient Clinic as well as numerous hospital facilities.
FRESH WATER: Available at most berths.
FUEL: All grades available by tank truck delivery or by harbour tank barge.
CONSULS: Canada, Costa Rica, Ecuador, France, Germany, Italy, Mexico, Netherlands and Sweden.
REPAIRS: Machinery and above-water repairs available.
AIRPORT: 5 miles, served by 4 regular airlines.
SHORE LEAVE: No restrictions when cleared by US Immigration Officials.
GENERAL: Refer to "Great Lakes Pilot".
AUTHORITY: Port of Buffalo, Niagara Frontier Transportation Authority, 901 Fuhrman Blvd., Buffalo, New York 14203. *Tel:* (716) 852 1921.

BURNS HARBOUR, Indiana: 41.38 N. 87.11 W. (See Plan Book)

The entrance to Burns Waterway Harbour is at Lat. 41° 38′ N., Long. 87° 11′ W., and is located on the South shore of Lake Michigan at Portage, Indiana, some 30 miles East of Chicago in an area known as the Indiana Dunes.
PILOTAGE: Available.
RESTRICTIONS: Average Navigation Season: Domestic cargo by lake freighters – March 15th to February 1st. Ocean going vessels via Seaway – April 1st to December 15th. Lake river barges – 12 months.
Approach to Harbour: Controlling depth of water at harbour entrance 30 ft., entry is from deeper water. Length and beam limitations – none. Approach open 24 hours per day.
Harbour: Controlling depth of water for outer harbour 28 ft.; East and West harbour arms 27 ft. Turning basin – 1,600 ft. radius with water depth of 28 ft. Accessible 24 hours a day. Length and beam limitations – none.
TUGS: Available if required.
BERTHING: The port provides 30 ft. depth at the entrance channel, 28 ft. at the inner harbour, and 27 ft. at berths. The harbour is protected by an all weather breakwater.

The port has 10 modern berths plus a mooring facilitiy specifically designed for self-unloader ships. Ultimately the port will have 15 ship berths. Recently completed are 2 modern, heated, sprinkler-equipped transit sheds providing 146,000 sq.ft. of space for general cargo, which are being operated by competent stevedores.

A refrigerated storage building is in operation.
CRANES: 3×150 ton crawler cranes; 3×75 ton crawler cranes; 3×60 ton crawler cranes.
FRESH WATER: Available.
AUTHORITY: Indiana Port Commission, 6600 U.S. Highway 12, Portage, Indiana 46368. *Tel:* (219) 787-8636. *Telex:* 725453. *Cables:* Indyport. *Contact:* James H. Hartung, Port Manager.

BURNSIDE, (including St. James), Louisiana: 30.08 N. 90.55 W.

East bank of Mississippi River, about 200 miles from sea.
DOCUMENTS/PILOTAGE: For all general information refer to "New Orleans".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made out to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Not normally required.
BERTHING: Bulk Marine Terminal: berth 800 ft. long, 40 ft. depth.

Ormet Corporation Berth 825 ft. long, 50 ft. depth. Situated at Mile Point 169. Max. LOA 305 m. Max. beam 41 m. Max. draft 12.19 m. (60,000 d.w.t. or 130,000 d.w.t. part load) 2 travelling gantry cranes and 1 shiploader. Height above LWL 27.5 m., outreach 19.2 m. Travel 198 m. Loading rate 600 – 1,000 t.p.h.
TANKERS: *St. James:* The facility is located on the West bank of the Mississippi River at Mile 180 above Head of Passes.

The operators are Shell Pipeline Corporation, Donaldsonville, Louisiana.

There are 2 berths, one of which is 800 ft. long and the other 1,100 ft. long. At the newer dock there are 2×16 in. arms and the berth is capable of unloading 28,000 bbls./p.h. The depth alongside these berths is 55 ft. to 60 ft. However, the draft of the vessel is limited to that available at Southwest Pass.

It is important to note that due to the design of this terminal it is impractical for vessels to receive stores at this location. Additionally there are no bunkers provided at this terminal nor is there any fresh water available from the terminal and there is no authorised anchorage in the immediate area of this facility. Vessels expecting less than 24 hours delay awaiting berth are generally anchored at New Orleans and then proceed to the terminal (which is a different port of entry for Customs) otherwise vessels would have to anchor at Burnside which is about 10 miles up river from St. James.

Because of an underwater pipe-line near the dock, the terminal management requires all vessels using their facility to have at least 1 tug of 1,800 h.p. to assist in docking and undocking.

As a point of reference it generally takes approximately 15 or 16 hours transit from Southwest Pass to St. James Terminal for most vessels.
FRESH WATER: Available ex-berth.
FUEL: Not available.
DENSITY: Fresh water, 1000.
NOTICE:
Agent to Shipmaster:
Vessels over 100,000 Summer Deadweight:

This is to advise you that the Pilots will not allow your vessel to transit outbound between Pilottown and Southwest Pass during darkness hours if your vessel is at a draft in excess of 35 ft. fresh water upon arrival at Pilottown outbound. The times involved are from 1600 hrs. until 0700 hrs. the next day.

We feel certain with various ballasting procedures you will be able to comply with this draft upon reaching Pilottown even though you may leave the *St. James Berth* at a greater draft. If you cannot comply, please advise your Agent boarding with this letter in order that he may inform all parties interested.

By anchoring at Pilottown you will be costing yourself an additional $3,500 minimum in tug and Pilot expense. Therefore, we sincerely require your utmost co-operation.

SHIPMASTER'S REPORT: February 1979.
Location: St. James – West Bank.
Documents: Ship's stamp on cash receipts.
Anchorage: Usually at Grandview in the Customs District of Gramercy, where launch service available and about 1 hour's drive to New Orleans.

From Capline (St. James) about 45 minutes' drive to Baton Rouge.
VHF: All berthing and river pilotage on Channel 13.
Tugs: 3 tugs recommended.
Berthing: Always port side to. No shore gangway, moorings 4, 2, 2 each end for tankers of 100,000 d.w.t. and upwards.
Cranes: Not available.
Tankers: Require ship's gangway at No. 2 berth.
Consuls: Honorary British Consul at New Orleans. (321 St. Charles Avenue). Open 1000 – 1200 hrs. and 1400 – 1600 hrs.

AUTHORITY: Greater Baton Rouge Port Commission, P.O.Box 380, Port Allen, Louisiana 70767. *Tel:* (504) 387-4207. *Contact:* John B. Dutton, Executive Director.

CAPE COD CANAL, (including Sandwich Oil Terminal), Massachusetts: (See Plan Book)

The Cape Cod Canal is a sea-level canal, extending from a point on Cape Cod Bay about 50 miles S.E. of Boston Harbour, Mass., to the head of Buzzards Bay, Mass. In general direction the Canal trends from Cape Cod Bay Westerly to Buzzards Bay.
PILOTAGE: The Corps of Engineers, Department of the Army , does not maintain pilot service but independent Pilots, licensed by the U.S. Coast Guard, are usually available at the canal. Messages will be transmitted to Pilots with the understanding that the Government will assume no responsibility in connection therewith.

Pilotage is compulsory and available 24 hours.

Pilot boards:

1. East Entrance: Position Lat. 41° 47.9′ N., Long. 70° 28.5′ W., midway between the Sea Buoy and the breakwaters.
2. West Entrance: Near West end of Cleveland Ledge.
3. By special request: Near Brenton Reef Light (Lat. 41° 25.6′ N., Long 71° 23.4′ W.) or 2 nautical miles South of Point Judith Light Buoy No. 2 in position Lat. 41° 19.2′ N., Long. 71° 28.5′ W.

Pilots are available from the following associations:

Northeast Marine Pilots Incorporated, Newport, Rhode Island (Tel: 401-847 9050 (HJ), 401-331 4824 (HN)).
Interport Pilots Associates. Tel: 201-291 1310.
Boston Pilots, East Boston. Tel: 617-569 4500.
Associated Coast Pilots. Tel: 201-887 7114.
Association of East Coast Pilots. Tel: 609-435 1239.

RESTRICTIONS:

	Width bottom Feet	*Length Miles*
Easterly Entrance to Station 430	480*	8.4
Station 430 to Wings Neck (Hog Island Channel)	500	4.3
Wings Neck to Cleveland Ledge (Cleveland Ledge Channel)	700	4.7

*Except narrows to 450 ft. opposite State Pier.

The canal and approach channels have been dredged to the project depth of 32 ft. below MLW.

RADIO: Direct communication with the Cape Cod Canal sub-office, New England Division, Corps of Engineers, is available at all hours by means of telegraph, telephone, or radio. The telephone number is 759-4431 or 789-4432.

The nearest ship to shore telephone stations are at Scituate, call letters (WOU) and Chatham, call letters (WCC). Bridge to bridge radio-telephone facilities are available on 156.65 MHz, 156.6 MHz, 156.7 MHz and 156.8 MHz. Vessels equipped for communications with the Cape Cod Canal are requested to keep their radio-telephone tuned to the above frequencies.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

VHF: Pilot Office and pilot vessel on Channels 16 and 13. Tugs on Channels 13 and 18A. Pilot listens 1 hour before vessel is expected.

BERTHING: Mooring basins are located at the East and West ends of the canal. The East Mooring Basin, located on the North side of the canal is 2,500 ft. in length, 350 ft. in width and is maintained at a depth of 25 ft. at MLW. The West Mooring Basin, located on the S.E. side of the Hog Island Channel is 3,300 ft. in length, 350 ft. in width and is maintained at a depth of 32 ft. at MLW. Mooring dolphins are provided in both mooring basins.

BRIDGES: 2 fixed span high-level highway bridges and 1 vertical lift railroad bridge cross the canal.

The minimum bridge clearance for the available width of channels are as follows:

	Horizontal Clearance	*Vertical Clearance (MHW)*
Highway Bridges	480 ft.	135 ft.
Railroad Bridge	466 ft.	135 ft. (open)
(vertical Lift)		7 ft. (closed)

TANKERS: See "Shipmaster's Report".

COASTGUARD STATION AND WEATHER SIGNALS: A U.S. Coastguard Station is located near the Eastern entrance.

TRAFFIC LIGHTS: Red, green and amber electric lights, visible for a distance of about 2 miles in clear weather, day or night, are located at the following points:

(a) Eastern or Cape Cod Bay entrance, on South side of entrance at an elevation of about 55 ft. above high water.

(b) Western or Buzzards Bay entrance, Wings Neck, near Wings Neck Light at an elevation of about 48 ft. above high water.

SHIPMASTER'S REPORT: September 1984.

Sandwich Oil Terminal: 41° 46.3′ N., 70° 30.9′ W. (See "Plan Book").

Location: 2,200 m. inside North Breakwater from Cape Cod Bay, South side of Cape Cod Canal.

Max. Draft: 40 ft. (salt water).

Salinity: 1025.

Anchorage: Good anchorage N.E. of Breakwater.

Berthing: Berthing and unberthing only when slack tide.

Berthing Port side alongside when arrival from Cape Cod Bay.

Berth must be approached with care.

Ship's gangway to shore.

Derrick rigged to take onboard two cargo hoses 10 in. diameter.

After discharging vessel to proceed through Cape Cod Canal as there is no turning basin. Max. draft 28 ft. Airdraft 135 ft. when passing 3 bridges.

Vessel can also enter from Buzzard Bay but draft according to Canal Control is 28 ft.

AUTHORITY: Department of The Army, Division Engineer, New England Division, Corp of Engineers, 424 Trapelo Road, Waltham, Massachusetts 02254-9149. *Contact:* Statistics Section.

CASTLE ISLAND, Alaska: 56.39 N. 133.11 W.

Located in Duncan Canal off Kupreanof Island between Wrangell and Petersburg. Open all year.

DOCUMENTS: See "Anchorage, Alaska".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

PILOTAGE: From sea via Dixon Entrance up Clarence Strait to Guard Island. Under pilotage from Guard Island.

MAX. SIZE: Harbour depth 45 ft.

TIDES: Diurnal range 16 ft. Also see "Berthing".

ANCHORAGE: Fair weather anchorage only.

CUSTOMS: Quarantine and Immigration available from Guard Island. Customs available from Petersburg or Guard Island.

BERTHING: Alaska Barite facility: Dolphins and 2 floats. Present facilities limited to about 22,000 ton ships. Loading equipment consists of 1 loading spout for bulk cargo. Production average of 1,000 t.p.h.

TUGS: From Wrangell, 3 available 500 h.p. each.

STEVEDORES: Sufficient to work ore loading facility 24 hours a day when necessary.

REPAIRS/WATER/FUEL: None.

MEDICAL: Facilities available in Petersburg or Wrangell.

AIRPORT: Charter airplane only.

CHARLESTON, South Carolina: 32.47 N. 79.56 W.

(See Plan Book)

DOCUMENTS:

3 Crew Lists.

3 Curio Lists.

3 Stores Lists.

3 Manifests.

At least 1 copy of Bill of Lading, if provided by shipper, and 1 copy of Parting Crew List.

PILOTAGE: Shipmasters to notify Agent 48, 24 and 12 hours prior arrival at C-2 Buoy. Pilot may be contacted by VHF Channels 16 and 18. Pilot boards on lee side from black-painted launch with "Pilot" painted in white letters on the side. Normally vessel is berthed by Docking Master from tug company.

Charleston Branch Pilots Association: 2 North Adgers Wharf, Charleston. Tel: (803) 577-6695. Monitors VHF Channel 16 and 18A, Channel 14 also available.

Masters please advise ETA and deep draft and changes in ETA as soon as possible. If no contact is made please announce ETA and draft over the air. Savannah and Cape Fear Pilot Stations will also pass on this information for you.

Pilot vessels: Call sign WZF 7266 "Carolina" 55 ft. length; "Palmetto State" 55 ft. length; "Sis" 37 ft. length.

Pilot vessel when on station guards following frequencies: VHF Channel 16; VHF Channel 13; VHF Channel 18-A, 156.95 MHz.

Location of pilot station: Charleston Buoy "2C" Lat. 32° 40.7′ N., Long. 79° 42.9′ W., in 42 ft. of water.

Pilot ladder requirements: Have ladder in good repair, clean and approximately 6 ft. above water. Please provide escort to and from bridge. Personal VHF portables are carried by Pilots.

Distances from pilot station to all berths approximately:

	Nautical Miles
Union Pier	12
Columbus Street	12.5
Exxon Dock	14.5
Wando Terminal	14
Ship Yard River	15 – 16
Navy Yard	16 – 19
Other Oil Docks	19 – 20
State Port Terminals	21
Army Transportation Docks	22
Naval Weapons Station	25
Cainhoy	22.5

ANCHORAGES: Rarely required.

RESTRICTIONS: Only restriction affecting operation relates to channel depth of 35 ft. at low tide.

MAX. SIZE: Can handle vessels 930 ft. long. Present private tanker facilities measure 475 ft. from centre of discharge pipe-line to end of dock.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Normal procedure. No special or unusual procedures required.

RADAR/VHF: Services required are handled through Agent.

Tug Companies: Marine Contracting and Towing: 723-7442 Radio frequency Channel (7A).

White Stack Towing: 577-6556 Radio frequency Channel (19A).

Marine operator on Channel 26 VHF.

Weather Station on Channel 39 VHF.

TUGS: Tugs usually join tankers between Cooper River Bridge and Coal Pier, approximately 0.5 miles from dock. Tug lines used. No charge made for this service.

Tugs are required for any vessel docking at or sailing from any state port berth which has a crane.

BERTHING: *Union Pier:* State Pier No. 2: 4 berths. Break-bulk terminal, length 2,471 ft. Depth 35 ft. 1×30 ton gantry. LASH barge handling capabilities, and 87,453 sq. ft. of open storage area.

Columbus Street Terminal: State Pier No. 8. 6 berths. Length 3,875 ft. Depth 35 ft. Terminal handles break-bulk and containers. One 440 ft. banana berth. 1×75 ton gantry crane, 1×50 ton gantry crane and 1×125 ton gantry crane serve 1,940 ft. of berthing space along the South end of the pier. 1×400 ton capacity sheer-leg, 1×90 ton truck crane and 2×40 long ton container cranes.

North Charleston Terminal: State Pier 15: Total length 2,500 ft. One general cargo berth length 600 ft., one grain berth length 675 ft. 2 container berths each 930 ft. length. 4×50 ton container cranes, one grain elevator, capacity 1.5 million bushels. Additional 25 acres of container storage area under construction.

Wando Terminal: 3 container berths, each 809 ft. length. 4 container cranes each 40 tons capacity. Max. draft 35 ft. Paved container storage area being extended.

BULK HANDLING FACILITIES: *Shipyard River Coal Terminal:* Operator: Massey Coal Terminal Corp. Max. size: 50,000 d.w.t. Max. draft 38 ft.

Accommodation includes a single ship berth at the confluence of the Shipyard and Cooper Rivers. The pier is served by a travelling and shuttling shiploader with telescoping chute, which has a maximum capacity of 2,500 t.p.h. and loads at an average of 1,650 t.p.h.

CRANES: 1×40 ton, 1×90 ton, and 2×140 ton mobile cranes are available to work any Port Authority Terminal.

BRIDGES: *Cooper River Bridges Specifications:* Main Channel Span: 150 ft. above MHW at Centre Line, 750 ft. horizontal.

Town Creek Span: 135 ft. above MHW at Centre Line, 750 ft. horizontal.

STEVEDORES: *Working Hours:* Labour may be ordered for work to start at the following times: 0800, 1000, 1200 and 1900 hrs. Labour will usually work as long as necessary; shift system not used in this port.

MEDICAL: Advance notice when possible.

TANKERS: *Private Facilities:* Discharge lines all 8 in. dia. and 1 solvent line 8 in. Adapter to conform to ship's discharge lines supplied. Draft not to exceed 35 ft. low tide. Tanker berths operated by Humble Oil, Shell Oil, Hess Oil, BPT, and Phillips Petroleum, all suitable for 35 ft. draft. Gulf Oil Berth, max. draft 30 ft. Texaco Berth, max. draft 32 ft.
FRESH WATER: Available via 2.5 in. hose at a rate of 500 bbls.p.h.
FUEL: Bunker "C" at API of 14.4 to 16.6 (approx.) and blended Bonded Intermediate grades from 1 to 30.
FIRE PRECAUTIONS: Normal precautions.
GANGWAY/DECK WATCHMEN: Supplied by Agent upon request from Shipmaster only.
CERTIFICATES: Normal International Certificates.
CUSTOMS ALLOWANCES: Tobacco, Wine and/or Spirits, governed by length of time in port and existing Customs Regulations.

DOCUMENTS:
For Agent in Montreal:
3 unfreighted copies of Complete Manifest for Seaway Toll purposes covering all cargo to be discharged in the Great Lakes.
In first U.S. port: a "Traveller" is made up by the Customs Inspector with the following documents:
2 complete sets of U.S. Cargo Manifests, plus 6 copies for Agents.
1 set Manifest of Cargo for first U.S. port.
4 Stores Lists.
4 Personal Effects Lists.
4 Firearms and Ammunition Lists.
4 Crew Lists, Form I418.
4 Narcotics Lists.
4 Vessel's Itinerary Lists.
Vessel's Registry and copies of Paid Tonnage Tax Certificates.
Health Pratique.
Clearance from previous port.
2 sets Bills of Lading.
3 copies Stowage Plan.
In subsequent U.S. ports the following are required:
5 sets Manifest of Cargo for that port.
The "Traveller" and Permit to Proceed issued in previous port.
2 Stores Lists.
2 Personal Effects Lists.
2 Firearms and Ammunition Lists.
2 Crew Lists.
2 Narcotics Lists.
2 sets Bills of Lading.
3 copies Stowage Plan.

PILOTAGE: Compulsory unless Master holds exemption "B" license. 24 hours' notice of arrival required by Agents who arrange Pilot.
ANCHORAGES: In Chicago Harbour, anchorages A, B and F designated for merchant ships and marked on charts. In Calumet Harbour vessels should not anchor within 1,000 ft. of the breakwaters.
RESTRICTIONS: St. Lawrence Seaway navigation season approx. from April 1st to December 15th. Controlling depth 27 ft.
MAX. SIZE: Limited at Seaway Locks. 730 ft. length, 26 ft. draft. Depth alongside terminals 27 ft.
RADIO: Port can be contacted by Illinois telephone station WAY.

Notice of arrival; Master must give at least 24 hours' notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also at least 24 hours' notice of ETA at first U.S.A. discharge port is required.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
MEDICAL: Doctors, hospital and all facilities available.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, not compulsory but recommended.
BERTHING: Two 100,000 sq. ft. terminal warehouse facilities. 90 acres of the 194 acre site has been set aside for maritime operations adjacent to the 3,000 ft. of berthing space alongside the Calumet River.

Calumet River Terminals: Iroquois Landing Lakefront Terminals. Operator: Ceres Marine Terminals. Facilities at the mouth of the Calumet River. Handles general cargoes, steel products and containers. The terminal has 3,000 ft. of berthing space. Heavy lift cranes run from 75 to 110 tons in capacity. Also numerous lift trucks, with capacities to 46,000 lb.

Federal Marine Terminals Inc. handles general cargo, steel products and containers. This facility has 730 ft. of berthing space, 34,000 sq. ft. of covered storage space and 11 acres of open storage space. Heavy lift cranes at Federal Marine range from 20 to 150 tons. Lift truck capacities range up to 52,000 lb.

The Rail to Water Transfer Corp. (RTW) on the Calumet River specialises in handling, storing and distributing raw materials or dry bulk commodities. RTW's twin bulk loading facilities offer 2 deep-water berths, each more than 700 ft. long. The facility has railroad yards that accommodate 2,200 rail cars adjacent to the dock. The twin loading towers provide fast handling at up to 2,500 t.p.h.

Lake Calumet Terminals: Bulk Terminals Co. in Lake Calumet transfers liquid bulk cargoes – animal fats, vegetable oils and chemicals. Bulk Terminals has 400 ft. of berthing space, with storage capacity of more than 550,000 barrels and 16,000 sq. ft. of drumming warehouse space. This facility has a transfer capacity of approximately 200 t.p.h. Bulk also has 5 miles of internal railroad trackage and a switch engine.

Ceres Terminals, Inc. at Lake Calumet handles steel, ores, pig iron, scrap and containers. The terminal was designed for easy interchange of cargoes to and from deep sea vessels. Mississippi River barges, Great Lakes vessels, railroads and trucks – both local and interstate. Truck and railcar weighing services are available also. Ceres has 1,500 ft. of berthing space; 45,000 sq. ft. of covered storage and 27 acres of open storage. Heavy lift equipment includes 5 cranes ranging from 125 to 150 tons. Lift truck capacities range up to 50,000 lb. per unit.

Ceres Marine Terminals facilities on Lake Calumet also have 176,000 sq. ft. of transit shed (60,000 heated); 100,000 sq. ft. of general storage, warehouse and distribution area (50,000 heated), and 50,000 sq. ft. of open storage. Equipment includes lift trucks, capacities up to 52,000 lb. North Pier services barge traffic to and from locations along the entire inland waterway system, and as far South as the Gulf, in addition to serving deep draft vessels.

Chicago Harbor Terminals (CHT) warehousing and marine terminal facilities on Lake Calumet are designed for efficient handling of steel, machinery, containers, scrap, pig iron, ferro-alloys and other metallic bulk commodities. CHT's 800 ft. of heavy duty bulkhead and 2×75 ton gantry mounted cranes operating over 3,700 ft. of tracks provide more than 1,000,000 sq. ft. of open storage under cranes. CHT has 100,000 sq. ft. of heated warehouse, with plans to expand that to 425,000 sq. ft. Other features are 25 acres of open storage, miscellaneous auxiliary cranes, an electronic truck and rail scale, 25,000 ft. of railroad track, ship to barge transfer, 100 intra-plant flat and gondola cars.

Trade Zone Distribution, Inc.: Operates Free Trade Zone No. 22 for warehousing, storage and distribution.

Buffington Harbour: Private harbour owned by Universal Atlas Cement. Located about 9.5 miles S.E. of Calumet Harbour. A concrete dock 1,755 ft. long, enclosed by a breakwater with entrance 880 ft. wide. Exposed to heavy N.E. swell. Depth alongside from 25 ft. to 31 ft.

BULK HANDLING FACILITIES: Continental Grain Company's Elevator "B" on the Calumet River has a storage capacity of 6,800,000 bushels. Elevator "B" has 5 loading spouts with a shipping capacity of 40,000 bushels per hour. Unloading capacity from barges is 15,000 bushels per hour. Receiving capacity from rail cars is 10,000 bushels per hour and from trucks 15,000 bushels per hour. The berthing space at elevator "B" is 1,025 ft.

The Cargill Inc. grain elevator on the Calumet River has a capacity of 23 million bushels. In addition to grain, this facility handles salt, molasses, and grain by-products. Cargill has 3,600 ft. of berthing space – 1,200 ft. of this for elevator use, and 20 acres of open storage. Loading capacity is 60,000 bushels per hour, while unloading is 12,500 bushels per hour. Cargill has 3 marine legs, and 5 loading spouts.

The Gateway Elevator of the Indiana Grain Co-Operative at Lake Calumet offers storage capacity of 6,500,000 bushels for bulk grains. The 8 loading spouts have a capacity of 20,000 bushels each per hour. Unloading speed is 10,000 bushels per hour. Berthing space is 1,000 ft.

Continental Grain's Elevator "C" at Lake Calumet has a capacity of 6,500,000 bushels of bulk grain and grain products. The 8 loading spouts have a capacity of 20,000 bushels each per hour. Unloading capacity is 10,000 bushels per hour. This facility has 1,000 ft. of berthing space.

DENSITY: Fresh water.

FRESH WATER: Available at most berths.

FUEL: All grades available, ex-wharf, or delivered by barge.

CLEVELAND, Ohio: 41.31 N. 81.43 W. (See Plan Book)

DOCUMENTS:

For Agent in Montreal:

3 unfreighted copies of Complete Manifest for Seaway Toll purposes covering all cargo to be discharged in the Great Lakes.

In first U.S. port: A "Traveller" is made up by the Customs Inspector with the following documents:

2 complete sets of U.S. Cargo Manifests, plus 6 copies for Agents.
1 set Manifest of Cargo for first U.S. port.
4 Stores Lists.
4 Personal Effects Lists.
4 Firearms and Ammunition Lists.
4 Crew Lists, Form I418.
4 Narcotics Lists.
4 Vessel's Itinerary Lists.
Vessel's Registry and copies of Paid Tonnage Tax Certificates.
Health Pratique.
Clearance from previous port.
2 sets Bills of Lading.
3 copies Stowage Plan.

In subsequent U.S. ports the following are required:

5 sets Manifest of Cargo for that port.
The "Traveller" and Permit to Proceed issued in previous port.
2 Stores Lists.
2 Personal Effects Lists.
2 Firearms and Ammunition Lists.
2 Crew Lists.
2 Narcotics Lists.
2 set Bills of Lading.
3 copies Stowage Plan.

It is especially important that vessels try to have their visaed Crew List on board which is required by U.S. Immigration at first U.S. port. Failure to have this visaed Crew List can result in all personnel being detained on board. Visa waivers are applied for and granted fairly regularly but Immigration has the discretion to refuse these at will.

PILOTAGE: Compulsory, unless Master has a "B" Certificate on board. Vessels are not permitted to transit the lakes from Port Colborne to Cleveland without either a "B" Certificate on board or a special Waiver from the U.S. Coastguard.

ANCHORAGE: In the outer harbour, 28 ft. depth, mud and sand bottom.

RESTRICTIONS: St. Lawrence Seaway navigation season approx. from April 15th to December 15th. Controlling depth 25 ft. to 27 ft. Access to berths in the River is limited by height restriction of 97 ft. above waterline.

MAX. SIZE: Limited at Seaway Locks, 730 ft. length, 26 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" first U.S.A. port (Albany).

TUGS: Available and use is compulsory in Cuyahoga River and Old River Channel.

RADIO: U.S. Coast Guard can be contacted by R/T on 2182 kHz.

Notice of Arrival: Master must give at least 24 hours' notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also at least 24 hours' notice of ETA at first U.S. discharge port is required.

BERTHING: General Cargo Docks: See page 1567.

Dock 20 (Foot of Old River Road, River Mouth)	Cleveland-Cuyahoga County Port Authority	None	—	Self-unloaders only	—	200,000 Bulk Commodities	900	27 ft.	
Ford Motor (Above Lorain-Carnegie Viaduct)	Ford Motor Co.	None	—	Self-unloaders only	—	780,000 Sand and Stone Pig Iron and scrap direct to cars	630	21 ft.	633ft. max. O.A. Length
Huron Cement (Sycamore Slip)	Cement Division National Gypsum Co.	None	—	Unloading pipes	—	31,332 Cement	415	24 ft.	502 ft.×68 ft. max. O.A. dimensions
Jones & Laughlin (Just below Union Terminal Viaduct)	Jones & Laughlin Steel Corporation	None	—	Self-unloaders only	—	100,000 Iron Ore and Stone	620 & 300	23 ft.	633 ft.×72 ft. max. O.A. dimensions
Lower Republic East Pier (Above Turning Basin)	Republic Steel Corp.	None	—	Self-unloaders only	—	87,000 Stone 8,300 Fluorspar	2,565	23 ft.	633 ft.×72 ft. max. O.A. dimensions
	Note: Dock also receives ship's pig iron, steel products and scrap.								
M.C.C. (Above Eagle Street Bridge)	Mid-Continental Coal & Coke Co.	2 Shuttle Conveyors	500	None		30,000 Coke Breeze	1,550	23 ft.	633 ft. max. O.A. Length, 72 ft. Beam
Merwin Avenue Dock (Between Foot of British Street and Viaduct)	Cuyahoga Lime Co. Incorporated	None	—	Self-unloaders only	—	45,000 Stone 65,000 Marl	245	23 ft.	666 ft.×72 ft. max. O.A. dimensions
Ontario Stone No. 1 (Above Penn Central Bridge, Mouth Cuyahoga River)	Ontario Stone Corp.	None	—	Self-unloaders only	—	125,000 Stone	495	23 ft.	664 ft. max. O.A. Length
Ontario Stone No. 2 (Left Bank, above West 3rd Street Bridge)	Ontario Stone Corp.	None	—	Self-unloaders only	—	75,000 Stone	695	23ft.	633 ft.×72 ft. max. O.A. dimensions
Ontario Stone No. 3 (Old River Bed, on Whiskey Island)	Ontario Stone Corp.	None	—	Self-unloaders only	—	175,000 Bulk commodities	700	24 ft.	647 ft.×70 ft. max. O.A. dimensions
Sand Products (Whiskey Island, Old River)	Sand Products Corp.	None	—	Self-unloaders only	—	95,000 Sand	850	22 ft.	633 ft. max. O.A. Length, 72 ft. Beam

COOS BAY, Oregon: 43.22 N. 124.13 W.

(See Plan Book)

DOCUMENTS: Local Port Authority does not require any documents from merchant vessels entering this harbour. This does not preclude United States Customs requirements for documents.

PILOTAGE: No specified amount of advance notice of ETA required. Radio contact may be made on frequency 8182, also on frequency 2182. Most used frequency is VHF Channel 16. Pilot will be taken on board at entrance to Coos Bay Channel. No designated anchorages for vessels awaiting a Pilot.

ANCHORAGES: North of Entrance Buoy.

MAX. SIZE: Max. permissible length is 725 ft., breadth 110 ft. A 2 ft. clearance under keel is considered necessary for safe navigation. Vessels entering Coos Bay from sea draw down about 0.166 in. per foot of draft because of difference in density.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Pilots, Agents and stevedores monitor VHF Channel 16.

TUGS: Pilot vessel acts as Tug. Emergency small harbour tugs available and ship's lines generally used.

BRIDGES: 2 bridges cross the main ship channel. The Southern Pacific railway drawbridge 9 miles from the entrance and the Coast highway bridge 9.6 miles from the entrance. Clearance height of the highway bridge is 149 ft. in the centre of the span at MLW. Clearance width of swinging railway bridge 194 ft.

BERTHING: *Note:* All berths with the exception of oil berths dredged to 35 ft. in 1979.

Cape Arago Dock: Length 504 ft. Depth alongside at MLW 22 ft. 6 in. (West end) and 25 ft. (East end). No dock cranes available. Fresh water available. Distance from entrance 5 miles.

Roseburg Lumber Co. Dock: Length 635 ft. Depth alongside at MLW 35 ft. No fresh water available. Distance from entrance 8 miles.

Ocean Terminals Dock: Length 400 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 11 miles.

Weyerhaeuser Dock: Length: (Lumber Dock) 1,433 ft. (Wood Chip Dock) 694 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 12 miles.

Fibrex and Shipping Co. Dock: Length of floating walkway 700 ft. Depth alongside at MLW 35 ft. Wood chip loaded by pneumatic pipe. Fresh water available. Distance from entrance 12.5 miles.

Bayshore Dock: Length 504 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 13 miles.

Dolphin Terminals: Vessels moor to dolphins adjacent to apron 60 ft. long and 26 ft. wide which is joined to the shore by a causeway length 190 ft. and width 12 ft. Depth alongside at MLW 35 ft. Fresh water available. Distance from entrance 13 miles.

Central Dock: Length 1,348 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 13.5 miles.

Portland Dock: Length 576 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 15 miles.

Coos Bay Dock: Length 1,326 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 15 miles.

STEVEDORES: Should have minimum of 48 hours to arrange gangs. Also see "Radio".

MEDICAL: Advance notice of required medical attention is desirable, in order to expedite use of ambulance, if necessary.

TANKERS: 2 tanker berths, Standard Oil and Union Oil Co., draft 30 ft. Tankers discharge into tank farms. Union Oil Co. is the bunkering Agent.

FRESH WATER: Available. Cost per ton is negotiable.

FUEL: 24 hours advance notice desirable, both bunker and diesel fuel available.

GANGWAY/DECK WATCHMEN: Service of watchman at discretion of ship's Master.

OPENING/CLOSING HATCHES: Normally by stevedores.

IDENTIFICATION CARDS: Not required by local authorities.

CONSULS: None.

REPAIRS: Only minor deck and engine repairs possible.

DRY DOCKS: Largest dry dock handles vessels not exceeding 220 ft.

REPATRIATION: Repatriation through local Customs and Immigration Office.

AIRPORT: All docks within 5 miles of airport. Airport served by regular airlines.

TIME: GMT minus 8 hours, clocks advanced 1 hour in May, clocks retarded 1 hour in November.

HOLIDAYS: All legal holidays observed, plus state-wide elections. Cargo work through negotiations with stevedore contractors.

POLICE/AMBULANCE/FIRE: Police: Coos Bay 269-1181, North Bend 756-3161; Ambulance 756-3234; Fire Coos Bay 267-4123, North Bend 756-6111.

SHORE LEAVE: Crew members allowed ashore except when Federal Directives may be applied to a specific vessel.

SHIP SUPPLY SERVICE: For general ship stores: Day Ship Supply, 602 W. Hemlock St., Coos Bay, Oregon 97420. Tel. (503) 267-3813.

For transportation of personnel: The Coos Bay Pilots' Association, P.O.Box 254, Coos Bay, Oregon 97420. Tel. (503) 267-4186 would be the initial contact.

There are also numerous charter boat operators who provide charter services.

For emergency services the U.S. Coast Guard maintains a helicopter squadron in port. They bring sick crew members directly to the hospital. Their information phone number is (503) 756-4142, and their emergency number is 756-4141.

DELAYS: No delays in berthing, loading or discharging, or bunkering can normally be expected.

DEVELOPMENTS: Depth of channel at entrance 45 ft. MLLW. Inner channel, to head of channel 35 ft. MLLW. An additional anchorage (Turning Basin) will be installed, directly East of Beacon 17.

AUTHORITY: Oregon International Port of Coos Bay, Port Building, Front and Market Streets, Coos Bay, Oregon 97420. *Tel:* 267 – Port. *Telex:* 360315. *Contact:* Frank Martin, Jnr., General Manager.

CORDOVA, Alaska: 60.33 N. 145.46 W.

Located at S.E. side of Prince William Sound at the head of Orca Inlet. Open harbour year round.

APPROACHES: Via Prince William Sound.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: Pick-up point is Sheep's Point. Prior arrangements required.

ANCHORAGES: Good holding ground. Mud bottom between Spike Island and Municipal dock.

MAX. SIZE: Recommend max. draft 25 ft. Tidal variation: 18 ft. – 19 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Contact port on VHF Channels 19 and 26; Citizens Band, Channel 5 or SSB 2509.

TUGS: Limited availability. Prior arrangements need to be made.

BERTHING: Berthing Permit required. Advance notice of 48 hours requested.

Municipal Dock: 18 ft. deep, 400 ft. long, 72 ft. wide. Open storage of 10 acres. One 140 ton P & H mobile crane.

Container and Ro-Ro facilities: Movable ramp, 4.57 m. wide, available for Ro-Ro operations. 4 ha. container staging area.

STEVEDORES: ILWU No. 66, Box 416, Cordova, Alaska, 99574. Tel: (907) 424-7224.

Working hours – 24 hours.

REPAIRS: Radio, radar, welding, machining and light engine repairs can be effected.

FRESH WATER: Available at docks.

FUEL: No bunker "C" available. Fuel oil available.

MEDICAL: 22 bed hospital and a medical clinic, with 3 doctors, 1 dentist also public health nurse.

CUSTOMS: Quarantine – local. Immigration and Customs from Anchorage, Alaska.

AIRPORT: 13 miles from city centre. Small plane field near town, available for charter air service.

HOLIDAYS: None.

TIME: Yukon Standard time.

POLICE/FIRE/AMBULANCE: All available. Tel: (907) 424 7475.

AUTHORITY: City of Cordova, Box 1210, Cordova, Alaska 99574. *Tel:* (907) 424-3351. *Contact:* Joseph L. Graham, Harbour Master/Port Director.

CORPUS CHRISTI, Texas: 27.48 N. 97.23 W.

(See Plan Book)

PORT LIMITS: Corpus Christi's port limits include all of Nueces County, which has been officially designated as Port of Corpus Christi Authority of Nueces County, Texas. The Corpus Christi Turning Basin, Avery Point Turning Basin, Chemical Turning Basin, Tule Lake Turning Basin and the Viola Turning Basin are interconnected by the Industrial Canal; the Tule Lake Channel and the Viola Channel constitute the Corpus Christi Inner Harbour. Other Bay points included in the Port of Corpus Christi area are: Harbour Island, the North end of Mustang Island, near the inner end of the Aransas Pass Entrance, and Port Ingleside and La Quinta along the route of dredged deepwater channels on North side of Corpus Christi Bay; and the Rincon Barge Canal System. All of the ship channel has now been deepened from 40 ft. to 45 ft. except the 10 mile Inner Harbour, which will be deepened from 40 ft. to 45 ft. in late 1985/early 1986.

DOCUMENTS:

- 3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
- 2 copies Crew Manifest (Form 1304).
- 2 copies Stores List (Form 1303).
- 2 copies Passenger List (Form I–418).
- 2 copies Crew List (Form I–418).

Customs Boarding Officer will also examine Ship's Register and Load-Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

- Health Pratique.
- Master's Oath (Customs, 2 copies Form 1300).
- General Declaration (2 copies Form 1301).
- All Foreign clearances.
- U.S. Certificates of payment of tonnage tax (Customs Form 1002).
- Certified Crew List.

PILOTAGE: Pilot boards off Port Aransas.

RESTRICTIONS: No restrictions, 24 hour service. The Port of Corpus Christi is situated on the West side of Corpus Christi Bay, in South-Western Texas. Port facilities at Inner Harbour lie along a 9.5 miles stretch of dredged channels and basins about 18 miles from Aransas Pass entrance at the Gulf of Mexico. Channel depth 40 ft., width 400 ft.

Turning Basins: 5 turning basins in the Inner Harbour are each minimum 1,000 ft. wide and more than 1,000 ft. in length.

MAX. SIZE: Cargo vessels: 39 ft. draft. Tankers: 40 ft. draft. Harbour Island has tanker docks with 45 ft. draft. Also see "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: KLC ITT-Radio-Arcadia, Texas. KLC RCA-Radio-Galveston, Texas.

VHF: KKQ 769 – Harbour Master – Channel 12 and 16. WR 8879 – Pilot Boat. KQU – Pilot Office – Aransas-Corpus-Christi Pilots Channels 12 and 16. KBP 384 – Harbour Tugs – Channel 12. U.S. Coast Guard – Channel 16.

TUGS: Tug assistance available. Tugs join vessels berthing at Harbour Island in jetty channel. Tugs accompany vessels entering Inner Harbour outside Corpus Christi Harbour Bridge.

BERTHING: The Corpus Christi Turning basin is over a mile long and 1,000 ft. wide. There are 4 additional basins in the Inner Harbour, which extends Westward from Corpus Christi Harbour Bridge for 9.5 miles. The water in all basins, channels and canals is 40 ft. deep.

Draft for public docks will be furnished upon request to the Harbour Master or steamship Agent. Draft for private docks will be furnished upon request to the dock owners or steamship Agents.

Also see "Port Limits" and "Developments".

Inner Harbour – Public Docks: The length limit indicator is not of necessity the max. length for a vessel as larger vessels can berth if adjacent berth is not occupied.

Cargo Docks No.	*Length Limit* ft.
1 – 2	700
3 – 6	1,300
8	600
9	750
10 – 11	700
12	700
14 – 15	1,000
Bulk Materials Dock	835
Public Grain Elevator Dock	900

Inner Harbour – Private Docks: (Other than oil docks).

PPG Industries Inc., Cargo Dock: Length of pier 450 ft. Length of Head 100 ft.

Producers Grain Port Terminal Elevator Dock; Lone Star Cement Corp. Dock; Berry Contracting Company; Centex Cement Company.

BULK CARGO FACILITIES: *Ore, Minerals, Coal, Petroleum Coke:* Bulk Materials Dock with travelling unloading tower capable of direct discharge from vessels to railcars or trucks at rate of 1,000 t.p.h.

A new Bulk Loading Terminal is planned for late 1985 to load vessels directly from trucks, railcars or stockpiles at rate of 1,500 t.p.h. The new dock will have a 45 ft. draft alongside, 63 ft. airdraft and 1,300 ft. slip length.

Grain: 2 export grain elevators are located in the Inner Harbour. The Corpus Christi Public Elevator has a 5,000,000 bushel capacity. Rated truck unloading capability is 1,000 t.p.h.; railcars can be unloaded simultaneously at 2,000 t.p.h. The Interstate Grain Port Terminal Elevator is privately owned and has a 6,400,000 bushel capacity.

TANKERS: Between Corpus Christi Turning Basin and Viola Basin are 11 public and 10 private Oil Docks, some capable of berthing tankers of 150,000 d.w.t. capacity. Also see "Berthing".

Inner Harbour – Public Docks:

Outside of Inner Harbour – Private Docks:

Harbour Island	American Petrofina Oil Dock.
Harbour Island	Exxon, Oil Dock No. 1.
Harbour Island	Exxon, Oil Dock No. 2.
Ingelside	Sun Pipe Line Co. Oil Dock.
La Quinta Channel	Du Pont Ship Liquid Chemicals Dock.
La Quinta Channel	Du Pont Ship Liquid Chemicals Barge Dock No. 1.
La Quinta Channel	Du Pont Ship Liquid Chemicals Barge Dock No. 2.
La Quinta Channel	Reynolds Metals Co. Bauxite Unloading Pier.
La Quinta Channel	Reynolds Metals Co. Alumina Loading Dock.

CARGO GEAR: 7 locomotive cranes including 4×30 tons, 1×25 ton, and 1×45 ton. Heavy lift facilities: Derrick at Cargo Dock 14 has 100 ton capacity, at 53 ft. radius, and can handle containers 40 ft. or larger; otherwise ship's gear used. Heavy lift facility also available at Bay, Inc.

Facilities are available for all types of liquid cargo, dry bulk and general cargo, but cannot handle restricted cargo such as ammunition and explosives.

BRIDGES: Corpus Christi Harbour Bridge: Vertical clearance at MHW is 138 ft.

Upper Harbour Lift Bridge: Vertical clearance at MHW when raised is 138 ft.

MEDICAL: Ample hospital and dental facilities available.

FRESH WATER: Water available at all public docks for 75¢ per 1,000 gallons; minimum charge of $25.00 for each connection.

FUEL: 1,500 Redwood, 1,000 Redwood – 24 hour notice.

Bunker C, Marine diesel, Light diesel – Pipe-line or Barge, Truck.

FIRE PRECAUTIONS: No working barges alongside (except bunkering barges) and normal precautions such as shut down cargo operations during lightning, storm, etc.

REPAIRS: See "Services".

SURVEYORS: American Bureau of Shipping; J. E. Orrell, Lloyd's Sub-Agency and National Cargo Bureau.

GANGWAY/DECK WATCHMEN: Not necessary. If recommended $6.00 per hour.

HATCHES: Hatches may be opened by crew before entering harbour, after the ship has entered harbour it is carried out by stevedores.

CUSTOMS ALLOWANCES: 300 cigarettes per man. 1 quart liquor per man.

POLICE/AMBULANCE/FIRE: Police 882-1911, Ambulance 882-5571, City Fire 884-5563, Refinery Terminal Fire Co. 882-7801.

EMERGENCY CO-ORDINATION CENTRE: U.S. Coast Guard Marine Emergency (512) 937-1898.

TELEPHONES: No arrangements exist.

SERVICES: Coastal Iron Works, Inc., 2,500 ton dry dock, 1,000 ton marine railway, machine shop Tel: (512) 882-8807 and (512) 884-5581.

Jay Bludworth, Inc., Ship Repairs. Tel: (512) 887-7981.

International Marine, Ship Repairs. Tel: (512) 884-2491.

SHIP SUPPLY SERVICE:

Helicopter Charter, Rental and Leasing:

Evergreen Helicopters, P.O.Box 7781, Corpus Christi, TX. 78415. Tel: 512/854-995.

Home Office (Evergreen Helicopters), Route 3, Box 198, Galveston, TX. 77553. Tel: 409/740-0231.

Omniflght Offshore, Inc., P.O.Box 7519, Corpus Christi, TX. 78415. Tel: 512/289-1181.

Pumpkin Air, Inc., P.O.Box 10264, Corpus Christi, TX. 78410. Tel: 512/289-6363.

Ship Chandlers:

Atlantic Steamers Supply Company, 1212 N. Tancahua, Corpus Christi, TX. 78401. Tel: 512/883-5187.

Texas Marine & Industrial Supply, P.O.Box 9754, Corpus Christi, TX. 78408. Tel: 512/289-7375.

Tug Boat Rentals:

Loyd W. Richardson Corporation, P.O.Box HHH, Aransas Pass, TX. 78336. Tel: 512/882-8434.

CONSULS: Danish Consul, 4517 Baldwin. Tel: (512)884-6344.

German Consul, 5440 Old Brownsville Rd. Tel: (512)289-2416.

Mexican Consul, 1740 First City Tower I. Tel: (512)882-3375.

Spanish Consul, 19833 Melissa Lane. Tel: (512)887-7246.

AIRPORT: Approximately 7.75 miles from Port. Serviced by 5 regular airlines.

TIME: Daylight Saving Time from last Sunday in April to last Sunday in October (minus 5 hours GMT). Central time remainder of year (minus 6 hours GMT).

HOLIDAYS: New Year's Day (January 1st); Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday (3rd Monday of February); Texas Independence Day (March 2nd); Good Friday (varies); Memorial Day (last Monday of May); June 20th; July 4th; Labour Day (First Monday of September); Columbus Day (2nd Monday of October); Veterans' Day (4th Monday of October); Thomas W. Gleason's Birthday (November 8th); Thanksgiving (4th Thursday of November); Christmas Day (December 25th).

Possible to work on any holiday, except Labour Day or Christmas, only in case of fire or danger to property. If holiday falls on Sunday, Monday is observed.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: Standard Immigration Forms I–95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I–95, issued for same vessel.

DEVELOPMENTS: Port plans for late 1985 include deepening the Inner Harbour to 45 ft. and constructing a radial bulk loader facility to load vessels (100,000 d.w.t.) directly from trucks, railcars or stockpiles at rate of 1,500 t.p.h.

Baker Marine is developing a site previously owned by National Steel Corporation for offshore service facilities at Port Ingleside.

AUTHORITY: Port of Corpus Christi Authority, P.O.Box 1541, Corpus Christi, Texas 78403. *Tel:* (512) 882-5633. *Telex:* 910-876-1446 Ccpe Coc. *Contact:* Harry G. Plomarity, Executive Director. Doug Marchand, Managing Director. Fred Bingham, Harbour Master.

DESTREHAN, Louisiana: 29.56 N. 90.21 W.

East bank of Mississippi River about 121 miles from sea.

DOCUMENTS/PILOTAGE: For all general information refer to "New Orleans."

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: At least 1 tug required for mooring/unmooring.

BERTHING: (a) St. Charles Elevator, berth 1,000 ft. length, Minimum 41 ft. depth. Loading rate, Max. 75,000 bushels per hour; 2 loading belts.

(b) Bunge Grain Elevator, berth 700 ft. length, Minimum 41 ft. depth. Loading rate, Max. 70,000 bushels per hour; 2 loading belts.

(c) ADM Midstream loading buoys – 2 mooring facilities.

FRESH WATER: Available ex-berth.

FUEL: Not available.

DENSITY: Fresh (1000).

OPERATOR: (a) St. Charles Grain Elevator Company, P.O.Box 267, Destrehan, Louisiana 70047. *Telex:* TWX 810-955-5525.

(b) Bunge Corp., P.O.Box 156, Destrehan, Louisiana 70047. *Telex:* 587386 Bunge Dstr.

(c) Artco, 104 Campus Drive, Suite 104, Destrhan, Louisiana 70047. *Telex:* TWX 810-951-5348.

DETROIT, Michigan: 42.19 N. 83.05 W. (See Plan Book)

Refer to "St. Lawrence Seaway" for important general information.

PILOTAGE: Compulsory unless Master holds exemption "B" licence. 24 hours' notice of arrival required by Agents who arrange Pilot.

ANCHORAGES: In depths from 29 ft. – 51 ft. in the Detroit River off the marine terminals and away from main channel.

RESTRICTIONS: St. Lawrence Seaway navigation season approx. from April 15th to December 15th. Controlling depth 27 ft. Minimum depth of 25 ft. in the Detroit River. The Amherstburg Channel has a depth of 27 ft. 6 in. for upbound traffic.

MAX. SIZE: Limited at Seaway Locks. 730 ft. length, 26 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available, not compulsory but recommended for some terminals.

BERTHING: *Detroit Marine Terminals (Clark Street):*
2,325 ft. dock with 27 ft. LW depth.
4 berths.
Container Freight Station – U.S. Customs approved. 100,000 sq.ft. covered storage.
Total 25 acres of which 20 acres dedicated to container operation.
1×200 ton heavy lift crane with automatic container spreader.
3×85,000 lb. top-loading container handlers.
1×25,000 lb. empty container handler.
1×250 ton diesel crawler crane.
1×200 ton diesel crawler crane.
1×50 ton diesel electric travelling gantry crane.
1×25 ton diesel electric travelling gantry crane.
1×15 ton diesel electric travelling gantry crane.
1×150 ton rail scale.
Fork trucks up to 45,000 lb. capacity.
Lift trucks up to 80,000 lb. capacity.
1×80,000 lb. top loader for 20 ft. – 40 ft. containers.

Detroit Marine Terminals (River Rouge):
1,400 ft. dock with 27 ft. LW depth.
2 berths.
45,000 sq.ft. covered storage.
200,000 sq.ft. storage pads.
Total 45 acres.
2×250 ton crawler cranes.
1×150 ton crawler crane.
4×140 ton crawler cranes.
1×50 ton gantry crane.
3×40 ton railroad cranes.
1×25 ton gantry crane.
2×600 h.p. switch engines.
1 rail scale 212,000 lb. capacity.
1 truck scale 212,000 lb. capacity.
7 magnets.
8 clam buckets.
Yard and warehouse lift trucks up to 70,000 lb. capacity.

Nicholson Terminal & Dock Company (Ecorse Dock):
3,400 ft. dock with 27 ft. LW depth.
6 berths.
70,000 sq.ft. covered storage.
Total 34 acres.
2 cranes, 70 ton capacity at 40 ft. radius and 50 ton capacity at 60 ft. radius.
4×12 ton gantry cranes.
6×30 ton diesel locomotive cranes.
1×85 ton mobile crane.
1×200 ton crawler crane.
3×1,000 h.p. diesel yard engines.
1×290 h.p. diesel yard engine.
1×150 ton railroad scale.
1×72 ft. combination rail and truck scale 400,000 lb. capacity.
2×87 in. magnets.
11×65 in. magnets.
5×55 in. magnets.
12 buckets: 1.5 yds. to 15 yds. capacity.
1 forklift truck, 50,000 lb. capacity.
1 forklift truck, 40,000 lb. capacity.
25 forklift trucks, various capacities.
3×12 yd. bucket front end loaders.

Nicholson Terminal & Dock Company (Summit Street Dock):
1,530 ft. dock with 28 ft. LW depth.
2 berths.
250,000 sq.ft. covered storage.
Total 16 acres.
2 crawler cranes, 200 ton capacity.
12 forklift trucks; 12,000 lb. to 45,000 lb. capacity.
1×60 ft. truck scale 300,000 lb. capacity.

DONALDSONVILLE, Louisiana: 30.05 N. 91.00 W.

(See Plan Book)

SHIPMASTER'S REPORT: September 1980.

The report was compiled over 4 visits between August 1979 and August 1980.

APPROACHES: The coastline is low at the mouth of the river and consequently does not give a good radar return. The Racon on East jetty shows up between 12 to 17 miles. Fog and mist is a complication as it is very prevalent with the added problem of the oil rigs. These are located mainly on the East side of the safety fairway but in August 1980 construction was proceeding on a structure right on the Western boundary of the safety fairway about 4 miles S.W. of the East pier.

The sea buoy is difficult to locate, vessel should approach as per the leading line indicated.

A strong West flowing current across the entrance can be encountered.

Draft restriction varies throughout the year and should be ascertained in good time. August 1980 at 40 ft.(FW) but patches of 39 ft. 6 in. in places. (Mud, so no difficulty.)

Officially the Bar at the S.W. Pass is the limiting factor but in practice other areas of the river up to New Orleans are as much of draft restriction factor.

Above New Orleans to Baton Rouge a battle is being fought against silting up and a large dredging programme will have to be commenced soon otherwise the draft will be severely limited – still at 40 ft. officially.

A new road bridge about 15 miles above New Orleans is under construction called 'Ascension', clearance is likely to be 150 ft., the lowest on the river, at zero gauge or about 130 ft. at High River.

PILOTAGE: Pilot boards at Sea buoy from a fast cutter. Ladder/gangway arrangements 6 ft. from water, normal port gangway at S.W. Pass.

Change at Pilot Town about 1 hour 45 minutes above S.W. Pass and New Orleans about 6 hours above Pilot Town.

If at anchor and requiring a Pilot a minimum of 3 hours' notice is required. Normally order Pilot through Agent. The Baton Rouge-New Orleans Pilots may only berth ships at Donaldsonville about 3 times per year.

ANCHORAGES:

Belle Chase	Mile post 75	1 hour below New Orleans
12 Mile Pt.	Mile post 81	30 minutes below New Orleans
Bonte Carre	Mile post 128	2 hours above New Orleans
Burnside	Mile post 169	4 hours above New Orleans

All anchorages are standing moor operations, if proceeding down river 2 tugs will be required to swing vessel into current, this is *essential* in High River season.

In all, the bank is steep and mud, as long as vessel lies quietly onto bank little damage can result. In fact this is preferable to hanging out in midstream and getting hit by passing barge strings and shipping.

VHF: Public correspondence as per ALRS. Moving upriver-Venice, New Orleans, Convent (New – Channel 25) and Baton Rouge. Just about in coverage all the way up from Pilot Town to berthing, all stations very busy in working hours.

Pilot ordered through Agent and on Channel 16.

USCG: Follow VTS booklet.

Boat service: At 12 Mile Point anchorage a launch service operates on Channel 20. Pilots and Agent board by this service.

TUGS: Normally two low powered 'Watson' tugs of 1,200 h.p. (approximately). 1 forward (tug's line) and the other pushing.

'Crescent' tugs of around 2,000 h.p. are stationed at Burnside which are available if not handling larger vessels.

BERTHING: *Berth approach and depths:* This is the cause of most concern at Donaldsonville. The channel is at its narrowest off Triad Berth (The downstream berth 0.5 miles below C.F. Industries at Mile Post 173.5), having a minimum depth of 30 ft. (Zero Gauge at Donaldsonville) over a width of 140 ft. and is steep to, falling to 20 ft. over 180 ft. in width.

Gauge reading can vary from about + 5 ft. after a dry Summer to + 14 ft. or more at the end of the Winter season when the snows to the North are melting.

There is a set onto the Triad Berth varying with the main current. Again as the river height, the current varies from 0.5 knots in late Summer to upwards of 5 knots or more in late Winter. Effect is increased by a Northerly wind.

Berth Approach: Head upriver on berthing, unberth stern first until clear of shoal, approximately when bow is 50 ft. downriver of lower Dolphin on Triad Berth, then swing with aid of tugs. Actual depth alongside (Zero Gauge) C.F.I. Berth = 44 ft. (minimum) Triad Berth = 41 ft. (minimum).

Guidelines for berthing as follows:

C.F.I. Berth: No berthing or unberthing at night. No vessels to be on Triad, berthing or unberthing.

Triad Berth: Night movements dependent on wind, tug power, etc.

The question of taking bunkers thereby increasing the draft arises. If berthing at Triad only, can take before berthing. If also berthing at C.F.I. it is best left until clear of C.F.I. berth.

Berths: C.F.I. Berth: Reasonable condition. Short steel jetty with 2 dophins plus mooring buoy at either end, the nearest dolphins either side of the jetty are interconnected by a catwalk.

At 26 ft. the maindeck is level with dolphins so gangway must be turned in. B.O.T. type gangway by pilot ladder position to after dolphin. Port side alongside.

Berth also used for loading bulk fertiliser. Watch the bulk boom as it is left unsecured and can be fouled.

Triad: 0.5 miles downstream from C.F.I. (plants back onto each other).

Basically the same as C.F.I. but dolphins not connected to jetty. No mooring buoys, all dolphins, not as good condition as C.F.I. Bulk fertiliser also loaded. Port side alongside, B.O.T. type gangway amidships.

Moorings: Basically 3, 2, 2, crossed after springs each berth. Mooring boat which moors forward first then aft. Lets go aft first – very handy as propeller is clear quickly. (See Plan) – have moorings ready before arrival.

CARGO: Ammonia only at both berths plus bulk fertiliser. Labour on both berths assists in connecting up.

C.F.I.: Ship's 12 in. to 8 in. reducer plus shore 150 – 300 ASA spool piece.

No vapour return line, no venting. Loading at 450 t.p.h. but depends on pumps available, normally two. Emergency stop for ship operation.

Triad: Ship's 12 in. to 8 in. reducer. No VRL, no venting. Loading at 350 t.p.h. but again depends on available pumps. Shore tanks are set back further than C.F. Industries and line heating is apparent.

FRESH WATER: Not available at Triad berth. Available at C.F.I. Berth (Rate 1 t.p.h.). Barge from New Orleans cost about $1,500.

TELEPHONE: On both berths through the terminal operator. Local calls free, long distance calls collect.

GENERAL: Do not go ashore for draft readings as it involves going along river bank, plenty of snakes and alligators.

Donaldsonville Town nearby, about $5.00 in a taxi. Baton Rouge about 45 minutes away. The International Airport at New Orleans is about 1.5 hours away.

Stores: Lorries can back down jetty roadway to within a few feet of manifold area. A permit has to be obtained at both berths.

USCG: Usual pre-arrival hazardous ship reports to Coast Guard Captain, New Orleans.

Necessary to have a Coast Guard escort through New Orleans. Check must be made that the Pilot is advising the USCG of the vessel's position and that she requires an escort. Escort with blue flashing light (fast patrol launch) joins off Algies Point and goes through to Huey P. Long Bridge, and vice versa.

THE FOLLOWING REPORT (Dated November 1980) IS TO BE READ IN CONJUNCTION WITH THE REPORT ABOVE.

SW Pass: The West flowing current is very strong, about 5 knots across entrance and in region of Fairway Buoy. Steer well to the East.

9 Mile Anchorage: Boat charges $35.00 per boat, any number persons, 24 hour basis. Runs on hour every hour for shore leave purposes by arrangement. Call 'Port Ship Services Poydras' on Channel 20. Minibus to New Orleans at $5.00 per person can be arranged.

Tugs/Pilot: Minimum 2 hours' notice, order through Agent.

VHF: Agent: On Channel 16 and 73, Tricon (Trammo Agent) on Channel 16 and 73. Chandler: Sarussen Marine, on Channel 16 and 9.

Films: Sea View Films: Best to cable direct as per Walport Instructions. Also change Vidpack. Change from launch if required when passing New Orleans.

Burnside Anchorage: Boat Charges: $20 per boat plus $5 per person. Call "Webber Marine" Burnside on Channel 16 and 18A.

Agents: Call Tricon Burnside on Channel 16 and 73 (Trammo Agents).

Donaldsonville: Depths – See latest chart, shoaling alongside CF Industries and off Triad.

Berthing/Leaving scraped alongside Triad berth, maximum 30 ft. off. Turn when one ship's length below "Triad", lower dolphin.

Three "Parish" tugs used in and out.

To line up manifold at C.F.I., pilot ladder gate should be in line with gangway on lower dolphin.

Water rate is 5 t.p.h. from fire hydrant stand pipe, not hose.

Water by barge from Baton Rouge at $4.00 per tonne. Minimum 100 tonnes plus $85.00 per hour for tug. Minimum 4 hours =$740.00.

No bunkers officially allowed alongside, but can probably take diesel at night.

Agents: Tricon in Burnside are now Trammo Agents.

DULUTH-SUPERIOR, Minnesota: 46.49 N. 92.09 W.

Refer to "St. Lawrence Seaway" for important general information.

PILOTAGE: U.S. or Canadian Pilot compulsory except when Master or officer specially qualified to navigate waters concerned. Pilots obtained from Upper Great Lakes Pilots Inc., 802 Garfield Avenue, Duluth. Duluth entry – Pilots picked up at point 2 miles due East of pierhead lights. Superior entry – pick up Pilot 2 miles N.N.E. of lighthouse. Advise Agents 24 hours in advance of ETA for scheduling Pilot, Customs, Immigration, and Agricultural Inspection. Masters should hold to the South of convergence of shipping lanes at the Duluth Entry and to North of this convergence at Superior Entry when approaching to embark a Pilot.

ANCHORAGES: Anchorage areas near Duluth and Superior entries are South and Eastward and North and Eastward respectively of main channel through harbour. Marked by anchorage buoys. Vessels must only anchor clear of channels at all times.

RESTRICTIONS: Because of varying conditions of wind and current, no restriction placed on speed passing through entry piers at either Duluth or Superior entry. Speed throughout harbour limited to 7 knots. Speed through bridges other than the Aerial Bridge at Duluth entry limited under normal conditions to 6 miles per hour. Because of current conditions at inner end of Duluth entry, both inbound and outbound vessels must leave vertical black/white striped mid-channel or traffic buoy on starboard hand. This gives outbound ships maximum straight run.

MAX. SIZE: Draft 26 ft. Duluth Harbour Entry: Duluth ship's canal, minimum width 300 ft. Superior Entry: Minimum width 500 ft. minimum depth at inner end of 27 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Prior to entering harbour vessels must make "Security Call" on Channel 51 (2185 kHz) from 10 to 20 minutes in advance advising intended movement. All vessels should monitor Channel 51 at all times when under way to determine position and intent of other vessels moving in constricted areas within harbour and approaches.

TUGS: Available, not compulsory.

BRIDGES: Aerial Bridge spanning Duluth entry vertical clearance of 138 ft. Signal for opening bridge shall be given by vessels approaching from lakes, in all circumstances, when not less than 1 mile from bridge. A flashing amber light on harbour side of Aerial Bridge warns outbound vessel of approach of inbound vessel in lake.

BERTHING: *Clure Marine Terminal.* Also see "Developments".

Length of dock: 6,600 lineal ft., 9 ship berths, 5 for unloading/loading, 4 for fitting, cleaning, standby, etc. Water depth: 30 ft. 2×90-ton Clyde gantry cranes for container handling. 1×35-ton mobile crane.

13 grain loading berths.

Duluth Iron & Metal	– length of berth 1,586 ft.	– water depth 26 ft.
Meehan Seaway Services Ltd.:	– length of berth 1,059 ft.	– water depth 22 ft.
Hallet 3	– length of berth 2,080 ft.	– water depth 23 ft.
Hallet 5	– length of berth 2,373 ft.	– water depth 23 ft.
Hallet 6	– length of berth 2,060 ft.	– water depth 23 ft.
Northern Pacific No. 2	– length of berth 2,415 ft.	– water depth 22 ft.
Paper Calmenson-Duluth	– length of berth 853 ft.	– water depth 21 ft.
Paper Calmenson-Superior	– length of berth 700 ft.	– water depth 20 ft.

St. Lawrence Cement Co.: The unloader uses a series of high-speed screw conveyors to discharge at the rate of 675 tonnes per hour. The unloader can also travel the length of the ship berth, discharging the cement on to dockside conveyor belt systems. Length of berth 700 ft. Storage capacity 43,000 tons.

MEDICAL: All medical assistance available.

DENSITY: Fresh water.

FRESH WATER: Available at most docks in both ports.

FUEL: Available from dock or by barge.

FIRE PRECAUTIONS: No open fire permitted on deck of any vessel while in harbour. This restriction does not apply to a vessel at a shipyard which will be governed by this shipyard's local rules, nor to vessels in lay-up or fit-out status at ore docks.

Ocean vessels, upon docking, shall put on off-shore side of vessel, wire rope lines fore and aft as tow lines for use in pulling ship off dock face in case of fire. Such tow line shall be securely made fast to bitts with eye about 1 ft. above the water.

CERTIFICATES: Masters are required to present Safety Inspection Certificate of cargo handling equipment and gangways to stevedoring companies and other employers of harbour labour upon request.

IDENTIFICATION CARDS: Required by Immigration.

REPAIRS: All ship repairs can be effected.

DRY DOCKS: At Superior, one 831 ft. by 95 ft. and one 628 ft. by 76 ft.

SHORE LEAVE: Allowed.

DEVELOPMENTS: A new grain bagging facility under construction is a joint project of General Mills and the port authority. The facility is located at General Mills Elevator "A" on Rice Point and is expected to be operational early 1985.

A container terminal, together with all the back-up facilities located near the S.W. corner of Clure Terminal is now available. The container crane will be a Paceco Economy Portainer with a capacity of 30 tons, outreach 84 ft., back reach 22 ft. The Portainer is equipped to handle 20 ft., 35 ft., and 40 ft. containers.

AUTHORITY: Seaway Port Authority of Duluth, P.O.Box 6877, Duluth, Minnesota 55806. *Tel:* (218) 727-8525. *Telex:* 910-561-0052 Norcenter Dul. *Contact:* Davis Helberg, Port Director. Bill Cortes, Public Affairs Director.

EL SEGUNDO, California: 33.54 N. 118.27 W.

OPERATOR: El Segundo is a Chevron U.S.A. offshore multi-buoy marine terminal and refinery.

LOCATION: The terminal Sea Buoy is located approximately 600 yards W.S.W of Berth No. 3 in 102 ft. of water at Lat. 33° 54′ 28″ N., Long. 118° 27′ 29″ W. This lighted bell buoy is painted red with 6 in. high white letters reading, "2 ES". It exhibits a white flashing light every 4 seconds (flash 0.4 secs., eclipse 3.6 secs.). The lantern is 11 ft. above water.

In addition to the many tanks of the El Segundo Refinery, the chimneys of power plants adjacent to the Marine Terminal form prominent landmarks. Two 334 ft. chimneys painted with alternating red and white horizontal stripes mark the Los Angeles Department of Water and Power Scattergood Steam Plant located just North of the Terminal. Directly South of the Terminal is a set of 4 shorter chimneys at the Southern California Edison Co. Power Plant.

DOCUMENTS: Five copies each of the following documents are required for entry and clearance:

Crew List (I-418)
Crew's Effects Declaration (1304)
Ship's Stores Declaration (1303)
Inward Foreign Manifest (1302: If vessel is to discharge at more than one port, each port, with its cargo, must be listed on a separate manifest).

MAX. SIZE:

Berth No.	*Maximum Draft* (ft.)	*Maximum Length* (ft.)	*Vessel Tonnage* (d.w.t.)	*Water Depth at MLW* (ft.)
1	28	550	Up to 30,000	38
2	42	650	Up to 50,000	50
3	51	1,000	Up to 150,000	63
4	56	1,000	Up to 150,000	65

BERTHING: It is expected that the vessel will provide berthing and messing facilities for the 3 man launch crew as well as for the Mooring Master.

Mooring Gear: Each anchor shall be equipped with no less than 10 shackles of chain. Vessels over 50,000 d.w.t. shall have at least 12 shackles on each anchor. Wires on mooring winches should be at least 1,000 ft. (preferably 1,200 ft.) and should be 1.25 in. to 1.625 in. in diameter, depending upon the size of the vessel. Constant tension winches must be braked by means of manual brake.

Synthetic fibre lines of dacron or polyester must be at least 9 in. in circumference and 120 fathoms in length.

NOTE: Polyester/Dacron lines are the only lines acceptable. If vessel is not so equipped polyester mooring lines can be rented from the terminal.

Mooring lines should be located as follows:

1. At least three lines on the main deck forward
2. At least three lines on the main deck aft
3. At least four lines on the poop deck.

If vessel over 100,000 d.w.t. fittings must permit doubling of all lines. Each synthetic line requires a separate bitt.

Mooring Facilities: Berth No. 1 is a 6-point mooring and is used for transfer of refined stock, primarily lub oils and chemical. The unlighted spar buoys mark the offshore end of the pipe-lines and is located approximately 1 mile East of the sea buoy and 1,100 yards offshore. There are also 3 hose marker buoys, one for the end of the chemical hose string and one for the end of each lub oil strings. The chemical hose string consists of seven 8 in. diameter × 25 ft. lengths. The lube oil strings are a parallel set of seven 8 in. diameter × 25 ft. lengths which are connected at the ship-end by a piping manifold which the ship provides.

Berth No. 2 is a 6-point mooring and is used for transfer, of light oils (primarily gasoline and jet fuel). It is located approximately 700 yards N.W. of Berth No. 1 and 1,600 yards offshore.

Berth No. 3 is a 7-point mooring used for the transfer of fuel and crude products. It is located approximately 750 yards West of Berth No. 2, and 2,400 yards offshore.

Berths Nos. 2 and 3 are each equipped with 1 unlit spar buoy and a can buoy. The seaward spar buoy marks the location of the offshore end of the submarine hose when the hose is on the bottom. A can buoy, or hose marker buoy, is connected to the end of the submarine hose by a chain. The submarine hose string in Berth No. 2 consists of nine 12 in. diameter × 25 ft. lengths of which one is over-the-rail, connected to the seaward end of a 16 in. submarine pipe-line leading to the shore facility. The submarine hose string in Berth No. 3 is connected to the seaward end of a 26 in. submarine pipe-line and a 12 in. line for circulation, by seven 16 in. diameter × 25 ft. lengths of hose followed by one 12 in.×25 ft. length hose and one 12 in. diameter × 30 ft. long over-the-rail hose.

Berth No. 4 is equipped with 1 unlit spar buoy and 1 unlit can buoy. The inshore spar buoy marks the end of the 36 in. submarine line and 14 in. circulation line. One hose string comes off the main 36 in. submarine line. The hose string consists of 5×35 ft. long lengths of 20 in. hose, followed by a reducer and then 2×25 ft. long lengths and 1×30 ft. long over-the-rail length of 16 in. hose. The end of the hose string is connected to a can buoy by a chain.

NOTE: All berths are equipped with UHF direct dial radio telephones. VHF marine operator is also available, marine operators are located at Redondo Beach and San Pedro.

Hose Handling: The vessel will be expected to have suitable equipment on deck and ready for making the connection to the submarine hose.

Berths No. 1 and 2 require lifting capacity of at least 5 long tons.

Berth No. 3 requires a lifting capacity of at least 7 long tons for vessels up to 30,000 d.w.t. and at least 8 long tons for vessels over 30,000 d.w.t.

Berth No. 4 requires a lifting capacity (calculated load) of 10 long tons.

Procedure for Discharging: At the completion of most cargo discharges the vessel will be required to receive a 150 bbl. hose wash displacement of cutter stock or gas oil. This is to prevent the hose from plugging while not in use.

Product Transfer Rates, Pressure and Temperature: Lubricants and chemicals are transferred at Berth No. 1 at varying rates depending on the particular product, the maximum rate being approximately 2,100 bbls.p.h. Hoses are rated to 275 p.s.i.

Gasoline and jet fuel loaded at Berth No. 2 are usually transferred at 7,000 – 12,000 bbls.p.h. with a pressure at the ship's rail not to exceed 50 p.s.i. Gasoline and jet fuel are discharged at Berth No. 2 with a pressure not to exceed 125 p.s.i. at the ship's rail. Hoses are rated to 150 p.s.i.

Fuels and crude are loaded at Berth No. 3 at rates to 20,000 bbls.p.h. No. 3 Berth hoses are heavy duty 275 p.s.i. rated. Vessels are expected to maintain discharge pressure of at least 125 p.s.i. at the ship's rail and/or a flow rate of 20,000 – 25,000 bbls.p.h.

No. 4 Berth hoses are heavy duty 275 p.s.i. rated, and the system has a normal working pressure of 180 p.s.i. On this one hose system, vessels are expected to maintain flow rates of up to 50,000 b.p.h.

Sumatran crude cargo will not be accepted by the facility unless the ship's average tank temperature is at least 125°F. However, the average temperature for Sumatran crude should not exceed 130°F. in order to avoid excessive vaporization of the light fractions in the crude. Heavy viscous residue fuel cargo will not be accepted from a ship unless the ship's average tank temperature is at least 130°F.

RADIO: *Pre-arrival radio message to ship:*

The vessel's Agent will normally advise the vessel by radio of the following general information when the vessel is approximately 3 days out:

Mooring Master boards 2 miles S.W. sea buoy Lat. 33° 54.5′ N., Long. 118° 27.5′ W.

Have starboard hose boom derrick rigged (if so equipped) and 7 good strong mooring lines ready – 3 main deck forward, 3 main deck aft, 4 poop deck (polyester lines only).

Sumatran Crude average cargo temperature must be 125°F on arrival.

Anchor in anchorage "A" or "B" as directed by message from shore.

Have pilot ladder rigged on starboard side.

Assure 125 p.s.i. pressure on riser during discharge.

Any Customs, quarantine, etc., special information.

Advise if all cargo pumps are in good operating condition, and best average discharge rate.

Radio Communication Prior to Arrival:

Estimated time of arrival (ETA) and requirements for services should be directed to the ship's Agent. ETAs should be sent 7 days, and repeated 3 days and 24 hours, prior to arrival.

Within 2 hours of arrival, communications may be established with the mooring launch via VHF radio Channel 10.

Radio and Telephone Ship to Shore Communications:

UHF Radio. The Mooring Master is equipped with a UHF radio for direct communications with the Terminal Control room at all times from the start of mooring until the vessel has cleared the mooring on departure.

MEDICAL: Several hospitals are available in the area. US Coast Guard or local ambulance service may be expected to know what hospital is best suited to handle a particular emergency.

FRESH WATER: Potable water is not available at this mooring. Water barge service is not available in the area. Closest supply is the harbour at San Pedro.

FUEL: Bunker fuel for ship's use is not available in the moorings of the El Segundo Marine Terminal, but may be arranged through Chevron International, San Pedro.

BALLAST: No ballast can be accommodated at the Terminal.

CONSULS: Consulates of most of the maritime Nations are maintained in both the cities of Los Angeles and Long Beach.

AIRPORT: The Terminal is located approximately 2 miles South of Los Angeles International Airport.

TIME: Standard Time along the entire West Coast of the United States is GMT minus 8 hours. Daylight Saving Time is used all along the coast. Clocks are advanced 1 hour in Summer.

WINDS/TIDES/CURRENTS: *Winds:* Westerly, onshore winds usually prevail. Gales are very rare in Santa Monica Bay, but the local thermal winds blowing from a Northerly direction sometimes necessitate interruption of transfer operations and require moving a ship from the mooring to anchor.

Northerly winds occur during the period from October through May.

In the Autumn and Spring, duration averages 4 to 6 hours

In November, December and January, duration averages 10 hours.

Velocities up to 52 knots have been recorded.

Tides and Currents: Normal tides of approximately 6 ft. pose no significant problems in this open roadstead.

Currents run unpredictably North or South along the coast in the vicinity of the Terminal. The current is most commonly from North to South and is stronger in Summer than in Winter.

TELEPHONE: Each berth is equipped with telephone service. To call El Segundo Terminal, ask Mooring Master. To call local outside numbers within the Los Angeles area, ask Mooring Master.

GENERAL: *Supplies:* Modest quantities of supplies may be taken aboard while at the moorings if absolutely necessary, provided the Mooring Master gives prior approval. This practice is discouraged in view of the sea swell and wind conditions that can develop in the open roadstead of the moorings, as well as the long distances to normal marine supply facilities.

Launch service: A company operated launch may be chartered for vessel's use through the vessel's Agent at the option of the Owner's representative. This launch operates between the moorings and the Port-O-Fino Dock in King Harbour, Redondo Beach, on a published 4 hours' schedule which may be obtained from the Mooring Master. A one-way trip takes approximately 40 minutes. There is a waiting room for use by all tanker personnel awaiting the launch. The waiting room is in the second building facing the yacht moorings. Blue arrows are painted on the side walk between this waiting room and the launch ramp, to assist in identifying the waiting room.

Pilot Ladder: The vessel shall rig a safe and secure pilot ladder or pilot hoist (not accommodation ladder) for the Mooring Master and Government Officials to use in boarding and leaving the vessel.

Air Pollution: Any vessel showing visible smoke in excess of 3 minutes is in violation and may expect to be cited and required to pay substantial fines.

Dumping of Garbage: Dumping of rubbish or garbage overboard within 50 miles of the coastline is prohibited.

AUTHORITY: *Operator:* Chevron Shipping Co., P.O.Box 910, San Pedro, California 90733, U.S.A. *Tel:* (213) 832-6478. *Telex:* TWX 910-345-6396. *Contact:* Captain Gary R. Roberts, Port Superintendent/ Mooring Master.

U.S.C.G., Captain of the Port, Los Angeles/Long Beach, 165 N. Pico Avenue, Long Beach, CA 90802. Tel: (213) 590-2315.

El Segundo is an open roadstead marine terminal with no official Port Authority other than U.S.C.G.

ERIE, Pennsylvania: 42.10 N. 80.05 W. (See Plan Book)

Refer to "St. Lawrence Seaway" for important general information.

PILOTAGE: Not compulsory. Seaway Pilots will assist if required.

RESTRICTIONS: Navigation season from 14th April to 26th December approx. The port is connected to Lake Erie by an entrance channel, depth 28 ft. Vessel's size restricted by Seaway locks.

MAX. SIZE: 730 ft. length; 26 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Quarantine Station. Quarantine procedure undertaken at Quebec City for incoming vessels from foreign ports.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Master must give at least 24 hours' notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also, at least 24 hours' notice of ETA at first U.S. discharge port is required.

TUGS: Available. Not compulsory, but sometimes necessary in bad weather.

BERTHING:

City of Erie Grain Elevator: Owned by the Port Authority, leased by the Port Authority, berthing length 980 ft., depth of water alongside 24 ft., 2.5 million bushel capacity.

Erie Marine Inc. (subsidiary of Litton): New ship assembly yard with graving dock (largest on Great Lakes), available for dry dock repairs.

Ore Dock: 1,000 ft. long, 26 ft. – 27 ft. of water alongside. The ore dock has 400,000 ton storage pad available for lease.

Port Authority East Bay Industrial Site: 75 acres available for sale or lease.

Erie International Marine Terminal: Leased to Codan Corporation, stevedores for the Port of Erie; 1,400 ft. long, with 28 ft. of water. Terminal used for bulk and general cargo; 23 acres; 750,000 sq. ft. of warehousing and transit sheds with truck and rail loading facilities; 200, 140 and 125 ton mobile cranes equipped with magnets, buckets and gear for heavy lifts, also 300 ton stiff leg crane. Terminal served by ConRail with reciprocal switching for N&W and B&LE railroads. A total of more than 100 acres of waterfront property is available where an industrial complex may be constructed.

DENSITY: Fresh water.

MEDICAL: All facilities available.

FRESH WATER: Obtainable by pipe-line at all docks.

FUEL: All grades available by pipe-line at all docks.

REPAIRS: Local shipbuilding company can handle most repairs. Dry dock available.

AUTHORITY: Erie-Western Pennsylvania Port Authority, Room 507, Municipal Building, Erie, Pa. 16501. *Tel:* (814) 456-8561. *Contact:* Joseph G. Rosenthal, Port General Manager.

EUREKA, California: 40.48 N. 124.10 W. (See Plan Book)

DOCUMENTS: In addition to the documents detailed below, Agent will present to Master normal Customs forms to be signed, such as Master's Oath, Permit to Lade, Inward & Outward Manifest, etc. These forms will be filled out by local Agent and Customs Broker and presented to local Customs house when entering and clearing vessel:

Foreign Flag Vessels:

I. Entering from another U.S. port:
- 3 Crew Lists.
- 3 Passenger Lists (only if passengers on board).
- 3 Curio Lists.
- 3 Store Lists.
- Permit to Proceed (issued at last U.S. port).
- Travelling Manifest (only if there is foreign cargo on board).
- Ship's Register.

II. Entering from a foreign port:
- 3 Crew Lists.
- 3 Passenger Lists (only if passengers are on board).
- 3 Curio Lists.
- 3 Store Lists.
- Travelling Manifest.
- Permit to Proceed.
- Ship's Register.
- Ship's tonnage tax Certificate.
- Clearance from a foreign port.

PILOTAGE: Telegraphic address of Pilot station "Humbar". 24 hours advance notice of ETA; in case of change in ETA give minimum 4 hour notice. Contact pilot boat on VHF 156.8 (Channel 16) or radio watch on 2182. Radio watch is maintained 2 hours prior to arrival at sea buoy on Channel 16. Working Channels are 6, 13, 18A and 77.

No Pilot boat on station. Local Pilots use tug "Thor" length 65 ft. 800 h.p. Tug colours: black funnel, red and white superstructure and black hull. As no Pilot boat on station, sound signals not required. Visual international flag and light signals observed. Pilot will board vessel within 1 mile radius North, South and West of sea buoy. Sea-buoy located 1.4 miles from end of North jetty lined up with range lights bearing 105 degrees true.

Specific requirements: *(a)* Pilot ladder with spreaders in accordance with Solas regulations, and 9 ft. above water. *(b)* At night – brilliant light to illuminate ladder. *(c)* Recommended anchorage outside Humboldt Bay located 1 mile South of sea-buoy in 15 fathoms of water.

ANCHORAGES: Inside harbour, weather permitting. Light draft vessel (22 ft. or less) South of Fairhaven Dock (Crown Simpson) and West of Standard Oil Dock. Deep draft vessels (22 ft. to 32 ft.) will anchor North of Union Oil Terminal and South of Samoa Channel entrance buoys.

RESTRICTIONS: Humboldt Bay is a 24 hour port; restrictions if any would depend upon manoeuvrability and horsepower of vessel during peak tide. Range of tide normally 8 ft., extreme cases 10 ft.

MAX. SIZE: Max. LOA 740 ft., max. beam 115 ft. Max. draft 35 ft.

HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Send cables through one of the following stations:

ITT World Communications, Inc. – San Francisco Marine Radio Station KFS.

RCA Global Communications – San Francisco Marine Radio Station KPH.

TUGS: 3×800 h.p. tugs available, 1 tug acts as pilot boat, other tug joins vessel when in harbour. Tug's lines are normally used, occasionally a ship's line is used. No extra charge assessed for use of tug's line. Two tugs minimum are used.

BERTHING: No specific requirements relating to berthing; normal procedures prevail. Vessel normally docks stemming the tide.

Berths presently available at Eureka as follows:
- Crown-Simpson Pulp Co.
- Eureka Forest Products.
- Louisiana-Pacific Corporation.
- Humboldt Dock & Shipping Co.
- Olson Terminal.
- Standard Oil of California.
- Union Oil of California.
- North Coast Exporting Co.

Harbour channels maintained to 35 ft. zero tide except for South Bay Channel to Olson Terminal which is maintained at 26 ft. Most of berths at above-mentioned docks also maintained at 35 ft. zero tide; however, some occasionally fill in and recommended check with Agent as to depth available at specific dock where vessel intends moor and load.

Also see "Developments".

STEVEDORES: 6 local gangs available. Groups ordered at 0630 hrs. in the morning for both day and night gangs. Therefore essential that local Agent or stevedore company receives accurate ETA by 0600 hrs. in the morning. Normally, vessel will advise arrival sea-buoy with a 24-hour ETA and correct ETA at a later time if necessary. The basic commodities exported from Eureka are woodpulp, woodchips, logs and lumber.

Westfall Stevedore Co. Cable Address: Westfall, Eureka. Tel. (707) 443-5688.

MEDICAL: Not necessary for Agent to receive advance notice of required medical attention unless ambulance and doctor are required on arrival. 3 hospitals in immediate area. Inoculation and vaccination certificates should be up-dated.

TANKERS: 2 tanker berths available: Standard Oil of California – deepest draft 35 ft. at zero tide. Union Oil – deepest draft 35 ft. at zero tide. Normally only Company tankers use own facilities. Facilities privately owned and are not available for bunkering other vessels.

DENSITY: Salt water.

FRESH WATER: Available all berths. Delivery by hose. Rate of delivery: 10 t.p.h.

FUEL: If bunkers required, Agent must go through major contractors, who in turn will inform their local supplier of requirements. Generally speaking bunkers are only supplied to vessels on an emergency basis in limited quantities. The bunkers usually diesel grade and delivered by truck on a prearranged schedule.

GANGWAY/DECK WATCHMEN: Services of gangway guards available if required by ship.

OPENING/CLOSING HATCHES: Normally stevedores' work unless done prior to docking. Vessel's crew may assist in opening and closing hatches, if hatches require special attention.

CERTIFICATES:
- Ship's register.
- Load-line Certificate.
- Derat Certificate.
- Cargo Gear Certificate.
- Tonnage Tax Certificate and all other usual certificates required.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes and 1 lb. of tobacco. Wine and/or Spirit, 1 bottle (approx. 1 quart).

CARGO GEAR: Must be in good order and safe operating condition and all cargo gear certificates must be valid.

IDENTIFICATION CARDS: Alien seamen require Crewman Landing Pass (U.S. Form I-95).

CONSULS: None. Nearest consuls at San Francisco.

REPAIRS: Small welding jobs, and minor machine work only. Major repairs normally carried out in San Francisco.

DRY DOCKS: None.

REPATRIATION: Normally done in conjunction with San Francisco, Portland, Los Angeles or Seattle Agent.

AIRPORT: Airport located approximately 20 miles North of Eureka. Limousine service available. Major airline, Republic Air Lines. At present 3 flights per day to San Francisco and 1 flight per day to Portland.
TIME: Local time is Pacific Standard Time and is GMT minus 8 hours. However, from the last Sunday in April to the last Sunday in October, Eureka is on Daylight Saving Time.
HOLIDAYS: No work performed on following holidays: New Year's Day (January 1st); Thanksgiving Day; Christmas Day (December 25th).
POLICE/AMBULANCE/FIRE: Eureka City Police 442-4545; Eureka City Ambulance 442-4551; Eureka Fire Department 443-5656; Humboldt County Sheriff Department 443-5671; Arcata Fire District 822-2424; Humboldt Fire District No. 1 442-1212.
TELEPHONES: No arrangements for placing telephones on board; however, there are pay phones nearby at each dock as well as phones in nearby offices.
SERVICES: Specific services such as tank cleaning, compass adjusting, tank washing,etc., are not normally performed in the port of Eureka and are usually performed in one of the close major ports such as San Francisco; however, there are facilities available for minor repair.
SHORE LEAVE: Crew members allowed ashore unless restricted for Customs or Immigration reasons.
DELAYS: Berthing delays seldom incurred primarily due to the fact that the prime Agents are always in contact with the local Agent at Eureka informing them of vessel's ETA and prime Agent is always advised with regard to all arrivals and possible berth conflicts at this port.
DEVELOPMENTS: Deepen North Bay Channel to 35 ft. and widen bends in channel at Channel Miles 0.74 and 2.6. Deepen Samoa Channel and outer reach of the Eureka channel to 35 ft. Provide an anchorage area in North Bay, at a suitable location between jettied entrance channel and Gunther Island, 35 ft. deep, 1,200 ft. wide and 1,200 ft. long.
AUTHORITY: Humboldt Bay Harbor, P.O.Box 1030, Eureka, California 95502-1030. *Tel:* (707) 443-0801. *Contact:* Jack B. Alderson.

EVERETT, Washington: 47.59 N. 122.13 W.

(See Plan Book)

DOCUMENTS, PILOTAGE, etc.: Refer to "Tacoma".
PILOTAGE: Pilot boards off Port Angeles Pilot Station.
ANCHORAGE: Unlimited deep water anchorage in Possession Sound.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, join vessel off berth. 17 tugs, 150 to 900 h.p.
BERTHING:
Weyerhaeuser Berth: Length 700 ft.
Pier No. 1 South: Usable berth length 520 ft.; Approach water depth 90 ft.; Water depth at pier 35 ft. MLLW; Plank and piling; 20 ft. Apron; Transit shed with 57,960 sq. ft. on pier; Access by road, barge and rail.
Pier No. 1 North: Usable berth length 600 ft.; Approach water depth 90 ft.; Water depth at pier 40 ft. MLLW; Multi-purpose 35-ton bridge crane (Containers – convertible for bulk cargo handling); Rail spur on dock; Plank and piling; 40 ft. Apron; Transit shed with 36,000 sq. ft. adjacent to pier; Access by road, barge and rail.
Pier "B": Usable length 450 ft.; Approach water depth 32 ft.; Water depth at pier 40 ft.; Plank and piling; 50 ft. Apron; Access by road and barge.
Pier "D": Usable length 500 ft.; Approach Water depth 32 ft.; Water depth at pier 40 ft.; Two 35-ton Whirley cranes; Plank and piling construction; 45 ft. Apron; Access by road and barge.
Pier "E": Usable length 450 ft.; Approach water depth 32 ft.; Water depth at pier 40 ft.; Plank and piling construction; 45 ft. Apron; Access by road and barge.
Norton Terminal: Usable length 703 ft.; Approach water depth 90 ft. Channel and berth depth 37 ft. 20 acres terminal (max. terminal development – 80 acres). Container cranes available. 36,000 sq. ft. warehouse. Rail spur on terminal.
STEVEDORES: 11 local gangs, additional gangs may be imported if required.
HOLIDAYS: See "Tacoma".
MEDICAL: Doctors and local hospital available.
DENSITY: Changes daily as port is at the mouth of a fresh water river.
FRESH WATER: Available at wharves.
FUEL: Available by barge from Seattle.
GANGWAY/DECK WATCHMEN: Required only if detainees aboard.
CUSTOMS ALLOWANCES: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.
AIRPORT: Seattle – Tacoma International Airport is 45 miles South of city of Everett on excellent highway. Driving time is approx. 45 minutes.
POLICE/AMBULANCE/FIRE: Port of Everett Security: 259 – 3164; Everett City Police: 259 – 8711; Everett City Fire Dept.: 252 – 1111; Ambulance Service: 252 – 1234.
TELEPHONES: Will be placed on board vessel on request. Charges are only for calls made. Arrangements should be made through ship's Agent.
SHORE LEAVE: Crew members are able to visit Everett at all times.
AUTHORITY: Port of Everett, 2928 Terminal Avenue, P.O.Box 538, Everett, Washington 98206. *Tel:* (206) 259 – 3164. *Telex:* 4740140-Poeui. *Contact:* John G. Belford, Executive Director.

FALL RIVER, Massachusetts: 41.42 N. 71.10 W.

DOCUMENTS: If first port of call in U.S., 2 complete Customs Manifests describing all cargo on board and ports of discharge. Also 1 Cargo List for Fall River cargo; 3 Crew's Lists; 3 Stores Lists; 3 Curios Lists; Ship's Register, Load-line Certificate and Tonnage Tax Certificate.
PILOTAGE: Vessel first contact ship's Agent for Pilot and tug arrangements. Northeast Pilots' Association radio call letters KDF-375 on frequency 156.9 kHz, Channel 18. Usual Pilot pick-up is at Brenton Reef Light Tower off Newport, R.I.
RADIO: Chatham Radio or Amagansett Radio.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Tugs for N.E. Power Station meet at Buoy 6; all other berths North, meet tugs at Buoy 10. Tugs provide own lines at no extra charge.
2 tug companies serve Narragansett Bay and Port of Fall River.
4 tug boats – 24 hour dispatching service. 2×3,000 h.p. boats.
BERTHING: *State Pier:* Principal maritime cargo terminal at State Pier. Berth 600 ft. long with depth of 35 ft. MLW alongside.
New Ro-Ro facility 80 ft. wide beam by 42 ft. inboard depth completed in 1979. (8° incline at water's edge – concrete deck on wood piling).
All utility services available. Further information telephone 617-674-5707 or ship Agents.
BRIDGES: All bridges have 135 ft. clearance with exception of Brightman Steel Bridge at approach to Montaup Electric Co. and Shell Oil docks. This bridge has a draw clearance of 97.5 ft. and passage allowed for vessels with less than 75 ft. beam. No unusual requirements. Practice is to depart on flood tide. (See "Developments".)
TANKERS: Berth at Shell Oil Docks. Depth alongside 35 ft.
FRESH WATER: Available at most berths. State Pier delivery is at 125 pounds pressure.
OPENING/CLOSING HATCHES: Usually performed by stevedores.
CERTIFICATES: All certification of vessel, safety conditions and radio facilities should be available for U.S. Coast Guard.
CARGO GEAR: No additional safety requirements.
TELEPHONES: Available at most berths. Contact Agents.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95 issued for the same vessel.
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from April to October.
HOLIDAYS: New Year's Day (January 1st); Washington's Birthday (February 22nd); Patriots' Day (April 19th); Memorial Day (May 30th); Independence Day (July 4th); Labour Day (1st Monday in September); Columbus Day (October 12th); Veterans' Day (November 11th); Thanksgiving Day (last Thursday in November); Christmas Day (December 25th); or any day celebrated in lieu thereof.
SHORE LEAVE: Permitted, but consult Agents.
DEVELOPMENTS: Plans for construction of a new 150 ft. wide draw bridge to replace the existing Brightman Street Bridge. This will mean unobstructed use of the entire port area.
AUTHORITY: Fall River Port Authority, State Pier, Water Street, Fall River, Massachusetts 02726. *Tel:* (617) 674-5707. *Contact:* William J. Torpey, General Manager.

FERNDALE, Washington: 48.49 N. 122.43 W.

(See Plan Book)

Mobil Oil Tanker Terminal
DOCUMENTS/HEALTH/etc.: Refer to "Seattle".
PILOTAGE: Compulsory. Pilot boards at Port Angeles.
TUGS: Tug escort required if vessel is loaded and is larger than 40,000 d.w.t. Tug horsepower must be 5% of d.w.t. Available up to 3,000 h.p. Additional tugs ordered from Seattle if required.
RESTRICTIONS: Vessels enter any hour day or night.
Regulations prohibit tankers larger than 125,000 d.w.t. in U.S. waters East of a line from Discovery Island Light to New Dungeness Light.
MAX. SIZE: Length 1,000 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BERTHING: Terminal used for crude and product discharging. Vessels berth alongside finger pier, lines to quick release hooks. Inner berth for barges only. Outer berth 900 ft. long, depth alongside 40 ft. at MLW. Dirty ballast water 3,000 long tons with prior notification.
OPERATOR: Mobil Oil Corporation, Ferndale Refinery, P.O.Box 8, Ferndale, Wa. 98248. *Tel:* (206) 384-1011. *Telex:* 910-449-2412. *Contact:* W. D. Robb, Refinery Manager.

FORT PIERCE, Florida: 27.27 N. 80.19 W.

PILOTAGE: Compulsory. Pilot boards at sea buoy. Send vessel's ETA to Agent 72 hours, 48 hours and 24 hours prior to arrival.
ANCHORAGE: Vessel anchors and awaits Pilot 0.5 miles seaward of sea buoy.
RESTRICTIONS: Vessel is able to berth and unberth during hours of darkness if the weather is clear. The leading lights are good but the channel is narrow and marked by unlit buoys. Diameter of turning basin 1,000 ft. Least depth of water in the channel from sea to berth 26 ft. (dredging in progress).
MAX. SIZE: Max. draft 25 ft. (1 ft. keel clearance in the turning basin required). Range of tide 1 ft. 3 in.
TUGS: One 500 h.p. tug and one 1,000 h.p. tug available. Not advisable to manoeuvre without use of tug.
RADIO: Lantana Radio.
VHF: Channels 16 and 13. Watch only maintained when vessel expected.
BERTHING: The berth is located in Fort Pierce inlet. Length of jetty 411 ft. At present only 1 berth available on the North side of the jetty. Dredging is under way on the South side. Distance from entrance to berth 3 miles.

All moorings placed on the jetty and vessels lay quietly alongside. However, with a S.E'ly wind it may be difficult to keep the after end of the vessel alongside. Vessels are able to dock and undock at any stage of the tide, however, if vessel's draft is over 25 ft. suggest vessel waits for HW.
CARGO HANDLING FACILITIES: There are no facilities for bulk cargoes. No quay cranes. Ro/Ro facilities available for island type trade. There is sufficient mechanical equipment for handling palletised cargoes. Equipment or storage space for containers is available. An insulated/refrigerated storage shed has been built at the jetty.
FRESH WATER: Available.
FUEL: Not available in the port but could be supplied by barge or tanker truck.
MEDICAL: Doctor and hospital available.
AIRPORT: Local airport 5 miles from port, nearest international airport is within 2 hours by car.
SERVICES: Fresh provisions, laundry services, groceries and meats available.
REPAIRS: No facilities available.
GENERAL: Fort Pierce harbour is at present in the early stage of development. For many years the port has been used only for barge traffic and small craft and the inlet allowed to silt up. Over the last year a company, DNE Sales International, has bought the jetty and the adjacent land for the initial purpose of exporting Florida citrus.

The stevedoring company packing sheds are all owned by DNE Sales International. Ship chandlery is available.

At present depths in the turning basin which is approximately 1,000 ft. are no more than 26 ft. and the basin is not marked at its extremities so care should be taken to swing as near as possible on the leading lights. Alongside the wharf depths are 27 ft. with soft sand bottom and in the channel the least depth is 26 ft. but there are no official surveys yet in print. The latest information on U.S. chart 11475, gives depths of 25.7 ft. in entrance range and 20.5 ft. to 22.3 ft. for inner range, latest information in British Notice to Mariners gives 26 ft. depth, which in fact has been confirmed.

The buoys marking the edge of channel are unlit, although U.S. chart shows lighted buoys.

It is early days for this port, dredging is in progress and if all the projected improvements are carried through, including the deepening of the channel Fort Pierce will be a safe and efficient port. The controlling factor for "fruit vessels" is the length of the jetty, however if exports increase as anticipated there is a proposal to lengthen the jetty by 100 ft.

Most vessels arrive or depart at any tide or hour.

Stevedores are good and excel in citrus loading.

All Agency and stevedoring personnel are keen, helpful and anxious to co-operate fully to promote good relations.
AUTHORITY: Fort Pierce Port & Airport Authority, 2300 Virginia Avenue, Fort Pierce, Fl. 33450. *Tel:* (305) 461-6400. *Contact:* W. B. Lewis, Manager.

FREEPORT, Texas: 28.57 N. 95.21 W. (See Plan Book)

DOCUMENTS: See "Houston".
PILOTAGE: VHF Channels 6, 8, 12, 13, 14, 16 at sea buoy. Pilot Office (tel. 233-1120), 200 West 2nd, Freeport, Texas; Pilot boards 0.25 mile North of sea buoy. Anchor 1 mile from sea buoy if awaiting Pilot.
ANCHORAGES: 1 to 2 miles from sea buoy.
RESTRICTIONS: Depth 36 ft. at bar.
MAX. SIZE: Length 670 ft., draft 36 ft. for ships from bar to within upper turning basin, 30 ft. from upper turning basin to Public Facilities. Tide governing these dimensions – plus or minus 3 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Galveston Marine Operator.
TUGS: Join vessel at shore line. Tug's lines to be used, and no charge for use of lines.
BERTHING: 1 hour to reach berth. Deep water terminals at Public Facilities consist of 1,250 linear ft. of deep water bulkhead wharf with 2 modern transit sheds consisting of 200,000 sq.ft. 1 berth of 250 linear feet of deep water bulkhead wharf with transit shed of 36,000 sq.ft. In addition a back-up warehouse is available consisting of 60,000 sq.ft. The large transit sheds and back-up warehouse have railroad tracks under cover, permitting all-weather work and preventing cargo damage.

Ro-Ro facility in operation.

A new public liquid barge dock and tank farm in operation (in connection with the Old River Co.).

The Navigation District owns a total of 9,700 acres of land for future Port and industrial development, 6,500 ft. of this land is situated on the Brazos River.
CRANES: Vessel is required to use own gear, shore cranes are available in area for hire.
STEVEDORES: Obtained through Agent.
MEDICAL: Obtained through Agent and advance notice required. Doctors, hospital available.
DENSITY: 1020.
FRESH WATER: Available ex-wharf at Brazos Harbor.
FUEL: All grades available by barge from Houston.
GANGWAY/DECK WATCHMEN: None required but available through Agent.
OPENING/CLOSING HATCHES: Stevedore contract.
CUSTOMS ALLOWANCES: Local Customs Agent control.
IDENTIFICATION CARDS: None needed.
CONSULS: None. Nearest at Port Arthur or Houston.
REPAIRS: Available.
DRY DOCKS: None.
REPATRIATION: Possible, through Agent.
AIRPORT: Houston Intercontinental Airport – Houston, Texas (80 road miles to Brazos Harbor; Metro Airlines – Shuttle to Angleton, Texas (15 miles from Brazos Harbor).
TIME: GMT minus 6 hours. Daylight saving time starts last Sunday in April and ends the last Sunday in October – GMT minus 5 hours.
HOLIDAYS: New Year's Day (January 1st); Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday (Third Monday in February); Good Friday; Texas Independence Day (March 2nd); St. Patrick's Day (March 17th); Decoration Day (Last Monday in May); Emancipation Day (June 19th); Independence Day (July 4th); Labour Day (First Monday in September); Columbus Day (Second Monday in October); Veteran's Day (November 11th); Thomas W. Gleason's Birthday (November 8th); Thanksgiving Day (Fourth Thursday in November); Christmas Day (December 25th). No work on Christmas Day or Labour Day.

If any of the above holidays fall on Saturday or Sunday the following Monday will be recognised as the holiday.
POLICE/AMBULANCE/FIRE: Police 239-1211; Fire 233-2651; Ambulance Service 233-2651.
TELEPHONES: No arrangements exist for placing telephones on board.
BANKS: First Freeport National. Tel: (409) 233-4401.
SERVICES: Tank-cleaning facilities available locally. Compass adjusting available from Houston.
SHORE LEAVE: Crew members allowed ashore.
AUTHORITY: Brazos River Harbor Navigation District of Brazoria County, 1001 Pine Street, P.O.Box 615, Freeport, Texas 77541. *Tel:* (409) 233-2667. *Contact:* Peter R. Schaff, Port Director.

GALVESTON, Texas: 29.17 N. 94.50 W.

(See Plan Book)

DOCUMENTS:
1 visaed Crew List.
3 Passenger Lists.
3 or more copies of complete Manifests of Cargo for discharge at all United States ports.
2 or more copies of Manifest of Cargo for each United States port.
1 Souvenir List.
1 Stores List.
Ship's Register.
Tonnage Tax.
Load Line Certificate.
Nationality Certificate.
No health document required.
PILOTAGE: Radio to local Agent who arranges Pilot and specifies boarding time. United States Coast Guard require 24 hours' notice of arrival at Galveston Bar. Contact pilot boats and pilot station on VHF Channel 12. Pilot boats marked "HP No. 1", 53 ft. long; "HP No. 2", 61 ft. long; "HP No. 3", 106 ft. long. Pilot boats can be signalled by light in international code. Pilot taken on board at sea buoy No. 1 located 6.7 miles from Galveston.
ANCHORAGES: In Bolivar Roads, 6.7 miles inwards from sea buoy No. 1. Depths 32 ft. – 34 ft.
RESTRICTIONS: Prolonged North winds can reduce water level as much as 4 ft. in Winter. Channel depth 40 ft.
MAX. SIZE: No length restrictions. Draft according to berth depth.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: International Telephone and Telegraph station Galveston, cal sign KLC.
TUGS: Available if required.

BERTHING:

Grain elevators	Farmarco/Bunge Corp.	Depth alongside 40 ft.
Bulk loading	Pier 14 East	,, ,, 36 ft.
	Duval Sulphur Terminal	,, ,, 40 ft.
	Imperial Sugar Dock	,, ,, 36 ft.

Container terminal, wharf 1,346 ft. length, equipped with 4 container cranes handling 40 tons under the spreader or 60 tons with cargo hooks at 100 ft. outreach – depth alongside 40 ft.

Note: Water depths are based on MLW. Depths may be less due to siltation.

STEVEDORES: Order before 1700 for 0700 or 0800 hrs. following day. During day can be ordered at 2 hours' notice. Gangs must be ordered before 1900 hrs. on Saturday for Sunday or holiday.
MEDICAL: All medical assistance available.
FRESH WATER: At all wharves.
FUEL: All grades available. Delivery only by barge from Houston.
GANGWAY/DECK WATCHMEN: Required only if crewmen detained by Immigration.
OPENING/CLOSING HATCHES: By stevedores only.
CUSTOMS ALLOWANCES: Each man 300 cigarettes, or 100 cigars or 1 lb. tobacco; 1 quart wine/spirits.
IDENTIFICATION CARDS: Immigration form I-95 required.
CONSULS:

Chile
Dominican Rep.
Finland
Guatemala
Haiti
Iceland
Italy
Mexico
Netherlands
Norway
Sweden
Venezuela

DRYDOCKS: 1×18,000 tons capacity. 1×40,000 tons capacity (Todd Shipyards).
TIME: Central Standard Time. Daylight Saving Time effective from April to October.
HOLIDAYS: January 1st; January 15th; February 12th; February 22nd; March 2nd; Good Friday; May 30th; June 20th; July 4th; First Monday in September; Second Monday in October; November 11th; Fourth Thursday in November; December 25th; No work on Labour Day or Christmas Day.
POLICE/AMBULANCE/FIRE: All services provided.
SHORE LEAVE: No restrictions unless detained by Immigration.
AUTHORITY: Port of Galveston, P.O.Box 328, Galveston, Texas 77553. *Tel:* (409) 765-9321. *Telex:* 76-5436. *Contact:* C. S. Devoy, General Manager; M. J. Sunseri, Director of Operations, or Oscar Molina, Harbour Master.

AGENT: Strachan Shipping Company, Post Office Box 689, Galveston, Texas 77553. Tel: (713) 763-2351. Telex II: 910-885-5205. Telex I: 76-5412. Cables: "Strachan".

GEISMAR, Louisiana: 30.13 N. 91.01 W.

East bank of Mississippi River, about 187 miles from sea.
DOCUMENTS/PILOTAGE: For all general information, refer to "New Orleans".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available if required; normally not used.
BERTHING: BASF Wyandotte Corporation: Berth 620 ft. long, 32 ft. depth.
FRESH WATER: Available ex-wharf.
FUEL: Not available.
DENSITY: Fresh water (1000).
OPERATOR: BASF Wyandotte Corporation, P.O.Box 457, Geismar, Louisiana 70734. Tel: (504) 473-9871. Telex: 510-994-3112. Contact: Plant Security.

GOOD HOPE, Louisiana: 29.59 N. 90.24 W.

(See Plan Book)

East bank of Mississippi River, 126 miles above Head of Passes.
DOCUMENTS: For all general information, refer to "New Orleans".
ANCHORAGES: South of berth in river for unlimited number of ships.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: 1 tug used for mooring/unmooring.
BERTHING: General American Tank (GATX) storage terminal; 4 tanker berths, 40 ft. depth alongside. 2 × 12 in. arms or 8 in. hose. Loading 20,000 bbls.p.h. No ballast facilities.

Norco: Shell Oil Co. 2 tanker berths (80,000 d.w.t., 900 ft. LOA downstream, 55,000 d.w.t., 750 ft. LOA upstream) 16 in. and 8 in. loading arms for transfer, transfer rate variable, ballast line 12 in., capacity 20,000 bbls.

Berthing always starboard side to. Requires 2 tugs to assist in berthing. Forward and aft mooring lines handled simultaneously.
FRESH WATER: Available ex-wharf at Shell Oil Co. Berth.
FUEL: Bunker "C" not normally available ex-wharf at Shell Oil Co. Berth.
DENSITY: Fresh water, 1000.
SURVEYORS: Surveyors and Cargo Inspectors available.
STORING: See "Prelims" page viii.

1. Yes.
2. Not allowed when loading Grade A and B products.
3. Alongside ship at loading manifold.
4. Yes.
5. Yes.
6. Yes.

SHIPMASTER'S REPORT: February 1979.
Restrictions: Not allowed to take bunkers, lub oils or stores from dock while alongside. Large tankers often require 2 tugs pushing all the time to keep them alongside, especially when river is in flood. This at GATX No. 4.
VHF: Standby on Channel 13 during pilotage and when anchored. Agents normally place walkie-talkie aboard for their direct communication.
Berthing: Always starboard side to. Forward will have 2 backsprings to jetty, 4 headropes, 2 breasts to buoys, lashings not required, same aft. Only one boat used and secures the bow first.
Telephones: Not available at GATX No. 4 but there is one on next jetty upriver.

AUTHORITY: General American Tank.
Shell Oil – Shell Chemical, Norco Manufacturing Complex, P.O.Box 10, Norco, Louisiana 70079.

GRAMERCY (including Pauline), Louisiana: 30.03 N. 90.41 W.

East bank of Mississippi, about 144 miles from sea.
DOCUMENTS/PILOTAGE: For all general information, refer to "New Orleans".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available if required; normally not used.
BERTHING: Colonial Sugar Refinery: Berth 600 ft. long, 40 ft. depth. Kaiser Aluminium and Chemical Corp: Berth, 40 ft. depth.
FRESH WATER: Available ex-wharf.
FUEL: Not available.
DENSITY: Fresh water, 1000.

SHIPMASTER'S REPORT: December 1979.
Port: Pauline.
Location: 3 miles up river from Gramercy at St. Elmo Point.
Anchorage: A waiting anchorage is situated 2 miles down river from the elevator at Grand View Reach.
Tugs: Available from Gramercy.
Berth: Peavey Grain Elevator. Depth of water alongside is 60 ft. Loading rate with one spout is 1,000 t.p.h.

The berth is a concrete pier on steel girders with 4 weak fenders. Spring lines are run to the pier, and head and stern lines to dolphins.
Fresh Water: Available from pier, rate 6 t.p.h. (approx.)
Fuel: Not available from quay.
Services: Provisions available from New Orleans, will be delivered by launch from Gramercy as pier can only be reached on foot over a catwalk 700 ft. long including stairs.

AUTHORITY: South Louisiana Port Commission, 152 Belle Terre Boulevarde, P.O.Box K, Laplace, Louisiana 70068. *Tel:* (504) 652-9278, 568-6269. *Telex:* 58364 Nln. *Contact:* Ray J. Matherne, Director.

GRAYS HARBOR, Washington: 46.55 N. 124.08 W.

(See Plan Book)

DOCUMENTS, etc.: Refer to "Tacoma".
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
PILOTAGE: A vessel approaching requested to give 24 hours advance notice of arrival to Grays and Willapa Pilots through Everett Radio, KLB which runs on a calling frequency of 500 kHz and VHF Channels 6, 8, 12 and 16. Pilot boat, "Mercury", 65 ft. long, with an 18 ft. beam, powered by a 330 h.p. GM diesel engine. "Mercury" moored at Westport Fishing Basin, and delivers Pilots to vessels outside Grays Harbor Bar.
ARRIVED VESSEL: Vessels must be inside Grays Harbor Bar to be considered an "arrived vessel".
ANCHORAGES: No specific areas in Grays Harbor have been designated as anchorage grounds. The best area is Southward of Sand Island Shoal in depths of 35 ft. to 40 ft.; the holding ground is good.
RESTRICTIONS: Bar Channel and Approach Channel, depth 30 ft. MLLW. Mean tidal range about 10 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
BERTHING: 6 wharves in port dock. Depths alongside from 15 ft. – 35 ft.
BULK CARGO FACILITIES: 1 bulk cargo berth, 1 Roll-on/Roll-off berth. No liquid chemical or LPG berths. One berth with container capability.
STEVEDORES: 20 local gangs. Additional gangs imported if required.
HOLIDAYS: See "Tacoma".
MEDICAL: All medical facilities available. Local hospital.
DENSITY: Salt water.
FRESH WATER: Available at all wharves.
GANGWAY/DECK WATCHMEN: Required only if detainees aboard.
CUSTOMS ALLOWANCES: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.
AUTHORITY: Port of Grays Harbor, P.O.Box 660, Aberdeen, Washington 98520. *Tel:* (206) 533–9530. *Contact:* Henry E. Soike, General Manager.

GREEN BAY, Wisconsin: 44.32 N. 88.02 W.

(See Plan Book)

For important general information refer to St. Lawrence Seaway.

DOCUMENTS: No special documents required. All necessary Customs and St. Lawrence Seaway documentation should be accomplished prior arrival.

PILOTAGE: Pilot not compulsory although some Masters prefer Pilot aboard. Pilot boards prior to arrival.

CHANNEL: From Grassy Island, outside mouth of Fox River, to C&NW Railway bridge, channel is maintained 24 ft. below low-water-datum (576.8 ft. above Father Point, Quebec) and 300 ft. width except through bridges. Above C&NW Railway bridge channel and turning basin is maintained at 20 ft. below low-water-datum. From Grassy Island lakeward channel maintained at 26 ft. below low-water-datum varying in width from 300 ft. to 500 ft. for approximately 8 miles. 24 ft. deep turning basin maintained at confluence of Fox River and East River opposite Leicht's North Dock. Currents will flow up and down river and will influence channel depths at times. Present high-water will add 2-4 ft. to channel depths.

RESTRICTIONS: Entry may be made at any time of day or night subject to Master's discretion.

MAX. SIZE: Subject water depths and width of bridge openings.

HEALTH: See "Health: all Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.

Pratique may be obtained prior to entry of St. Lawrence Seaway. Suspected disease should be reported locally.

Rat guards required on all lines.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Ships' Agents located at Milwaukee and Chicago, ETA should be directed accordingly.

TUGS: Join vessel at any designated point. Charges should be obtained from tug operators. Use ship's lines.

BERTHING: General cargo at Leicht's North Dock, 1,500 ft. length, full channel depth. Discharge by ship's gear and shore based equipment. Bulk cargo handled at several docks.

CRANES: Shore based lifting devices to 20 tons. 100 ton stiff-legged derrick available for heavy cargo.

BULK CARGO FACILITIES: Available at several places for coal, salt, fertiliser, chemicals, liquid cargo, stone, pig-iron, etc.

BRIDGES: No bridge opening restrictions for railroad bridges. Highway bridges permit vessels of 300 tons or over to transit at any time. However, heavy land traffic occurs about 0730 – 0830 hrs., 1145 – 1315 hrs. and 1630 – 1730 hrs., and co-operation of Masters is urged during these times so that city bridges may remain closed.

STEVEDORES: Services performed by Leicht Transfer and Storage Co. and arrangements should be handled by ship's Agent or directly with Leicht's.

MEDICAL: Subject to regulations of U.S. Customs and Immigration and St. Lawrence Seaway Authorities. 3 excellent hospitals.

TANKERS: The major oil companies have facilities. Limited only by harbour dimensions.

DENSITY: Fresh water.

FRESH WATER: Available through ship's Agent and water company.

FUEL: Fuel oil available in any quantity. Normal fire precautions.

SURVEYORS: Available through ship's Agent.

GANGWAY/DECK WATCHMEN: Available at ship's option.

OPENING/CLOSING HATCHES: By stevedores.

REPATRIATION: Available through local Immigration officials.

CONSULS: No consuls. Nearest are at Milwaukee, Chicago, and Minneapolis.

REPAIRS: Topside and engine repairs available. Complete repair service available at Sturgeon Bay, 45 miles North.

DRY DOCKS: No local facilities. Available at Sturgeon Bay, Wisconsin.

AIRPORT: 8 miles from port. Served by regular airlines with over 30 flights daily.

TIME: Central standard time. Central daylight saving time in effect from the last Sunday in April to the last Sunday in October.

HOLIDAYS: January 1st (New Year's Day), May 31st (Memorial Day), July 4th (Independence Day), 1st Monday in September (Labor Day), Last Thursday in November (Thanksgiving Day), December 25th (Christmas).

POLICE/AMBULANCE/FIRE: Police: Green Bay – Administrative calls 497-3800, Emergency 911, Sheriff 911, Ambulance 432-0305, Fire Dept. Rescue – 911, Fire: 911.

TELEPHONES: On board service. Contact Wisconsin Telephone Co.

SERVICES: Tank cleaning, fumigation, waste disposal, chandler.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Proper identification should be carried.

DELAYS: Expect no delays for berthing or harbour movement.

AUTHORITY: The Port of Green Bay, Brown County Board of Harbor Commissioners, P.O.Box 1600, 305 E. Walnut Street, Green Bay, Wisconsin, 54305. *Tel:* (414) 497-3265. *Contact:* John A. Seefeldt, Port Director.

GULFPORT, Mississippi: 30.21 N. 89.05 W.

(See Plan Book)

DOCUMENTS: See "New Orleans".

PILOTAGE: Compulsory from Outer Sea Buoy to docks, provided by Gulfport Pilots Association, arranged through Agent. Pilot boards at Sea Buoy.

Pilot boat has red hull, white superstructure with "Pilot" in black lettering. When pilot boat is underway, contact can be made by VHF Channel 16.

RESTRICTIONS: The Gulfport Channel is 12 miles long running between Ship Island and Cat Island. Channel is 225 ft. wide and has a minimum depth throughout of 30 ft. at MLW. Harbour is dredged rectangular basin about a 0.25 mile wide and 0.5 mile long, this area being protected by piers. Depth in harbour and along wharves is 30 ft. with a 2.5 ft. tide variation. No entry restrictions as to time.

MAX. SIZE: Length of vessel is restricted to approximately 900 ft. by turning basin, no breadth restrictions.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Gulfport Radio KJC 768 – VHF Channel 16. Continuous service.

TUGS: 2 tugs available but not required unless requested to assist in berthing.

CARGO HANDLING: 4 gantry banana terminal capable of unloading 16,000 boxes per hour. 50,000 sq.ft. transit shed refrigerated facility.

Multi-purpose 35 tonne container crane in operation. Ship's gear usually used but mobile cranes available with 48 hours' notice.

STEVEDORES: Must have 12 hours' notice to arrange stevedore gangs. Normal work day 0800 – 1200 hrs., and then 1300 – 1700 hrs. Monday through Friday.

MEDICAL: No advance notice required for medical attention, doctor and hospital care readily available.

FRESH WATER: Fresh water is available. Rate 10 t.p.h.

FUEL: Bunker service available.

DENSITY: Brackish.

GANGWAY/DECK WATCHMEN: Port guards or Dubuisson Detective Agency.

CONSULS: Many countries have consuls within a 100 mile radius of Gulfport.

REPAIRS: Most deck and engine repairs could be arranged within port facilities.

SURVEYORS: Available from Mobile or New Orleans.

AIRPORT: Gulfport Municipal Airport is approximately 4 miles from the port and served by regularly scheduled airlines.

REPATRIATION: Can be arranged.

TIME: The Port of Gulfport is on Central Standard Time, GMT minus 6 hours; clocks are moved ahead 1 hour during Summer months.

HOLIDAYS: United States national holidays are observed, cargo work can be arranged on these days at a penalty time.

POLICE/FIRE/AMBULANCE: Telephone number for all emergency services is 911.

TELEPHONE: Can be placed aboard only by special arrangement; not normally available.

DEVELOPMENTS: A 30 ton gantry crane to be purchased and erected at the West Pier Container Terminal.

AUTHORITY: Mississippi State Port Authority at Gulfport, P.O.Box 40, Gulfport, Mississippi 39501. Street Address: Corner Highway 90 and 30th Avenue (Shipping). *Tel:* (601) 863–3851. *Contact:* Captain J. W. Clark, Port Director.

HAINES, Alaska: 59.15 N. 135.25 W.

(See Plan Book)

In Lutak Inlet. Located 5 miles N.W. of Haines. Open all year.

APPROACHES: Lynn Canal to Lutak Inlet.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: Pilot pick-up point located in vicinity of Point Retreat.

ANCHORAGE: Lutak Inlet.

MAX. SIZE: Harbour depth 36 ft. at zero tide. Tides: Diurnal range 16 ft. Also see "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Quarantine, Immigration and Customs locally.

TUGS: 3 available.

BERTHING:

1. Haines dry cargo dock can be secured by request through City of Haines (Telephone: Area code 907 number 766-2231). Berthing length – 967 ft. and an open surface of over 300 ft. in width. Depth at face of dock – 36 ft. MLLW. No covered sheds, 6 acre open staging area. Crane may be available. Continuous to 300 ft. Alaska State Ferry facility.

Roll-on/Roll-off cargo facility at N.W. end of Dry Cargo Dock.

2. Schnabel Lumber Co. Dock: Berthing length – 640 ft. long and 80 ft. wide. Depth at face of dock – 45 ft. No covered storage. Open storage. 35,000-ton capacity for bulk cargo storage. Chip loader with 350 t.p.h. capacity. Crane available.

STEVEDORES: 4 gangs.

REPAIRS: None.

FRESH WATER: Available in small quantities in temperate seasons only.

FUEL: None.

MEDICAL: Doctor/dentist available.

TRANSPORTATION: Air, ferry. Haines Highway principal route connecting Southeast Alaska with the Alcan Highway leading to the interior of Alaska and Canada.

AUTHORITY: City of Haines, P.O.Box 576, Haines, Alaska 99827. *Tel:* (907) 766–2231, 766–2448. *Contact:* Larry Monroe, Harbour Master.

HAMPTON ROADS DISTRICT, Virginia:

(See Plan Book)

NORFOLK, 36.51 N. 76.19 W.
NEWPORT NEWS, 36.59 N. 76.26 W.
PORTSMOUTH, 36.50 N. 76.17 W.

DOCUMENTS:
3 copies Cargo Manifest (Forms 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Stores List.
2 copies Passenger List (Form I-418).
2 copies Crew List.

Customs Boarding Officer will also examine ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours of arrival from a United States port:
Health Pratique.
Master's Oath (Customs Form 1300).
All foreign clearances.
U.S. Certificates of payment of Tonnage Tax (Customs Form 1002).
Certified Crew List.
F.M.C. Certificate of Financial Responsibility.

PILOTAGE: Compulsory; is generally arranged through port Agent. Vessels approaching port may use VHF telephone, Channel 16, radio telephone 2738 kHz. Advance notice of 24 hours is required of ETA. Pilot Lookout Tower located at Cape Henry, Virginia, the entrance to Chesapeake Bay.

The Virginia Pilot Association can be contacted by telephone at (804) 627-5435. Pilot boats monitor VHF-FM Channel 16 and work on VHF-FM Channel 13.

ANCHORAGES: In Hampton Roads, depth 45 ft.

Anchorage Regulations: A change in U.S. Coast Guard regulations permits colliers and other bulk carriers, such as grain ships, to use the Big Stone Anchorage in Delaware Bay. Previously, the anchorage was open only to oil tankers. The new rules are advantageous to super colliers that are able to carry up to 150,000 tons, taking advantage of the anchorage's minimum natural depth of 55 ft. The super colliers then can be partly loaded up to about 90,000 tons, at Hampton Roads, Virginia, and topped off at the Stone Anchorage by two 30,000 ton barges from the Port of Philadelphia.

RESTRICTIONS: Channels to Norfolk and Newport News – 45 ft. depth. Elizabeth River Channel – 40 ft. depth to Norfolk and Western Railway Bridge, then 35 ft. to Chesapeake.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Radio-telephone communications in the Hampton Roads area are furnished by the Chesapeake and Potomac Telephone Company of Virginia. A regular ship-to-shore channel transmits to ship on 2538 kHz and the ship returns the call on 2142 kHz. A "day-time" ship-to-shore channel transmits to ship on 2450 kHz and the ship returns the call on 2366 kHz. In the very high frequency band, "XY" ship-to-shore is available which transmits to the ship on 161.9 MHz and the ship returns the call on 157.3 MHz. A second "day-time" ship to shore channel transmits on Channel 20 and monitors Channel 16.

TUGS: Requirements vary from pier to pier.

BRIDGES: Sufficient clearance at all times.

Norfolk: Coal: Pier No. 5, 1 berth, 980 ft. long, 38 ft. depth; Pier No. 6, 2 berths, 1,800 ft. long, 46.5 ft. depth.

TANKERS: Sewell's Point: Exxon Co., 1 berth, 40 ft. depth.

Elizabeth River: American Oil Company, 1 berth, 28 ft. depth; Atlantic Energy Inc., 1 berth, 32 ft. depth; Gulf Oil 2 berths, 32 ft. depth; Mobil Oil, 1 berth, 36 ft. depth; Swann Oil Co., 1 berth, 35 ft. depth; Union Oil Company, 1 berth, 15 ft. – 20 ft. depth; Shell Oil Company, 1 berth, 38 ft. depth; Union Oil Co. of California, 1 berth, 20 ft. depth; Tenneco/Cities Service, 1 berth, 27 ft. depth; Texaco Inc.,1 berth, 32ft. depth; Crown Central, 1 berth depth 40 ft; Koch Fuels, 3 berths, depth 27 ft. – 35 ft.

Newport News: Exxon Co., 1 berth, 35 ft.; 2 berths 19 ft. – 27 ft. depth.

Portsmouth River: B.P. Oil Corp., 2 berths, 30 ft. depth.

STEVEDORES: Labour arranged through International Longshoremen's Association.

1. Straight Time – work between the hours of 0800 and 1200 and between the hours of 1300 and 1700 daily except Saturdays, Sundays and holidays.
2. Double Time – hours daily between 0600 to 0700 and 1200 to 1300, 1800 to 1900, 2400 to 0100 hrs. and all Sundays.
3. Time and one-half – shall be all those hours not included above, except holidays.

DENSITY: Average 40% fresh.

FRESH WATER: Available at all berths. Barge service available if required.

FUEL: All grades available at oil company berths. Delivery by barge to all other locations.

GANGWAY/DECK WATCHMEN: Not required unless crew members detained by Immigration.

CERTIFICATES: Cargo Gear Certificate, Derat, Radio, Safety Equipment, and Ship's Register.

CUSTOMS ALLOWANCES: At the discretion of Customs Officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1qt. wine/spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

IDENTIFICATION CARDS: Identification required by Immigration for shore passes.

CONSULS: The following countries are represented at Norfolk:
Belgium
Brazil
Denmark
Finland
France
Germany F.R.
Great Britain
Iceland
Italy
Mexico
Netherlands
Norway
Panama
Sweden

DRY DOCKS: Norfolk: 1 dry dock 450 ft. long, 57 ft. beam; floating dock 360 ft. long, 64 ft. beam. Berkley plant features the Titan Steel floating dock 950 ft. long, with lifting capacity of 54,250 long tons.

Newport News: Dry docks:

	Length inside gate	*Width of entrance*	*Depth of water over sill MHW*
No. 1	649 ft.	92 ft.	33 ft.
No. 2	862 ft.	118 ft.	31 ft. 3 in.
No. 3	459 ft.	72 ft.	33 ft.
No. 4	525 ft.	75 ft.	33 ft.
No. 10	961 ft. 6 in.	128 ft.	35 ft.
No. 11	1,101 ft.	137 ft.	40 ft.
No. 12	1,613 ft.	250 ft.	33 ft.

Slipways: The shipyard has 2 inclining slipways with lengths up to 650 ft.

REPAIRS: Newport News Ship Building and Dry Dock Company in James River; 5 outfitting piers up to 1,160 ft. length. Floating cranes up to 67 tons capacity. Gantry crane to 900 tons capacity. Other cranes also available.

Norfolk Ship Building and Dry Dock Corporation, situated on East Branch of Elizabeth River. Channel depth 25 ft.; 7 piers equipped for ship's repairs. 4×30 ton diesel locomotive cranes. Other repair companies in addition.

SURVEYORS: American Bureau of Shipping, P.O.Box 5189, Newport News 23605 and 65 Broadway, New York, New York 10006.

AIRPORT: Norfolk Airport, and Patrick Henry Airport at Newport News, over 100 flights daily.

TIME: Eastern standard time, GMT minus 5 hours. Daylight saving time, GMT minus 4 hours, from last Sunday in April to last Sunday in October.

HOLIDAYS: New Year's Day; Lee's Birthday (January 19th); Washington's Birthday (February 22nd); Good Friday; Memorial Day (May 30th); Jefferson Davis Day (June 3rd); Independence Day (July 4th); Labour Day; Election Day (1st Tuesday after 1st Monday in November); Armistice Day (November 11th); Thanksgiving Day; Christmas Day. No work can be arranged on New Year's Day, Labour Day or Christmas Day.

TELEPHONES: Onboard telephones only available at shipyards.

DEVELOPMENTS: *Portsmouth:* Coal terminal to be constructed to handle vessels up to 170,000 d.w.t., draft 55 ft. at one shiploader and 60,000 d.w.t. at a second shiploader. The respective rates of the loaders will be 10,000 t.p.h. and 4,000 t.p.h.

AUTHORITY: Virginia Port Authority, Virginia World Trade Centre, Norfolk, Virginia 23510. *Tel:* (804) 623-8000. *Telex:* 710-881-1231 *Contact:* J. Robert Bray, Executive Director.

AGENT: Rice, Unruh Co., Suite No. 500, 201 Granby Mall, Norfolk, Virginia 23510 Tel: (804) 625-4525 (6 lines). Telex: 82-3689. TWX 710-881-1293 (Riceunruk Nfk). Cables: "Riceunruh Norfolk".

HILO: Hawaii 19.46 N. 155.06 W. (including Kawaihae 20.02 N. 155.50 W.)

(See Plan Book)

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health and Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Ship's Papers.
Certificate of Registration or Enrolment.
Annual Inspection Certificate.
Load-line Certificate.
Derat Certificate.
Drinking Water Certificate.
Radio Certificate and Licence.
4 Store Lists.

PILOTAGE: Pilots boats have VHF. Contact is made on VHF Channel 16, then switch to Channel 12. Pilot service is provided on a 24-hour basis upon suitable advance notice.

At Hilo, Pilot boards on starboard side in position 0.75 mile due East of Paukaa Light. In picking up Pilot, vessels should be on Southerly course with enough speed for steerageway. Special instructions will be given by radio telephone.

At Kawaihae, Pilot station in position 1 mile 287° true from No. 2 Buoy. Pilot usually boards on port side with vessel on course for the entrance at dead slow speed.

ANCHORAGES: No safe anchorages either Hilo or Kawaihae for vessels awaiting Pilot. In this situation, a vessel should heave to or steam. Under good weather conditions, safe anchorage can be had in Hilo Bay. Anchorage is inside pilotage waters and requires local knowledge for safety; vessels should not anchor without Pilot.

RESTRICTIONS: At Hilo, under good weather conditions, vessels with draft up to 32 ft. 6 in. can be handled at any time.

At Kawaihae, vessels with draft up to 33 ft. handled anytime.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Honolulu Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Communicate through RCA or ITT stations in Honolulu.

TUGS: Tugs join vessels at entrance at Kawaihae and at Coconut Island at Hilo. Tug's lines are usually used at no extra charge.

BERTHING: There are many factors which affect berthing at Hawaii Island ports, the most important of which are surge and wind. Vessels should be well equipped with long mooring lines and sufficient additional line to make up 2×900 ft. buoy lines. In all instances, berthing instructions will be given after details concerning vessel and her cargo are received.

Pier No. 1 in Hilo handles bulk sugar vessels and container vessels, 1,220 ft. of berthing space.

Pier No. 3 in Hilo handles tankers, 575 ft. of berthing space.

Kawaihae has one overseas berth which handles both bulk sugar vessels and tankers, 605 ft. of berthing space.

CRANES: Shore cranes available, max. capacity 90 tons.

STEVEDORES: Hilo Transportation and Terminals Co. (Hilo) and Kawaihae Terminals Inc. (Kawaihae).

MEDICAL: All facilities available.

DENSITY: Variable in Hawaii area due to fresh water run-off.

FRESH WATER: Available from county of Hawaii by pipe-line.

FUEL: Can be supplied subject advance notice.

GANGWAY/DECK WATCHMEN: Required for tankers. Other ships as may be necessary due to special circumstances.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes, 50 cigars per man, and one U.S. quart bottle, wine or spirit.

IDENTIFICATION CARDS: Seamen's passports only required.

REPAIRS: Limited repair service available; almost any type of machine work, welding and ordinary electrical repairs can be handled.

REPATRIATION: Direct air service to Continental United States and to Honolulu International Airport.

AIRPORT: About 1 mile from Port of Hilo and is served by regular airlines.

POLICE/AMBULANCE/FIRE: *Hilo:* Police 9353311; Ambulance and Fire 961-6022.

Kawaihae: Police 8857334; Ambulance 885-7334; Fire 961-6022.

TIME: GMT minus 10 hours all year round.

TELEPHONES: Special arrangements may be made with Hawaiian Telephone Co.

SHORE LEAVE: Allowed.

AUTHORITY: State of Hawaii, Department of Transportation, Harbours Division, Port of Hilo, Hilo, Hawaii 96720. *Contact:* District Manager.

AGENT: See "Honolulu".

HOMER (including Kenai), Alaska: 59.36 N. 151.25 W.

(See Plan Book)

APPROACHES: Via Cook Inlet. Port located at mouth of Kachemak Bay on Kenai Peninsula.

DOCUMENTS: See "Port of Anchorage, Alaska".

PILOTAGE:

(1) Homer Pilots' Association, Radio KTE 21, Tel. 235-8526.

Pilot boards 1 mile South of Homer Spit Light on Coal Point.

(2) The Southwest Alaska Pilots' Association serves all ports in Cook Inlet, Prince William Sound, Resurrection Bay, Kodiak Island, the Aleutian Islands, Bristol Bay and Bering Sea. The pilot station for vessels entering Cook Inlet waters is Lat. 59° 36.2′ N., Long. 151° 24.5′ W., approximately 1 mile South of Homer Spit Light on Coal Point. The pilot station cable address is "Homerpilot". The pilot station stands by on VHF Channels 10 and 16, 24 hours a day; call sign "WAB-917 Southwest Pilots". The pilot station also stands by on single side band radio as follows:

8284.4 MHz between 0800 and 1200 hrs. Alaska time, weekdays.
4136.3 MHz between 1300 and 1700 hrs. Alaska time, weekdays.
Call sign "WAB-917 Southwest Pilots".

MAX. SIZE: Harbour depth 40 ft. MLLW. Tidal range 28 ft. (−6ft. to +22 ft.) Max. draft for berthing 30 ft. at MLLW.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

ANCHORAGES: Kachemak Bay is excellent anchorage for vessels of any size. Foreign vessels may enter bay to anchor, but must have a Pilot aboard to come to dock.

RADIO: Homer Port Radio monitor CB Channel 17. Callsign "KCN 7188 Port of Homer".

VHF: Homer Port Radio monitor Channel 16. Call sign "WAB 935".

TUGS: 1 tug available.

BERTHING: Homer City Dock, 410 ft. long and 50 ft. wide. Limited to draft of 30 ft. 3 privately owned mobile cranes available. Capacity 15, 35 and 70 tons.

410 ft. face with sloping bottom suitable for vessels with 20 ft. draft or less at chine. Inside and outside storage is available for holding and staging. Water, gasoline and diesel are available on dock.

TANKERS: Report: February, 1985.

Vessel to load ammonia at Kenai in position 60° 33′ N., 151° 16′ W.

Regulations:

1. Vessel must have on board 20-24 mooring lines, each a minimum of 400 ft. in length, depending on weather on arrival.

2. Fresh water and provisions cannot be obtained or loaded at the wharf.

3. No preventative engine maintenance can be allowed at the wharf and vessel's engines must be maintained in such a way as to permit immediate manoeuvring power at all times while vessel is alongside the berth.

4. Sufficient vessel personnel must remain on board during loading to handle any emergency situation and adequate deck watch must be maintained on a 24 hour basis.

5. For proper light ship survey vessel must arrive suitably trimmed and sufficiently submerged both fore and aft.

6. Ballast tanks must be either full or empty and all cargo holds must be totally devoid of any ballast.

7. Please also ensure vessel has all certificates in order, including Oil Pollution Certificate (Certificate of Financial Responsibility).

General:

Please obtain Master's acknowledgment and confirmation of all above. Advise Master that pilot station is located Lat. 59° 36.2′ N., Long. 151° 24.5′ W. Master should cable ETA Homer pilot station to Agent.

Master to monitor ITT KFS (San Francisco) while in transit. If ship has telex on board, please provide number.

Rental mooring lines available at US$300 each plus loading/unloading costs of US$1800. Advise how many lines onboard and Agent will request funds based on how many rental lines necessary.

Berth Operator sometimes makes exceptions to restrictions on a case by case basis.

IFO fuel is virtually unobtainable in Alaska. While there is one supplier at Kenai (and none elsewhere in Alaska), they have a long standing and firm 5,000 bbl. minimum requirement with no exceptions.

Vessel will vacate berth during purging and will either purge at anchor off berth or at Homer.

Load rate 400 tonnes/p.h., except during purging, when rate much slower.

Confirm vessel has Letter of Compliance issued by Coast Guard and that vessel has been licensed to carry propane/ammonia simultaneously.

FRESH WATER: Available from the berth.

FUEL: Available for small craft only.

REPAIRS: No facilities for repairs.

MEDICAL: Homer Hospital is a 17 bed hospital with 5 full-time doctors.

EMERGENCIES: Police department and a volunteer fire department are available plus a rescue truck.

AIRPORT: Daily air service.

AUTHORITY: City of Homer Harbour Master.

HONOLULU, Hawaii (including Barber's Point and Pearl Harbour): 21.19 N. 157.52 W. (See Plan Book)

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health and Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Ship's Papers.
Certificate of Registry.
Annual Inspection Certificate.
Load-line Certificate.
Derat Certificate.
Radio Certificate and Licence.
4 Stores Lists.

Vessels scheduled to call at Pearl Harbour are required to furnish 6 copies of crew lists and passenger lists, if applicable, at least 1 working day prior to arrival, for Naval security requirement.

The United States Immigration Service requires that the Master of vessels manned by alien crew members arriving from a foreign port present the United States Immigration and Naturalisation Service's Officer with a current crew list (Form I-418) properly visaed in their possession. An I-94 should be prepared for each passenger prior to vessel's arrival.

U.S. Immigration Department representatives are not stationed at any Hawaiian outports. Customs Officials, however, are stationed at all entry ports and accomplish both Customs examination and Immigration.

The United States Agriculture Service examines and seals ship's stores from restricted ports. Special arrangements for garbage disposal may also be required by this Agency, if for example meat aboard has been purchased in a port where there is a high incidence of "hoof and mouth" disease. All garbage should be disposed of prior to arrival in port.

All regulatory bodies assess overtime charges for services of their personnel if rendered on Saturdays, Sundays, holidays or after hours on week-days.

PILOTAGE: Pilot requested by Agent. Channels 16, 12 and 9, call WXZ 456. Pilot boat, 37 ft. cabin cruiser, yellow with black striping. Only "H" flag necessary for vessel requiring Pilot. Pilot station, Lat. 21° 16′ 12″ N., Long. 157° 53′ 24″ W., no alternative.

RESTRICTIONS: Entry at any time subject to harbour control signals. 24 hours' notice of arrival is obligatory.

MAX. SIZE: *Entrance Channel:* Depth 45 ft. *Harbour:* Depth 40 ft. Some piers accept no draft greater than 33 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Honolulu Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany). Illness reports made to Honolulu Quarantine Station.

RADIO: VHF Channel 16, call KFQ907, Aloha Tower Harbour Control Station.

TUGS: Tugs normally join vessel within harbour limits. Both ship's lines and tug's lines used depending on conditions.

BERTHING: Berthing given on a "first-come-first-served basis" according to type of vessel and particular requirements as to cargo, bunkering, etc. Must be arranged through a local shipping Agent.

STEVEDORES: Gangs must be ordered 24 hours in advance. General cargo, average load per hour: 15 long tons; average discharge per hour: 15 long tons.

MEDICAL: Agents would like as much advance notice as possible. Complete medical facilities available. Vaccinations in accordance with U.S. Public Health requirements.

TANKERS: 4 tanker berths, max. draft 36 ft. No slop discharge facilities.

Barber's Point: Tanker berths, tugs not normally required. Mooring Master attends berthing procedure. Fresh water not available. Fuel available ex-pipe-line. See "Shipmasters' Reports".

Pearl Harbour: U.S. Navy Terminal. Max. LOA 800 ft. Max. draft 38 ft. 6 in.

DENSITY: Pure salt water, no fresh water allowance.

FRESH WATER: Delivered via 2.5 in. fire hose with meter on pier. Rate of delivery between 30 t.p.h. and 60 t.p.h., depending on the berth.

FUEL: All U.S. grades available, no advance notice other than establishment of credit.

FIRE PRECAUTIONS: Fire wires required by tankers berthed alongside. Permit required for hot work whilst in port.

GANGWAY/DECK WATCHMEN: Services of watchman recommended, usually arranged by Agent.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes, 50 cigars per man, and 1 bottle, U.S. quart, wine or spirits.

IDENTIFICATION CARDS: Seamen's passports needed.

CONSULS: The following countries are represented in Honolulu:

American Samoa
Australia
Austria
Denmark
Finland
France
Germany
Great Britain
Guatemala
India
Indonesia
Italy
Japan
Korea
Mexico
Monaco
Nauru
Netherlands
New Zealand
Norway
Panama
Philippines
Portugal
Sweden
Switzerland
Thailand
Western Samoa

REPAIRS: All types of deck and engine repairs possible. Hull repairs below water-line in accordance with dry dock capacities.

DRY DOCKS: Commercial within Honolulu Harbour. Dry dock: 2,800 long ton lifting capacity, 385 ft. long, 56 ft. wide. Floating Dock: Lifting capacity 2,620 tons. Length 200 ft. Width 100 ft. Marine railway: 1,400 long ton lifting capacity, 223 ft. long, 65 ft. wide.

REPATRIATION: All facilities, crews generally leave State within 24 hour period.

AIRPORT: International airport, served by all major airlines, 5 miles from harbour.

HOLIDAYS:

New Year's Day	First or following Monday
President's Day	Third Monday in February
Kuhio Day	Third Monday in March
Good Friday	Friday before Easter
Memorial Day	May 30th or nearest Monday or Friday
Kamehameha Day	June 11th or nearest Monday or Friday
Admission Day	Third Friday in August
Labour Day	First Monday in September
Discoverer's Day	Second Monday in October
General Election Day	First Tuesday after First Monday in November (election year)
Veteran's Day	November 11th
Thanksgiving Day	Last Thursday in November
Christmas Day	December 25th

POLICE/FIRE/AMBULANCE: Police, Ambulance, Fire dial 911.

TIME: GMT minus 10 hours all year round.

TELEPHONES: Telephones can be placed on board at any dock.

SERVICES: All services found in major U.S. ports are available.

SHIP SUPPLY SERVICE:

Name & Address	*Vessels*	*Services*
Dillingham Tug & Barge Pier 21, Honolulu, HI 96817 (Tel: 5439325)	MOHA, HUKI, MA'A	Ship stores and fuel.
P & R Water Taxi, Pier 40, Honolulu, HI 96817 (Tel: 8412113)	HIKINO, KEOKI	Water taxi, ship stores, spare parts.

Royal Helicopters Inc., Tel: 836-2868.

SHORE LEAVE: No restrictions if papers are in order.

DEVELOPMENTS: *Sand Island:* Pier 52 extended 120 ft. to the West, will also be paved by mid 1984.

New container yard at Pier 52/53. Approximate area of 36 acres.

Piers 52 and 53 consist of 1,400 linear ft., draft alongside is 40 ft.

Also see "Max. Size".

SHIPMASTER'S REPORT No. 1: August 1978. **(See Plan Book).**
HIRI Seaberth, Barber's Point: Position 21° 16′ 22″ N., 158° 05′ 27″ W.
Operators: Pacific Resources Inc., Honolulu.
Documents:
3 Crew Lists.
3 Store Declarations.
3 Cargo Declarations.
3 General Declarations.
3 Crew's Effects Declarations.
3 Master's Oath of Entry.

Pilotage: In case vessel has received order to berth on arrival, H.I.R.I. Mooring Master boards vessel in a position 3 miles due South of Barber's Point Lighthouse. In case vessel will not be berthed on arrival vessel is to proceed towards Honolulu. This will be advised by Agent in due time. When approaching Honolulu, vessel must remain South of a line Barber's Point Light/Diamond Head Light and await Pilot from Hawaii Port Pilots' Association. Pilot will then bring vessel to outside anchorage.

Restrictions: Vessels will be berthed during daytime only and at slack water only. Unberthing day and night and at any stage of tide. Vessels up to 100,000 d.w.t. and 830 ft. LOA have been handled at H.I.R.I. Seaberth.

Radio Pratique: Not required.
Advance Notice: Refer to Charterer's/Owner's instructions. ETA cables to be sent via San Francisco Radio KFS or KPH since Honolulu Radio Station has closed down.

Communication: H.I.R.I. controller is listening VHF Channel 16, working Channel is 9. Call sign is "KTD 466".

Aloha Tower, call sign "KFQ 907" is listening Channel 16, working Channel is 12.

Tugs: Tugs of various sizes up to 2,250 h.p. and work boats available from Honolulu. While vessel in berth a workboat is continuously standing by.

HIRI Seaberth/Mooring: Seaberth consists of 8 mooring buoys equipped with quick releasing hooks. Mean depth in the berth is about 40 m. The mooring is approached from the West. A tug from Honolulu is made fast with ship's line through centre lead. Two mooring boats are on hand, a second, smaller tug is used for pushing on the port quarter. Anchors are not used for mooring. The first line to be made fast is line No. 5, thereafter lines No. 2, 6, 1, 4, 3, 7, 8 in that order. Lines 1 and 2, 5 and 6 will be doubled, finally vessel is moored with 12 lines.

Nylon lines are preferred, but wires may be used. Lines and wires must be long enough to reach buoys 600 ft. from vessel.

It is important that all nylon lines go through roller fairleads in order to avoid chafing and eventually breaking. Refer to "Plan Book".

Hose Connection: Vessel's port derrick to be rigged before arrival with *single* whip able to reach hose 120 ft. down on sea bottom. A travelling block is not acceptable as diver connects hook directly to hose on sea bottom. Lift required is 8 tons. Hoses are connected/disconnected by ship's personnel. Shore personnel can be arranged, charges being billed to vessel. Normal discharge rate for crude oil is about 30,000 bbls.p.h. with maximum 125 lbs. pressure at rail.

Repairs: Minor repairs are possible through workshops in Honolulu.

Supplies/Services: Provisions, stores, laundry available. Stores, etc. cannot be loaded on the ship while in the berth, vessels usually receive same off Honolulu.

Fuel and marine diesel oil available and can be loaded in mooring berth after discharge operations are completed.

In this vessel's case, however, vessel was berthed in Honolulu at Piers 30/31 for the purpose of bunkering and storing. Fresh water is available alongside piers. Crew changes are possible, shore leave is possible. The launch from Barber's Point to Honolulu Pier 10 takes about 2.5 hours.

Weather/Wind: The Hawaiian Islands are dominated in all seasons by the N.E. Trade Winds, which are present about 75% of the time. The average velocity is 12.5 m.p.h. They rarely exceed 20 m.p.h., however, gusts of 100 m.p.h. are possible. October to April is the "Kona" season which refers to occasional storms from the South. During these storms heavy rainfall and cloudiness can be expected. The average temperature is between 24° – 28° Celsius.

Tides/Current: The predicted times and heights of high and low water are published for Honolulu. The rise of tide is only 1 – 2 ft. Strong winds may effect the tides. Velocity of current is 1 – 2 knots, mostly setting in Westerly direction, however, counter-currents have been observed.
References: B.A. Chart Nos. 1308, 1378. List of Lights Vol. G; Coast Pilot No. 62 Vol. 3.

SHIPMASTER'S REPORT No. 2: August 1977. **(See Plan Book).**
Barber's Point Sea Berths: There are 2 buoyed berths situated near the above, of which the larger is that owned by Hawaiian Independent Refinery Inc. (H.I.R.I.), 1.9 miles × 148° from the Barber's Point Lighthouse. The other, some 2 miles N.E. of H.I.R.I. moorings, is owned by Standard Oil of California (S.O.C.A.L.) and is used for the importation of crude fuel stock to their own refinery. H.I.R.I. Berth, however, is used for both crude imports and export/bunkering of products.

The H.I.R.I. Berth is based on a spread of mooring buoys to the hooks of which a ship's rope(s) are attached. It should be noted that these are NOT quick release hooks so that the weather conditions during operations are of paramount concern to all. Failure to leave the berth in sufficient time will preclude any help in unmooring by the tug boat in attendance, for letting go lines and will result in broken lines and/or buoy moorings. The 4 mooring tugs leave as soon as vessel is made fast.

The operation of mooring is governed by the wind and tidal stream. Most of the time the former is the N.E. Trade, while the tide *has* to be setting to the West for the vessel enters the berth on a course of 095° with Diamond Head Lighthouse ahead. The fact that there are some 17 to 18 fathoms in this berth, does not rule out the action of counter currents upon a deep draft vessel such as to make a mooring operation more difficult, if not impossible. Again, a Southerly wind will force the vessel down onto the lee buoys, and over the manifold hence a *minimum* working length of 100 fathoms per rope is necessary. The action of the Southerly wind is also to build up a considerable swell, making it necessary to begin ballast as soon as practical and *no later* than when *65%* of the cargo has been discharged and so arranged to allow sufficient empty and dry tanks to maintain the vessel's safe mooring at 25 ft. draft.

The berth was laid out for vessels up to some 65,000 tons, hence the position of the single 12 in. crude oil manifold is difficult for larger vessels, while the 8 in. bunker/product hose is even further aft from the cargo discharge point. With an overall length of 885 ft., and the manifold 425 ft. from the bow, it will be seen from the plan that the stern of the vessel will make No. 5 and 6 Buoys into breast lines, so that stern lines as such, have to be run from the after deck and any additional ropes to No. 4 and 7 Buoys will be breast lines.

These facts limited the vessel to 100,000 metric tonnes of cargo, as the Marine Adviser to the Receivers, Pacific Resources Ltd., (operators of H.I.R.I.) was convinced that a 140,000 tonne vessel at her draft of some 54 ft., would be too difficult to manage, whereas at 44 ft. the rudder would be of maximum value, the propeller fully immersed, but the slab-sided stern at its minimum resistance value. This was justified in that the scheduled berthing was delayed for 3 hours, due to a leaking fuel valve, resulting in a minimal West-going tidal stream, and a fresh Southerly wind with swell. Full use had to be made of all tugs, and double moorings run to windward buoys, before vessel could be placed in the correct position. It is not envisaged by Receivers that similar sized vessels will be regularly accepted in future.

The instructions call for an initial discharge rate of some 12,000 b.p.h., until pumphouse radios (VHF Channel 9) advise that the system is full, after which the rate can be increased to 125 lbs. per square inch on *their* gauge at ship's manifold, about 28,000 b.p.h. maximum. Connecting of hose is achieved by ship's staff, but the hose is surveyed by diver before vessel enters berth, a small buoy being attached as an aid for the Pilot. The vessel's runner and hook are lowered *to the bottom* where the diver attaches same to the hose sling, the operators having found that this method ensures a longer life for their hoses, and connections on the hard bottom of coral, overlaid with sand. The same procedure in reverse is carried out after discharge, using a tug to clear hose.
Entering Inwards: Hawaii being a full State, the entering documentation and procedures are as for any mainland USA port. It is important to note however, that under normal circumstances the vessel proceeds to a point 3 miles South of Barber's Point Lighthouse, where the Mooring Master and his Assistants join and tugs attend. The official boarding party will not, therefore, board until *AFTER* vessel is securely moored. This does not apply to a Coastguard Officer who comes with Mooring Master (or Pilot, off Honolulu) and who *MUST* be satisfied that his requirements have been met, before vessel is allowed to anchor, berth, enter port etc. (see Coastguard Regulations).

In the event that the vessel is unable to berth for a few hours due to the tidal stream, wind, etc., an anchorage can be obtained to the Eastward of the H.I.R.I. Berth and Southwest of S.O.C.A.L. Berth. If, however, there is to be a delay of some 24/48 hours, the vessel has to be anchored in the appropriate *recognised explosives anchorage* off Pearl Harbour. This will require the services of a Honolulu Pilot and possession of US Charts (B.A. Charts are small scale and do not show the anchorage areas with sufficient detail). This berth is but 7 cables from the surf line, though the new airport runway embankment acts as a perfect Radar distance guide at all times. It is preferred for inward clearance, being but 3.5 miles from the Customs Pier, whereas H.I.R.I. Berth is 13.5 miles along the coast and takes 1 hour in a normal launch. In view of the problem of Southerly winds (a 16,000 ton T2 tanker grounded recently, while trying to enter Honolulu Harbour), it is important that any vessel at anchor is kept ready to weigh anchor and sail to seaward, to avoid any danger of dragging ashore.

Note: Vessels must *not* cross the limits of Honolulu Harbour while awaiting the Pilot and are further delayed when the Coastguard boards to inspect vessel's emergency steering and power systems, log book entries and other items as required.
Communications: Honolulu has an excellent network of public and private radio communication stations. The US Coastguard (Channel 16, 14 and 12) have an excellent range, while the various Agent offices have their own units for direct contact, in normal hours. On Channel 27 there is the Marine Operator which is a local private organisation that can connect a vessel via satellite telephone to any part of the world, as well as to Agents out of hours. However, they will require the Agent's "BANKER NUMBER" i.e. the coded number that will settle accounts locally, hence it is best to obtain this first from Agent.

N.B. The misuse of Channel 16 will bring Coastguard Authority down on any vessel breaking the code of conduct.
Bunkers and Fresh Water: No fresh water is available at Barber's Point nor are there any barges for either water or bunkers at Honolulu. A tug boat can be chartered at $5,000 per day to bring 50 tons of diesel/gas oil to the Honolulu Anchorage, but it is not allowed to deliver while vessel is in H.I.R.I. moorings. The question of using the H.I.R.I. 8 in. product line for bunkers is dependent on the position of the vessel's connection and the type of product already in the line when the request is made, as any different grade is cleared and requires re-refining.

The alternative to the above is to request permission to bunker at one of the several deep water berths inside Honolulu Harbour, but apart from high cost, the attitude of the Harbour Master is negative to any entry by large tankers, inerted or not, hence delays can be anticipated even in an emergency.

Stores: A full range of provisions and dry stock is available and most deck or engineer's stores can be obtained from either the ship chandler or Dillingham Dockyard (which owns the tugs and is part of Oahu Railway & Land Co., Dillingham Corporation were Agents for the vessel).

When launches have to be used stevedores are employed to load the wire baskets at the pier and at least 2 to hook same to vessel's runner.

Repairs and Reconditioning: There would appear to be very little that cannot be handled or promoted in the mechanical, electrical and electronic fields and agencies exist for most major manufacturers, both U.S. and foreign.

Consuls: There is no longer a British Consul in Honolulu.

Launch service: This can be arranged through the Agents, the usual vessel being licensed for 28 persons only, while a substitute tug was allowed only 12 persons per trip. The cost is $130 per round trip, straight time to the Honolulu Anchorage (+$11.00 Port Fee minimum) and $263 per 2.5 hour round trip straight time to H.I.R.I. Berth at Barber's Point. If there are vessels at both S.O.C.A.L. & H.I.R.I. Berths, the schedule and costs are supposed to be shared and thus the number who can be ashore at any one time is even more limited. All costs are increased on overtime. While on mooring run, time in excess of 2.5 hours is charged out at $120 per hour in increments of 0.5 hour.

Medical Service: In common with most US ports no doctor will attend aboard unless under special circumstances, hence the medical list has to be divided to ensure sufficient fit men are at all times aboard the vessel in case of weather problems, which would cause the launch service to be suspended, or prevent men re-boarding the ship in swell.

Coastguard Regulations: Since the 17 tanker disasters of 1976 in US waters, the Coastguard have been empowered to conduct an off-limits inspection of all laden tankers requiring to enter a US anchorage or port area. This initial survey is to ensure that all the vessels' emergency gear has been tested within 12 hours of arrival and a log entry made of same. This includes steering, lighting, inert gas plant and any safety gear of electrical nature while radar, gyro compass and any such navigational gear must be working and in use together with up to date large scale charts and both International and US Inland Rules 1977 Edition.

He will also require to see the ship's manoeuvring data, squat and trim table and all information regarding draft together with engine movements in answer to telegraph plus internal communication systems. (A proposal is before Congress that all vessels be fitted with US made LORAN C equipment). Until he is satisfied the Pilot is not allowed to take the vessel inside official Port Limits.

After agreeing to allow vessel to enter, the Coastguard Officer remains on bridge to monitor all movements, responses, etc., and will thereafter conduct the anti-pollution survey as laid down in Federal Register Vol. 37 Number 246 Part II of December 21st, 1972. If, however, he is of the opinion that the standard of navigation in response to the Pilot's instructions are such as to constitute a potential hazard to navigation and therefore, to become a pollution risk, he has the authority to prevent the vessel from proceeding inwards and can cause the Pilot to take the vessel to sea or to an anchorage until the defects or bridge organisation plan or engine room responses are satisfactory to again proceed.

(*N.B.* The IYCS Bridge Procedures Guide is an invaluable help with the above in conjunction with the Trials Data).

SHIPMASTER'S REPORT No. 3: January 1984. **(See Plan Book)**

H.I.R.I. Sea Berth, Barber's Point: H.I.R.I. Sea Berth is situated on the S.W. corner of the island of Oahu, 1.9 miles from Barber's Point, some 20 miles from Honolulu.

The berth is composed of 8 buoys, fitted with tripping hooks, arranged in 2 parallel rows of 4 buoys in an alignment of 095° – 275°.

The berth is approximately 1,100 ft. long by 400 ft. wide and is in 125 ft. of water.

Currents off H.I.R.I. moorings are unpredictable, generally West-going, 1.5 to 2 knots. Vessels are only berthed at H.I.R.I. against a West-going current or with a light Easterly stern current not exceeding 0.5 knots. This East-going current sets towards Diamond Head.

Approach to the moorings is from the South on an East North Easterly course, the vessel turning into the moorings on the final approach course and mooring heading of 095° about 0.25 miles before reaching the buoys. (See Plan Book – Figure 1).

First lines ashore are 2 stern wires from the port and starboard quarters which are first run ahead of the vessel by 2 powerful lineboats to No. 5 and 6 stern buoys. These are followed by 2 head wires to No. 1 and 2 head buoys, thence for'd and after breasts are run from the port and starboard sides. The slack on the after 2 stern wires is taken in as the vessel enters the mooring but once the stern passes the after buoys care must be taken to keep these wires slack so as not to cant the vessel out of position.

1 tug is in attendance during mooring to push as required.

Vessels of this size (56,000 d.w.t. LOA 210 m.) are finally moored with 2 lines to each buoy, with a third line required to be available for sending to the weather buoys if necessary and also to act as a spare line in case of chafing. The length of ropes and wires is a most important consideration in the mooring operation. The minimum usable length is 700 ft. and this is barely adequate for ease of operation, in adverse wind or current situations could well be too short. In the case of this vessel the wires plus tails were only 690 ft. (211 m.) in length and, when allowance was made for turns remaining on the drums, they were barely adequate. Rental lines are available. The current charge is a handling charge of U.S.$990 regardless of the number of lines used plus U.S.$370 rental per line. Each line is 1,000 ft. to 1,200 ft. in length. In the event that lines are put onboard but not used the vessel is only charged the handling charge. The decision to place lines onboard is made by the Mooring Master, based upon the reported number and length of lines available, location onboard the ship and weather conditions at the time. In the case of marginal length lines, each lineboat has 3×150 ft.×10 in. polypropolene pennants with Mondel shackles and these are used at the discretion of the Mooring Master. There is no charge for the use of these pennants from the lineboats. The Mooring Master advised that if we return again we would be required to use the free 150 ft. extension pennants from the lineboats on the ends of our wires.

On completion of mooring all ropes had to be protected against chafing, the vessel rolling and surging continually. Anti-chafing arrangements in our case were in the form of old stranded ropes secured to our lines by West Country Whippings, and proved most effective. A continuous watch on moorings and chafing arrangements is most necessary.

The Berth has a capability to receive both clean and black products, but not simultaneously. All clean products are handled through an 8 in. submarine hose which requires a lifting capability of 4.5 tons. All black products are handled through 12 in. submarine hose which requires a lifting capability of 8 tons. Bunkers are available and these are loaded through the appropriate 8 in. or 12 in. line. *Where the strength of ship's equipment permits, a single whip and hook rig are preferred. In the event that the winch or other equipment is not capable of handling these weights then a doubling wire or multi-sheave block may be used.* The submarine pipe-line is to be lifted onboard and secured by ship's crew, the Mooring Master offering advice. All hose handling equipment is supplied, the vessel need only provide light line for frapping in a hose or constraining same upon disconnection. A chain block or rope luff tackle, to be provided by the ship, is an advantage in finally positioning the hose.

The refinery keeps its undersea clean pipe-line laid down in Gas Oil. This line contains approximately 5,500 barrels of product. When a vessel arrives with clean product other than Gas Oil to discharge, the vessel is requested to receive this 5,500 barrels of Gas Oil into an empty tank prior to commencing discharge of the vessel's actual cargo. On completion of cargo this Gas Oil is pumped ashore once more thereby filling the undersea line once again with Gas Oil. Maximum discharge rate for products is generally 5,000 – 6,000 bbls./p.h. or a maximum of 100 lb./sq.in. at the manifold. There are no facilities at the H.I.R.I. moorings for the receipt of dirty ballast. Slops may be accepted provided they do not contain more than 65% water. The H.I.R.I. sea berth is practically an open sea berth being too far from the low shore line to have any protection from the island. A ship lying in the berth is particularly vulnerable to winds from the North or South, i.e. cross winds beam on to the berth. Of the two, the Southerly winds are the more dangerous because the vessel is lying broadside on to a lee shore, in the trough of the swell, with only 7 cables of deep water available. As long as the winds are from East or Westerly quadrants there is little danger and ships are continually berthed and lie at the berth in the N.E. trades in wind speeds up to 20 to 25 knots. In such cases the windward lines will be augmented beyond the normal number. N.E. trade winds are common during most of the year, the islands lying in the N.E. trade wind belt. Winds from the South are associated with a low pressure system or front or a high pressure ridge. Except in the rare case of an intense high pressure system, Southerly winds from a high pressure ridge are not feared and ships will normally be berthed or kept in their berth. Low pressure centres and fronts are a different matter and are carefully monitored. Generally the Mooring Master will not berth a ship if a moderate or deep low is in the vicinity. If the vessel is already at her berth then the Mooring Master will advise leaving before the wind speed reached 15 knots. Above this wind speed tug's assistance is normally required with the unberthing. Such assistance takes about 1 hour from Honolulu and can be obtained if departure cannot be made before the wind reached 15 knots. If delay in leaving the berth is delayed too long then the line boats are unable to release lines from the buoys and all must be slipped onboard. A lineboat remains at the mooring at all times whilst a vessel is on the berth.

Refinery instructions require that the discharge is planned so that sufficient empty and dry tanks are available for ballast so that the vessel can maintain a sea-worthy draft and trim at all stages of the discharge operations in case she is required to vacate the berth with the onset of adverse weather.

Ships are unberthed during the hours of darkness provided that the current is not too strong.

NOTICE: Issued by Hawaiian Independent Refinery Inc., and dated May 1979.

Subject: General Instructions and Discharging Orders

1. A Mooring Master has been assigned to assist in the mooring of your vessel, the connecting of cargo hoses, discharge of cargo, disconnecting cargo hoses, unmooring and departing from the sea berth, and other activities for which his services may be required. His presence on board does not relieve you of your legal responsibilities. FINAL DECISIONS REMAIN YOUR PREROGATIVE. Charges for the service of the Mooring Master will be for the account of your vessel and/or Owners.

2. After your vessel is properly moored and secured in the sea berth, one cargo hose will be connected to the ship's manifold. The ship's crew will be required to perform this function, supervised by a qualified Deck Officer. When the vessel is ready in all respects to commence cargo operations, and the Hawaiian Independent Refinery, Inc. personnel have indicated their readiness to receive cargo, commence the discharge of cargo at the rate of approximately 12,000 U.S. b.p.h. This is for the purpose of displacing the pipeline. Upon receipt of instructions from the Mooring Master, increase to maximum pumping rate using *all main cargo pumps,* but do not exceed 150 p.s.i at the vessel's rail.

3. For the safety of your vessel and at your discretion based upon weather conditions, etc., the discharge of cargo should be arranged so that when approximately 65% of the total cargo has been discharged there will be sufficient empty and dry tanks to accommodate ballast as required to produce a mean draft of approximately 25 ft. and in a trim condition not to exceed 6 ft. by the stern upon the completion of discharging operations. The Mooring Master is responsible for the inspection of the tanks prior to the loading of ballast and again upon the completion of discharge of all cargo; however, normally this will be done by a third-party petroleum inspector.

4. It is unlawful to pollute the waters adjacent to the State of Hawaii. It is the responsibility of the vessel to assure that no oil (crude oil, bunker fuel, diesel, bilge oils, etc.) is spilled or pumped overboard. Drip pans must be provided at the flange connections. In the event of an oil spill, or any other occurrence which results in pollution of the sea, the U.S. Coastguard, the Mooring Master, and the vessel's "Agent" must be notified immediately. The Mooring Master will notify the U.S. Coastguard immediately if the ship's Master fails to do so. By Federal Order CFR 153.305, no dispersants will be applied to an oil spill without U.S. Coastguard approval.

Failure to report pollution, regardless of the extent thereof, will result in severe penalties being imposed by the State of Hawaii and the U.S. Coastguard.

5. A sufficient number of Officers and crew members must be on board at all times to disconnect the hoses, unmoor, and vacate the berth should such action become necessary, or deemed advisable. The main engine must be kept ready for use at all times. Under no circumstances are repairs to be undertaken while the vessel is moored in the sea berth.

6. It is hoped that the discharge of cargo will be expedient and successful, and that your stay in Hawaii will be pleasant. To this end, please do not hesitate to call upon us for any assistance we may be able to render.

7. You are requested to sign and return the attached copy of these instructions in acknowledgement of receipt thereof.

AUTHORITY: State of Hawaii, Department of Transportation, Harbours Division, Oahu District, P.O.Box 397, Honolulu, Hawaii 96809. *Contact:* Captain D. E. Gately, Harbour Master.

AGENT: Davies Marine Agencies, Inc., P.O.Box 3020, Honolulu, Hawaii 96802. Head Office: 608 Fort Street (Pier 10), Honolulu, Hawaii 96813. Tel: (808) 531-8531. Telex: ITT 743-0018 Steam, RCA 723-8305 Davs HR. Cables: Dracosteam.

HOUSTON, Texas: 29.45 N. 95.20 W. (See Plan Book)

DOCUMENTS:

1 Visaed Crew List.
3 Passenger Lists.
3 or more copies of complete Manifests of Cargo for discharge at all U.S. ports.
2 or more copies of Manifest of Cargo for each individual U.S. port.
1 Souvenir List.
1 Stores List.
Ship's Register.
Tonnage Tax.
Load-line Certificate.
Nationality Certificate.
No health document required.

PILOTAGE: Compulsory. Radio to local Agent who arranges Pilot and specifies boarding time. U.S. Coast Guard requires 24 hours' notice in advance of arrival Galveston Bar. Pilot boats and station on VHF Channel 12, Bridge to Bridge is Channel 13 and tugs for docking and off-docking on Channel 14. 3 Pilot boats marked "HP No. 1" – 53 ft., "HP No. 2" – 61 ft. and "HP No. 3" – 106 ft. in length. Pilot boats contacted by light in International Morse code; no sound signal. Pilot taken on board at Sea Buoy No. 1, located 6.7 miles from Galveston. Seldom, if ever, is water too rough for boarding at above location. Anchorage located in Bolivar Roads, 6.7 miles inward from Sea Buoy No. 1.

ANCHORAGES: Anchorage for Houston is only in Bolivar Roads in Galveston, Texas, which has ample space and depth for all Houston bound vessels.

RESTRICTIONS: None with respect to time of day or night, or with state of tide.

Houston Ship Channel Dimensions:

Section of Channel	*Miles*	*Width (ft.)*	*Depth (ft.)*
Bolivar Roads to Morgan Point	25.6	400	40
Morgan Point to Exxon Co. Slip	4.8	400	40
Exxon Co. Slip to Shell Oil Co. Slip	8.8	400	40
Shell Oil Slip to Hunting Bayou	4.6	300	40
Turning Point at Hunting Bayou	0.2	600	40
Hunting Bayou to Sims Bayou Turning Basin	2.8	300	40
Sims Bayou Turning Basin	0.2	1,000	40
Sims Bayou Turning Basin to Wharf No. 15	3.6	300	36
Turning Basin	0.8	250 to 970	36
Total miles	51.4		

MAX. SIZE: Max. 850 ft. long, 115 ft. breadth and 39 ft. draft. Tide minimal, affected primarily by wind only. Should a vessel's draft exceed 39 ft., permission to enter must be obtained from the U.S. Coast Guard.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: International Telephone and Telegraph – ITT – Galveston call letters KLC.

TUGS: Tugs come alongside just off dock or immediately prior to entering turning basin if vessel is to turn, or at Pilot's discretion.

STEVEDORES: Stevedore, on advice from representative of local Agent, must order labour prior to 1700 for 0700 or 0800 hrs. start the following day. Can order at 0800 for 1000, 1100 for 1300 and 1700 for 1900 hrs. start. Gangs must be ordered prior to 1700 hrs. on Saturday for Sunday or holiday.

BERTHING: No special requirements other than authority from terminal operator local Agent.

Petty Terminal Corporation (PETCO) Dock:

Deepwater shipside terminal located on South side of channel. One ship berth 720 ft. long with water depth of 40 ft. One covered warehouse 100,000 sq. ft. with rail track inside warehouse and on outside concrete apron. Complete services available for discharging and shipping general cargo. Owned by Intercontinental Terminals Company and operated by Petty Terminal Corporation.

Manchester Terminal Company:

3 ship berths – 1,650 ft. in length (including 1 piling cluster).

Served by 1 marginal track and 2 outside tracks behind docks plus loading tracks to all other facilities. Special loading-unloading docks for motor trucks available.

Equipment: 62 Lift Machines; 7 Tractors; 1 Towmotor, 30,000 lbs. capacity; 4 Sweepers, 3 Scrubbing Machines.

Manchester Terminal Company also has 18,000 cargo pallets.

New Terminal Warehouse Corporation:

Capacity 3 ship berths. Wharf 1,400 ft. long. Open storage areas of 50,000 sq. ft. Covered storage areas of 200,000 sq. ft.

Other Wharf Facilities:

In addition to the for-hire terminals. Port of Houston has some 43 ship berths plus various barge facilities on the Ship Channel maintained and used exclusively by industries. Most of these facilities are tanker ship berths at the refineries. There are also 4 liquid-bulk terminals for hire: Amerada Hess Terminal and General American Tank Storage Terminals, the latter having 2 separate locations; South Coast Terminals; Robertson Terminals, Inc.

Barbours Cut Terminal: The Port of Houston Authority continues work on a $70 million container, Ro-Ro (Roll-on/Roll-off), and ship/barge (Lighter Aboard Ship – LASH) facility 25 miles downstream at Barbours Cut where the Ship Channel enters Galveston Bay. A "U" head pier and mooring dolphins provide for berthing LASH ships during loading of barges onto the ships and for off-loading containers (by ship's cranes) from LASH ships to truck trailers on the pier. A barge fleeting area and barge mooring dolphins are provided in the LASH ship facilities now in use. A Ro-Ro dock provides for ships equipped with ramps to load and unload wheeled vehicles. A Ro-Ro transit shed with 100,000 sq. ft. of covered storage is nearing completion. An eleven acre paved open storage area is in use: There are three 1,000 ft. container wharves; 42 ft. alongside; 33 acres open storage back-up area at each wharf. The 3 wharves are in use. Container Wharf No. 4 is complete and a 21 acre open storage back-up area is complete. There is a container freight station with 55,000 sq. ft. of covered storage and rail service available. A railroad yard or ramp point with 1 lead track, 1 storage track and 2 working tracks provides a facility to load and unload containers and trailers to and from flat cars. The car capacity on the working and storage tracks is approximately 138×55 ft. long cars.

Bayport Division: A 300 ft. wide by 42 ft. deep Bayport Ship Channel and its 1,600 ft. diameter turning basin connects with the Houston Ship Channel in Galveston Bay and extends approximately 2 miles inland to provide berths for deep-draft tankers and bulk freighters. Petro United Inc., Celanese Corporation, American-Hoechst Corporation and Hudson Oil Company have docks and facilities on the Bayport Ship Channel.

BULK HANDLING FACILITIES:

Public Grain Elevators: Back of Wharves 14 and 15. Capacity 6,000,000 bushels.

Equipped to unload from 110 to 120 cars in 10 hours, or deliver a combined total of 80,000 bushels per hour to 2 ships. 12 mechanical grain trimmers are in use at the Elevator as well as other major equipment including 2 car dumpers and 7 hopper scales of 150,000 lbs. capacity. 2 modern grain truck dumpers can unload up to 30 trucks per hour.

Public Bulk Materials Handling Plant: At Greens Bayou.

Loading/unloading capacity is 1,000 long. t.p.h. free digging rate. Fully automatic plant handles dry bulk commodities rapidly to and from ships and barges through the loading and unloading towers, conveyor systems, hoppers, pits, surge bins and scales; with rail and truck facilities and ample ground storage. Rail cars are rapidly moved with large rubber-tyre tractors. These tractors are equipped with two-way radios for instant communication with unloaders. Boom of unloading tower reaches 76 ft. from face of dock, bucket capacity is 10 tons; loading tower boom reaches out 61 ft. from dock face and is equipped with automatic trimmer. Both towers can travel the full length of the dock. Mooring facilities for a waiting vessel have been installed next to existing dock. Also available: a boxcar unloading system (Augermobile), 2 heavy-duty front-end loaders and 4 heavy-duty car shakers.

Elco Shipside Elevator Company:

Two million bushel capacity elevator which loads up to 25,000 bushels per hour to vessels berthing at Dock 2 of the Port Authority's Manchester Wharves.

Goodpasture, Inc. and Continental Grain Company:

Grain elevator with 12 million bushel capacity – 4 ship berths. Also general cargo handling. Max. draft 38 ft. Loading rate 1,000 t.p.h.

Union Equity Co-Operative Exchange:

Grain elevator with 6 million bushel capacity, 1 grain berth, 1 lay berth, each 980 ft. long, water depth of 40 ft. for all berths. Loading rate 1,200 t.p.h.

Adams Terminal: Phillips Terminal Company.

2,700 linear ft., capacity 5 vessels. Bulk cargo loading conveyor system rated at 400 t.p.h.; horizontal boom, hammerhead-type clamshell unloader equipped with five-yard ore bucket, rated at 150 to 250 t.p.h.; 2 gantry cranes, capacity 40 tons at 30 ft. radius; Robbins heavy-duty car shakeout; 20-ton truck mounted crane. One D & H gantry crane modified to handle five-yard bucket for bulk ore discharge. 100 t.p.h. Specialists in import and export bulk cargo. Covered storage – 73,000 sq. ft.

Jacintoport Terminal:

Deepwater shipside terminal located on the North side of the Ship channel some 15 miles downstream from the Turning Basin.

Three ship berths with water depth alongside the wharf at 32 ft. 24,000 sq. ft. of transit sheds; 60,000 sq. ft. of back covered storage warehouse space, and 300 acres available for open storage. Rail service by the PTRA and Missouri Pacific. 200 igloos provide storage with less than 4° change in temperature year around. 500 cargo pallets. Slip is 4,200 ft. long and 400 ft. wide. 3,600 ft. marginal trackage. Owned and operated by Bethlehem Steel Corporation.

Cargill, Inc.:

Grain elevator with a capacity of 3.5 million bushels. Two ship berths. Max. draft 38 ft. Loading rate 1,500 t.p.h.

CRANES: (Capacities 1 ton=2,000 lbs.)

Mobile Crane – Diesel: Capacity 80 tons

Gantry, American Revolver R-25 Electric: Capacity at 65 ft. radius – 50 tons

Gantry, Clyde Whirley, Diesel Electric: Capacity at 45 ft. radius – 30 tons

Gantry, Portainer, Electric: Capacity at 81 ft. reach – 27.5 tons

Gantry, Portainer, Diesel Electric: Capacity at 113 ft. reach – 44 tons

Gantry, Portainer, Electric: Capacity at 140 ft. reach – 30 tons

Stiff Leg Derrick, Electric: Capacity at 50 ft. reach – 75 tons

BRIDGES: Two bridges cross channel, one immediately East of Public Wharf 31, clearance of 135 ft. and the other immediately West of the Shell Terminal, clearance 175 ft.

MEDICAL: Give sufficient notice to order doctor or ambulance. Numerous hospitals available. Seaman's health certificate required.

TANKERS: No specific requirements for oil carriers with respect to load/discharge lines. Tankers must be gas free to enter turning basin area. Approximately 12 tanker berths, excluding Exxon Oil & Refining Co. in Baytown, Texas.

DENSITY: Classed as full fresh but varies with rainfall and tide, usually 4 in. to 5 in. allowance on full draft.

FRESH WATER: Available at all terminals through pipe and hose.

FUEL: All grades and viscosities available.

FIRE PRECAUTIONS: All standard precautions per code of Federal Regulations plus local ordinances. Tankers, unless gas free, not permitted at wharves in the immediate turning basin area.

IDENTIFICATION CARDS: Immigration Form I-95 card required.

GANGWAY/DECK WATCHMEN: Not required, but are available and can be arranged by local Agent at Master's request.

OPENING/CLOSING HATCHES: By stevedores only – vessel will be charged for this work if done by crew.

CUSTOMS ALLOWANCES: Tobacco, 300 cigarettes, 100 cigars, 1 lb. of tobacco or combination for each man. Wine and/or Spirit, 1 quart bottle for each crew member.

CARGO GEAR: Cargo gear safety certificate required.

REPAIRS: All types available.

DRY DOCKS: Todd Shipyard, 12,000 ton drydock at Greens Bayou and 14,000 ton capacity (length 400 ft.) drydock in the Houston Ship Canal.

REPATRIATION: Danner Guard Service can handle all phases.

AIRPORT: Approximately 0.5 hour by car; served by regular airlines.

TIME: Central Standard with daylight saving time effective from April to October.

HOLIDAYS: January 1st; February 22nd; March 2nd; May 30th; July 4th; First Monday in September; November 11th; December 25th. No work performed on first Monday in September and December 25th except in emergency.

POLICE/FIRE/AMBULANCE: All services provided or available.

TELEPHONES: Currently no arrangements for placing telephones aboard but easily accessible on wharves.

SERVICES: All services available.

SHORE LEAVE: Shore leave granted except when individual not qualified.

DEVELOPMENTS: Channel depths to be maintained at 40 ft. Bayport development East and South of Morgans Point to have deep draft berths for liquid bulk and general cargo.

Wharf No. 32 in the Upper Turning Basin area is under construction, completion expected in 1984.

A 24 acre concrete paved back-up area is under construction, also expected to be completed in 1984.

SHIPMASTER'S REPORT: 1975.

Customs:

Bond remained sealed.
2 Copies of Curio Lists.
2 Copies Store Lists.
1 Crew List.

Immigration:

No visit. 1 Crew List.

Agents:

Given Travelling copies of Clearance last port, Tax Tonnage receipt last port plus Cargo Manifests.

Agricultural Dept. Re-sealed meat and vegetable rooms. Inspected Galley, Messrooms, etc. Garbage cans to be covered.

Provisions and Stores. Satisfactory. Select own ship chandler.

Laundry. Facilities available but not used.

Coast Guard. No visit.

National Cargo Bureau: Same as New Orleans.

Watchmen: None placed on board. Security at gate strict.

Telephone: None placed on board. Use dock office.

Fresh Water: Available.

Fuel: Available by barge if required. Do not over stem.

Engineering and Repairs: Efficient and satisfactory. Price high compared to N.Z.

Radio Messages: Send ETA after departure New Orleans to Agents and Houston Pilots with draft. Notify Agents of any explosives.

Stevedores: Hours of work. 0800 to 1200 hrs., 1300 to 1800 hrs., 1900 to 2300 hrs. Weekday gangs will work through meal hours to finish. At weekend, day labour works right through to midnight if necessary on time and a half then double time for meal hours.

Crew must not clean hatches. Labour has claim on cleaning and has to be paid in addition to crew. Crew open and close hatches, but not until hatch foreman present. Not before labour working hours.

Working heavy lifts with ship's gear loading rate very slow, especially at end of shift. Due to nature of deck cargo; 11 ton lifts 52 ft. long.

Constant supervision needed for deck cargo.

Head stevedore checks Factory Act Book before starting.

No plan makers. Details sent back to New Orleans for redistribution to discharge ports.

General: Pilot boards from large grey metal cutter off fairway buoy. Flash every 2.5 seconds. Give good lee and have ladder 8/10 ft. above water with usual manropes, heaving line, etc.

If you have to anchor, most vessels use the Eastern anchorage about 1.5 miles East of fairway buoy and clear of fairway marked channel. Soft mud bottom. Use plenty of cable.

Berth: Ships spaced very close to each other. Rise and fall of tide about 1 ft.

Moorings: at least 4 head lines and stern lines plus 2 springs each end. Ships frequently passing and channel narrow consequently a good deal of surge. Lines to be frequently looked at and kept tight. Parted 3 springs in as many days!!! Gangway also to be watched. General rule is to use ship's gangway. Wide apron in front of sheds with rail lines but fork-lifts used most.

Agents have office on wharf with direct line to city office and outside lines.

Wooden piling which acts as fenders. Bollards of the large cleat type. Sufficient but not plentiful. Two linesmen each end when arriving and departing. No permanent cranes but mobile ones can be hired. Quay about 25 ft. above water.

Recommended not to walk about or up to bus especially at night. Better for 2 or more to get a taxi. Fairly good, 3–4 dollars to Houston.

Seaman's Mission near by. Very good, new and modern.

Tugs: Used for berthing and unberthing. Had 2 on arrival due to strong wind and close proximity of mast top to bridge.

Sailing had 1 tug lashed up alongside forward shoulder.

Tugs use own lines.

Bridge: There is a bridge above Upper Clinton Bend from Manchester on the South to Clinton Park on the North. This is a relatively new bridge to be passed under with a clearance of only 135 ft. Check the rise of tide on way up.

SHIPMASTER'S REPORT: August 1980.
Tenneco Terminal – Vessel discharged ammonia.

Approaches: BA Chart 975.

The safety fairway is usually very busy and it is advisable to ensure that you are in fact keeping to the starboard side.

At the entrance to the fairways there are many oil rigs. With the predominately low lying coast, radar positions are extremely difficult. Satellite navigator is highly useful in this respect. The first good check is off the buoys in the final safety fairway. These showed on radar at about 7 miles.

Some radar echoes are received from Galveston itself.

The charted rigs in anchorage 'A' are in fact in those positions.

Pilotage: If anchored, the pilot boat will call vessel into the "Whistle Buoy" for boarding.

The cutter is a large, fast launch and usually lies inside until working a vessel.

Pilot ladder about 8 ft. from the water to clear the boarding platform.

Contact can be made via Galveston Pilots initially on Channel 16 who will relay the messages. Houston Pilots themselves work on Channel 14.

One Pilot, the length of pilotage is about four hours to the first line ashore. Two tugs used.

No night time pilotage for a vessel of this size (32,000 g.r.t.) and type. There is a TV video surveillance system operating throughout the length of the channel.

Berth: About 4 miles below Warren Terminal.

Plant and terminal now owned by Occidental (Oxy) but Tenneco rent the berth.

Berth is far too small for this vessel, at least as far as the moorings are concerned. Typical American 'T' barge jetty, the head of which is only about 25 m. long, with walkways leading to 3 dolphins at each end. The bow and stern overlap these mooring dolphins and head and stern lines are taken to posts on the river bank. These are only breast lines and it is advisable to make advance preparations to put out as many as 4 springs at each end. There is a great deal of traffic passing continuously.

Gangway: The gangway should remain stowed until in position. Whether vessel can use the accommodation ladder will depend on draft. If vessel deeper than 26 ft. there will not be sufficient clearance from the fender so a "B.O.T." type gangway resting on accommodation turntable will have to be used.

When the accommodation ladder is used it has to be turned through 120° and landed on the aft dolphin immediately adjacent to the jetty head.

Discharge: 12 in. flexible hose 150 ASA used. 'T' piece, two shore hoses.

Max. back pressure allowed is 50 p.s.i. Vapour return line is 4 in.

The plant ashore is only equipped to export cargo and its reliquefaction plant is small.

A shore walkie-talkie is placed with the officer of the deck.

Discharge rate can vary (October 1979 – 260 t.p.h., August 1980 – 550 t.p.h.)

Shore surveyors figure taken for bill of lading. Density 1001.

USCG: No inspection prior to commencement, apparently this is normal. The port is far too busy for them to visit every ship. But be prepared, they are very particular on navigation equipment and Officers' Certificates and experience.

General: It is possible to load bunkers by barge alongside the terminal if prior arrangements and permission are obtained but it depends on Agent and Authorities.

Fresh water is available from the jetty, at a very low rate.

Storing can present difficulties as the after crane does not plumb the dolphin. By arrangement, vessel can use shore crane when the operation is not too difficult.

Public telephone on dock – minimum charge 25c.

Liferaft service available, 24 hours' service.

A considerable distance from the city, which rather complicates services and communications.

Agents leave a radio onboard for contact with Agent and office, but often outside range, office on maximum range.

No private transport (taxis) allowed into refinery area. Transport to the gate by their own minibus and then telephone for taxi. Crew transport service allowed into berth area with pass from Agent.

AUTHORITY: Port of Houston Authority, P.O.Box 2562, 1519 Capitol Avenue, Houston, Texas 77002. *Tel:* (713) 226–2100. *Telex:* 910–881–5787. *Contact:* Richard P. Leach, Executive Director.

AGENT: Strachan Shipping Company, Post Office Box 52490, Houston, Texas 77052. Tel: 713-683-3500. Telex I: 79-1837. Telex II: 910-881-6283. Cables: "Strachan".

HUENEME, California: 34.09 N. 119.12 W.

(See Plan Book)

DOCUMENTS: See "San Francisco".

PILOTAGE: It is requested that ships entering port stand by 1 mile off harbour entrance just seaward of the Port Hueneme seabuoy designated R"2" (Fl. R. 4 secs. Bell) and await port Pilot who will board from a tug. The U.S. Coast Guard Station at the Channel Islands Marina maintains a radio beacon.

All vessels 1,000 g.r.t. and over or carrying a foreign flag entering, leaving and shifting within the Port of Hueneme, including area of the Oxnard Harbour District, must be piloted by a port Pilot duly licensed to perform the services of piloting vessels within the Port of Hueneme. The Oxnard Harbour District does not maintain Pilots; licensed Pilots are available on a 24-hour-a-day basis from Port Hueneme Pilots' Association (Captain Carl Dingler at (805) 646-0469) or on a part-time basis from Hueneme Pilot Service (Captain R. E. Fosse at (805) 985-8071).

ANCHORAGES: If there is a wait for Pilot caused by weather, visibility, congestion in harbour, or any other reason, the best anchorage area is W.S.W. of the harbour entrance where there are no hazards and there is some protection afforded by the natural curve of the coastline.

RESTRICTIONS: The length of entrance channel is 2,300 ft. The narrowest width of harbour entrance channel is 330 ft. However, because of prevailing fresh winds, this is a one-way channel; thus, deep-draft ships not able to manoeuvre easily in a restricted channel have precedence over smaller craft.

RADIO: The U.S. Coast Guard Station, Channel Islands Marine, located at the entrance to harbour, guards the following frequencies: 2182 kHz, and VHF Channels 12, 16, 21, 22, 23 and 83. After initial call up the Coast Guard can shift to 2670 kHz, 2694 kHz, 5080 kHz. The "Port Hueneme Wharfinger" guards Channel 16 and will normally shift to Channel 6 for administrative purposes. The harbour tugs guard Channel 16 continuously. The harbour Pilots, when expecting a commercial merchant vessel guard Channel 16 voice circuit and voice call "Port Hueneme Pilot".

Tugboat working frequency is VHF Channel 65A (156.275 kHz).

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Los Angeles Quarantine Station.

Ships required to pass quarantine may enter port and moor. "Q" Flag is to be flown. Upon mooring, ship must post gangway watch until ship has passed quarantine. When Port of Hueneme is its port of first arrival in the United States from foreign ports or from States other than California, a ship must be inspected by the Department of Agriculture. There is a local representative in Oxnard. The Oxnard Harbour District will order officials if requested by ship or Agent.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Tug services for Port of Hueneme are furnished by the Oxnard Harbour District and Port Hueneme, California. Requests for tug services may be made to the General Manager of the Oxnard Harbour District, who will act as Agent for ship in forwarding them. 3 tugs are available on a 24 hour basis. The tugs are 3,000 s.h.p. twin screw vessels. The number of tugs to be used on any movement is determined by port Pilot in charge of the movement. Tugs are not available for deep-sea towing, except in case of emergency to save life or property. As a service to all vessels, the Oxnard Harbour District, acting as Agent for vessel, will pay all tug fees to United States Government when necessary, subject to reimbursement conditions as arranged between the vessel, her Owners, or Agents, and the General Manager, Oxnard Harbour District. Seldom are tug charges more than the minimum due to the short transit time to berths.

BERTHING: Berthing arrangements should be made with the General Manager by Agent as far in advance of arrival date as possible, specifying dates of arrival and sailing, and nature and quantity of cargo to be handled. The Oxnard Harbour District also has a licence agreement with the U.S. Naval Construction Battalion Center, Port Hueneme, for the use of additional berths and terminal facilities on an "as available" basis. Prior arrangements must be made, should use of these additional facilities be desired or necessary. The Port of Hueneme has 4×600 ft. berths with depth 35 ft. MLW and appropriate terminal facilities. At the present time there are 10 deep-draft berths within the entire port area.

Bottom is sand and mud. Mean low water is + 1.5 ft. Height of wharf above the MLLW is 13 ft.

STEVEDORES: All stevedore work is presently performed by resident stevedores, the Marine Terminals Corporation, who also have offices in San Francisco, Long Beach, etc. They maintain an office at 111 Ponoma Street, Port Hueneme. They provide modern handling equipment to suit cargo's need. There is no special fixed bulk handling equipment available as yet. Longshoremen are members of the International Longshoremen's and Warehousemen's Union and conform to the Pacific Coast Longshore Agreement. Hours of work are as outlined in this agreement. Longshoremen at this port do all covering and uncovering of hatches and rig the gear. There are 8 gangs available in the port. Day and night gangs for Tuesday through Saturday (except Monday through Saturday, 1900 hrs. initial start) must be ordered by 1500 hrs. the previous day. Night gangs required Monday for a 1900 hrs. initial start, and Sunday and Monday gangs must be ordered by 1100 hrs. Saturday. Cancellation time is same as ordering time, if gangs which have been ordered are cancelled after the aforementioned deadlines, the agreement's 4 hour minimum applies. Normal day shifts begin at 0800 hrs. and normal night shifts at 1800 hrs. Each shift consists of 8 hours and on sailing day 10 hours may be worked by the final shift. There are no obstructions on the wharf to keep all hatches from being worked concurrently.

MEDICAL: Patients are provided with medical attention at the Medical Center, Port Hueneme, or St. John's Hospital, Oxnard California. Temporary visa must be obtained from Department of Immigration and Transportation if a crew man or passenger must remain after the ship sails.

FRESH WATER: Fresh water is available. There are hydrants along the wharf and delivery to ship is effected by hose. Water is good to taste but is hard. It is not suitable for boilers. Contact wharfinger on duty for delivery of water. Boiler feed water is available by truck upon request.
FUEL: Diesel oil and bunker fuel is available by pipe-line at Wharf No. 1.
REPAIRS: Minor repairs may be made in port. Machine shops in Ventura and Oxnard are qualified for normal voyage repair work.
GANGWAY/DECK WATCHMEN: Gangway or special wharf watchmen are available upon request.
TELEPHONES: 4 pay-telephone booths are located at the West end of Wharf 2 adjacent to the wharfinger's office and 2 at the West end of warehouse No. 2 and maintained for the convenience of ships berthed at Wharf 1. The wharfinger's office has a telephone which may be used by people calling in to contact the ship. This telephone is manned 24 hours a day for convenience. Its number is (805) 488-4615. The Port of Hueneme office telephones are available to ship's officers and Agents for local calls or collect long distance calls. Wharf lines permit a telephone to be installed at a nominal charge if desired by Agent.
HOLIDAYS: U.S. Federal and State holidays are observed by the Port and Terminal management. If stevedoring is required on holiday it is performed in accordance with the International Longshoremen's and Warehousemen's Union-Pacific Coast Longshore Agreement.
AUTHORITY: The U.S. Navy (Commanding Officer, U.S. Naval Construction Battalion Center) exercises overall Port Control Authority; the Oxnard Harbour District is solely responsible for its commercial operations.

Port of Hueneme, Oxnard Harbour District, P.O.Box 608, 150 Port Hueneme Road, Port Hueneme, California 93041-0608. *Tel:* (805) 488-3677. *Contact:* Edward J. Millan, General Manager.

HURON, Ohio: 41.24 N. 82.35 W.

Refer to St Lawrence Seaway for important general information.
PILOTAGE: None required other than what is required for Great Lakes.
ANCHORAGES: Depth 3 to 10 fathoms.
MAX. SIZE: Length 716 ft., breadth 75 ft., draft 26 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: WMI Lorain.
TUGS: Meet vessel at the pier head. Use ship's lines.
BERTHING: Norfolk and Western Ore Dock, operated by the Lake Erie Dock Co., can handle 15,000 tons of ore in 8 hours. Ore slip is 1,400 ft. long with 26 ft. of water.

Limestone Dock, 700 ft. length with 26 ft. of water.

Grain loading facilities operated by the Pillsbury Company. Load speed, 20,000 bushels; unload speed, 15,000 bushels; berthing space, 832 ft.; max. length 610 ft.
STEVEDORES: None available.
FRESH WATER: Available.
FUEL: None available.
IDENTIFICATION CARDS: Required by Immigration.
CONSULS: Nearest at Cleveland.
REPAIRS: No facilities.
REPATRIATION: No facilities.
AIRPORT: 50 miles from port (Cleveland International Airport).
POLICE/AMBULANCE/FIRE: 433-4114.
SHORE LEAVE: Allowed.
AUTHORITY: The Huron Joint Port Authority.

JACKSONVILLE, Florida: 30.20 N. 81.40 W.

(See Plan Book)

DOCUMENTS:

Public Health:

Maritime Quarantine Declaration Form HSM 13.19.

Customs:

3 U.S. Customs Manifests for cargo to be discharged at first port of entry.
2 U.S. Customs Manifests covering all other cargo on board vessel for discharge at other than first port of entry.
3 Stores Lists.
3 Crew Lists.
3 Passenger Lists.
3 Curio and Crew Personal Items Lists.
Vessel's Clearance from last port.
Vessel's Register and Load Line Certificate.
Vessel Utilization and Performance Report.
Form MA.578 for dry cargo vessels.

Immigration:

1 Certified Crew List and Landing Permit form I-95A for each crew member.
Valid passport for each crew member.

PILOTAGE: Vessels approach Pilot Entrance Buoy STJ No. 2 (Red) approximately 6 miles at sea off jetty entrance to St. John's River. Pilot station located just inside jetty on river channel at Mayport Naval Station. Pilot station operates both VHF and UHF frequencies. VHF Channels 16 and 18 A. UHF Frequencies 2738 and 2182. Pilot cable address "Jaxpilot". Pilot boards from Pilot boat "Jaxpilot" just East of sea buoy STJ No. 2. Pilot boat does not maintain station at sea but answers call or is dispatched on information by vessels' Agents. Vessels anchoring awaiting Pilot should anchor as near entrance buoy as safely possible.
ANCHORAGES: 2 anchorages located inside harbour near dock sites with depth of about 31 ft.
RESTRICTIONS: For vessel drawing not more than 38 ft. water no restrictions and vessel can enter and clear harbour on 24 hour basis. Pilots and tug assistance available all hours day or night. Vessels drawing more than 38 ft. required to await tide.
MAX. SIZE: Draft should not exceed 38 ft. for dry cargo vessels and tankers.
Note: St. John's Bar Pilot Association advises max. draft 37 ft. (20th April, 1982).
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Tropical Radio, Miami, Fla. Call letters WAX. Lantana Radio, Boynton Beach, Fla. Call letters WOE.
TUGS: Under normal conditions with vessels able to proceed under own power, tugs approach vessel in vicinity of pier at which vessel is to dock. Tugs use own lines but no charge made.
BERTHING: Vessels can dock day or night. Transit time from pilot station to berths about 2 hours.
Blount Island Terminal: Operator: Jacksonville Port Authority. Length of berth, 4,700 ft. Depth alongside at MLW 38 ft. (11.5 m.). Containers, autos, paper and general cargo are handled. One 40 gross ton Alliance container crane, 1×40 gross ton IHI container crane, 1×100-ton Clyde revolving gantry crane and 1×50-ton Clyde revolving gantry crane are available. 1 bridge crane with a span of 600 ft. and lifting capacity of 900 m. tons is available over the graving dock of Offshore Power Systems at Blount Island.

2 Roll-on/Roll-off ramps are available. 1 measures 234 ft.×18 ft. and the other 212 ft.×18 ft. These ramps are designed for use with vessels having side ports. Concrete Roll-on/Roll-off "T" platform 166 ft. long with 153 ft. swing area at West end of marginal wharf.

Also see "Developments".

Tallyrand Docks and Terminals: Operator: Jacksonville Port Authority. Length of berth 2,880 ft. Depth alongside at MLW 38 ft. Cargo handled – General, Cars, Lumber, Containers, Steel, Coffee and Petroleum.

Also see "Developments".

Sealand Terminal: Operator: Sea-Land Service, Inc. Adjacent to Tallyrand Docks and Terminals (See Plan). Length 1,200 ft. Depth alongside at MLW 34 ft. 2 container cranes, capacity 27.5 tons and 30 tons.

8th Street Terminal: Operator Joyserv Ltd. Adjacent to Sealand Terminal (See Plan). Length of berth 707 ft. Depth alongside at MLW 34 ft. Cars are handled.

Commodore Point Terminal: Length of wharf 2,750 ft. Depth alongside 34 ft. Cargo handled: Oil, cement and liquid chemicals. Terminal also occupied by North Florida Shipyards. Storage facilities: Charter Oil; 340,000 barrels. Glidden – Durkee: 60,171 barrels for chemical storage. Atlantic Cement; 6 silos capacity 40,000 tons. Universal Atlas Cement; 6 silos capacity 32,000 tons.

Jacksonville Bulk Terminals: A subsidiary of Occidental Petroleum. Length of loading berth 1,000 ft. Depth at MLW maintained at 36 – 38 ft. 2 fixed loading towers capable of loading vessel at a rate of 2,850 long tons of phosphate per hour. Maximum outreach 81 ft., clearance above MLW of 40 ft. Terminal also capable of loading superphosphoric acid, phosphate rock, zircon sand (of sufficiently low moisture), granular fertilisers, tachonite, ilmenitite and mullite. Storage facilities: 6 concrete silos, each with a designed capacity of 5,000 tons of phosphate rock. Six tanks with capacities of 15,000 tonnes of superphosphoric acid each.

Dunns Terminal: Length of wharf 1,000 ft. Depth 38 ft. Leased for exclusive use by Military Sea Transportation Services.

Celotex Corp: Tel. (904) 751-4800. Berth: 635 ft. (205 m.) with dolphins. Depth: 32 ft. (9.8 m.). Terminal for receipt of gypsum rock by self-unloading vessels.

TANKERS: All petroleum terminals provide own hose ranging from 8 in. to 12 in. Prior to arrival, Master should request information from Terminal Company size of connection required.

Private Terminals:

Amerada Hess: Tel. (904) 765-4427. Berth: 200 ft. (60.1 m.) with dolphins. Depth: 30 ft. (9.2 m.). Tank storage capacity: 460,000 barrels. Receipt of petroleum products.

Alton Box Board Company: Tel. (904) 353-3611. Berth: 750 ft. (230 m.) with dolphins. Depth: 24 ft. (7.2 m.). Receipt of residual fuel oil.

Eastern Seaboard Petroleum Company: Tel. (904) 355-9676. Berths 250 ft. (80 m.) with dolphins (1); 160 ft. (48 m.) with dolphins (2). Depth: 18 ft. (5.5 m.). Tank storage capacity: 1,266,000 barrels.

Shipping of petroleum products by barge; loading of barges for bunkering vessels at berth in the harbour; fueling of tugs and small vessels.

Gulf Oil & American Oil: Berth: 200 ft. (60.1 m.) with dolphins. Depth: 33 ft. (11.5 m.). Tank storage capacity: 900,000 barrels.

Gulf: Tel. (904) 765-5541.
American: Tel. (904) 768-2583.
Receipt of petroleum products and loading of barges.

Phillips Petroleum Company: Tel. (904) 353-6740. Berth: 205 ft. (60.2 m.) with breasting dolphins. Depth: 34 ft. (10.5 m.). Tank storage capacity: 243,000 barrels. Receipt of petroleum products.

Shell Oil Company Wharf: Tel. (904) 355-5521. Berth: 230 ft. (98 m.) with dolphins. Depth: 33 ft. (10 m.). Tank storage capacity: 448,500 barrels. Receipt of petroleum products; occasionally fuels towboats and loads barges for bunkering vessels at berth in the harbour. Light marine diesel fuel only.

Standard Oil Company Terminal: Tel. (904) 353-1094. Berths: Barge–300 ft. (92 m.) with dolphins; Tanker–760 ft. (230 m.) with dolphins. Depth: Barge–10 ft. (3.1 m.); Tanker– 32 ft. (9.8 m.). Tank storage capacity: 595,000 barrels. Receipt and shipment of petroleum products. No bunkering of vessels.

Texaco Pier: Tel. (904) 356-6344. Berth: 550 ft. (167 m.) with dolphins. Depth: 32 ft. (9.8 m.). Tank storage capacity: 320,000 barrels. Receipt and shipment of petroleum products; fuels towboats.

BRIDGES: Only 1 bridge that vessel would have to negotiate and that only if docking at Commodore Point terminal.

STEVEDORES: Master should keep Agents closely advised by radio of ETA and any amendments to first ETA given. Recommended that Master give ETA 72 – 48 – 24 hours in advance to arrival. Enables ordering gangs or cancelling gangs ordered in event of delayed ETA.

MEDICAL: Hospital facilities available. International Vaccination Certificates required by all crew members.

DENSITY: Varies from fresh water 1.000 density to mixed salt water 1.0075 density. St. John's River is fed from fresh water sources and for most practical purposes may be considered fresh.

FRESH WATER: Potable water is available through hose connections at all berths operated by the Port Authority. No water barges.

FUEL: Most grades marine fuels available ranging from bunker "C" to light marine diesels with intermediate blends in between. Most major oil companies have bunkering facilities.

FIRE PRECAUTIONS: No smoking except in officers' lounge and crew's lounge. No open flames. No sparking from funnel.

GANGWAY/DECK WATCHMEN: Watchmen services available but not necessary.

OPENING/CLOSING HATCHES: Crew may open hatches prior to vessel's arrival at dock. After arrival at dockside this work reserved for longshoremen. Vessels equipped with McGregor type or other automatic opening devices, crew may open hatches at any time. Longshoremen do not open and close these type hatches.

CERTIFICATES: Vessel Register, Load Line, Gear Certificate, Derat.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per man. If vessel remains in port over extended period of time, sea stores can be opened under Customs supervision and additional allowances made. Wine/Spirits: No specific limits as to quantity allowed per man; Customs accept Masters' recommendations for allowances so long as they are reasonable. This applies to beers, wines and spirits.

IDENTIFICATION CARDS: Form I-95A only.

CONSULS: Denmark, Dominican Republic, Finland, France, Germany, Guatemala, Italy, Norway, Sweden, Uruguay.

MEDICAL: Ample hospital facilities available. Also doctors, dentists and optometrists.

FRESH WATER: Available.

FUEL: Light fuels only. 2 fuel companies. 24 hour service available.

SURVEYORS: Norm Holm, Box 365, Kodiak. Tel: (907) 486-5616.

DRY DOCKS: None available for large vessels.

AIRPORT: 7 miles. Various flights available depending on time of year. Ferry service available March to December.

POLICE/FIRE/AMBULANCE: Emergency 911, Police (907) 486-3221, Fire & Ambulance (907) 486-5728.

EMERGENCY CO-ORDINATION CENTRE: Coast Guard, Search and Rescue (Kodiak Island) Zenith-5555 anywhere in Alaska. VHF Channel 16.

SERVICES: Gyro compass repairs, radar repairs, all types electronic equipment repairs. Divers available for surveys and underwater repairs.

AUTHORITY: City of Kodiak, P.O.Box 1397, Kodiak, Alaska 99615. *Contact:* George V. McCorkle, Harbour Master, Tel: (907) 486-5438.

LAKE CHARLES, Louisiana: 30.13 N. 93.15 W.

(See Plan Book)

PORT LIMITS: Buoy No. 26, In Calcasieu Ship Channel, 3 miles off Cameron, Louisiana.

DOCUMENTS:

U.S. Customs: If foreign cargo on board for discharge at any port:

3 copies of Cargo Manifest of all Cargo.
3 copies of Crew List.
3 copies of Store List.
3 copies of Curio List (crew personal effects).
3 copies of Passenger List if carrying passengers.

If vessel in ballast, only 2 copies of above documents required.

If vessel in ballast and carrying passengers, 3 copies of above documents required.

1 copy of Clearance from last port.
2 copies of Customs Form 1300 (Master's Oath).
2 copies of Customs Form 1301 (General Declaration).

U.S. Customs Boarding Officer must examine Load Line Certificate, Safety Equipment Certificate, Tonnage Tax Receipt, Certificate of Financial Responsibility (Oil Pollution), Ship's Register, an Ship's Certificate of Nationality (if any).

2 copies of Customs Form 721 (Inbound Utilization Report).
1 copy of Certified Crew List (If American Ship).

Bonded lockers will be sealed by Customs.

U.S. Immigration:

1 copy of Visaed Crew List from Amecican Consul at foreign port of clearance (if any).

1 I-95 (Identification Card) for each crew member on board.

All passports must be validated for each crew member.

U.S. Bureau of Etomolgy:

All meat lockers and freezers with restricted meat will be sealed. All fruit from prohibited countries will be confiscated. All animals or birds from foreign countries must remain on board.

PILOTAGE: Radio Agent ETA, who will arrange Pilot board at Calcasieu Bar.

ANCHORAGE: At Calcasieu Bar only.

RESTRICTIONS: Entrance channel 40 ft. depth. Distance 40 miles.

During LNG/LPG movements, special restrictions may be placed on the waterway by the local Coast Guard Captain of the Port.

MAX. SIZE: 1,000 ft. length, 38 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first USA port (Albany).

RADIO: Tropical – New Orleans, WNU.

VHF: Pilots may be contacted on Channel 12, 13, 65 and 66.

TUGS: Meet vessel 30 minutes away from berth. Use tugs' own lines. 2 for berthing, 2 for unberthing.

BERTHING: General Cargo Berths: 10 with total length: 5,675 ft. All have draft of 36 ft. (fresh water).

CRANES: Mobile pneumatic and track cranes available with lifts up to 50 tons.

BULK HANDLING FACILITIES: 3 bulk-loading berths: No. 1, West bank of Calcasieu River, 8 miles below main port facilities, 1,200 ft. length, 40 ft. depth, loading rate 1,600 t.p.h. Clam bucket type ship unloading crate, unloading rate of 600/800 short tons per hour.

No. 2, Contraband Bayou Section, main port, 920 ft. length, 35 ft. depth, loading 480 t.p.h. 16,000 long tons storage facilities.

No. 3, Contraband Bayou Section, main port, 320 ft. length, 35 ft. depth, loading rate (bulk rice) 180 t.p.h. from stationary tower. Twin 1,250 tons storage tanks adjacent.

No. 4, Bulk unloading facility, length 850 ft., depth 30 ft. Barite and petroleum coke unloaded, rate 250 t.p.h.

SPECIALISED CARGO HANDLING FACILITIES: 1 berth suitable for Roll-on/Roll-off traffic. 2 berths at main port for liquid chemicals, No. 5 for creosote oil import and No. 6 for import/export. Private berth for private company for receiving LNG.

BRIDGES: One bridge with vertical clearance of 135 ft.

STEVEDORES: Notice of firm ETA and request for gangs must be received prior to 1600 hrs. CST for work following day.

TANKERS: Citgo Petroleum Corp. B-Dock, 673 ft. length, 36 ft. depth; C-Dock, 660 ft. length, 34 ft. depth; D-Dock 665 ft. length, 36 ft. depth. Also see "Shipmasters Report No. 1".

Continental Oil Co. Berth 1, 1,000 ft. length, 40 ft. depth; Berth 3, 1,000 ft. length, 40 ft. depth.

PPG, 700 ft. length, 40 ft. depth.

Olin Mathieson Dock: 400 ft. length, 28 ft. depth. Also see "Shipmaster's Report No. 2".

MEDICAL: Hospital facilities available.

DENSITY: Salt water in Summer, fresh water in Winter. Allow density 1000 for drafts.

FRESH WATER: Available at all berths.

FUEL: Bunker "C" and diesel available at Cities Service berths; other berths served with bunkers by barge.

FIRE PRECAUTIONS: Usual precautions.

DRY DOCKS: None.

SURVEYORS:

1. Cargo inspectors are available.
2. Surveyors are available.

GANGWAY/DECK WATCHMEN: Not required.

HATCHES: Rigging performed by stevedores. McGregor-type hatches opened by crew, others by stevedores.

CARGO GEAR: Shore cranes available at ship's request.

CUSTOMS ALLOWANCES: At the discretion of Customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

REPAIRS: Small repairs carried out only; very limited facilities.

REPATRIATION: Facilities exist. Arrange through Agent.

AIRPORT: 7 miles from port. 2 lines (OQ, HY) 26 flights per day.

TIME: CST, that is GMT minus 6 hours.

HOLIDAYS: Only 2 days affected on which no work carried out – Labour Day and Christmas Day.

POLICE/AMBULANCE/FIRE: Police or Fire, 911. Fire only 491–1350. Police only 491–1311. Ambulance 433–1677, 433–1707 and 433–1668.

EMERGENCY CO-ORDINATION CENTRE: United States Coast Guard, Sabine, Texas. Tel: (713) 971–2361.

TELEPHONES: None on board ship.

SHORE LEAVE: Allowed if not detained by Immigration.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.

BANKS:

Calcasieu Marine National Bank, 844 Ryan Street, Lake Charles, Louisiana 70601.

First National Bank of Lake Charles, 3401 Ryan Street, Lake Charles, Louisiana 70605.

Gulf National Bank, 825 Ryan Street, Lake Charles, Louisiana 70601.

Lakeside National Bank, One Lakeside Plaza, Lake Charles, Louisiana 70601.

American Bank of Commerce, 1011 Lakeside Drive, Lake Charles, Louisiana 70605.

National Bank of Commerce, 535 Kirby Street, Lake Charles, Louisiana 70601.

STORING: See "Prelims" page viii.

1. Vessel can be stored by barge or truck.
2. Vessel can be stored during loading/discharging as long as it does not interfere.
3. Trucks can proceed alongside berth.
4. Forklifts can be used on docks.
5. No customs regulations for United States stores.
6. Longshoremen must be employed to assist in storing.

SHIP SUPPLY SERVICE: *Offshore Waters Personnel Transfer:*

Air: ERA Helicopters, Inc., P.O.Box 6566, Lake Charles, La. 70606. Tel: (318) 478-6131.

Boat: McCall Boat Service, P.O.Box 186, Cameron, La. 706431. Tel: (318) 775-5685.

Inland Waters Personnel Transfer:

Land and Water: Port Shuttle, Inc., P.O.Box 1772, Lake Charles, La. 70601. Tel: (318) 433-1613.

DELAYS: Very few delays encountered at any berth.

DEVELOPMENTS: Transit Shed No. 15 being enlarged.

SHIPMASTER'S REPORT No. 1: 1977.

Cities Services Oil Co., Clifton Ridge:

Location: Lat. 30° 09′ 32″ N., Long. 93° 19′ 30″ W.

Max. Size: Length 805 ft., beam 115 ft., draft 39 ft. (FW).

Density: 1005.

Restrictions: Vessels may berth and unberth at any stage of the tide day or night.

Anchorage: At Bar: 2 miles East of seabuoy in depth of 42 ft. For Bunkering: South of Clooney Island in Old Calcasieu River Channel in midstream.

Distance to Berth: Seabuoy to berth 45 miles.

Terminal Information: 2 × 10 in. Chiksan arms. Max. discharge pressure 150 p.s.i. Derricks not required. Accommodation ladder not required.

Services: Fresh water, provisions, fuel oil, diesel and lube, doctor, hospital, airport and laundry.

The following services are not available: Repairs, drydocks, Lloyd's Surveyor and slop tanks.

Telephone Numbers: Dock 318-583-2432. Terminal Supervisor 318-491-6121, 318-491-6437.

SHIPMASTER'S REPORT No. 2: 1979. Olin Chemical Berth.

Approach: If without Loran "C" or satellite navigator the approach at night can be awkward, best made in daylight.

Due to flat coastline, lack of European navigation aids (Decca and Racon) plus numerous oil rigs the entrance to Calcasieu River (like Sabine) is difficult to make.

Calcasieu and Sabine D/F good.

Numerous oil rigs South of buoyed channel which are either side of safety fairway. This corridor can be clearly seen on radar and provides a good longitude.

The soundings, in particular the 100 fathom line, give a good latitude.

The wreck buoy on chart 975 – (Approach to Calcasieu River) at Lat. 29° 19.5′ N., Long. 93° 12′ W. has been removed.

'CC' buoy was picked up at 6 miles.

Pilot/Channel: (B.A. chart 975). The channel is easy to follow as long as US system of buoyage is remembered. Vessels under 30 ft. can go out of the channel on their starboard side leaving starboard hand buoys to port. This is quite in order up to Pilot Area No. 1. Do not go on port side or West as this is spoil ground.

A Westerly current sets across channel 90% of the time and up to 1 knot. The boarding area is as Vol. No. 6 ALRS. If vessel takes a Pilot at Area No. 3 it costs $300 more than No. 1 (not necessary unless vessel restricted by draft – 24 hour service).

Pilot boat is an ex-fishing cutter. White, very fast and strong. Minimum notice for Pilots: Boarding at Area No. 1 four hours, Area No. 3 six hours. For sailing from Lake Charles 2 hours. From Area No. 1, one Pilot to Lake Charles, from Area No. 3, two Pilots. Pilot will *not* use hoist.

VHF: Calcasieu Pilots Channels 12, 13 and 16. Difficult to contact pilot station until well into channel North of 'CC' buoy.

Public Correspondence: Several stations in area – Port Arthur, Cameron, Erath, Lake Charles, a number, notably Erath and Lake Charles have the 80 Channels which they use in preference to 20 Channels. Very busy, but if you search around you can get through fairly quickly. As with all U.S. Marine Operators, overseas ships have difficulty if not calling 'Collect'.

Calcasieu Channel: About 35 miles to Lake Charles from breakwaters. 5 hours from Pilot Area No. 1 to 'Olin' Chemical Dock.

With Northerly wind and heavy rain on ebb, a current of up to 5 knots at Cameron at entrance just North of breakwater.

Bridge: Highway 102 gives 135 ft. clearance HW. 3.75 hours North of breakwater.

Draft: Max. transit draft of 38 ft. 6 in. (FW) from No. 30 buoy to Lake Charles Docks. We consistently had 39 ft. on echo sounder.

Tugs: 2 tugs of 2,500 h.p. and 3,200 h.p. secure in American style, port side, at bridge 102 and leave in same area.

Berthing: Olin Chemical.

Dock: At head of seagoing navigation at bridge interstate 10. In cut, so no traffic passing. New concrete pier upgraded from barge dock. Min. depth 30 ft. Head in, starboard side to. Vessel left at 0200 hrs. without difficulty.

Moorings: 3 headlines, 2 breast lines and 2 springs each end. Springs go on to bollards on the jetty and breast lines and stern lines on to hooks on the bank.

Cargo Hoses: 8 in. × 300 ASA and spool piece to 12 in. × 150 ASA. 3 lengths, ship connects. Takes about 1 hour to connect and disconnect.

VRL: No.

Venting: No, on shore there are detectors on the tanks for ammonia. Generally the wind is onto the works which makes the detection of venting immediate. Vessel has to wait for a change of wind from the North.

Samples: Taken by chemist of tank atmosphere before loading. Must have min. 97% NH_3 by volume before loading.

Rate: Max. 330 t.p.h. (15 minutes of notice if possible, to stop).

Nitrogen: Available but not for hose purge.

Fresh Water: Water on berth very acid. Difficult to get hold of fresh water barge.

Stores: Ship's crane can reach end of jetty. Also small crane on hose platform on jetty which can be used for stores. Lorry cannot get to ship's side.

Gangway: No difficulties. Some ships have to use pilot ladder.

Developments: LPG dock at Beacon 85/86 about half way up the canal owned by Citgo Petroleum Corp. Good mooring facilities. 1 Chicksan. Dredged area 1,000 ft. long, 45 ft. deep.

AUTHORITY: Lake Charles Harbor and Terminal District, Port of Lake Charles, 150 Marine Street, P.O.Box AAA, Lake Charles, Louisiana 70602. *Tel:* (318) 439–3661. *Telex:* 50–2449. *Contact:* James E. Sudduth, Port Director.

LONG BEACH, California: 33.45 N. 118.13 W.

(See Plan Book)

DOCUMENTS:

Certificate of Registry.

International Load Line Certificate – Tonnage Certificate (Admeasurement).

Inspection Certificate.

Derat Certificate.

Radio Safety Certificate.

Inbound cargo for discharge – United States must have a Travellers' Manifest (Form 7527), original manifest, and dock inspection copy covering cargo to be discharged at first U.S. port of entry, Custom's Utilization Form 1302 (Inbound), Form 1302A (Outbound) must be filed within 10 working days after vessel's entry at first U.S. port. Landing permits must be made out prior to arrival (Form I-95) for each crewman of alien origin for the U.S. Department of Immigration (and Form I-418 for each passenger of alien origin). 3 sets of crew lists (Form I-418) must be presented to U.S. Customs, plus 2 sets to the Immigration Inspector, and 1 for the U.S. Public Health Service (Quarantine), and 3 sets stores lists plus 3 sets curio purchases list for U.S. Customs.

American Ships from Foreign Ports:

Safety Equipment Certificate.

Cargo Ship Safety Construction Certificate.

Customs Form CF 226 Affidavit of Repairs Abroad.

Certified Crew List.

Foreign Ships:

1 copy of Visaed Crew List for Immigration (Form I-418 & 5 copies). Other forms may be necessary under certain circumstances, but normally can be taken care of after the vessel's arrival.

If a foreign vessel from a foreign port departs for a foreign port, 2 copies of (Form I-418) covering crew changes in the United States must be submitted to the Department of Immigration upon sailing of the vessel.

(a) Number of copies required: all single except as noted.

(b) The reports mentioned above are all government laws, requested by U.S. Customs, U.S. Immigration, Department of Agriculture, Public Health Service, and B.I.A.

(c) Purpose of documents: to record all vessel movements such as cargo, crew changes, health standards, etc.

(d) Procedure of presenting documents: documents must be presented to Quarantine Boarding Officer and Customs Broker and/or Agent, during or immediately after Quarantine.

PILOTAGE: Pilots ordered by local Agents. Order placed by telephone to 435-6354/5. Local tariff requires 1 to 2 hours notice prior to arrival. Pilot Station contacted on VHF radio Channel 12 (156.6 MHz) or Channel 16 (156.8 MHz). Call sign KMA – 372 Long Beach Pilots. Pilot boats motor cruisers, light grey, fly International Flag "H". Local whistle signal for a Pilot on ship's whistle, 1 short and 1 long blast. Pilot boat normally meets vessels in vicinity Long Beach Sea Buoy or approximately 1 mile South of breakwater entrance. Vessels should have a Pilot ladder on starboard side, weather permitting. In bad weather vessels may be required to proceed inside breakwater entrance prior to Pilot boarding. Pilot boat on VHF Channel 13.

ANCHORAGE: Preferably outside anchorage approximately 0.5 mile S.E. of Long Beach Sea Buoy in 66 ft. of water. Inside anchorage available N.E of channel in outer harbour at approximately 8 fathoms of water depth. Special explosive anchorages available by request, on both sides of entrance channel in 48 ft. of water.

U.S. Coast Guard Anchorage Regulations:

1. The Master of every vessel upon anchoring shall notify the Captain of the Port giving vessel name, anchorage number and time anchored.

2. The Master of every vessel upon departing anchorage shall notify the Captain of the Port giving vessel name, anchorage number, time underway and destination; i.e., bound for sea or for berth number.

RESTRICTIONS: Vessels with dangerous cargoes aboard or loading or discharging such cargo within port district shall obtain permit from U.S. Coast Guard, countersigned by Long Beach Fire Prevention Bureau and Long Beach Port Authority, subject to safety inspection prior entry to assigned anchorage or berth. (Application for entry or handling dangerous cargoes must be requested by Steamship Company or authorised Agent and approved prior entry.)

Also see "Tankers" last paragraph.

MAX. SIZE: (1) Designed depth of water at general cargo berths is 30 ft. – 36 ft. at MLLW.

The Entrance Channel is maintained at 60 ft. MLLW.

(2) No restriction as to length or breadth of vessel at general cargo berths.

(3) Dry bulk facility berths designed depth at MLLW is 40 ft. to 50 ft. No restriction on length. However, ships with over 130 ft. beam might experience some difficulty in loading without turning ship.

There are 5 bulk oil facilities, 2 with 55 ft. of water at MLLW and 3 with 37 ft. to 49 ft. of water at MLLW alongside berths. It is feasible that vessels over 1,000 ft. in length could use the deep-water oil facilities. There are no restrictions as to beam.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Los Angeles Quarantine Station.

QUARANTINE: Quarantine Station, U.S. Public Health Service, 200 World Way, L.A. International Airport, Los Angeles, CA 90045, Tel: 215-2365. Hours: 0600 – 1800 hrs. regular boarding hours. 1800 – 0600 hrs. overtime boarding hours.

STANDARD PROCEDURE FOR MARITIME BOARDING

Dockside Boarding: Vessels subject to Quarantine Inspection are normally boarded upon arrival in berth.

A vessel crewman should be stationed at the gangway to prevent any crew member from going ashore and shore personnel from coming aboard until the vessel has been passed by the Quarantine Boarding Officer.

Vessels are boarded at anchor.

Boarding in the Stream: Vessels are boarded at anchor:

Only if ship is to be at anchor for some time, such as waiting berth, etc. Or upon special request by the ship's Agent.

Effective July 1st, 1973, Radio Pratique as a method of quarantine clearance was discontinued at all ports under control of the United States. Changes in regulations, policies, and procedures concerning Maritime Public Health Clearance has been promulgated.

Vessels Subject to Routine Inspection: Only vessels in the following categories will be subject to on board Public Health Inspection upon arrival at ports under control of the United States:

A. Vessels which, during the 15 days prior to arrival in the United States, or since the last U.S. port (whichever period is shorter) have or have had on board among passengers or crew any of the following conditions or illness signs or symptoms:

1. Temperature of 100°F (38°C) or greater (a) which persisted for 2 days or more; or (b) which was accompanied or followed by any one or all of the following: rash, jaundice, glandular swelling; *or*

2. Diarrhoea severe enough to interfere with work or normal activity; *or*

3. On board occurrence of death, regardless of the signs and symptoms above.

B. Vessels which have been in a smallpox infected country during the 15 days prior to arrival in the United States.

C. Vessels which have been in plague infected country in the 60 days prior to arrival in the United States.

Procedures: Vessels in any of the categories A, B or C above will be granted Provisional Pratique and boarded upon arrival for inspection. In addition, vessels boarded for quality control may be boarded upon or subsequent to arrival. IN ACCORDANCE WITH REGULATIONS YOU MUST INFORM THE QUARANTINE STATION, THROUGH YOUR VESSEL AGENT, AT OR NEAREST THE INTENDED PORT OF YOUR VESSEL'S FIRST ARRIVAL IN THE UNITED STATES OF THE OCCURRENCE OF ILLNESS AS SPECIFIED IN A ABOVE. Based on information you provide your Agent, or information your Agent already possesses regarding your vessel's itinerary, your Agent will notify the Quarantine Station if your itinerary included a smallpox or plague infected country.

ARRIVING VESSELS NO LONGER NEED TO COMPLETE A MARITIME PUBLIC HEALTH DECLARATION UNLESS BOARDED FOR INSPECTION AS DESCRIBED ABOVE. THE BOARDING INSPECTOR WILL PROVIDE THE DECLARATION.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Station KOU Marine Operator, San Pedro.

Channel 1 — ship transmit on 2009 kHz
ship receive on 2566 kHz

Channel 4 — ship transmit on 2126 kHz
ship receive on 2522 kHz

Station KOU also monitors Channel 16 (156.8 MHz) and Channel 26 (157.3 MHz) for distress, safety and calling.

RADAR/VHF: Radar service provided to vessels only if Pilot aboard, in which case radar advisory information will be fed from shore-based radar at Pilot Station.

Station	*Channel*	*Frequency* (MHz)
Distress, Safety and Calling	16	156.8
Marine Exchange	12	156.6
	14	156.7
Long Beach Pilots	12	156.6
Los Angeles Pilots	14	156.7
Harbour Tugs	65	156.275
	77	156.875
Crowley Towing & Transportation "Red Stack Tugs" Company Office	10	156.5
Pacific Towboat	19A	156.95
U.S. Water Taxi	9	156.454
Universal Marine	10	156.5

San Pedro Telephone	26	157.3
Marine Operator	24	157.2
Station KOU	26	157.3
Mandatory Bridge to Bridge	13	156.65

TUGS: Tugs will meet vessel inside breakwater prior reaching inner harbour area. Pilot and tugs are in communication.

BRIDGES: No restrictions into Port of Long Beach. The Gerald Desmond Bridge over Back Channel has vertical clearance of 155 ft. Cerritos Channel which connects Long Beach through Back Channel to Port of Los Angeles has 2 bridges which must be opened for passage of vessels.

Signal for Opening: 3 long blasts on horn or whistle. During inclement weather, call through a megaphone or loud and distinct stroke of bell.

BERTHING: No requirements as to time of entry providing berthing arrangements have been made with Port Authority. Assignments classified as follows:

Preferential Assignments. Secondary Assignments, Subordinate Right granted for use of Preferential Assigned Berth. Temporary Assignment – temporary permission granted to use certain berth.

Note: All berth assignments shall be held by Assignee subject provisions of Port of Long Beach Tariff as to charges, rates, rules and regulations applicable thereto, and to all of terms, conditions and provisions contained in such assignment.

General Cargo:	*No. of berths*	*Total length* (ft.)	*Depth* (ft.)
Pier A	10	6,312	30 – 36
Pier D	2	1,229	36 – 42
Pier F	4	2,467	32 – 36
Piers 1 and 2	6	3,000	36

BULK HANDLING FACILITIES: *Berth 28 – 29:* Length 993 ft., depth alongside 43 ft. One fixed bulk loading tower with hinged cantilevered boom with 31.5 ft. (9.6 m.) outboard reach and telescopic gravity spout served by 36 in. (91 cm.) inclined, electric belt conveyor system extending from 4 under-track pits. Height of boom above MLLW is 50 ft. at 18° to bottom of boom at spout, 42 ft. at 18° from wharf face, 33 ft. at level position from base of concrete. Maximum loading rate 600 t.p.h. Cargo handled: Borax, coke (250 t.p.h. – 500 t.p.h.), pitch, potash (450 t.p.h. – 500 t.p.h.), soda ash, zinc ash, iron ore, coal, fertiliser and salt cake.

Berths 30 – 31: Length 992 ft., depth alongside 43 ft. Types of cargo handled: steel and iron scrap, pig iron, steel slabs, ore, urea, bauxite, rutile sand.

2×6 in. pipe-lines from Berth 30 to storage tanks. Storage capacity 6.7 million gallons.

Products handled: Tallow, vegetable oils (coconut oil, palm oil, cotton seed oil).

Berths 32 – 33: Length 824 ft., depth 36 ft. Screw type unloader unloads to conveyor system, direct to silos. Highest elevated vert screw – 42.5 ft., lowest elevated vert screw – 38 ft. Max. reach 94 ft. from face of wharf (concrete) 91.5 ft. from PHL. Unloading capacity 600 t.p.h. – 800 t.p.h. Storage capacity 50,000 tons. Cargo handled: Cement. 3×10 in. pipe-lines from Berth 32 to storage tanks.

Berths 210 – 211 (Grain Terminal): Length 1,100 ft., depth alongside 45 ft. (9ft. out). Travelling Gantry ship loader having a loading capacity of 65,000 b.p.h. (travel 432 ft., radius 105 ft.) connected to an overhead shipping gallery and belt conveyor system. This belt conveyor system connects to another transfer gallery extending from the grain elevator and silos (2,225,000 bushel storage capacity).

The grain terminal is equipped with the latest state-of-the-art dust collection system. There is an airveyor system for ship discharging.

Berths 212 – 215 (Bulkloader): Length 2,110 ft., depth alongside 34 ft. Depth 9 ft. off the berth is 40 ft. Breasting camels 20 ft. wide available. Stockpile area 85,682 sq. ft. (7,960 sq. m.). 2 electric, travelling, bulk shiploaders with retractable, straight-line bridge boom having 58 ft. outboard reach-height of 60 ft. above MLLW. Boom equipped with 48 in. electric belt conveyor and a telescopic loading spout with mechanical trimming head. Shiploader travels along rear of face. Bulk materials are handled by 48 in. and 60 in. (Berth 212 – 213 shiploader), electric belt conveyor system extending to shiploader through tunnel reclaim from car unloading sheds and storage areas. Types of cargo handled: iron ore, coke, coal and white products.

Open storage: 225,000 tons.

Covered storage: 270,000 tons.

	Berth 212 – 213	*Berth 214 – 215*
Depth	50 ft.	32 ft. (40 ft. with camels)
Shuttle Boom	Yes	Yes
Single Spout	Yes	Yes
Outboard Reach	58 ft.	77 ft.
Clearance Above MLLW to Spout	48 ft.	65 ft.
Shiploader Conveyor	60 in.	72 in. (2 speed)
Loading Rate (Coal/Coke)	3,500 t.p.h.	5,000 t.p.h.

CONTAINER HANDLING FACILITIES: *Piers B (Berths 12, 13, 17, 18 and 19) and C (Berths 20 – 27):* Length 6,790 ft., depth alongside 37-42 ft. 115 acre container and 4 ro-ro terminals. 4×40 ton container cranes. Storage space for 13,000 TEU containers, 1,000×40 ft. chassis, receptacles for 360 refrigerated units, 7 lane main gate and 6 scales. Terminal leased to California United Terminals.

Berths 227 – 228: Length 1,100 ft., depth alongside 42 ft. A 36.5 acre (26.3 hectares) container terminal leased to Sea-Land Service Inc. This terminal is complemented by a 16.3 acre, (6.6 hectares) container freight station, also leased to Sea-Land. The terminal includes a reinforced concrete wharf, 2 travelling 30 long ton container cranes with 100 ft. span and 115 ft. outreach, surfaced storage area. There is space for storing 3,670 TEU containers, including 242 spaces for refrigerated containers.

Berth 229: Length 750 ft., depth alongside 42 ft. 28.5 acre container terminal leased to Maersk Line. The terminal includes 2 travelling 30 long ton container cranes, plus surfaced area and 84 spaces for storing 2870 TEU containers including 84 spaces for refrigerated units.

Berth 230: Length 750 ft., depth alongside 42 ft. 2×30 long ton, travelling container cranes with 100 ft. span and 115 ft. outreach. Has space for storing 1,784 TEU containers, including 50 spaces for refrigerated containers. Terminal leased to United States Lines.

Berths 232 – 233 – 234: Length 2,300 ft., depth alongside 36 ft., 36 ft., 42 ft. respectively. 4×30 long ton electric, travelling Paceco container cranes, each with hinged cantilevered boom with 113 ft. outboard reach. 8 Paceco 30 – 40 ton capacity transtainers. Has space for storing 6,000 TEU on ground and 2,500 TEU containers on chassis, 264 spaces for refrigerated containers. Terminal leased to International Transportation Service, Inc.

Berths 243 – 244: Length 1,200 ft., depth 42 ft. 2 travelling 40 ton container cranes and 6 ton transtainers. Space for storing 3,600 TEU containers. Complete repair facilities and reefer container pre-trip facility. Terminal leased to Long Beach Container Terminal.

Berths 245 – 246 – 247: Length 2,100 ft., depth alongside 36 ft. (40 ft. at 8 ft. off berth). 3 travelling shore container cranes of 50 tons capacity and 3×40 ton transtainers. Expansion of container freight station provides 88,600 sq.ft. inside storage area. Has space for storing 8,000 TEU containers and 72 refrigerated units. Terminal leased to Pacific Container Terminal.

CRANES: Barge cranes available capacity 45 tons – 275 tons. A U.S. Navy floating crane capacity 385 tons available for hire.

SPECIALISED CARGO HANDLING FACILITIES: *Berths 32 – 33 (Tallow, Coconut Oil):* Length 824 ft., depth alongside 36 ft. 2×6 in. pipe-lines extend from Berth 32 to 9 coconut oil storage tanks, total capacity 7,750,000 lb.; 12 tallow storage tanks, total capacity 48,211,300 lbs. (24,105 short tons). These berths used primarily for handling bulk cement (see "Bulk Facilities").

Berth 34 (Steel, General Cargo): Length 750 ft. Depth alongside 36 ft.

Berths 82 – 83: Length 1,300 ft., depth alongside 38 ft. These berths are shared by Port Auto Terminal No. 1, operated by Toyota Motor Sales and covering 55 acres, and Port Auto Terminal No. 2, operated by the Pasha Group and covering 40 acres. Toyota's facility provides for offices, warehousing, dewaxing, painting, repairing and accessory installation, and storage for automobiles. Pasha's facility furnishes an automobile preparation centre, offices and dewaxing operation, with storage area for automobiles.

Berth 83 (Gypsum, Oil, Gasoline): Length 600 ft., depth alongside 38 ft. Vessels unload gypsum rock into an adjustable, elevated, receiving hopper at pier face, served by an elevated 36 in., electric belt-conveyor system extending to a 60,000 ton capacity dome-roof storage building in rear. Unloading rate 800 t.p.h. – 900 t.p.h. Open storage: 335,075 sq.ft.

Berth 122: Length 600 ft., depth alongside 40 ft. An adjacent 21 acre storage area is available for lumber.

Berth 208 (Bananas): Length 600 ft., depth alongside 40 ft. Max. beam without turning vessel 70 ft. 4 electric, travelling banana unloaders, total capacity 17,000 banana boxes per hour. Electric, belt-conveyor system transfers banana boxes from unloaders to 2 rail car and truck loading platforms and to interior of harbour banana warehouse. Banana warehouse is divided into cold storage and ripening areas. Truck loading platform along West side.

Berth 209 (Salt): Length 550 ft., depth alongside 40 ft. Vessels unload bulk salt into a receiving hopper at outer end of a movable, inclined, 48 in., electric belt conveyor. This conveyor serves an adjustable elevated receiving hopper at outer end of an elevated, 48 in., electric belt-conveyor system extending to a large open storage area in rear. Unloading rate: 800 t.p.h.

Berth 242 (Liquid Bulk): Length 700 ft., depth alongside 36 ft. Storage capacity: 12,920,800 gallons in tanks ranging in size from 6,000 to 3,000,000 gallons. Product handling equipment: the pumping and pipeline system is designed to load and unload products to and from barges, ships, rail cars and trucks. Large, heavy-duty pumps efficiently handle a variety of bulk liquids and bunker fuel.

MEDICAL: Advance notice preferable. Adequate hospital and medical facilities available for providing necessary or emergency care. From information available, Public Health Department may, if required, request certain information prior to granting Free Pratique for inoculations, Vaccination/Fever Certificates.

FIRE PRECAUTIONS: 2 fire boats and 1 fire station; in addition City fire service available.

Special fire precautions required at all berths handling petroleum products or dangerous cargoes. In addition to all applicable provisions of Long Beach Municipal Code, flammable and combustible liquids and flammable gases shall be handled and stored at Marine Petroleum Terminals in accordance with minimum fire safety requirements promulgated by Chief, Department of Fire, City of Long Beach.

TANKERS:
Pier A:
Terminal Operator: Exxon
Cargoes Handled: Petroleum products and bunker fuel
Special Facilities/Equipment: Storage tankage for bunker fuel: 400,000 bbls. Discharge rate: 1,700 to 3,500 bbls. per hour. The Long Beach Marine Terminal is the central pumping station for 55 valve box locations throughout the Harbour.

Berth 209:
Length of Berth: 550 ft. (167.6 m.)
Unloading Platform Height: 10.3 ft. (3.14 m.)
Design Depth of Water at berth: 40 ft. (12.2 m.)
Terminal Operator: Exxon
Cargoes Handled: Petroleum products and bunker fuel
Special Facilities/Equipment: Storage tankage for bunker fuel: 400,000 bbls. Discharge rate: 5,000 bbls. per hour.

Berths 209 – 210:
Length of Berths: 1,123 ft. (342.3 m.)
Wharf Height: 19.1 ft. (5.8 m.)
Design Depth of Water at Berth: 40 ft. (12.2 m.)
Terminal Operator: Namolco – Exxon
Cargoes Handled: Petroleum products and bunker fuel
Special Facilities/Equipment: Storage tankage for bunker fuel: 2,220,000 bbls for Exxon and 66,000 bbls. for Namolco. Discharge rate: 10,000 bbls. per hour.

Berth 211A:
Length of Berth: 240 ft. (73 m.)
Terminal Operator: Exxon
Cargoes Handled: Petroleum products and bunker fuel
Special Facilities/Equipment: Storage tankage for bunker fuel: 400,000 bbls. Discharge rate: 5,000 bbls. per hour. Bunker barge loading facility.

Pier E:

Berths 118 – 119:

Length of Berths:	1,210 ft. (368.8 m.)
Wharf Height:	21.6 ft. (6.6 m.)
Design Depth of Water at Berth:	55 ft. (18.6 m.)
Terminal Operator:	ARCO
Cargoes Handled:	Petroleum products and bunker fuel
Special Facilties/Equipment:	5×12 in. (30.5 cm.), hydraulic-operated, marine swivel-jointed loading arms mounted on elevated steel structure on centre wharf. Discharge capacity is 50,000 bbls. (7,950,00 litres) per hour.

Berth 121:

Length of Berth:	1,100 ft. (335 m.)
Wharf Height:	22 ft. (6.7 m.)
Design Depth of Water at Berth:	65 ft. (20 m.*)
Terminal Operator:	Four Corners Pipe Line Company
Cargoes Handled:	Crude oil and petroleum products
Special Facilities/Equipment:	4×16 in. diameter articulated crude unloading arms and 1×8 in. diameter articulated bunker/diesel loading arm; 275 p.s.i. maximum working pressure; design to accommodate tankers from 50,000 to 265,000 d.w.t. tankers; arms to be FCM Chiksan with hydraulic couplings. Storage tankage available at ARCO facilities in Carson and the inner harbour via 42 in. and 24 in. pipe-lines. *Toe of Slope Depth 76 ft. (23 m.) to allow future dredging of Berth to same.

Berths 82, 83:

Length of Berths:	
Wharf Height:	
Design Depth of Water at Berth:	
Other:	410,000 bbls.
Terminal Operator:	Long Beach Terminal Co.
Cargoes Handled:	Gasoline and Naphtha

Berths 84 – 87:

Length of Berths:	1,972 ft. (601.1 m.)
Wharf Height:	16.3 ft. (5.0 m.)
Open Storage Area:	471,300 sq. ft. (43,784 sq.m.)
Design Depth of Water at Berth:	52 ft. (15.8 m.)
Terminal Operator:	Texaco Inc.
Cargoes Handled:	Crude oil, petroleum products, bunker fuel
Special Facilities/Equipment:	Discharge capacity 32,000 bbls. per hour; 24 in. pipe-line to storage and tank farm. Storage capacity: 245,000 bbls.

The following is part of a letter sent by the Captain of the Port to a tanker operator:

The safety of the port and the VLCC tankers using the harbour for bunkering and provisioning is of paramount concern to the Coastguard. Consequently the following guidelines have been established for all such vessels 200,000 d.w.t. and larger when utilising the Outer Harbour (inside of the breakwater) of the ports of Los Angeles/Long Beach:

a. Vessels may enter or depart the harbour areas inside the breakwater only during daylight if over 56 ft. draft.
b. Minimum visibility of 1 mile is established for vessel movement.
c. Adequate tugboat assistance shall be provided when passing through the breakwater entrances upon entering or departure, and when navigating inside the breakwater to and from anchorages.
d. A qualified Pilot must be onboard when entering or departing the harbour. One way traffic is to be maintained during the VLCC's transit through the breakwater entrance.
e. Vessel must have a 10% draft clearance under the keel when crossing either the Los Angeles or Long Beach entrance.
f. No "dead ship" status will be permitted without prior approval of the Captain of the Port.
g. No vessel with a beam in excess of 200 ft. shall enter either harbour without the permission of the Captain of the Port.

DENSITY: Local water density 1.025 grams per millilitre or pure sea water at all stages of tide.

FRESH WATER: Potable fresh water available all Municipal berths through 2 in. lines. Rental charge for use of each 50 ft. length water hose when furnished.

FUEL: All grades (viscosities) of bunker fuels available in any amount through pipe-lines at most Municipal berths, and by barge at anchor or at berths if desired. Notify quantity and type desired to local Steamship Company or Agent.

GANGWAY/DECK WATCHMEN: Normally used, but only compulsory when detainees aboard.

OPENING/CLOSING HATCHES: Crew can open or close hatches at sea or at anchor. If closed or opened at dockside, the use of longshoremen compulsory.

CARGO GEAR: Employer shall not use ship's cargo handling gear until he has ascertained that vessel has a current and valid Cargo Gear Register and Certificate indicating that cargo gear has been tested, examined and annealed in accordance with requirements of International Labour Organization Convention No. 32.

CUSTOMS ALLOWANCES: Tobacco, each crew member entitled to 300 cigarettes, 50 cigars and 3 lb. of tobacco or combination of above. If the stay in port is such that additional tobacco is required, Customs will so issue. Wine and/or Spirit, not to exceed 1 quart of alcoholic beverage each adult non-resident. This exemption for alcoholic beverages may be applied to more than one kind but not to an aggregate volume of more than 1 quart for each adult crew member.

Note: Upon arrival of vessel from foreign port, or vessel engaged in foreign trade from a domestic port, sea stores and ship's stores not required for immediate use or consumption on board while vessel in port, and articles acquired abroad by officers and members of crew, for which no permit to land has been issued, shall be placed under seal, unless Customs Officer is of the opinion that circumstances do not require such action.

IDENTIFICATION CARDS: U.S. Department of Justice, Immigration and Naturalization Service Form I-95-A (Form I-94 for passengers) must be completed.

CONSULS: (Consul Generals, Consul or Vice-Consul). In Los Angeles. (Area code 213)

REPAIRS: Within greater port area facilities to accomplish all types of deck and engine repairs.

DRY DOCKS: Within greater port area 2 large private commercial dockyards, Bethlehem Shipbuilding and Repair, and Todd Shipyard Corporation with large floating dry docks and repair facilities. Also, 3 large capacity graving docks located at Naval Shipyard available for emergency use by merchant vessels when not occupied by naval vessels.

SURVEYORS:

1. Lloyd's Register (local office), 1328 N. Avalon Blvd., Wilmington, CA 90744, (P.O.Box 575) 90748. Tel: (213) 834 2334.

American Bureau of Shipping, 200 Pine Ave., Suite 415, Long Beach, CA 90802. Tel: (213) 437 6488.

2. Pacific Cargo Inspection Bureau, Pier A, Berth 4, Long Beach, CA 90802. Tel: 435-7861.

Jacobsen and Associates, Inc., 1324 N. Avalon Blvd., P.O.Box 248, Wilmington, CA 90748. Tel: 834-4553.

REPATRIATION: Through U.S. Department of Justice, Immigration and Naturalisation Service, and clearance of personal effects by U.S. Customs.

AIRPORT: Los Angeles International Airport approximately 18 miles from port, and provides regular scheduled and international airline service.

TIME: GMT minus 8 hours. United States observes Daylight Saving Time, begins at 0200 hrs. on last Sunday of April each year and ends at 0200 hrs. on last Sunday of October of each year.

HOLIDAYS: The subject Legal holidays are defined as follows: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (3rd Monday February); Memorial Day (Last Monday May); Independence Day (4th July); Labour Day (1st Monday September); Admission Day (9th September); Columbus Day (2nd Monday October); Veterans' Day (11th November); Thanksgiving Day (4th Thursday November); Christmas Day (25th December).

Notes: (1) Also, every Statewide Election is a holiday.
(2) Also, any other legal holiday that may be proclaimed by State or National authority is a holiday.
(3) When one of the above days falls on Sunday, the following Monday shall be observed as a holiday.

POLICE/AMBULANCE/FIRE: Port of Long Beach – Police 590-7320 (routine), 435-6711 (emergency); Fire Department and Paramedics 591-7631; Harbour Security Officer 437-0043; U.S. Customs 590-2457.

In an emergency and unable to dial direct – dial operator giving telephone number and exact location where emergency exists.

EMERGENCY CO-ORDINATION CENTRE: U.S. Coast Guard, Captain of the Port, 165 N. Pico Ave., Long Beach, CA 90802. Tel: (213) 590-2326.

TELEPHONE: Installation of telephone aboard ship at Municipal berths.
SERVICES: All services from tank cleaning to compass and instrument repair available at various locations within greater port area.
STORING: See "Prelims", page viii.

1. Vessel can be stored by barge or truck by prior arrangement.
2. No restriction on storing from barge while vessel is discharging or loading except when the vessel is handling hazardous cargo, petroleum products or bunkering.
3. Truck can proceed alongside the berth for the purpose of delivering or receiving stores and chandlery supplies.
4. Forklift trucks may be used on the berth to handle stores with approval of the stevedoring company.
5. Custom regulation regarding storing: Stores *not in bond* may be taken on board the vessel on an export declaration certified by the Customs' Inspector on duty. Stores *in bond* must be signed off by the bonded wharehouse on a vessel supply export document and received on board the vessel by the Customs' Inspector on duty.
6. Riggers employed to assist with storing, stevedores or longshoremen assist with the stores on the wharf but the storing on board vessel is done by the ship's crew.

SHIP SUPPLY SERVICE: See "Los Angeles".
SHORE LEAVE: Crewmen allowed shore leave providing necessary application presented to U.S. Immigration Officer is approved and crewmen's Landing Permit issued (Form 5129). Customs declaration required for articles to be landed by crew members (1 quart of alcoholic beverage with seal broken is allowed).
DELAYS: Arrival at berths are normally on time as scheduled. However, there are times of inclement weather or lack of cargo at a berth which create a short delay. Shortage of longshoremen can also cause a delay in discharging or loading cargo. No delay experienced in bunkering.
GENERAL: For information regarding various social organisations, call 436-9041. Long Beach Recreation Department, for information.
DEVELOPMENTS:

(1) The complete containerisation complex consists of 19 cranes, 18 berths and 415 acres.

(2) An Omni terminal – an ultra modern multi-purpose cargo facility handling containers, Roll-on/Roll-off and break bulk cargoes.

AUTHORITY: Board of Harbor Commissioners, Port of Long Beach, P.O.Box 570, (925 Harbor Plaza), Long Beach, California 90801 – 0570. *Tel:* (213) 437-0041. *Telex:* 656452. *Cables:* Portobeach. *Contact:* James H. McJunkin, Executive Director. Stan Westover, Acting Director of Operations.

AGENT: Beaufort Navigation Inc., 100 Oceangate, Long Beach, California 90802. Tel: (213) 437-7933. Telex: RCA 215332 (Int); 698698 (Dom).

LONGVIEW, Washington: 46.10 N. 122.55 W.

(See Plan Book)

DOCUMENTS:

3 Complete Cargo Manifests.
3 Stores Lists.
3 Possessions Lists.
3 Crew Lists on Immigration forms.
Vessel's Documents.
Tonnage Tax Statement.
Quarantine Form completed.

At first port of arrival, ship is boarded and inspected by Customs, Immigration, Public Health and Agriculture officials. At each subsequent port only Customs Agent will board prior to docking.
PILOTAGE: See "General – Pilotage" before first U.S.A. port.
ANCHORAGE: Safe anchorages indicated by Columbia River Pilots.
RESTRICTIONS: None in regard to arrival time or state of tide. Channel depth 40 ft. at mean low water and tidal range varies between 2.5 ft. and 4 ft.
MAX. SIZE: No limitation on length or breadth. Depth alongside 40 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Columbia River Pilots have knowledge of tug positions and other knowledge pertaining to tugs aiding a vessel.
BRIDGES: One bridge crossing Columbia River at Longview has sufficient clearance so as not to present a problem. Clearance 169 ft. – 185 ft. depending on season.
BERTHING: 7 berthing facilities are available at Port Longview, starting adjacent to the Lewis & Clark Bridge and extending upstream for a distance of nearly a mile.

Berths 1 through 4 are located on one continuous wharf 2,350 ft. long. Berths 1, 2 and 3 are equipped to handle general cargo, bulk feed grains, bulk ores, chemicals and petroleum products. 2 gantry cranes serve Berths 1 and 2 and a 600-ton capacity heavy lift is located at Berth 3. These berths are also served by a system of pipe-lines through which petroleum can be received or pumped to vessels. A paved 2.8 acre assembly area fronting Berth 2 is suitable for handling lumber or multi-commodity project shipments. Both gantry cranes can be used at this facility. 3 transit sheds and 1 gear locker are located near the three berths which are also served by 1,500 ft. of surface track on the wharf apron plus 2 spur tracks under the gantry cranes.

Berth 4 is used for receiving and shipping grain and is served by a 5 million bushel grain elevator operated by the Continental Grain Company. The overhead grain gallery extending along the wharf is served by 6 gravity-fed loading spouts. A marine leg located at the inland side of the wharf is used for unloading grain barges.

Berth 5 is a 515 ft. wharf being converted to an exporting facility for the shipment of bulk chemicals. It is also available for the loading of logs using ship's gear from the water side of the vessel, and handling barges.

Berths 6 and 7 form a continuous wharf 1,500 ft. long. The ship-side container crane is located at Berth 7, with a 50 ton gantry crane at Berth 6. Both cranes are rail mounted. An open cargo handling area of 54 acres is located adjacent to the 2 berths. On the dock is one large transit shed (100,666 sq.ft.) and a gear locker. 3 rail tracks are located along the length of the apron. There is a rail spur on the inland side of the transit shed.

With the exception of the grain elevator facility, Port Longview operates its own facilities and performs all terminal services between ship's tackle and consignees or inland carriers.

In addition to these facilities operated by the Port, there are 9 other berths operated privately in the Longview Port District. Weyerhaeuser Company owns 6 berths and Reynolds Metals Company, International Paper Company and Longview Fibre Company each operate 1 berth apiece. 6 of the 9 berths are used primarily for export while the other 3 are used mainly for receiving raw materials used by the mills.

BULK HANDLING FACILITIES:

Containers: Port Longview's container facility centres around a 30 long ton, electrically operated, rail mounted crane.

The crane has a rated lifting capacity of 30 long tons below the spreader and 37 long tons below the cargo beam. The telescopic spreader can be adjusted to handle 20 ft., 27 ft., 35 ft. and 40 ft. ISO/Sealand containers. It is designed to handle 20 load/discharge containers per hour.

The boom can be raised and lowered to provide clearance of ship superstructure and is designed for through-leg rapid load-handling.

With an outreach of 124 ft. from the waterside rail and a vertical reach of 110 ft., the crane can service Panamax size vessels.

Utilizing a unique "trailer-train" system, a continuous flow of containers can be maintained between storage and staging areas to sustain loading/unloading operations.

A 40-acre area located behind Berth 6 – 7 is being improved for use as a container storage yard.

Containers received from the vessel can be immediately inspected and rerouted either to warehouses for devanning or to rail or truck for ongoing movement. Export containers are staged to the vessel in loading sequence in the adjacent cargo assembly area.

Grain: The Continental Grain Company operates the 5,165,000 bushel capacity grain elevator at the Port of Longview Terminal.

Pellets/Coke/Fertilizer: Port Longview has three dry bulk shipping facilities. Sugar beet pulp pellets are loaded at Berth No. 1 through a 600 t.p.h. loader.

A "portable" belt conveyor and loader for handling bulk dry products (200 t.p.h.) is available at Berth No. 3.

Atlantic Richfield Co. uses a calcined coke storage/loading facility at Berth No. 5.

Two portable hoppers with belt conveyors are available to handle inbound free flowing dry bulks unloaded by ship's gear or dock Whirley cranes equipped with clams.

Roll-on/Roll-off: A 240 ft. extension to the upstream end of Berth 7 to accommodate Roll-on/Roll-off vessels is available at the Port of Longview. 96 ft. of the extension are constructed at a level 8 ft. lower than the remainder of the dock and serves as the loading/unloading area to accommodate a Ro-Ro vessel's stern ramp.

CRANES: 2 electric-powered gantry cranes serve Berths 1 and 2 on 550 ft. of track. They are readily adaptable for handling various types of bulk cargoes, containers, logs, machinery and large equipment. 1 crane is equipped with a 130 ft. boom and has a capacity of 60 tons at a 45 ft. radius. The other crane has a 120 ft. boom with a 50 ton capacity at a 45 ft. radius. Both cranes are served by two 400 ft. railroad tracks permitting direct handling between rail cars and vessels.

A third gantry crane serves Berth 6 on 500 ft. of track. This crane has a 165 ft. boom with a capacity of 50 tons at a 45 ft. radius. 2 × 1,000 ft. rail tracks are located between the crane tracks for handling rail cars at shipside.

The 'Columbia Giant', a 600-ton capacity shore-based crane located at the port, is one of the largest capacity lifting facilities on the West Coast. The twin booms of the derrick reach 130 ft. above the dock and have a tested lifting capacity of 660 tons. The blocks can be hoisted separately or in tandem. The lifting system is certified by Federal and State agencies and has passed for safety requirements for heavy lifting of AEC controlled projects. The 'Columbia Giant' is available for single lifts ranging from 65 short tons up to its rated capacity of 600 short tons.

Also see "Berthing" – Berth Nos. 6 and 7.

STEVEDORES: At least 24 hours notice necessary to arrange gangs before ETA. Arrange through Port Office via Ship's Agent.
MEDICAL: Hospital facilities available.
TANKERS: Petroleum discharge lines consist of 1 × 12 in. and 3 × 8 in. pipe-lines. 1 tanker berth available.
DENSITY: Columbia River is fresh water at Longview.
FRESH WATER: Available through 8 in. line with 2.5 in. connections. Rate of delivery approx. 14.5 t.p.h.
FUEL: Bunker C fuel available through 12 in. line at 850 b.p.h., and light diesel fuel through 8 in. line at 1,200 b.p.h.
GANGWAY/DECK WATCHMEN: Not needed, but arrangements can be made if necessary.
OPENING/CLOSING HATCHES: Work carried out normally by stevedores.
CUSTOMS ALLOWANCES: See "Portland, Oregon".
IDENTIFICATION CARDS: Advisable but not necessary.
CONSULS: At Portland, Oregon.
REPAIRS: Some deck and minor engine repairs are possible at Longview.
REPATRIATION: No facilities for effecting crew changes or repatriations.
AIRPORT: Nearest airport served by regular airlines is in Portland. Charter flights may be arranged from a small local airport.
TIME: GMT minus 8 hours. In addition, clocks are moved ahead 1 hour on the last Sunday in April and returned back 1 hour on the last Sunday in October, at 0200 hrs. local time on those 2 days.

HOLIDAYS: New Year's Day (January 1st); Washington's Birthday (February 22nd); Memorial Day (May 30th); Independence Day (July 4th); Labour Day (first Monday in September); Veteran's Day (November 11th); Thanksgiving Day (fourth Thursday in November); Christmas Day (December 25th). Cargo work can be arranged on most of these holidays.

POLICE/FIRE/AMBULANCE: Police 911; Fire 911; Ambulance 636-3120.

TELEPHONES: Available at dockside.

SHORE LEAVE: Crews allowed ashore if papers are in order.

BANKS: Rainier National Bank and Seattle First National Bank.

Official Language: English.

U.S. Coastguard TWX Address: USCG NLN 58-4197.

The LOOP Inc. deepwater port and associated facilities are designed for unloading crude oil cargoes from deep draft tankers. The marine terminal is located in open waters of the Gulf of Mexico approximately 29 km. (18 statute miles) offshore from the State of Louisiana.

The port is owned and operated by LOOP Inc. under licenses granted by the Government of the United States of America and the State of Louisiana. The port is governed by the laws of the United States in the same manner as if the port were an area of exclusive federal jurisdiction located within a state.

LOOP shall not permit a tanker registered in a foreign state or flying the flag of a foreign state to utilize its facilities unless the foreign state involved, by specific agreement with the United States, has agreed to recognize the jurisdiction of the United States over the tanker and its personnel while the tanker is located within the safety zone of the port, and unless the tanker owner or operator has designated an agent in the United States for receipt of service of process in the event of any claim or legal proceeding resulting from activities of the tanker or its personnel while located within the port safety zone, and unless the tanker owner carries insurance or demonstrates financial responsibility as required by Title 33, United States Code Annotated, Section 1517.

LOOP shall also maintain a list, as provided by the Office of the Secretary of Transportation, of such foreign states that have executed agreements of U.S. jurisdiction.

At the time of nomination of a tanker, LOOP shall require the person nominating the tanker, or his authorised agent nominating the tanker, to provide LOOP with the name and address of the tanker's designated agent in the United States and to present evidence of compliance with the financial liability requirement, as defined by Title 33, United States Code Annotated, Section 1517.

The U.S. Coast Guard's Captain of the Port, whose office is in New Orleans, has governmental authority over all ports in the area, including LOOP.

LOOP's Port Superintendent has overall authority over the marine terminal and port. This encompasses all personnel at the port, including contract personnel, and all vessel and aircraft operations at the port. During emergency conditions all response activities at the port are directed by the Port Superintendent. This includes the shutdown of tanker cargo discharge. Emergency conditions are those that, in the Port Superintendent's judgment, involve or could involve safety, environmental protection, personnel injury or property damage. Examples of these emergencies include, but are not limited to, the following, if they occur at the marine terminal, or on a tanker, or other vessel or aircraft, or at any other location anywhere in that portion of the deepwater port that lies within the safety zone:

(a) Oil spill.
(b) Fire or explosion.
(c) Tanker collision, actual or potential, with another vessel or with the pumping platform complex.
(d) Tanker grounding.
(e) Electrical power failure on the platform.
(f) Disruption of communications between shore and the port.
(g) Aircraft disaster.
(h) Serious illness, injury or death.
(i) Presence of poisonous gas.
(j) Evacuation operation of the platform (usually due to impending hurricane).

The Port Superintendent is present at the port at all times.

ABBREVIATIONS:

AMM	Assistant Mooring Master
ANSI	American National Standards Institute
AST	Atlantic Standard Time (ZD + 4)
CFR	Code of (U.S.) Federal Regulations
CST	Central Standard Time (ZD + 6)
EST	Eastern Standard Time (ZD + 5)
FERC	Federal Energy Regulatory Commission
GCLW	Gulf Coast Low Water (Datum)
GPM	Gallons Per Minute
M	Thousands (used with barrels of oil)
MBH	Thousands of barrels per hour
mi	Miles
MM	Mooring Master
n	Nautical (used with the word *miles*)
NOAA	National Oceanographic and Atmospheric Administration
PLEM	Pipe-Line End Manifold (at the SPM)

PLATFORMS:

Pumping Platform Complex:

The marine terminal pumping platform complex consists of the pumping platform and the control platform. The two platforms are connected by a walkway bridge between the lower decks. The top of the lower deck of each platform is 21.3 m. (70 ft.) above MHW.

The pumping platform measures 61 m. × 65.5 m. (200 ft. × 215 ft.) and contains equipment for receiving, measuring, sampling, controlling and pumping oil to assist in cargo unloading.

The control platform contains a control room manned 24 hours a day for communications, traffic control, monitoring and surveillance purposes. Also, a supervisory control and monitoring system provides the capability for the control room personnel, when so directed, to assume control of all marine terminal processes otherwise normally initiated from the Operations Centre located near Galliano, Louisiana. The control platform is a two-deck structure measuring approximately 21.3 m. × 21.3 m. (70 ft. × 70 ft.). The lower deck contains platform utility equipment and supporting facilities. The upper deck supports a two-level control building.

DOCUMENTS: See "New Orleans".

PILOTAGE: See "Tanker Arrival".

MAX. SIZE: See "Berthing".

TANKER ARRIVAL:

Arriving from Seaward: There is a 63 mile Safety Fairway leading to the safety zone. *Note:* A tanker in LOOP's safety zone shall keep at least 5 nautical miles (9.3 km.) behind any other tanker ahead of her in the safety zone. The Mooring Master and Assistant Mooring Master will normally board and the Mooring Master will be on the bridge prior to the vessel entering the safety zone. The arrival time for a tanker is recorded as the time and date the inbound tanker arrives at the boundary between the safety zone and the safety fairway. *Tankers are not to enter the safety zone or proceed to the anchorage unless a Mooring Master is on board and the tanker is cleared by the Vessel Traffic Controller.*

Weather permitting, the tanker should have on her port side a pilot ladder and, when so instructed, an accommodation ladder properly prepared for use by the Mooring Master and Assistant Mooring Master. The mooring and connecting equipment supplied by LOOP is normally handled on the port side, so the tanker's port derrick should be topped and rigged in preparation for lifting the equipment aboard and for handling the hose after mooring. The derrick block should be plumb with the tanker's rail at the manifold centreline. Tankers are asked to turn and make a lee in order to allow for a safer boarding and an easier equipment-handling operation.

Speed:

(a) Specific tanker speeds will be recommended by the Mooring Master to the vessel.
(b) Tankers should not exceed the minimum speed necessary to maintain steerage. Inbound tankers shall not enter or be underway in the terminal section of the safety zone at speeds exceeding 3 knots through the water.
(c) Tankers departing in ballast shall not exceed 10 knots through the water anywhere in the safety zone, and shall not exceed such lesser speed as what may be determined prudent by the Mooring Master because of other vessel traffic or prevailing sea or weather conditions.

Proceeding into the Safety Zone: After the Mooring Master is aboard, the tanker may proceed under his guidance into the safety zone, either to the designated anchorage or to the assigned berth for mooring. The shipper and tanker owner shall be responsible and liable to LOOP for any damage or injury done by his tanker to any LOOP facility, equipment or personnel. Services of the Mooring Master, Assistant Mooring Master, mooring launches and their crews, and such other LOOP personnel as may be required aboard the tanker are provided with the express understanding that the Master of the tanker has and accepts the ultimate responsibility for the tanker and crew.

If it becomes necessary for the Master of a tanker to disregard a Mooring Master's advice in order to ensure the safety of his ship, it is requested that a written report from the Master be submitted promptly to LOOP.

Tanker Boarding by Mooring Master and Assistant Mooring Master: Specific instructions are communicated to each arriving tanker for bringing aboard the Mooring Master, Assistant Mooring Master, port-furnished equipment. Basic procedures for proceeding to a mooring, are as follows:

(a) The Vessel Traffic Controller advises the tanker of the Mooring Master's boarding point and of equipment to be made ready prior to arrival of the tanker at the boarding area. Included is advice for preparation of an accommodation ladder and/or pilot ladder and equipment hoist.

(b) The Mooring Master and Assistant Mooring Master will board the tanker, and port furnished equipment is picked up by the tanker prior to arrival at the boundary between the safety zone and the safety fairway. The boarding area is usually at the North end of the safety fairway where it turns and joins the approach section of the safety zone. The entrance to the safety zone is marked at the lateral boundaries by buoys 1 and 2.

Also see "General" – Helicopter Transfer.

(c) Equipment brought aboard the tanker for use in the mooring arrangement is transported to the tanker's bow by the tanker's personnel. Supervised by the tanker's designated officer, and advised by the Assistant Mooring Master, tanker personnel prepare and arrange the tanker's mooring equipment and fittings for the mooring operation to the satisfaction of the Assistant Mooring Master and tanker's Master.

Navigational Assistance: During the mooring operation the Mooring Master and the Assistant Mooring Master perform the following functions:

(a) The Mooring Master advises the tanker's Master on operational and ship control matters and regulations that are peculiar to the port, such as navigational aids, location of crude oil and gas lines in the area, depth and current characteristics of the manoeuvring area during existing conditions, mooring equipment and procedures, and the port's vessel control procedures. The Mooring Master will maintain communications with the Vessel Traffic Controller, mooring launches and the Assistant Mooring Master until the mooring operation has been completed.

(b) The Assistant Mooring Master is stationed on the forecastle of the tanker during mooring operations to assist the Mooring Master by reporting position approach data relative to the SPM and to advise the tanker's personnel in the handling of mooring equipment peculiar to the port.

Vessel Routeing and Approach to Moor: Tankers enter and depart the port via the approach section of the Safety Zone with the assistance of the Mooring Master aboard the tanker. *Prior to entry into the safety zone, anchors must be housed and windlass brakes must be checked for absolute tightness in order to prevent the anchors from being accidentally dropped, with resultant damage to submarine pipe-lines.*

Transiting the Approach Section and Anchorage Section: The Master of the tanker, a competent deck watch officer and a competent helmsman must be on the bridge at all times while the ship is manoeuvring in the approach section and anchorage. A competent deck officer is to be on the bow along with one seaman as lookout, who is capable on command of letting go the anchor, if necessary. A watch engineer and sufficient crew to operate the power plant shall be in the engine room.

Transiting the Terminal Section and Approach to Moor: The Master of the tanker, a competent deck watch officer and a competent helmsman must be on the bridge at all times while the tanker is transiting the terminal section of the Safety Zone and approaching an SPM to moor.

A competent deck officer is to be on the bow along with one seaman as lookout. Sufficient qualified engineers should be in the engine room to operate the plant properly and safely.

Anchor Watch: While the tanker is at anchor in the anchorage section of the Safety Zone, a competent deck officer shall be stationed at all times on the bridge to watch for any dragging of the anchor which can be detected by taking radar ranges or rounds of bearings as necessary on the pumping platform or on any other fixed object.

Manoeuvring Capabilities: LOOP SPM buoys are located on a radius of 2,438 m. (8,000 ft.) from the Marine Terminal Pumping Platform Complex, with spacing between buoys of 1981.2 m. (6,500 ft.). Tankers must have the capability to perform the manoeuvring required to approach and depart from an SPM within an area not greater than 1,524 m. (5,000 ft.) radius from the buoy at speeds not exceeding 5.5 km/hr. (3 knots). LOOP may require evidence of a tanker's capability to approach and enter the safety zone. The Mooring Master may determine this by pre-berthing checks of a tanker's manoeuvring characteristics.

Berthing Order: LOOP reserves the right to take tankers in an order that will meet operational and crude oil compatibility requirements at LOOP's storage, although normally tankers are taken in the order of their position in the queue. Generally, positions in the queue are determined by LOOP based on an arrival window. If LOOP takes a tanker out of the queue for operational reasons, it will be done in accordance with LOOP's published Rules and Regulations, which are available on request from LOOP.

VESSEL REQUIREMENTS:

Navigation Equipment: Any vessel calling at LOOP must meet the U.S. Coast Guard navigational equipment requirements for a vessel entering U.S. waters; i.e. Part 164.35, Title 33, of the United States Code of Federal Regulations. Coast Guard personnel will board selected arriving vessels to ensure compliance with Federal Regulations.

Pre-arrival, Connection and Transfer:

Preparations, procedures, tests and inspections to be followed both by the tanker and by the LOOP platform during the pre-arrival time, connection and transfer must meet the requirements of Part 155, Chapter 33, Section 150, Sub-part D, of the United States Code of Federal Regulations, and the recommendations of the OCIMF Safety Guide.

The Mooring Master will have a LOOP check list, which includes a Declaration of Inspection, that shows all the items to be tested or inspected in order to comply with the Federal Regulations and with current OCIMF recommendations. This check list is to be signed both by the tanker's Master and by LOOP's Mooring Master.

Oil Transfer Equipment:

All tankers must meet the requirements of Part 155, Title 33, of the United States Code of Federal Regulations with regard to oil transfer equipment. *Cargo hoses must be connected by the tanker's personnel, under the guidance of the Mooring Master or the Assistant Mooring Master.*

Physical Parameters of Vessel:

Tankers to be accepted by LOOP must:

(a) Have oil transfer equipment that conforms to the technical recommendations of the Oil Companies' International Marine Forum (OCIMF). (Any OCIMF recommendations that change after issuance of this manual are overriding to LOOP's requirements).

(b) Be equipped with shipboard mooring fittings installed and located for safe and effective mooring to an SPM.

(c) Be equipped with a derrick, located near the cargo manifold for hose handling, capable of lifting and sustaining a safe working load of 10 tons to a height of 13.7 m. (45 ft.) above deck level. (ULCCs should have a 15 ton crane because of the extra hose weight due to their greater freeboard).

(d) Not exceed maximum mooring load limitations of SPMs. See "Berthing".

(e) Have serviceable pumping equipment.

(f) Be capable of delivering a cargo size or quantity that is in accordance with LOOP's published Rules and Regulations.

Deck Floodlighting:

Illuminated Locations:

In addition to the light usually displayed, tankers are required to furnish adequate additional lighting for night operations including:

(a) Proper safety lighting of the accommodation ladder for personnel embarkation and debarkation. This is particularly essential for arriving and departing tankers when the Mooring Master and Assistant Mooring Master board or depart the tanker. A deck officer is required to supervise these procedures.

(b) Lighting of the forecastle area.

(c) Lighting of areas encompassing the derricks, deck and water during equipment and hose handling operations.

(d) Lighting to illuminate the cargo manifold.

(e) Proper safety lighting for any bunkering or transfer of supplies or equipment.

(f) Portable or hand-held safety lanterns for inspections and other deck activities that may require particular attention.

Type of Equipment: Only explosion-proof lighting equipment and electrical apparatus certified intrinsically safe for use in a hazardous area is permitted to be used on deck while a tanker is at an SPM. Portable electric lamps or other apparatus with flexible cable shall not be used without permission from the ship's officer-in-charge and from the responsible LOOP representative aboard the tanker. In this regard, the recommendations of ISGOTT paragraph 2.4.2 should be followed.

Accommodation:

Tankers discharging at LOOP must provide meals and accommodation for the Mooring Master and the Assistant Mooring Master during their time on board and for an independent Petroleum Inspector during his required time on board. In addition to these men there is at times a United States Coast Guard Inspector, who also may need accommodation.

NAVIGATION AIDS:

SPM Buoys: In addition to the port name "LOOP" and an SPM number, each SPM buoy is painted white on top with yellow sides and is equipped with the following navigational aids:

(a) A quick flashing (0.3 seconds "on", 0.7 seconds "off") white light installed on the buoy 5.5 m. (18 ft.) above MHW. The light can normally be seen through 360° of arc at a range of 7.4 km. (4 n. miles). It is actuated by a solar photo-electric switch.

(b) A 406.4 mm. (16 in.) diameter all-directional radar reflector mounted on the highest point of the buoy.

(c) Buoy number daymarks at 90° intervals around the buoy hull.

Platform Complex Beacon Light: A rotating beacon which shows a flashing white light (6 flashes per minute) is mounted above the pumping platform atop the communications tower at an elevation of 64 m. (210 ft.) above MHW and it is visible all around the horizon. It is actuated from the control platform. The light is 47,000 candela and is visible for at least 18 miles.

Platform Complex Obstruction Lights: Obstruction lights are installed at each corner of both platforms and one on the bridge connecting the structures. The lights on the pumping platform are 25 m. (82 ft.) above MHW and on the control platform are 23 m. (76 ft.) above MHW. They are quick flashing white (0.3 seconds "on", 0.7 seconds "off") (60 flashes per minute). They flash in unison and are placed so that at least one light can be seen for a minimum of 5 n.miles from any approach angle to the platform complex. They are actuated from the Control Platform at night and in periods of low visibility.

Platform Complex Fog Signals: 2 fog horns are installed at the platform complex. One is hung below the lower deck near the middle of the Northwest edge of the pumping platform about 21.3 m. (70 ft.) above MHW, and the other is hung below the lower deck on the Southern edge of the control platform. The signals are synchronized to sound a 650-800 Hz 2 second blast every 20 seconds and can be heard for at least 3.7 km. (2.0 n.miles). They are actuated from the control platform.

Buoys: The following table lists the characteristics of the buoys marking the approach section of the safety zone:

Buoy Daymark	*Buoy Colour*	*Water Depth Meters*	*Feet*	*Lantern Colour*	*Radar Reflector*	*Fog Signal*
No. 1	Black	47.5	156	Green	X	X
No. 2	Red	46.3	152	Red	X	None
No. 3	Black	37.5	123	Green	X	None
No. 4	Red	36.9	121	Red	X	None

From seaward, buoys No. 1 and 3 define the port (left) lateral limits of the approach section and buoys 2 and 4 the starboard (right) lateral boundary. Buoys No. 1 and 2 are located at the entry to the approach section when proceeding from seaward. *It is mandatory that a Mooring Master be aboard before a tanker may enter or be underway in the safety zone.* The boarding and debarking point for the Mooring Master is determined in accordance with weather, traffic and safety conditions existing at the time of each tanker's arrival. Instructions as to the boarding point are given to tankers during the intitial VHF radio contact when 20 miles out (see "Radio")"

Safety Zone Boundary Marker Buoys: The safety zone is shown in "Plan Section" together with the location of floating aids to navigation and marine terminal components. International Rules of the Road apply in the safety zone. The purpose of a deepwater port safety zone is to define an area in which any activity that may directly or indirectly increase the environmental and safety risks associated with port operation may be minimized or prohibited. The Inter-Governmental Maritime Organization (IMO) vessel routing measure known as a precautionary area; i.e. a routing measure comprising an area within definite limits where ships must navigate with particular caution and within which the direction of traffic flow may be recommended, has been adopted as the concept for U.S. deepwater port safety zones. The safety zone is made up of 3 parts; the approach section, the anchorage section, and the terminal section. Inside the terminal section there are 4 "areas to be avoided"; 1 is 600 m. in radius around the pumping platform complex and 3 are 500 m. in radius around each of the SPMs. "Areas to be avoided" conform to IMO measures to keep ships or certain classes of ships outside a delineated area. 4 navigational marker buoys define the boundaries of the approach section of the safety zone. Proceeding from seaward, the 3.7 km. (2.0 n.miles) wide approach section extends 9.3 km. (5 n.miles) from the safety fairway to the terminal section. The buoys have the following characteristics:

Daymarks:	Reflective, located at 90° intervals around buoy superstructures; visible range 3.7 km. (2 n.miles) minimum.
Lights:	Installed at 4 m. (13 ft.) above the water; slow flashing (0.6 seconds "on", 5.4 seconds "off"); light intensity 116 candela, actuated by solar photoelectric switches.
Radar Reflectors:	All-directional; detectable from at least 14.8 km. (8.0 n.miles) by typical shipboard radar systems.
Fog Signal:	(Buoy 1 only) minimum audible range approximately 1 km. (0.5 n.miles); programmed to send Morse code "L" at 20 second intervals. This buoy's for signal operates continuously.

Safety Fairway: The LOOP safety fairway, shown in NAV 3A, "Plan Section", has no marker buoys. To lessen the chance of accidents, ships enter and leave U.S. Gulf Coast ports via safety fairways. The fairways are 2 miles wide. No offshore drilling rigs or structures are permitted in them. LOOP recommends that tankers enter or leave the LOOP Safety Fairway at its Southernmost point or at least South of 28° 18′ N. Federal Regulations require that tankers do not enter or depart the safety zone except via the safety fairway, unless under force majeure (33 CFR 150.337 (a)). NOAA Chart 11359 has details of the LOOP Deepwater Port including pipe-lines within the safety fairway and safety zone.

Service Vessel Mooring Buoys: The 2 buoys provided for mooring port service vessels at the marine terminal are white. Centered midway between the top of each buoy and the waterline is a horizontal blue band. The buoy identification is reflective. Battery powered, slow flashing (0.4 seconds "on", 3.6 seconds "off") white lights are installed 2.4 m. (8 ft.) above the water, and are actuated by solar photoelectric switches.

Also see "Anchorage".

ANCHORAGE: *Anchorage Section Marker Buoys:*

The designated anchorage section of the safety zone is a 3.7 km. (2.0 n. miles) wide area beginning at safety zone Buoy No. 2 and extending 7.4 km. (4.0 n. miles) along and next to the Eastward boundary of the safety zone. Buoys "L-B" and "L-A" mark the corners and define the outer boundaries of the anchorage section. The anchorage section buoys have characteristics as follows:

Daymarks:	Reflective, located at 90° intervals around buoy superstructures; visible range 3.7 km. (2.0 n. miles) minimum.
Lights:	Installed at 4 m. (13 ft.) above the water; slow flashing (0.6 seconds "on", 5.4 seconds "off"), actuated by solar photoelectric switches.
Radar Reflectors:	All-directional; detectable at 15 km. (8.0 n. miles) by typical shipboard radar systems.

Buoy Daymark	*Buoy Colour*	*Water Depth Metres*	*Feet*	*Lantern Colour*	*Radar Reflector*	*Fog Signal*
L-B	White	45.7	(150)	White	X	None
L-A	White	37.1	(122)	White	X	None

Also see "Tanker Arrival".

RADIO/VHF: *Notices of Arrival:*

The Master of a tanker bound for LOOP should send his first arrival advice message as nearly as possible to 7 days before his expected date of arrival, even if he is in port at the time. If his trip to LOOP is less than 7 days he should also send another arrival advice as soon as possible after leaving his loading port. His next arrival advice should be sent 72 hours before the estimated time of arrival. The arrival advices should be transmitted and updated again at 48 hours and again not later than 24 hours before the estimated time of arrival. An arrival advice message can and should be sent at any time when there is a significant change in a previously estimated arrival time. These arrival advice messages should be sent to LOOP INC. The first message should contain, at a minimum, the following:

1. Tanker's name and call sign.
2. Estimated time of arrival at LOOP.
3. Draft fore and aft.
4. Type(s) and amount(s) of cargo on board.
5. Preferred order of cargo discharge by type.
6. Cargo manifold size and type, if 16 in. not available.
7. Type of mooring equipment installed.
8. Expected discharge rate.
9. Expected number of ballast hours upon completion.
10. Any special requirements which need early actions.

These messages can be sent by Western Union International TWX (810) 950-5875 LOOP M. T. GALO or by radio to coast stations WNU Slidell, WLO Mobile or WPA Port Arthur. It is suggested that ETA advices also be sent to tanker's Agents, with logistics requirements.

Single Side Band: LOOP maintains a high frequency single side band (HF-SSB) radio system for long range communications with tankers up to a range of approximately 1,000 n. miles from LOOP's port.

In addition to sending the official arrival message, the Master of a tanker bound for LOOP should also establish direct contact with the Port on the single side band radio. This is so that any misunderstandings in the official messages or any equipment problems needing advance action can be discussed. The SSB system operates on assigned frequencies in the HF band, call sign WXZ-596.

LOOP maintains the following schedules on the HF-SSB at its Control Platform and at its Harvey office (all times local).

0930 – 0945 and 1430 – 1445 — 4125.0 kHz (USB 4126.4)
0945 – 1000 and 1445 – 1500 — 6218.0 kHz (USB 6220.0)

24 Hour Message: By regulation, the 24 hour arrival message shall be addressed both to the Coast Guard Captain of the Port (NOLA) and to LOOP INC. This message should contain the following:

1. Name, gross tonnage, and draft of the tanker.
2. Type and amounts of cargo on board.
3. Any condition on the tanker that may impair its navigation, such as fire, malfunctioning propulsion machinery or steering equipment, or limitations on navigational or radiotelephone capabilities because of equipment or material malfunctions.
4. Any leaks, structural damage, or machinery malfunctions that may impair cargo transfer operations or cause a discharge of oil.
5. ETA at the safety zone. If the information reported changes at any time before entering the safety zone, or while the tanker is in the safety zone, the Master of the tanker shall report the changes to the Coast Guard Captain of the Port and to LOOP INC. as soon as possible, by cable and single side band.

Radio Frequencies for Berthing: In addition to the above notices, radio communication on the International VHF Maritime Band (Channel 74, 156.725 MHz.) should be started at a distance of 20 n. miles from the safety zone, or more, if possible. This Channel should be used for a "twenty-mile", final arrival notice, and for communications with the terminal and with the Mooring Master, until he boards the tanker.

Radio Communications at the Port: While in the safety fairway, or safety zone, tankers must stand by on primary VHF Maritime Channel 74 and/or on secondary Channel 10, using equipment that is in good working order. The LOOP platform always guards the international distress, safety and calling frequency 156.800 MHz, Channel 16 and guards Channel 10 as well. Use of shipboard radar and HF radio is forbidden while moored to an SPM. While in port, LOOP communicates with the tankers via the Mooring Master's UHF portable radio.

LOOP's Communications Facilities: LOOP has the ability to use the following communications for vessels trying to contact the Port:

Type of Communications	*Frequencies*	*Call Sign*
HF-SSB Maritime Mobile (Upper Side Band)	(Carrier (assigned) in kHz) 2182.0 (USB 2183.4) 2096.5 (USB 2097.9) 4125.0 (USB 4126.4) 6218.6 (USB 6220.0) 8291.1 (USB 8292.5) 12429.2 (USB 12430.6)	WXZ596
VHF-FM Maritime Mobile	(Carrier assigned in MHz) 156.500 Channel 10, Commercial Working. 156.800 Channel 16, Distress, Safety and Calling. 156.725 Channel 74, Port Operations.	KR-7808

Transit Traffic: LOOP maintains a VHF Maritime radio system and a Citizens' Band radio capable of communicating with vessels other than tankers or LOOP support vessels if such vessels are equipped with comparable equipment. When necessary to communicate with vessels of unknown communications capabilities, the vessel traffic controller will attempt to contact such vessel on VHF Channel 16 or CB Channel 9. If such efforts at radio communication are unsuccessful, a LOOP mooring launch or personnel boat will be dispatched to advise the vessel of any potential danger to the vessel as observed by the Vessel Traffic Controller's surveillance and also to advise the vessel operator of the port's precautionary areas and areas to be avoided.

When requested by a Master of a vessel other than a LOOP support vessel or tanker, the Vessel Traffic Controller shall furnish information concerning tankers, support vessels, and other vessels underway or moored in the safety zone.

Weather Advisory System: Coast Guard radio stations make two types of marine information broadcasts: radiotelephone (voice) for all seagoing users, and radiotelegraph (CW) for vessels carrying trained radio operators. Scheduled radiotelephone broadcasts include routine weather reports, small craft warnings, storm warnings, navigational information and other advisories on working frequencies, following a preliminary call on the voice international distress and calling frequencies. Urgent and safety broadcasts are made upon receipt of the information, urgent information is repeated 15 minutes later, and both are included in the next schedule broadcast unless cancelled before that time. Additional broadcasts may be made at the discretion of the originator. Urgent broadcasts are preceded by the signal: "PAN" for radiotelephone and "XXX" for radiotelegraph. Both the urgent signal and message are transmitted on 2182 kHz and 156.80 MHz (Channel 16). Safety broadcasts are preceded by the signal: "SECURITE" for radiotelephone and "TTT" for radiotelegraph. After a preliminary call on 2182 kHz, or 156.80 MHz, the station shifts to its assigned working frequency for the broadcast.

The following Coast Guard Radio stations in the Gulf of Mexico area and its approaches make urgent, safety and scheduled marine information broadcasts preceded by a preliminary call on 2182 kHz or 156.8 MHz, at the times and on the working frequencies indicated:

Station	*Working Frequency*	*Time(s)*
NCF, Miami Beach, Florida	2670 kHz.	0400, 0600, 0800, 1050, 1300, 1900 and 2250 EST
	157.10 MHz (Channel 22)	0630, 1200 and 1730 EST
NOK, Key West, Florida	157.10 MHz (Channel 22)	0600, 1200 and 1700 EST
NMA-21, St. Petersburg, Florida	2670 kHz	0920 and 2320 EST
	157.10 MHz (Channel 22)	0650, 1250 and 1750 EST
NMG, New Orleans, Louisiana	2670 kHz	0430, 0630, 1030 and 1630 CST
	157.20 MHz (Channel 22)	0450, 1050 and 1650 CST
NMG-15, Grand Isle, Louisiana	157.10 MHz (Channel 22)	0445, 1045 and 1645 CST
NOY, Galveston, Texas	2670 kHz	0450, 0650, 1050 and 1650 CST
NOY-3, Port Aransas, Texas	157.10 MHz (Channel 22)	0440, 1045 and 1645 CST
NCH, Port Isabel, Texas	2670 kHz	0440, 0640, 1040 and 1640 CST
	157.10 MHz (Channel 22)	0435, 1035 and 1635 CST
NMR, San Juan, Puerto Rico	2670 kHz	1100 and 2300 AST
	157.10 MHz (Channel 22)	0710, 1310 and 1810 AST

Scheduled radiotelegraph broadcasts include routine weather reports, small craft warnings, storm warnings, navigational information and other advisories on working frequencies following a preliminary call on the radiotelegraph international distress and calling frequency 500 kHz. Urgent and safety broadcasts are made as follows:

(a) Safety broadcasts are made upon receipt of the information; urgent broadcasts are also made upon receipt of the information except within 10 minutes of the next silent period.

(b) Safety and urgent messages are made during the last 15 seconds of the first silent period after receipt, and are repeated at the end of the first silent period which occurs during the working hours of one-operator ships, unless the warning has been cancelled or superseded by a later warning message. Urgent broadcasts are preceded by the signal "XXX". Both the urgent signal and the message are transmitted on 500 kHz. Safety broadcasts are preceded by the signal "TTT". After the preliminary call on 500 kHz, the station shifts to its assigned working frequency to transmit the broadcast. The following Coast Guard radio stations in the Gulf of Mexico area and its approaches make urgent, safety and scheduled marine information broadcasts preceded by a preliminary call on 500 kHz, at the times and on the working frequencies indicated:

Station	*Working Frequency*	*Time(s)*
NMA, Miami, Florida	440 kHz	1100 and 2000 EST
NMG, New Orleans, Louisiana	428 kHz	1120 and 1820 CST
NMR, San Juan, Puerto Rico	466 kHz	1220 and 2120 AST

LOOP also has weather and sea monitoring equipment installed at the Marine Terminal and receives private and government weather advisories. Upon request, weather information will be transmitted to tankers in the vicinity. In addition, NOAA gives continuous weather information, forecasts and warnings on the following frequencies:

WX1 162.500 MHz WX2 162.400 MHz.

RADAR: *Navigation Advisory System (Surveillance Radar):* 2 radar surveillance systems, X-band and S-band frequencies, are installed at the marine terminal. The systems provide coverage from the platform complex to a range of about 50 km. (27 n. miles) for tankers, and include, among other things, a collision avoidance system. After an incoming tanker makes radio contact on the VHF system about 20 miles from the safety zone, the Vessel Traffic Controller will advise of the location of navigational hazards as well as relative positions and estimated courses and speeds of other vessels within radar range of the platform.

Radar Beacon: The LOOP radar beacon (RACON) operates 24 hours daily on the X-band frequency from 9300 to 9500 MHz. The transponder is mounted on top of the communications tower 64 m. (210 ft.) above MHW. The RACON will respond to incoming signals by transmitting Morse coded letter "O" as the identifying signal for the marine terminal platform complex. The RACON has a range of about 40 km. to 48 km. (22 n. miles to 26 n. miles), depending on the height of shipboard radar antennas.

BERTHING: LOOP single point moorings (SPM) are the single anchor leg mooring (SALM) type, designed for tankers up to 700,000 d.w.t. The SPMs are numbered clockwise and are described as follows:

SPM 102:

Water Depth	35.1 m. (115 ft.)
Maximum Tanker Draft*	28.7 m. (94.3 ft.)
Maximum Tanker Length	427 m. (1,400 ft.)
Minimum Tanker Length	230 m. (755 ft.)
Maximum Mooring Load	650 long tons
Tail/Rail Hose Diameter	406 millimetres (16 in.)
Maximum Discharge Rate	15,900 cu.m. per hour (100 MBH)

SPM 103:

Water Depth	35.7 m. (117 ft.)
Maximum Tanker Draft*	29.4 m. (96.3 ft.)
Maximum Tanker Length	427 m. (1,400 ft.)
Maximum Tanker Length	230 m. (755 ft.)
Maximum Mooring Load	650 long tons
Tail/Rail Hose Size	406 millimetres (16 in.)
Maximum Discharge Rate	15,900 cu.m. per hour (100 MBH)

SPM 104:

Water Depth	35.1 m. (115 ft.)
Maximum Tanker Draft*	28.7 m. (94.3 ft.)
Maximum Tanker Length	427 m. (1,400 ft.)
Minimum Tanker Length	230 m. (755 ft.)
Maximum Mooring Load	650 long tons
Tail/Rail Hose Diameter	406 millimetres (16 in.)
Maximum Discharge Rate	15,900 cu.m. per hour (100 MBH)

* The maximum drafts shown here allow for a gross underkeel clearance of 6 m. (19.7 ft.) during gulf coast low water and calm seas. The maximum drafts result in a clearance of 2.9 m. (9.4 ft.) above the SPM base U-joints, since the U-joints are 3.4 m. (11.3 ft.) above the ocean bottom. Gross underkeel clearance means the distance between the keel of a tanker and the ocean bottom when the tanker is moored in calm seas. Net underkeel clearance means the distance between the ocean bottom and the keel of a tanker that is anchored, considering ship motion in response to wind, wave, tide and current conditions. It is required that there be a net underkeel clearance of 4.7 m. (15.3 ft.) during bad weather. Underkeel clearance during bad weather when a tanker may be pitching or rolling must be taken into consideration.

MOORING:

Mooring Equipment: In accordance with OCIMF recommendations LOOP will provide, in addition to the mooring hawser assemblies, the supporting equipment needed to connect the mooring lines to the tanker. Such equipment includes snotters, shackles, and devices for holding the mooring while connection is made. This equipment will include such items as special mooring gear and a hawser load monitoring device to be used at the bow, gaskets, bolts, tools, elbows, and adapter spool pieces (when required). Mooring equipment and other associated gear supplied by LOOP is lifted aboard the tanker from the mooring launch which transports the Mooring Master and Assistant Mooring Master. *Prior to arrival the ship should notify LOOP of the type of mooring equipment installed on the ship in order for required port-furnished equipment to be readied to be put aboard the tanker.* As recommended by the Oil Companies' International Marine Forum (OCIMF) the shipowner, depending on tanker mooring equipment, should supply as a means of securing the mooring chafe chain:

(a) Bow chain stoppers, designed to accept the 76.2 mm. (3 in.) section of the chafe chain; or

(b) Smit type brackets built to specified dimensions; or

(c) Mooring bitts, suitably positioned and of adequate strength; and

(d) Bow fairleads spaced near the tanker's bow and capable of accepting two 76.2 mm. (3 in.) chafe chains;

(e) Pedestal roller fairleads and winch drums or capstans to provide proper leads and clearances (drum end of anchor windlass is acceptable). Tankers are requested to remove the blank flanges from their discharge manifolds before mooring so as to expedite the connecting of the floating hoses.

Mooring Hawser System: Before a tanker is accepted for offloading, LOOP may require information necessary to determine whether the mooring equipment installed on the tanker is capable of sustaining the safe working load that will be imposed on it when the tanker is moored at a LOOP SPM. It is recommended that tankers calling at LOOP be fitted with properly installed and positioned bow chain stoppers or Smit type towing brackets and bow fairleads for mooring at SPMs. Other arrangements are acceptable when evidence is provided that such arrangements will not be below the required safe working load for the tanker. The exact arrangement will be determined by the Assistant Mooring Master after inspection of ship's fittings and equipment. *Mooring and unmooring is to be done by the crew of the tanker with the advice of the Assistant Mooring Master.*

Two launches will normally assist in mooring. One launch will tend the hawser systems. Successively for each of the two hawser systems, the launch personnel will secure the tanker's messenger line to a pick-up line in order for the hawser system chafing chains to be winched aboard the tanker and secured to the shipboard mooring fittings. The second launch tends the floating hose strings during the tanker mooring, drawing the hoses aside from the tanker's track during the approach and mooring. LOOP has no tugs to assist in mooring.

Hawser Monitoring: Each SPM is provided with a hawser load monitoring system, with strain gauges mounted in pins in mooring couplers on the mooring buoy.

TUGS: Support Vessels: *List of Characteristics by Vessel Name:* The following 2 launches are operated by LOOP for the primary purpose of assisting in mooring operations:

Names: "Loop Line" and Loop Loader".
Length overall: 26 m. (85 ft.).
Beam: 7.9 m. (26 ft.).
Draft: 2.1 m. (7 ft.).
Propulsion: 2 model 16V-92 GM diesel engines, twin screw, 1,200 h.p. total.
Maximum speed: 14 knots.
Bollard pull: 3,629 Kg. (8,000 lb.) line pull.
Navigation and Communications: Sitex 48 mile radar, digital fathometer, SSB and VHF radios (Channel 10, 16 and 74 plus an 8 Channel LOOP UHF radio.)
Construction material: Steel.
Fuel Capacity: 75,708 litres (20,000 gallons).

The LOOP maintenance vessel functions primarily for inspection, servicing, and maintenance of marine terminal components.

Name: "Loop Lifter".
Length overall: 61 m. (200 ft.).
Beam: 15.2 m. (50 ft.).
Draft: 3.7 m. (12 ft.).
Propulsion: 2 D-399 Caterpillar engines, twin screw, 3,000 h.p. total.
Maximum speed: 11 knots.
Navigation and communication: Auto pilot, Sitex 48 mile radar, fathometer, SSB and VHF radios (Channels 10, 16, and 74), plus an 8-Channel LOOP UHF radio.
Construction material: Steel.
Fuel Capacity: 80,000 gallons.
Fire pump: 302,832 litres per minute (2,500 GPM).
Pollution control equipment: 610 m. (2,000 ft.) of oil containment boom.

LOOP will also employ a crew boat for transporting LOOP personnel between the small boat harbour and the marine terminal.

HOSES:

Floating Hoses: The floating hoses, which extend approximately 1,100 ft. from each buoy, consist of 2×24 in. inside-diameter crude oil discharge hoses with 16 in. inside-diameter tails, each with 150 ANSI flanges for connection to the tanker's manifold. Each hose has a one-candela yellow light on a pick-up buoy at its end, along with a pick-up wire. In order to avoid delays in connecting hoses, tankers should have an adequate number of reducing spools to fit 16 in. standard ANSI flanges.

Connecting and disconnecting of the cargo hoses is to be performed by the crew of the tanker under the advice of the Assistant Mooring Master.

Hose Handling: Mooring launches tow each floating hose into position beneath the tanker's lifting derrick. The derrick runner is lowered to the launch and secured to the hose pick-up wire. After the hose is lifted above the level of the tanker's rail, it is swung inboard. Snubber wires connected on each side of the hose at the connection between the first and second hose-lengths are then used to control its angle; i.e., to guide it towards its proper place on the cargo manifold. When the hose has been raised enough to span the distance between the tanker's rail and the cargo manifold, the snubbers can be made fast. The hose end is then lowered to the manifold and connected to it. Upon completion of discharge, each hose is disconnected from the manifold after its weight is borne up by the derrick runner. It is then swung outboard, lowered to the water, and released.

Care in Raising and Lowering the Hose: Care is necessary in raising the hoses before discharge and particularly in lowering them after discharge. At these times they are especially vulnerable to kinking.

Damaging Configurations for the Hose: While the cargo transfer hose is connected to the tanker, certain positions that the tanker might take relative to the SPM could cause the hose to bend excessively and thus could damage it.

For exampie, if a tanker overrides the buoy, it could damage both the hose and the buoy. This condition can be corrected by the tanker's going astern or being pulled astern.

Another damaging position could happen if the SPM seabed swivel does not turn as the tanker swings around it. In such a case the Mooring Master will seek LOOP's assistance. If this situation is not immediately resolved, the Port Superintendent or the Mooring Master should issue the order to stop pumping cargo.

CARGO OPERATIONS: *Discharge Operation:*

The discharge operation will be controlled and personally supervised by a ship's officer, to the satisfaction of the Mooring Master or the Assistant Mooring Master. Upon being informed by the ship's officer on watch that the tanker is ready to begin discharging, the Mooring Master will request the discharge operation to proceed according to a previously agreed upon plan regarding start-up rates and maximum discharge rates. *In the event of any emergency, either on board the tanker or on the operating platform, or anywhere in the LOOP system, all oil transfer must be stopped and all oil transfer valves closed.* These emergencies are:

(a) Fire or explosion of a tanker, on the platform, or anywhere on the LOOP system.
(b) Loss of power or steering on a tanker underway in the safety zone.
(c) Breakage of a hawser.
(d) Rupture of a floating hose.
(e) Any confirmed pipe-line rupture in the LOOP system.
(f) Total loss of the computerised supervisory control and monitoring system for the LOOP complex.
(g) Power failure at any LOOP pipe-line facility.
(h) Severe electrical storm in the area of the port. (Ballast receipt must also be stopped during such electrical storms.)
(i) Failure of the UHF radio communication system.

In the event of failure of the UHF radio communication system, the tanker will sound 5 long blasts on her whistle. Cargo discharge is then stopped until communications are re-established.

Oil Transfer Watch: One crew member will be stationed at the bow and an additional crew member stationed at the cargo manifold area. A licensed officer and pumpman will be based in the cargo control room, with the pumpman moving onto the deck as necessary. During the cargo transfer, the watch organisation must provide the capability to shut down pumping on short notice and to stay in constant communication with LOOP personnel both on board the tanker and on board the pumping platform. Communications for cargo handling will be directly with the Mooring Master through the LOOP UHF portable radio system. (NOTE: Each Tanker shall have an officer who is fluent in English on duty at all times.).

Crude Oil Washing (COW): Crude oil washing of cargo tanks is allowed after LOOP is assured that the operation will be done safely. In order for crude oil washing to be undertaken, the tanker and the tanker's personnel must satisfy the following requirements:

(a) Strict compliance with USCG Regulations 33 CFR 157. A copy of this regulation must be aboard the tanker and readily available to key shipboard personnel.
(b) Strict adherence to "Guidelines for Tanker washing with Crude Oil", published by OCIMF. A copy must be aboard the tanker and readily available to key shipboard personnel.
(c) Notwithstanding the above regulations and guidelines, no COW will be permitted until the Mooring Master is satisfied that:
1. All cargo tanks have discharged at least 1 m. of cargo depth in order to eliminate any water that may have accumulated on the bottoms of cargo tanks.
2. The Chief Officer or the person in charge of the COW operation has participated at least twice in crude oil wash operations aboard the tanker making the request or aboard a tanker similarly equipped.
3. There is a sufficient number of adequately trained personnel onboard to assist in the dual operations of transferring cargo and crude oil washing, in order to ensure that:
    (i) Gun nozzles are rotating in proper sequence.
    (ii) Enough source product remains in the tank supplying the cleaning oil.
    (iii) The on-deck piping system carrying the cleaning oil is continuously watched.

Departure Readiness: Vessels at moorings or anchorage must maintain engines and propulsion machinery in readiness to clear the marine terminal area under full power on short notice. No repairs are permitted which would interfere with this requirement. Masters of tankers are advised to have sufficient personnel aboard to enable them to depart upon advice from the Vessel Traffic Controller. The Master of a tanker may, in an emergency, for the protection of life or property, depart without clearance from the Vessel Traffic Controller if the Master advises the Vessel Traffic Controller of the circumstances, by radio, at the earliest possible moment.

DEPARTURE: *Normal Departure Procedure:* Upon completion of the cargo discharge, the tanker's Master or Chief Officer and the Mooring Master together estimate the time needed to prepare the tanker for departure. This time will be given to the Vessel Traffic Controller on the control platform, so that clearance for departure can be planned and so that a mooring launch can be summoned to assist the tanker in the operations of unmooring.

When the tanker is ready to leave the SPM, the Assistant Mooring Master on the bow recommends the use of the tanker's engines in order to ease the load on the mooring lines. When the load is eased enough, the tanker's crew can then disengage the mooring hawser and lower the mooring lines to the water.

Departure time is the time when the last mooring line is cast off. After the tanker is unmoored, she manoeuvres to go clear of the SPM buoy and to take a course for departure through the safety fairway.

Departure from the SPM to the disembarking point of the Mooring Master is done under the Mooring Master's guidance and the Vessel Traffic Controller's surveillance.

Emergency Departure Procedures: An emergency departure can be initiated either from the control platform or from the tanker. If initiated from the platform, the Mooring Master is so notified. The tanker's engines must then be made ready for immediate service, and if cargo is being discharged, the tanker's pumps must be shutdown in accordance with the seriousness of the emergency. *If an abrupt shutdown of the platform's booster pumps is necessary, it is essential that the tanker's pumps either be immediately shutdown or else immediately shifted to a recirculation mode.* In accordance with the nature of the emergency, cargo hoses may be lowered by line-slipping to the water. All other procedures are the same as those for a normal departure. An emergency departure may also be initiated from the ship. The Master of a tanker may, in an emergency, for the protection of life or property, depart from an SPM without clearance from the control platform.

Emergency Shutdown: Following are the procedures to be followed in case the offload pumping must be quickly stopped because of some emergency.

(a) LOOP's Pumping Platform Supervisor notifies the tanker's watch officer and the Mooring Master of the emergency shutdown, or for some shutdowns a taped voice is triggered to announce it automatically by UHF radio.
(b) The LOOP system automatically goes into a pumping rate reduction, and shuts down the pumps and meters as the flow rate dictates.
(c) The tanker's manifold valves and the hose end butterfly valves are closed as soon as LOOP's pumps and the tanker's pumps are shut off.
(d) The Pumping Platform Supervisor shuts LOOP's PLEM valves.
(e) If the emergency is one that makes a quick departure of the tanker necessary, the emergency departure procedures of the preceding paragraph will then be followed.

MEDICAL: Agents can arrange medical and dental treatment as well as consultation and hospitalisation at short notice.

FIRE PRECAUTIONS: As per the "International Safety Guide for Tankers and Terminals".

FRESH WATER: Not available.

FUEL: LOOP does not provide any bunkering services or facilities to tankers operating in the LOOP deepwater port area. Such bunkering will be conducted by private concerns under arrangements made with the owners or operators of tankers. Bunkering will be allowed only when at anchor or when moored to an SPM. Bunkering will not be allowed to interfere with the safe and expeditious unloading of crude oil from tankers. All companies, craft, equipment and personnel involved in bunkering inside LOOP's deepwater port area *must* have LOOP's prior approval and must also follow LOOP's Bunkering Guidelines and Regulations, which are available upon request from LOOP.

REPAIRS: Skilled craftsmen are available for all on-board repairs through Agent.

SURVEYORS:

Petroleum Inspectors: LOOP shall make all necessary arrangements for independent inspection of all custody transfer measurement of Crude Petroleum off-loaded at LOOP. Shipper shall have the right to have representatives present to view the independent inspection of any of its custody transfer measurement of Crude Petroleum off-loaded at LOOP.

AIRPORT: New Orleans International Airport is serviced by major airlines with world wide connections. The airport is located 90 miles from LOOP.

REPATRIATION: Crew changes and repatriation of crew members can be arranged through Agent.

WEATHER: *Waves and Currents:* At the port, significant wave height is less than 1.8 m. (6 ft.) for 72% of the time, and greater than 3 m. (10 ft.) for 5.4% of the time. Waves usually arrive from an Easterly direction. Currents take generally Westerly direction 56% of the time, and a generally Easterly direction 25% of the time. Average current speed is 0.72 knots, but 3% of the time the current can reach a speed of 2 knots.

Weather at the Port: LOOP's marine terminal is located in a semi-tropical zone. Average Summer temperature is 29°C (84°F), and average Winter temperature is 14°C (57°F). Lowest temperature recorded is −12°C (10°F) and highest is 38°C (100°F).

Thunderstorms in Summer and cold fronts in Winter develop quickly and can be quite severe, with storm winds (up to force 10) developing for short periods. The Terminal is in a hurricane zone, and although such storms are an infrequent occurrence at the port, the area is often affected adversely between the months of June and November by hurricanes passing East or West of the port. Poor visibility occurs most often in January when visibility of 2 nautical miles or less occurs 2% of the time.

Weather Operating Rules: As a general rule, the LOOP Port Superintendent will use the following guidelines in deciding whether various port activities will be allowed to begin or continue, or whether they will be terminated:

(a) Bunkering is generally allowed in significant seas of up to 1.5 m. (5 ft.)

(b) Tanker mooring and hose hook-up generally are allowed in significant seas of up to 2 m. (6 ft.)

(c) Operation of the mooring launches and work boat, as well as cargo discharge, are generally considered safe in significant seas of up to 4 m. (12 ft.)

(d) In seas of 4 m. (12 ft.) or more, cargo discharge may be stopped and cargo hoses disconnected, especially if a storm is building up.

(e) Tankers may be required to depart:
  (1) if seas become greater than 5 m. (15 ft.);
  (2) if winds become greater than 22 m. per second (44 knots);
  (3) if current becomes greater than 1 m. per second (1.8 knots) and is aligned with winds of 20 m. per second (40 knots) or more;
  (4) if current becomes 0.6 m. per second (1.2 knots) and is perpendicular to 20 m. per second (40 knot) winds.

(f) The complete shut-in of all systems and the evacuation of the port will be ordered when it is predicted that the centre of a hurricane will pass within 290 kilometers (180 statute miles) of the port. Normally evacuation orders will be issued 36 hours before the storm's expected arrival.

(g) A hurricane alert is issued 72 hours ahead of an approaching hurricane. No incoming tankers will be berthed after a hurricane alert, and berthed tankers will complete discharging as soon as possible and depart the port.

(h) A tanker may not be cleared to enter the Safety Zone or to be underway in the safety zone or to depart from a mooring or anchorage in the safety zone if the visibility is reduced to 4 km. (2 nautical miles).

Also see "Radio".

GENERAL:

Charts: The following official charts of the National Oceanographic and Atmospheric Administration (NOAA) are recommended for use when approaching LOOP's marine terminal:

11340 (U.S. Gulf Coast – Mississippi River to Galveston).
11358 (U.S. Gulf Coast – Barataria Bay and Approaches).
11359 (U.S. Gulf Coast – Louisiana, LOOP Deepwater Port).

The latest editions of NOAA charts are listed in NOAA's publication "Dates of Latest Editions", which is issued quarterly and available free from National Ocean Survey, Division C44, Riverdale, Maryland 20840, U.S.A.

Support Vessel Base: National Oceanographic and Atmospheric (NOAA) Administration Chart No. 11358 shows the navigable route from the marine terminal to the small boat harbour located on the East shore of Bayou Lafourche near Belle Pass where the support vessels are based.

Onshore Components: Major onshore components are: the Clovelly Dome Storage Terminal for receiving and storing the oil coming from the marine terminal and for delivering it to connecting facilities; the Operations Centre for controlling and monitoring system operations; and the Fourchon Booster Station for helping to pump the crude oil from the marine terminal to Clovelly Dome Storage Terminal.

Services: LOOP does not provide facilities for logistic services to tankers using the port. The company is not an "Agent", but does render to all tankers calling at its terminal the services necessary to effect a prompt, efficient turnaround. LOOP provides those services and facilities necessary for scheduling, receiving, mooring, unloading of cargo and departure of tankers calling at the port. Arrangements for logistic services must be made through each tanker's agent. Lists of logistic services can be obtained from the Agents. Messages concerning such requirements, except in an emergency, will not be accepted by LOOP.

Vessel used to deliver bunkers and tanker supplies will have to be approved by LOOP. Such vessels must apply for approval in accordance with the LOOP Guidelines and Regulations covering logistical service. Lists of currently approved vessels are available from LOOP on request. No telephone service is available to the ships.

Included in tanker services that need to be arranged through tankers' agents are mail services and medical services. There are no facilities for handling mail. *It is important that mail for tankers not be addressed to LOOP Inc.* There is no medical service on LOOP's offshore platforms. Medical service ashore, as well as helicopter service for medical evacuation, is available through the Agents.

Helicopter Transfer of Personnel and Supplies: Helicopter operations are sanctioned on tankers, subject to the Master's and the Port Superintendent's approval, for the following situations:

(a) Medical evacuation, personnel transfer and replenishment of supplies by helicopter is permitted on an individual basis. The Port Superintendent has authority to determine when conditions are not safe for such helicopter operations. Shoreside treatment for medically evacuated patients must be arranged by the tanker through the tankers' agent. LOOP will assist with communication relays for emergency medical purposes but will not act as agent.

(b) When weather conditions dictate, helicopters may be used for transfer of Mooring Masters and other port personnel at the discretion of the tanker's Master. The Mooring Master and the Port Superintendent jointly decide when such a condition exists.

(c) In order to facilitate decisions about the safety or feasibility of helicopter operations on tankers, LOOP sends in advance to tanker Masters the characteristics of any helicopters that LOOP itself dispatches.

Personnel Transportation: LOOP provides no boats for transportation of tankers' personnel to shore. When transportation is required, it must be arranged through tanker's agents. There is almost no public transportation on land from towns near the LOOP platform. Any such land transportation should also be arranged in advance through tanker's agents.

Small Boats and Visitors: No boats are permitted or authorised to come alongside tankers calling at the port except those required by LOOP or by the ship to furnish services or carry out official business, and then only after clearance from the Vessel Traffic Controller and Mooring Master.

It is strongly recommended to Masters of tankers that visitors to the ship be restricted to a minimum, because of the hazards involved. Visitors to the ship are not allowed to embark or disembark by the way of LOOP's platforms or launches.

Masters of vessels are advised that decks and the ship's ladders should be well lighted and ladders should be kept well clear of the water during unloading to prohibit unauthorised persons from boarding the ship.

Cargo Documentation: The cargo quantity and quality report, which is a LOOP document, will be filled in as much as possible by LOOP personnel before each tanker's arrival. After the tanker finishes discharging, the Mooring Master receives the necessary figures by radio from the control platform so that the document can be completed before sailing. Cargo quantity is measured by representatives of LOOP by using turbine meters and provers on the pumping platform. Cargo quality is monitored by automatic sampling devices on the platform, and for accounting purposes manual tests are done on samples taken from the automatic sampler on the platform. LOOP furnishes United States Customs authorities with the necessary documentation.

Quality Bank: A quality bank, administered by LOOP, makes just and non-discriminatory adjustments among shippers. These adjustments are for differences in density, sulphur and residum content between each shipper's crude oil that is offloaded into the LOOP system and delivered out of it. All shippers who ship through LOOP must be members of the Quality Bank.

Pollution: Discharge of oil or oily slops into the sea is strictly forbidden. LOOP has no facilities for receiving any oil residues or oily ballast water. Tankers wishing to offload such substances must do so elsewhere. Tankers that release oil or oily ballast water either at the SPMs or in the anchorage area will be held responsible for all cleanup costs. The U.S. Coast Guard Regulations concerning water discharges at sea are contained in Parts 157.25 through 157.49 Title 33, of the United States Code of Federal Regulations. Regulations in 33CFR 159.7 require an operable marine sanitation device aboard all vessels in U.S. waters. For purposes of these regulations the LOOP safety zone is considered U.S. waters.

NOTE: All ballast and bilge overboard discharge valves are to be shut and sealed and all deck scuppers plugged while at a LOOP SPM or anchorage, although scuppers can be temporarily opened to drain off rainwater.

Safety: LOOP maintains a vigorous safety programme. The Mooring Master, as LOOP's safety representative on board, will discuss and review LOOP's safety requirements and procedures with tanker's Master and Chief Officer before cargo discharge begins. Coast Guard Inspectors will board all foreign vessels, at least annually, to ensure compliance with federal regulations, including Part 164, Title 33 of the United States Code of Federal Regulations, Navigation Safety.

Customs: LOOP furnishes customs authorities with documentation of volumes and evidence of quality of cargoes received into the system based on measurements at the marine terminal pumping platform. Arrangement for the posting of such sureties and payment of fees or duties, and for other documentation that may be required, is the responsibility of the importer and/or operator of the tanker. The importer's customs broker, or his other authorised representative, will advise the importer regarding procedures and the amount of duty or fees levied on oil shipped through the port complex.

Tariffs: Tariffs governing rates, charges rules and regulations and supplements thereto, effective or proposed to become effective, on file with the Federal Energy Regulatory Commission (FERC) are available upon request to LOOP. Questions about tariffs can be directed to LOOP's Administration Department.

Federal Liability Fee: LOOP is required by law to charge cargo owners 2 cents per barrel offloaded for a liability fund whose purpose is to pay for cleanup costs and uncompensated damages that are due to oil spills at the port. Each tanker calling at LOOP must have on board a certificate of financial responsibility for water pollution, in accordance with Subpart D., Title 33, of the United States Code of Federal Regulations.

Storage: Procedures and charges for storage of crude oil by shippers in excess of normal residence time are covered in the rules and regulations tariff of the Federal Energy Regulatory Commission.

State Fees: There are presently no usage fees directly assessed by Louisiana to shippers and tankers at the deepwater port. If Louisiana imposes fees in the future, tankers will be responsible to pay them.

Regulated Vessels Activities: Vessel activities permitted and prohibited at the port, controls on those activities, and the specific safety zone areas in which the controls apply are set forth in Part 150.345, Chapter 33, of the United States Code of Federal Regulations.

Provisions: All deck and engine room stores are available in quantity. High quality fresh and frozen provisions available through Agent.

AUTHORITY: LOOP Inc. (See "Operator").

LOS ANGELES, California: 33.43 N. 118.17 W.

(See Plan Book)

PORT LIMITS: The seaward boundary of the port of Los Angeles is, for most purposes, the breakwater through which arriving vessels pass at Angels Gate Light.

DOCUMENTS: First Port of Arrival.

1 Complete Manifest deposited with Customs, original and traveller.
1 Complete Manifest returned to vessel.
1 Manifest of first port cargo deposited with Customs broker.
2 Quarantine Declarations (Form PHS 43).
2 Agriculture Declarations (Form AIQ 43).
1 Visaed Crew List (Form I-418) 5 additional copies.
1 Crewman's Landing Permit (Form I-95A) for each crew member and (Form I-94) for each passenger.
1 Dangerous Cargo Manifest deposited with Captain of the Port.
1 copy in hands of Chief Officer for review by the Fire Department.

The Coast Guard Captain of the Port must be informed of vessel's ETA 24 hours prior to vessel's arrival.

Second and each subsequent Port of call in U.S.

2 Manifests of Cargo for second U.S. port left with Customs.
1 Travelling Manifest returned to Master.

(*Note:* Travelling Manifest is carried and deposited with Customs at final port of discharge in U.S. – in addition to above required documents 4 additional copies should be available.)

PILOTAGE: Request made through Agent. Contact can be made through VHF Channels 14 (156.7 MHz) or 16 (156.8 MHz). Call: KMB 466 Los Angeles Pilots. Tel: 519-3805. Not less than 1 hour's notice of arrival or departure. 1 long and 1 short blast on ship's whistle or siren, or international signal. Pilot will board in vicinity of sea-buoy ("LA" entrance buoy, lighted bell buoy "L.A." black and white vertical stripes. Radar reflector).

Under normal weather conditions, the pilot ladder should be on the starboard side 1 m. above water.

Arriving vessels should keep to Eastward of Los Angeles Sea-Buoy.

Departing vessels should keep to Westward of Los Angeles Sea-Buoy.

Masters or Agents are requested to advise the pilot station whenever there is a change in the arrival or sailing time.

Note: Ships arriving can usually make good VHF radio contact except between Point Vicente and Point Fermin.

ANCHORAGES: Anchorages defined on charts. No permit required to anchor less than 10 days. Permit for over 10 days obtained from Captain of the Port, USCG and Harbour Department Port Warden. Permit is required for Explosives anchorage.

RESTRICTIONS: Vessels entering the Port of Los Angeles are advised that a major dredging project is currently underway. The dredge location will vary as the deepening progresses. Refer to the weekly Notice to Mariners issued by the U.S. Coast Guard for approximate locations.

Care is recommended while navigating near the large floating equipment, barges and cables used in the project.

MAX. SIZE: Restrictions on draft only. Supertanker terminal in outer harbour has fairway of 51 ft.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: International Telephone and Telegraph, call letters "KOK" Los Angeles Radio.

RADAR/VHF: The Los Angeles Harbour Pilot's station equipped with radar for use of Pilot. The Pilots also monitor VHF Channels 14 (156.7 MHz) and 16 (156.8 MHz). Also see "Long Beach" and "Services".

TUGS: On stand-by 24 hours a day. However, should be ordered prior to arrival. Tugs join vessel in main channel, tug lines used, except when towing astern.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Los Angeles Quarantine Station.

Quarantine: U.S. Quarantine Station, P.O. Box 90834, Los Angeles, California 90009. Tel: (213) 642-5966.

1982 Standard Procedure: Radio Free Pratique clears vessel to enter harbour without inspection provided there is no illness on board.

Inspection officer boards ships in the following categories:

A. 15 days prior to entering a U.S. port any crew member or passenger exhibits these symptoms.
  1. Temperature of 100° or higher for 2 days or is accompanied by:
    a. rash
    b. jaundice or
    c. glandular swelling.
  2. Diarrhoea severe enough to prevent performing duties.
  3. Death aboard ship.
B. Any ship visiting a plague-infested country within 60 days prior to entering a U.S. port.

If subject to inspection, boarding hours are 0600 – 1800 Monday – Saturday regular; 1800 – 0600 overtime including Sundays and holidays.

BERTHING: Generally arranged through Agent. Berthing under control of Port of Los Angeles' Chief Wharfinger. There are 32 general cargo berths with depth alongside 45 ft. (See "Max. Size".)

Berth No.	*Elevation (ft.)*	*Depth (ft.)*		*Berth No.*	*Elevation (ft.)*	*Depth (ft.)*

BRIDGES: Highway suspension bridge (Vincent Thomas) crosses main channel between Berth 95 and Berth 225; overhead clearance of 185 ft. in centre. 2 bridges on Cerritos Channel separating Los Angeles and Long Beach harbours, 1 double leaf-bascule (Badger Avenue Bridge) the other is a lift bridge (Schuyler F. Heim), as these bridges are less than 50 ft. apart they will be treated as one, overhead clearance 155 ft. at centre of Heim Bridge.

CONTAINER HANDLING FACILITIES:

See Tables on pages 1603 and 1604.

SPECIALISED CARGO HANDLING: Bulk loading facility, especially designed to handle coal and other dry bulk materials. Wharf length 800 ft. Depth alongside 51 ft. Loading rates up to 3,000 t.p.h., and unloading 500 t.p.h.

The grain and tallow terminals at Berth 174 have 13 silos that hold 410,000 bushels. Vessels can be loaded at a rate of up to 400 t.p.h. Accommodating vessels up to 35 ft. draft, any length. (See "Max. Size".)

Other specialised facilities include the GATX Petro Chemical Terminal, designed especially to receive petro chemicals; the Hugo Neu Corporation installation, where old automobiles are reduced to scrap metal for export; Coos Head and Louisiana Pacific Terminals; United Brands Company's Banana Terminals; and the processing and shipping plant of the U.S. Boron Company.

STEVEDORES: Agents make necessary arrangements.

MEDICAL: Necessary to notify Agents of required medical attention: this can be done when final ETA is determined. Hospital facilities available (private).

Vaccinations/fever certificates, etc., shall conform with rules and models prescribed by the International Sanitary Regulations.

TANKERS: Load and discharge lines have 6 in. and 8 in. standard flanges (super-tanker terminal has 12 in. lines with standard flanges). If not so equipped ship must furnish its own "C" clamps. Recommend ship have reducers on board to handle 6 in. and 8 in. flanges. Residue discharge facilities available for limited quantities. All types and grades of petroleum available. 19 tanker berths available in inner harbour, 35 ft. draft at MLLW. (See "Max. Size"), 2 are available in outer harbour 51 ft. draft at MLLW. Also see Long Beach – "Tankers".

DENSITY: Average density 1026 (exception during or after heavy rain).

FRESH WATER: Availability unlimited, delivery universal, rate of delivery 100 t.p.h.

FUEL: Unlimited fuel, all grades at attractive rates. 48 hours' advance notice generally required.

FIRE PRECAUTIONS: Whenever vessel bunkering, sufficient serviceable fire hose with suitable nozzles attached to reach all parts of vessel shall be connected to fire main on vessel and made ready for instant use at all times during bunkering operations. If no adequate water pressure available on board, connections shall be made to shore lines to obtain adequate pressure. All Tankships shall be moored bow seaward and have wire towing pendants rigged fore and aft readily available for emergency use, fire hoses shall be connected as above at all times while vessel in port.

International fire signals will be used in case of fire (5 prolonged blasts of ship's whistle or siren of 4 to 6 seconds duration).

GANGWAY/DECK WATCHMEN: Gangway watch recommended. Tankships and vessels handling dangerous cargo required to have gangway and deck watch.

OPENING/CLOSING HATCHES: Automatic hatches may be opened and closed by crew, manual hatches opened and closed by stevedores.

CUSTOMS ALLOWANCES: Tobacco, either 300 cigarettes, 50 cigars, or 3 lb. of smoking tobacco, for the personal use of crew member. Wine and/or spirit, 1 quart for personal use of crew member.

CERTIFICATES: *Passenger Vessels:*
- Safety Certificate, with 50 or more passengers.
- Load-Line Certificate.
- Radio Certificate.
- Radio Telephone Certificate, if aboard.

Cargo Vessels:
- Safety Equipment Certificate.
- Load-Line Certificate.
- Certificate of Inspection/Home Certificate.
- Trading Certificate.
- Cargo Gear Certificate.
- Radio Certificate, Radio Telephone Certificate, if aboard.
- If carrying passengers from U.S. ports, vessels must have PAC (Persons in Addition to Crew) Certificate issued by USCG.

Tanker Vessels:

Same as cargo. Exception: if carrying exotic cargo, required to have cargo facilities plan reviewed and approved by USCG, Washington, D.C. On vessel's first visit it will be inspected and receive a letter of compliance.

CARGO GEAR: Gangway net attached between ship and dock; extending 5 ft. beyond turntable in one direction and 5 ft. beyond point of intersection of gangway and stringpiece in the other direction. Preventer guy must be rigged separately to head of boom from working guy. Exception if cast head of boom is capable of withstanding the stress of all the lines attached thereto. (This is a West-Coast requirement.)

IDENTIFICATION CARDS: 1 crewman's landing permit (Form I-95A) or Immigration card (Form D-1).

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: Largest dry dock 659 ft. by 97 ft., 22,000 displacement tons. 3 smaller dry docks (17,500, 15,000, 10,000 tons).

Todd Shipyards Corp. have a 48,000 tonnes deadweight capacity synchrolift. Capacity – LOA 780 ft.×beam 105 ft.×39 ft. draft.

REPATRIATION: Arrangements can be made through Immigration on request of Agent to have crewman change ship or return to home port.

AIRPORT: Approximately 20 miles to International Airport which serves all major airlines.

TIME: Standard Time, GMT minus 8 hours. Daylight saving time GMT minus 7 hours (April through October).

HOLIDAYS: Cargo may be worked on holidays with holiday pay scale.

POLICE/AMBULANCE/FIRE: The telephone numbers are Fire (213) 832-4241, Police (213) 832-7211, Ambulance (213) 832-4243. Fire Alarm boxes adjacent to all cargo sheds.

EMERGENCY CO-ORDINATION CENTRE: Coast Guard Rescue Co-ordination Centre. Tel: 590-2225.

TELEPHONES: Connections for passenger vessels at passenger terminals only.

SERVICES: A ship-reporting service "The Marine Exchange" located at entrance to main channel, Los Angeles harbour. They monitor Channels 14 (156.7 MHz) and 16 (156.8 MHz) VHF and have Channel 9 (156.45 MHz) VHF as their own. Primary duties are reporting arrivals, departures and locations of vessels.

SHORE LEAVE: Crew members are allowed ashore.

SHIP SUPPLY SERVICE:

Far East Marine Supplies, 804 W. 14th Street, Long Beach, Ca. 90802, U.S.A.

Griffith Ship Supply, 1365 Daisy Ave., Long Beach, Ca. 90802, U.S.A.

L.A. Harbor Supply Co., 601 W. 14th Street, Long Beach, Ca. 90802, U.S.A.

Trans Intermodal Transport Inc., 530 E. Wardlow Rd., Long Beach, Ca. 90802, U.S.A.

Unitor Ship Service Inc., 1416 W. 15th Street, Long Beach, Ca. 90802, U.S.A.

REGULATIONS: Permits required for hot work (welding, cutting, etc.). Permit required for any dangerous cargo. Permit to discharge ballast (clean water) required. Restrictions on bunkering operations (scuppers plugged, valves closed).

DELAYS: No delays in berthing, load or discharge or bunkering can be expected.

DEVELOPMENTS: Depths at Los Angeles will be increased from 51 ft. to 65 ft. in the Outer Harbour.

Berth 135 – 139: Container terminal under construction. Length of berth 1,850 ft. Berth to be equipped with 3 gantry cranes. Completion expected mid-1986. The berth will probably be leased to Mitsui OSK Line.

Berth 174 – 181: Container terminal under construction on Morman Island. Length of berth 1,000 ft. Completion expected early 1987.

AUTHORITY: Port of Los Angeles, P.O.Box 151, (425 S. Palos Verdes Street), San Pedro, California 90733-0151. *Tel:* 519-3456. *Telex:* LTX 18-2387. *Contact:* Ernest L. Perry, Executive Director.

AGENT: See "Long Beach".

MANITOWOC, Wisconsin: 44.06 N. 87.38 W.

LOCATION: Situated on the Western shore of Lake Michigan, 70 miles North of Milwaukee. Port open all year round.

DOCUMENTS: Vessels cleared by Quarantine Officials at Quebec. Customs Officer stationed at Green Bay.

PILOTAGE: Not locally required or available. Pilots should be taken on board prior to entering harbour.

MAX. SIZE: Max. draft 21 ft., vessels up to 600 ft. LOA can berth.

HEALTH: See "Documents".

TUGS: Available.

BERTHING: 2 breakwaters protect the harbour. Entrance dredged to 25 ft. Outer harbour from pier heads to inner red light dredged to 23 ft. Inner harbour up to Medusa Cement Company dredged to 21 ft. Maximum depth alongside docks, 19 ft. Turning basin, 600 ft. radius.

All berths owned by private industry and located as follows from harbour entrance:

1. Manitowoc Public Utilities: 2 slips capable of handling 400 ft. car-ferries which handle railroad freight cars or Ro/Ro vehicles. Located port side at a right angle to river channel South side of harbour.
2. C. Reiss Coal Company, 509 Jay Street: A 900 ft. slip just inside car-ferry docks, at a right angle to river channel, South side of river.
3. Manitowoc Company Inc. 500 South 16th Street: 800 ft. long. South side of channel, parallel docking.
4. Busch Agricultural Resources Inc., 605 Washington Street: 490 ft., South side, has marine leg for unloading grain.
5. McMullen & Pitz Construction Company, 901 Commercial Street: 300 ft. North side of river between 8th and 10th Street bridges.
6. Soo Line Railroad Company, 923 Commercial Street: 300 ft. North side of river just above 10th Street bridge. This includes an unused car-ferry slip capable of handling a 400 ft. car-ferry. Also, 600 ft. North side just above car-ferry dock but is unimproved.
7. Manitowoc Company Inc., 500 South 16th Street: Approximately 8 berths varying in length from 180 ft. to 850 ft., port side bordering the peninsula.
8. Medusa Cement Company, 1801 Spring Street: Final large dock upriver, 1,200 ft. starboard side.
9. Consumers Steel & Dock, 1311 Spring Street: 330 ft. starboard side just prior to Medusa dock.
10. Burger Boat Company, 1811 Spring Street: 300 ft., starboard side, just beyond Soo Line Railroad swing bridge.

CRANES: Manitowoc Company Inc.: One fixed crane max. 80 tons lift. Travelling crane max. 70 tons lift.

Burger Boat Company: One stiff leg derrick, 40 tons max.

BRIDGES: Operating regulations in effect. Contact City Police or the Harbour Master in advance.

DENSITY: 1000.

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Can be undertaken by Bay Shipbuilding Co.

DRY DOCKS: Floating dock available. Length 604 ft., width 70 ft., depth over blocks 13 ft., max. LOA 640 ft. – Bay Shipbuilding Co., Sturgeon Bay, Wis.

Bay Shipbuilding Co. expect to have 1 drydock which will accept vessels of 1,000 ft. LOA and 35,500 gross tons. Depth over sill 17 ft.

SURVEYORS: Lloyd's surveyor available from Cleveland.

TIME: GMT minus 6 hours.

AIRPORT: Manitowoc County. N.W. side of City off Monasha Avenue. Simmons Airlines, commercial feeder line, passenger and freight.

AUTHORITY: Harbour Commission, Office of the Mayor, City of Manitowoc, Wisconsin 54220. *Tel:* (414) 683-4440. *Contact:* B. M. Brennan, Harbour Master.

METLAKATLA, Alaska: 55.08 N. 131.35 W.

LOCATION: Located on Annette Island. Open all year.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: Ships coming up from the Hecate Straits or outside of Graham Island proceed into Dixon Entrance to the vicinity of Point McCartey where the Pilot will meet them. Vessels coming up the inside passage from Vancouver, B.C. are met at Lucy Island Pilot Station.

ANCHORAGES: Good anchorage in gravel and mud.

MAX. SIZE: Depths in harbour 120 ft. Tides: diurnal range – 14.7 ft. Also see "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Quarantine, Immigration and Customs, from Ketchikan.

TUGS: Available in Ketchikan.

BERTHING: 2 berths: 1. City Dock: 400 ft. long and 60 ft. wide. More than 35 ft. deep. Due to shallow water at East end, a starboard landing is usually made. No covered storage, temporary open storage. 4 fork lifts, 2 of 20,000 lb. capacity.

2. Annette Island Canning Co.; 200 ft. long and 23 ft. deep. 15 ton crane and 2 fork-lifts. 1×25 ton fork lift.

STEVEDORES: 4 gangs available.

REPAIRS: Facilities at Ketchikan.

SURVEYORS: Cargo Inspectors and Surveyors available in Ketchikan.

SUPPLIES: Bonded and unbonded stores from Ketchikan.

WATER: Available.

FUEL: Not available.

MEDICAL: Hospital available in Ketchikan; small clinic in Metlakatla.

AIRPORT: Small charter plane only. Jet to Juneau and Seattle via Ketchikan Airport only.

BANKS: National Bank of Alaska.

EMERGENCY CO-ORDINATION CENTRE: At Ketchikan.

STORING: See "Prelims" page viii.

1. By truck.
2. Yes.
3. Yes.
4. Yes.
5. None.
6. Yes.

DEVELOPMENTS: Large breakwater under construction

AUTHORITY: Port of Metlakatla, P.O.Box 8, Metlakatla, Alaska 99926. *Tel:* 886 – 4646. *Contact:* Freeman McGilton, Harbour Master, P.O.Box 515. *Tel:* 886 – 4151 (Residence).

MIAMI, Florida: 25.46 N. 80.10 W. (See Plan Book)

PORT LIMITS: The Miami harbour embraces the artificial basins, slips and channels that have been dredged along the bay front of Miami and in the bay and through the shoal water of Biscayne Bay to the ocean, and is located generally at Lat. 25° 46′ N., Long. 80° 10′ W.

Administration: The Port of Miami is a "non-operating" port, taxpayer-owned and administered by the Seaport Department, a function of Metropolitan Dade County government. Permanent facilities are leased to port users and operators. All equipment (except the gantry cranes) is owned and operated by private companies. The gantries are lease-operated under Seaport Control. Berth space is authorised by the Port Director, and scheduled by Seaport Operations. The U.S. Coast Guard serves as Captain of the Harbour.

Physical:

Total port land area: 525 acres (212.47 hectares)
  (under development: additional 75 acres [30.35 hectares])
Dodge Island: 300 acres (121.41 hectares)
Lummus Island: 225 acres (91.06 hectares) (180 acres [72.85 hectares] developed)
Total lineal dimension: 30,000 ft. (9.144 km.)
Bulkhead berth space: 11,510 ft. (2.18 miles) (3.51 km.)
Container berth: 840 ft. (256.03 m.) piling-supported concrete
  (second container berth under development)
Lineal balance 17,635 ft. (3.34 miles) (5.38 km.) under development
Dodge and Lummus Islands connected by two-lane partial, temporary connecting causeway.

DOCUMENTS:

Customs: All foreign and "in bond" goods entering the Port/Country are subject to Customs examination and duty. Manifest of foreign cargo inbound must be presented to the customs boarding officer prior to commencing discharge.

Ship's Agent must notify Customs 48 hours prior to the ship's arrival. Regular working hours, Monday through Friday 0800 – 1700, telephone 350 – 5261. Outside normal working hours, telephone contact 526 – 2875; overtime is charged.

Forms required:

2 Master's Oath on Entry of Vessel in Foreign Trade	Form 1300
2 General Declaration	Form 1301
2 Ships Manifests	Form 1302
2 Ship's Store Declaration	Form 1303
2 Crews' Effects Declaration	Form 1304
Crew Members' Declaration (1 Declaration for each Crew member)	Form 5129
1 Application – Permit – Special License (Unloading, loading, overtime services)	Form 3171
2 Passenger Lists	I – 418
2 Crew Lists	I – 48
Customs Declaration (Passengers) (1 Declaration for each family)	6059 – B
2 Declarations of foreign repair to vessels (U.S. flag vessels only)	3415

Immigration: An Immigration Inspector will meet all ships entering port. Valid travel documents/passport/visa/entry permit are required in some cases.

Ship's Agent must notify Immigration at least 1 hour prior to ship's arrival. Regular working hours, Monday through Friday 0800 – 1630, telephone 350 – 5739. Outside normal working hours, telephone contact 526 – 2626; overtime is charged.

Forms required:

Crewmen's Landing Permit	Form I – 95
Alien Passengers' Landing Permit	Form I – 94
Passenger List	I – 418
Crew List	I – 418

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

Ship's Agent must request quick clearance, "Pratique", from United States Public Health Department.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

An Agriculture inspector will board all foreign, coastwise and domestic ships on arrival.

Ship's Agent must notify Agriculture at least 1 hour prior to ship's arrival. Regular working hours, Monday through Friday 0800 – 1630, telephone contact 350 – 4758. Outside normal working hours, telephone contact 526 – 2821; overtime is charged.

Forms required:

1 Copy of Cargo Manifest.
1 Report of Ship's Stores and Port of Origin.

Forms provided by and filled out by the inspector:

Cargo Form 210
Boarding Report 288

RADIO/VHF: The Coast Guard and pilot station can be raised on VHF Channel 16. Telephone contact to Agents, receivers, etc., can be made via Miami Marine Operator.

Port of Miami maintains a guard on VHF Channel 16, call letters "KCE 254".

PILOTAGE: All foreign vessels are required to take a Pilot who boards near the outer sea buoy, 2.5 miles offshore.

Request Pilot through Biscayne Bay Pilots Association, 24 hours in advance, call sign KGW 303, VHF Channel 16, direct from ship or through vessel's steamship Agent accompanied by particulars of draft and berthing assignment. Ship to confirm on VHF Channel 16 one hour prior to arrival. Channel 16 is monitored 24 hours and station can monitor VHF Channels 10, 12 and 14. Ship may cable Pilot station direct through RCA Radio Lantana, Florida, call sign, MIAMI PILOTS. Estimated time of departure should be made when ship docks and must be confirmed by phone (672 – 7643 or 672 – 7644) 1 hour prior to the Pilot boarding.

ANCHORAGES: The prescribed anchorage area for vessels anchoring outside the harbour is located Eastward of a line about 1.5 nautical miles offshore and Northward of a line about 0.2 miles nautical miles North of the sea buoy at the entrance to the ship channel. The entire anchorage area lies North of the entrance channel to Miami. The Northern and Southern extremities of this area are marked by spar buoys. Vessels desiring to anchor off the entrance to the Harbour of Miami are required to do so within this area, to avoid possible damage to cables laid on the ocean bottom in the vicinity. Refer to anchorage area 202.188 on Coast and Geodetic Survey Chart No. 547.

RESTRICTIONS: *Locations:* Main turning basin: Lat. 25° 47 N., Long. 80° 11′ W. Sea buoy and channel entrance: Lat. 25° 46′ N., Long. 80° 06′ W. (approx.).

Channels, turning basins: The main channel is marked by 2 sea buoys about 2 miles (3.38 km.) East of the port, at the Western fringe of Gulf Stream shipping lanes. From that point, at which the depth is 40 ft. (12.19 m.), the channel runs 1.02 miles (1.65 km.) at 256° magnetic to a bend, changing to a control depth of 36 ft. (10.96 m.) and turning to 296° for 3.64 miles (5.82 km.), terminating in a 1,700 ft. (518.16 m.) (along North-South axis) by 1,650 ft. (502.92 m.) (East-West) turning basin. Mean low water depth in the main channel, at Northside berths and in the turning basin, is 36 ft. (10.96 m.). At a distance of 1.3 miles (2.08 km.) from the entrance channel bend at the outer bar cut, the Fisherman's Channel (South Channel) branches off due West for 1.01 miles (2.69 km.), then turns parallel to the main channel for another 1.01 miles, then turns to 247° for 1,500 ft. (467 m.) to intersect the Intracoastal Waterway. Depth along the entire Fisherman's Channel is 25 ft. (7.62 m.), except for the Easternmost 2,000 ft. (609.6 m.), where it is 36 ft. deep. Width of the main channel is 400 ft. (121.92 m.) from the sea buoys, for 3.65 miles (5.84 km.), and 900 ft. (247.32 m.) wide along Dodge Island and into the main turning basin. Width of Fisherman's Channel is 500 ft. (152.4 m.) along its entire length.

MAX. SIZE: Present recommended draft restriction of 33 ft. (10.06 m.) at MLW, is based upon size of turning basin of 1,700 ft. (518 m.) North and South; 1,650 ft. (503 m.) East and West, with a 3 ft. (1 m.) safety factor under hull of ship. Port has plans to widen this in conjunction with large expansion programme. Vessels more than 1,000 ft. (305 m.) in length and with a draft of over 33 ft. (10 m.) should contact Port Director, Port of Miami, and Biscayne Bay Pilots for latest data. No limit to length at port complex which has 23,300 ft. (7,100 m.) at 36 ft. (10.97 m.) MLW including new South Channel, and 6,800 ft. (2,073 m.) at 25 ft. (7.62 m) MLW.

TUGS: Large tugs up to 3,000 h.p. available 24 hours per day. Request tug service via pilot station. Big tugs privately owned by Belcher Towing Company who work closely with Pilots. Smaller tugs available on Miami River and operated by Backus Towing Inc.

BERTHING: Berths are all marginal berths, no piers or slips. 7,530 linear ft. (2,292 m.) of berthing at 11 m. depth, also 1,040 ft. (317 m.) at 9.5 m. and 4,031 ft. (1,228 m.) at 25 ft. (7.6 m.) depth. Dock aprons are up to 21 m. wide. Large ships can turn at berthside in the 270 m. wide approach channel, or may continue into the 518 m.×503 m. turning basin. The new (Fisherman's Channel) South channel is 500 ft. (152 m.) wide and 25 ft. (7.6 m.) deep, with three turning basins: one at the confluence of the South channel with the main channel, one midway along the 13,000 ft. (4 km.) length, and one (under construction) at the Western junction of the South channel with the Intracoastal Waterway. There are 10 berths for bow and stern-loading Ro/Ro vessels, and 4,000 ft. (1.2 km.) of marginal berthing for side and articulated-ramp vessels in addition.

Gear and Heavy Lift Equipment: 20 shipside cranes, all truck-mounted, rubber-tyred with outriggers, capacity 40 to 90 tons; 2×140 tons; 2×150 tons, 1×165 tons, 1×180 tons and 2×200 tons; 6 container movers ("port packers") to 85 tons, 2×35 ton forklifts, 7 forklifts from 15 to 31 ton capacities, and about 125 smaller forklifts from 3,000 lb. to 30,000 lb. capacities.

Cruise Ship Piers: Marginal berthing for 9 cruise ships, each with modern air-conditioned passenger lounge and Custom Inspection areas.

Container Handling: 2 new 40 long ton (with rotating or telescoping spreader; 45 L/T w/hook and beam) gantry cranes which service an 840 ft. (256 m.) concrete container berth along the new South channel at the Easternmost end of the port's new 225 acre (91h.) expansion area/container terminal, just 2.3 miles (3.7 km.) from ocean shipping lanes, went into operation in 1982. Each container crane has duty cycle of 20 load-on, 20 load-off cycles/hr. Cranes have an outreach from the face of the bulkhead to load of 110 ft. (33.5 m.) and a backreach of 204 ft. (62.2 m.). Containers clear 100 ft. (30.5 m.) above MLW and cranes place containers inside ship to 48.5 ft. (14.8 m.) below apron level. Plans call for up to four more such cranes at new container terminal.

Cold Storage Cargo: Not in port but ample on the mainland by commercial companies.

Commercial Warehouses: Ample on the mainland. On Port, 81,754 sq.m. in 7 modern transit cargo buildings.

STEVEDORES: All receiving, recording, moving, loading and discharge of cargo is performed by the stevedoring companies. They employ longshoremen members of the International Longshoremen's Association (I.L.A.). Normal working hours 0800 – 1700. Overtime is charged for Saturdays, Sundays, and holidays. Port open 24 hours per day.

BRIDGES: There are no bridges between the open sea and the port, or the Miami River. The new South channel provides direct access from shipping lanes and the river, as well as all berthing on the seaport's South side. A highway and rail bridge spans the Intracoastal Waterway between the island seaport and the mainland, and is manned 24 hours per day. It is primarily used for pleasure craft. The bridge maintains a guard on VHF Channel 16, call letters KCE 254. Only smaller ships enter the Miami River, which is dredged to 15 ft. at HW and is 150 ft. wide for a distance of 3 miles above entrance. A bridge about a half mile from entrance is closed from 0700 hrs. to 0900 hrs. and 1600 hrs. to 1800 hrs. local time.

MEDICAL: Clinic available.
TANKERS: No slop (residue) discharge facilities in the Port.

Private facility: Belcher Oil Company, Fisher Island – No slop (residue) discharge facilities. One tanker berth available, 760 ft. Max. draft of 34 ft. at MLW. No special fittings required. Telephone contact 672-1065.

FRESH WATER: Available every 240 ft. at Port of Miami, Dodge Island. Delivered via hose.
FUEL: All grades; bunker, intermediate and marine gas oil, Diesel, bunker C. Ships fuelled at dockside from Belcher Oil Co. barges.

FIRE PRECAUTIONS: Usual safety precautions on smoking, flying "B", mooring pendant available, ample persons aboard to fight fires, fire hose led out, etc.

Belcher Oil Company tugs equipped with fire fighting equipment.
GANGWAY/DECK WATCHMEN: Usual shipboard watches to tend lines. Special guards (security) through Wackenhut, Burns Security, etc.
OPENING/CLOSING HATCHES: Work normally done by longshoremen.
CUSTOMS ALLOWANCES: See "Jacksonville".
IDENTIFICATION CARDS: Definitely needed in order to return to ship at night. A security guard at Port of Miami will check.

CONSULS: (Area Code 305).

SERVICES: All types of special services such as tank cleaning, compass adjusting, admeasurement, radar/radio repairs, rathometer repairs, etc., available.
SHORE LEAVE: Crew members are allowed ashore after clearance by Customs, Immigration and Quarantine.
AUTHORITY: Port of Miami, 1015 North America Way, Miami, Florida 33132. *Tel:* (305) 579-5252. *Telex:* 52-2745 Port Mia. *Contact:* Carmen J. Lunetta, Port Director.

MILWAUKEE, Wisconsin: 43.01 N. 87.53 W.

(See Plan Book)

PORT LIMITS: The Port of Milwaukee limits are generally considered to be the harbour breakwall housing the harbour entrance lighthouse. However, unless specifically declared to the contrary in the covering charter party, a vessel will be considered an "arrived ship" upon anchoring outside the harbour breakwall, in the event that a proper berth and/or anchoring space inside the harbour breakwall is not available.
DOCUMENTS:

Vessels from Canadian ports:
Dominion clearance and Public Health Pratique (both issued at Montreal).
Vessels from all other nations:
Inward Foreign Manifest(s)
Stores Lists, over Master's oath.
Curio Lists, over Master's oath.
Permit to Lade and Unlade.
Discharge Manifest.
Inspection by U.S. Dept. of Immigration (Crew List).
Inspection by U.S. Dept of Agriculture.
Receipt of Entrance fee.
Receipt of Tonnage Tax.

Additional documents may be required, dependent on commodity involved in the carriage, point of origin, flag or any unusual circumstances existing.
PILOTAGE: Pilot boards at Montreal and at several other stations along St. Lawrence Seaway route.

ANCHORAGES: The chart does delineate anchorage area for large vessels and shows the 28 ft. depth just East of South Piers 1, 2, and Liquid Cargo Pier. This deep area, about 2,400 ft.×5,400 ft., used by large vessels for anchorage.
MAX. SIZE: 739 ft. × 75 ft. with 27 ft. draft. No tidal effect, although lake levels vary seasonally. Minimum depth above low water level 27 ft.
HEALTH: See "Health: All Ports" before first U.S. port (Albany). Illness reports made to Chicago Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Radio station at City Heavy Lift Dock. Harbour Master and Dock Superintendent can be reached at this facility Monday through Friday between 0800 and 1630 hrs.; 156.8, 156.6 and 156.5 MHz.
TUGS: Normally pick up vessel inside breakwater. Tugs optional at discretion of ship's Master. Fee for use of tug's lines.
BERTHING: The time of passing harbour entrance lighthouse establishes order of berthing, provided vessel is ready to work.
BRIDGES: (Inner Harbour only) Bridges closed between 0730 and 0830 hrs. and 1630 and 1730 hrs. except on Sundays and 8 legal holidays. In addition, 2 hours' notice required for opening bridges across Milwaukee River North of and including Buffalo Street.
SPECIALISED CARGO HANDLING FACILITIES: In addition to the 3 general cargo terminals of approx. 340,000 sq. ft. covered area (9 berths), and dry bulk terminal of 60,000 sq. ft. covered area (2 berths), the port is served by a refrigerated warehouse of 10,000 sq. ft.; 1 open dock area (2 berths) for handling bulk commodities such as pig iron; 1 open dock (3 berths) for heavy lifts and equipped with a 220-ton stiff leg crane and 2 gantry cranes of 70 and 50 tons; 1 liquid cargo pier for edible and inedible fats, greases and tallow; 2 grain elevators of 3.5 million and 2.5 million bushel capacity and 2 scrap iron loading facilities. The port is also equipped with 2 mobile heavy lift/container cranes, 300 tons and 200 tons capacity, capable of serving all berths.
STEVEDORES: Vessel should provide a stowage plan, manifest of inbound cargo and exceptions list (unusual vessel or cargo characteristics affecting facilitation of cargoes). Vessel should comply with the U.S. Dept. of Labor's safety regulations.
MEDICAL: Advance notice desirable. Hospitalisation available.
TANKERS: Diameter of load lines and discharge lines 8 in. and 10 in. Slop residue facilities. 4 berths available, with draft to seaway depth.
FRESH WATER: Potable water available at most berthing areas.
FUEL: All grades of fuel oil available by truck delivery at shipside, also 24 hour refueling berths available for bunkering.
GANGWAY/DECK WATCHMEN: Not necessary, but available on request.
OPENING/CLOSING HATCHES: At the option of ship.
CERTIFICATES:
Registry of Ship.
Master's Licence.
1st, 2nd and 3rd Officer's Licences.
Radio Licence.
Wireless Operator's Licence.
Derat Certificate (done each year).
(Additional certificates may be required, dependent upon Registry, cargo, trade route engaged in, nationality of crew, etc.).
CUSTOMS ALLOWANCES: Tobacco, 10 packages or 200 cigarettes in possession at any time. Wine and/or Spirits, 1 bottle per officer.
IDENTIFICATION CARDS: U.S. Immigration rules.
CONSULS: The following countries are represented:
Belgium
Costa Rica
Denmark
Dominican Republic
France
Nicaragua
Norway
Sweden
Yugoslavia
REPAIRS: Full service repairs, except large vessel dry docking.
REPATRIATION: Local Agents effect repatriation.
AIRPORT: 5 miles distant.
TIME: U.S.A. Central Time. Central Daylight Time from late April to late October – 5 hours behind GMT. Central Standard Time from late October to late April – 6 hours behind GMT.
HOLIDAYS: Memorial Day, Columbus Day, Veterans Day, July 4th (if on a Sunday, Monday is a holiday); First Monday in September; Fourth Thursday in November; Christmas Day; New Year's Day. Cargo can be worked on these days at holiday pay.
POLICE/AMBULANCE/FIRE: Police — non-emergencies 273-8660; Emergency, including emergency ambulance service 765-2323; Fire, including rescue squad service 347-2323.
TELEPHONES: Can be arranged, but unnecessary because sufficient phones available in dockside offices.
SHORE LEAVE: Crew allowed ashore.
DELAYS: No delay.
GENERAL: Chandlery services for foodstuffs, ship complements and laundry services available. Garbage and waste disposal are available through private operators, chandler usually making the arrangements.
The Liquid Cargo Pier is also available for non-petroleum liquid cargoes and vessel bunkering.
DEVELOPMENTS: Full service Seamen's Club operational in Port. Milwaukee inner harbour berth for maximum size bulk vessels undergoing comprehensive site enhancement. Dry bulk materials handling and warehousing capabilities scheduled expansion for the near future.
AUTHORITY: Port of Milwaukee, 500 North Harbor Drive, Milwaukee, Wisconsin 53202. *Tel:* (414) 278 – 3511. *Telex:* TWX 910 – 262 – 3042. *Cables:* Milharco. *Contact:* Rear Admiral Roy F. Hoffmann USN (Ret.), Port Director.

MOBILE, Alabama: 30.40 N. 88.02 W. (See Plan Book)

DOCUMENTS:
3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Stores List.
2 copies Passenger List (Form I.418).
2 copies Crew List (Form I.418).
Customs boarding Officer will also examine Ship's Register and Loadline Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:
Health Pratique.
Master's Oath (Form 1300).
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.
PILOTAGE: Pilotage is compulsory.
ANCHORAGES: If berth is congested, vessel may anchor at the bar (35 miles from harbour).
RESTRICTIONS: Controlling depth: 40 ft. for entrance, channel and anchorages. Mean tidal range 1.5 ft. Nature of bottom: soft mud. Vessel can dock and sail at any hour at any stage of the tide.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: There are 7 tugs, available 24 hours, with max. 2,600 h.p.
BERTHING: There are 34 berths at most of which, direct loading or unloading can be effected from quayside tracks.Ro/Ro berth available.
Public Grain Elevator: Depth alongside 42 ft. 2 berths, each with 5 loading spouts. Unloading rate for grain 40,000 bushels/hour at each berth. Loading rate 115,000 bushels/hour for grain.
McDuffie Terminals: 2 berths. No. 1 with dolphins, total length 320 m., No. 2 length 170 m. Bulk coal handling plant, depth alongside the berth is 40 ft. Shiploaders can load over 4,000 t.p.h. or 7,000 t.p.h. combined. The stacker/reclaimer can handle 4,000 t.p.h., a rail car tipple rated at 4,000 t.p.h. and barge unloaders that work 3,500 t.p.h. each. A conveyor belt system connects the entire complex.
Bulk Handling Plant: 3 berths, depth alongside 40 ft. Total quay length 1,600 ft. 2 unloading towers which can unload 3,000 t.p.h. and 2 loading conveyors, rate 2,000 t.p.h.
Depth alongside other public berths as follows:

Pier 2	38 ft. MLW	Pier River End B	38 ft. MLW
Pier 3	38 ft. MLW	North Pier B 1	40 ft. MLW
Pier 4	38 ft. MLW	Pier North B 2	40 ft. MLW
Pier 5	38 ft. MLW	Pier North B 3	40 ft. MLW
Pier 6	38 ft. MLW	Pier South C1	41 ft. MLW
Pier 7	38 ft. MLW	Pier South C 2	41 ft. MLW
Pier 8	38 ft. MLW	Pier South C 3	41 ft. MLW
Pier South A	37 ft. MLW	Pier River End C	38 ft. MLW
Pier River End A	30 ft. MLW	Pier North C 1	39 ft. MLW
Pier North A 1	38 ft. MLW	Pier North C 2	37 ft. MLW
Pier North A 2	38 ft. MLW	Pier D Cold Storage	37 ft. MLW
Pier North A 33	38 ft. MLW	Berth 1 tipple	Under repair
Pier South B 1	41 ft. MLW		
Pier South B 2	41 ft. MLW	Berth 2 tipple	44 ft. MLW
Pier South B 3	41 ft. MLW	Berth 3 tipple	40 ft. MLW

CRANES: 1,600 ton capacity (1,200 tons at 208 ft.) crane, 75 ton stationary crane, 50 ton mobile crane, 80 ton floating crane and 45 ton container crane available.
TANKERS: Max. length 950 ft. restricted by turning basin. American Bituminals & Asphalt Co. – Jetty berth dredged to 38 ft.
Magazine Point: Hess Terminal: Jetty berth dredged to 43 ft.
FRESH WATER: Available ex wharf at all berths.
FUEL: Most grades fuel/diesel available via pipe-line, barge or truck.
STEVEDORES: Normal working hours for the port are 0800/1700 hrs. Monday through Friday.
DENSITY: 1,000 (Fresh Water).
REPAIRS: *Alabama Dry Dock & Shipbuilding Company* – Dry Docks ranging from 5,000 to 18,000 tons displacement all serviced by 51 ton gantries. Dock length range from 380 ft. to 620 ft. Also available is a 70 ton floating crane. Any type of repair can be effected.
Bender Ship Repair. 1 dry dock of 2,500 tons displacement. Majority of repair work is top-side. 100 ton floating crane available.
CUSTOMS ALLOWANCES: At the discretion of customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.
HOLIDAYS: Absolutely no work is performed on New Year's Day, Easter, July 4th, Labour Day and Christmas Day. Working holidays are Mardi Gras Day, Veteran's Day and Thanksgiving Day.
DEVELOPMENTS: A 15 million dollar expansion programme, improving the present bulk materials handling plant, construction of the container facility, widening the turning basin and various updating projects.
AUTHORITY: Port of Mobile, Alabama State Docks Department, P.O.Box 1588, Mobile, Alabama 36601. *Telex:* TWX 810 – 741 – 7748. *Contact:* E. G. Browning, Jr., General Traffic Manager.

AGENT: Strachan Shipping Company, P.O.Box 2127, Mobile, Alabama 36652. Tel: 205-433-5401. Telex I: 50-5423. Telex II: 810-741-1221. Cables: "Strachan".

MOREHEAD CITY, N. Carolina: 34.43 N. 76.42 W. (See Plan Book)

DOCUMENTS:

3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.

2 copies Crew Manifest (curio list).

2 copies Passenger List (Form I-418).

2 copies Crew List (Form I-418).

Customs Boarding Officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

Health Pratique.

Master's Oath (Form 1300).

All Foreign Clearances.

U.S. Certificates of Payment of Tonnage Tax (Customs Form 1022).

Certified Crew List.

PILOTAGE: Pilots obtained from Morehead City Pilots' Association, Morehead City, North Carolina 28557. Tel: 726-6134.

The Port Terminal at Morehead City is 3.5 miles from the Sea Buoy. The port is located on the Intracoastal Waterway and is situated 75 miles S.W. of Cape Hatteras and 14 miles West of Cape Lookout.

Pilots should be given 24 hours notice and then contacted by VHF Channel 16 about 2 hours before arrival at Sea Buoy R "2BI".

Pilot boat is about 40 ft. long, with white hull and superstructure; the hull is marked with "PILOT" in black letters on both sides.

RESTRICTIONS: The channel and basin at Morehead City are maintained at a controlled depth of 40 ft. – MLW.

The wharf is constructed of concrete and steel and has marginal tracks and crossovers for full length. Truck ramps are located at various points for easy Roll-on/Roll-off access.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available. Service provided by Carteret Towing Co. Inc., Radio Island, Morehead City, North Carolina 28557. Tel: 919-726-5440.

BERTHING: The wharf is 5,300 ft. long. This length enables the port to provide berths for 10 × 500 ft. general cargo ships and 1 petroleum tanker at any given time.

Adjacent to the general cargo dock area is a 1,000 ft. deep water berth for out-loading through the bulk handling facility.

Morehead City also provides a barge terminal with 1,200 ft. of modern berths. This terminal was developed as a part of the bulk handling facilities, but is also used for the loading or off-loading of a variety of cargoes.

The bulk handling facilities of the port terminal at Morehead City are designed to out-load bulk and aggregate cargoes at a rate of 3,000 t.p.h. *Wharf:* 5,300 ft. of continuous concrete wharf. 1,000 ft. deep-water berth for bulk-handling facility.

Bulk Handling Facilities: 3,000,000 ton annual capacity bulk facility for receipt, conveyance, storage and shipment of bulk cargoes. Loading capacity 3,000 t.p.h.

CRANES: 2×115 ton capacity gantry cranes.

FUEL: Available from Colonial Oil and Texaco Inc.

CONSULS: Finnish Vice-Consul, Wilmington, North Carolina 28401. Tel: 763-5451.

Royal Norwegian Consulate, Wilmington, North Carolina 28401. Tel: 763-8271

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.

REPATRIATION: This is possible but should be avoided as there is no Immigration Office. Closest airport is about 1 hour's drive from the town.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from April to October.

SERVICES: There are no shipyards in the port. Service on any kind of electronic equipment is not available.

AUTHORITY: North Carolina State Ports Authority, P.O.Drawer 829, Morehead City, North Carolina 28557. *Tel:* (919) 726-3158. *Telex:* 510 924-2983. *Contact:* R. F. Goins, Port Manager.

MYRTLE GROVE (incl. Davant), Louisiana: 29.38 N. 89.57 W.

LOCATION: West Bank of Mississippi River, about 82 miles (via Southwest Pass) from sea (at mile 61.5 above Head of Passes).

DOCUMENTS/PILOTAGE: For all general information refer to "New Orleans".

BERTHING: *Mississippi River Grain Elevator, Inc.:* Distance between bollards 1,000 ft., alongside 500 ft. dock, depth 40 ft. (consistent with Southwest Pass). Loading rates, 80,000 to 120,000 bushels per hour. Loading Spouts: 3 spouts in use with 2 additional planned. Total distance between 5 spouts after completion (pivot to pivot) 500 ft.

International Marine Terminal: Max. LOA 290 m. Max. draft 12.2 m. Max. beam 48 m. Berth length 312 m. Length of travel of loader 244 m. One loading spout. Max. loading rate for coal 9,000 tonnes per hour.

Davant:

Electro Coal Transfer Corporation: Terminal located 55 miles above Head of Passes opposite Myrtle Grove. Total length of dock 3,000 ft. Channel depth 12.19 m. Depth alongside 18.0 m. One fixed loader, rate 4,840 tonnes per hour and one travelling loader, rate 6,000 tonnes per hour.

There is to be a Topping-Off operation 2 miles from the S.W. Pass entrance using 4×600 t.p.h. cranes mounted on barges.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Minimum of 2 tugs required for berthing and unberthing. Additional tugs at Elevator Management's discretion.

FRESH WATER: Not available.

FUEL: Not available.

DENSITY: Fresh Water (1000).

AUTHORITY: Plaquemines Port, Harbour and Terminal District, Woodlawn Building, Rt.1, Box 53A, Braithwaite, Louisiana 70040. *Tel:* (504) 682-0081.

Mississippi River Grain Elevator, Inc., P.O.Box "N", Belle Chasse, Louisiana 70037. *Tel:* (504) 656-2212. *Telex:* 58305, TWX 810-950-6621. *Cables:* Mirigrain. *Contact:* A. Maggioni, Chairman. A Di. Benedetto, Vice-Chairman. J. T. Dugas, Traffic Manager.

NAWILIWILI, Hawaii (including Port Allen): 21.57 N. 159.21 W. (See Plan Book)

DOCUMENTS:

4 Crew Lists.

4 Passenger Lists.

Customs Documents.

Clearance, Travelling Manifest.

Local Manifests.

Health Documents.

Bill of Health and Vaccination Certificates.

4 Manifests.

4 Bills of Lading.

Ship's Papers.

Certificate of Registration or Enrolment.

Annual Inspection Certificate.

Load-line Certificate.

Derat Certificate.

Drinking Water Certificate.

Radio Certificate and Licence.

4 Store Lists.

PILOTAGE: Vessel's Agent orders Pilot 48 hours in advance by telephone, correcting ETA as necessary with 4 hours final notice if a last minute change occurs. Tug-boat *"H. A. Walker"* serves as pilot boat for Nawiliwili and Port Allen, 75 ft. long, black hull, white house, topsides red. Radio telephone within 1 hour of arrival and while tug is working. Channels 12, 16 and 18. "WYB 8343". Pilot boards 1 mile East of Nawiliwili and 0.5 miles South of Port Allen. Signals in accordance with International Code.

ANCHORAGES: Nawiliwili: Between Nawiliwili Light and Carters Point in 5 – 9 fathoms. Not good in strong trade-wind weather. Fair holding ground. Not recommended.

Port Allen: 0.5 miles South of Port Allen Breakwater Light in 5 – 10 fathoms. Fair holding ground. Untenable in Kona or S.W. storms which occur from November to March.

RESTRICTIONS: 24 hours notice of arrival is obligatory. Nawiliwili: Arrivals sunrise, departures sunset time. From October 21 to March 21 Pilot boards at 0630 hrs. Balance of year 0600 hrs. Port Allen: No time restrictions.

MAX. SIZE: Nawiliwili: Length 687 ft., draft 32 ft. 6 in.

Port Allen: Length 687 ft., draft 32 ft. on North side and 28 ft. on South side. Pier is 600 ft. long, so larger vessels overhang.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Honolulu Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Communicate through RCA or ITT stations in Honolulu. Also KQM marine operator for radio telephone and telephone to Kauai.

TUGS: One 1,500 h.p. tug meets vessels off port and in outer harbour. Both ship's lines and/or tug's line may be used. Has radio telephone, "WBY 8343" and Channel 12 is usually used. Extra tugs available from Honolulu.

BERTHING: Limited to 1 large vessel at Nawiliwili and 1 at Port Allen. Considerable barge traffic. Prior reservations by Agent necessary with District Manager. Berth conflicts usually solved in Honolulu by rerouting of Island ports.

New Ro/Ro barge facility at Pier 1.

CARGO HANDLING FACILITIES: Nawiliwili has 2 sugar loading gantries on Pier 2; no equipment or storage to handle grain, ore, coal, sulphur. Fertiliser is discharged by self-unloading barge, and the bulk hauled away via truck. There is a container yard but no facilities to off-load containers. Weekly service is by a self-unloader. Roll-on/Roll-off cargo is moved on ramps furnished by barges. LPG and petroleum product lines are privately owned.

STEVEDORES: All stevedoring by McCabe Hamilton and Renny Co. Ltd., with headquarters in Honolulu and branches in outports. 48 hours notice by Agent for labour and equipment. Inward cargo is containers, general, bulk fertiliser, petroleum products, and building and construction materials. Outward is raw sugar, general and molasses. Foreign vessels are subject to heavy fines for carrying stevedore gear inter-island without Customs clearance.

MEDICAL: 2 hospitals on Kauai with 2 doctors under contract to United States Public Health Service. Standard international inoculations and vaccination required. Advance notice by Agent desirable but not necessary.

TANKERS: All piers have pipe-line connections for incoming cargo and outgoing molasses. Fuel oil 10 in., molasses 10 in., water line 6 in., gasoline, kerosene and diesel 8 in. These are the main lines under the wharves. Hose connections to ships vary with the type of riser and hose so size of fittings should be checked with Agent. No slop discharge facilities available. 4 tanker berths available.

DENSITY: Varies from full salt to brackish in periods of heavy rainfall with freshets in the streams. No specifics available.

FRESH WATER: Available from 2 in. dock hydrants via ship's hose. About 100 gallons per minute.

FUEL: Bunker C not available for large vessels. Diesel fuel available via tank truck with 6 hours notice. Weekend and holidays order previous day.

GANGWAY/DECK WATCHMEN: Tankers discharging gasoline required to have uniformed dock watchman. Usually off duty policeman. All ships provide own gangway and deck watch.

OPENING/CLOSING HATCHES: Normally done by stevedores. A few foreign ships prefer doing it with own crew.

CUSTOMS ALLOWANCES: 200 cigarettes, 50 cigars per man, and one bottle, U.S. quart, wine or spirits.

IDENTIFICATION CARDS: Desirable but not required by law.

CONSULS: All in Honolulu.

REPAIRS: Light machine shop, welding and burning and pipe work available. Plantations may do some heavy repairs if part can be sent to their shop. Their engineers are helpful in emergencies. Heavy or technical repairs must be done in Honolulu.

REPATRIATION: Agent can arrange by air via Honolulu. Immigration clearance necessary.

AIRPORT: Lihue is 3 miles from Nawiliwili and 20 miles from Port Allen; served by inter-island regular carriers. Numerous lines, and charter flights available.

TIME: GMT minus 10 hours, all year round.

HOLIDAYS: National: New Year's Day (January 1st); President's Day (February 22nd); Memorial Day (May 30th); July 4th; Labour Day (first Monday in September); Election Day (first Tuesday in November); Veteran's Day (November 11th); Thanksgiving Day and Christmas Day (December 25th). Cargo can be worked but at penalty rates.

POLICE/AMBULANCE/FIRE: Emergency calls – Dial 911 for all services, or call "O" for operator.

EMERGENCY CO-ORDINATION CENTRE: Coast Guard Search/Rescue Centre, Tel: 245-4521.

TELEPHONES: Arrangements by Agent.

SHORE LEAVE: Permitted after Immigration check. Iron Curtain or Communist visitors may be restricted.

DEVELOPMENTS: Turning basin may be enlarged to handle liners and large bulkers. Project depth 35 ft.

AUTHORITY: State of Hawaii, Department of Transport, Harbours Division, P.O.Box 946, Lihue, Kauai, Hawaii 96766. *Tel:* (808) 245-6996. *Contact:* Carl A. Forsen, Kauai District Manager.

AGENT: See "Honolulu".

NEW BEDFORD, Massachusetts: 41.38 N. 70.55 W.

(See Plan Book)

DOCUMENTS: See "Boston".

PILOTAGE: Compulsory. 3 Massachusetts State Pilots available, ordered through Agent. VHF Channel 16 monitored. Pilot on station only after 12 hours notice. Small pilot vessel with basic communication equipment. Pilots board all vessels at Buzzards Bay Buoy at the entrance to New Bedford Outer Harbour situated at Lat. 41° 30′ 42″ N., Long. 70° 50′ 07″ W.

ANCHORAGE: It is recommended that vessels delayed due to weather, etc., anchor 0.5 mile South of Buzzard's Bay Bell Buoy.

RESTRICTIONS: A modern harbour approach begins at Buzzard's Bay Buoy and runs a straight course of 7.5 miles direct to the pier facilities. The channel is 350 ft. wide and has a depth of 30 ft. MLW. The channel leads into a moderate size (1,000 yd.) turning basin.

MAX. SIZE: 700 ft. length. Vessels over 30 ft. draft restricted by tides.

HEALTH: See "Health: All Ports" before first U.S. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: RCA Chatham Radio, New Bedford Marine Operator for VHF, and Boston Marine Operator for ship to shore frequencies.

VHF: Pilot vessel on Channels 16 and 13. Pilot office on Channels 16 and 18A.

TUGS: Tugs join vessel in inner harbour. Tug lines used. 2 tugs available. Tugs are not normally used at the State Pier in docking and undocking of deep-water vessels. The large turning harbour basin, the wind-sheltered position of the pier and lack of tidal current minimise use of tugs. In extreme weather conditions tugs are used.

BERTHING: At State Pier, berthing space for 3 ships:
North side 600 ft. length, South side 775 ft. length, East side 450 ft. length.
Depth of water at all berths is 30 ft. MLW.
Maritime Terminal, depth 27 ft.

BRIDGES: Passage to upper reaches of harbour to Maritime Terminal requires navigation through the New Bedford and Fairhaven Bridge only in daylight for larger vessels over 250 ft. length.

STEVEDORES: 24 hour notice required for New Bedford Stevedoring Corporation to prepare gear. 25 tons discharged or loaded per hour as average production per gang. Nearly all cargoes handled.

MEDICAL: 24 hours notice required. Excellent hospital facilities available.

TANKERS: Hurricane dyke barrier gate 150 ft. wide with depth of 30 ft. MLW.

DENSITY: Static, since tidal variations light. Density same as ocean water.

FRESH WATER: Fresh water available.

FUEL: All types available, to be ordered in advance.

GANGWAY/DECK WATCHMEN: Watchmen available. Non police or police.

OPENING/CLOSING HATCHES: Depends on negotiated contract and cargo handled.

CUSTOMS ALLOWANCES: Designated by U.S. Customs with regard to particular circumstances.

CONSULS: Most Consuls available in Boston, 50 miles or 1 hour away.

REPAIRS: All types of minor ship repairs available.

REPATRIATION: Agent can handle formalities.

AIRPORT: 3 airports within 1 hour's drive. All international services.

TIME: Shift from Standard to Eastern Daylight Saving Time. Local time GMT minus 6 hours.

HOLIDAYS: New Year's Day (January 1st); Washington's Birthday (February 22nd); Patriot's Day (April 19th); Memorial Day (May 30th); Independence Day (July 4th); Labor Day (first Monday in September); Columbus Day (October 12th); Veterans' Day (November 11th); Thanksgiving Day (last Thursday in November); Christmas Day (December 25th).

TELEPHONES: No telephones on board, but exist adjacent to pier.

SERVICES: All services can be obtained if required.

SHORE LEAVE: If U.S. Immigration has cleared crew member, he is allowed ashore.

SHIPMASTER'S REPORT: December 1982.
Documents: See "Boston".
Pilotage: Compulsory. Pilot boards at "BB" in Buzzards Bay. Advise agent 6 hours prior to arrival.
Restrictions: Vessels enter and leave on rising tide during daylight hours. The approach is hazardous as vessel has to pass through hurricane barrier (width 150 ft.) and swing bridge (width 94 ft.).
Max. Size: LOA. 600 ft. Beam 85 ft. Draft 25 ft. Underkeel clearance of 5 ft. required in channel. Mean tidal range 3 ft.
Radio: Chatham Radio.
Tugs: 3 tugs available (2,000 hp.). 2 tugs are normally sufficient for berthing/unberthing.
VHF: Pilot on VHF Channel 16.
Berthing: Maritime Terminal Wharf: Distance from "BB" Buoy to Berth is 9 miles. U.S. and U.K. pilot books indicate 30 ft. to 31 ft. at berth. Least depth in Channel from sea to berth 30 ft. Nature of bottom at berth – very soft mud. Density 1025. Good security. Palletised cargo and 20 ft. and 40 ft. containers handled. Ample storage space for containers.
Services: Fresh Water, Fresh Provisions, Limited Repair Facilities, Lloyd's Surveyors (at Boston), Salvage Surveyor (New York), Laundry Service, (Boston). Bunker Fuel Oil, Diesel Oil, Lubricating Oil, Doctor, Hospital, Groceries and Meats (Boston).

AUTHORITY: City of New Bedford Harbor Development Commission, 1204 Purchase Street, New Bedford, Massachusetts 02740. *Tel:* (617) 997 – 9441. *Contact:* Henry Z. Horn, Director.

NEW HAVEN, Connecticut: 41.14 N. 72.55 W.

(See Plan Book)

DOCUMENTS: Refer to "New York".

PILOTAGE: Compulsory. State Pilots are available on a 24 hour basis and are usually arranged through the ship's Agent or directly by shipping companies. Pilot will board vessel in vicinity of New Haven Sea Buoy, marked "N.H." – short and long flash; black and white vertical stripes. Boarding will be from a 44 ft. steel launch named *New Haven Pilot* – blue hull with "Pilot" marked on both sides in white letters, or from a tug-boat. Contact can be made via VHF telephone, Channel 13 (156.65 MHz), Channel 16 (156.80 MHz), or Channel 19A (156.95 MHz).

Pilotage Association Report: The New Haven – Bridgeport Pilots maintain a tide gauge, from where they depart to meet vessels. The normal tidal range is 6 ft. They believe that 4 ft. of water in excess of the ship's deep draft is necessary for a safe transit. A rule of thumb, used by them, is 31 ft. on LW, and 37 ft. on HW. (For any variation of this, a Pilot should be consulted.) A normal transit time from the entrance buoy to any of the berths in the inner harbour is 45 minutes to 1 hour. Docking time of 30 minutes to 1 hour should be added to this average, dependent on where the ship is berthing, as well as possible weather conditions.

There was a maintenance dredging of New Haven Harbour, completed in 1983. The after-dredging survey submitted to them by the US Army Corps of Engineers shows a controlling depth, with rock bottom of 35 ft. at MLW. This rock is located at South West Ledge Light at a point where a 35° turn is executed by the ship.

Prevailing winds are Westerly, and have a decided effect on the rise of tide. The tide gauge is the determining factor as to the time of entry when wind conditions do exist.

ANCHORAGES: Vessels awaiting berth, and or tides, will find good anchorage up to 40 ft. draft within 1 mile S. – S.E. of the "N.H." Buoy.

RESTRICTIONS: Vessels can proceed to and from berths in New Haven Harbour at any hour during the day or night, weather and tide permitting. Entrance channel dredged to 35 ft. MLW and width 400 ft.

MAX. SIZE: Draft up to 38 ft. subject weather and tides. Vessels of 50,000 d.w.t. with part cargo, do call occasionally, but should consult with the Pilot and terminal concerned.

HEALTH: See "Health: All Ports", before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels arriving from North use Chatham Radio. Vessels from South use Amagansett Radio on Long Island.

Bridgeport Marine Operator on VHF Channels 24 and 27.

TUGS: Red Star Towing Company operates tugs based in New Haven and serves Long Island Sound Ports. The office is on Channel 19A. Tugs monitor 19A, 16 and 13. Dispatchers can be reached 24 hours a day on Channel 19A. The number for Red Star is area code (212) 536-3841 or (800) 225-5470.

BERTHING:

Wyatt Inc.: Ships are not docked on the West side at ebb tide, though ships in ballast can sail whenever ready, regardless of flood or ebb tide. The East berth docking is done on flood or ebb, with draft to be considered. In the Spring of 1983, this terminal was dredged to 37 ft. on the West side, and 32 ft. on the East side. Fresh water and bunkers are available, with steam on the East side available through a 2 in. line, with 125 lb. pressure.

Ships of 715 ft. are regularly docked here. Vessels are docked port side to on the West side, and would be delayed if the East berth is occupied by a ship.

Gulf Terminal: The Gulf Dock is located parallel to the channel on the East side of the inner harbour, and ships of 35,000 d.w.t. with draft of 35 ft. and LOA of 675 ft. are considered to be maximum size. (350 ft. from bow to manifold.)

The dock parallels the channel and consists of 2 main caissons, a centre platform and dolphins connected by a catwalk. Ships consigned for T.A.D. Jones Terminal use this facility.

T.A.D. Jones: This dock is on the East side of the harbour, a 500 ft. finger pier at a 90° angle to the channel. The North side has 27 ft. of water and the South side is used for barges. Tankers, or dry cargo ships no longer call at this pier.

Arco Terminal: Arco Dock parallels the main channel, and is 750 ft. long, with 2 main caissons, dolphins, and platform, connected by catwalks. Ships up to 50,000 d.w.t., and 35 ft. draft use this berth arriving on the rising tide, and 35 ft. on LW in berth. Ships are docked starboard side to.

Bunkers are not available, though fresh water is, but only in mild weather.

New Haven Terminal, Inc.: This facility has 3 ship berths on a 90° heading from the channel, dredged in 1983. The Scrap Dock, as it is called, is a continuous pier, with a wearing strip cushioned by a rubber backing. The pier is 650 ft. long, with 35 ft. at MLW. Scrap is loaded from here and all types of dry cargo handled. Two gantry cranes are on the dock and additional mobile cranes are available. Railroad cars can be brought on to the dock. Ships berth port side to.

The Finger Pier on the North side is a continuous pier, 650 ft. long, and is mainly used as a tanker berth. Bow to manifold is 350 ft. (additional hoses can be added to increase this distance.) The slip is 196 ft. in width, and 2 ships may be accommodated at the same time, as long as 30 ft. is allowed for a tug boat between the ships. Depth 35 ft. at MLW.

The South side is a tanker or general cargo berth, with 40 ft. at MLW. Bow to manifold is 350 ft. and additional hoses may be used. Ships of 700 ft. may be secured at all 3 of these berths.

Bunkers can be trucked in, and fresh water is available at all berths.

Exxon Terminal: Exxon Dock parallels the main channel. The dock is 750 ft. long with 2 main caissons, dolphins, and platform connected by a catwalk.

Ships of 50,000 d.w.t. call at this dock, with a draft of 36 ft., docking on the rising tide. Ships are docked starboard side to. Bunkers are not available, though fresh water is.

TANKERS: See "Berthing".

BALLAST: There are no slop lines available.

FUEL: Available from oil terminals or delivered by barge.

FRESH WATER: Available at all terminals.

MEDICAL: All facilities available.

CUSTOMS ALLOWANCES: At the discretion of Customs Officers. Normal allowance is 200 cigarettes or 2 lb. of tobacco and 1 quart wine/spirits per man. Additional allowances may be given if considered necessary, due length of vessel's stay in port.

AIRPORT: New Haven Airport 1 mile distant. New York International Airport 70 miles distant.

CONSULS: All countries represented in New York.

HOLIDAYS: New Year's Day (1st January); Washington's Birthday (22nd February); Memorial Day (30th May); Independence Day (4th July); Labor Day (first Monday in September); Columbus Day (12th October); Veteran's Day (11th November); Thanksgiving (fourth Thursday in November); Christmas Day (25th December).

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from April to October.

SERVICES: Professional Sea Services (monitor Channels 16 and 19A) of New Haven offers launch service to ships at anchor, movement of stores, and skin divers. Tel: (203) 932-2159.

GENERAL: Through a co-operative agreement, all the terminals have a slick boom, skimmers and absorbent available at all times.

There are no slop tanks available in this port for pumping ballast.

None of the terminals supply gangways; ships must use their own.

AUTHORITY: U.S. Coast Guard, Captain of the Port, New Haven. *Contact:* Captain D. V. Monks, New Haven-Bridgeport Pilots' Association Inc., 23, Highland Drive, Wallingford, Connecticut 06492. *Tel:* (203) 878-8667.

NEW LONDON: Connecticut: 41.21 N. 72.06 W.

(See Plan Book)

DOCUMENTS: Refer to "New York".

PILOTAGE: Vessel usually notifies Agent 48 hours before arrival, who will arrange Pilot boarding. Pilot boards at Sarah's Ledge, which is close to anchorage at harbour entrance.

ANCHORAGES: In Thames River, and in Long Island Sound, approx. 2 miles W.S.W. of New London Ledge Light bounded by lines connecting points which are following bearings and distances from New London Ledge Light: 246°, 2.6 miles; 247°, 2.1 miles; 233°, 2.1 miles; and 235°, 2.6 miles.

RESTRICTIONS: Pilots recommend daylight docking but can dock at night if necessary. Entrance channel 40 ft. deep.

MAX. SIZE: Dry cargo vessels and tankers 700 ft. long are using the harbour.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels arriving from North use Chatham Radio on Cape Cod. Vessels from South use Amagansett Radio on Long Island. However, either one may serve the purpose.

TUGS: Usually join vessel at Ledge Light if a dry cargo vessel, and off Sarah's Ledge if a tanker. Tugs use ship's lines; if tug's lines are used this is part of charge.

BERTHING: Advance ETA must be made for berthing, and it is suggested to dock during daylight hours when possible.

State Pier No. 1: depth, 28 to 36 ft. MLW.
Dow Chemical Co. Wharf: depth, 22 ft. MLW.
City Wharf Ferry Terminal: depth, 22 ft. MLW.

BRIDGES: There are no bridges across Main Ship Channel. However, at New London, at the head of the Main Harbour, the Thames River is crossed by 1 drawbridge and a twin fixed bridge: the New York, New Haven and Hartford Railroad bascule bridge with a horizontal clearance of 151.5 ft. and a vertical clearance of 30.9 ft. at high water and a fixed highway bridge with a horizontal clearance of 200 ft. and a vertical clearance of 135 ft. at high water.

STEVEDORES: ETA of 72, 48 and 24 hours is required, as gangs must be requested by 1500 hrs. on weekdays. Average discharge, about 20 tons per gang per hour.

TANKERS: Discharge at Hess Oil Co. berth, 12 in. and 10 in. lines.

Hess Oil Dock: depth alongside 36 ft.
Texaco Wharf: depth alongside 18 ft.
Pfizer Wharf: depth alongside 18 ft.

MEDICAL: All facilities available.

FRESH WATER: Available at pier side through 2.5 in. and 1.5 in. hoses.

FUEL: Available at tanker berths or by barge.

GANGWAY/DECK WATCHMEN: Not required and not recommended.

OPENING/CLOSING HATCHES: Performed by stevedores.

IDENTIFICATION CARDS: Not required.

CONSULS: Nearest at New York.

REPAIRS: 3 waterfront marine repair plants are equipped to repair vessels at the port. The Nelseco Navigation Co. and Thames Shipyard Inc. each owns and operates a plant at New London on the right bank of the Thames River; the General Dynamics Corp., Electric Boat Division owns and operates a shipyard and marine repair plant at Groton on the left bank of the river.

DRY DOCKS: 1 floating dry dock, 1 graving dock and 3 marine railways are available to the public at 2 of the marine repair plants.

1 floating dry dock, steel construction, with a lifting capacity of 6,500 tons, located on the West side of the pier E, has an overall length of 448 ft. length of 435 ft. 6 in. on the keel blocks, overall width of 97 ft. inside clear width of 70 ft. and depth of 26 ft. of water over the keel block when submerged.

1 graving dock, located South of Piers A, B, C, and E, has length of 515 ft., width of 70 ft., and 35.5 ft. depth of water over the sill and 34.5 ft. over the keel blocks at MHW.

REPATRIATION: Facilities exist.

AIRPORT: Nearest airport is Trumbull Airport, situated about 3 miles East of Groton, Connecticut. There are scheduled commercial airlines serving this field. Allegheny Airlines and Pilgrim Airlines run frequent connecting flights to Bradley and Kennedy International Airports.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours, from April to October.

HOLIDAYS: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (22nd February); Good Friday; Memorial Day (30th May); Independence Day (4th July); Labour Day; Columbus Day (12th October); Veteran's Day; Thanksgiving Day; Christmas Day (25th December). Cargo work can be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police, 443 – 4315; Ambulance, 443 – 4388; Fire, 443 – 4381.

TELEPHONES: Available if required.

SHORE LEAVE: Allowed.

DELAYS: Availability of berthing might cause some delay.

AUTHORITY: State of Connecticut, Dept. of Transportation, Bureau of Waterways, State Pier, New London, Connecticut 06320. *Tel:* (203) 443-3856. *Contact:* Alan F. Ferran, Maritime Operations Bureau.

NEW ORLEANS, Louisiana: 29.56 N. 90.04 W.

(See Plan Book)

DOCUMENTS:

3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Stores List.
2 copies Passenger List (Form I-418).
2 copies Crew List (Form I-418).

Customs boarding officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States Port:

Master's Oath (Customs Form 1300).
All foreign clearances.
Certified Crew List.

The Bureau of Customs at New Orleans, Louisiana, will not, regardless of the circumstances, accept Customs Entry Papers from vessels unless they are on the proper U.S. Customs Forms and properly prepared.

Specially referred to are Customs Forms 1303 (Ship's Stores Declaration), 1304 (Crew Effects Declaration) and 1302 (Inward Foreign Manifest).

U.S. Customs at New Orleans require that the 1303 be completed, that is all stores (deck, engine, etc.) be listed on the form; it must also include firearms and medicines. They will not accept "as per attached list".

Form 1304, Crew Effects List, must likewise be properly completed. All effects and curios will have to be listed on the form. The term "souvenirs" is not sufficient and may not be used. All values have to be listed. Attachments to the 1304 are not permitted. (This does not apply to American Flag vessels using the Form I-418 Crew List with Crew Declaration numbers listed for their souvenir list.)

Also see "Berthing – Ama (Shipmaster's Report) – General" regarding Customs' areas of jurisdiction.

PILOTAGE: Advise Agents ETA at sea buoy 48 hours in advance. Agent will arrange for Pilot. Pilot boat 46 ft. long, red hull, white cabin, flying blue and white Pilot flag. Pilot boards at sea buoy, requires Pilot ladder 6 ft. above water level. Pilot boats can be contacted by VHF, Channel 9 when 30 to 40 miles off, or ship-to-ship Channel 2738. Bar Pilot is exchanged for River Pilot at Pilot town, Head of Passes.

Following advice received from Crescent River Port Pilots' Association:

Cable: Crespilots, New Orleans.

Vessels bound to any destination on the Mississippi River and Mississippi River Gulf Outlet are requested to supply the following information via Coastal Radio Telegraph addressed to Crespilots, New Orleans:

(1) ETA – 24 hours before expected arrival at pilot station (Sea Buoys), and any change of ETA in excess of 2 hours.

(2) Indicate if vessel is arriving Mississippi River or Mississippi River Gulf Outlet.

(3) Deepest fresh water draft and speed of vessel.

(4) Please contact pilot station at entrances via VHF Radio Phone on Channel 16 (156.80 MHz), Channel 9 (156.45 MHz), or, Channel 13 (156.65 MHz) at least 2 hours prior to arrival for boarding instructions.

Your co-operation will greatly assist in expediting the dispatching of Pilots and avoid costly delays to your vessels.

ANCHORAGES: Safe anchorage within 2 miles of South Pass or S.W. Pass entrance. At the Point, below New Orleans, vessels may anchor without tug assistance.

RESTRICTIONS: Draft governed by S.W. Pass, project depth 40 ft. Entrance day and night. New Orleans is 115 miles upriver.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

TUGS: Available, and join vessel off berth if required. One tug normally used for berthing/unberthing at New Orleans.

BRIDGES: 4 bridges. 2 bridges cross river at New Orleans, 1 at Baton Rouge and 1 at Donaldsonville. Sufficient clearance at all times.

New bridge under construction in New Orleans.

BERTHING: *Public Grain Elevator.* No. 2 berth, 670 ft. long, 40 ft. depth; No. 3 berth, 650 ft. long, 40 ft. depth; No. 4 berth, 635 ft. long, 40 ft. depth.

Loading Rates 20,000 bushels per hour per belt, in berths 2 and 3; up to 40,000 bushels per hour per belt, in berth 4. Each berth has 2 loading belts.

Southern Scrap Material Co: Berth 550 ft. long, 32 ft. depth. Loading 200 t.p.h. with cranes.

Chalmette: Humble Oil Terminal: tanker berth 30 ft. depth; Tenneco Oil Terminal: tanker berth 35 ft. depth.

Kaiser: Chalmette Wharf: Aluminium discharge facilities, max. draft 38 ft.

Terminals on West Bank of Mississippi:

Amesville: Texaco tanker loading berth, 34 ft. alongside. 2×8 in. hoses loading up to 12,000 b.p.h. No ballast facilities.

Avondale: American Liberty Tank Terminals berth, 60 ft. alongside. 4 × 6 in. hoses loading up to 18,000 b.p.h. No ballast facilities. International Tank Terminals berth, 45 ft. alongside. 12 in. hoses loading 150 t.p.h.

Gretna: Publicker Chemical Corp.: berth 30 ft. alongside. Southern Pacific Company: berth 600 ft. long, 35 ft. depth; dry cargo discharging only. Industrial Molasses Corp: berth 27 ft. depth; 2 × 10 in. pipe-lines, loading 200 t.p.h.

Marrero: Hess Terminal Corp: tanker berth 38 ft. depth; 6 × 12 in. hoses loading 500 t.p.h. Texaco: tanker berth 35 ft. depth; 6 × 16 in. lines loading 250 t.p.h. No ballast facilities.

St. Rose: Cities Service: tanker berth 35 ft. depth; International Tank Terminals: berth 35 ft. depth; no fresh water available.

Westwego: Continental Grain Elevator: berth 600 ft. long, 40 ft. depth; loading 3,000 t.p.h., 2 loading belts. Louisiana Dock: 28 ft. alongside, bulk oil products loaded 200 t.p.h. Pacific Molasses Co: berth 35 ft. alongside.

Ama: Shipmaster's Report: February 1985.

Berth: Farmers Export Elevator Co.

Location: Lat. 29° 56.4′ N.,Long. 90° 18.5′ W. On the S.W. bank of the Mississippi about 122 miles from the S.W. Pass (New Orleans Customs Zone).

Health/Agriculture: See "U.S.A. – General" before first Port.

Tugs: Tugs normally used.

Berth: Length of berthing face about 550 ft.

Port side to, head up. Head, stern, breast lines to dolphins. Springs to wharf or dolphins according to size. Strong current along berth. River traffic passes close by. Substantial moorings required, with regular adjustment. Poop gangways generally do not reach wharf. A contractor's gangway normally on wharf but is charged for delivery, collection in addition to rental. Access road very narrow, no vehicles allowed on wharf. Road deliveries must be collected manually from levee 300 yards away. Otherwise delivery by boat from Fairview Wharf. All provisions, laundry, etc., from New Orleans. Public telephones on wharf.

Loading: Loading rate about 1,500 t.p.h. – 2,000 t.p.h. Using 4 "Buhler" arms simultaneously. Sometimes there is a delay in back weighing cargo for preparation of documents.

Fuel: By barge at anchorage only.

Density: 1000.

General: The River is divided into 3 Customs divisions, namely Baton Rouge, Gramercy and New Orleans. To pass from one to another requires a new port entry with fresh copies of Crew Lists, Store Lists, Crew Personal Manifests, etc. Additional copies should be prepared at the same time as those for the first entry, as the Agents can then go ahead with the formalities.

It is a common practice for ships to anchor below New Orleans for clearance by Customs, N.C.B. and U.S.D.A. before going on towards the loading terminal. Bunkers are generally taken during this period as the grain elevators normally refuse permission to do this alongside.

Authority: Farmers Export Company, P.O.Box 97, Ama, La 70031.

CONTAINER HANDLING FACILITIES: Handled at most docks. Full container facilities at Morrison Yard wharf, length 430 ft. France Road berth No. with 830 ft. leased to Sea-Land. Napoleon Avenue wharf 1,520 ft. Nashville/Henry Clay wharf 2,820 ft.

. France Road Berth No. 4, wharf 700 ft. France Road Berth No. 5, wharf 900 ft. Berth No. 6, 800 ft. Berth No. 4 leased to Navieras de Puerto Rico and Berths No. 5 and 6 leased to New Orleans Marine Contractors, Inc.

France Road Berth 6, with Ro/Ro pier.

STEVEDORES: Working hours 0800 – 1200 and 1300 – 1700, Monday to Friday.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

MEDICAL: All facilities available.

DENSITY: Fresh water (1000).

FRESH WATER: Available ex-wharf.

FUEL: Only available by barge. Oil companies can supply Bunker "C" ex-terminals at Amesville and Marrero.

GANGWAY/DECK WATCHMEN: Recommended if any crew detained by Immigration.

CONSULS:

Whitney National Bank of New Orleans, 228 St. Charles Avenue, New Orleans, LA 70130. 504/586-7272.

SHORE LEAVE: Allowed for any crew member not detained by Immigration.

DEVELOPMENTS: Jourdan Road Terminal Complex comprising of a two berth facility with 290,000 sq.ft. of open space, 144,000 sq.ft. transit shed complete with crane rails and marginal track, plus 440,000 sq.ft. marshalling area. Marshalling area adjoining the terminal complex consisting of 10 acres with an additional 34 acres of preload area to be developed in fiscal year 1987.

SHIPMASTER'S REPORT: 1975.
Customs: Stores List. Curio List. 1 Crew List. Sealed High Duty Bond, Unchecked.
Immigration: Visaed Crew List. Seaman's Red I.D. Card or Passport along with American Crew Pass. Typed. Question asked by Officials "How long at sea?" I.D. Card handed back to seaman with American Pass stamped. Department very thorough and efficient.

No mail or money to be distributed until Immigration completed, also no persons permitted ashore or onboard until formalities completed except for Agents and Officials.

If no visaed crew list Master signs official form. Cost US$10.0 for whole ship's company.
Port Health: Radio Pratique not granted as seamens' cards not completed. No representative visited vessel. Report any death through Agents.
Agriculture Dept.: Inspected vessel. Galley, Messrooms, Store-rooms, etc. Meat and Vegetable rooms sealed.

Garbage bins to be covered (Collection expensive, retain on board until sail if possible).

Rat guards to be used.
Provisions and Stores: Select own supplier. Prices comparable U.K. with good quality expensive. Stores and Medicines ordered through providore.
Laundry: Satisfactory. Billed by weight. 24 hour service.
Watchmen: None placed on board but security police at section openings.
Telephone: None placed on board. Use office on quay side.
Water: Plenty available. Shore connections used.
Bunkers: Delivered by barge. Charged for what is ordered. Do not over stem. Barge hired from private firm. Any bunkers not taken paid for and revert to barge owners.
Walport Films: Exchanged.
Coast Guard: Require number of Oil Pollution Certificate (Certificate of Financial Responsibility). Whether AMVER participant. Require ship's particulars including horsepower. Displacement tonnage on sailing. Name of Master and Chief Officer. Dangerous cargo particulars and stowage.
National Cargo Bureau: Representative from National Cargo Bureau comes onboard and requests ship's particulars also ports of call to and from. Inspector looked at hatches where cargo to be loaded. He then issues a Certificate of Readiness. Loading can then commence.
Code of Federal Regulations: Each ship should have a copy. Difficult to come by. Acquired 1970 copy from Agents. Equivalent to our 'Blue Book'.
Repairs: Select own firm. Anxious to please. Unable to judge as little work contracted out.
Money: Delivered by separate security firm. Satisfactory.
Radio Messages: Send ETA at least 48 hours before arrival to Agents and Branch Pilots with draft. Notify Captain of the Port of any explosives for discharge or in transit. If all healthy and documentation correct ask for Radio Pratique. Confirm ETA at 24 and 10 hours. Inwards send ETA to Agents after passing Pilot Town. Agent will notify if Radio Pratique granted. Not necessary to fly "Q" flag going up river.
Stevedores: Hours of work 0800 to 1200 hrs., 1300 to 1700 hrs. Straight time. Weekday gangs will work until 1800 or 1900 hrs. to finish. Night: 1800 hrs. to midnight, 0100 to 0600 hrs. Head Stevedore checks Factory Act Book. Gangs will work continuously except for 3 hours in any 24 hours. 4 different Union Contracts. Plan maker makes own plan then airmails same to ports of discharge. Crew open hatches also close same. Crew not to do any cleaning.
General: Use S.W. Pass at all times. South Pass has only 18 ft. of water and shoaling all the time.

Pilot boards on lee side at Sea Buoy – Flash "A" (· –) from fast launch painted black. Ladder about 6 ft. from water level. Branch Pilot takes vessel to Pilot Town where River Pilot takes over. Ladder usually starboard side inward and port side outward 8 ft. above water. First come first served at sea buoy. About 1.5 to 2 hours from Sea Buoy to Pilot Town and about another 6 hours to berth. Proceed up river at harbour full speed. Reduce speed occasionally for long tows, dredgers and ships on loading berths.

River Pilot docks vessel.

Signals by day "H" flag. By night nothing.

Inland waterways rule of road applies.

We had clear daylight run up river and down at night. Mid December. Start of fog. Low fog experienced on water also some patches, fairly thick. If fog does develop it is worth remembering that once past Pilot Town Southbound, few if any places to anchor and one has to continue on.

Racon at entrance useful. Anchorages as per charts. When arriving contact Pilot on VHF Channels 9, 12, 13.
Berth: Satisfactory. 24/29 Market Street. Just past bridge. Quite a long walk to open section to get out of docks. Recommend at night get taxi back and if walking into town by day at least 2 persons.

Sufficient bollards. No cranes. Berth head up. Usually starboard side to.

Moorings. 4 headlines, 4 sternlines plus 2 springs each end. Passing traffic fairly heavy with considerable wash. Rat guards a requirement.

Ship's gangway. Quay about 25 ft. above water level. Wooden pile fenders very effective.
Tugs: Used for berthing and unberthing. 1 only alongside port forward shoulder. 2 tug's lines. When making fast tug passes portable Walkie Talkie on board to send up to Pilot on bridge. Pilot left by tug which used own ladder.
Radar: Satisfactory repairs carried out.

SHIPMASTER'S REPORT: 1979.
South West Passage:

Pilotage: Pilots prefer accommodation ladder together with pilot ladder but will sometimes use pilot hoists, on larger vessels.

Restrictions: For 100,000 d.w.t. vessel max. draft for S.W. passage is 35 ft., (fresh water) to sail out at any time.

SHIPMASTER'S REPORT: 1979.
Mississippi Lightening Area:
Port Limits: Centred at Lat. 28° 00′ N., Long. 89° 30′ W. and within 15 nautical miles radius.
Documents: Officials take photostat copies of Bill of Lading and give receipt for cargo, and take one copy of Notice of Readiness.
Pilotage: They are equipped with Loran "C".
Anchorages: Very deep. Vessel drifted 7 nautical miles N.N.E. in 11 hours (February) with wind N.E. – 3. Checked with satellite navigator.
Health: No formalities.
Radio: Initial contact on W/T via "WLO" Mobile then by R/T 12427.5 kHz A3J. When close enough Channel 16 VHF; then Channel 11 for all operations. If vessel fitted with bridge wing VHF extension then best to give all engine room orders over Channel 11 so that lightening vessel can also hear.
Berthing: As per OCIMF/ICS SSTG (P). Require 2 headlines and 1 stern line from STBL after putting aboard their lines which are all polypropylene except springs which are wires with nylon tails. Steamed at about 3.5 knots. They throw across heaving lines and carry all necessary equipment. Do not require derrick, they have gangway and 4 'Yokohama' fenders.
Tankers: STBL can load at up to 10,000 t.p.h. They prefer to use 2 centre manifolds with reducers down to 16 in.
Identification Cards: Required.

AUTHORITY: Board of Commissioners, Port of New Orleans, P.O.Box 60046, New Orleans, Louisiana 70160. *Tel:* (504) 522-2551. *Telex:* 58-7496. *Contact:* Denis B. Grace, Trade Development. Kenneth Parker, Docks.

AGENT: Strachan Shipping Company, 2640 Canal Street, New Orleans, Louisiana 70119. Tel: 504-827 8600. Telex I: 5-8210. Telex II: 810-951-5070. Cables: "Strachan".

NEW YORK, New York and New Jersey:
40.43 N. 74.00 W. **(See Plan Book)**

DOCUMENTS:

3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Curio List).
2 copies Stores List.
2 copies Passenger List (Form I – 418).
2 copies Crew List (Form I – 418).

Customs boarding officer will also examine Ship's Register and Load Line Certificate.

In addition the following documents will be required for formal entry, to be made within 48 hours of arrival from abroad:

Health Pratique.
Master's Oath (Form 1300).
All Foreign Clearances.
U.S. Certificates of payment of Tonnage Tax (Customs Form 1002).
Certified Crew List.

PILOTAGE: Compulsory for foreign flag ships, and U.S. ships bound to and from foreign ports.

24 hours notice of ETA required. Pilot boat should be contacted on VHF Channel 16, call "Ambrose Pilot", pilot vessel also on Channels 13, 8 and 18A or ship-to-ship Channel 2638 or 2738. Vessels requiring Pilot should hoist signal letter "G" in daytime. In foggy weather the letter "X" should be sounded on whistle.

Pilot boat is generally found about 1.5 miles West of Ambrose Light Tower. In bad weather Pilot tries to stay windward of normal pilot station.

In poor visibility an inbound ship should make Ambrose Tower and then proceed at slow speed to the Ambrose Channel Sea Buoy while blowing the letter "X" on her whistle. If no Pilot is obtained by the time she is in the vicinity of the sea buoy she should then anchor about 0.5 mile to 1 mile North of the line from Ambrose Tower to the sea buoy and await Pilot.

ANCHORAGES: For ships entering from Sandy Hook there are anchorages in Lower New York Bay, Gravesend Bay, Raritan Bay, and Arthur Kill off Perth Amboy. In the Upper Bay, anchorages available off Bay Ridge for 30 days, off Jersey City for 72 hours, and off Stapleton for 48 hours. For vessels entering via Long Island Sound there are anchorages in the Western end of the Sound and in the East River.

Vessels must notify the Captain of the Port when it anchors, of the vessel's name, length and draft and its position in the anchorage.

Regulations for anchorages may be found in the 33 Code of Federal Regulations, Part 110.155.

Vessels entering New York Harbour are required to have 2 working anchors, by U.S.C.G. regulations.

RESTRICTIONS: Ambrose Channel, 10 miles long, maintained to a width of 2,000 ft. and a depth of 45 ft. MLW. The Northern approach to the harbour is through Long Island Sound into the East River. Main channels in the port are maintained to a depth of 45 ft. MLW.

MAX. SIZE: Restricted only by berth depth and location.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

VHF: All vessels over 100 tons gross are required to keep continuous watch on VHF Channel 13 when in areas where U.S. Inland Water Regulations apply.

V.T.S. in operation. Channels used are 16, 13, 11, 12 and 14.

TUGS: Over 50 private towing and transportation companies registered in the port.

BERTHING:

Brooklyn: 36 berths. 8 berths at South Brooklyn Marine Terminal, including 2 container berths; 4 berths at 23rd Street Pier; 24 berths at BPAMT, including 2 container berths.

Hudson River: New Passenger Ship Terminal on Manhattan Shore between 48th and 52nd Streets provide 6 ship berths. 3 berth passenger ship facility at Houston St.

Hoboken Port Authority Marine Terminal: 2 piers, 4 general cargo berths.

Weehawken: 2 berth container facility at Port Seatrain.

Jersey City: 2 berth container facility at Port Jersey (Global Terminal).

Newark, N.J.: Port Newark (22 general cargo, 5 specialised, and 4 container berths). Depth range alongside 30-34 ft. Berth Nos. 10 and 12 handle coal with 3 floating cranes, rate 10,000 tonnes per day.

Elizabeth, N.J.: Elizabeth Port Authority Marine Terminal, 22 full container berths, channel depth 35 ft.

Department of Ports and Terminals: The Department of Ports and Terminals of the City of New York is responsible for maintaining, leasing, and developing City-owned waterfront property. One of the principle maritime agencies in the nation's busiest port, the Department is actively involved in harbour affairs. As part of its commitment to the economic vitality of the Port, the Department plays a leading role in pressing for streamlined dredging operations, improved transportation connections, development of coal and grain export facilities, and a foreign trade zone within the harbour.

Terminals: The Department is the sole lessor for five major cargo facilities in the port. Additionally, Ports and Terminals is a participant in a joint venture operation on the Brooklyn waterfront.

Howland Hook Container Terminal – Staten Island:

Operator: Howland Hook Marine Terminal Corporation.

Shipping Lines: Farrell Lines, United States Lines.

Situated on 187 acres in N.W. Staten Island, this facility offers 2,500 ft. of berthing space with a depth of 35 ft. 4×40 long-ton and 1×50 long-ton capacity container cranes on rail tracks move the entire length of the wharf so that vessels may be worked simultaneously by any combination of cranes. Special features include 360 reefer outlets, 22,000 sq.ft. of refrigerated warehouse space, plus 21,000 sq.ft. of hazardous cargo storage area. Shedded space of 280,000 sq.ft. is exclusively devoted to LCL shipments. The terminal handled 1,370,535 long-tons of cargo in 1980.

Expansion over the next decade by 300 acres will increase the facility's cargo capacity from 182,000 to 500,000 containers, extend the wharf by 800 ft., and include a foreign trade zone 60 to 70 acres in size. Channel depth will be dredged to 45 ft., and an additional 50 long-ton crane and Ro/Ro ramp will be installed.

A Chessie System rail turnout directly links Howland Hook with Conrail track at Staten Island Junction in New Jersey. The terminal's location offers excellent access to the New Jersey Turnpike and Metropolitan New York.

South Brooklyn Marine Terminal:

Operator: International Terminal Operating Co., Inc.

Shipping Lines: Compagnie Maritime Zairoise – CMZ; Costa Line Cargo Services; Saudi National Lines; Galleon Shipping Corporation; Hellenic Lines, Ltd.; Jugolinija; Medafrica Line; Prudential Line, Inc.; Royal Netherlands Steamship Company.

Sugar Refiners: Amstar Corporation, Revere Sugar Corporation.

Located directly off the Buttermilk Channel, this multi-purpose terminal can service as many as 9 vessels – container, LASH, Ro/Ro and breakbulk – simultaneously. Special features on this 110 acre site include a 90 ft., 75 ton capacity Ro/Ro ramp and 137 outlets for refrigerated containers. The terminal has a 70 short-ton, 2×50 long-ton capacity container cranes and a 140 long-ton P&H mobile crane. Also available is 705,000 sq.ft. of shedded space.

This terminal handled approximately 306,353 long-tons of breakbulk exports and 574,310 long-tons of container exports in 1980. The Terminal is adjacent to the New York Dock Railway, an intermodal rail yard, providing carfloat/bridge and overland service connecting the terminal and Bayridge rail line with Oak Point Yard in the Bronx to points throughout the U.S., Canada and Mexico. Connections via Interstate 278 provide direct access to the region's major truck routes and airports.

Expansion plans for the Terminal include 130 additional acres between 39th and 51st Streets, from 1st Avenue to U.S. Pierhead Line. This addition to the terminal will involve a landfill as well as the laying of a crane rail along the North and West side of the site. As a result of the expansion, the facility will be able to handle about 2 million long-tons of both breakbulk and containerised cargo. The projected completion date of this development programme is 1985.

23rd and 25th Streets Terminal – Brooklyn:

Operator: International Terminal Operating Co., Inc.

Shipping Lines: American Atlantic Lines, Mexican Lines, Moore-McCormack Lines.

Located on the Buttermilk Channel, this 11 acre terminal handles both general and container cargo (1980 figures: 237,100 long-tons general cargo, 70,358 long- tons container cargo). A 50 long-ton capacity barge mounted crane and 280,000 sq.ft. of transit shed space with continuous cargo doors allows for quick loading/unloading at dockside. Up to 3 vessels may be berthed at a time, with a dockside depth of 34 ft. on the South side, 30 ft. on the North side. This terminal offers one of the harbour's few on-site container repair shops.

Rail access is by New York Dock Railroad, with track originating at 28th Street and 2nd Avenue, a point adjacent to the terminal. Connections via Interstate 278 provide direct access to the region's major truck routes.

Red Hook Container Terminal – Brooklyn:

Operator: Universal Maritime Service Corporation.

Shipping Lines: Elma-Empresa Lineas Maritimas-Argentinas-Elma, Portuguese Lines, CTM, Ivaran Lines.

The newest cargo terminal in the harbour, Red Hook, is a joint venture between the City of New York, New York State and the Port Authority of New York and New Jersey. Situated on the 40 ft. deep Buttermilk Channel, this 31 acre facility offers 1,000 ft. of container berthing space serviced by 2×40 long-ton capacity container cranes, 660 ft. of Ro/Ro berthing space, and 1,390 ft. of breakbulk berthing space. Water depth alongside the container berth is 40 ft. (MLW) and 35 ft. (MLW) by the Ro/Ro and breakbulk berths. Approximately 200,000 sq.ft. of cargo consolidation and breakbulk handling space is available at dockside. A computerised inventory control system provides maximum efficiency and security.

Red Hook's convenient location saves 3 hours sailing time over most New Jersey terminals and saves in tugboat costs. Direct rail access to the New York Dock floatbridge is available, allowing for direct delivery of boxcars and flatcars. Connections via Interstate 278 provide direct access to the region's major truck routes.

Expansion plans will include an additional 10 acres of container handling area, an additional container crane on rails and the extension of the multi-gate truck complex. Completion mid-1985.

Pier 36 Terminal – Manhattan:

Operator: Sea-Land Services, Inc.

Shipping Lines: Netumar Lines, North American West African Lines.

Situated on 10 acres off the East River, Pier 36 is the sole marine terminal in Manhattan capable of handling breakbulk, Ro/Ro and containerised cargo. In 1980, 80,799 long-tons were handled. The facility offers 1,300 ft. of berthing space with a dockside depth of 32 ft. and 175,000 sq.ft. of covered transit shed space. Its location offers direct access to the lucrative Manhattan market, as well as convenient access to major truck routes in the Metropolitan area.

Pier 42 Terminal – Manhattan:

Operator: Sea-Land Services, Inc.

Shipping Lines: Standard Fruit and Steamship Company.

Devoted exclusively to handling imported bananas, pineapples and coconuts, Pier 42 is located on the East side of Lower Manhattan. 4 specialised gantry cranes and a highly mechanised operation enable this terminal to move 150,000 boxes of fruit per day. The facility handled 267,142 long-tons of fruit over the course of calendar year 1980. The terminal contains over 120,000 sq.ft. of warehouse space including an air-conditioned storage area. Water depth at dockside is 32 ft. 48 truck loading bays ensure that goods move quickly from dockside to the road.

CONTAINER FACILITIES: *Newark and Elizabeth, N.J.:* Port Newark and Elizabeth Marine Terminal on the Western shore of Newark Bay, most intensively developed container terminal area in the world with almost 4 miles of berthing space, over 1,265 acres of container marshalling area, 28 berths, 24 container gantry cranes with capacity range of 30 – 70 tons. An international railroad container transfer yard serves both terminals.

Jersey City: A 2 berth, 84 acre container facility (Global Marine Terminal, Port Jersey) with 1,800 ft. of berthing space and 3 container cranes of 40 ton capacity.

Weehawken: A 2 berth container facility at Port Seatrain of 87 acres and 1,885 ft. of berthing space equipped with 3×45 ton gantry cranes.

Also see "Berthing".

CRANES: Mobile floating cranes with capacity up to 500 tons available.

STEVEDORES: 13 stevedoring firms are active in the port, many of whom are also terminal operators. Normal working hours 0800 – 1700 hrs. Bulk Cargo work usually continues through 24 hours.

TANKERS: *Brooklyn:* Paragon Oil Terminal, 2 berths, depth 37 ft.; Patchoque Oil Terminal, 2 berths, depth 29 ft. and 35 ft.; Whale Oil Terminal, 1 berth, depth 36 ft.

Hudson River: Tappan Oil Co., 1 berth, 35 ft. depth.

Bayonne, N.J.: Public Oil Terminal, 3 berths, 32 ft. depth; Humble Oil Terminal, Constable Hook, up to 38 ft. depth; Ross Oil Co., 3 tanker berths up to 38 ft. depth; Texas Oil Co., 4 tanker berths, up to 32 ft. depth; Texaco, 4 berths up to 32 ft. depth. Constable Terminal: 1 berth for handling caustic soda, chemicals, vegetable oil and molasses. 27 tanks (9 million gallons). Max. draft 31 ft. MLW.

Kill Van Kull: Lehigh Tanker Terminal, chemicals, 35 ft. depth; Humble Oil Co., 3 tanker berths, up to 38 ft. depth; Texas Oil Co., 4 tanker berths up to 32 ft. depth; Ross Oil Co., 1 berth up to 32 ft. depth.

Newark, N.J.: 4 berths, 31 ft. and 32 ft. depth.

Elizabeth N.J.: Chevron Oil Company, 1 tanker berth, 26 ft. depth; Crown Central, 1 tanker berth, 30 ft. depth.

Arthur Kill: **Perth Amboy,** Chevron Oil Co. (tanker berth, 26 ft. depth); Hess Oil Co. (tanker berth 30 ft. depth); Cities Service (tanker berth, 34 ft. depth). **Sewaren,** Royal Petroleum Co. (tanker berth, 32 ft. depth); Public Service Co. (tanker berth, 35 ft. depth); Shell Oil Co. (tanker berth 35 ft. depth). **Port Socony,** Mobil Oil Co. (2 tanker berths, 27 ft. and 30 ft. depths). **Carteret,** American Oil Co. (tanker berth M, 25 ft. depth); General American (2 tanker berths, 25 ft. and 35 ft. depth). **Linden,** Cities Service (tanker berth, 32 ft. depth); Humble Oil Co. (tanker berth, 35 ft. depth); Sinclair Oil Co. (tanker berth 31 ft. depth). **Gulfport,** Gulf Oil Co. (tanker berth, 32 ft. depth).

Shipmaster's Report: 1976.
Greater New York Terminal, Astoria, Long Island:
Location of Berth: Lat. 40° 47′ N., Long. 73° 53.7′ W.
Distance from Entrance to Berth: 28 miles.
Max. Size at Berth: LOA, 900 ft. Draft, Pilot stated 34 ft.
Restrictions: Vessel should be ballasted sufficiently to pass under Brooklyn Bridge, clearance 127 ft.

Vessels may berth and unberth day and night but only at certain stages of the tide.

Anchorage: At Stapleton as designated by USCG.

Terminal Information: Starboard side manifold to barge at Stapleton Anchorage, use 6 in. hoses. Port side manifold used at the berth, ship's hoses not required. The connection is 12 in. running into 18 in. Nearest shore tank 1,000 ft. from berth. Line fitted with steam jacket but not efficient. Max. pressure allowed 125 p.s.i. Shore gantry used at berth. Derrick used at anchorage for discharging into barge. Product handled: Fuel Oil (Heating Oil). No slop tanks available.

General: Pilotage compulsory. Ambrose Pilot requires 24 hours' notice of arrival. Radio station handling traffic is Chatham. Most services are available at the berth, however it is advisable to take stores and send laundry from Stapleton Anchorage as there is no means of delivery at the berth other than carrying by hand. Stapleton Launch Service, tel. 981-8333/8384. Fresh water may have to be taken by barge in very severe weather as shore lines become frozen.

Approaching: From a Line from Rockaway Inlet to Ambrose thence Highlands Light, vessel must remain on VHF Channel 13 for ship-to-ship communication. When Pilot on board he maintains this Channel and ship can use own VHF other Channels. Marine operator on VHF 26 (call). For the passage of East River (Remember Brooklyn Bridge Clearance 127 ft.) one tug each bow alongside. After Hell's Gate and passing Port Morris to port, vessel cants to starboard to pass between North and South Brothers to starboard and Rikers Island to port through 500 ft. wide buoyed channel (some unlit) South to berth (inwards). It is preferable to come through Hell's Gate at HW or LW slack, thus avoiding cross currents between Brothers at other times.

Report: August 1984.
Exxon LPG Berth at Bayway:

United States Coast Guard requires all vessels with cargo on board (other than heel) to both enter and depart via Southern Channel, regardless of length. If vessel discharges completely (only heel remaining), then vessel is considered non-dangerous by U.S.C.G., and may depart via North Channel (without turning). (If completely discharged, other gas carrier restrictions – daylight only, 2 mile visibility, etc. – also do not apply.)

There are obstructions to South of Exxon berth which limits distance between manifold and bow or stern to 330 ft. (May be stretched to 335 ft. by Exxon on case by case basis.)

Other limitations given by Exxon for berth:
Draft: 31 ft.
Beam: 100 ft. (may be stretched)
Manifold Position: 13 ft. to 68 ft. above water line, 6 ft. to 15 ft. from deck edge.

Therefore any vessel which sails with part cargo must be turned for departure to comply with U.S.C.G. although it is physically possible to turn vessels up to 725 ft. – 730 ft. LOA off Exxon Berth provided there is no vessel berthed opposite Exxon at Gulfport (it has been done). Exxon is afraid that vessel might damage sea water intake structure for refinery while turning, and therefore says vessels longer than 660 ft. (may be stretched to 680 ft.), cannot be turned.

Other possibilities for turning are:

Continue North about 1 mile to Elizabethport Container Terminal where channel is wider.

Back ship anywhere between a few ship lengths to 0.5 miles South of Exxon, and then turn. We were advised by East Coast Pilots that it is possible to turn ship up to 730 ft. LOA at that location, with draft limit 25 ft. forward, 30 ft. aft. However, others advise that although oil tankers customarily turn at that location, it involves touching bottom (mud) at bow, and is therefore inadvisable for gas tankers.

Shipmaster's Report: September 1984.
Sun Oil Jetty (3C) at Marcus Hook.
Vessel: 140,000 d.w.t. LOA 270 m.

This is the only berth at Marcus Hook suitable for tankers of this size. Usually berth starboard side alongside, arriving off berth about 2 hours before HW. 1 tug each end, tugs' lines and usually made fast on main deck. 2 back springs first then 2 to 3 breasts and 2 to 3 head/stern lines. With this size of vessel it is better to have forward back springs from forecastle and use main deck moorings as head lines. Aft normally have back springs and stern lines from poop and breast lines from main deck.

Shore gangway and with an accommodation ladder about 20 m. abaft after manifold it is best to remove platform and land shore gangway there.

If bunkering then usual to pull off berth and anchor in Marcus Hook Anchorage.

Berthing Pilot boards off berth and normally uses accommodation ladder.

FRESH WATER: Available at most piers in the port district at a nominal rate. Water barge available to serve vessels at anchor in emergency but this is expensive.

FUEL: All grades of fuel readily available. Except for tankers loading or discharging, bunkers are normally delivered by barge. It may be economical to shift vessel to refuelling berth.

GANGWAY/DECK WATCHMEN: Available and recommended if any crew detained by Immigration.

CUSTOMS ALLOWANCES: 200 cigarettes or 2 lb. tobacco, 1 quart wine/spirits per man.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I – 95 to be made up for each crew member on arrival.

REPAIRS: All facilities available for any size vessels.

DRY DOCKS: 4 docks with lifting capacities up to 25,000 tons (Bethlehem) and 1 dry dock capable of handling vessels of up to 1,100 ft. LOA, 140 ft. beam and 120,000 d.w.t.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from April to October.

AIRPORT: Kennedy International Airport, Newark International Airport, La Guardia Airport.

HOLIDAYS: New Year's Day (January 1st); Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Good Friday, Memorial Day (May 30th); Independence Day (July 4th); Labour Day (first Monday in September); Columbus Day (October 12th); Armistice Day (November 11th); Thanksgiving (fourth Thursday in November); Christmas Day (December 25th). No work on New Year's Day, Independence Day, Labour Day and Christmas Day.

SHORE LEAVE: Allowed except for crew members detained by Immigration.

DEVELOPMENTS: *Coal Project:* The Department of Ports and Terminals is proposing the development of a coal export terminal in the Stapleton-Tomkinsville area of the Borough of Staten Island, New York. The basic design of the system consists of unit train operations to an industrial area in Western Staten Island, an 8 mile coarse coal slurry pipe-line from the industrial area to a dewatering facility at the Stapleton waterfront. There the coal will be loaded directly onto a vessel.

The City of New York proposes to dredge the Ambrose Channel (the entrance channel to the New York Harbour) and access to the Stapleton waterfront to 68 ft. This would allow ships up to 260,000 d.w.t. to enter the New York Harbour. The port's advantages are: (1) shorter sailing time to major European ports, and (2) economics of scale that other ports cannot match in ocean transport, i.e., 68 ft. depth versus 55 ft. depth channels maximum in other U.S. East and Gulf ports. The proposed project is scheduled to open 1985-1987.

NIKISKI, Alaska: 60.41 N. 151.24 W.

Located on West side of Kenai Peninsula between Homer and Anchorage. Pan and brash ice in Inlet from November to March. Never freezes solid. Open all year.

APPROACHES: Via Cook Inlet.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: Pilot pick-up point 1 mile South of Homer Split light. Also see "Homer" Pilotage.

ANCHORAGES: Good anchorage.

MAX. SIZE: Harbour depth in excess 40 ft. Max. size 80,000 d.w.t. Tides diurnal range 28 ft. Also "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Quarantine, local. Immigration and Customs from Anchorage, Alaska.

TUGS: From Anchorage.

BERTHING:
1. Port Nikiski Dock: 3 sided, 550 ft. long, 200 ft. on each side, 1,000 ft. wide, 12 feet at MLLW. 400 ft. by 75 ft. covered storage.
2. Three finger piers for tankers and bulk carriers. All exceed 40 ft. depth.

All 3 berths are dolphin berths ideal for rapid bulk loading. Main products:
- *(a)* Collier Chemical Dock: Bulk area and ammonia gas.
- *(b)* Phillips Petroleum Dock: Petroleum products and liquid natural gas.
- *(c)* Kenai Pipe-line Dock: Refined and crude Petroleum products.

STEVEDORES: Two gangs.
REPAIRS: Some at Kenai.
FRESH WATER: Limited.
FUEL: Not available.
MEDICAL: Health Centre, 3 doctors, 3 dentists.
TRANSPORTATION: Highway to Anchorage and Homer. Air transport available.

OAKLAND, California: 37.50 N. 122.18 W.

(See Plan Book)

Also See "San Francisco" *for Documents, Pilotage, etc.*

HEALTH: See "Health: all Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BERTHING: *NOL Terminal:* Berth No. 5 (outer harbour), *Public Container Terminal:* Berth No. 6; Operator: Crescent Wharf and Warehouse, 1195 Maritime Street, Oakland, Ca. 94607. Tel. (415) 763-7470.

Berths: 2, length 1,839 ft., water depth 42 ft. MLLW (in 1981).

Container handling facilities: 1 Paceco 30 ton container crane (and 2 Krupp 40 ton container cranes); 6 Raygo Wagner Port Packers; 2 rubber tyred transtainers; 72 refrigerated container outlets; 4 truck scales; additional equipment as required. Combination, port packer/transtainer operation.

Bay Bridge Terminal: Berths 10, 11, 12: Operator: Maritime Services International, 1625 Maritime Street, Oakland, Ca. 94607. Tel. (415) 456-5669.

Berths: 3, length 3,039 ft., water depth 35 ft. Multi-purpose cargo terminal designed to handle break bulk, heavy lift cargoes, automobiles, and roll-on/roll-off operations.

Sea-land Container Terminal: Operator: Sea-land services, Inc., 1425 Maritime Street, Oakland, Ca. 94607. Tel. (415) 271-1000.

Berths: 2, Length 1,355 ft., water depth 40 ft. MLLW.

Container handling facilities: 3 Paceco, 30 ton cranes; 3 truck scales; 250 refrigerated container outlets. Chassis operation.

Matson Container Terminal: Operator: Matson Terminals, Inc., 3050 7th Street, Oakland, Ca. 94607. Tel. (415) 893-2456.

Berths: 3, including 1 for roll-on/roll-off operations. Length 2,220 ft., depth 35 ft. MLLW.

Container handling facilities: 3 container cranes – 27.5 ton Star; 30 ton Paceco; 33 ton Star. 1 truck scale; 200 refrigerated container outlets. Container yard is straddle carrier-type operation (containers stored 2 or more high).

Oakland Container Terminal: Operator: Oakland Container Terminal Co., 707 Ferry Street, Oakland, Ca. 94607. Tel. (415) 834-5822.

Berths: 2, length 309 m. depth 35 ft. MLLW.

Container handling facilities: 1 Modified "A" frame Paceco 40 ton container crane; 1 truck scale; 150 refrigerated container outlets. Container yard utilises a wheeled Paceco transtainer. Containers are stored 5 abreast and 2 or more high.

7th Street Public Container Terminal: Operator: Marine Terminals Corporation, 5190 7th Street, Oakland, Ca. 94607. Tel. (415) 839-6490.

Berths: Five. 3 container, 2 roll-on/roll-off and/or Combination break-bulk/container. Length 2,963 ft., water depth 35 ft. MLLW.

Container handling facilities: 3 Paceco low-profile, 40 ton container cranes; 4 truck scales; 96 refrigerated container outlets.

United States Lines Container Terminal: Operator: United States Lines, 1579 Middle Harbor Road, Oakland, Ca. 94607. Tel. (415) 465-4010.

Berths: 2, Length 1,443 ft., water depth 35 ft. MLLW.

Container-handling facilities: 2 Alliance low-profile, 51 ton container cranes, 1 crane modified for 125ft. outreach at 39 tons; 7 truck scales and outlets for 100 refrigerated containers. Container yard is chassis-type operation.

Maersk Line Terminal: Berth 4: Operator: Marine Terminals Corporation, 909 Ferry Street, Oakland, Ca. 94607. Tel. (415) 763-4289.

Berths: 1. Length 750 ft., water depth 35 ft. MLLW. 190 Refrigerated container outlets, 2 truck scales, 140 ton Paceco container crane.

American President Lines Container Terminal: Operator: American President Lines, Inc., 1395 Middle Harbor Road, Oakland, Ca. 94607. tel. (415) 271-8000.

Berths: 2. Length 1,300 ft., water depth 35 ft. MLLW.

Container handling facilities: 2 Alliance low-profile, 55 ton container cranes, 1 crane modified for 125 ft. outreach at 47 tons, one 40 ton Paceco modified "A" frame crane, with articulated boom and 1 Paceco Portainer with 40 tons capacity and 128ft. outreach; 3 truck scales; 108 refrigerated container outlets. Container yard is chassis-type operation.

Charles P. Howard Terminal: Operator: Indies Terminal Company, 35 Grove Street (Foot of Grove Street), Oakland, CA. 94607.

Berths: 3. Length 2,278 ft., depth 37 ft. MLLW.

Facility: This 49 acre facility will handle full containership, combination Roll-on/Roll-off and conventional cargo ships. There are two 40 ton Hitachi modified "A" frame container gantry cranes with articulated booms.

9th Avenue Terminal: Operator: Marine Terminals Corporation, foot of 9th Avenue, Oakland, Ca. 94606. Tel. (415) 452-3742,.

Berths: 3. Length 2,052 ft., depth 35 ft. at MLLW.

Facilities: Import steel and bulk cargo-handling centre. 4 Manitowac crawler truck cranes (capacity 100 tons). Bulk-loading facilities with 10 steel storage silos capable of holding 9,750 cu.ft. each. Rail track alongside berth.

AUTHORITY: Port of Oakland., P.O.Box 2064, 66 Jack London Square, Oakland, California 94604. *Tel:* (415) 444-3188. *Telex:* 336334. *Contact:* General Manager, Marine Terminals Dept.

OGDENSBURG, New York: 44.42 N. 75.30 W.

(See Plan Book)

Refer to "St. Lawrence Seaway" for important general information.
PILOTAGE: Seaway Pilot boards at Cape Vincent or Snell Lock and acts as docking Pilot.
ANCHORAGES: Anchorage area West of city at open roadstead area.
RESTRICTIONS: No tide. No restrictions other than Pilots' discretion as to wind and visibility.
MAX. SIZE: Largest vessel to enter 730 ft. long. Draft 27 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Western Union to OCN Corp. VHF Seaway Channel via Maria Radio Cardinal.
TUGS: No tugs necessary.
BRIDGES: Ogdensburg/Prescott International Bridge – 126 ft. clearance MWD.
BERTHING: By prior notice only. Port Authority Terminal, length 600 ft., depth 27 ft. One Grain Elevator capacity 500,000 bushels.
CRANES: Available, up to 82 tons capacity.
STEVEDORES: Order by 1800 hrs. day preceding arrival. Advise any change of ETA.
MEDICAL: Excellent medical service and availability of doctors. No vaccination necessary.
DENSITY: Fresh water.
FRESH WATER: Available by pipeline at Port Authority Terminal.
FUEL: One day's notice, all grades. Diesel, Bunker "C", Kerosene.
GANGWAY/DECK WATCHMEN: Normally not used.
OPENING/CLOSING HATCHES: By stevedores.
CUSTOMS ALLOWANCES: Tobacco, wine/spirits, normal Customs allowance U.S. Ports.
CARGO GEAR: 25 ton mobile crane, fork trucks to 13 tons capacity. Ship's gear to be in good working order.
IDENTIFICATION CARDS: Needed as per Immigration Department requirements.
REPAIRS: Limited dockside repairs available.
REPATRIATION: Can be arranged.
AIRPORT: (0.5 mile from city). Allegheny Airline – 3 flights daily to Syracuse, New York, etc.
TIME: 5 hours difference Eastern Standard Time. Daylight Saving time in Summer.
HOLIDAYS: New Year; Washington and Lincoln's Birthdays; Memorial Day; 4th July. Labour Day, Veteran's Day.
POLICE/AMBULANCE/FIRE: Police, 393-1551; Ambulance, 393-1221; Fire, 393-1010.
TELEPHONES: Available at Pierside (315) 393-7580.
SHORE LEAVE: Crew members allowed ashore.
AUTHORITY: Ogdensburg Bridge and Port Authority, Bridge Plaza, Ogdensburg, New York 13669. *Tel:* (315) 393-4080. *Telex:* WUT 937486. *Cables:* Ogdenport. *Contact:* Salvatore L. Pisani, Port Director.

OLYMPIA, Washington: 47.00 N. 122.53 W.

(See Plan Book)

PORT LIMITS: Vessel is to be considered an "arrived ship" at the Port of Olympia, Washington, when anchor is dropped in Budd Inlet or when the vessel is all fast at the dockside.
DOCUMENTS: See "Tacoma".
PILOTAGE: The vessel picks up Puget Sound Pilot at the Port Angeles Pilot Station located at the entrance to Puget Sound on the Straits of Juan de Fuca, and it is normal for the vessel's Agent to provide the pilot station with a 48-hour, 24-hour, 12-hour and 8-hour ETA. The pilot station monitors VHF Channel 13.
ANCHORAGE: Safe anchorage is located North of Olympia Shoal in 24 – 30 fathoms of water. The bottom is sandy and area is a sheltered inlet.

RESTRICTIONS: Channel depth 30 ft. MLW with a high tidal range of 14.4 ft. Also restricted turning basin of 800 ft. Vessels max. size would be governed by the turning basin of 800 ft. and draft of 30 ft. at MLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: "KPH" San Francisco or Mackay Radio, Everett "KLB".
VHF: No VHF other than Pilot to tug or ship to tug available at Olympia.
TUGS: Tugs are dispatched from Tacoma, Washington, 30 miles to the North, and generally join the vessel at the outer channel limits. They use ship's lines to assist the vessel in turning at the turning basin and to moor.
BERTHING: Olympia has 4 deepwater berths, numbered 1 to 4 proceeding from South to North. Berth No. 1 has a maintained depth of 40 ft. Berth No. 2 is a concrete dock with 40 ft. depth MLW. Berth No. 3, 40 ft. MLW and supported by 2×50 ton gantry-type cranes. Berth No. 4, 35 ft., primarily used as lay-by berth or loading waterborne cargoes.
CRANES: 2 Washington whirley-type cranes available at Berth No. 3 with max. capacity of 50 tons. Presently rigged for 12 tons and primarily used in bulk unloading with clams.
BULK CARGO FACILITIES: Presently discharged with ship's gear at Berth No. 2 or shore cranes and clams at Berth No. 3. Primary backup cargo yard of approximately 12 acres handling coke, coal, pig iron and other bulk-type cargoes.
SPECIALISED CARGO HANDLING FACILITIES: Olympia is generally an open cargo yard; however, it can be adapted for Ro-Ro traffic and is presently engaged in handling bulk cargoes such as coal, coke, etc.
BRIDGES: None pertinent to this area.
STEVEDORES: 2 stevedoring companies available in the Olympia area. 9 local gangs available for loading or discharging.
MEDICAL: Medical and hospital facilities are available without prior notification for emergencies; otherwise all medical and dental requirements can be taken care of by appointment.
TANKERS: No shore facilities for loading or unloading of tankers.
DENSITY: Salinity is on an average 29 parts per thousand.
FRESH WATER: Delivered to vessel by shoreside hose.
FUEL: Most grades available by barge from Seattle for fueling at dockside.
FIRE PRECAUTIONS: Standard for U.S. ports.
CONSULS: Most located at Seattle 60 miles to the North.
REPAIRS: All types of repairs possible.
DRY DOCKS: None available in Olympia. Nearest 60 miles to North at Seattle.
SURVEYORS: Lloyd's, A.B.S., N.V. available out of Seattle area.
GANGWAY/DECK WATCHMEN: Not required at Olympia under most circumstances unless crew members detained.
CUSTOMS ALLOWANCES: Sufficient quantities of tobacco, wine and spirits are permitted out of bond for each crew member sufficient to cover length of stay anticipated at the time of arrival. Actual quantities are at the discretion of the boarding customs officer.
CARGO GEAR: Generally vessels are loaded and/or discharged using ship's gear. However, 2 max. 50 ton capacity Whirley cranes are available for use for specific commodities and in the event of gear failure.
REPATRIATION: Facilities exist for repatriation of crew members.
AIRPORT: Local airport service by commuter airlines only and major international airport located 40 miles to the North.
TIME: GMT minus 8 hours. Daylight saving time in effect during Summer months, hours from 0001 27th April to 0001 26th October.
HOLIDAYS: Official holidays observed by the State of Washington for 1980 were: January 1st, February 12th, February 18th, May 26th, July 4th, September 1st, November 11th, November 27th, November 28th and December 25th.

Work is available on an overtime basis on all days except Christmas, December 25th; January 1st, New Years Day; and July 4th and 5th.
POLICE/AMBULANCE/FIRE: Telephone dispatch for emergency services, the numbers 911 dialled on any public telephone.
TELEPHONES: Public telephones are located within 100 ft. of any berth and are not provided on board the vessel.
SERVICES: Tank-cleaning, tank-washings, compass adjusting, etc., are all available from the Seattle area, located 60 miles to the North, and most services provide travelling repairs.
SHORE LEAVE: Crew are allowed shore leave by U.S. Immigration, depending on individual case.
IDENTIFICATION CARDS: Not issued by the Port of Olympia, and seaman's book is generally sufficient to allow Immigration, to determine whether shore leave should be granted.
REGULATIONS: Similar to all North American ports; no special rules or regulations applied to vessels by the Port of Olympia. Rules are set forth in Tariff No. 6.
DELAYS: Only delays that should be encountered at the Port of Olympia would be in the event of berth congestion.
DEVELOPMENTS: Fill area of 50 acres in progress.
AUTHORITY: Port of Olympia, P.O.Box 827, Olympia, Washington 98507. *Tel:* (206) 754-1650. *Telex:* 152689. *Contact:* James J. Jackson, Director of Operations.

ORANGE, Texas: 30.06 N. 93.44 W. **(See Plan Book)**

DOCUMENTS: Crew Lists, Passenger List and Customs Documents.
PILOTAGE: Radio to Agent, 12 hours and Pilots 2.5 hours in advance of ETA. Pilots contacted by VHF Channel 12 and 13. Pilots board at Sabine Pass, Sea Buoy position 29° 36′ N., 93° 48′ W. or upon request board at 29° 25′ N., 93° 40′ W. Pilot boats FM (VHF) Channel 65 – 156.275 mc/s.
ANCHORAGE: Off Sabine Bar – 40 ft.
RESTRICTIONS: Sabine River Channel: Project depth 30 ft.; bottom width 200 ft., including slip at port; marked and lighted for 24-hour navigation. Turning basin, 1,000 ft.×3,000 ft.
MAX. SIZE: Length – no limit, breadth – no limit, draft – 30 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: RCA – Global Communications.
TUGS: Join vessel in port turning basin. Tug's line used, no charge.
BERTHING: 2,308 ft. mooring space to accommodate 4 deep-sea vessels; all concrete docks; additional berthing space in slip for laying-up 4 vessels. Layberth facilities also available. 9 finger piers ranging in length from 480 ft. to 900 ft.
STEVEDORES: 5 stevedore companies – handled through Agent.
MEDICAL: Local facilities – complete.
TANKERS: Limited to 30 ft. draft.
DENSITY: Brackish.
FRESH WATER: Ample fresh water, through 2.5 in. connection, rate of delivery about 500 gallons per minute.
FUEL: All grades available; 8 hours advance notice required.
FIRE PRECAUTIONS: No welding or burning without U.S. Coastguard welding permit; also special authority required for ships loading explosives.
CONSULS: None available locally.
REPAIRS: Facilities available.
DRY DOCKS:

Levingston Shipyard – Orange.
400 ft.×126 ft. 11,000 tons, 17 ft. draft over blocks.
350 ft.×60 ft. 3,000 tons, 15 ft. draft over blocks.
250 ft.×72 ft. 3,000 tons, 11 ft. draft over blocks.

SURVEYORS: National Cargo Bureau, Inc., 550 Fannin, Petroleum Building, Suite 821, Beaumont, Telex: 77701.

American Bureau of Shipping, 398 Pearl Street, Goodhue Building, Suite 806, Beaumont, Telex: 77701.
REPATRIATION: Can be arranged through area Immigration.
AIRPORT: Local, no scheduled airlines. Mid County Airport with scheduled airline service – 30 miles.
HOLIDAYS: New Year's Day; Martin Luther King's Birthday; Lincoln's Birthday; Washington's Birthday; Texas Independence Day; St. Patrick's Day; Good Friday; Memorial Day; Emancipation Day; Independence Day; Labour Day; Columbus Day; Veterans Day; Ted Gleason's Birthday; Thanksgiving Day; Christmas Day; Any holiday which falls on Saturday or Sunday will be recognized on the following Monday. No work performed on Labour Day or Christmas Day.
POLICE/AMBULANCE/FIRE: Police 883-5654; Ambulance 883-6414; Fire 886-7431.
EMERGENCY CO-ORDINATION CENTRE: U.S. Coast Guard tel: (713) 983 8230.

OSTRICA, Louisiana: 29.22 N. 89.32 W.

LOCATION: East Bank of Mississippi river about 42 miles above S.W. Pass entrance.
DOCUMENTS/PILOTAGE: For all general information refer to "New Orleans".
ANCHORAGES: Available in river downstream of docks.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Not normally required.
BERTHING: Gulf Refining Co. Terminal, tanker berth 45 ft. depth 2×8 in. hoses loading 34,000 bbls.p.h. Ballast line 18 in. for slop discharge.
FRESH WATER: Not available.
FUEL: Bunker "C" available ex-wharf.
DENSITY: Fresh water (1000).

OSWEGO, New York: 43.28 N. 76.30 W.

(See Plan Book)

LOCATION: Oswego harbour is located on the South shore of Lake Ontario about 15 miles from its East end at the outlet to the Oswego River. It is the first major port on the Great Lakes off the seaway. It is also the Great Lakes entrance to the Great Lakes – Hudson River Waterway which connects with the Hudson River at Troy.

PILOTAGE: No requirements.

RESTRICTIONS: Average navigation season – April 1st to December 15th.

Approaches: Through entrance between the Arrowhead Breakwater pier heads and detached breakwater.

Entrance is 750 ft. wide with a depth of 25 ft. at LW datum.
Controlling depth of water 25 ft. at datum.
No vessel length and beam limitations.
Approach open 24 hours a day.
Navigation lights available.

Harbour: Controlling depth – front of each terminal open for public use. 21 ft. on West side. 28 ft. on East side.

Turning Basin – 115 acres.
Accessible 24 hours per day.
No vessel length and beam limitations.

HEALTH/AGRICULTURE: See "Health" and "Agriculture" before first U.S.A. port (Albany).

TUGS: Towage facilities available on request.

BERTHING: The general cargo facilities are operated by the Port of Oswego Authority. The West Side Facility is a finger pier 1,000 ft. long providing 4 berths and has 21 ft. of water alongside at LW datum. 28,000 sq. ft. of covered storage is available with limited open storage. A million bushel grain elevator is situated on this pier. The East Side Facility is a marginal wharf 1,900 ft. long, providing 3 berths and has 27 ft. of water alongside at LW datum. 134,000 sq.ft. of covered storage is available with unlimited open storage.

Oswego exports general cargo. It imports grain, cement, wood pulp, petroleum and general cargo.

New Marginal Wharf: Length of berth 1,750 ft. Depth 25 ft. at LW datum.

BRIDGES: None.

CRANES: Mobile heavy lift equipment available.

BULK HANDLING FACILITIES: One 1,000,000 bushel capacity elevator equipped with 3 loading spouts, 2 Marine legs and 2 car pits.

FRESH WATER: Available at all general cargo docks.

FUEL: Seaway Terminal of Metropolitan Petroleum Corporation, 4 tanks – Capacity 327,000 barrels of No. 2 and No. 6 oil. Coal bunkerage available by truck delivery.

CONSULS: None.

REPAIRS: Above waterline repairs available.

AUTHORITY: Port of Oswego Authority, Foot of East First Street, Oswego, N.Y. 13126. *Tel:* (315) 343-4503. *Contact:* Sherwood L. Hamilton, Executive Director.

PALM BEACH, Florida: 26.46 N. 80.03 W.

(See Plan Book)

LOCATION: Port is located on a salt water sound known as Lake Worth and lies 1.3 miles from the 37 ft. contour of the Atlantic Ocean to which it is connected by an artificial cut at the North end of Lake Worth known as Lake Worth Inlet. The Inlet is located within the boundaries of the City of Riviera Beach, Florida.

PORT LIMITS: Sea Buoy at channel entrance. Dockage charges commence when vessel is made fast to wharf, and are on a 24 hour basis or fraction thereof.

DOCUMENTS: Basic Customs Documents for Entry: 2 copies Master's Oath, Form CF-1300; 2 copies General Declaration, Form CF-1301; 1 copy Clearance from Last Foreign Port (if available); 2 copies Arrival Crew Lists, Form I-418; 2 copies Passenger List, Form I-418; 2 copies Store Lists, Form CF-1303; 2 copies Crew's Effects Declaration, Form CF-1304; 1 copy Manifest of *All* Foreign Cargo onboard; 1 copy Manifest of Cargo for Discharge; 1 copy Form CF-3171 for formal entrance at Customs House. Valid original vessel documents.

All vessels shall, upon arrival, report to Port Director all cargo to be discharged. Such report shall be in form of copies of Ship's Manifest, or certified statements, and shall show number of units, commodity, weight, destination, consignee, and all other information which Port of Palm Beach deems necessary for compilation of commercial statistics, for reserving of necessary warehouse or wharf space, or other purposes. (Also see "Jacksonville").

PILOTAGE: Compulsory. Provided by Pilots' Association of the Port of Palm Beach, 58 East Port Road, Riviera Beach, Florida, 33404. Tel: (305) 844-1619.

Pilot's communicate with vessel on VHF Channel 16; if no answer contact Marine Operator to call Pilots on land line. Tel: (305) 845-2628.

Notice of ETA and request for Pilot must be made to the Pilots at least 24 hours in advance. There is no telex facility.

CHANNEL: Entrance to the harbour is by a dog-leg channel running due West through the jetties and then turning South-westerly to the terminals. The channel is 400 ft. wide, narrowing to 300 ft. in width as it continues across the lake another 3,000 ft., leading into a trapezoidal turning basin, 1,400 ft. by 1,310 ft. adjacent to the port terminals on the West shore, with an extension of 672 ft. at 25 ft. depth to the New North Wharf and Loading Ramps. Present depth of entrance channel is 35 ft. at MLW.

ANCHORAGES: Anchorage is designated by the Bar Pilots, which in most instances is at sea. Port has no established anchorage.

MAX. SIZE: Vessels up to 620 ft. in length with draft of 33 ft. have used facilities.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Port has no communication equipment. U.S. Coast Guard Station, Peanut Island, Riviera Beach, Florida, can be reached on 2182 kHz – 2678 kHz – 156.8 MHz. Pilots VHF Channel 16.

TUGS: Available to assist berthing. Service is provided by the Port Towing Corporation, P.O.Box 12425, Lake Park, Florida 33403. Office Tel: 622-6422 and 622-8688, nights and holidays 844-4244.

Tugs normally join vessel at jetty entrance. Tug's lines normally used.

BERTHING: 2 slips and 4 marginal wharves with 6 ramps including a 14 acre container facility.

Berth		*Length* (ft.)	*Depth* (ft.)
No. 1	South Marginal	210	25
No. 2	East Half, South Side of Slip 2	310	35

No. 24	South Half Container Wharf	225	25
No. 25	North Half Container Wharf	225	25

Supplementing the berths are 183,775 sq.ft. of transit shed storage space. Open storage areas consist of approximately 40 acres. 17 acres dedicated to container handling.

All vessels, their Owners or Agents, desiring a berth at wharves, shall, as far in advance of date of docking as possible, make application to port specifying date of docking, sailing, nature and quantity of cargo to be handled, and name of the vessel.

SPECIALISED CARGO HANDLING FACILITIES: Ramps for Roll-on/Roll-off cargo and wharfside accommodation for equipment to handle containerised cargo only.

CRANES: See "Cargo Gear".

STEVEDORES: The recognised working hours of port are from 0800 until 1200 hrs. and from 1300 until 1700 hrs., Monday through Friday, holidays excepted. During the recognised working hours services will be charged for on a straight time basis.

When vessels are loading or discharging cargo the port may furnish checker-foremen to supervise release of cargo being loaded and/or check cargo being discharged. The charge for each man furnished will be based on labour-furnished rates for foremen, with the Port reserving right to furnish as many men as they deem necessary to protect their interests. Charges for this service will be rendered against the vessels, their Owners, or Agents.

MEDICAL: Full hospital facilities available without prior notice. Dentists available during normal work hours.

TANKERS: The port receives tankers each month in the 15,000 to 18,000 gross ton range. Petroleum tankers are handled in Slip Two, Berths 2/3 or 5/6. All petroleum tankers are boomed during pumping operations. No slop facilities at port.

FUEL: Private firms with trucks or barges available by prior arrangement through vessel's Agent.

FRESH WATER: Fresh water delivered to vessels at wharves or docks by pipe-line. Hoses can be supplied by port per tariff charges. Fittings on pipe-line are 2.5 in. Minimum charge of U.S.$10.00. Water $0.72 per ton of 240 gallons.

DRY DOCK/REPAIRS: No major facilities at port. Mobile repair companies available. No berths dedicated for repair work.

SURVEYORS: Marine surveyors representing Lloyd's, A.B.S., N.V., operate at the port or nearby ports.

C. L. Marine Inc., 825 Oleander Street, Boca Raton, FL 33432. Tel: (305) 391-8932.

Palm Beach Marine Survey, 2108 Ascott Road, Juno Isles, FL 33408. Tel: (305) 626-3424.

GANGWAY/DECK WATCHMEN: No requirement for watchmen required except for special vessel conditions or security reasons as determined by Port Director.

HATCHES: Normally opened and closed by ship's crew.

CUSTOMS ALLOWANCES: United States Customs Regulations.

REPATRIATION: Facilities exist for changes of crews and repatriation of seamen. Scheduled aircraft service Palm Beach area daily with additional flights from two nearby airports. Airports are 5 miles, 35 miles and 70 miles from port.

POLICE/AMBULANCE/FIRE: Police (305) 845-4123 or 911; Fire Department (305) 845-4111; Sheriff (305) 833-7471; Ambulance (305) 844-6577; Hospital (305) 844-6300.

CARGO GEAR: Crane capacity can accommodate single lifts up to 300 tons. Also available are 2×150 ton cranes, 1×200 ton crane, 1×65 ton crane and 1×40 ton crane also 1×23 ton fork lift. Load/discharge operations can be performed by ship's gear or shore gear.

FIRE PRECAUTIONS: Smoking is strictly prohibited in transit sheds, warehouses, or on apron of wharves and on vessels, handling dangerous, hazardous, or inflammable cargo. Smoking is also prohibited in any areas where gasoline or like materials are being handled or serviced to equipment.

Explosives and hazardous or highly inflammable commodities or materials may be handled over, or received on, the wharves or other facilities of Port of Palm Beach by special arrangements with and at the option of the Port Director, and the receiving, handling, or storage of such commodities shall be subject to Federal and State laws, rules and regulations.

In all cases where explosives and hazardous or highly inflammable commodities or materials are to be handled, prior consent by the U.S. Coast Guard must be received and a copy of the consent filed with the Port Director. Responsibility for safeguarding of life and property will be the duty of the shipper. Proof of sufficient liability insurance must be presented to Port Director prior to arrival of such materials.

CONSULS: Jordan, Consulate of, 3381 Royal Poinciana Plaza, Palm Beach, FL 33480. Tel: (305) 655-1844.

HOLIDAYS: New Year's Day; Washington's Birthday; Columbus Day; Decoration (Memorial) Day; Independence Day; Labour Day; Veteran's (Armistice) Day; Thanksgiving Day; Christmas Day. When any one of these falls on Sunday, the following Monday is observed as a holiday. When any one of these falls on Saturday, the preceding Friday is observed.

BANKS: *Banks with Foreign Departments:*

Atlantic National Bank, 302 Datura Street, West Palm Beach, FL 33402. Tel: (305) 655-8833.

Barnett Bank, 46 West 20th Street, Riviera Beach, FL 33404. Tel: (305) 844-4351.

First National Bank in Palm Beach, The Maritime Office Building, 4 East Port Road, Suite 130, Riviera Beach, FL 33404. Tel: (305) 863-1511.

First National Bank in Palm Beach, 255 South County Road, Palm Beach, FL 33480. Tel: (305) 655-7111.

Southeast Bank, 3700 Broadway, Riviera Beach, FL 33404. Tel: (305) 848-7232.

Royal Trust Bank of Palm Beach, N.A., 411 South County Road, Palm Beach, FL 33480. Tel: (305) 655-3900.

GENERAL: Marine terminal 1.3 miles from the open sea, served by U.S. Highway 1 and is directly connected by port-owned belt-line railroad to the Florida Coast Railway.

Broad aprons (80 ft.) with ship-side rail, and warehouses backed by open storage areas. The slips and wharves are located on a salt water sound, fully protected from the sea by barrier islands; departures from the slips average only 15 minutes through inlet to open sea.

DEVELOPMENTS: New 14 acre container marshalling area has been recently completed. Raw sugar storage facility at Slip 2 capacity 20,000 tons, loading rate 600 t.p.h. Acquisition of additional land for port expansion underway. Port Administration Building completed offering Government Services and office space for Maritime companies located at the port.

AUTHORITY: Port of Palm Beach, 4 East Port Road, Riviera Beach, Florida 33404. *Tel:* (305) 842-4201. *Contact:* Colonel F. W. Donahue, Executive Director. Martin A. Mets, Operations Manager.

PANAMA CITY, Florida: 30.10 N. 85.40 W.

(See Plan Book)

DOCUMENTS:

3 Passenger Lists.
3 Crew Lists.
3 Curio Lists.
3 Stores Lists.
Register.
Load-line Certificate.
Tonnage Tax Certificate.
Certificate of Financial Responsibility (Oil Pollution).

PILOTAGE: Compulsory. Pilots board at sea-buoy. Guard Channel 16 VHF. Safe anchorage at sea-buoy if waiting for Pilot. Pilot boat black hull with white lettering. Panama City Pilots' Association. Tel: (904) 769-0058.

ANCHORAGES: Several safe anchorages inside bay with 32 ft. or more depth.

RESTRICTIONS: Maximum safe draft over bar is 32 ft. No other restrictions except in case of bad weather.

TUGS: 2 tugs available. Tug is used only to assist in berthing. Always uses ship's lines.

BERTHING: Any time, except for unusual weather. Good safe port. Berths are about 1 hour from Pilot station.

Deepwater Terminal in St. Andrew's Bay:

1. 2,090 ft. of deepwater berthing:
   (a) 4 berths
   (b) Mean depth of water 32 ft.
   (c) Concrete apron 60 ft.
   (d) Construction steel sheet piling.
2. 4 Transit sheds totalling 237,060 sq.ft.
3. Bulk Warehouse (28,800 sq.ft.). Storage Silos (6,500 ton capacity) with scale weight in and out.
4. Depress rail serving each warehouse.
5. Truck dock serving each warehouse.
6. Marginal track capability.
7. Heavy lift capability by prior arrangement.
8. Security: 24 hour service.
9. Paved open storage – 75,000 sq.ft.

Barge Terminal in St. Andrew's Bay and Gulf Intracoastal Waterway:

1. 600 ft. of shallow draft:
   (a) Mean depth of water 12 ft.
   (b) Concrete apron
   (c) Construction steel sheet piling.
2. Transit shed totalling 30,000 sq.ft.
3. Bulk transfer capability.
4. Service for:
   (a) Rail loading and unloading.
   (b) Truck loading and unloading.
5. Paved open storage – 90,000 sq.ft.
6. Heavy lift capability by special arrangement.

Port Equipment:

1. 8 lift trucks, 5,000 lb. capacity.
2. 6 paper roll clamp machines, 7,000 lb. capacity.
3. 2 trackmobile switchers.
4. 1 diesel switch engine.
5. Rail tracks owned by Panama City Port Authority and capable of accommodating approximately 80 rail cars.
6. Sweepers.
   (a) Tennant.
   (b) Tractor with brush and front end loader.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Preferably WLO Radio, Mobile, Alabama, U.S.A. Also good service from RCA. Vessel should radio ETA and cash requirements.

STEVEDORES: 4 companies. Must have ETA by 1500 hrs. local time in order commence loading 0800 hrs. next day. Normal work day 0800 - 1200 hrs., then from 1300 – 1700 hrs., Monday through Friday.

MEDICAL: Medical and hospital service available.

TANKERS: No slop discharge facilities. 1 tanker berth – 29 ft. max. draft.

DENSITY: Salt water. 1.5 ft. tide range.

FRESH WATER: Available all berths but ships must supply hose.

FUEL: Limited amount of diesel oil available. No heavy fuel.

GANGWAY/DECK WATCHMEN: Only if required by ship's Owners or Master.

OPENING/CLOSING HATCHES: Only McGregor hatches may be opened by the crew.

CUSTOMS ALLOWANCES: Tobacco, 1 carton 200 cigarettes. Wine/Spirits, reasonable quantity – 1 or 2 bottles.

CARGO GEAR: Must show safety inspection if requested.

IDENTIFICATION CARDS: All crew must have U.S. Immigration Landing Permit.

CONSULS: None.

REPAIRS: Limited deck and engine repairs can be effected.

REPATRIATION: Available.

AIRPORT: Approximately 4 miles from port. Served by 2 scheduled air lines (Republic Airlines and Air New Orleans).

TIME: Central Standard Time (GMT minus 6 hours or 90° Meridian). Central Daylight time in Summer (minus 5 hours or 75° Meridian time).

HOLIDAYS: *No work holidays:* New Year's Day; Easter; 4th July; Labour Day; Christmas Day.

Working holidays: Lincoln's Birthday (February 12); George Washington's Birthday (Third Monday in February); Memorial Day (Last Monday in May); Veteran's Day (Fourth Monday in October); Fall Festival Day, Thanksgiving Day (Fourth Thursday in November).

POLICE/AMBULANCE/FIRE: Dial operator, or 785-6161.

TELEPHONES: Placed aboard only by very special arrangement – not normally available.

SERVICES: Most repairs to radio, radar and other such equipment. Advance notice required.

SHORE LEAVE: Any time – any berth.

DELAYS: Normally, delays infrequent and for short durations.

DEVELOPMENTS: The West Wharf is to be extended by 350 ft.

An existing bulkhead of 500 ft. being re-built, depth alongside 32 ft.

AUTHORITY: Panama City Port Authority and Foreign Trade Zone 65, P.O.Box 15095, 5321 West Highway 98, Panama City, FL 32406. *Tel:* (904) 763-8471. *Contact:* H.R. Etheridge, Port Director. T. L. Berry, Assistant Port Director.

PASADENA, Texas: 29.43 N. 95.13 W.

Refer to "Houston" for all general information.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

PASCAGOULA, Mississippi: 30.21 N. 88.34 W.

(See Plan Book)

PORT LIMITS: Subject to Charter-Party Terms, an "arrived ship", subject to jurisdiction of the Port Authority, occurs when a ship arrives at Horn Island Sea Buoy.

DOCUMENTS: See "New Orleans".

PILOTAGE: Compulsory. Pascagoula Bar Pilots' Association ((601) – 762 – 1151). Pilot boat to be contacted on VHF Channel 16, pilot boat has black hull with white house, International light and sound signals to be made by vessel requiring a Pilot. Pilot to be taken aboard vessel in vicinity of Horn Island sea buoy. Usual safety measures are required, with respect to boarding. Vessels may anchor in this area while awaiting Pilot, there is a 35 ft. to 50 ft. depth with good holding bottom.

ANCHORAGES: Only anchorages permitted are in vicinity of Horn Island Sea Buoy or seaward.

RESTRICTIONS: Under normal conditions there are no entry restrictions as to time or state of tide.

From Horn Island Sea Buoy to Horn Island Pass the channel is 350 ft. wide by 40 ft. deep; from Horn Island Pass to Pascagoula River Turning Basin the channel is 350 ft. wide and 38 ft. deep; the Pascagoula River Turning Basin is 950 ft. wide and 38 ft. deep.

Channel into Bayou Casotte (East Harbour) from Junction Buoy to mouth of Bayou Casotte Harbour is 225 ft. by 38 ft. deep; thence at inner harbour channel is 300 ft. wide and 38 ft. deep into the Bayou Casotte Turning Basin; the Bayou Casotte Turning Basin is 940 ft. wide and 38 ft. deep. All dimensions listed are project dimensions; depths refer to MLW datum.

No vessel or tow shall enter Bayou Casotte Channel outbound after a seagoing vessel or tow has passed Buoy 30 inbound, and; no vessel or tow shall enter Bayou Casotte Channel inbound after a seagoing vessel or tow has passed Buoy 11 outbound. Vessels or tows which are at a dock should remain at the dock until the inbound seagoing vessel or tow has passed, or until it has reached its berth, whichever occurs first.

MAX. SIZE: Length of vessel is restricted to approx. 900 ft. by turning basin, no breadth restriction, draft 38 ft. at MLW. Normal tidal range 1.6 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Use of Pascagoula Marine Radio (KLU-775) is advisable for ETA cables to Agent. Stands by on VHF Channel 16 and operates on Channel 27 throughout 24 hours.

RADAR/VHF: Radar and VHF radio on pilot boat, Channel 16.

Every vessel shall, when entering the Horn Island Pass Channel, and the Bayou Casotte Channel, or when getting underway from a berth, or when approaching the Pascagoula Channel while transiting the Intracoastal Waterway:

(a) Maintain a radio watch on VHF – FM Channels 13 and 16 in accordance with Vessel Bridge to Bridge Telephone Regulations of January 1st, 1973.

(b) Check on other traffic operating in the area by transmitting on Channel 16:

> "SECURITY, SECURITY, SECURITY
> THIS IS .... (Vessel Calling)
> ENTERING..
> CHANNEL PROCEEDING FROM
> ....TO ....
> CHECKING FOR TRAFFIC, STANDING
> BY ON CHANNELS 13 and 16,...........................
> .... (Vessel Calling) OUT"

If other traffic replies, utilize Channel 13 for exchange of information relative to safe navigation.

TUGS: Tugs will join vessels in harbour or off docks. No escort required. Tugs lines normally are used.

BRIDGES: None affecting 38 ft. channels.

Two bridges across the Pascagoula River above the turning basin, not passed through between channel and harbour.

BERTHING: Private and public berths are available, by prior arrangement, in both the Pascagoula River Harbour (West Harbour) and the Bayou Casotte Harbour (East Harbour).

West Harbour – Public: Grain Elevator, 3,100,000 bushel capacity, 900 ft. berth at 780 ft. wharf and 38 ft. deep.

Terminal 'A' with transit shed, 500 ft. wharf and 38 ft. deep.

Terminal 'B' with transit shed, 544 ft. wharf and 38 ft. deep.

Terminal 'C' with bulk cold storage, 718 ft. wharf and 38 ft. deep.

South Clusters, 1 ship berth approximately 600 ft. by 24 ft. deep.

West Harbour – Private – Ingalls Shipbuilding: Note. These berths are normally occupied with ships being fitted out and are not normally available.

West Bank Shipyard, 4,410 ft. bulkhead, 5 berths by 38 ft. deep.

East Bank Shipyard, three 600 ft. piers, one 800 ft. pier, each 32 ft. deep.

East Harbour – Public:

Terminal 'E' with transit shed, 517 ft. wharf by 38 ft. deep;

Terminal 'F' with transit shed, 737 ft. wharf by 38 ft. deep;

Terminal 'G' with transit shed, 516 ft. wharf by 38 ft. deep;

Terminal 'H' with transit shed, 556 ft. wharf by 38 ft. deep.

East Harbour – Private:

Chevron U.S.A. Inc., Wharf No. 1, 5 berths by 38 ft. deep;

Chevron U.S.A. Inc., Wharf No. 2, 1 berth by 38 ft. deep; (crude and coke dock).

Chevron U.S.A. Inc., Wharf No. 3, 1 berth by 38 ft.;

Mississippi Chemical Company, 2 loading docks each 475 ft. by 34 ft. depth;

Chicago Bridge & Iron Company, slip 900 ft. by 16 ft. deep.

CRANES: The Port has a heavy lift capability of 400 tons by an arrangement with Ingalls West Bank Facility. Truck cranes with capacity up to 110 tons also available in the port area.

SPECIALISED CARGO HANDLING: Chevron U.S.A. Inc., Wharf No. 1 has facilities for handling acid, caustic, ammonia, and LPG, in addition to petroleum products. Chevron U.S.A. Inc., No. 2 has facilities for handling coke and crude. Chevron U.S.A. Inc., No. 3 has facilities for handling crude.

Mississippi Chemical Company loading docks are equipped for handling phosphate rock and other bulk materials, liquid and dry.

Terminals E & F are equipped for exporting bulk ores.

Gulf Cold Storage Inc.:

Freezer Area: 1.5 million cu.ft. of –10°F. storage.

Cooler Area: 500,000 cu.ft. of +40°F. storage.

Blast Freezers: 2× –50°F. Capacity 160,000 lbs. per day.

Location: Approx. 3 miles South of 1 – 10 of the West Bank area of the port. Adjacent to dock on a 38 ft. channel.

STEVEDORES: 12 hours notice requested to arrange stevedore gangs. *Straight Time:* 0800 hrs. – 1200 hrs. and 1300 hrs. – 1700 hrs. Mondays through Fridays except Holidays. All other hours and days are overtime.

MEDICAL: Agents to be advised if immediate medical attention is required. Free Pratique granted except in case of communicable diseases aboard, inoculations required by Public Health Service, etc. Doctors and hospital services readily available.

TANKERS: Chevron U.S.A. Inc. owns and operates 3 wharves on East side of Bayou Cosotte harbour. Facilities have 6 in., 8 in. and 12 in. lines with adaptors, discharge tanks with a capacity of 60,000 tons, 3 tanker berths with a 38 ft. draft. Wharf No. 2 for receiving crude oil from large tankers. Wharf designed and built for 50 ft. draft, but presently limited to 38 ft. draft on account of channel and seaward. Wharf No. 2 also handles coke ships.

Also see "Shipmaster's Report" and "Specialised Cargo Handling".

DENSITY: Density varies with the state of tide and wind, from fresh to salt water.

FRESH WATER: Potable water is available at most berths. Water at public terminals can be delivered at flow rate of 50 g.p.m.

FUEL: Large vessels are bunkered at berth in the harbour by 2 tank barges, operated by Fuel Services, Inc. All grades of fuel are available.

FIRE PRECAUTIONS: Usual safety precautions required. Verify unusual procedures for approval of U.S. Coast Guard.

GANGWAY/DECK WATCHMEN: Port guards are furnished for the general cargo terminals at the port's expense. At least 1 person must be on duty aboard vessel.

HATCHES: Opening/closing hatches by the crew is at the discretion of the ship.

CUSTOMS ALLOWANCES: Each crew member is allowed either 300 cigarettes or 50 cigars or 3 lbs. of tobacco. In addition, each member is allowed 1 quart of alcoholic spirits as regulated by provisions of the Mississippi Alcoholic Beverage Commission rules.

CARGO GEAR: No requirements for cargo gear other than it be certified by a recognised International organisation.

CONSULS: Many countries have consuls within a 100 mile radius of Pascagoula. (Mobile and New Orleans).

REPAIRS: Most deck and engine repairs could be arranged within port facilities.

DRY DOCKS: Ingalls Shipbuilding Corporation, West Bank Shipyard, has 1 launch pontoon (dry dock) with 38,000 ton capacity.

Ingalls Shipbuilding Corporation, East Bank Shipyard, has 1 graving dock, 485 ft. inside length, 75 ft. wide gate, 34 ft. deep, with loading capacity of 1 ton per sq. ft.

Flechas Shipyard has one 600 ton dry dock.

There are several marineways in vicinity, capacities 50 – 100 tons.

SURVEYORS: Licensed Marine Surveyors are available in Port.

REPATRIATION: The City of Pascagoula is served by regularly scheduled transportation. Vessel's Agent to arrange clearance with Customs and Immigration officials.

AIRPORT: An airport is available approx. 35 miles from the city and is served by regularly scheduled airlines.

TIME: The port of Pascagoula is on Central Standard Time, GMT minus 6 hours; clocks are moved ahead 1 hour during Summer months. (Last Sunday in April to last Sunday in October).

HOLIDAYS: New Year's Day (January 1st); King's Birthday (January 15th); Washington's Birthday (3rd Monday in February); Mardi Gras (41 days before Easter – Tuesday); *Easter Sunday/Easter Monday (1st Sunday after 1st full moon after March 21st); King's Memorial Day (April 4th); Memorial Day (Last Monday in May); *Independence Day (July 4th); *Labour Day (1st Monday in September); Veterans' Day (November 11th); Thanksgiving Day (Last Thursday in November); *Christmas Eve (December 24th); *Christmas Day (December 25th); *New Year's Eve (December 31st).

(*Non-working). Non-working holidays are observed from midnight of the holiday through to 0700 hrs. of the following day with the exception of Christmas Eve and New Year's Eve when the non-working portion of the holiday commences at noon.

Should any of the above holidays except Easter, Christmas Eve, and New Year's Eve fall on a Sunday the following Monday will be observed.

Elevator employees observe Martin Luther King's Memorial Day instead of Birthday.

Saturday shall not be considered as a layday in determining time ships are in berth in this harbour.

POLICE/FIRE/AMBULANCE: Telephone numbers for emergency services are: Fire 762-1133; Police 762-2211; Ambulance 762-6266 or 762-4848. Universal emergency No. 911.

TELEPHONES: Not available.

SERVICES: Facilities are available for compass adjusting. Tank cleaning and receipt of tank washings can be arranged by contract services available in the area.

SHORE LEAVE: Allowed for any crew member not detained by Immigration Office.

IDENTIFICATION CARDS: Standard Immigration Form I-95 to be made up for each crew member on arrival. Not necessary for crewmen already holding Form I-95 issued for the same vessel.

DELAYS: Berths at Public Terminals and the South Clusters are assigned by the Harbour Master of the Jackson County Port Authority. Berths at private docks are assigned by the respective owners. No exceptions to this are allowed. Berth at grain elevator is assigned by the Lessee-Operator, the Louis Dreyfus Corporation. No delays are encountered by following this procedure, emergencies excepted.

GENERAL: Some difficulty encountered by unscheduled tows who use harbour for shelter in inclement weather. Pilot Association aware of current situations. Study of traffic control system is being undertaken by the Port Authority, particularly considering hazards of tankers in Bayou Casotte 225 ft. wide channel. Ample barge storage is available in Barge Fleeting Area South of Ingalls Westbank Shipyard – capacity is 96 barges, operated by Colle Towing Company who may be contacted on VHF Channel 16 (KKV-933).

SHIPMASTER'S REPORT: June 1980.

Vessel: 32,000 g.r.t., loading ammonia at Chevron Refinery.

Approaches: Charts BA. 3981 and 3380.

Approach made from the South East along the Safety Fairway using "Satnav" positions for the approach to the fairway entrance. Failing this the echo sounder may be used to good effect in conjunction with sights.

Two large oil rigs were sighted at the South East entrance to the fairway, but their positions were not plotted.

On the final approach visibility is often reduced due to industrial smog and the outlying islands are low and give no reliable positions until about 8 miles off. There are 4 conspicuous flares beside the Chevron Refinery which will give a good lead to the "HIP" buoy. These flares are not marked on either chart, but their approximate position is Lat. 30° 20.2′ N., Long. 88° 29.3′ W.

Petit Bois Island is the first to show but with no distinguishcng features until close to it. "HIP" buoy is easily identified at least 8 miles away and shortly afterwards the channel buoys may be identified on radar. These buoys are not marked on BA. 3380, but help indentify "HIP" buoys should there be fishing boats in the vincinity. There are numerous fishing vessels in the approaches but they do seem to keep the fairway clear. Many tugs and tows also in the area.

Pilotage: There is no berthing at night for vessels of this size (32,000 g.r.t.) due to having to turn in the turning area above the berth. Vessels may sail at night but careful consideration should be given to weather conditions before agreeing to do so.

Contacted Pilot Office on VHF Channel 16, thereafter working on Channel 13.

Pilot boards from a fast, black hulled launch off "HIP" buoy, ladder on lee side about 1 m. above water.

CAUTION: The outer channel is well marked with conspicuous buoys but the configuration of the channel is liable to change. The approach may be swept with strong conflicting cross currents and, since the widest section is only 350 ft., very careful attention must be paid to steering.

Once inside Petit Bois Island the channel narrows to 225 ft. in places; the Pilots do have an unofficial 'one way traffic scheme' in progress but this is not always adhered to by tows and fishing vessels.

Proceeding inwards, the vessel is turned at the very head of the harbour with the assistance of 2 tugs; vessel is turned to starboard and the head tug then shifts from the port bow to the starboard bow for berthing. Berthing is always port side alongside.

There is not a great deal of room in the turning basin, although the Pilots say that vessels over 800 ft. are turned there regularly.

On sailing, with a deep draft (32 ft. maximum) special care must be paid to steering within the channel. With a width of just over 200 ft. there is no room for error. I would advise that the watchkeeping officer be in attendance on the helmsman throughout the passage.

Time from Pilot aboard to 1st line ashore is about 2 hours.

Berth: Chevron Refinery: Least depth sounded 12.2 m. Very good, with a substantial chicksan area and fairly good mooring arrangements.

Once made fast and loading a very careful watch must be kept on the moorings since large tankers pass up and down the harbour to the tanker berth close ahead; the shore personnel will not hesitate to stop loading if they think the moorings will allow the vessel to surge.

No motor access to the gate some 200 m. distant.

Telephone on the quay.

Loading: No difficulties were experienced. The facility is very keen on pollution and will watch the discharge of ballast very closely.

The refinery do require ballast to be discharged ashore but that is out of the question. A disclaimer will be presented for the ship to sign.

Since the upreach of the chicksan is not sufficient, the low extension or flexible hoses will have to be rigged prior to arrival. Shore connection is 8 in. 150 ASA and was done on this occasion by ship's personnel.

No vapour return line.

There is a recirculating system and there was no need to blow through lines on completion.

Product was cold at this call but 'warm' product has been experienced here in the past. Overall load rate was 343 t.p.h. which the shore personnel were extremely happy with. Hourly rates frequently over 500 t.p.h.

Shore Surveyor attended and all figures were based on ship's gauges.

Personnel generally helpful.

General: Fresh water available on the quay but reported as *not potable.*

Bunkers available.

Stores have to be manhandled along the jetty but there are small trolleys available.

Gangway: Best left turned in until in position thence no problem, being clear of obstructions.

No objection made to ship's crew "touching up" ship's side from quay.

U.S.C.G.: No inspection this call but they are known to carry out both cargo and navigational inspections.

Films: Exchanged by ship chandler: Bow and Stern Marine.

Consul: The nearest British Consul is at Houston or Atlanta, should any surveys be required.

AUTHORITY: Jackson County Port Authority, 3033 Pascagoula Street, P.O.Box 70, Pascagoula, Mississippi 39567. *Tel:* (601) 762-4041. *Telex:* 510-990-3405. *Contact:* Paul D. Pella, Port Director. Michael C. Torjusen, Harbour Master.

AGENT: Strachan Shipping Company. P.O.Box 1304, Pascagoula, Mississippi 39567. Tel: 601-762-0531 (Direct enquiries to Mobile). Cables: "Strachan".

PENSACOLA, Florida: 30.25 N. 87.13 W.

(See Plan Book)

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

BERTHING:

Berth Number	*Length (ft.)*	*Depth at MLW* (ft.)*	*Use*
No. 1	640	35	General Cargo and Bulk Handling Faciliites
No. 2	400	35	General Cargo
No. 3	425	35	General Cargo and Lumber
No. 5	425	35	General Cargo
No. 6	580	35	General Cargo

*While the Port of Pensacola has 35 ft. depth at MLW in berths, the Corps of Engineers project draft of 33 ft. is the controlling draft for the Port.

Transit Sheds:

Warehouse	
No. 1	72,000 sq.ft.
No. 5	72,000 sq.ft.
No. 6	90,000 sq.ft.
No. 8	83,000 sq.ft.
Total	317,000 sq.ft.

BULK HANDLING FACILITIES: *Dry bulk handling:* Bulk warehousing capacity is 88,100 sq.ft. in 2 buildings. Each building with rail and truck loading capability. Bagging services provided on the port premises through arrangements with private stevedoring companies.

TANKERS: *Private:* Belcher Oil Co. of Pensacola. J.R. Sauls, Manager, Mid Gulf Area, Port of Pensacola P.O.Box 12626. Pensacola, FL 32574. Tel: 904-432-2471. Facilities: Industrial, Marine Fuels. 6 bulk oil tanks of 662,000 barrels capacity connecting by pipeline to berths 1, 2 and 3. 5 positions for loading and unloading. 5 bunkering stations and a truck loading facility.

CRANES: Mobile cranes up to 85 tons.

EQUIPMENT: Leased Equipment: 18×6,000 lb. fork lift trucks, 8×9,000 lb. fork lift trucks, 2×5,000 lb. fork lift trucks, 1 front end loader, 2 motorised driven sweeper, 1 motorised driven scrubber, 1 paper clamp and stevedoring equipment: Fork lift trucks have individual heights of 10, 14, 15, 16 & 17 ft. Attachments permit conversion for handling paper rolls and bales.

FRESH WATER: Available.

AIRPORT: Pensacola Regional Airport is served by both domestic and international air carriers in addition to intrastate airline service.

AUTHORITY: Port of Pensacola, Marine Operations Department, City of Pensacola, P.O.Box 889, Pensacola, Florida 32594. *Tel:* (904) 436-4270. *Telex:* 702435. *Contact:* David A. Schaller, Port Director.

AGENT: Strachan Shipping Company, P.O.Box 951, Pensacola, Florida 32576. Tel: 904-423-8453. (Direct enquiries to Mobile). Cables: "Strachan".

PETERSBURG, Alaska: 56.49 N. 132.57 W.

Located on Mitkof Island, Northern end of Wrangell Narrows. Open all year.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: (From sea via Dixon Entrance up Clarence Strait to Guard Island.) Under pilotage from Guard Island.

ANCHORAGE: Good anchorage in Scow Bay, mud bottom.

MAX. SIZE: Harbour depth 24 ft. MLLW. Tides: Diurnal range 15.7 ft. Also see "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Immigration, Guard Island. Quarantine and Customs, local.

TUGS: 1×320 h.p.

BERTHING: Pacific American Fisheries Inc.: 75 ft. long, 65 ft. wide. Should dock at slack water. Strong current.

STEVEDORES: 1 gang.

REPAIRS: Marine Ways to 35 tons.

WATER: State approved water available.

FUEL: Diesel and gasoline available.

MEDICAL: 21 bed hospital.

TRANSPORTATION: Scheduled and charter airlines and ferry.

AUTHORITY: City of Petersburg.

PHILADELPHIA, Pennsylvania: 39.57 N. 75.10 W.

(See Plan Book)

DOCUMENTS:

3 Crew Lists Form I-418 (suggest 6 be made).
3 Passenger Lists Form I-418 (suggest 6 be made).
3 Customs Stores Lists (suggest 6 be made).
3 Curio Lists (own ship Form) (suggest 6 be made).
3 Narcotics Lists (own ship Form) (suggest 6 be made).

Manifest (Ship Cargo List). If Philadelphia first port of call, require 1 copy for Customs and 1 copy to be used as "traveller" surrendered last port of call. If Philadelphia not first port of call, 2 copies required, all cargo to be discharged at Philadelphia.

For Immigration Service:
Visaed Crew List.
Valid passport or Seaman's Book for each person on board.
Crewman's landing card (Form I-95) for each crew member.

PILOTAGE: Pilotage is provided by members of the Pilots' Association for the Bay and River Delaware who maintain a shore station and operations tower at Cape Henlopen. The pilot station is in operation on a 24 hour basis and guards VHF Channels 16 and 14. Telegraphic address is: Delpilots, 214 S. Eleventh Street, Philadelphia, Pa. 19107. Arrangements for Pilot may be made by the local Agent although an ETA and draft either by cable or VHF radio will be greatly appreciated and will facilitate prompt boarding on arrival. The pilot boarding area is inside a line between Entrance Buoys No. 5 and 6, or approximately 2 to 2.5 miles S.E. of Harbour of Refuge Lighthouse. Pilots may board further off-shore upon special request.

ANCHORAGES: Large and deep draft vessels awaiting berth are encouraged to avail themselves of the deep water anchorage adjacent to the Breakwater near the pilot station. There are 13 anchorage areas available along the Delaware for moderate size vessels of lesser draft.

Shipmaster's Report: Good holding ground at Big Stone Anchorage. There is a launch service from Big Stone Anchorage to the shore, call VHF Channel 14.

RESTRICTIONS: There are no restrictions imposed upon entry except those dictated by vessel draft. Throughout most of its length, the Delaware river is dredged to 40 ft. at MLW. In addition there is a mean tidal range of about 5.7 ft. Vessels of 39 ft. salt water draft can safely transit the river on a rising tide.

MAX. SIZE: Deep-draft oil carriers are lightered in a special anchorage approximately 10 miles N.W. of the pilot station. Vessels are restricted to a max. draft of 55 ft. by Federal Law.

Chesapeake/Delaware Canal: See "Wilmington" – Delaware.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

VHF: A port radio service operated by The Philadelphia Maritime Exchange on a 24 hour basis is also available to all vessels while transiting the Delaware River. VHF Channels 16 and 14 guarded for purposes of this service.

Ship reporting service in operation.

TUGS: Tugs normally join vessels adjacent to berth. Ship's lines are used.

BERTHING:

Northern Metal Co. Terminal	9 berths, depth 25 ft. to 32 ft.
Tioga Terminal	7 ,, ,, 40 ft.
Delaware River Terminal	4 ,, ,, 29 ft. to 32 ft.
Port Richmond	10 piers, depth alongside 26 ft. to 36 ft.
Delaware River	21 ,, ,, ,, 26 ft. to 35 ft.
Packer Avenue Terminal,	5 berths, depth alongside 35 ft.
Greenwich Point Tidewater Ore Terminal	2 berths 850 ft. length, depth 37 ft. to 42 ft.
Girard Point	3 piers, depth alongside 28 ft. to 36 ft.
Camden	3 ,, ,, ,, 30 ft. to 40 ft.
Gloucester	Ore Pier, depth alongside 25 ft. and 31 ft.

Port of Wilmington, 5 berths, depth alongside 35 ft.

CONTAINER HANDLING FACILITIES: *Tioga Marine Terminal:* Handles containerised and Roll-on/Roll-off cargoes. The terminal is equipped with 2 container cranes and a 300-ton mobile crane. Length of the marginal wharf is 3,300 ft., upper slip berth 725 ft. and lower slip berth 625 ft.

Packer Avenue Marine Terminal: Handles containerised and Roll-on/Roll-off cargoes. The terminal is equipped with 3 container cranes, one has a heavy lift capacity of up to 375 tons. The marginal wharf is 3,200 ft. in length and the Roll-on/Roll-off slip berth is 825 ft. in length.

BULK HANDLING FACILITIES:

Berth No.	Location	Operator	Berth Length (m.)	Berth Depth (m.)	Loading Rate (tonnes/p.h.)
Pier No. 124	Greenwich	Conrail	310	12.19	5,000 (coal)
Pier No. 122 South	Greenwich	Pennsylvania Tidewater Co.	260	12.19	3,000 (ore)
Pier E	Port Richmond	Energy Terminals Ltd.	260	12.19	2,000 (coal)
Camden-Becket Bulk Terminal	Camden	South Jersey Port Corp.	200	11.5	500 (coal)

STEVEDORES: Ship's Agents make arrangements for stevedore gangs. Agents should be kept advised of any change in ETA.

MEDICAL: Advance notice of requirements desirable to the extent possible. Hospital facilities are available.

FRESH WATER: Fresh water normally not available directly at berth. Fresh water available by tank truck or through fire department. Water by barge available.

River Associates, Inc. of Philadelphia, Tel: (215) 922 – 6027, provides wash water in Philadelphia and Delaware Bay with two barges, 220 tonnes and 1,000 tonnes capacity.

FUEL: Bunker C and diesel fuel available most oil terminals. Vessel's Agent should confirm berthing space at least 24 hours in advance.

TANKERS: There are 83 petroleum handling berths along the Delaware River. All terminals are equipped with reducers. There are slop (residue) facilities at most terminals. Some main terminals listed below:

Fort Mifflin	Arco Marine, Inc.	40 ft. depth
Point Breeze	Arco Marine, Inc.	32 ,, ,,
	Ballast Wharf	32 ,, ,,
Hog Island	Gulf Oil Terminal	40 ,, ,,
Paulsboro	Mobil Oil Terminal	30 ft. and 40 ft. depth
	Patterson Oil Terminal	36 ft. depth
Marcus Hook	B.P. Oil Corp.	35 ,, ,,
	Sun Oil Co.	33 ,, ,,
Westville (Eagle Point)	Texaco Inc.	40 ,, ,,
Pennsauken	Greater Valley Oil Co.	34 ,, ,,
Girard Point	Gulf Oil Co.	33 ,, ,,
Delair	Hess Oil Co.	31 ,, ,,
Delaware City	Getty Refinery	37 ,, ,,

Dirty ballast facilities:

Marcus Hook (Sun): Line 8 in. Max. quantity acceptable 1,800 tons. Rate 250 t.p.h. Clean ballast may be pumped overboard.

Marcus Hook (Sinclair): Line 8 in. Max. quantity acceptable 2,000 tons. Rate 250 t.p.h. Clean ballast may be pumped overboard.

Paulsboro (Socony): Line 6 in. Max. quantity acceptable 2,000 tons. Rate 150 t.p.h. Clean ballast may be pumped overboard.

Paulsboro (Esso): Line 10 in. Max. quantity acceptable 4,000 tons. Rate 800 t.p.h. Clean ballast may be pumped overboard.

Point Breeze (Atlantic): Line 6 in. Max. quantity acceptable, no limit. Rate 300 t.p.h. Clean ballast may be pumped overboard.
